President's address—W. W. Bishop.

ASSOCIATION OF AMERICAN LIBRARY SCHOOLS

President, Phineas L. Windsor, University of Illinois, Urbana, Ill.

First Session, Wednesday Afternoon,

Second Session, Saturday Afternoon

Program to be announced.

MICHIGAN LIBRARY ASSOCIATION

President, Flora B. Roberts, Public Library, Kalamazoo, Mich.

Wednesday Afternoon

Business meeting.

TRAVEL

A one and one-half fare has been granted by all railroads east of the Rocky Mountains in the United States and east of Fort William in Canada. Tickets will be on sale on June 22nd.

To secure this rate delegates must return over the same lines by which they go, and must reach destination returning before midnight of July 11th (except those from points in Colorado,

Idaho, Montana, Utah, New Mexico and Wyoming, who have a return limit of midnight, July 12th.) They must also present to the ticket agent an identification certificate which can be obtained from A. L. A. headquarters.

In addition there will probably be available in June reduced fare trips on many railroads.

The following are the one-way rates from the principal cities to Detroit. The upper berth will cost four-fifths of the price of the lower.

	Rail Fare	Lower Berth
Albany, N. Y.	\$19.69	\$ 5.63
Atlanta, Ga.	26.98	8.25
Baltimore, Md.	21.55	6.38
Birmingham, Ala.	26.89	11.25
Boston, Mass.	26.92	7.50
Buffalo, N. Y.	9.00	3.00
Chicago, Ill.	9.81	3.75
Cincinnati, Ohio	9.38	3.75
Cleveland, Ohio	5.93	3.75
Dallas, Texas	41.79	14.25

Winnipeg, Man.	41.16	12.00
Worcester, Mass.	25.32	7.50

*From Smith Falls. †Seat.

SPECIAL PARTIES

Delegates from New York, Philadelphia, Baltimore and Washington, will register with Charles

H. Brown, Bureau of Navigation, Navy Department, Washington, D. C., not later than June 12. Special Pullmans will be run leaving New York City, via Lehigh Valley R. R. from Pennsylvania Station at 8:10 p. m. standard time, Saturday, June 24; from Philadelphia, Reading Terminal, 8:40 p. m. standard time; from Washington, via Baltimore and Ohio R. R. at 5 p. m.; from Baltimore, Camden Station 5:55 p. m. The party will arrive at Niagara Falls Sunday morning, June 25, joining the Boston party after breakfast, visit the falls, take the wonderful Gorge trolley trip and sail from Buffalo at 6 p. m. (standard time), arriving at Detroit, June 26, 9 a. m.

Members of this party from New York, Philadelphia and points in the vicinity (except those wishing to return by a different route, or later than July 11), are advised to buy the convention round trip tickets reading Lehigh Valley Railroad—Michigan Central Railroad. (A. L. A. identification certificate required.) These rail tickets are good on the boat and may be used returning, either by boat or all rail.

Members from Washington and Baltimore are advised to buy summer excursion tickets to Niagara Falls, arranging with Mr. Brown for tickets on the steamer from Buffalo to Detroit. From Washington the additional charge for travel to Detroit via Niagara Falls, Buffalo and the boat is about \$7 over the all rail route.

New York and Philadelphia delegates who buy thru rail tickets will send Mr. Brown \$11.10 which will include lower berth, or including upper berth on train, \$10.35.

Those who buy excursion tickets to Niagara Falls, or one-way tickets to Niagara Falls, or one way tickets to Buffalo and desire party ticket on the boat should send (including lower berth on train), \$17.10, or (for upper berth on train), \$16.35.

. If trip on boat Buffalo to Detroit and return with special party July 1 is desired, send \$24.70, or \$23.95 which will include steamer transportation and berths back to Buffalo.

Washington and Baltimore members should send (including lower berth, Washington to Niagara Falls) \$11.85, or for upper berth on train, \$10.95.

Alternative route from *Washington and Baltimore*: Arrangements will also be made for members from Washington and Baltimore who wish to go all rail. Pullmans will be attached to the 12:18 p. m. B. & O. train Sunday, June 25, from Baltimore, 1:22 p. m. from Washington, arriving Detroit 7:15 a. m., Monday. Reservation for this train should be accompanied with check for \$6.38 for lower berth or \$5.11 for upper berth and mailed to Charles H. Brown, Bureau of

Navigation, Navy Department, Washington, D. C.

The *New England Party* will register with F. W. Faxon, 83 Francis St., Boston 17, by June 1st if possible and not later than June 12th.

This party will leave Boston (South Station) by sleepers June 24 at 6:10 p. m. standard time over Boston and Albany and New York Central Lines to Niagara Falls, join the New York party Sunday morning, and cover all points of interest as described above. Members may join party at Worcester, Springfield or Pittsfield.

Those desiring to go with this party and return home direct from Detroit will obtain identification certificate from A. L. A. Headquarters, Chicago, and buy a fare and one-half convention ticket to Detroit and return, over Boston and Albany, New York Central, Michigan Central Railroads. (This ticket is good in either direction on the Buffalo-Detroit steamers.)

Send Mr. Faxon \$15 which will cover lower berth Boston to Buffalo, breakfast and lunch at Niagara Falls, Gorge trip, trolley to Buffalo, dinner on steamer and stateroom berth (give name of roommate) to Detroit and return July 1st, 5 p. m. (If return is desired at some other time, so specify, that stateroom berth may be reserved. If upper berth Boston to Buffalo is used send only \$14.10). Prices will be somewhat less from points west of Boston.

Those who wish to take post conference trip returning should buy circle tour ticket Boston to Niagara Falls, and return via International Ry. Co. trolley to Lewiston, Canada Steamship Lines to Montreal and Central Vermont R. R. to Boston. Such delegates will send Mr. Faxon \$25 (\$24.10, upper berth) which will include the steamer ticket Buffalo to Detroit and return July 1.

Delegates from *Buffalo, Hamilton, Toronto* and from western New York who desire to join the eastern parties from Buffalo to Detroit will make stateroom reservations, with Mr. Faxon, and be welcome to use the party ticket, if returning July 1. Register by June 1st—Buffalo to Detroit and return, \$11.50, stateroom berth \$2.10 each way.

The *Cleveland* party will register with Gilbert O. Ward, Cleveland Public Library, before June 1 if possible, and in no case later than June 12.

The cheapest and most comfortable route from Cleveland to Detroit is by the D. & C. Navigation Co., steamers leaving Cleveland 11 p. m. due in Detroit 6:15 a. m. (eastern time). The fare is \$6.50 round trip, \$3.60 one way. Berth in stateroom \$2.10 each way. Three may occupy one stateroom, \$4.20. In registering give name of roommate, and specify day of going and day of

DOWNTOWN DETROIT

Most of the places of interest to conference visitors will easily be located by means of this plan. The Hotel Addison and the new main library are on Woodward, too far north to be shown. The Charlevoix is not marked, it is opposite the Kresge Building marked 29 on the plan.

DEMOCRAT PRINTING COMPANY
 MADISON, WISCONSIN

Register with John F. Phelan, Chicago Public Library, before June 15 sending him fee of \$1.25 to cover dining car service, plus \$1.50, if you desire seat in Pullman.

Delegates from the *Southwest* desiring to travel together should purchase tickets reading via Wabash R. R. from St. Louis to Detroit. It is possible that a summer excursion rate may be in force in June that will be less than the fare and a half convention rate. The special party will leave St. Louis Sunday, June 25th, at 11:52 p. m. in special Pullmans, due in Detroit Monday, at 1:35 p. m.

Register with James A. McMillen, Washington University Library, St. Louis, Mo., before June 12 if possible, sending him \$4.50 for a lower berth or \$3.60 for an upper.

POST-CONFERENCE TRIP

A post-conference trip under the conduct of Mr. Faxon will leave Detroit on Saturday afternoon, July 1, arrive Sunday morning at Buffalo. travel via Niagara Falls and Lewiston to Toronto arriving 3 p. m. (those who wish to visit Niagara Falls or to spend the day in Buffalo can take the 6:20 steamer from Lewiston, due in Toronto at 8:45 p. m. After lunch (at which the party will be the guests of the Toronto Public Library) by steamer to Thousand Islands arriving 7:30 a. m. on Tuesday. Leaving on Wednesday morning at 7:30 the party will reach Montreal in time for dinner. Thursday will be spent in sightseeing and on the following morning the personally conducted trip ends. The total cost will be \$43. to which must be added transportation which most of the members will possess as part of the original round trip purchase.

TO ROTARY MEMBERS

Will all Rotary members who expect to be at the Detroit Conference send their names to George T. Settle, librarian of the Louisville Public Library, who is in charge of preparations for a Rotary luncheon during Conference week.

TO COUNTY LIBRARY WORKERS

In connection with exhibit, President Root of the county library will deliver a radio talk on county libraries. This will be broadcasted by the *Detroit News* and will be received by the convention at one of its general meetings.

Delegates especially interested in County Libraries are invited to visit some of the Wayne County Library Centers on Friday afternoon, June 30th. In order to plan for transportation, those wishing to be included in this trip are asked to sign to the information desk before Wednesday evening, June 28th.

N. E. A. LIBRARY DEPARTMENT

THE meeting of the Library Department of the National Education Association will be held at the hall of the Boston Public Library on July 3d, 5th, 6th, 7th and 8th. On the 3d will meet the Advisory Board, and the program proper will begin on Wednesday, July 5th, with a library luncheon at the Hotel Vendôme, followed by talks on library topics. Those expecting to attend should notify Orlando C. Davis, Librarian, Waltham, Mass., or the Secretary of the Division, Miss Margaret E. Ely, Public Library, Chicago, Illinois. At 2:15 the subject of "How An Adequate Library Shall Be Established Where It Is Not Now Developed" will be discussed, from the point of view of the school by Miss Martha C. Pritchard of Detroit Teachers' College; of the locality by Sarah B. Askew of the New Jersey Library Commission; of the state by Director James I. Wyer of the New York State Library; and of the nation by Joy E. Morgan, editor of N. E. A. publications. Florence M. Hay of Augusta, Maine will speak on "Libraries and Rural Schools"; Ruth E. Drake of Chazy, N. Y., on "The Consolidated Rural School Library"; and Sherman Williams, president of the Department, on "Libraries and Librarians." On Thursday afternoon at two o'clock there will be discussion of How the library helps the foreigner to make his American contribution, led by Ernestine Rose of the New York Public Library; on Effective co-operation between the public library and the public school, by Bertha McConkey of Springfield, Mass.; The daily newspaper in school, by O. S. Rice, Madison, Wis.; The spirit of library service, by Mrs. Edward Carter, Port Arthur, Texas; Story telling, its relation to literary appreciation by Edith C. Parker, Buffalo, N. Y.; and on The pupils' contribution to the success of the school library, by Mary E. Hall, Brooklyn, New York.

There will be a joint session with the National Council of Teachers of English on Friday at two o'clock when "Books for Boys" will be discussed by A. B. DeMille of Winthrop Highlands, Mass.; Opportunities in junior high school work by Laura Grover Smith of Los Angeles, Cal.; The stimulation of home reading, by Helen Cosgrove, New York City; Training for school librarians, by Ruth Tobey, Terre Haute, Indiana; The child's own reading, by Frederic G. Melcher, New York City; and Library work in normal schools to fit its students for their work in teaching, by Mary E. Richardson, State Normal School, Geneseo, N. Y.

A business meeting will be held on Saturday morning at ten o'clock.

Do You Know that

we furnish Library Supplies for use in your Book Binding Department? Each of the following items has been chosen by us after careful test and is recommended with confidence for its particular work.

For the shellacking of book covers there is nothing better than

H. R. H. WHITE SHELLAC prepared after our own formula, especially for library use and from an excellent grade of shellac. Supplied in earthen jugs.

H. R. H. SHELLAC JAR This is our own invention and is entirely new in idea. Prevents all waste, keeps the shellac from evaporation and from the effects of light, preserves both shellac and brush in good condition ready for use at any time.

RUBBERSET BRUSHES These are not furnished with the HRH Shellac Jar. We have selected these as the best for good work and carry them in three sizes; we suggest the 1½-inch width as being the most useful.

H. R. H. BOOK WAX This is an excellent grade of wax and ensures a hard water-proof surface to book covers after having been shellacked.

H. R. H. FLEXIBLE GLUE is the best of its kind for Library work; it is put up in 1lb. and 2lb. tins all ready mixed, needs only heating. Will not crack or chip after it has set or while the book is in use.

We also supply in convenient size pieces and in packet form

Vellum Book Cloths
Japanese Tissue

Book End Papers
Onion Skin Bond

White Cambric
White Flannel

LATEST and BEST RADIO BOOKS

Radioactivity and Radioactive Substances. By J. Chadwick, M.Sc. 32 illus. and 9 tables. Price, 85c. With a Foreword by Sir Ernest Rutherford, F.R.S. An introduction to the study of radioactive substances and their radiations. The nature of radioactivity and the bearing of radio-active transformations on the structure of the atom.

"The virtues of this little volume of the Pitman Technical Primer Series are that the author does not essay to explain more of his subject than a hundred-page book properly can, and that he presents his material in a logical order and not in the chronological order, which is so frequently done, to the confusion of the average reader." —*N. Y. Saturday Evening Post.*

Directive Wireless Telegraphy. Direction and Position Finding, etc. 57 illus. and 5 tables. Price, 85c. By L. H. Walter, M.A.

Continuous Wave Wireless Telegraphy. 58 illus. and tables. Price, 85c. By B. Mittell.

Telegraphy, Telephony and Wireless. By J. Poole. Price, \$1.00.

"This volume is technically sound, excellently written and produced, and is recommended confidently as an exceptionally comprehensive and accurate introduction to the subject." —*Electrical Review.*

Marine Wireless Pocket Book. By W. H. Marchant. Price, \$1.75. (Ready April 1)

The work is divided into six sections. The first section contains a brief outline of the principles of various electrical apparatus. Sections 2-5 deal with the different instruments specially designed for wireless work. The various types of transmitters and receivers are dealt with very fully. Section 6 contains regulations, codes and similar information which is of special interest to the Marine Operator.

TENNESSEE LIBRARY ASSOCIATION

THE Annual Meeting of the Tennessee Library Association, scheduled for this month, has been called off and in its place it is planned to hold a joint meeting of southeastern state associations at Signal Mountain, Chattanooga, Tennessee, probably in October.

MISSISSIPPI LIBRARY ASSOCIATION

THE sixth annual meeting of the Mississippi State Library Association was held in the Representative Hall, Jackson, on May 4th-5th.

A fine paper by Mrs. A. K. Hamm of Meridian Public Library, on the value of co-operation, was followed by an able discussion of college libraries by Miss Alice Mayes, Mississippi University, and by a talk by Miss Beulah Culberson on recruiting for librarianship.

In the afternoon a very able address was delivered by Dr. E. P. Gaines, on how to get people to read good literature. Then followed a round table discussion on subjects touching every phase of Library work. This was continued on the following day when Henry M. Gill of New Orleans was the principal speaker.

The Association went on record as favoring some form of certification.

This was the most widely attended, and the best two days session in the history of the Association and those present feel that the outlook for Library work in Mississippi is a bright one.

W. F. MARSHALL.

NORTH DAKOTA LIBRARY ASSOCIATION

THE North Dakota State Library Association held its Sixteenth Annual Meeting at Bismarck, April 28th-29th.

Discussion of county libraries was led by Miss Mary E. Downey, director of the State Library Commission, who spoke on "The County Library in North Dakota." Mrs. Sadie Calkins, of Dickinson, discussed "The County Library in California," which state she has recently left. Lewis F. Crawford's presentation of an intensely interesting bibliography of state historical material inspired those present to give special attention to local history in their libraries. A round table on "Everybody's Library Problem" was led by Miss Downey, and a book symposium was presided over by Ellen Hedrick, librarian of the State Historical Society, who also discussed "Some Aspects of the Modern Novel" as exemplified in "Dust" and "Cytherea." C. L. Young spoke on "The Trend of Modern Poetry" and J. Leonard Bell, of the First National Bank, on "The Revival of the Essay."

After dinner on the first evening, Governor R. A. Nestos, formerly president of the State Library Association, spoke on "The Library in

the Life of the State." Mrs. L. N. Carey, of Mandan, president of the State Federation of Women's Clubs, discussed "The Library and Women's Clubs." Attorney General Svenbjorn Johnson, first legislative reference librarian of North Dakota, told of the "Legislative Reference Library When It Was New," and Minnie G. Nielson, State Superintendent of Schools, closed the program with a brief discussion of "The Library and the School."

A business session was held in the Senate Chamber of the Capitol and the following officers were elected: President, Clara A. Richards, Fargo; vice-president, Bessie Baldwin, Williston; secretary-treasurer, Marion Edwards, Jamestown.

Following Dr. Melvina R. Gilmore, Curator of the State Historical Society spoke on "Nativism"—the theory that our native wild life should be treated carefully and that the state may be made beautiful by the perpetuation of the native plant and animal life.

ONTARIO LIBRARY ASSOCIATION

THE Twenty-Second Annual Meeting of the Ontario Library Association was held, as usual, on Easter Monday and Tuesday, April 17 and 18, 1922, in the Toronto Reference Library building. A good attendance included ten of the past presidents of the Association. There have been eighteen presidents, of whom sixteen are living. This attendance of the past-presidents from year to year has been a distinctive feature of the O. L. A.

The program provided for two main topics, the first of which was the rural library. Dorothy Thompson, of the Public Libraries Branch, Department of Education, spoke on the county library system with special reference to Great Britain and the United States, and Paul M. Paine of Syracuse, N. Y., on rural library extension. The discussion that followed this topic was suggestive and decidedly optimistic, and a committee was appointed to study this matter of rural library extension, to report at a later meeting.

The second main topic was books. In his presidential address, W. J. Sykes, of Ottawa, spoke of the bearing of letters and memoirs on history, and he was followed by the Rev. W. T. Herridge, of Ottawa, on "Books and Life."

On Tuesday morning Mr. Paine presented a powerful plea for freedom in the choice of books, periodicals and newspapers, under the title "Let the Other Side be Heard"; and F. J. A. Morris, of Peterborough, gave a masterly paper on the book collection of a lover of science, under the title of "Nature Books." A series of five-minute talks presented some out-

THE Canal family of Treviso, Italy, would be willing to sell their private library to an American institution or individual who would keep the collection together. It contains 18,000 volumes, including 200 incunabula and 4,000 sixteenth century books in the finest condition. It is particularly strong in the Classics, Italian Literature, and Music. It includes the libraries of the sculptor Canova and the poet Carrer. The American representative is Mr. A. N. FACCIO, 1352 East 48th Street, Chicago, Illinois. Further information may be secured from him or from Professor ERNEST H. WILKINS of the University of Chicago.

standing books of travel, as follows: Agnes Lancefield, of Windsor, "United States"; Fred. Landon, "Russia"; and B. Mabel Dunham, B. A., of Kitchener, "Greece."

The Round Tables on Tuesday afternoon dealt with: Book selection for the books of 1921, led by Agnes Lancefield, Windsor; children's work, by Lillian H. Smith, B. A. Toronto; and reference work, by Miss M. H. Baxter, London.

The exhibit of books and library supplies in the Hall leading to the Assembly Room was a very attractive feature, several new firms being represented this year.

Hugh S. Eayrs, Secretary of the Toronto Branch of the Canadian Authors' Association, gave the hearty thanks of the Authors' Association to the Ontario libraries for their active co-operation in the Canadian Book Week of 1921, and announced that plans would be considered for a better Canadian Book Week in 1922.

The Report of the Secretary-Treasurer showed a comfortable financial situation and presented a summary of library work in Ontario, Great Britain, United States, and elsewhere.

To Dr. Locke, and the staff of the Public Library, and to the Public Library Glee Singers who contributed several songs on the opening evening is due much of the pleasure of the meeting.

Officers for 1922-23 are: President, W. H. Murch, St. Thomas; vice-presidents, W. Briden, St. Catharines; and G. W. Rudlen, Sault Ste. Marie; secretary-treasurer, E. A. Hardy, Toronto.

E. A. HARDY, *Sec.-Treas.*

LIBRARY CALENDAR

June 15-18. At North Scituate, Mass. Massachusetts Library Club. Headquarters at the Cliff House.

June 26-July 2. In Detroit. Headquarters at the Hotel Statler. Forty-fourth annual conference of the American Library Association.

MAESTRO BOOKS

THOU ISRAEL By Charles Francis Stocking, E.M.

A stupendous novel of present-day conditions, weaving a mighty theme in an absorbing story developed in a rare Syrian, Egyptian, and New World Setting. In its remarkable interpretation of life, death, mind, matter, and the future state it is a thought-compelling response to a world need.

Colored frontispiece, cloth cover, \$2.50 net. Leather cover, \$3.50 net. (Edition de Luxe) Leather cover, all gilt edges, \$4.00 net. Postage 15 cents.

CARMEN ARIZA By Charles Francis Stocking, E.M.

The most powerful novel of religious and political intrigue ever written. Its diverse threads run from the Vatican to the trackless jungle of South America—from the Spanish Main to Washington and New York. *Carmen Ariza* and *Thou Israel* afford the final answer to the religious question and are the only novels that have handled it in a strictly scientific way and worked it out to a demonstrable solution.

Colored frontispiece, cloth cover, \$2.50 net. Leather cover, \$3.50 net. (Edition de Luxe) Leather cover, all gilt edges, \$4.00 net. Postage 15 cents.

THE DIARY OF JEAN EVARTS

By Charles Francis Stocking, E.M.

In this beautifully written treatise, composed by the author in the sun-kissed hills of California, a young girl in the last stages of tuberculosis, hopeless of human aid, and denouncing God and man-made creeds, receives a new truth—and with it a new sense of life. How this was accomplished is the vital message which this book has carried around the world to thousands of helpless, discouraged sin-weary sufferers becoming truly a "light shining in dark places."

Cloth, \$1.75 net. Morocco, \$4.00 net. Postage, 10c.

BROYDE, Isaac, cataloger for the Jewish Division of the New York Public Library, died on April 15th. Dr. Broydé, who was an authority on Jewish medieval philosophy, came to New York in 1900 to assist in writing and editing the Jewish Encyclopedia, and his knowledge of Hebrew and Arabic enabled him to make contributions of permanent value to knowledge in this field.

CHENEY, John Vance, died in San Diego on May first. Mr. Cheney was librarian of the San Francisco Public Library from 1877 to 1884, and of the Newberry Library, Chicago for the next five years. He was the author of several books of verse and of two volumes of essays.

COX, Fannie, 1914 Wis., became head of the Circulation Department, Atlanta Public Library in April.

CRAWFORD, Doris, 1915 L. A., reference librarian at Lewiston, appointed librarian of the Boise (Idaho) Public Library.

EISELE, Florence, 1917 A., appointed librarian of the Texas Oil Company, Port Arthur, Texas.

FROST, Alice A., 1919 Wis., appointed librarian, Junior High School, Long Beach, Cal.

GJELSNESS, Rudolph H., 1920 I., has resigned from the staff of the University of Oregon library to become bibliographer in the University of California Library.

GREENE, Margaret, 1911 Wis., has resigned as librarian of the Public Library, Minot, North Dakota, to accept the position as head of the Deposit Station Division under the Branch Department of the Seattle Public Library.

HALL, Sophia, 1916 Wis., appointed librarian, Municipal Information Bureau, Extension Division, University of Wisconsin.

HERNLEM, Mrs. Arthur F., ex-1915 Wis., (Mabel Graham), is working on an analytical catalog for the library at Red Wing, Minn.

HULL, Carl W., librarian of the First Corps Area, United States Army, Boston, Mass., has resigned to become librarian of the Millinocket (Me.) Public Library, effective June 1st.

JENKS, Edwin M., 1903 N. Y. S., is librarian of the Newspaper Club, of New York, which has recently appointed as its library committee Thoreau Cronyn of the *New York Herald*, chairman, Don Marquis of the *Sun*, and Mr. Jenks who is also with the *Herald*.

KETCHAM, Dorothy, 1916 Wis., is director of the Social Service Department in the hospital of the University of Michigan. She is organizing a library for the use of the patients.

MCMANIS, Rumana K., 1915 Wis., has now acquired The Hidden Bookshop at 9 New St., New York City, of which she has been manager for some months.

MOSHIER, Marion, 1919 S., appointed assistant librarian of the Skidmore School of Arts, Saratoga Springs, N. Y., and will start her new duties in September.

ROWE, Alice T., of the Bridgeport (Conn.) Public Library, became librarian of the Nashua (N. H.) Public Library on May 1st, in succession to Carrie Barker.

SHARP, Kathryn, 1914 Wis., appointed acting chief of the Accession Division of the State Library, Columbus, Ohio.

SHERMAN, Clarence E., 1911-12 N. Y. S., who, has been for the past five years librarian of the Lynn (Mass.) Public Library, is to become assistant librarian of the Providence (R. I.) Public Library on August 15th. His appointment will be in addition to the present force. Mr. Sherman before taking charge of the Lynn Library was assistant librarian at Amherst College.

STEINER, Bernard C., librarian of the Enoch Pratt Free Library, Baltimore (Md.), is the author of a life of Roger Brooke Taney, chief justice of the United States Supreme Court, which has just been published by the Williams and Wilkins Company of Baltimore. A portrait and biographical sketch of Dr. Steiner are given in the spring number of the *Bulletin of Bibliography*.

New York

"HOW TO IMPORT"

A Note on Library Economics

A recent article on this subject showed that book importing is easy and very economical if you deal with a firm that knows the export trade. Messrs W. & R. Holmes, Dunlop Street, Glasgow, and of Lancashire, have connexions all over the world. Their Library Department supplies to libraries of every description, and it is highly organised to that end. Place your orders for books published in England with them and secure a prompt and efficient service, post paid. Monthly priced list of books published in England mailed free on application,—send a card for it.

The Best List of Children's Books Available

¶ We announce the publication of the fifth revised edition of *The Bookshelf for Boys and Girls*. The 1922-23 issue will be printed and ready for distribution by October 10—one month in advance of Children's Book Week. It will be thoroly re-edited, care being taken especially to list the important new books of last fall and this year. There will be a new attractive cover design by Maurice Day.

¶ Librarians have found this list effective in giving aid to parents and others who were buying books for Children's Week and the Holidays. It is sold in imprint quantities—thus providing libraries with a serviceable advertising medium at very low cost.

*Samples 1921-22 editions
are available upon request.*

Plan your "Good Book Week" Publicity Now!

In your plans the distribution of the Bookshelf should be included, for it is the most comprehensive guide for readers and buyers of books available

Published—Semi-monthly, Sept. to June inclusive; Monthly in July and August—at 62 West 45th Street, New York.
Entered as 2nd class matter June 18, 1879, at the post office at New York, N. Y., under act of March 3, 1879.

Copyright, 1922.

Enduring Leather for Books

MR. DANA in his "Library Primer," page 204, says:—"But after all, bear in mind the saying of the best of binders, Cedric Chivers, that a book is not 'bound' in the proper sense of the word unless it is bound in leather." And "enduring" leather, Mr. Dana says, "is still obtainable at a price."

All Chivers' leather bound books will from now on be done in this "enduring" leather, at no extra cost.

This leather makes a permanent covering for books requiring permanence.

In old libraries leather has lasted hundreds of years. Our leather is prepared in the same way and will last as long.

Leather helps to bind the back of a book: other materials only cover it.

Leather has been discarded because its preparation by the outside manufacturer was faulty and hurtful. When binders prepared their own leather from the crust, leather lasted the life of the book. See any old book ninety years old and more, and compare it with any leather-bound book since 1860.

Chivers is the only binder who prepares and dyes his own leather. He is able to produce this beautiful, soft, tough, pliable, and reliable leather at the same price as the ordinary leather, because from the raw skin to the librarian there is only one handling and one profit—that of the bookbinder, who for the first time for one hundred years, accepts sole responsibility for the leather he uses.

Buckram, cloth, and other artificial materials cover books satisfactorily for special purposes, and we undertake such work. But they cover books only and do not help as leather alone does to bind the back of the book.

CHIVERS BOOK BINDING COMPANY

LIBRARY BOOK BINDERS AND BOOKSELLERS

911-913 Atlantic Avenue

Brooklyn, N. Y.

The magnificent Detroit Public Library is completely equipped in Art Metal Steel. At the right is a glimpse of the Art Metal bookstacks and one of the Art Metal stairways.

The Library in Art Metal

When you visit the beautiful Detroit Public Library, inspect the Art Metal equipment and note its completeness.

Starting with the empty building, Art Metal installed the seven-story bookstacks including all structural steel for the interior as well as booklifts, elevator and three stairways. Glass door bookcases, book trucks, sorting tables and planfilng equipment were also supplied by Art Metal.

Art Metal Library Engineers are men of long experience in equipping libraries of all sizes. They will be glad to serve library officials and architects without charge or obligation on problems of library construction and arrangement.

Equipment of interest to library officials will be on display at our Detroit Office, 216 Mc-Kerchey Building, 2631 Woodward Avenue, during the Convention. Your inspection is cordially invited.

Art Metal
JAMESTOWN, NEW YORK

World's largest makers of steel and bronze equipment for libraries, banks and public buildings.

LECTURE COURSE
ON WRITING LIBRARY NEWS

Advance Enrollment is Desirable

A series of five lectures on Writing Library News will be given at Detroit during the A. L. A. Conference by Prof. Willard G. Bleyer, Director of the Course in Journalism at the University of Wisconsin.

The lectures will be given, probably in the small Banquet Room on the Ball Room floor at the Statler, at 8:15 every morning from Tuesday to Saturday, June 27 to July 1, inclusive.

Professor Bleyer will be available every evening except Saturday for private and informal conference with all who are enrolled for the course.

There will be a \$2.00 fee for the course.

More than fifty persons have already enrolled. Register for this course with A. L. A. Headquarters, Chicago: Miss Ida F. Wright of Evanston, Illinois, will have the tickets and be in charge of arrangements at Detroit.

Professor Bleyer says that much time will be saved if those who take the course will have copies of his book on Newspaper writing and editing (Houghton) in their hands during the lectures.

American Library Association

78 East Washington Street, Chicago

AT THE CONFERENCE in DETROIT

DURING the Forty-fourth Annual Conference of the American Library Association in Detroit, June 26 to July 1, you are cordially invited to examine the first seven volumes of *Compton's Pictured Encyclopedia* and sample pages of the index volume in Room 1371, Hotel Statler, just across the hall from the Conference Room of the Association.

Here at your leisure, you may become acquainted with the many distinctive developments in America's Newest Encyclopedia, which merit your attention as a librarian.

F. E. COMPTON & CO., Garland Bldg., Chicago

100 FREE Pages of COMPTON'S PICTURED ENCYCLOPEDIA

Pictured

Thousands of pictures, chosen from more than half a million, 99% of which are in halftone (like the one reproduced at the right) or in color. The only encyclopedia in which halftones are incorporated with the text they illustrate—right where they belong! There is a picture for every idea that needs a picture. Unnecessary parts of photographs have been removed. By means of a special caption and legend (as illustrated) each picture is made to tell its full story.

New Maps

Every one made since the World War.

Edited

By scholars of international reputation.

Headings

That catch the interest and lead into the article.

Guide Posts

That indicate contents of every page.

Text

Composed in clear, vivid style. Interesting but not "written down" to the child.

MECHANICAL THUMB

Of all the brainy things machinery does in the making of a book, one of the most remarkable is the work of the feeder of the folding machine, shown here. Just as you sometimes start turning a book page with the moistened thumb that roller finger pushes up one sheet at a time, while that hooked rod in front holds the pile firm. Then the tube at the right blows a jet of air under the sheet and loosens it from the rest so that it slides quickly through the folding machine where the entire 32 pages are folded into two separate sections, ready for the "gathering" machine. But the strangest thing is yet to be told. If that little roller-thumb should happen to pick up two sheets, what do you suppose it does. It stops and won't do another thing until you come and straighten matters out! (Picture and legend taken from page 160. Reduced in size).

100 Pages FREE

For 100 free sample pages write us on your library stationery. Please address Dept. 306.

**F. E. COMPTON & CO.,
GARLAND BLDG., CHICAGO**

Fact-Index

An invention in indexes—occupies over 300 pages in the eighth, the last volume—pronounces, defines, explains, locates, describes—in itself a quick, concise dependable miniature encyclopedia. Indexes every fact in the first seven volumes, and adds thousands of others which one would not expect to find in a work designed primarily for children.

Up-to-date

Every word written since the World War—new in text and treatment. Especially adapted to the new methods of teaching.

Properly Proportioned

With the needs of the child ever in mind.

Well Organized

Alphabetically arranged—pictures right with the text—no duplication.

Comprehensive

All organized knowledge included.

Tabloid Information

Whole subjects epitomized.

American

Prepared in America for American children.

"The Best List of Children's Books Available"

"No single publisher, dealer or library can hope to produce so nearly a perfect publicity medium as this. Prominently featuring the selection of titles by three disinterested specialists, text shows a care in choice and annotation which places it almost above criticism. Each page is made attractive by reproductions which serve several useful purposes both as advertising and as information. This annual list has undoubtedly had already a vast influence in directing boys and girls, their parents and friends away from the cheap and insipid among juvenile books."

—Joseph L. Wheeler

Librarians have found this list effective in giving aid to parents and others who buy books for Children's Week and the Holidays. It is sold in imprint quantities — providing libraries with a serviceable advertising medium at very low cost.

Samples 1921-22 edition are available upon request.

The Book Shelf for Boys & Girls

This is a specimen copy "Bookshelf for Boys and Girls," listing and presenting a completely classified list of the best books for all ages. This catalog is supplied to Libraries and Bookstores for distribution to book readers at fractional manufacturing cost with imprint in this space.
100 Copies, \$7.50 500 Copies, \$26.50 1,000 Copies, \$46.50

Unique cards—100% rag stock

Why do Library Standard catalog cards stay crisp and clean even after years of fingering, with never a dog-eared corner or pulpy edge to impede the progress of busy, searching fingers?

Library Standard cards are made according to a special formula that insures absolute uniformity. They are unique because they actually contain 100% rag stock. And the cards are cut by the most up-to-date machinery—some of it patented by L.B.—which means that

every L. B. card is almost microscopically like every other one.

Over 26 years of experience have proved to thousands of librarians that Library Standard catalog cards are more durable, more reliable—therefore more economical in daily use.

Investigate Library Standard cards. Send to our nearest branch for samples. Test them. You will be delighted with their quality and the low prices which enormous production enables us to quote.

Notes on Some New Zealand Libraries*

By CAROLYN P. GREEN

Reference Librarian of Library of Hawaii

WHEN I bade you all goodbye and sailed away on the "Niagara," I little thought that I would be called upon to report on the libraries of New Zealand. And, by the way, let me tell you of one I visited which is not in New Zealand at all.

Nine days out from Honolulu our first stop was at Suva, on the island of Vitu Levu, one of the Fiji group. A very interesting day was spent in the quaint little tropical town, like the Honolulu of forty years ago, with the exception of the extreme heat, and the Carnegie Library on the main street. Attracted by the name on the two-story concrete building, I strolled in and found a small collection of shabby books. The building was being renovated and the reading-room on the upper floor closed for repairs. The young lady at the desk said that she had only been there three weeks, and was re-organizing the library. As there were no records, she did not know the number of volumes. Many of them she would discard. The books had never been classified beyond a separation of classed books from fiction; and there was no catalog. That librarian had my sympathy! I was sorry that the short stay of the steamer on our return six weeks later did not warrant another visit; but I noticed an item in the Suva newspaper to the effect that Miss Brown had done much towards re-organizing and improving the public library.

It took this trip to make me realize how little I knew of the geography of the southern hemisphere. The Maori legend is that New Zealand was formerly a fish, which in its struggles at being caught broke in two parts, and thus the North and South Islands were formed, separated by Cook Strait ninety miles in width. This Dominion, with a population of over one million people has only two free public libraries; one in the city of Dunedin, the other in the little

town of Timaru. But we must consider that this is a very young country, first settled by white people in 1841, only eighty years ago; a country of marvellous resources, with the surface only touched as yet.

It boasts four large cities, Auckland and Wellington on the North Island, Christchurch and Dunedin on the South Island. It was my fortune to visit a library in each city, and in every place I found the librarians most courteous and eager to tell of their work and to hear what we are doing in Hawaii. The idea that American libraries have an unlimited supply of money was very prevalent! The number of volumes in these four libraries ranged from thirty-six thousand to fifty thousand volumes. All were classified according to the Dewey system; card catalogs were in use, some beautifully written in long hand, others typed in the modern way.

As there are no library training schools, each librarian trains his own helpers. The number of workers on each staff is small, not more than eight. The hours are about the same as they are here, including Sunday and night duty. Pages are unknown and the assistants do all the shelving of books. In every place I found the open shelf system. One book at a time, whether classed or fiction, could be drawn on a card, and held for one week only. In one place, however—I think it was Wellington—they allowed two books on a card, and the time was two weeks instead of one. Nevertheless, the circulation compared favorably with ours.

The same problems of lost and defaced books, and overdues trouble there as here. Fines were about two pence a day, "But we are not very strict about it," more than one librarian remarked, with a smile. Fiction, especially new American fiction, I found in great demand, and the percentage circulating very large indeed. Reference collections were large; and I was surprised to find on the reference shelves many books which circulated in American libraries.

*Read at a meeting of the Hawaii Library Association February 20, 1922.

Newspaper and periodical rooms seemed to be well patronized; files of local papers and publications of the British possessions; a goodly supply of English and some American magazines on the racks. But I looked in vain for a Honolulu *Advertiser* or *Star-Bulletin*. In one place, however, I came across the Christmas number of the *Paradise of the Pacific*, and here and there a *Mid-Pacific Magazine*.

Each library had a small room for the children, said to be much used when the schools were in session. It was summer vacation when I was there. On the shelves I noticed among modern juvenile books, many quaint old English stories, and in one place a number of "Elsie" books. A glance at one of the date-slips showed that many young readers had followed the heroine thru her girlhood.

Some of you may remember Mr. Mark Cohen, who was here for the Press Conference last year. An editor and a member of the New Zealand Parliament, he worked for thirty years to secure a free public library for Dunedin, his home city when Parliament is not in session. So this beautiful city, built on hills, has the honor of a Carnegie building—and very appropriately too, as the early settlers came from Scotland. A delightful day there gave me an opportunity of visiting this library. A sign at the door "Closed for a month for stock-taking" looked forbidding; but the door was open and I wandered in. Mr. McCune, the librarian, was very cordial and showed me all around, from the reading rooms on the upper floor to the work rooms and tiny tea room in the basement. Everything was overcrowded and an addition to the building greatly needed. They were calling in all the books, and for a month none would circulate, for it was time to take inventory. One whole room devoted to books on New Zealand was very attractive, and visions of a similar room for Hawaii danced thru my head—a dream of the future when the addition to our building materializes.

When the white people came to this far-away country, they brought the home names with them; so we find Dunedin, the ancient name of Edinburgh; and on this same South Island the Province of Canterbury, whose capital city is Christchurch, with the placid Avon River winding thru its very heart. A dignified city, with its cathedral and Cathedral Square, a bit of old England transplanted I should imagine. Here, in Christchurch, is Canterbury College, and in connection with it, the public library—really a subscription library, with a charge of ten shillings a year for the privilege of drawing books except that for children under fifteen years of age borrowing is free. This sum entitled a subscriber to draw one book at a time, which could

be held for one week only; extra books were loaned at a charge of three pence each.

Here I met Mr. Bell, the head librarian, a young man, who came from London eight years ago. He gave me a printed catalog so I have some figures which show the number of volumes 39,252 with a circulation of 153,612 in one year. Books consulted in the reference room numbered 37,381 during the year 1919. It is interesting to note that this library had passed its fiftieth anniversary. The buildings were old and over-crowded and a contemplated addition eagerly awaited. An endowment fund and the subscriptions support it. It is a pity that this attractive city, with a population of 100,000 people should have no free public library.

In Wellington, the capital of New Zealand, there is a splendid library in the Parliament Buildings; and down town a circulating library with a subscription fee of ten shillings a year. As I visited it in the evening, I missed seeing the head librarian; but two assistants in attendance were very cordial. Both apologized for the building, and I must say that the outward appearance was more like a jail than anything else. But it seemed to be well patronized and had a large collection of books and magazines. Some of the reference books could be taken out on the deposit of a pound. Among the new books which circulated in this way, I noticed a copy of Strachey's Queen Victoria which is in such demand here, and wondered if any of our patrons would be willing to deposit five dollars for the privilege of keeping it a week.

Auckland, the largest city in the Dominion, has a fine library, with subscription rates like those in the other cities. Mr. Barr, a Scotchman from Glasgow, has re-organized and built it up. Some one told me that he had accomplished wonders considering the condition it was in when he took the work. The reading and reference rooms upstairs were well-lighted and very attractive, as was also a small room for children. One room was devoted to valuable gifts including the library of Sir George Grey, the authority on Polynesian life and mythology. In the same building was an art gallery containing among other treasures interesting paintings of Maoris and Maori life.

A stay of only one night in the little town of Timaru, on the way to Mount Cook, did not permit a visit to the other free library; and in Nelson, called the "Sleepy Hollow" of New Zealand, where we spent Christmas, a notice on the library door said, "Closed for four days."

Queenstown, at the head of Lake Wakatipu, where one goes for scenery and rest only, had a dreary little reading room, dusty and ill-lighted, with but a few papers and magazines.

In Rotorua, the great government resort, where thousands of people go every year for recreation and enjoyment of the geyser baths, I found a small subscription library housed in the Land Office building. The whole place, building, books and all were sadly in need of a thoro renovation. There was no attempt at a catalog beyond some interlined type-written lists. The attendant said, "I think there are about two thousand books," and added "The government runs this"; and I bade her good-

bye and went out to the beautiful public gardens, with their stately trees, smooth lawns, gay flower beds, tennis courts and bowling green, bathing pavilions and attractive tea-house, and wished that the government cared enough to place in a setting like that a real library.

Some day this English-speaking country will wake up to its possibilities and the need of modern methods, and thought and wealth will bring free libraries that will reach every part of the Dominion.

Advanced Study for the Library Assistant

By IVANDER MAE IVER
Assistant, University of California Library

MANY there have been who have told us what the librarian ought to know, but few have asked the equally important question: How is all this information to be acquired?

Replies to a questionnaire sent recently to various representative librarians have included some valuable data.

As was to be expected all advocated definite advanced study for the staff.

From the replies to the question regarding the reaction of the staffs towards opportunities given them for advanced study, it would seem that librarians all over the country are alive to the importance of this aspect of their profession. Columbia, New York Public, Vassar, Chicago University, Illinois, Michigan State, St. Louis Public, Wellesley, University of Washington (Seattle), Los Angeles, Yale, Harvard reported that a goodly number are taking advantage of such opportunities as offer. At Wellesley, one member "secured her M. A. by several years' work in connection with her library work." From St. Louis, staff members have been absent as much as two years studying at Columbia and elsewhere and have been received "back into the staff at the expiration of this period." At Illinois, "at least three, by registering for courses, have obtained the M. A." In Los Angeles, during the winter of 1920-21, in one department, "every member, including the colored page, has enrolled for some extension course." In New York, Director Anderson reports that "the total registration for three years in the courses given by the City College for our library assistants has been six hundred," and he adds that "there seems to be no falling-off in the interest shown in these courses." At the University of Chicago, several have secured higher degrees while employed in library work.

And this represents only one side of the matter. The other side shows the results of pains-

taking research and scholarship. The many papers prepared for the library journals, the bibliographies which aid us at every turn, the books that have been published on one phase or another of library work—all bear evidence to the fact that the spark of learning is being fanned by some of our co-workers.

In replying to the third question—How many study best be carried on?—chief and the staff are alike beset with difficulties.

In the university library, the assistant may be encouraged to register for courses, either with the understanding that such hours as he may be absent from his post of duty shall be made up at some other time, or that they may count as part of library service. While many library heads at present seem to consider that staff members cannot expect to be allowed any time for attendance on classes, they do believe in making it as easy as possible for them to take the work. A few allow a certain number of hours. At Yale, an arrangement has been made whereby an assistant, with the approval of the department head and the librarian, may select a course which will "contribute to his value as a member of the staff and have some relation to the work of the library." Half the class time is then given. Vassar, admittedly patterning after Yale, grants the same privilege. Other libraries, such as Columbia and Brown, favor such a plan.

Some libraries secure special dispensations in the way of fees. Harvard, Wellesley, Chicago and Yale have arrangements of one kind or another. Yale actually will pay the tuition, some \$40 a semester for a single course. It is interesting to note in this connection that the Continental and Commercial Banks of Chicago will refund to any employé, including the librarian, who satisfactorily completes any approved educational course or courses, the entire course fee

or fees if not in excess of fifteen dollars, or that amount and half of the excess if the course fee exceeds fifteen dollars.

For those engaged in private research, a chance is sometimes given for part of the work to be done in library time. One Middle West university librarian states that while he has no formal understanding, it is his custom to allow a certain amount of library time if the individual is willing to spend at least an equal amount of his own.

To the question—"Would it mean much readjustment as to hours?"—opinion differed, depending a good deal upon the system followed in the particular institution. In such libraries as Chicago University where "the majority of assistants work eight hours on four days, and four hours on two days," the matter could readily be arranged, but in other places in which the regular working day is more rigidly adhered to, the problem is, of course, more difficult of solution.

A step forward would be to make it possible for assistants to attend summer school without loss of salary. For the high school librarian this is comparatively easy because of the longer vacation, but it might be applied to other types of libraries as well. Mr. Judson T. Jennings makes a strong plea for this in an article in the *LIBRARY JOURNAL*¹ some four years ago. He declares that the adjustments made necessary by the longer absence of certain members of the staff, and the increase in the budget thereby incurred would be more than repaid "in brain power, in ambition, in incentive to higher endeavor, in more efficient service."

For most these opportunities would suffice. For the minority who wished to go on further, a leave of absence on a half or two-thirds salary basis might be arranged. W. W. Bishop of the University of Michigan, for one, says that he would be prepared "under certain conditions, to recommend such a leave of absence with pay," believing this to be preferable to allowing time in connection with one's regular duties.

Whither now shall such study lead? Is the goal to be the attainment of some degree, or should it lead to the mastery of one branch of knowledge connected with the work in hand or profession as a whole? The answer necessarily depends in part upon the individual and the policy of his library but in general a few things may be said. Most agree that for those who have not obtained the bachelor's degree before entering the work, all study undertaken should have this goal in view, but many question the wisdom of higher degrees for the rank and file.

For librarians who are looking forward to executive work in university or college libraries, to teaching in library schools, or to headship in a large public library, they will be a decided asset. For the rest perhaps a "fairly thorough knowledge of several subjects" is preferable to a highly specialized training. Among the replies received on this point, Vassar and Michigan definitely favored studies leading to a higher degree; Columbia, Wisconsin, Wellesley and St. Louis were inclined to prefer courses bearing more directly upon the work in hand; while the New York Public Library felt it rested entirely with the individual.

In general the feeling is that results attained are worth the pains, that it is a sound business proposition in which the library as an organization and the staff as individuals are equally the gainers.

County Libraries for Southern Conditions

IT is a particularly natural library development in the South to make the county the supporting unit of the library, states Charlotte Templeton, Secretary of the Georgia Library Commission, in a recent *North Carolina Library Bulletin*. The county has always been the important division in local government, so important, in fact, that Hart in his "Actual Government" refers to the County government as the Southern type, as the town or township is typical of New England. "We have county high schools, county school boards, county health boards, county nurses, county poor relief, and what more natural than that we should have the county library?", inquires Miss Templeton.

One of the chief reasons for the slow library development in the South lies in the large and widely scattered rural population, the small number of cities, and the smallness of the towns. In Massachusetts, with a library in every town, there are four hundred and seventy-nine persons to the square mile, while Georgia, North Carolina and South Carolina have forty-nine, fifty-two and fifty-five respectively. Massachusetts has a rural population of 5.2 per cent compared with seventy-five per cent in Georgia, 80.8 per cent in North Carolina and 82.5 in South Carolina. It has 113 cities with a population over five thousand, while Georgia has only 26, North Carolina 27, and South Carolina 14. With such a small rural population it is not a difficult matter to place libraries within walking distance of any citizen. "It is a rather different matter when eighty per cent of the population is not within walking distance of much of anywhere."

¹ *LIBRARY JOURNAL*, April 1918, vol. 43 pp. 227-233.

The A. L. A.'s Record Year

INCREASED membership in the American Library Association and a phenomenal growth in distribution of A. L. A. publications are emphasized in the report of Secretary Carl H. Milam for the year ending May 20, 1922. Records show a membership of 5,735 on May 20, a gain of twelve per cent since May 1, 1921. The U. S. Census Bulletin on Occupations indicates that there were 15,297 librarians in the United States in 1920 as compared with 7,423 in 1910. The membership of the A. L. A. in 1920 was 4,464 as compared with 2,005 in 1910.

PUBLICATIONS

It is estimated that 297,000 copies of publications issued by the Association have been distributed during the year ended March 31, 1922. The number of new publications issued during the year ended May 20, counting separately the individual numbers of periodical publications, was fifty. Thirty of them were prepared wholly or in large part at Headquarters. Nine publications were reprinted, some of them thoroly revised. Of the total distribution more than half (about 170,000) have gone directly or indirectly to the public. In one city fifty thousand copies of an A. L. A. list were distributed in one day. In all of the A. L. A. publicity to libraries about the reading lists and other book publicity material the emphasis was placed on distribution outside the library. Some of the reading lists, reading courses and other similar materials were sent to hundreds of house organs, trade periodicals and other magazines as well as to press associations and newspapers, and in several cases the material was reprinted.

The pamphlets "How to Start a Library" and "Why Do We Need a Public Library?" are constantly used to answer questions on these subjects, and many copies were distributed free of charge to communities attempting to establish libraries without the aid of library commissions, and many more hundreds are distributed by library commissions and similar agencies. The pamphlets "A County Library" and "Book Wagons" continue to be popular with library commissions. A few thousand copies have been distributed to rural welfare workers, rural school officials, farm papers, club women and other persons and agencies interested in country life development. The twenty-five sets of the county library exhibit sold and others exhibited by the A. L. A. have conveyed the county library idea to many thousand persons.

Reading courses were an important feature of the publications. Two were issued, one on Journalism by a dean of a university school of

journalism, and one on Accounting by a professor of that subject in a university school of commerce. The lists, which are kept down to six or eight titles whenever feasible, are prepared by specialists for the reader who wants to read several books for a definite purpose, and checked up by librarians in order that they may be used in all libraries. Besides going into the hands of casual inquirers for advice at the lending desk the reading courses, it is hoped, may be distributed by libraries, perhaps by mail, to people who ought to be interested in reading on the subjects, so that these libraries may be eventually able to report to the public that hundreds or thousands of persons are pursuing definite courses of reading thru the instrumentality of the libraries. This should help convince the public that libraries are helping in the movement for adult and universal education.

Probably the most important item published during the year is the "Graded List of Books for Children," compiled by a committee of school librarians and school teachers appointed by the Library Department of the National Education Association, which may be ready for distribution by the time of the conference at Detroit.

LIBRARY ESTABLISHMENT OF LIBRARY SERVICE

Many communities without libraries continued to turn to A. L. A. headquarters for advice as a matter of course, among them some of the largest cities in the country which are still without library service. In such cases the Headquarters office frequently outlines in brief a whole campaign of publicity and propaganda to stimulate and organize local interest. Frequently libraries and library agencies apply for comprehensive suggestions for reorganization and extension or submit such plans for criticism. Occasionally the state laws have not authorized the development of agencies for putting into effect recommendations of the A. L. A., especially in the case of county libraries. The Headquarters office then endeavors to put the inquirer in touch with the other people in the state interested in developing the necessary library departments, and to encourage local efforts toward the establishment of a community library on a temporary basis.

Requests have come also from teachers' associations and other agencies dealing with relations between library and school. The most frequently recurring request is for the outline of a plan which will enable the public library and the school to work together in meeting growing and changing demands for an adequate library service for the school system in all its branches.

RECRUITING

Among the publications used for recruiting for librarianship were John Cotton Dana's interview in the *New York Evening Post* on "Library Work for Young Men," reprinted by the A. L. A., as well as 1,000 reprints of Mary E. Hazeltine's "Recruiting for Librarianship," by courtesy of the H. W. Wilson Company, and F. K. W. Drury's "The Library as Detective Agency," from *Public Libraries*. Christopher Morley's "The Child and the Book," is in the hands of the printer. Several thousand copies of these pamphlets and leaflets suggesting the profession of librarianship have been placed in the hands of young men and women as the result of the work of the Recruiting Committee, the Headquarters office and co-operating libraries. Some requests for these items in large quantities have necessitated putting prices on them for quantity distribution, altho they are still distributed in small lots free of charge.

EMPLOYMENT SERVICE

The Employment Service has had requests covering nearly every conceivable kind of position, with salaries ranging up to four or five thousand dollars. The geographical distribution was not comprised within the boundaries of the United States. The heaviest demand is for library school graduates, but registrants who have had apprentice training or satisfactory library experience are also being placed.

LIBRARY WAR SERVICE

Some of the activities of Library War Service still remain with the Association. Two regular employees are provided for advisory service in connection with the hospital library work for the men in the former Public Health Service hospitals, recently transferred to the Veterans' Bureau. Newly appointed hospital librarians and assistants are also usually paid from A. L. A. funds to avoid the delay which would be caused by waiting for government appointment. Subscriptions have been entered for 275 magazines since January 1, 1922, for the use of hospitals not yet served thru government channels.

The A. L. A. continues to pay a small portion of the salary of the librarian of the American Library in Paris, who is also the European representative of the Association.

The more important War Service printed reports, lists, bulletins and miscellaneous leaflets and rosters, together with mimeographed material, photographs, slides, clippings, etc., have been assembled and prepared for binding or some other means of preservation for historical purposes. This material is stored in a vault at the Headquarters office in Chicago. Re-

quests for information which have grown out of the war service work continue to come to the A. L. A. office from men who were in the service, and secretaries of welfare organizations who came in touch with the A. L. A.

A. L. A. FINANCES

The extent of the work which the Headquarters office may do in the development of libraries for many thousands of people are limited by the many routine things which must be done by the small staff. In the committee reports of the A. L. A. annual report for this year are many recommendations which would involve additional expenditures by the committees or by the office, or both. One committee recommends that the Headquarters office be instructed to undertake a piece of work which was undertaken several years ago and which failed, as it will fail again unless the office can put time and money into that work. Another committee is trying to do on a volunteer basis what would normally cost some \$20,000 a year. The Association also continues to be under obligation to the Chicago Public Library for the Headquarters office, the more so because the library itself is in need of space to meet increased demands.

The income for the General Fund is somewhat larger than it has been in the past, owing to increased membership and increased dues, but the additional funds will be absorbed to a large extent by the increased expenses of a larger association and larger conferences, besides minor increases such as those growing out of the new method of voting. The net gain in the sale of publications for 1921 over 1920 was \$7,665, or 49 per cent. The gain in the twelve months ending April 30, 1922, over the previous twelve months was \$9,056, or 50.9 per cent. The gain does not represent profit, as the prices on A. L. A. publications are kept at a figure which is meant to cover overhead, but not to provide a surplus.

WANTED

The Dallas (Texas) Public Library wants to secure the *Carnegie Library of Pittsburgh Bulletin* for November, 1921 (vol. 26, No. 9), for which it will pay full price or give in exchange a copy for March, 1921.

"Chicago has an all-night library located in the Chicago Post Office under the auspices of the Postal Clerks Union. The night hours are from 9 p. m. to 6 a. m. The deposit consists of nearly 15,000 volumes and has a monthly circulation of 1,000.

Inferior Binding

The Librarian's Protest

WE have been for many years all too familiar with the complaint as to books which loosen from the covers after slight use, and with the difficulties and expense attending their repair. In recent years we have the even more irritating examples of some of the generally accepted or new popular titles, both in adult and children's books, which have been rather attractively bound in what proves, after one or two issues, to be a paper covering in close imitation of cloth where cloth should have been used.

As a result of recent protest from several widely separated sources, attention has been directed with insistent emphasis to the increasingly poor paper and bindings of the large proportion of books produced by the publishers in the last few years, the imitation cloth covers (of paper) being one of the grievances cited. One publisher who was appealed to very courteously promised to look into the matter of paper and binding of the offending book and report later as to a possible remedy. Another offers to bind in cloth a book which has plain board covers for 75 cents in addition to the regular price. A third gives as a defense for this attempted economy the necessity of using paper covers or of increasing the selling price of the book, and records its decision in favor of paper covers.

While we are not in possession of full information as to costs of publishing, we may be reasonably sure that the price of cover cloth such as is commonly used by publishers, cost during the peak of prices about two years ago not more than 30 cents per yard in quantity, the normal price being from 14 cents to 20 cents. As one yard of this cloth will cover at least ten books of ordinary size, the maximum cost per book for cover cloth could hardly be more than 3 cents. While the cost of the paper covering would be somewhat less, there would hardly be more than 2 cents saving in the use of the paper. It would be interesting to know how much it would be necessary to increase the selling price per book to cover this difference of perhaps two cents in favor of the flimsy binding cloth most often used on recent fiction or children's books.

The facts, which apply about equally to industries in general, are probably something like this: The cost of actual materials used in making books is about one-eighth, or even less, of the whole cost of production. The other seven-eighths, representing royalties, cost of editing, illustrating, etc., and the mechanical labor in-

involved from press work to binding, constitutes the real basis for fixing the selling price of the books. Why publishers are uniformly silent on this side of the question of expense of production is not quite clear.

A protest of rather grave character comes from a university library which has recently acquired a well known reference work, published by a supposedly reputable firm, in a binding which was advertised as "Persian morocco." On examination this binding is found to be an imitation leather, which, if of good quality and sold as imitation leather, would not be so objectionable. But the deliberate misrepresentation places the firm and the transaction in a very doubtful position. In these days when "truth in advertising" is being emphasized in all classes of business, this is a distinct disappointment.

A valuable English reference annual has been for years placed (one cannot say "bound" with accuracy) in a cover of thinnest boards and cheapest cloth, and often begins breaking away at the joints before it reaches the purchaser, while its warping covers quite belie the real value of the work.

In one large library it was found that the cost of binding for 1921 showed a noticeable increase over that of previous years, due apparently to the poor paper and bindings of the current new books, as there were not other sufficient reasons for the increased binding cost.

A hopeful instance of the readiness of some publishers to comply with reasonable requests from librarians, is found in the response of the publishers of the *Outlook* to a protest some months ago against the narrow margins of that magazine which do not admit of satisfactory binding. They have now promised a new press, to be especially built within a few months, providing for adequate margins, a fact which will be learned with approval by all librarians.

The time seems to have come when something more than occasional sporadic complaints without definite concerted action, is due from libraries. The publishers should recognize openly the importance of the library trade, which, tho it may be a comparatively small item in actual direct library sales, is a very effective means of introducing and popularizing the better books, and thus of indirectly increasing the sales to an incalculable extent thru the regular book agencies.

It is assumed that the librarians who have voiced the complaints referred to are only a very few of those who find apparent injustices other than the high cost, in their book purchases.

Let us have other specific statements of such cases, with author, title, publisher and date of books in regard to which there are serious faults, with careful and impartial description of the defects as noted. The A. L. A. Bookbuying and Bookbinding committees are prepared to cooperate in making a direct appeal to the publishers for improvement in the make-up of their books, this specific information for which we are asking to form the basis of this appeal.

A copy of this article has been sent to Mr. Frederic G. Melcher, Secretary of the National Association of Book Publishers, New York, with fuller detail regarding some of our grievances, and with an inquiry as to means on the part of the publishers of alleviating the general situation as rapidly as possible, in keeping with the decline in costs in practically every line.

MARY E. WHEELOCK,

Chairman A. L. A. Committee on Bookbinding.

The Publisher's Reply

*Miss Mary E. Wheelock,
Chairman, Book Binding Committee,
American Library Association,
Des Moines, Iowa.*

My dear Miss Wheelock:

The Publishers' Association wishes to acknowledge the copy of your letter to the library periodicals with regard to book binding conditions. This, we understand, is not a Committee report but a preliminary letter to bring some points to the front that you find complained of in letters from the field. The Association certainly appreciates the opportunity to read this letter and welcomes every interchange of a discussion between librarians and the book-trade.

While waiting for the full Committee report, which will presumably be the outcome of the letters asked for in your communication, there might be certain comments on the situation that would help clear the field a little.

One of the letters you received from the publishers pointed out that their experiments during the pressure of war conditions with cloth substitutes had not been satisfactory and the use of such materials had been discontinued. This opinion seems to have been reached by all the publishers, judging by the output of the past season. When the price of binding cloth reached its greatest height two years ago, it was certainly necessary to look around for possible relief, but fortunately the past year has brought the price of cloth down. Only those who have made books during the past three years can realize what it meant to have costs of materials up from 200 to 300 per cent and the cost of books up 40 per cent. The letter in which a publisher offered to bind a board book in cloth for 75c. extra re-

ferred to small special lots and not to editions. Cloth now costs per book but a few cents more than substitutes and but little more than boards, which are occasionally used to get special binding effects on a few publications.

Knowledge of the costs that enter into book-making is open to all, for instance the figures given in the *Publishers' Weekly* of last August 27th, in which each part of book-making costs is laid on the table. The only item not shown there is color work, which is at present about four times the old basis. There has been little change in these figures of last August, the welcome recessions of paper costs and binding material having gone into effect before that time.

Taking a long list of books such as libraries buy and averaging, it will be seen that list prices are now about 40 per cent higher than pre-war. There is a real problem in producing books when costs have risen more rapidly than the selling prices. The publishers have tried to meet this by careful management, by efficient organization in the various steps in book manufacture and by increasing the book market. We wish we had further recessions in sight, but cannot so prophesy. It is more possible, however, than two years ago to demand better work of binders and printers, and for several months this Association has been insisting on improvement on product. The fact that binders and printers have to pay the cost of remedying imperfections on books returned brings some automatic pressure.

Probably we should not make comment on the binding of the English made books you refer to, altho an American agent is responsible for output handled here. In credit to American book binders it should be said that where American cloth bindings are in direct competition with English as in Canada, American bindings almost invariably get the praise. A comparable volume to the English reference annual referred to is made in this country, and wears better.

The use of the words "Persian morocco," as referred to, is an English custom of long standing in special use with Bible houses, where many types of leather are used. The booktrade only occasionally hears it, and I am sure the English publisher does not intend to deceive any more than the furrier who sells Hudson seal.

The publishers would regret if they had not as you suggest, been open enough, in recognizing the importance of the library trade. Certainly in discussions among themselves and in their planning they recognize it very fully indeed. It would be unlike an American business man to forget a market that makes so important a percentage of his total outlet.

If there is anything about the facts in book

publishing or problems of making books to suit all markets that we can investigate, produce facts on or discuss remedies with you, the Association is most anxious to do it.

We want to thank you for the copy of "Special Study on Binding Specifications for books of the Reference Type," which has been brought up at our executive meeting and of which copies have been sent to all publishers. We have also received a letter from President Root with regard to margins, which has also been called to the attention of every publisher on our list.

The improving of manufacturing quality is now especially under discussion in book publishing circles, trade periodicals and in the shops where new and more perfect machinery is planned. The concrete help of such reports as your committee can send will be appreciated.

NATIONAL ASSOCIATION OF BOOK PUBLISHERS,
FREDERIC G. MELCHER, *Executive Secretary*,
334 Fifth Avenue, New York.

Library Week in Pittsburgh Schools

LIBRARY week in schools is an effort to impress upon every teacher and pupil in the school system of Pittsburgh, the value of the library, by designating a definite week each year in which library work shall be emphasized in all the schools of the city.

The work of the library with schools goes on all the year round, but "library week" provides an opportunity to emphasize that fact.

When it was inaugurated in 1921 the superintendents of the public and parochial schools asked the teachers to devote one hour during the week to a talk about the library. Suggestive outlines to help in this instruction were issued by the library and it was arranged that for the first observance the civics lesson should be used. Because of the careless use of text books in the schools and those books borrowed from the library by students, care of books was emphasized and the teachers and librarians learned many things from some of the rules composed by one sixth grade during its library period.

1. Do not keep the book too long, the others want to read it.
2. Do not use your books as an iron stand.
3. Put the book in the bureau drawer under the clean clothes so the baby can't get it.
4. Dry your hands before you read your books.

As a library period in most Pittsburgh schools was a departure from the regular work many of the teachers preferred to bring their classes, especially those from the parochial schools, to the library for instruction, and many

pleasant and profitable associations grew out of that meeting in the library agency nearest the school.

One high school of the city advertised the library very widely in its student publication. Last year it sent reporters to the library for material, which it wrote up, and this year added to the interest by using such headlines as—"One key to the honor roll: use the library often and intelligently," and writing a discussion of library work as a profession.

The week of April 17 was set aside this year and the English teacher gave the talk to students. Previously the teachers had come to the library and talked over the work, and to find out what the library had to offer them in the way of advice and opportunities to the students.

A special school bulletin was designed to aid the teachers of the higher grades in interesting the boys and girls in good literature.

One third grade teacher in a school where most of the students were foreign asked her students to bring suggestions of their own about the value of a book. Among these was: "Learn your father to read English," another "Read your book to your father and mother" thus showing that they felt it right to pass a good thing along.

One teacher in a continuation school arranged to register all her pupils as library borrowers, have their borrowers' cards made and given to them with an invitation to use the library agency nearest their homes. These students live in various parts of the city and come to school but one day a week.

Altogether the various reactions to library week in schools, only a few of which could be quoted here, prove that it is a very valuable institution to schools as well as libraries. It is to be continued annually in Pittsburgh.

During in 1921, forty-one classes visited the Central Library alone for instruction. Of these twenty-one came for the first time. This year at the Wylie Avenue Branch, one of our busiest branches, up to May 15th, fifty-five classes, from ten different schools, have visited the branch, with an attendance record of two thousand-three-hundred pupils. There are so many schools still wishing to be scheduled that the work will continue thru the greater part of June.

GRACE E. WINDSOR, *Special Assistant*,
Carnegie Library of Pittsburgh.

"Ontario public libraries as a whole have increased their annual expenditure for books one hundred per cent in the last two years."—
Ontario Library Review.

Conferences on Children's Reading at Grand Rapids

ANNUALLY since 1905, on the first Saturday afternoon in May, the Grand Rapids Public Library has been conducting a Conference on Children's Reading. The 18th Annual Conference this year on May 6 brought out an average attendance (about one hundred and twenty-five persons) and was regarded by all as one of the most interesting ever held. The interest in these conferences does not lag. The general subject for discussion this year was "Indian Stories for Boys and Girls."

The speakers at the Conferences are mostly local people, tho in recent years there has usually been brought to the city for the purpose one speaker from outside. The purpose of the Library in holding the Conference is to get the reaction of teachers and parents especially on the reading of children thru the Library. Thru the close affiliation with the schools (with branch libraries in so many of the school buildings), the reading of children's books is a very large feature in the work of the Library and it seems important that the most active criticism and co-operation should be encouraged.

In the early programs we tried to cover a range of subjects at one Conference, but our experience shows that better results are obtained by having various aspects of one general subject presented in more or less formal papers or addresses, and then throwing the whole matter open to general discussion. The general subject is usually presented by three or four speakers in addresses or papers of fifteen or twenty minutes each. It is always definitely planned to have at least one parent with children of the reading age and one teacher in the schools among those on the program opening the subject. The year we discussed detective stories the chief of the city police department was one of the opening speakers.

The following are some of the subjects that have been discussed in previous years:

Nursery rhymes.

Fairy tales.

Picture books.

Are the writings of Mark Twain wholesome for children?

Books and reading for the child whose parents use a foreign language only.

The teaching of literature in school. Does it foster a love for the reading of good books in the majority of pupils?

Reading for the girl.

Biography for girls and boys.

Nature books for children.

Reading for the child of foreign born parents.

War stories for children.

Love stories for children.

How may we get boys and girls to use books so as to induce in them a love and respect for manual work?

Patriotism. How may children's reading be made to foster it?

Poetry and rhyme.

Should the library introduce the boys and girls in their reading to social, economic and political problems of the times?

Detective stories for boys and girls.

The conference nearly always has excellent news value, and at several of them reports have been sent out over the country by the Associated Press. The report of the conference this year in one of the newspapers received a double column heading.

This year the conference was particularly interesting because of the fact that the four speakers on the program who opened the discussion were all local people who have written more or less for children. Two of the speakers have published a number of books for children, and a third one has published about one hundred and sixty stories for boys in various newspapers and magazines, a number of them in *St. Nicholas*. The other speaker, also an author, is a bookseller with a wide experience during the last twenty-five years, in selling books for boys and girls.

Preceding the conference a luncheon is given in honor of the speakers on the program which is usually attended by teachers, members of the Library Staff, and visiting librarians from western Michigan, to the number of twenty to forty. This luncheon serves as an excellent ice breaker and helps greatly in furthering discussion on the part of the people at the Conference. At the luncheon and conference this year Miss Florence Holbrook, of Chicago, author of the *Hiawatha Primer*, etc., was one of the interesting persons present who took an active part.

An annual conference of this kind is something that any library could hold, with little or no expense, and to the great advantage of the library.

SAMUEL H. RANCK, *Librarian*.

The Chicago Public Library is distributing several hundred copies of the A. L. A. reading courses on which the following statement has been printed: "All of the books mentioned in this folder are in the Chicago Public Library. If not in when you ask for them, they will be reserved for you on application."

The Ethics of Librarianship*

TO the ethics of librarianship place is given in the May issue of the *Annals of the American Academy of Political and Social Science*, which is devoted to "The Ethics of the Professions and of Business." As preface to his proposals for a revised code of ethics, given below, Charles Knowles Bolton reviews the history of codes for American librarianship.

On April 14, 1903, Mary Wright Plummer gave an address on the "Pros and Cons of Librarianship" before the Illinois Library Association, which was printed in *Public Libraries* for May of the same year. From this address Miss Plummer printed extracts in a leaflet of four pages, entitled "The Fourth Essential." She said in part, "Librarians and educators in general have their code still to make. The fact that these codes are for the most part unwritten, makes them no less binding; they are like debts of honor, which altho unrecorded, must be paid first of all debts. . . ." A code of nine sections followed.

Several other addresses appeared soon after, among them a paper by Genevieve M. Walton, inspired perhaps by an earlier effort by Linda M. Duval. Mr. Bolton continues:

"In 1908 and 1909 a group of librarians was accustomed to dine at frequent intervals in Boston. From this group a tentative code of library ethics was drawn up by the present writer and after discussion point by point it reached the form in seventeen sections printed in *Public Libraries* under the title, 'The Librarian's Code of Ethics.' The same code, after being submitted to discussion for three years, was revised, enlarged and reprinted in 1912 with twenty-five sections. These canons of ethics were in turn discussed by the Council of the A. L. A. at Chicago in 1913 and 1914. The Council's deliberations, as well as the more recent criticisms and suggestions by more than twenty-five of the leading librarians of the United States, have influenced and molded this code of thirty sections which the author herewith presents." James I. Wyer, Herbert Putnam, H. H. B. Meyer, Arthur E. Bostwick, Azariah S. Root, Bernard C. Steiner, June R. Donnelly, Hiller C. Wellman, George F. Bowerman, Josephine A. Rathbone, Clement W. Andrews, Frank K. Walter, Julia G. Babcock, and Phineas L. Windsor have discussed with Mr. Bolton special phases.

*This paper has been separately reprinted and a limited number are still available at fifteen cents each from Clyde L. King, editor, *The Annals of the American Academy of Political and Social Science* 36th and Woodland Avenue, Philadelphia.

"We assume that these canons of ethics stand in the position of counselor to the younger men and women of the profession, combining worldly wisdom with unworldly ideals."

1. **RESPONSIBILITY.** In the organization of a library by the trustees, much of their authority is usually delegated to the librarian. He should not chafe if the trustees as a body feel called upon from time to time to exercise the authority vested in them as guardians of the public interest.

2. **AUTHORITY.** Under proper conditions the librarian to whom the entire board delegates authority should be able to exercise more power than any single trustee; and since the policy of looking to the librarian for results requires that a considerable measure of authority be delegated to him, habitual distrust of his judgment or disregard of his recommendations may well lead him to seek opportunity for usefulness elsewhere.

3. **ALLIANCES.** A librarian should not ally himself with one trustee to the exclusion of other members of the board from his confidence.

4. **LOYALTY.** When a librarian cannot, in his dealings with the public, be entirely loyal to a policy which is clearly upheld by his trustees, he should indicate to the public, as far as possible, the reasons for this policy without expressing his own opinion; he should also explain his position to the board, and in an extreme case offer to resign.

5. **SINCERITY.** To delay bringing a plan before the trustees until it is certain to obtain adequate presentation and a fair hearing may be considered only common wisdom; but to abstain from urging a project until a known opponent happens to be absent is unprofessional as well as insincere.

6. **REJECTED MEASURES.** A wise librarian, when a measure has been deliberately rejected by his trustees, will not bring it forward again until new conditions prevail.

7. **DUTY TO THE STAFF.** A librarian is bound, as opportunity offers, to allow an assistant to prove her ability to do work of a higher character than that usually assigned to her, and to advance those that are capable to more responsible positions in his own library or elsewhere. He must also spend the money of his institution with due prudence, and get a full return for it in service. Altho efficiency of the staff is temporarily reduced by frequent transfer of assistants to new positions or to other libraries, in the end a library whose workers are seen to obtain rapid and solid advancement profits by its reputation in this respect.

8. **PERMANENCE.** Having in mind that not salary but opportunity for service makes librarianship a profession, the worker should not be too eager to move. Permanence makes for dignity and influence in a community. No opportunity to serve the public can honorably be considered merely as a stepping stone or place of passage.

9. **INDIVIDUAL RESPONSIBILITY.** Each member of the staff should be regarded by the librarian as an individual, a colleague, capable of performing his particular work, and encouraged to feel his individual responsibility for this work. Where public recognition of work of outstanding merit will advance the interests of an assistant the librarian should be quick to grant it. The wise librarian will allow to the intelligent assistant latitude in the enforcement of rules, and in their interpretation. The degree of latitude will depend on the rank and character of the assistant.

10. **RECOMMENDATIONS.** Breaches in morality and honesty are fundamental, and should be mentioned discreetly if a "recommendation" is given. Peculiarities in personality may be handicaps in one library but assets in a library of a different type. A wise librarian may mention but should not stress these, and the librarian to whom recommendations are sent will weigh so-called "defects" in the light of his own conditions and environment. To recommend an unsatisfactory assistant, merely to get rid of that assistant, is unworthy of any administrator.

11. **THE STAFF'S DUTY TO THE LIBRARIAN.** A librarian has a right to entire loyalty from his staff, altho he may be called upon at times to face frank comment from them. Such criticism should never go beyond the library doors, nor should the staff carry complaints over the librarian's head to the trustees, except in extreme cases.

12. **THE STAFF'S DUTY TO THE LIBRARY.** An assistant should not allow personal antagonisms within the library to injure efficiency, nor should the staff tolerate a calah of congenial spirits that tends to break up the membership into groups ready at hand for rivalries and jealousies.

13. **THE WORK AND THE WORKER.** The assistant should realize that the work is more important than the worker; that the assignment of an uncongenial task is not due to a personal grudge nor a slight to the assistant, but a necessity enforced by the work that must be done by someone.

14. **PERSONAL OBLIGATION.** Each assistant should realize his own personal obligation as a public servant to each library patron. He should strive always to be courteous and pleasant, remembering that the staff stands as the interpreter of the library to the public and that it may be materially helped or harmed by his individual conduct.

15. **HEALTH.** Health is an assumed qualification in a librarian's equipment, and continued ill health does not ordinarily entitle an employe to favored treatment by a public institution. Conversely, the library should conserve the health of the staff by furnishing the best possible equipment as regards light, air, sanitation, and rest.

16. **NOTICE OF RESIGNATION.** Ethically considered, the assistant should, when seeking a change of position or when considering a definite offer from another library, consult the superior officer; but the personality of a superior officer will inevitably influence an assistant's course of action. Having accepted a position, the assistant should give adequate notice before leaving.

17. **EXPERT ADVICE.** A librarian may not accept an appointment to act as an expert adviser to the trustees of another library, even when solicited, without the request, or at least without the full knowledge, of the librarian concerned.

18. **PRIVATE ADVICE.** A librarian should feel free to claim counsel from others in the same calling, and should be willing to give such counsel when requested, without publicity or expense.

19. **RIVALRY.** Librarians should be slow to publish statistics in order to show superiority of a library over neighboring libraries, such statistics often requiring qualification or explanation. A similar comparison in words is of questionable taste, and any printed criticism should always bear clearly the librarian's name.

20. **ENGAGING AN ASSISTANT.** A librarian may not take the initiative in negotiation for the services of an assistant in another library until he has made his intention known to the assistant's superior officer, or he may make his intention known to both assistant and official superior simultaneously.

21. **PREDECESSORS.** A librarian who makes a habit of commenting unfavorably on the work of his predecessors in office invites criticism of his good taste.

22. **A LIBRARIAN'S PROVINCE.** It is the librarian's duty to be a force in the community, and contact with people even more than with books engenders force. We must not confuse the duties of librarian and assistant, the one is always associated with *people*, altho in a small library he (or she) may do all the work; the assistant may or may not be called upon to meet the public, but generally has specific duties to which specific hours must be given.

23. **REPUTATION.** A reputation acquired by work for the public in the profession or in kindred paths of service adds to the dignity and power of the librarian. But the value of the work must advertise the worker, and self-advertising is outside the pale.

24. **BEARING IN PUBLIC.** A librarian is a person of influence, and seeking the respect of all his fellow-citizens, cannot carelessly choose his company, nor indulge in habits and tastes that offend the social or moral sense. These self-limitations are in the nature of hostages which he gives for the general good. He must not limit his advisers to one circle, for he needs a wide horizon, ready sympathies, and the good will of all classes.

25. **USE OF HIS NAME.** A librarian should stand on neutral ground and should be chary of lending his name to a public controversy to add weight to a contention of a local faction, or to commercial enterprises, even those that have an educational or philanthropic motive. Having a financial interest in any material device, invention, or book proposed for purchase in his library, the librarian should inform his trustees of the interest. It would be better not to have a financial interest in companies whose business is largely with libraries.

26. **HONORARIUM.** An honorarium for work done in library hours should not be accepted, and a librarian should be slow to undertake commissions for work outside library hours which might easily be executed in library hours without expense to the citizen.

27. **BOOK SELECTION.** Purchases of books should reflect the needs of the community rather than the personal taste or interest of the librarian. His selection of books should be catholic, and his power to guide be exercised with discretion.

28. **SPECIALIZING.** The librarian should not permit specialized book collecting or book reading to narrow his field of interest, nor to bias his judgment, nor to make him a rival collector to his library. The number of points of contact with knowledge and with his public determines to some extent the librarian's usefulness.

29. **RELATION TO AGENTS.** A librarian is bound to expend the funds intrusted to him with the best interest of the library in view. But he should remember that in employing an expert, ability and efficient service are worthy of proper compensation, and to sacrifice them for slightly better terms or to make frequent changes may not result in the library's permanent advantage. He should not jeopardize his independence by accepting special favors from business firms.

30. **PROFESSIONAL SPIRIT.** The literature and the organizations of the profession claim consideration from the earnest and progressive librarian.

The American Booksellers' Association at its Twenty-second Annual Convention in Washington, May 8-11, 1922, adopted a resolution which "strongly recommends that booksellers give special consideration to the recommended lists of the American Library Association, the local librarian and the state librarian."

Music Departments of American Libraries

THE Music Teachers' National Association committee on the history of music and libraries draws conclusions both encouraging and discouraging from its summaries of the questionnaire prepared by the committee and sent out by the Bureau of Education in 1917-1918 to 2,849 libraries, and now published as Bulletin 1921, No. 33. It finds that there is a fairly wide dissemination of considerable music collections throuout the country, including some of first rank. Many more libraries report increasing interest in the music departments in comparison with the number where music interest is stationary or decreasing. Librarians reporting small collections were careful to note that the reason lay in recent installation, the youth of the library itself, or lack of room or of other facilities. On the other hand, lack of interest in the development of music in libraries is frequently shown by librarians, music teachers, and music lovers, and "a librarian who is patently uninterested in a music section, even from a nonpartisan viewpoint, as some reports unfortunately indicate, can scarcely be expected to be an asset to the community."

Of the 343 libraries with 5,000 volumes or over reported by Massachusetts in 1913 the report shows that 142 have music sections, exclusive of the important music collection of Harvard University Library, which failed to answer the questionnaire. New York State, with 104 of 326 libraries of 5,000 volumes or more reporting music sections is second in the reckoning. Seven New York libraries report player-piano rolls, and as many provide phonograph records. Orchestral scores are fairly plentiful, but chamber music is not so well represented. As usual in eastern as compared with western libraries, player-piano and phonograph material is also sparsely represented in Massachusetts libraries.

Interest in music sections in libraries is particularly keen in California, from which 45 libraries reported. Eight persons spend their entire time as music librarians, while 22 others give much of their time. Orchestral scores and chamber music are found in an unusual number of libraries. Most of the acquisitions are by purchase, under expert guidance. Pianos are available in three libraries and phonographs in four. Fifteen libraries have an interlibrary loan system, and two furnish traveling libraries. Two have lectures (in one case weekly), and both libraries pay for these lectures or recitals.

The more important collections of music in the libraries of the country include the Music

Division of the Library of Congress, that of the Newberry Library, the Allen A. Brown collection of the Boston Public Library, the music collections of the Harvard University and Tufts College libraries, the music division of the New York Public Library, and the collections of the public libraries of Newark, St. Louis, Seattle and Springfield, Mass.

It is the aim of the committee to proceed with an investigation of large private collections and with efforts to promote the larger encouragement of music sections by both libraries and their musical patronage. Three hundred dollars is suggested as the least annual appropriation from which to expect results of substantial benefit.

What the War Taught Librarians

THE war taught librarians first of all that the great majority of men under ordinary circumstances are not influenced directly by books and libraries, says Carl H. Milam in Library Leaflet No. 14 of the U. S. Bureau of Education: "What Libraries Learned From the War." Many men who came into the camp libraries, most of them from communities which do not support public libraries, were amazed to find so many books in one place, and were persuaded with difficulty that the books could be used either in or out of the library free of charge. Conversely, men will read and study when books are made easily accessible in attractive rooms, as the seven million volumes used between the summer of 1917 and the autumn of 1919 testified.

Other lessons were taught librarians by their war experience. It was apparent after a very brief attempt to do without cataloging, classification, or ordinary lending routine that a library must be organized to do good service. Modern libraries are needed in the Army, Navy and Marine Corps, a need which except for the war might not have been seriously considered for another generation. Hospital service and the library service extended to naval and military prisons caused a revival of interest in the provision of adequate library service for prisons and correctional institutions of all kinds. Both these instances show that it pays to demonstrate library service. "This lesson learned from the war fits in with the idea often expressed by ex-Secretary of War Newton D. Baker that it is the business of social agencies to pioneer in the field of social service and let the Government take over the work after it has been started." Furthermore, the efficiency attained by library

war service in furnishing a required book almost immediately, aided tho it was by abnormally favorable conditions, did establish a standard toward which the ordinary peace-time public library may work.

The library profession needs a greater number of trained leaders. This was evident during the war, and the present shortage of trained assistants has emphasized the fact. Libraries can help to create a national spirit and to foster an intelligent understanding of world problems. They have the reputation of providing books on both sides of every important question. The radical and the extreme conservative meet in the library on the same footing. War conditions, forcing librarians out of their buildings to share in the numerous drives and campaigns, revealed to them that the library can have a very active part in the life of any community. The necessity of joining forces in money and book campaigns showed them that librarians can work together. Opportunity to experiment in new forms of library advertising and publicity, to dramatize the ordinary work of the library for the purpose of making readable copy for newspapers and magazines, led easily to the conclusion that library publicity can be made compelling, interesting, and profitable.

The First Year of the A. M. M. L. A.

ORGANIZED "to place a library on every American Merchant Ship," the American Merchant Marine Library Association had within a year of its incorporation (May 27, 1921) opened a headquarters office in New York and dispatch offices at Boston, New York and Sault Ste Marie.

Much equipment and many books were handed over to the new Association by the American Library Association and it is expected that still more usable material of this kind will still be collected from ships which have not yet been reached.

According to the report of the Director of operations presented at the first annual meeting crews libraries were placed during the year on one hundred and seventy-four American Merchant Marine vessels, these ships representing forty-two different steamship companies.

"Operations were begun in Boston on December 15th, 1921, the Boston Public Library contributing space for sorting and packing the books, and the first crew's library was dispatched from that port on December 24th.

"The Dispatch Agent found the men enthusiastic at the news of the resumption of the library service, and eager for books. Boston ship owners also welcomed the renewal of the service, and co-operated in seeing that letters of introduction

were sent to their Captains, requesting them to appoint one of their officers as custodian of books, and urging the men to assume a personal responsibility for the books.

"To date, 92 American ships have received libraries in Boston—totalling 6,257 books.

"The New York Dispatch Office was opened on February 1st, with headquarters at Pier 10, East River. Plans are under way for establishing branch offices at Hoboken and Constable Hook to facilitate the service to American merchant ships in New York harbor. To date, the New York Dispatch Office has supplied 82 ships with crews' libraries, a total of 6,985 volumes."

An appropriation received from the Lake Carriers Association met the estimated budget for service for the current season on the Great Lakes, and a dispatch office was accordingly opened in the latter part of May.

The Association estimates that \$50,000 will carry on the work for one year in the following ports, namely: Boston, New York, Baltimore, Philadelphia and Norfolk on the Atlantic coast; San Francisco and Seattle on the Pacific coast; Sault Ste. Marie on the Great Lakes; as well as the headquarters office at New York and the dispatch offices at Boston and New York.

THE PURSER AND THE FIRST MATE OF THE GRACE LINE S. S. MINEOLA LOOKING OVER A "LIBRARY" JUST RECEIVED

Books by Parcel Post in St. Louis

THE Parcel Post delivery service of the St. Louis Public Library was begun on March 20, 1914, being organized as soon as news reached the Library of the passage of the law admitting library books to the mails at reduced postage. Notice of the service was at once sent out and the St. Louis Post Office gave much aid in informing the citizens about it.

The one obstacle to its wide use has been the necessity of requiring an advance deposit to pay postage. Users of a free public library do not like to pay for anything, especially do they seem to object to pay in advance. This is necessary in the present instance, however, as the Post Office department has made no provision for payment on delivery in the case of packages sent by parcel post. As the figures below show, use has not been great, but it has been sufficient to show that it is valued by those who use it, and there has been a slow but steady growth.

An effort has been made also to operate the service in connection with the reserve system. When desired instead of sending a reserve postal with the information that a reserve book is ready for the user, the book itself is sent by parcel post, which is a considerable saving of time and energy on both sides.

Parcel post distribution of books appears to be an ideal arrangement in all cases where the

user wants a definite book and does not require to go to the library and look at it or to make a selection. It does not, of course, take the place of a visit to the library when the reader wishes to run over the open shelves or the collection of recent purchases to decide what he wants, or where the reader prefers to have second or third choice immediately rather than to wait for his first choice any considerable length of time.

For the six years, 1915-16 to 1920-21, in which the system has been in operation the circulation was 1095, 2183, 2001, 1520, 2321, 2242.

An Appreciation

THE following letter from the Surgeon General to the President of the A. L. A., on the occasion of the transfer from the Public Health Service to the Veterans' Bureau of the control of hospitals operated for veterans of the World War, tells its own story:

Dear Mr. Root:

You are familiar with the management, change and general development of the library service now being maintained in the hospitals operated by the Public Health Service, and doubtless know in some detail just what has been done in these hospitals to supply a library service to veterans of the World War.

On April 29 the President signed an Executive Order, effective May 1, 1922, transferring to the Director of the U. S. Veterans' Bureau the management and control of all of the hospitals previously operated by the Public Health Service for veterans of the World War, leaving this Service still in control of its own system of hospitals which were established primarily for beneficiaries of the Federal Government other than veterans.

This transfer contemplates not only the transfer of the hospitals themselves, but of all personnel connected therewith, including, of course, the library service as now operated under the supervision of Miss Caroline Webster of the American Library Association.

This separation of the Public Health Service from a large share of this work gives appropriate occasion for me to express to you, as the head of the American Library Association, the very keen appreciation of the Public Health Service for the most excellent co-operation of your organization in carrying on satisfactory work in the hospitals of this Service.

I wish to assure you that this work thruout, both before and after its transfer to the Public Health Service, has not only been satisfactorily done, but has shown itself to be a factor of essential importance in the operation of our hospitals. We have all been so much impressed with the value of this service as to consider it an essential part of the successful operation of our hospitals.

I also take this occasion to express my gratitude that the American Library Association should have found it feasible to lend us the services of Miss Caroline Webster, under whom this work has been developed, organized and managed. Miss Webster has shown a fine spirit of co-operation and without her services this organization would never have functioned with such satisfaction.

In the system of hospitals which the Public Health Service will continue to operate, the law provides also for the care of veterans of the World War, and a

A PROFITABLE CO-OPERATION BETWEEN UNCLE SAM AND THE ST. LOUIS PUBLIC LIBRARY

large number of these patients still remain in the hospitals which will be under the control of this Service. We should, of course, be most happy to have a library service continued in these hospitals and it is my earnest desire that you may find it feasible to lend us your help in the continuation of this very important work.

H. S. CUMMING, *Surgeon General.*

Some Vacation Books

FOR CAMP FIRE GIRLS AND GIRL SCOUTS

The Boston Public Library recommends:

Coale, Anna Worthington. *Summer in the girls' camp.* New York: Century, 1919. Illus.

Recommended for the Girl Scouts' proficiency test in athletics.

Delano, Jane A., and Isabel McIsaac. *American Red Cross text-book on home hygiene and care of the sick.* Philadelphia: Blakiston, 1918. Illus.

Endorsed by the Red Cross and recommended by the Girl Scouts.

Eastman, Charles Alexander. *Indian scout talks.* Boston: Little, Brown, 1917. Illus.

The chapter on Indian names and their significance is of interest to Camp Fire Girls.

Elsom, James Claude. *Social games and group dances.* Philadelphia: Lippincott, 1919. Illus.

Ferris, Helen J. *Girls' clubs. Their organization and management.* New York: Dutton, 1918. Illus.

A manual for club leaders, including material for Girl Scouts and Camp Fire Girls.

Girl Scouts, Inc. *Campward ho!* New York: Girl Scouts of America, 1920. Illus.

A manual for Girl Scout camps.

Keeler, Harriet Louise. *The wayside flowers of summer.* New York: Scribner, 1917. Illus.

A scout must pass the test for knowing flowers and ferns.

Kinne, Helen, and Anna Maria Cooley. *The home and the family.* New York: Macmillan, 1917. Illus.

Contains material helpful for winning the "Home-maker's Badge" of the Girl Scouts.

Rogers, Ethel. *Sebago-Wohelo Camp Fire Girls.* Battle Creek, Mich.: Good Health Pub. Co., 1915. Illus. Portraits.

This is the story of the camp where many of the Camp Fire ideas were first developed.

Wells, Elbert. *Outdoor signaling.* New York: Outing Pub. Co., 1911. Illus. (Outing handbooks.)

Partial contents.—The alphabet.—The equipment.—Signalling by sound.—Signalling by light.—Signalling by flags.—The code in use.

Ten-book list, No. 16, issued by the Boston Public Library.

The *Bulletin* of the New York Department of Education Library Division suggests:

A FEW BOOKS FOR BOYS AND GIRLS

If You Are Ten or Under Try—

Bok, Edward. *Dutch Boy Fifty Years After.* (Scribner).

Bowen, William. *Old Tobacco Shop.* (Macmillan).

Burgess, T. W. *Burgess Animal Book for Children.* (Little Brown).

Fryer, J. E. *Mary Frances First Aid Book.* (Winston).

Humphrey, Grace. *Heroes of liberty.* (Bobbs Merrill).

Hunt, C. W. *About Harriet.* (Houghton).

Johnson, Margaret. *Polly and the Wishing Ring.* (Macmillan).

Martin, John. *Children's Munchausen; Retold by John Martin.*

Perkins, L. F. *Puritan Twins.* (Houghton).

Phillips, E. C. *Black-Eyed Susan.* (Houghton).

Turner, N. B. *Zodiac Town.* (Atlantic).

White, E. O. *Peggy and Her Blue Frock.* (Houghton).

Zwilmeyer, Dikken. *What Happened to Inger Johanne.* (Lothrop).

Smith, N. A. *Old, Old Tales From the Old, Old Book.*

If You Are Over Ten Try—

Adams, Katherine. *Midsummer.* (Macmillan).

Benezet, L. P. *Young Peoples' History of the World War.* (Macmillan).

Fletcher, W. L. *How to Get the Job You Want.* (Houghton).

Gilchrist, B. B. *Cinderella's Grand-daughter.* (Century).

Gregor, E. R. *Spotted Deer.* (Appleton).

Hawes, C. B. *Great Quest; a Romance of 1826.* (Atlantic).

Heyliger, William. *High Benton, Worker.* (Appleton).

King, Mrs. Francis. *Little Garden.* (Atlantic).

Meigs, Cornelia. *Pool of Stars.* (Macmillan).

Miller, W. H. *Boys' Book of Hunting and Fishing.*

Newberry, Perry. *Black Boulder Claim.* (Penn).

Newberry, Perry. *Castaway Island.* (Penn).

Roberts, C. G. D. *In the Morning of Time.* (Stokes).

Schultz, J. W. *Rising Wolf.* (Houghton).

Seaman, A. H. *Dragon's Secret.* (Century).

Tarbell, I. M. *Boy Scouts' Life of Lincoln.* (Macmillan).

Underwood, W. L. *Wild Brother.* (Atlantic).

Van Loon, H. W. *Story of Mankind.* (Boni).

Walker, Joseph. *George Washington.* (Barse and Hopkins).

A FEW BOOKS FOR GROWN-UPS

Beebe, William. *Edge of the Jungle.* (Holt).

Bok, Edward. *Americanization of Edward Bok.* (Scribner).

Burnett, Frances H. *Head of the House of Coombe.* (Stokes).

Burroughs, John. *My Boyhood.*

Depew, C. M. *Memories of Eighty Years.* (Scribner).

Duclaux, Madame. *Victor Hugo.* (Holt).

Not a dull page in this biography.

Dumas, Alexandre. *Three Musketeers.* (Appleton).

The Leloir edition of this classic is a book to go without eating for. It is hard to tell which is better, the pictures or the story.

Ford, J. L. *Forty Odd Years in the Literary Shop.* (Dutton).

Hémon, Louis. *Maria Chapdelaine.* (Macmillan).

An American idyll of the north woods.

Hutchinson, W. L. *If Winter Comes.* (Little, Brown).

Marquis, Don. *Noah an' Jonah an' Cap'n John Smith.* (Appleton).

Humorous poems by one of the most spontaneous fun-makers of modern times.

Marquis, Don. *Carter and Other People.* (Appleton).

Newton, A. E. *Amenities of Book Collecting.* (Atlantic).

Newton, A. E. *Magnificent Farce, and Other Diversions of a Book-Collector.* (Atlantic).

Paine, R. D. *Lost Ships and Lonely Seas.* (Century).

Quick, Herbert. *Vandemark's Folly.* (Bobbs-Merrill).

A story of the opening of the west, of the pioneers who made the State of Iowa.

Strachey, Lytton. *Queen Victoria.* (Harcourt).

Wilkinson, Marguerite. *Dingbat of Arcady.* (Macmillan).

Memories of "small, but sprightly adventures" in the open—canoeing, "Fording," etc.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JUNE 15, 1922

THAT the American Library Association is now truly a national organization, in comprehensive function as well as wide membership, receives striking proof in the report of Secretary Milam summarized elsewhere. Its membership, now well past the five thousand mark, exceeds in number a third of the fifteen thousand credited by the 1920 census to the library profession, tho the census classification is somewhat indeterminate and the A. L. A. includes trustees and others as well as librarians. Both in equipping libraries and librarians better to serve the public and in extending the library public itself by promoting library extension and better reading, the A. L. A. is doing a great work in co-ordination with the national organizations of other callings which every year knit our people more closely together. Under the precedent that an A. L. A. president holds office for one year only, the continuity and development of the Association are peculiarly in the hands of the secretary as the working executive, and under Secretary Milam's administration headquarters has greatly broadened the scope and increased the usefulness of the organization which it serves.

★ ★ ★ ★ ★ ★

AN excellent suggestion in President Root's forecast for the Detroit conference is that A. L. A. members should be not only up to date, as they are all supposed to be, but on time, as practically they are not. It was the custom of Dr. Richardson, while president of the American Library Institute, to call the meeting to order at the exact time specified, even if it had an audience of only one person specially engaged for the occasion, on the principle of Sydney Smith's "dearly beloved Roger." The result was that members of the Institute came to know that they would lose something worth while if they did not present themselves at the announced hour. It may be hoped that President Root will have the courage of his convictions, and by call-

ing the general assembly promptly to order will set the pace also for the other associations and the several sections. There will then be less reason for the meetings to drag on past the luncheon or dinner hour or be conducted at an uncomfortably rapid pace to finish up the program. President Root's word to the wise should be sufficient. It may be added that from present indications he is likely to preside over the largest conference which the A. L. A. has held. The advance registration promises to equal if not exceed that for the Swampscott Conference which won the banner last year, and it is more than probable that, with the large number of libraries in the Middle states, there will be as usual a good many late comers who will not be able to register in advance.

★ ★ ★ ★ ★ ★

AT the Booksellers' Convention in Washington last month, very full acknowledgment was made and cordial appreciation expressed of the co-operation of libraries in the distribution of books in which both the commercial and altruistic factors have their respective shares. A very cordial feeling of mutual helpfulness has been growing up, especially in recent years, between librarians, publishers and booksellers, and it is to be hoped that at the library gathering the feeling of the book-trade toward libraries may have as cordial appreciation. There was a time when booksellers looked askance at libraries as interfering with their trade by lending a book which might otherwise be bought, while librarians looked upon booksellers as purely commercial folk, interested only in earning a living. A wiser thought and higher tone have happily prevailed, and there is now cordial acknowledgment on both sides that the work is mutual and of mutual benefit, in the common purpose of a larger use of better books by a greater reading public.

LIBRARY ORGANIZATIONS

The Conference

THE Conference promises to be "the best ever." Advanced registration on June 13th was 1,450. The local committee, of which William Webb of the Detroit Public Library is Chairman, is helping late applicants to secure rooms.

Programs of the half hundred meetings of the week, travel rates, post-conference trip announcements, etc., will be found in the May *Bulletin* of the A. L. A., and the LIBRARY JOURNAL for June 1.

Since the publication in our last number of the program of this section the following additions have been made:

CATALOG SECTION

Second Session—Friday afternoon.

Small Libraries Division

Who catalogs the small library?—Harriet Turner, Public Library, Kewanee, Ill.

Greater representation of catalogers' interests in the affairs of the State Association and National Association—Ellen Hedrick, North Dakota Library Commission.

Large Libraries Division

Principles of cataloging for branch libraries, as illustrated by the methods of the Carnegie Library of Pittsburgh, and the St. Paul Public Library—Amy C. Moon, St. Paul Public Library.

Cataloging for branch libraries in the Detroit Public Library—Abbie F. Gammons, Detroit Public Library.

SPECIAL LIBRARIES ASSOCIATION

The Convention will open with a luncheon at the Detroit Board of Commerce on Tuesday at 12:15, with short introductory addresses by: Harold H. Emmons, President, Detroit Board of Commerce; Adam Strohm, librarian, Detroit Public Library; Harvey J. Campbell, Secretary, Detroit Board of Commerce. This will be followed by

First General Session—1:30 p. m.

Annual Business Meeting of the Association.

First Group Meeting—Hotel Statler at 8 P. M.

Subject: "The Personality of the Special Librarian." Miss Frances S. Cox, Group Chairman. Speakers: Laura R. Gibbs; Elsie L. Baechtold; O. Louise Evans; Emma M. Boyer; Ernest W. Chapin; Lewis A. Armistead; H. H. B. Meyer; K. C. Walker.

Second General Session—Tuesday, 1:30 p. m.

Speakers: A. E. White, director of Engineering Research, University of Michigan; Harvey Whipple, editor *Concrete*, Detroit; Ward Gavett, R. E. Polk and Company, Detroit.

Second Group Meeting—Wednesday, 8 p. m.

Subject: "The Training of the Special Librarian." Mr. J. H. Friedel, Group Chairman. Speakers: C. R. Barnett; Adelaide R. Hasse; Marguerite Burnett; Christine M. Bruer; Ernest J. Reece; D. Ashley Hooker; Herbert O. Brigham; Nelson W. McCombs.

Third Group Meeting—Thursday, 8 p. m.

Subject: "The Objective of the Special Librarian." Miss Maud A. Carabin, Group Chairman. Speakers: Mary Louise Alexander; Grace England; Mary B. Day; Ethel A. Shields; D. N. Handy; George A. Devenau; Floyd J. Miller; William C. Greaney.

The following officers of local associations of special librarians will make brief reports: Rebecca B. Rankin, New York; Jean E. Graffen, Philadelphia; Laura R. Gibbs, Boston; Alta B. Clafin, Cleveland; Special Libraries Association of Southern California.

Third General Session—Friday, 1:30 p. m.

Speakers: F. E. Cady, research manager, National Lamp Works, Cleveland; Lent D. Upson, director, Detroit Bureau of Governmental Research.

Report of Committee on Nominations.

THE COUNTY LIBRARY EXHIBIT

The County Library Exhibit will include displays of county library work in operation in many widely separated states.

Pictures and maps showing the progress of the work and special phases of it developed in different regions, lantern slides and folders descriptive of this work are in abundance.

The development of county library laws will be demonstrated by means of a map of the United States, with states shaded to show where county library laws exist, and counties having libraries marked. Budget making will be exhibited by a chart outlining the budgets of typical counties and how they are distributed.

A toy village—a model of a library center—will show where neighborhoods gather for their books.

Automobiles will be in readiness to take visitors to library centers in operation in Wayne County.

NEW YORK SPECIAL LIBRARIES
ASSOCIATION

THE New York Special Libraries Association has had a successful year. The opening meeting was held in October, individual group meetings were the program in November, and in December we had a large, popular dinner made attractive and interesting by two splendid economic speakers, Carl Snyder, statistician of the Federal Reserve Bank and Prof. David Friday of Michigan. The January meeting was planned and carried out by the Medical Group (the initial suggestion also coming from them). Dr. Royal Copeland, Health Commissioner of New York City and Dr. Thomas Darlington gave much food for thought in their good speeches. In February the Association dined at the Metropolitan Life Insurance Company's offices. The activities of the Company and their library were explained by the vice-presidents, Dr. Lee K. Frankel and Mr. Kavanagh. A visit to their new library under the guidance of the librarian, Frances Cox, was most enjoyable. At the March meeting the program was devoted to the subject of Informational Services; Prof. Gerstenberg of New York University introduced the subject well and he was followed by short explanatory talks by the representatives of a dozen of the well-known services. It was a most profitable session.

In April the annual business meeting was held. The membership, the social, the program, the publicity and the group chairmen committees have all been working faithfully. Eighty-six new members were added to our roll during the year. The attendance at every meeting exceeded one hundred and in one instance reached the two hundred mark. The social committee has been active and the majority of the members feel well acquainted with one another. The programs speak for themselves. The group chairmen, many of them, held monthly meetings at the various libraries in their group for the purpose of studying the resources; these chairmen also formed themselves into a Clearing House of Information Committee and the following has been accomplished. The survey of all the special libraries in the City has been practically completed; from these surveys a union subject catalog is being made. When it is finished it will serve to show the location of most material on all subjects in all the special libraries. This is only the initial step; it is the idea of the Association to continue this, making it increasingly useful. Gradually it will also include a union list of periodicals and serials.

In March the Special Libraries Association of Boston suggested that our two associations work together for publicity. Therefore we now have

a combined committee of seven members with Carlos Houghton as chairman. The Publicity Committee is planning a very good campaign—it will not be launched until all material is ready and it can be made continuous. We do not expect to see results from this committee till next fall.

Miss Margaret Mann spoke informally at this April meeting, and inspired us with the possibilities of "Classification and cataloging as an asset to the special library." It was a very informal and intimate talk that was decidedly helpful to all.

The final meeting of the year was held on May 16th at the Chamber of Commerce of the State of New York. The Chamber had thrown open the Great Hall as a reception room for the guests. The dining room and tables were very attractively decorated with wild flowers. Irving T. Bush, president, in his short address of welcome, ably illustrated to us by references to a recent visit in Vienna the permanency of the library's treasure as compared to the fleetingness and fluctuation of the economic treasure or currency. The President of the Association responded with an appreciation of this hearty welcome. A word of explanation concerning the Union Subject Catalog was also made at this time.

Dr. Luther Gulick, Director of the National Institute of Public Administration by means of many fables set clearly before us the most essential reasons for the recording of civic experience in order that these facts should be available for the public administrators as well as the citizen body itself. A charming talk by Dr. John H. Finley of the *New York Times*, stressing the importance of the library as the best means of education for the adult, followed.

The Civic Group which arranged and carried out the plans of this meeting which is perhaps the most successful of the year is entitled to the thanks of the entire Association. During the course of the dinner the retiring President was presented with a fully equipped auto lunch case as the gift of the Association, after which Miss Rankin turned over to Miss Frances S. Cox, the incoming president, the reins of the Association and Miss Cox graciously assumed the chair.

Officers for the coming year are: President, Frances Cox, librarian, Metropolitan Life Insurance Co.; vice-president, Frank Place, New York Academy of Medicine; Sec.-Treas., Margaret Wells, librarian, American International Corporation; Executive Board, Gertrude Peterkin, American Telephone & Telegraph Co.; Rebecca B. Rankin, (retiring president) Municipal Reference Library.

REBECCA B. RANKIN, *President*.

SPECIAL LIBRARIES ASSOCIATION OF BOSTON

PERHAPS the most striking achievement of the Special Libraries Association of Boston for the season of 1921-22 has been the formation of a course of fifteen lessons in library methods, held weekly. Twenty-one members have availed themselves of this opportunity for improving their library technique, and conducting a like course another year has been considered.

The Association has had a particularly active year. Meetings have been held monthly in the libraries of various members, as, the New England Historic Genealogical Society, Edison Electric Illuminating Co., Harvard University School of Architecture, Women's Educational and Industrial Union. The average attendance has been forty-two. The speakers have included Carlos C. Houghton of Poor's Publishing Co., George Parker Winship of Harvard University, Charles F. D. Belden of the Boston Public Library, and William F. Jacob of the General Electric Co.

A Registration Committee has been formed to handle the employment situation and some actual placements have been made for the members. Five hundred firms in Boston and vicinity have been circularized in order to familiarize employers with the special library idea. A committee has inquired into the possibilities of a Union Catalog of the resources of the many libraries. Definite suggestions have been made, and the hope is entertained of putting such a card catalog into being another year. The Publicity Committee has done much toward introducing the Association to Boston. Write-ups of every meeting have been made for the largest Boston papers, and a set of articles describing the outstanding libraries is to be featured at a later date in one of the newspapers. This has been done at the suggestion of the editor of the paper.

The possibility of establishing some plan of keeping track of the dates when serial publications should arrive, as annual reports, catalogs and such material which is published somewhat irregularly, has been investigated by another committee. After much research, a plan is now offered, and will be issued later in a form suitable for distribution. A definite arrangement has been made whereby the several libraries offer to each other any discarded material. Much material that is of no more value to one library may be of particular interest to another, and the Association now has a clearing-house for this.

The officers for the last year have been: President, Ernest W. Chapin; vice-presidents, Laura R. Gibbs and Howard L. Stebbins; secretary,

Abbie G. Glover; and treasurer, Ruth V. Cook. The incoming officers are: President, Harriet E. Howe; vice-president, Edward H. Redstone; secretary, Margaret Withington; treasurer, Mildred Bradbury.

ABBIE G. GLOVER, *Secretary*.

CLEVELAND CLUB OF SPECIAL LIBRARIANS

NOTWITHSTANDING the discontinuance of many business libraries the Cleveland Club of Special Librarians has continued to hold meetings thruout the season just closed. Almost half of the membership consists of public library department heads in charge of special collections and several of the "old" special librarians now in other lines of work have kept their membership in the Club which is looking forward to a season of renewed activity next year.

SPECIAL LIBRARIES COUNCIL OF PHILADELPHIA AND VICINITY

THE two last meetings of Council were devoted to round table discussion on the accomplishments to date and plans for the future.

The Council is about to print an enlarged edition of its Directory of Libraries. The Committee in charge of this work, of which Josephine B. Carson, Librarian, Pennsylvania Compensation Bureau, is Chairman, has been actively engaged in searching for new business libraries, with results which enable them to include in the new edition about 35 additional libraries. As a part of the campaign, letters were sent to all Philadelphia newspapers, requesting publicity, and they in turn published very satisfactory notices of the Council and its work.

An urgent need has long been felt for a better knowledge as to the location of the unusual magazines in the special libraries of Philadelphia, and for that purpose the Council appointed a Committee on Periodicals, with Frank G. Lewis, as Chairman, to undertake the work. Besides Dr. Lewis, the Committee includes Jean E. Graffen, Chief, Periodical Department, Free Library; Deborah Morris, School of Fine Arts, University of Pennsylvania; Carolyn Shantz, Philadelphia Rapid Transit Co., the Chairman of the Council, Louise Keller, and Secretary, Helen M. Rankin. The Committee decided in favor of a union card catalog, as opposed to a printed list, both on account of the expense and because of the comparative impermanence of special library collections. The Periodical Department of the Free Library will act as its custodian for the time being.

HELEN M. RANKIN, *Secretary*.

DISTRICT OF COLUMBIA LIBRARY
ASSOCIATION

OVER one hundred Washington librarians met on May 26th, the occasion being a "Know-Your-Library Meeting" of the District of Columbia Library Association.

The meeting was opened with an interesting address by Edwin E. Slosson, Editor for Science Service, who spoke in part as follows:

All of us cannot become masters of science nor can we understand the intricate formulae of technological investigation. But we can take intelligent interest in special fields of knowledge and greatly increase our store of general information. Today there are many educators, editors, and institutions engaged in spreading specialized information, but their work has been frequently retarded because of lack of co-ordination of local informational facilities.

In this connection the determination of Washington librarians to analyze their collections and to build up a central index of Washington's informational resources is worthy of special commendation. If we intend to put the "pop" into popular science we must make scientific information readily available to all seekers, for there is nothing that pricks the bubble of popular enthusiasm so readily as procrastination and delay.

The slogan "Know Thyself" applies to institutions as well as to individuals. It is a basic fact that a library cannot render adequate service prior to analyzing its resources. It is equally important that each librarian know something of the facilities of his neighbor's library. How valuable a central subject index to all library information would be is at once apparent.

Science Service and the Research Information Service of the National Research Council are always interested in constructive undertakings such as you are now engaged in. On our part, Science Service is endeavoring to serve the librarian by means of our *Science News Letter* and the Research Information Service is answering technical queries free of charge. There is real need and opportunity today in Washington for further extension of library informational service and it would seem that this Association is making a big step in the right direction.

Herbert D. Brown, Chief of the United States Bureau of Efficiency, in the second address of the evening, discussed reclassification in relation to government librarians. Mr. Brown said in part:

The task of reclassification reveals much that is interesting concerning federal employees and the efficiency with which their work is performed. In recent years there have been many changes in federal department activities and an outstanding aspect is the increased attention to the furnishing of fact information. In this connection the service rendered by government librarians deserves special commendation.

The examination of existing salary schedules clearly shows that high grade library service, in many instances, is not adequately recognized. Desiring to bring about proper recognition for all government work, including that of the librarian, the Bureau of Efficiency's plan of reclassification disregards professional groupings and provides for the remuneration of the worker upon the basis of service, actually rendered. After careful study of the problem we are convinced that this method of reclassifying is the only one which promises proper recognition and compensation for skilled professional service.

Librarians in the government service in Washington and elsewhere have demonstrated their ability to apply fact information in the practical solution of administrative problems and in the extension of information service to agriculture, commerce and industry, and the trades and professions. It is our expectation that reclassification will put this service upon a recognized footing along with other professions and provide for adequate compensation.

The purpose of the "Know-Your-Library Meeting" was emphasized by Dorsey W. Hyde, Jr., President of the Association, in his introductory remarks, and all librarians were asked to hand in, properly filled out, the Know-Your-Library Survey blanks which had been distributed prior to the meeting. These blanks will be used as a basis for the studies of the Association's Committee on Informational Resources which aims to compile an index to the informational resources of the District of Columbia. Refreshments were served at 9:45 and the meeting was voted the most successful of the season.

SOUTHERN CALIFORNIA S. L. A.

AT the last meeting of The Special Libraries Association of Southern California held on April 10th a constitution was adopted which will govern this interesting group of workers. While their interests might at first seem to be too diversified to be readily harmonized each member is primarily a worker in "things in print" and facts which are known to somebody; and their community of interest lies in studying together the best ways of obtaining facts and data of value to the organizations they serve, the most efficient and practical ways of organizing them, and the most successful ways of tabulating, arranging, and presenting them so that they prove of value in the world of affairs.

This organization should prove of interest to every worker in statistics or research in the Southwest whether they be located in public institutions, trade organizations, industrial plants, private concerns, commercial associations, chambers of commerce or elsewhere. There is a community of interest between all such workers whose prime object is "putting knowledge to work." Representatives from such bodies in Southern California will therefore find themselves welcome at any of the meetings of this Association.

The officers are: President, Mrs. Vivian G. Smith, Security Trust and Savings Bank; vice-president, Beth L. Pasko, Southern California Edison Co.; secretary-treasurer, Mrs. Mary E. Irish, Barlow Medical Library. These offices together with Ralph E. Power, University of Southern California and Guy E. Marion, former president of the national Special Libraries Association, who has recently come here from Boston, constitute the Executive Board.

KANSAS DISTRICT LIBRARY MEETINGS

AS last year, four district meetings were again held in Kansas this spring. The meeting place for the northeastern section was at Baldwin, in the library of Baker University on April 25, for the northcentral and northwest sections at Manhattan on April 26, for the southcentral and southwest at McPherson on the 27th and for the southeast at Chanute on May 3. The registration numbered from 19 to 42, with a total of 114 for the four meetings. Julius Lucht, librarian of the Wichita City Library, chairman of district meetings, was in charge of all of the conferences, and Willis H. Kerr, librarian of the Emperia Normal School, and president of the Kansas Library Association, attended two of the four.

Book selection for the smaller libraries; clubs and their programs; special "weeks"; inexpensive methods of handling clippings, pamphlets, and pictures; county libraries; library revenue; radical periodicals; and library thefts, vandalism, and other delinquencies, were the topics discussed. The conferences revealed a wide range of opinion and experience, and the general feeling was that these informal get-togethers were helpful and a valuable auxiliary to the annual state conference in the fall. More than half of those attending the district meetings the past two years are unable to come to the annual state conference with any regularity.

JULIUS LUCHT.

OXFORD BIBLIOGRAPHICAL SOCIETY

THE Oxford Bibliographical Society which was founded at the beginning of this year and which has as its primary object the promotion of the study of bibliography in the University, is already one of the most active of Oxford societies.

Last term the Secretary gave a conversational lecture on the routine of a printing office in the time of Shakespeare, and Mr. Falconer Madan read a paper dealing with the curiosities of the Oxford Press, which had its inception in the year 1478. The former lecture is being supplemented this term by a practical demonstration of handpress printing by the Controller of the Clarendon Press. Mr. E. Gordon Duff, whose name is well known in America, is lecturing next month on stamped English bindings. Examples from his own fine collection will be on exhibition in the Bodleian Library. Other forthcoming lectures are "The Bibliographical Study of Shakespeare" by Mr. Percy Simpson, and "The Early History of Paper" by Dr. Cowley. Bodley's librarian.

As the Oxford Bibliographical Society hopes to become before very long a publishing society, it cordially invites American librarians, bibliographers, and book-collectors to become members. The first publication of the Society will probably be a handlist of the works of William Cowper, the poet.

STRICKLAND GIBSON. *Secretary.*

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS WANTED

Middle-aged woman, with experience in teaching and library work wants full or part time position, I. H. 11.

College and library school graduate wants position as reference assistant in college, special or public library in New York City or vicinity. L. Y. 12.

Young man, experienced in research and to some extent in library work, and with good knowledge of languages and science, would like to learn of library opening. L. K. 12.

College and library school graduate with sev-

eral years experience in public, normal school and special libraries, wishes to hear of opening preferably in college or reference work. L. V. 12.

POSITIONS OFFERED

Wanted, Librarian for remote county library to organize 15,000 volumes for County use. Salary \$50 per month and living expenses. S. G. 12.

Assistant wanted to do general college library work. Work to begin as soon as possible. Address Eleanor I. Jones, Librarian, Virginia Polytechnic Institute Library, Blacksburg, Virginia.

A college in the Northwest desires an Assistant Librarian, college graduate with library school training. Duties mainly circulation. salary \$1400 to \$1500. Give particulars. M. P. 12.

CURRENT LITERATURE AND BIBLIOGRAPHY

In "State Laws Relating to Education Enacted 1918-19" (U. S. Bureau of Education Bulletin 1920, no. 30, 1921) is a chapter on laws regarding libraries and museums, p. 192-199.

Mrs. A. S. Perkins of the National Association of Manufacturers is contemplating the compilation of a directory of the libraries of American manufacturers and manufacturing associations, says *Special Libraries* for May.

In response to frequent requests the Somerville (Mass.) Public Library has published a brief bibliographical sketch of Sam Walter Foss, "poet, librarian and friend of man" who was for thirteen years Somerville's librarian and "best loved citizen."

A revised edition of "Series and Sequels for Juvenile Readers" which is out of print is planned for publication next fall. Suggestions as to new entries or omissions are invited by the compiler, and may be sent to the editor of the *Bulletin of Bibliography*, 83 Francis St., Boston 17.

"Technical Books, 1921, for Small and Medium Sized Libraries" is a reprint of Donald Hendry's 50-title annotated list in *Booklist Books, 1921*. It may be obtained from the A. L. A. for 10 c. a single copy, \$1 for 30, \$3.50 for 100, \$7 for 200, \$8.50 for 250, and \$16 for 500.

The *Maine Library Bulletin*, which owing to excessive cost of state printing suspended publication with the January number last year, has reappeared, the present issue (dated January, 1922) being Vol. 10, No. 4, and therefore completing that volume. The next issue will probably be published in July.

"An Historical Reading List for Children," being Lenore St. John Power's list prepared for Hendrik W. Van Loon's *Story of Mankind* (Boni and Liveright, 1921. \$5) is now reprinted by the A. L. A. in attractive form for distribution, and may be had for 10 c. a single copy, \$4 a hundred, \$17.50 for 500, and \$30 a thousand.

The celebration of the tercentenary of the City Library of Lübeck (Germany), postponed on account of the war from 1916 until last month, has been made the occasion of the publication of a history of the Library by its director W. Pieth. To this is appended a catalog of the German theological manuscripts in the library described by Dr. Paul Hagen.

"Plant a Garden" is the inviting title of the *May News Notes on Government Publications*, edited by Edith Guerrier for the Boston Public Library. It is devoted to a description of the one-foot shelf of the Department of Agriculture publications which describe and analyse "every phase of real and amateur farm life in Massachusetts."

"The Church and the Library" by Arthur E. Bostwick, is the leading article in the June *Bookman*. This paper was read by Dr. Bostwick at the Swampscott Round Table of Libraries of Religion and Theology. In the same number Annie Carroll Moore writes on "Children's Books Past and Present." With this article Miss Moore resumes her series on children's reading which will continue thru the coming year.

"The New Poetry," a study outline by Mary Prescott Parsons, librarian of the Morristown (N. J.) Public Library has been thoroly revised and brought up to date for the second edition just published (H. W. Wilson). Additional matter for this edition includes bibliographies and reading on Children's poetry, and on sonnets. "One Hundred American Poets" is a selection from the series of lists prepared annually by the Poetry Society of America for reference use in public libraries.

"Technology Classification for the Technology Division of the Boston Public Library," first printed in December, 1918, and now revised by George S. Maynard, chief of the Division, has just appeared in a pamphlet of twenty-six pages. The grouping follows in general that of the Library of Congress; but the Library's own numbers, allotted for mechanic arts in 1858, have been expanded so as to cover the growing field of modern technology. There is a detailed index.

The printing of the list of accessions of manuscripts, broadsides and British transcripts in the Library of Congress as an appendix to the annual report of the Library has been discontinued. The list appears now in pamphlet form; the first, just issued, includes accessions from July 1920 to the end of 1921. This, with the *Handbook of Manuscripts* (1918) and the appendices to the annual reports of the Librarian from 1917 to 1920 inclusive will serve to keep the investigator informed as to the state of these collections.

Readers' Ink; Indianapolis Library Service made its bow on May 15. This is the continuation in a new form of the earlier *Book Bulletin of the Indianapolis Public Library*. "For some time," says the editor, "our efforts to reach you in print have been confined to the pages of the newspapers and to brief lists of books on special subjects which have been issued from time to time. Now comes *Readers' Ink* to tell you every month of our work and our hopes and our plans, what we can do for you and what you can do for us."

Staff News is the title of a preliminary number of a four-page publication which the Chicago Public Library plans to issue beginning with the fall. In addition to giving much information on local matters, an irresistible call to the Detroit Conference, and some pure entertainment, the *News* finds space to quarrel with the temporary title it has chosen and with the smallness of its first number, and to invite heartily suggestions for a more distinctive title and department headings, a new editor and anything else which will make for a publication worthy of the staff.

"The Hoover War Collection at Stanford University, California" is an analysis by Ephraim Douglass Adams, executive head of the History Department of the University, prepared for the information of the donor and the trustees. It continues a report of operations in the field with a very general analysis of the collection as it stands. Since the donor has arranged that the work of collecting will go on "for the next twenty-five years" Professor Adams earnestly hopes "that anyone who is interested in the undertaking will make suggestions as to methods and especially as to types and available sources of materials."

"Viewpoints in Essays," by Marion Horton, principal of the Los Angeles Library School, is "an arrangement of books according to their essential interest." So attractively "labelled" are those interests that one is compelled to find out what comes under "The Harvest of a Quiet Eye," "Bed Books," "Curry and Caviare," "Masculine Attitudes" and the "Eternal Feminine," "Birds and Blossoming," "The Footpath Way," "Lands and Peoples," "The Eternal Verities" and "Everyday Ethics," etc. This is the third of the Viewpoint series edited by Josephine A. Rathbone and published by the American Library Association (60 c.).

The first volume "La Crise Internationale" of the "Catalogue Méthodique du Fonds Allemand

de la Bibliothèque" [et Musée de la Guerre, Paris] has just been published by Etienne Chiron, 40 rue de Seine, Paris. The second volume "L'Allemagne" is in the press and the third and last volume of the series "Les Alliés de l'Allemagne, l'Entente, et les Neutres" is being prepared.

The resources of this library are already very considerable, the collections having totaled over 100,000 pieces at the end of last year. Of these some 12,000 works are in German—10,750 of German origin and the rest Austro-Hungarian. The present catalog is the work of Jean Dubois, chief cataloger of the "B. M. G." and Charles Appuhn, chief of the German Division, and the introduction by Director Camille Bloch shows the relation of this bibliography to some others in this field.

LIBRARY CALENDAR

July 3-8. In Boston. Annual meeting of the National Education Association.

Aug. 30-Sept. 1. At Olympia. Pacific Northwest Library Association's thirteenth annual conference. Visitors to the Pacific Northwest will be particularly welcome.

Sept. 11-16. At Alexandria Bay, Thousand Islands. 32nd Annual Meeting of the New York Library Association.

Sept.—(Probably about the middle of the month). At Duluth. Annual meeting of the Minnesota Library Association.

October 17-20. At St. Joseph, Mo. Joint meeting of Kansas, Missouri, Nebraska (and probably Iowa) Library Associations.

Oct. 18-19. At Flint. Annual meeting of Michigan Library Association. There will be a special meeting of the Association held in connection with the Detroit Conference, June 28.

October 19-21. At Chicago. Illinois Library Association's annual meeting. Headquarters at the Chicago Beach Hotel.

Oct.—At Signal Mountain, Chattanooga, Tennessee. Joint meeting of southeastern state library association.

Oct.—At Yankton. Fall conference of the South Dakota Library Association, and three-day library institute.

Oct. 24-27. At Altoona, Pa. Keystone State Library Association. Headquarters at the Penn-Alto Hotel.

November 15-17 in Indianapolis. Annual Meeting of the Indiana Library Association and of the Indiana Library Trustees Association.

LIBRARY WORK

HOW TO COUNT CIRCULATION PERCENTAGES

IT has been called to the attention of the Committee on Library Administration that in library reports percentages are sometimes incorrectly figured. An examination of some of the errors alluded to has convinced the Committee that they should make the following statement in regard to the correct method for figuring percentages:

Fiction circulation percentage is obtained by dividing the total fiction circulation by the grand total circulation.

Adult fiction circulation percentage is obtained by dividing adult fiction circulation by the total adult circulation.

Juvenile fiction circulation percentage is obtained by dividing juvenile fiction circulation by the total juvenile circulation.

Book stock percentage or accession percentage for either total, adult or juvenile fiction, should be calculated in the same manner.

It is an error to divide, for instance, the adult fiction circulation by the grand total circulation and speak of the answer as the adult fiction circulation percentage. Such a figure should have no general recognition, but if it is used, it should be clearly expressed as the adult fiction circulation percentage of the grand total circulation.

Library statistics will be clarified materially if the divisor used in the calculation of percentages is always the total of which the figure in question is an immediate part.

FRANKLIN F. HOPPER,
Chairman, A. L. A. Committee on Library Administration.

TO SUPPLEMENT THE FICTION COLLECTION

THE San Diego plan for re-inforcing the new fiction collection reported recently in the LIBRARY JOURNAL has also been found successful in the branch libraries of St. Paul, Minnesota, as has also another scheme.

In an attempt to make greater use of material to be found in periodicals which are needed for files and therefor may not be cut up and made into booklets, the following plan has been worked out: Each branch librarian has been assigned certain periodicals which she examines monthly to make note of any continued material, either fiction or nonfiction, which is likely to be published later in book form and for which she thinks there will be a demand. After the article or story has been completed, slips are made for author and title entries, indicating where the material is to be found, as:

Robinson, Corinne Roosevelt

My brother, Theodore Roosevelt. (In *Scribner's Magazine*, February to July, 1921) These slips are sent to the branch division office where sets of cards are made for each branch and for the reading room of the central library. In the branches the cards are filed in the catalogs so that users of the library may know that the material is available at the branch, even tho the book itself may not be in. Patrons usually have preferred carrying several magazines to waiting for books sent from the central library.

Packets of periodicals have been made up with a card attached, reading: "To Let" by Galsworthy, or, "Margaret Deland's new book in these magazines." Other titles made available by this plan, are: "The Book of Jack London" by Charmian London; "The Thread of Flame" by Basil King; "The Mountebank" by William J. Locke; "Messer Marco Polo" by Donn Byrne; "The Head of the House of Coombe" by Frances Hodgson Burnett; and "Hail Columbia!" by W. L. George.

MYRA W. BUELL,
Chief of Branch Division.

AUTOGRAPHED BOOKS

THE collection of autographed books in the Grosvenor Library dates from only five years ago, and no especial effort has been made to enlarge it, writes George Hibbard in the January-April number of the *Bulletin of Bibliography*. Visiting celebrities are approached by a representative of the library, when the means of access is easy and simple, and are asked to write their autographs in their books. It has been found that those who are called upon are so far from being offended as to do much more than merely to supply a signature. A good wish, an expression of opinion or a quotation are also added. Maeterlinck wrote in the library's translation of "The Bluebird": "A la belle ville de Buffalo. Bien cordial hommage." Cardinal Mercier placed his signature on a reproduction of the war poster which represented him standing in protection of Belgium. Hugh Walpole, John Masefield, John Drinkwater, and Sir Harry Lauder are other willing contributors.

Besides the gain in human interest of books so inscribed, the Library intends soon to turn them to use in calling the attention of visitors to its other resources. The number of association books is increasing to the point where an exhibition of them can soon be arranged, with resultant advantages in the way of useful publicity.

AMONG LIBRARIANS

The following abbreviations are used:

- A. Library School of the Carnegie Library of Atlanta.
- C. California State Library School.
- C.P. Carnegie Library School of Pittsburgh.

- W.R. Western Reserve Library School.
- Wash. University of Washington Library School.

AKERS, Susan Gray, 1913 Wis., who has been cataloger at the North Dakota University Library, went to Madison, Wis., last month as instructor in the University of Wisconsin Library School and field visitor for the Commission.

ANNABLE, Dorothy, 1918 S., has been appointed first assistant, Extension Department of the Evansville (Ind.) Public Library.

BACKER, Mrs. John W. (Mary M. Askew, 1919 Wis.), is chairman of a committee on "Exhibit of Children's Books and Work" for the national meeting of the Woman's Foreign Missionary Society to be held in Baltimore next fall.

BARR, John, chief librarian of the Auckland (N. Z.) Public Library, has written a history of the city of Auckland, 1840-1920.

BAXTER, Elizabeth H., 1917 P., cataloger at the Kansas State Historical Society Library, Topeka, appointed cataloger at the Panama Canal library on the Isthmus of Panama.

BYRNE, Paul R., 1915 N. Y. S., appointed reference librarian at the University of Notre Dame, Notre Dame, Ind.

CALDWELL, Gladys, 1919 L. A., appointed principal of the Art and Music department in the Los Angeles Public Library.

CHAMBERLAIN, Edith J., 1903 D., formerly of the Brooklyn Public Library and for the last seven years librarian of the Bixby Memorial Free Library, Vergennes, Vermont, has resigned on account of poor health. She hopes to take up library work again in a few months prefer-

ably in the South. Her address is Highland Lodge, Southern Pines, North Carolina.

CHAPIN, Ernest W., librarian of the First National Bank, Boston, has resigned to become assistant librarian of the New York Municipal Reference Library.

CLARK, Elizabeth V., 1900 D., 1915-16 N. Y. P. L., appointed librarian of the California State Department of Agriculture.

DICKINSON, Maude V., 1918 Wis., high school librarian at La Crosse is conducting a high school girls' club, called the Library Round Table, to promote interest in library work.

DOANE, Gilbert H., 1920-21 N. Y. S., has resigned the reference librarianship of the University of Arizona to take charge of classification at the University of Michigan.

DUNCAN, Barbara, for the past fourteen years in charge of the Brown music collection of the Boston Public Library, appointed librarian of the Sibley Music Library of the University of Rochester, which contains some 9000 volumes available for use by the public.

FOOTE, Frances R., 1904 L. A., appointed principal of the catalog department in the Los Angeles Public Library.

FORD, Edith H., 1913 I., leaves the Minonk (Ill.) Public Library to spend a year in the Near East, sailing about June 1st.

FRIEDEL, J. H., head of the Information Department of the National Industrial Conference Board has the supervision of the Board's Radio Information Service which broadcasts weekly statements on "the cost of living, the flow of wages, the demand for labor in various sections, the movement of wholesale and retail prices, general business conditions and other matters of interest to those who depend on our industries for a means of self-support."

FROGGATT, Lillian M., 1920 Wis., will give the summer courses in library science in the Oshkosh State Normal School.

GORTON, Helen D., 1907 Wis., has joined the staff of the Michigan State Library and is giving courses in library methods to the county normal schools.

HANDERSON, Juliet A., 1908 W. R., 1914-15 N. Y. P. L., who has been in charge of the Engineering Library at Columbia University while working for the master's degree, appointed first assistant in the publications department of the Russell Sage Foundation.

FOR RESEARCH DEPARTMENTS AND BUSINESS LIBRARIES

WEALTH AND TAXABLE CAPACITY

By SIR JOSIAH STAMP, K.B.F., D.Sc., Guy Medalist of the Royal Statistical Society and late of the British Inland Revenue Department. Being the Newmarch Lectures of 1920-21. 10s. 6d. Postage, 6d.
Times.—"A detached examination of the chief statistical data available for the consideration of post-war problems of wealth and industry, which seem so confusing to the mind of the average member of the public . . . deals with National Income, National Capital, Distribution of Income and Capital Limits of Taxable Capacity, effect of changing Price Levels upon Profits and Wages and upon the Burden of Public Debt . . . of interesting matter, and worth the careful consideration of all interested in Economic and Social Problems."

INSURANCE AGAINST UNEMPLOYMENT. With Special Reference to British and American Conditions

By JOSEPH L. COHEN, B.A. (Cantab.), M.A. (Columbia Univ.), Gilder Fellow in Economics. 18s. Postage, 1s.
Chamber of Commerce Journal.—"The four parts into which this highly interesting book is divided deal with the problem of Unemployment Insurance, the Ghent System, the British System, and the Problem in the United States of America, special attention having been paid to the last two. . . . To all who desire a well-written treatise on Unemployment Insurance this book should make a strong appeal."

REPARATIONS, TRADE AND FOREIGN EXCHANGE

By L. L. B. ANGAS, M.A. 12s. 6d. Postage, 7d.
Daily Telegraph.—"The book contains one of the best treatments of domestic and international economics. Politicians, economists and business men will find much to interest them in this work."

SOCIALISATION IN THEORY AND PRACTICE

By HEINRICH STRÜBEL, Finance Minister in the Prussian Revolutionary Government of November, 1918. Translated from the original by H. J. STENNING. 10s. 6d. Postage, 8d.
The author summarises the attempts made to put Socialist principles into practice in Russia, Hungary and Germany.

The salient features of the Bolshevik policy are traced, and the disastrous effects of the Soviet régime are emphasised.

This work is a mine of information upon sociological experiments, and is perhaps one of the most important books upon Socialism which have appeared since the War.

PROHIBITION IN AMERICA

And its Relation to the Problem of Public Control of Personal Conduct.

By SIR ARTHUR NEWSHOLME, K.C.B., M.D., late Principal Medical Officer of the Local Government Board of England and Lecturer on Public Health at Johns Hopkins University. Author of "Public Health and Insurance" 2s. 6d. Postage, 2d. Special terms for quantities.

WEALTH. A Brief Examination of the Causes of Economic Welfare

By EDWIN CANNAN, M.A., LL.D., Professor of Political Economy in the University of London. Second Edition, Eighth Impression. 6s. Postage, 6d.
Glasgow Herald.—"Mr. Cannan is probably the most trenchant, suggestive and original of living economists."

P. S. KING & SON, Ltd.,

Orchard House, 2 & 4 Gt. Smith Street,
Westminster, England

Forthcoming Books

These books deal with subjects that are of importance to everyone either in business or preparing for a business career. They should have a place in every library.

MANUAL OF BUSINESS LETTER WRITING

By E. W. DOLCH, JR., M. A.
This practical manual covers every division of business correspondence and, in its form and arrangement, is strikingly adapted to ready consultation. A valuable feature consists of one hundred sample letters so set up as to show proper form of typing, spacing, and layout, as well as subject matter. *Ready June 20, Cloth, 340 pp. \$2.25*

BUDGETARY CONTROL

By J. O. MCKINSEY, C.P.A.
Covers the full working procedure involved in stating the plans of each department of a business, for a certain period of time, in the form of estimates; co-ordinating these estimates into a well balanced program for the business as a whole; and preparing reports showing a comparison between the actual and the estimated performance. *Ready June 15. Cloth, about 350 pages, price \$4.25*

CORPORATION FINANCE

By ARTHUR STONE DEWING, Ph. D.
In this text, based on "The Financial Policy of Corporations," Dr. Dewing has preserved the comprehensive view of the original five-volume work but with much less detail. For the reader who wants fundamental principles rather than extensive technical data. *Ready June 15. Cloth, 450 pp. \$2.75*

BANKING AND CREDIT

By DAVIS R. DEWEY, Ph. D. and M. J. SHUGRUE, B. A.
Written from the viewpoint of both banker and business man, this practical volume brings out the close connection between banking and everyday business. It describes all ordinary credit instruments and shows how to use each effectively; explains the banking structure; and discusses credit statements, bank balance sheets, acceptances, etc. *Just published. Cloth, 506 pp. \$3.00*

INDUSTRIAL UNIONISM IN AMERICA

By MARION DUTTON SAVAGE, Ph. D.
Of special interest to students of the labor movement. It deals with the tendency of labor unions in this country to assume the "industrial union" form of organization which includes all workers in an industry regardless of craft, sex, or race. Two chapters discuss the I. W. W. and "The One Big Union." *Ready June 9. Cloth, 344 pp. \$2.25*

Our usual Library Discounts will apply on all these books.

HOYSRADT, Grace H., 1920 P., assistant in the children's room of the Pratt Institute Free Library, goes to the Madison (N. J.) Public Library as assistant librarian.

HUMPHREY, Erin, for three years head of the Circulation Department of the Dallas Public Library is now librarian of the Federal Reserve Bank of Dallas.

KOHL, Dorothy, 1920 S., appointed children's librarian of the Traveling Libraries Department of the St. Louis Public Library.

LETSON, Helen, for the past four years librarian of Bloomingdale Hospital, White Plains, N. Y., became librarian of the U. S. Veteran Hospital at Minneapolis, on June 1.

LOCKE, Gladys Edson, of the Boston Public Library, has added to her list a mystery story called "The Red Cavalier" just published by the Page Company.

MCCOMBS, Nelson W., 1917-19 N. Y. P. L., librarian of the Federal Reserve Bank, Washington, D. C., appointed librarian of the Washington Square branch of New York University.

MASON, Pearl, 1917 S., appointed associate librarian at the Bloomsburg (Penn.) State Normal School.

MOE, Gudrun, 1921 N. Y. S., who has been acting librarian of the Free Academy Library, Elmira, N. Y., during the past year, has been appointed cataloger in the Irving National Bank, New York, N. Y.

NORTON, Margaret C., 1915 N. Y. S., became superintendent of the Archives division of the Illinois State Library in April.

POWELL, Lizzie Lee, librarian of the Cairo (Ill.) Public Library since its organization forty years ago, and one of the oldest librarians in service in Illinois, died on June 5 as the result of a street car accident.

PRICE, Marian, 1916 N. Y. S., recently returned from two years of service with the Friends Reconstruction Unit in Vienna, has been appointed assistant in the Frederick E. Parlin Library, Everard, Mass.

PROUTY, Louise, librarian of the Cleveland Main Library, succeeds Carl P. P. Vitz as vice-librarian of the Cleveland Public Library.

ROONEY, Margaret, 1919 L. A., appointed librarian of the chemical engineering library of Robert D. Pike, San Francisco.

SNOOK, Vera J., librarian of Reddick's Library, Ottawa, Ill., has resigned to become librarian of Libbey, Mont.

TRACY, Angie, 1909-10 S., has been made librarian of the Needham (Mass.) Public Library.

WILEY, Edwin, since 1916 librarian of the Naval War College at Newport (R. I.), becomes librarian of the Peoria (Ill.) Public Library on July 1, in succession to the late S. Patterson Prowse. Dr. Wiley had his first library experience at Harvard under the direction of Justin Winsor, in 1892; he was librarian and assistant in English at the University of Tennessee in 1893-1899; after which he held a similar post at Vanderbilt University until 1906, when he became classifier in the Library of Congress. Previous to his appointment to the Naval War College he was classifier at the University of California Library.

WREN, Christopher, secretary and librarian of the Wyoming Valley (Pa.) Historical and Genealogical Society, died April 16th after two months' illness.

In addition to those already announced, members of the class of 1922 of Simmons College School of Library Science who have received appointments are: Maude E. Avery, cataloger, Pennsylvania State College; Dorothy W. Bridgewater, librarian, Lindenwood College, St. Charles, Mo.; Aline B. Colton, librarian, Emma Willard School, Troy, N. Y.; Margaret B. Durand, children's librarian, Minneapolis Public Library; Emily Hollowell, assistant, School of Education Library, University of Chicago; Hope Mathewson, branch assistant, Evansville (Ind.) Public Library; Margaret E. Motschman, cataloger, Dartmouth College Library, Hanover, N. H.; Dorothy A. Rowden, children's librarian, Englewood (N. J.) Public Library; Alice F. Stevens, general assistant, Evansville (Ind.) College Library; Elinor Taylor, reference assistant, Providence (R. I.) Public Library; Margaret Taylor and Dorothy J. Williams, general assistants, Clark University Library, Worcester, Mass.

The following members of the class of 1922 of the Pratt Institute School of Library Science have been placed: Hannah P. Anderson, assistant, Silas Bronson Library, Waterbury, Conn.; Sarah F. Barry, assistant, Catalog Department, Yale University Library, New Haven, Conn.; Jane Blatchlev, children's librarian, Tampa Public Library (Fla.); Cornelia B. Doherty, reference librarian, Silas Bronson Library, Water-

Ocean Research and the Great Fisheries

By G. C. L. HOWELL \$6.00

A survey, of both the commercial and scientific aspects of the fisheries and an indication of the main lines upon which future research must proceed.

Minor Poets of the Caroline Period

By GEORGE SAINTSBURY 3 vols. Net. \$13.75

The issue of the third and final volume completes this great work begun more than sixteen years ago. As a definitive text of the eighteen or more poets included it is not likely to be superseded.

The Mufaddaliyat

By CHARLES JAMES LYALL 2 vols. \$42.00

This anthology of ancient Arabian odes will be of the highest interest to oriental scholars. Volume I is the Arabic text, Volume II the translation.

Metaphysical Lyrics and Poems of the Seventeenth Century

By HERBERT J. C. GRIERSON Net \$2.00

Professor Grierson's selection includes verse ranging from Donne to Butler inspired by a philosophical conception of the universe and the part assigned to the human spirit in the great drama of existence.

Matie D. Fox, assistant in charge of circulation and registration, Racine Public Library;

Our Eleven Billion Dollars

Europe's Debt to the United States

By ROBERT MOUNTSIER

The only book that concisely yet adequately summarizes in popular form the facts and figures underlying the business situation today.

San Francisco Bulletin: "American writer issues wonderful book on the financial condition in Europe. One of the important books of the time."

Review of Reviews: "States succinctly those aspects of the subject that are of most importance to Americans at the present moment." \$1.50

Old Europe's Suicide

By Brigadier-General C. B. THOMSON

A brief, graphic history of Europe during the period of 1912-1919 by one who was himself an important actor in these events.

The Nation: "Should become a classic. In the new era, where world affairs are all of moment to all of us in all parts, we need wide knowledge, and we need it as it is here given, the facts in their authentic settings, focused in their right environment."

San Francisco Bulletin: "This book is absolutely essential to a complete understanding of the causes that led to the struggle that brought about the downfall of the central empires." \$2.00

THOMAS SELTZER New York

OPERA SCORES

A SPECIAL OFFER

The following grand operas, mainly by famous American composers, are important to all interested in the development of contemporary opera, especially opera in America. "HOW TO IMPORT"

A Note on Library Economics

A recent article on this subject showed that book importing is easy and very economical if you deal with a firm that knows the export trade. Messrs W. & R. Holmes, Dunlop Street, Glasgow, and of Lancashire, have connexions all over the world. Their Library Department supplies to libraries of every description, and it is highly organised to that end. Place your orders for books published in England with them and secure a prompt and efficient service, post paid. Monthly priced list of books published in England mailed free on application,—send a card for it.

HEAD OFFICE: MESSRS. W. & R. HOLMES,
LIBRARY DEPARTMENT,
3-11, DUNLOP STREET,
GLASGOW, SCOTLAND.

QUALITY—SERVICE

Our modern plant and a corps of experienced assistants are at your disposal.

Can we serve you?

Rigidity --- Convenience --- Economy

The BORDEN POLICY makes possible the most Scientifically
Constructed and Practical Bookstacks at
REASONABLE PRICES

The manufacturing and marketing policy of this company is guided today by the principles formulated years ago by its president, William Alanson Borden, in these words:

"It is my intention to make a Bookstack as cheaply as good construction will permit, and sell it to my fellow members of the Library Profession at a fair advance over the absolute cost. I do not enter the field to exploit libraries, but to help them."

The selling price of bookstacks, as is the case with other manufactured articles, is based upon the cost of materials, the cost of fabrication, and overhead. The cost of the steel used forms but a small part of the selling price; the cost of fabrication a somewhat larger part. It is the overhead—in some lines of business as high as 200 per cent—which is so often the cause of high prices.

The Borden policy of low overhead costs and quantity production, makes possible a superior product at a price no higher than that usually charged for less desirable bookstacks. The situation is admirably expressed in the adjoined letter from Hon. Louis B. Hart, President of the Board of Trustees of the Grosvenor Library of Buffalo:

Grosvenor Library

Buffalo, N. Y., May 20, 1922.

JOHN ADAMS THAYER, *Managing Director*,
Borden Bookstack Company,
Westport, Conn.

Dear Mr. Thayer:

It is my belief that your Company is in a position to be of inestimable service to the libraries of the Country and the communities which they serve.

With your low "overhead" and a perfected stack, and with quantity production, your price will enable even the smaller libraries to purchase.

Both Dr. Shearer and myself were very much interested in the claims made for your stack, and after seeing the installation at New Canaan, we not only approve of your stack but your policy.

When you have completed the installation in the Grosvenor Library it will be another exhibit, and it would seem to me that Librarians, Architects and Library Board Trustees will be interested enough to go to one of these points, and be convinced, as we were, that the Cantilever Stack is a distinct improvement in the Art.

Wishing you success, that the libraries of the country may be benefited, I am,

Very truly yours,
(signed) LOUIS B. HART.

The Borden Cantilever Bookstack

is the invention of William Alanson Borden, a librarian of 30 years' experience, perfected by the engineering force of Post & McCord, of New York, who are among the world's foremost experts in steel construction, and manufactured under license by the Kramer Steel Products Co., Philadelphia.

The Borden bookstack, being scientifically trussed and braced, is exceptionally strong. It is self-contained; it does not depend upon the walls of the building for strength and rigidity.

The shelves are removable, interchangeable and adjustable. Adjustment is simple and easy, as the shelves can be raised or lowered one end at a time.

Borden Bookstacks save space which gives increased capacity. They are easy to set up, take down and remove; are attractive in appearance.

These are their points of superiority. Send for descriptive booklet.

Thousands of Pictures

Compton's Pictured Encyclopedia pictures every idea that can best be grasped by the Child through the medium of a picture.

VISUAL education has become an integral part of pedagogic technique. Because the teacher is supplementing her teaching of what things *are* by how things *look*, the scope of the librarian's duties has been accordingly enlarged. The librarian is asked for pictures on every conceivable subject by children or whole classes of children from the school. To find pictures of the Cicada or radio machines at the asking is no easy task. Frequently it is impossible. Therefore, to possess an adequate file of good pictures, and to have that file indexed and immediately accessible has become an urgent need.

There are literally thousands of pictures in Compton's Pictured Encyclopedia, halftone and color illustrations, *every one indexed* and at the tip of your fingers! "I have seen visual education for the first time," said a well known librarian after reviewing these books.

Chosen from more than half a million, there is a picture for every idea that needs a picture. We have discarded the old woodcut and pen drawing entirely; 99% of the pictures are in halftone (like those reproduced) or in color. Hundreds of these pictures you will find nowhere else, and thousands of them you will have difficulty finding elsewhere when the youngster or the adult asks for them.

ONE OF THE GREATEST OF MAN-MADE LAKES

The water in the big pond made by the Roosevelt Dam would bury the whole State of Delaware a foot deep. Named after President Roosevelt, the dam was formally opened by him March 18, 1921. It is curved upstream so as to offer the resistance of an arch to the tremendous pressure of the water. (Pictures reduced in size.)

This is the only encyclopedia in which halftones are incorporated with the text they illustrate—right where they belong! We have removed unnecessary parts of photographs, so that each picture makes a definite contribution; and by means of a special caption above and legend below (as illustrated) each picture is made to tell its full story.

Write for 100 FREE pages of

—every One Indexed!

"I have seen visual education for the first time" said a well-known librarian after reviewing Compton's Pictured Encyclopedia

COMPTON'S Pictured Encyclopedia is a new kind of reference work, designed by competent American educators to be minutely accurate and yet intensely interesting to children. Not "written down," it is valuable, also, in the reference work of adults.

A GROUP THAT MIGHT DECEIVE REAL DEER

If you came across this group of deer in the woods in winter time, wouldn't you think that they were alive? And yet they are only deer prepared and grouped by the art of the modern taxidermist, who strives to pose animals as they would appear in their natural surroundings. This group is to be seen in the great Field Museum in Chicago.

Comprehensive

All organized knowledge included.

Properly Proportioned

With the needs of school boys and girls ever in mind.

8 volumes

Unique Fact-Index makes this encyclopedia complete in 8 volumes.

Alphabetically Arranged

With Guide Posts to indicate the contents of each page.

Tabloid Information

At the beginnings of articles, whole subjects are epitomized.

Edited

By scholars of international reputation.

American

Prepared in America for the American Junior Public.

Beautiful

Printed on pure white paper that is free from glare or reflection of light; abundance of color pages; binding is beautiful and strong enough for the hardest library use.

Compton's Pictured Encyclopedia should be included in your current list. Write us on your library stationery for 100 free pages. Make your own judgment of the value of these books. Please address Dept. 307,

F. E. COMPTON & CO., Garland Building, Chicago

Following in tabloid form are some of the features that make these books valuable, especially in the Children's Room.

Up-to-date

Every word written since the World War—new in text and treatment. Especially adapted to the new methods of teaching.

Fact-Index

An invention in indexes—occupies over 300 pages in the eighth, the last volume—pronounces, defines, explains, locates, describes—in itself a quick, concise dependable miniature encyclopedia. Indexes every fact in the first seven volumes, and adds thousands of others which one would not expect to find in a work designed primarily for children. Especially adapted to 'lightning' reference.

New Maps

Every one made since the World War.

Headings

That catch the interest and lead into the article.

Text

Composed in clear, vivid style. Interesting but not "written down" to the child.

Compton's Pictured Encyclopedia

Cheapest Reinforced Binding Ever Offered

We are publishing a catalog of over 2000 children's books, and will be pleased to send you a copy on hearing you wish to have one.

Prices will be submitted for supplying these books, either re-sewed and reinforced in publishers' covers, or so bound, in Niger Leather, as will insure them the utmost service at the lowest cost.

As an example of what we are prepared to do, we quote:

THE BROWNIE BOOKS, published at \$1.75 each
Re-sewed and reinforced, with Niger Leather Back, at \$1.80 each

Nothing in the way of binding service, so effective and so cheap, has ever before been offered to you.

WRITE FOR FREE SAMPLE

We will send on request A SAMPLE OF NATIVE TANNED NIGER LEATHER, prepared for bookbinding by Chivers Bookbinding Company, of the thickness and quality we use for fiction and octavo sized books.

Leather of varying, suitable thicknesses are used for larger and thicker books.

We urge it on your attention that this permanent and enduring leather is not higher in price. WE CHARGE 75c FOR BINDING ordinary fiction in this leather.

This will itself outlast anything ever used on books and at the same time it binds the vital back of the book so that it is held and protected during a much longer time.

This NIGER LEATHER will not decay and it will bind the book in stronger and more supple fashion than any other material ever invented.

The Story of Mankind

By HENDRIK WILLEM VAN LOON, A.B.Ph.D.

In an advance announcement in the Library Journal for Oct. 1st, 1921 (Page 805), we characterized Mr. Van Loon's work as

*"The most important book for boys
and girls published in
a decade"*

Our belief in this work has been amply justified. Librarians everywhere were quick to see the educational value of this new kind of writing, and were eager to give full recognition to the author, to whom by almost unanimous vote was awarded the John Newbery Medal.

Today reports from librarians show an increasing demand for this title not alone upon the part of young people but of adults as well, who find it amazingly interesting in its treatment of the ordinary historian's dry-as-dust facts.

"The Story of Mankind" shows strong evidence of becoming a classic because it appeals equally to children and to grown-ups. All great masterpieces of juvenile literature have this quality.

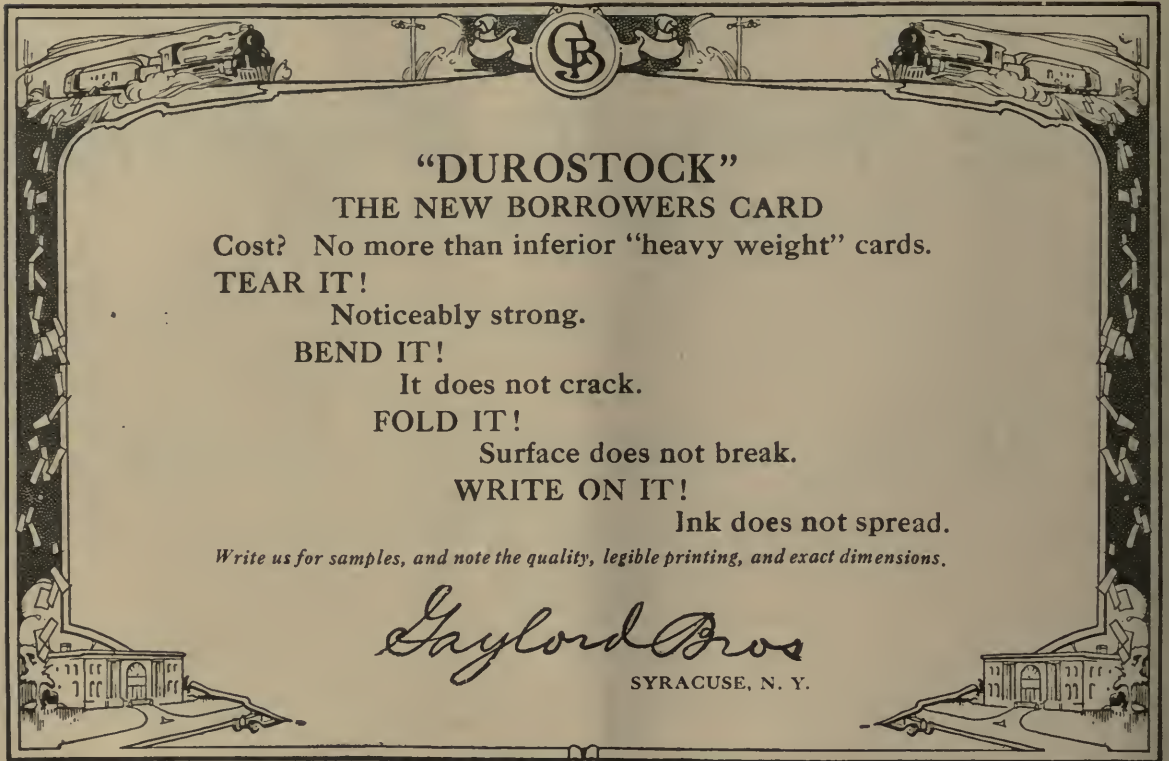

The public interest in Mr. Van Loon's book is more widespread than ever before. Its sales, remarkable as they have been, are steadily increasing, due to a more general appreciation of its permanent worth. Surely this book is ideal in every respect for large library circulation.

150 Illustrations by the author. 500 pages. \$5.00

The Best List of Children's Books Available

¶ We announce the publication of the fifth revised edition of *The Bookshelf for Boys and Girls*. The 1922-23 issue will be printed and ready for distribution by October 10—one month in advance of Children's Book Week. It will be thoroly re-edited, care being taken especially to list the important new books of last fall and this year. There will be a new attractive cover design by Maurice Day.

¶ Librarians have found this list effective in giving aid to parents and others who were buying books for Children's Week and the Holidays. It is sold in imprint quantities—thus providing libraries with a serviceable advertising medium at a very low cost.

Samples 1921-22 editions are available upon request.

Stack Additions and Alterations Quickly Made

*GF Allsteel Shelving in University
of Pittsburg Library*

The addition of new volumes singly and in sets makes re-arrangement of library stacks a constantly recurring problem. The flexibility of design of ALLSTEEL Library Shelving enables the librarian to alter the arrangement of books at will and provide additional capacity when needed.

GF Allsteel

LIBRARY SHELVING

ALLSTEEL Shelving is erected from steel parts of standard dimensions. Skilled carpenters or other artisans are not required, and the library janitor can easily do the work with no other tools than a screw driver and wrench.

Many librarians find it convenient to keep a supply of ALLSTEEL Shelving parts in the store room for emergencies. The parts can be stored in minimum space and erected as needed.

Write for illustrated literature.

L

Why these guides speed reference to your dictionary card-catalog

Experienced librarians tell us that the best results from a dictionary card catalog are obtained when it is guided approximately every 25 cards.

For the expanding library we furnish printed guides in 500, 1000, 3000 and 5000 division sets.

The guide headings in these sets are based on the A. L. A. catalog and have been checked with important public and college library catalogs.

These sets save librarians time and labor in making guides; they insure correct headings and arrangement.

All guides are made of extra heavy-weight L.B. Guide stock which has proven its stamina. For added protection the printed tabs are reinforced with celluloid.

These guides are fully described in our Catalog No. 812 "Library Supplies." Send to our nearest branch.

Next Steps in Library Cooperation

By AZARIAH SMITH ROOT

President of the American Library Association and Librarian of Oberlin College.

THE great war is over and now the statesmen of the world are puzzling over the question "Who shall pay for it?" For many of the European nations with currency depreciated and manhood shattered this is proving an almost insolvable problem. For the United States, however, with a stable currency and with its manhood relatively unimpaired, the problem presents a different angle. While the United States has emerged from the war with enormous credits and with a large part of the world's stock of gold, she has obtained the money to carry on the war and to aid her allies by a large issue of tax-exempt securities. She finds, therefore, that the property subject to taxation has only moderately increased while the expenses which are to be paid from the funds obtained by taxation have been nearly doubled because of the increase in commodity costs and the necessary increases in salaries. Moreover, there will be strong opposition to any further increase of taxation since from the tax paying portion of the community there is a vigorous demand that taxation be reduced. To do this, however, is well nigh impossible without restoring salaries to a pre-war basis and this seems impossible unless commodity costs can be placed upon a pre-war basis. The public officials responsible for the spending of money raised by taxation, confronting on the one hand demands for increases in taxes and on the other hand the impossibility of reduced taxation, turn now here, now there, in a vain attempt to solve their insolvable problem. In this emergency there comes to the front the so-called "practical" men who have an easy solution of the problem "Cut out the frills," and this interpreted means in education: go back to the days when reading, writing and arithmetic only were taught; in charities go back to the day when simple doles

were given out and no attempt was made to reach and remove the causes of poverty.

In library work it results in a cry to curtail work with children, to omit the story hour, to eliminate all newer methods which attract and interest the readers; in short, to go back to the days when handing out a book was considered all there was to do in library work. Now it is not necessary to attempt to refute these so-called practical men on this occasion. My purpose this evening is rather to discuss what the library profession can do to make sure that the legitimate demand which must be made upon the public for library maintenance has been reduced to the lowest amount consistent with the place of the library in the general scheme of taxation. Other groups—the schools, the public institutions, the public sanitary forces, the charitable departments, the park and play-grounds—all these are also demanding an increased tax rate. Is there anything that we as librarians can do to lighten the burden of the tax payer without sacrificing those professional methods and standards which the development of recent years has made possible? This is the question which I invite you to consider with me for a few moments, and it is a problem which has always been, in theory, at least, before the A. L. A., for in the beginning the A. L. A. accepted the following for its motto "The best reading, for the largest number, at the least cost." I shall not discuss the question whether it is possible to increase the amount received from taxation. This is to be discussed at length in one of the meetings of the trustee section. Nor shall I discuss the question whether those salaries raised during the war because of the increased cost of living should be restored to their pre-war status. All students of comparative salaries seem agreed that before the war teachers and librarians were not receiving their due share of compensation as compared with other departments of labor. I shall assume, therefore, that no one wishes to see salaries go back to the pre-war basis. Go back the salaries

* Presidential address to the Forty-fourth Annual Conference of the A. L. A. at Detroit, June 26th, 1922.

will, however, unless we can increase the income from public taxation or can curtail our work in some direction, or unless there can be found by a careful study of our methods quicker and less expensive ways of carrying out our library activities. Every librarian holding an administrative position is faced with the tremendous and steadily mounting cost of library administration, and yet so far as I know few have really faced the question of making a careful systematic survey of their methods to see whether the expense of operation can be reduced. We librarians are as a rule extremely individualistic. Each library has devised its own methods and in spite of the constant discussion of library methods many librarians are still continuing to do as they always have done. The original method may not have been the best one possible. It may not have accomplished the results at the least possible expenditure, but there it is, and there it has been for years, and it is thought to be easier to let it continue than to attempt an improvement whereby the expense of operation can be reduced. Moreover, as a library grows bigger the difficulty in changing its methods constantly increases. Therefore, in spite of all that has been done by means of conventions, library periodicals and the discussions of the A. L. A. there is still the greatest diversity in the methods employed in our libraries. And in many of our libraries there still exists great ignorance and even great indifference as to the methods used in other libraries. The library schools which thru their courses in library economy endeavor to perform the function of describing the various methods used and pointing out their good and weak points are still far too theoretical in their treatment of library methods. From time to time some new method is exploited by its originator, presented in state or national meetings, adopted here and there spasmodically by individual libraries, while the great majority go on and on in the same path which they have been pursuing for years. Therefore, as the first preliminary to a systematic reorganization of library methods we need the proposed library survey originally suggested at the second Asbury Park meeting by President Bishop and since slowly being developed by the Committee on Library Service. I say this as a *first* requisite because before changing our methods we shall need to know what is actually being done elsewhere. At the present time, whenever any proposal of change comes up no one has any basis for knowing just what is being done. A questionnaire hurriedly prepared is sent out to a great number of libraries, which hurriedly answer it, giving part but often not all of the facts in the situation, and from these answers a hurried conclusion is compiled which having

been duly presented sinks into oblivion as have many of its predecessors. We greatly need a work which shall sum up and indicate the methods adopted in actual practice by each library in handling a book from the time of its arrival until it is available for readers. The Library of Congress in the manual accompanying its report for 1901 gave an extremely useful and fairly complete account of its methods. Mr. Dana in his book "American Modern Library Economy as Illustrated by the Newark Free Public Library" has done the same for his library. A number of university librarians have prepared manuals for use by their clientèle which have attempted something in this direction, but after all these are isolated instances and there is great need of a manual which shall enable any one who has to face the problem of improving or altering the methods of his own library to see in tabular form exactly what is being done by other libraries. Such knowledge I believe can be obtained thru the proposed survey. It can be secured however only by the co-operation of every librarian and by the painstaking and honest filling out of what would prove to be a mammoth questionnaire.

When the great "Inter-Church World Movement" was laying out its plan of work it contemplated among other things a very extensive survey of the methods adopted by colleges. An elaborate questionnaire was compiled and sent out to every college and university of the country. I happen to know that the secretary of the institution with which I am connected spent the greater part of three months in gathering together material covering the information which was desired. Owing to the collapse of the "Movement" very little has resulted from all this work, but I know that in my own institution this work is not at all regarded as a waste of time, but is again and again proving of the greatest value. I believe such will prove to be the case with the contemplated library survey when it has been carried thru and the data brought together and published. It may be necessary to have a series of volumes that will cover the ground topically as was done in the case of the Cleveland School Survey, but if so I feel that it will prove to be one of the most valuable additions to library economy which American libraries have ever added to their shelves. With the result of this survey it ought to be perfectly possible for any library to make a comparison of its methods with those adopted by other libraries and thus eliminate waste of effort, unnecessary labor and unwise expenditure. A multitude of library questionnaires would be answered in such a publication and the organized tabulation of results

would make it a relatively simple matter to see what was being done by other libraries.

As an example of what may result from such a survey let me call your attention to the so-called "cataloging test" which was undertaken by the cataloging section some years ago. This brought together data showing that the cost of cataloging a book varied greatly, ranging from fifty cents to two dollars in different institutions. I know of at least one case where the results disclosed by this test have led to a careful examination of every process thru which a book passes resulting in a very considerable reduction in the total cost. The amount remaining, however, still seems greater than it should be and it ought to be one of the happy results of the survey to suggest methods by which the cost may be still further reduced.

This would lead to another step in the direction of economy which it seems to me must sooner or later come about, namely the standardization of the methods employed by the great majority of our libraries. Anyone familiar with the files of the LIBRARY JOURNAL knows how strongly this need was felt by those who first organized the A. L. A. The co-operation committee, as it was called, busied itself for ten years in establishing the practice for accession books, for the use of cards, as to catalog rules, as to blanks for the order department, reference department, and similar subjects. In fact the great majority of the methods we have in common were worked out in the first ten years of the American Library Association by such men as Cutter, Dewey, and Winsor. In recent years we have depended largely upon the library schools and upon discussion at library meetings to keep us informed as to methods, and to bring about a standardization of action. This has proved insufficient. For this standardization we must await the result of the survey but when this is available it seems to me that it would be perfectly feasible so to standardize the methods of the greater majority of libraries that an assistant changing from one library to another should find herself after the first week able to work in the new position as easily as she did in her previous one. When one considers the great number of changes that occur in a single year in the library world, the economy resulting from such standardization is evident. I am aware that there are those among us who talk about the danger of standardization and fear that the libraries will lose individual initiative if these are introduced. And yet these very people are among the first to complain that the library schools do not prepare for the practical operations of library work. Yet if these operations could be standardized the task of the library

schools would be greatly simplified and time and strength would be available for the teaching of more important matters. One of our ablest critics said not long ago that libraries had very little influence in shaping the reading of their communities. If this be true, is it not time that we standardize the mechanical parts of our work and throw all our energies into the task of really making our libraries an effective force in transforming their communities?

Another respect in which there seems to be great possibility of saving is in the line of co-operative publications. During the last year the Secretary of the A. L. A. has been making some very interesting experiments in this direction. The Children's Christmas Book-list, for example, was found to be of such practical value that between fifty and sixty thousand copies were ordered by a very considerable number of libraries. With a well organized force such as is necessary for the issue of the A. L. A. *Booklist* and with hearty co-operation from a great many libraries, there seems to be very great possibilities in preparing such lists to be sold at a minimum cost to the individual libraries. I shall not try to anticipate the discussion of tomorrow in which this whole subject of publications is to be fully presented. But, as closely related to it, may I suggest that one of the most useful services we could render would be to make the A. L. A. office a sort of clearing house for the bibliographical accomplishments of our libraries. In many cases is it not a fact that some rather difficult and puzzling problems as to the duration of a serial or as to the authorship of a work published under an assumed name have been brought to a complete solution by the painstaking efforts of the reference librarian of some one of our larger libraries and then having served its immediate purpose this knowledge is allowed to lie unutilized because unpublished while perhaps some other librarian a few months later may have occasion patiently and painstakingly to work out the very same problem. If all such work done by our larger libraries was submitted in a written form to the A. L. A. headquarters, mimeographed or printed, and distributed to such other libraries as would pay an annual subscription for such information might not a notable co-operation in effort and a great economy in expenditures be the ultimate result? Those of us who have again and again benefited by Mr. Faxon's notes in the *Bulletin of Bibliography* in regard to alterations in the time and place of publication of some serial would appreciate it if many more such notes might be available each year. Then, also, the possibility of providing by co-operative effort working tools which are now lacking seems very great. One

has only to recall that the original Poole's *Index* and the supplementary volumes as well, the A. L. A. *Index of Collective Material*, the A. L. A. *Portrait Index* and other similar publications are all the result of such co-operation, to see what possibilities there are in this form of effort. Dr. Richardson of Princeton at a recent meeting of the American Library Institute has made some extremely interesting suggestions as to further work in this direction which might well be given careful consideration.

A pressing problem which is generally realized, but which nobody has solved, is the problem of utilizing the duplicate material in the possession of our libraries. Nobody has discovered a simple and inexpensive way of transferring such material from the place where it is not needed to the place where it will be of service. In a large library the cost of ascertaining whether the items on a list of duplicates offered are needed is so great as to be almost prohibitive and the majority of libraries find it easier to sell their duplicates to some second hand book dealer who patiently catalogs it and offers the material at fancy prices to other libraries. These purchase it because it is the only way by which at present they can acquire the desired book. Again and again suggestions have been made for some great central clearing house to which all duplicate material should be sent and from which there should be issued lists for selection, but nobody has ever seemed to devise any way of meeting the expenses for this colossal undertaking. Various libraries have been making experiments in this line and some of them seem worthy of mention at this point. One method quite frequently adopted is the preparation of a want-list which is sent out to libraries willing to co-operate. This method is already very fruitful and would be exceedingly so if all libraries would list their duplicates and so know what they could supply. For those libraries which have taken the trouble to list and make available their duplicates, lists like this have proved a way of obtaining important additions at very little expense. The recipient of the list knows what he can furnish and by reference to his catalog of duplicates is able to send a prompt answer, and the aggregate result very often means the completion of a valuable society publication or periodical set. Another method which is now being tried by a number of libraries is the issuing of a monthly list of available duplicates and sending this to those libraries which are to co-operate in like fashion. The use of the mimeograph has made the cost of such lists a trifling sum, and they have resulted in very large and profitable exchange relations. I have sent out some forty or more such lists with

the result that at least nine-tenths of the material offered has been taken by some one of the libraries receiving the lists. From some of these I have not yet received anything in exchange. I have the satisfaction of knowing, however, that the material was of use somewhere and that sometime I shall get a return from the libraries which have selected this material. The cost has been relatively little and the returns in books selected from similar lists have abundantly justified the expense. The real difficulty in the development of this method lies in the unwillingness or inability of many libraries to provide lists of their duplicate material.

Many other examples might be given through which an increase of efficiency may be secured, without an increase in the cost of administration. We have said very little about the possibilities of collective purchasing, or of a combination whereby a competent and efficient "replacement" man might be employed in each large city, to meet the constantly increasing demand from libraries for such service. We have no organization whereby the need of libraries for a reprint of some important out-of-print work can be tabulated and pressure brought upon the publisher to issue a new edition, nor have we any machinery to prevent the issue of faked new editions to be foisted upon the libraries. All these and many others I must pass over and confine my illustrations to one more concrete example—

1. Do we all need to buy everything? With the enormously increased production of books must we not work out some co-operative arrangement whereby the field of purchase shall be more thoroly covered, by a division of purchase among the libraries of a state or of a city.

2. Do we all need to keep all the books we now have? Cannot the older and less frequently called for books be brought together in one or two libraries of a state, which shall act as a reservoir, relieving libraries generally of the expense of keeping material little in demand, and thus reducing maintenance and overhead for many others?

These examples must suffice to make clear the position I am trying to establish. In the face of increasing demands upon the public purse it is time for a careful review of all our methods, time for a systematic survey of all our resources time for co-operative combinations for more effective results. The great need of American libraries today is that each library should think not in terms of itself and its own interests, but in the spirit and with the conception of library unity. Each must be ready to give and each ready to take whatever action will be for the greatest good of all our American libraries.

The Future of the N. A. S. L.*

By DEMARCHUS C. BROWN

Librarian of the Indiana State Library

TO assume the role of a prophet would be very unwise. There are men who write on the "Next War," "The Future Greatness of Our Country, etc. These may be well and fascinatingly written but their value seems to me questionable. I find it very difficult to decide about the facts of the past. In truth, we all dispute about historical incidents in politics, war, education, art. That is one of the joys of studying them. We don't know, hence we can argue with great or little skill. The present is even more mysterious. Nobody agrees with any one else. Why should he? The great missionary to China, Dr. Martin, wrote home when asked about the bottom facts in regard to China—this to some one who wanted the gist of thousands of years of history, religion, art, in one letter—"There is no bottom and there are no facts." And the future of this or any other association—what shall it be? Who can forecast it? Who is to prophesy on this subject? You recall Repington's account of Pershing's officer who was reading "The History of the Future." On inquiry it turned out to be "The History of the Middle Ages." I have no desire to be classed as a prophet. The prophet has too little honor in his own association as well as his own country. What interests me is this: To make our association a growing, helpful, active affair, intelligently managed and conducted, building for the present and the future.

The association is now twenty-four years old. Shall it continue as heretofore, or merge in some form with other organizations? I recall that the attendance at the various meetings was sometimes small, sometimes large. I read my first paper at the Asheville meeting in 1907 before six or eight people; there were, however, more than that at some of the sessions. We have kept up the conferences from year to year with more or less profit. Shall we continue, merge, or disband? It has been set as my task to answer. May I take a view of the field as a starter?

Many of the state libraries are under partisan control. The librarian is changed after each election or at least frequently. He may or may not be an educator or librarian. He knows that the term will be short, that there will be no continuity of tenure or policy—both of which

are necessary to growth and good service. There is not much incentive to the best work either for the head or his assistants. He can't afford to attend meetings or visit other libraries to see how the best results are obtained. He does not care to join an association requiring fees and writing of papers and reports. All this is of vast indifference to him. This Association receives no encouragement from such a state library. The curse of reward for party work is on such an institution and nothing can be expected of it. I wish I could inform you of the number of state libraries so afflicted. It might be that a "drive" could be started to bring about a cure. The sad thing is that there are many of these. How, if at all, can their co-operation be secured? Not at all, until we rid ourselves of that curse of our governmental system, namely, that official position is a reward to some one paid for by the public funds. And you all recognize the immensity of securing that riddance.

Another serious and confusing element is the fact that the term "State Library" does not describe the same institution in the different states. The State Library in Wisconsin is not the same as the State Library in Indiana, in which latter Commonwealth the Indiana Law Library under the control of the Supreme Court is frequently referred to as the State Library even by its most frequent users, the lawyers. In Illinois the State Historical Library is a different institution and under different control from the State Library. But both are in a very true sense state libraries. The same difference exists in Minnesota and in Alabama. New York has perhaps an ideal condition, as all these features are combined in one controlling head. Connecticut may be classified in the same way, and so far as I know, Michigan. California has a sweeping supervision over the whole state. Missouri has a State Historical Society Library and a State Library which, as in Minnesota, is a law and documents library. The Indiana institution is a general library (including documents—state and federal) apart from the law library, with an archives department. But there is also an Historical Society receiving a small amount of public funds for publication purposes only but without any provision for housing books. Its exchanges are kept by the State Library. In Iowa the Historical Library, State Library, and Commission are distinct, as also in Nebraska. In Oregon we have still another condition. In Ohio a state of chaos

* Paper read before the Twenty-fifth Annual Meeting of the National Association of State Libraries, Detroit, June 27th, 1922.

seems to have been cleared up, but there are two or three libraries that may be called State Libraries.

These few are given merely to show that the term "State Library" may mean one thing in New York and another in Illinois or Indiana. If we limit this Association to the narrow sense of the term we must expect a small clientèle; if to the broad use, there should be a large following, but one in a way limited to general reference books, history, newspapers, documents. Curiously enough the term "public library" is frequently and wrongly limited in the public eye to popular books, fiction especially, used by children.

But now what are we to do with our association? Some say "Join the Law Libraries Association," some "Become a section of the A. L. A. and lose our identity." Perhaps this identity is already lost, so small has it been at times. I beg to submit the results of a questionnaire covering five points as follows:

1. Remain a separate organization.
2. Merge state and law under a comprehensive title.
3. Merge state, law and special associations into a strong organization.
4. Become a section of the A. L. A.
5. Form an official organization known as the National Library Federation.

The answers to these questions are about as varied as the libraries themselves. Some are not ready to decide, but desire further discussion. The ballot, however, is about as follows: for no. 1, seven votes; for no. 2, eleven; for no. 3, seven; for no. 4, six; for no. 5, six. As you see, no point has a majority.

Permit me to use Indiana as an illustration of the difficulties in the way. There we have the State Library, the Indiana Law Library, the Public Library Commission, the Indiana Historical Society, the Legislative Bureau and the Historical Commission—all of which are in a greater or less degree either libraries, or doing work more or less connected with libraries. Their duties, too, are state wide, distinctly not local. Are they, therefore, not proper associations to be connected with a National Association of State Libraries? Surely a State Historical Library is a "state library" tho not so named. The funds for all these bodies are state funds, not local. Is it advisable, is it possible, that they shall all be in our national association? You may be able and ready to answer. I am not.

As I see it now, I believe it better to remain as we are provided an effort be made to secure a larger interest and membership of those

closely connected with State Libraries in the narrow sense, and an affiliated membership (so to speak) from these allied bodies named above. Whether this can be done I do not know. I think it ought to be attempted. If membership is not accepted then joint sessions can be held of, for example, the general State Library and the Historical Society Library groups.

To reinvigorate the institution, to secure more members, to bring about their attendance at the meetings for their own sake as well as that of the Association's, to re-inspire everybody (and I believe in this kind of inspiration, verbal or otherwise) will be a hard task. But I have hopes that it can be done. Cannot all the libraries whose activities are state-wide be invited to join? Are they not properly eligible to membership? Further, cannot our secretary do as the present one has done, urge state librarians all over the Union to attend with the authority of their executive powers, governor or others? If they get into the habit of coming, the Association can be kept up. Is this worth while? Personally I believe it is. Contact with others, especially with those who agree with you or present a new phase of your worn out ideas or methods, is the very essence of growth and development, is it not? I believe in trying it.

Becoming a section of the A. L. A. may not solve the problem. I have no objection to that proposition myself. What I want is to attend a conference where all problems connected with the control and improvement of libraries are discussed. I am not a stickler for names, for names may be appropriate and beautiful whether of persons or institutions, but after all, they are appendages and not the heart and purpose and core.

As I see it, the library is an educational institution greater than the school because it touches all from school children to old people. The library is therefore greater than any name. Institutions and associations, like men, are sometimes outgrown, worn out, lose their dynamic power and die, as they should under changing conditions. Death is not a calamity. It may be a blessing. I do not believe this is the case with this Association. It may need recharging, revitalizing. If so let us get all the cylinders working. There is a large field of work for us. Why not cultivate it? Perhaps the old plow horses can do this; if not, let us get some new ones, or some tractors, and carry on.

However, I am like Sir Roger de Coverly when serving as a judge in a debate and rendering his great decision: "Gentlemen, a great deal has been said on both sides."

Problems before the A. A. L. L.*

By GILSON G. GLASIER

Librarian of the Wisconsin State Library and President of the American Association of Law Libraries

I CONGRATULATE you on your place of meeting. It is the first time in twelve years that we have met in this great north middle-west country, one of the most fertile and productive areas in the world and destined, when this great waterway is opened to the sea, to become vastly more important even than it now is, as the home of productive and commercial activities. It will, no doubt, prove an inspiration to you to meet on the shores of this great prospective waterway which has been called the "Dardanelles of the New World" in a city noted for its progress and efficiency.

But, tho the glories and beauties of our immediate surroundings are very interesting and tempting to dwell upon, they are purely incidental to the main purpose of our presence here, and we should not let them detract from the work before us. We have important problems to solve. We have knowledge and inspiration to gain in our chosen line of work. Let these come first in our consideration and I am sure we shall go home feeling that our presence here has been amply worth all the effort it has cost.

I want to congratulate the Association further on the splendid leadership it has had in the past. There is not a single administration that has not enriched the experience, the history and the record of the Association as written in our official journal. Without wishing to detract in the least from the credit due other administrations, I feel that special mention should be made of the careful, conscientious, painstaking thought which Mr. Hicks gave to the work of the Association while he was our president. In his address at Colorado Springs in 1920, he outlined a program of work which may profitably be taken as our guide for some years to come. I hope I may not be accused of being a mere copyist if I call attention to some of the recommendations he made and urge upon you further serious consideration of them and that definite action be taken along some of the lines he suggested. That outline was so thoro that I find it difficult at this time to add anything to it.

One of the important recommendations made by Mr. Hicks was that the committee work

should be stimulated to greater activity. In an organization like this, meeting only once a year, and with a membership thinly scattered over a wide area, it is inevitable that a large part of our work must be done thru committees. It is the most efficient way, the problem being to find chairmen who will push the work. Where any definite piece of work is to be done by the Association, I recommend that the committee method be used.

In the "Program for the Future" which Mr. Hicks outlined two years ago we have the following:

1. Study of law library economy. This subject will be added to at this session by the Round Table which is to be conducted by Mr. Alexander on the subject of the law library as a business enterprise. It is my opinion that it should be developed so as to be of special benefit to the smaller libraries, not overlooking of course the problems of the larger ones.

2. Law library history. This subject will be further developed at this session by the paper to be presented by Miss Lathrop on the History of Michigan Law Libraries. Biography of law librarians is rather closely connected with this subject. At the suggestion and under the direction of Mr. Mettee we are to have one whole session given over to this subject. It is fitting and proper that we should give considerable space to the lives of those who have devoted much time and effort to the work in which we ourselves are engaged, and render to them the respect and honor which is their due. I recommend the appointment of a necrology committee whose duty it shall be to make proper mention of those of our members who have been called by death.

3. Training for law librarianship. This is an important and practical subject and was further developed by Mr. Hicks at the meeting last year. The problem of obtaining trained law librarians is a real one and should not be neglected. I recommend that a committee be appointed with Mr. Hicks as its chairman to study this matter further and to endeavor to make arrangements with some of the library schools to offer courses along this line. It will, no doubt, be preferable to select library schools for this purpose that are conveniently located to large law libraries so that apprenticeships

* Presidential address to the Seventeenth Annual Meeting of the American Association of Law Libraries. Detroit, June 27, 1922.

may be served and practical work assigned in connection with the lecture courses.

4. Legal bibliography. No new work has been undertaken in this direction. The bibliography of bar association proceedings prepared by Mr. Small is nearing completion but the association is unable to print it owing to lack of funds. I understand that Mr. Small has about completed arrangements to have it printed in such a way that the returns from its sale will pay the expense of printing. If this can be done, well and good, but I wish to suggest that Mr. Small should receive the backing of this Association to the extent at least that we insure him against any personal loss in this undertaking.

5. *Index to Legal Periodicals* and its cumulation. This subject is in the hands of an able committee which will report to you. The *Index* has always given rise to our most serious financial problems. The report of the Committee is quite encouraging, while that of our Treasurer, Miss Ryan, is less optimistic. With the two reports before you, you can no doubt get at the exact situation and act accordingly. The situation is not alarming, when we remember that we started the *Index* without capital and can probably turn it over today for enough to pay our indebtedness. We can thus break even and we have in addition accomplished an important piece of work. I strongly favor the Association retaining control of the *Index*. I wish to say in this connection that I deem it highly unjust that those who have worked hard and faithfully for the Association, in editing the *Index* should be obliged to wait indefinitely for their pay. I recommend that immediate steps be taken to pay them in full even tho it may be necessary to borrow the money or advance it out of our individual purses.

6. Development of the *Journal*. This subject is so closely connected with that of increasing our membership that I will speak of the two together. Both subjects are in the hands of competent committees. I cannot hope to add to their reports, but I wish to venture a few suggestions which I hope may prove worthy of your consideration.

The development of the *Journal* and of the *Index* is directly dependent upon securing new members and new subscribers. The Membership Committee has done excellent work along this line, against heavy odds, and the work should be continued. Mr. Stebbins writes that his committee has been greatly hampered by not having an up-to-date list of law libraries and librarians. A complete and accurate list of law libraries is necessary in carrying on the work of the Association and especially that of

attempting to increase our membership. The list published in 1912 was far more complete and satisfactory than anything that had preceded it, but many changes have taken place since then and the list is no longer complete or dependable. It should be revised and reprinted. It seems that this problem is to be solved more easily than we thought by reason of an offer of the publishers of the Standard Legal Directory which will be presented to you by Miss Lathrop. The offer seems to be a generous one and if it meets with your favor I recommend that a committee be appointed to work with the publisher in compiling the list. This subject will also come up in connection with a matter which Mr. Dorsey W. Hyde has asked permission to present to you, to wit: co-operation with the Special Libraries Association in the publication of a revised edition of the Special Libraries Directory.

A casual study of our membership list and of a few statistics discloses that, of the two hundred and thirteen cities in the United States with a population of approximately thirty thousand or over, only seventy-three are represented on our membership list and that there are seventeen states with no representation. Of the large number of law libraries shown by the 1912 list which is admittedly incomplete, our membership represents only about one-seventh of the whole. Most of our membership comes from the larger cities and from the most populous states and from libraries supported by public funds. There are approximately one hundred and forty cities of 30,000 or more not represented. In view of these facts it would seem obvious that any considerable increase in our membership must come from the small law libraries and that special effort should be made to make the *Journal* and its contents respond more directly to their needs so that they will feel it worth while to become members and subscribers. Subscription to the *Index* will in many cases follow membership.

Another phase of this question presents itself: Of the one hundred and forty cities mentioned that are not represented by our membership, how many are provided with adequate or with any law library facilities? Should we not take steps to ascertain the facts in this regard?

The situation in Wisconsin may serve to illustrate. A number of the smaller cities have law libraries and more are in contemplation. At Oshkosh, a city of about 33,000, there is an unusually successful and much-used law library which actually pays four per cent dividends on the stock issued at the time of its organization. Its history is rather unique and sets an admirable example of co-operation among lawyers. The

particulars of its organization and administration are contained in a letter attached hereto, which I gladly place at your disposal, with permission to publish if desired.

In direct contrast with the foregoing is our state metropolis, Milwaukee, a city of over 450,000 people, which has a small, inadequate bar library and two office building libraries, all of which are very inadequate to the needs of a large city. I am told that the bar library is not kept up to date, that the service is poor, and that by reason thereof the membership has dwindled to about twenty. A Milwaukee lawyer, representing a committee of one of the city clubs, has recently applied to me for information as to the steps necessary to be taken to organize a county law library to fill this need in Milwaukee county.

In the general library field the library needs of the small towns or cities are looked after by library extension committees or by state commissions. Why not such a committee in our own Association whose duty it shall be to offer

encouragement and practical advice to existing small libraries and to give information and lend assistance in organizing law libraries where needed. Every new library organized will become a prospective member of our Association. It seems from this very casual survey that there is a fertile field of law library endeavor here which we might seriously consider entering upon as a means of extending our influence for good and incidentally increasing our membership. I submit it for your consideration.

Let me say in closing that in preparing the program for this conference I have had splendid support. It is a pleasure to work with such willing and enthusiastic companions. I am deeply indebted to Miss Foote, Miss Lathrop, Miss Woodard, Mr. Mettee, Mr. Feazel, Mr. Stebbins, and many others, for their advice and assistance, and particularly to those who have so willingly consented to take part in the program. I have confidence that you will find it interesting and instructive and I deeply regret that I cannot be present to enjoy it all with you.

The Economic Value of Library Service*

BY DORSEY W. HYDE, JR.

United States Chamber of Commerce

THE searchlight of public attention falls in different periods upon different professions, and brings them into prominence to stamp them with the seal of popular approval or disapproval. Doctors and lawyers we have always with us, but the members of these professions can point back to the days of misunderstanding, of persecution even. Today we see new professions thrusting to the fore: the engineer is claiming a well-earned recognition, and the educator is receiving new evidence of the public's appreciation of his services.

Among others, remains the librarian. Most members of the profession will tell you that the librarian today holds a position of dignity and esteem in the community. The careful observer cannot doubt the truth of this assertion. In the increasing number of American cities that are supporting a library and librarian, there is an instinctive feeling that the librarian is more representative of the constructive side of community life than, at least, the average business man. However, even admitting this as a fact, it remains equally true that the thoughts of the average citizen turn but infrequently in the librarian's direction. Asked his opinion of library work as a profession one youth replied: "I never thought of it."

* Presidential address at the Thirteenth Annual Convention of the S. L. A. at Detroit, June 27th, 1922.

LIBRARY SERVICE TO INDUSTRY

Times change, professions develop. One librarian in bewailing his ineffectiveness, fails to observe other members of the profession stepping into new positions opened up as a result of his own promotive efforts. It is perhaps not generally realized that the annual pay-roll for library service has been increased within the past decade by about a million and a half dollars by the extension of library facilities to the industrial establishments of this country.

There may be some who will doubt the accuracy of this estimate. There is plenty of data, however, to make us believe that the aggregate of the salaries paid to librarians employed by commercial and industrial firms is nearer to three million dollars. In 1909 a scant handful of special libraries existed. In 1921, as the result of an incomplete survey, the "Special Libraries Directory" showed more than six hundred special libraries in America. The total has since been materially increased by the creation of new special libraries by business concerns.

REASONS FOR SPECIAL LIBRARY SERVICE

What are the reasons for this new and rapid development of library service? The answer to this question is not difficult. During the major part of the relatively short period of this

country's economic development there was but little opportunity for the systematic collection of fact information. The competitive exploitation of a new country called for swift action and precluded the study and interpretation of basic facts and statistics.

This period is now over. The problems of American business today are primarily problems of conservation and efficient distribution. We have been warned that our natural resources in coal, lumber, oil, etc., are not inexhaustible. We must adopt, we are rightly told, the methods of conservation in the production of raw materials; we must reduce to a minimum waste in handling, and we must plan our goods distribution in terms of the actual needs of ultimate consumers.

FACTS IN BUSINESS

The larger American business firms realize today that a new way of doing business has been evolved. This new method is demonstrating the truth of age-old maxims. After a number of years' experience with a Welfare Department which worked to improve the personal health of its policy-holders, a great insurance corporation reports an increased length of life among these same policy-holders which more than compensates for the expense of this "unselfish" undertaking. Truly has it been said that the seas of abnegation give back a just reward!

The impulse of curiosity will lead the ultimate consumer up to the marts and counters of trade, but even the swan-song of super-salesmanship cannot make him continue to buy goods not equated to his needs. The firm that sent their rooster trade-marked product to the land where roosters were taboo, paid heavily for their education in religious idiosyncrasy. The halcyon days of hit or miss are giving place to days of sober effort, of planned and calculated action. There is hope of realizing the square deal in business, with a new conception of service and a new regard for effectiveness in the satisfaction of human wants.

STATISTICAL, RESEARCH AND LIBRARY SERVICE

In business today the statistician, the research worker, and the special librarian are studying the sources of labor and raw materials; the character and location of the demand for manufactured products, and the manifold factors of credit and finance. Data in these fields are being salvaged from sources of every kind: from books and magazines, from correspondence and clippings, and from conversation with those possessing special knowledge. When collected, these data are studied and classified, and then organized into a system of intelligence which will permit of enlightened direction of each new step or undertaking of the business concerned.

The importance of service of this character is

being increasingly realized. Leadership is afforded by Herbert Hoover and the United States Department of Commerce, with the close sympathy, co-operation, and support of the Chamber of Commerce of the United States, the National Research Council, and the great multitude of professional and trade associations. The task of collecting fact and statistical information and applying it in the solution of business problems is becoming organized and centralized. As a result of this process a new conception of business integrity is rapidly becoming apparent.

THE RESEARCH FUNCTION

As already pointed out, this new activity involves statistical, research, and library work. These three terms today do not possess definite connotations. The librarian may do research work and the research worker may in fact be completely occupied with statistical investigation. Careful analysis of these functions would seem to indicate that, to a large extent, each involves the others. The research man fails to give accurate, continuing service if his data are not properly organized, and the recording of statistical information calls for the highest type of library science. Without these aids productive efficiency in statistical and research work is rapidly reduced. It should be pointed out, finally, that librarians have perfected their reference work to such an extent that it frequently becomes identical with the work of the research man.

It is important that the special librarian in business maintain his footing in a research capacity. It is equally important, in so doing, that he continue to insist upon the introduction of library methods and library science in the conduct of such research work. The ideals of constructive librarianship emphasize the larger benefits to be obtained from research work, as opposed to the immediate, but not always lasting, benefits to the individual concern. In considering immediate benefits, the business librarian, if true to his professional instinct, will have due regard for possible future and more lasting benefits for his firm and for the community at large.

THE SPECIAL LIBRARIAN AND HIS PROFESSION

The special librarian is in a position to render important service to the library profession. The highest functioning of each unit organ in any professional body is essential to the maximum all-round development of such body. The special librarian who makes the best use of his opportunities multiplies the points of contact between the librarian and citizens and business men; he makes these relationships more intimate and continuous, and he increases the opportunities to equate library service in terms of the every day needs of science, industry, and government.

The Librarian's Duty to His Profession*

By CARL B. RODEN

Librarian of The Chicago Public Library

WE speak of our calling as a profession, and even as we speak we mentally align ourselves with those ancient and honorable professions that minister to the great and fundamental needs of mankind, the needs of the soul, the body, and, most prized of man's possession, his rights and liberties.

Religion, Medicine, Law—these three—and when we add a fourth, Education, ministering to the needs of the mind, we do not thereby alter nor diminish the dignity and excellence of that glorious company to the circle of whose fellowship we claim admittance.

Yet we have no body of doctrine running back to a time "whereof the memory of man runneth not to the contrary." We have no treasury of accumulated lore derived from the ancient folkways. We have no divine revelation upon which to base our claims to a ministry.

We have only a faith, not yet shared by all our generation, which I have heard questioned even by one of our most distinguished colleagues, that we are doing useful work, and on the basis of that belief we profess and call ourselves a profession.

Now, I hold that there is a material distinction between that form of ministry which constitutes the essence of the professions—which, in the words we have just heard, "have their contacts with souls, not with things"—and that other form of usefulness, which may be almost, but not quite, equally exalted, called Service.

If we were only content to waive our claims to professional honors, and to be known as good and faithful servants, we should be safe in pointing to the services we are already rendering, and to their steadily widening scope, seeking to comprehend every human relationship and activity, from the cradle to the grave, in business, in pleasure, in learning and in leisure.

But if we still persist in our aspiration to be classed among the professions I begin to fear that the very variety and multiplicity of our services is raising up a cloud, already larger than a man's hand, which is threatening to come between us and those ideals of ministry that we must keep ever before us, clear and undimmed, as our professional objective. It is not the objective that is in danger, nor yet those

ideals, for they are of the eternal varieties. It is only our poor human faculty of envisioning them that is being threatened by this cloud.

This cloud is the swarm of specialists and specialties into which we are breaking ourselves up, disintegrating our former solidarity and tending to dissipate our unity of effort, of objective, tending, as it were, to render ourselves less and less capable of seeing the woods because of the multitude of trees we are cultivating.

We now have many kinds of librarians: for schools, for colleges, for universities, for doctors, for lawyers, for bankers and business men. All true and zealous servants, each intent upon developing his own specialty and jointly and severally making splendid contributions to the efficiency with which the work of the world is done.

But I submit that helping to do the work of the world is but one, and that the least vital, dynamic, element of the professional function. I do not in the least mean to minimize the character or the value of the service we are rendering in thus mobilizing the printed word in aid of research, in industry, in all that helping to do the work of the world involves and implies. Speed the day when every art and every craft, every artisan and every craftsman shall have progressed so far, under the tutelage of his respective librarian, as to admit and accept the lessons of experience as they are demonstrated and recorded in books. Thus, indeed, will the kinship of nations, of the ages and of men be promoted and cemented.

But let us not forget that there was a time when lawyers scorned to accept a fee and defended the right for the sake of the right, when the offices of priest, physician and teacher were united in one person, and each and all were offered up in ministry as equally to the glory of God!

If we translate "the glory of God" into terms of modern currency and speak of the service of humanity, and if, moreover, we take into account the complexities of modern life which have forced the professions to stoop a little from those pinnacles of altruism where once they dwelt in ethereal isolation, we shall still find, I think, that they have not altogether abandoned their former positions; that they are still true to the professional vows by which they were dedicated to the service of humanity, which is a

* Paper read before the A. L. A. at Detroit, July 1, 1922.

Ministry, even while they are engaged in the service of men, which is Service. That margin surrounding the day's work, which must be kept clean and fair in order that the imperishable contributions of each age and generation to the next may be inscribed upon it, is what, it seems to me, characterizes and dignifies the professions. It is this idea of a margin of which I have been trying to lay hold.

Now, tho we have no revelation once delivered to the saints, and no majestic foundation of principles upon which to rear our practice; tho we have not yet had time even to agree upon a canon of ethics, and the fiftieth birthday of our corporate consciousness is still four years away, yet we have had entrusted to our ministerial offices two of the most respectable and, on the whole, most important manifestations of Divine Grace known in the world since the dawn of history: Books and the Human Race. With two subjects of such magnitude to work upon, there is surely ample room for professional ministrations, if we find that we still have left any considerable margin over and above the day's work in the service of men, that we may devote to the service of humanity. I think we have such a margin, altho it is not a very generous one, nor as generous as it once was, and shows here and there a finger print of the market-place.

To serve humanity means to help it upward from plateau to plateau in that steady but painful climb towards some sort of consummation, to which it has been predestined by the power or force or impulse that moves on the fact of the waters, call it Evolution, Destiny, or God, or what you will. That is the sort of service that is professional and for which the professional margin must be kept pure and wide.

I think no one will be found to dispute the assertion that libraries have a contribution to make to this momentum that is driving the race forward. Indeed I am not at all sure that the free public library movement is not the very particular contribution that this age has been preordained to make. Preordained? Mr. Henry said, on Wednesday morning, that one must be preordained or one can never be truly ordained to any kind of ministry whatever. The question seems to be whether we are going to be able to keep the fact of our preordination and our ordination steadily before our own eyes, and whether we are not standing in peril of selling our birthright for a mess of highly satisfying and very savory pottage.

It is service to men—highly satisfying service—to teach the celebrated man in the street to earn more dollars, raise more hens, to win more and more of earthly prizes by using

library books. It is service to humanity, our professional margin, to bring Books and the Human Race together to the end that Books may lend the impetus of their inspiration toward hastening that "one far-off Divine Event, toward which the whole creation moves."

The Trustees' meeting held in this room last Tuesday afternoon afforded startling evidence of the reaction that follows upon even a partial realization of the mission of librarianship in its contact with souls. Of course, the trustees that were here were of the sort that had caught a glimmer of the vision.

Their unanimous, spontaneous, almost naive testimony to their realization of the implications and proportions of the task and opportunities confronting their own particular institutions, welling up from the hearts of these men, all unperceived by the assemblage intent upon questions of revenue and administration, rested like a benison upon its deliberations and made this, in spiritual values as contrasted with mere shop talk, one of the most significant meetings of this crowded week. Business men, lawyers, ministers, as they were, were thrilled and filled, not by the promise of service to themselves, not to the affairs of the world, but each in turn affirming in tones of wonderment and conviction his belief in the validity of the splendid commission entrusted to the American public library, one and indivisible, as an agency of culture, as an instrument of education not second to the public schools, as an element in the irresistible and preordained current of progress that is lifting the Human Race from plane to plane, upward to its destiny.

"Make the library known to all the world, as we have come to know it" was their cry, and to one hearer, at least, it seemed like the first and great commandment to us in our search for our professional duty. And the second is like unto it: That we know the library ourselves, as they have come to know it. "On these two commandments hang all the laws and the prophets." To contrive to keep steady and undimmed before us the high ideals of a service to humanity to which a fair and generous margin of our time and talents is to be dedicated.

Books and the Human Race; Librarianship to Humanity. That is a task of professional proportions, for the promotion of which we must contrive to save, to rescue, perhaps, a margin of professional ministry. And when we have all been brought to accept this commission, and have succeeded in gaining recognition from the world of men that our fulfilment of it is a vital contribution its continued upward flight then we shall have accomplished our full duty to our profession, for then we shall have a profession.

Copyright and the Publishers—A Review of Thirty Years*

By M. LLEWELLYN RANEY

Librarian of Johns Hopkins University and Chairman of the A. L. A. Committee on Book Buying

WE are here to consider a copyright measure introduced (by request) in Congress April 28 by Mr. Tincher, of Kansas (H. R. 11476). Its titular author is not committed to it and has yet to make the necessary studies for the determination of his own attitude.

The bill's putative origin is the so-called Authors' League of America. "So-called" I say, for such copyright organizations in America have always been but parade bunting hung on publishing fronts, to be discarded after parading was over. The reason for such carnivals when the legislator comes to town is a little lone paragraph in the Constitution of the United States which says not a word about the manufacturers and sellers of books, but speaks only of authors and their public. Thus runs a part of

"Article 1, Sec. 8. The Congress shall have power: To promote the progress of science and useful arts, by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries."

The old time publisher has a poor opinion of that sub-section and a worse one still of its English mother, the Statute of Anne. He would amend it if he could, but there is not the slightest chance. Copyright legislation remains the concern of authors and their public. As a class, however, authors are a timorous folk and slow to unite, while the public, in Mr. Roosevelt's lament, will not take its own part. Rarely, therefore, has either of these principals functioned constructively in drafting the measures definitive of their relations. In the one great historic instance of their conjunction, above noted, the publishers lost perpetual monopoly, and author's copyright was won. That eclipse of 1710 will never be forgot. But while the sceptre had passed from Stationers' Hall, the rôle of Warwick remained ever a possibility. And so, what with the diffidence of authors and the confusion of the people, publishers, busy and indeed indispensable scribes that they are, together, in the United States, with the printers, have played conspicuous parts suggesting claims and formulating terms.

The present bill is no exception. The Typographers announce their willingness to forego an (unproductive) privilege—for increased tariff protection. Two publishers draw up the

stipulations, and the document is taken to Washington by the Secretary of the Authors' League. The measure has great capabilities for good, but the zealous scribes could not forego the temptation of slipping in a clause to the fattening of their own pockets at tremendous cost to the public and no advantage to authorship—"not emphasized by authors," as they once expressed it. Will the people's representative sign? If the past is any criterion, they will not, for the publishers have essayed such a rider four other times in the past thirty years, and suffered four defeats—two on the floor of Congress, two in committee.

What is the proposition, so sponsored?

The bill itself has the worthy purpose of qualifying the United States for membership in the International Copyright Union, from which, save Russia, we are the only conspicuous absentee among powers of the first rank. We do hold place in the Pan American Convention, founded on the same general principles, but our literary relations are much more intimate with Europe, especially Great Britain because of common language, than with South and Central America. We should without question enter the larger fellowship also, as Brazil has set out to do.

The fundamental principle of this association (called Berne Union from its place of birth in 1886) is that copyright once secured in any Union country has validity, without further formality or cost, thruout all the countries of the Union.

From this family of nations we have been barred for thirty years because of a provision in our law, known as the "manufacturing clause," which denies copyright to the foreigner unless his book is made here. This was the price paid the printers in the Act of 1891 for any protection at all to foreigners other than residents here. Previous to that, literary piracy was legalized and constituted the national sin, for the remission of which a host of men and women of high repute in and out of Congress struggled for a half century before attaining any degree of success.

It is but fair to say, however, that in this particular the United States were but following European precedent. Our first federal act, which established the nation's policy for a century, was passed in 1790. This was three years before France set the precedent of grant-

* Read before the A. L. A. at Detroit, June 27, 1922.

ing, irrespective of residence or nationality, copyright to anyone publishing a book on her soil, tho in 1852 she took a longer lead by decreeing against republication (but not against performance) of works first published abroad, without regard to reciprocity. As for Great Britain, her law was not superior to ours when the famous petition of fifty-six British authors was presented to the Senate by Henry Clay in 1837. It took a court construction of 1868 to establish the applicability to non-residents of the Act of 1842, which allowed a book first published in the United Kingdom (England, Scotland, Wales, and Ireland) to bear copyright throuth the British dominions, while it was not till 1886 that such protection was given a book first published elsewhere in those dominions. And even since 1887, when the Berne Convention went into effect, it must be remembered that an American author, to attain copyright in the Union countries, must publish there first or simultaneously, just as much as a British author must since 1891 do in the United States to get legal protection here. Publication twice in each case is necessary.

Finally, in the interest of fairness and sound action, let it be clearly recognized that American publishers cannot nowadays be charged with the habit of pirating foreign authors' works as was true before the Act of 1891. There is no National Sin crying out now for expiation. A very striking proof of this lies in the fact that, tho English authors can since 1891 get under our law by publication here, less than one per cent, according to a published statement of the Register of Copyrights, have felt the necessity of doing so.

So that, while the nuisance of double publication should be abated, public law substituted for private agreements, and the temptation to Canadian retaliation removed, yet the international situation is not such as to justify the purchase of such advantages at any price. There is abundant time for deliberation, and the opportunity for action alike uncompromising and distinguished. In such unhurried and critical temper, we may now pass from the bill itself to an examination of Sindbad.

THE PUBLISHERS' RIDER

The proposal is that with the repeal of the manufacturing clause shall go another, viz. revocation of everybody's right to acquire a foreign book from any source except the publisher of its American edition. No matter how shoddily the reprinter might do his work (and there would be no object in a reprint (except a cheaper one), he would thereby gain monopoly of all originals shipped here, and

could charge at his pleasure. But this is to state the case in its most innocuous form. Printing here would not, under the new conditions created by this Act be requisite to the establishment of an American edition. The foreign original might be made to serve the purpose. Three words—Copyright, John Smith, 1922—behind the title page of two such copies, when registered and deposited in Washington, would constitute an American edition. The Register of Copyrights would not ask whether there were any more like these. All dealings must be with the new owner, under the dire penalties of infringement. The inscription of the magic words would be a matter of arrangement between the jobber here and the publisher there, or between the east and the west sides of the same house.

The first beneficiary of this scheme would be the international publisher. Thru our membership in the Berne Union, all his European issues would automatically have the protection of our laws against piracy, while only compliance with the simple formalities above mentioned, with payment of a dollar per title, would be necessary to qualification as publisher of an American edition. We could not then order such London books from London agents, but must deal instead with the New York house and pay its prices or do without. What those prices would be is not a matter of conjecture. For example, one half the titles handled here by The Macmillan Company are importations; that is, books not printed or reprinted in the United States. The average rate at which they are priced on this side is 38.3 cents a shilling, (which has an actual value at present of 22.5 cents). Now, as always heretofore, a buyer, whether individual or institution, can escape such charges by importing from England. The rider to subsection (a) of Section 6 would block that escape, and exact the higher toll.

The second beneficiary would be the importer of books from countries with broken down currency, especially Germany, and to a less extent Italy and France. What a harvest awaits the copyright manipulator in this field. The German mark has fallen to about one-sixtieth of its antebellum value, but the domestic price of books has increased but five fold. Under the rules of the trade, enforced by the Government, this price is trebled in sales to most foreign countries, including the United States. Even so, that has made German books cost us about one-fourth as much as in 1914. For the profiteer, who is already finding a way to operate, here is a golden opportunity, thru employment of the American edition fiction, to double or treble the price of sure sellers—which will mean the first rate manuals of science and

philology exploited at the expense of American investigators and students.

From the operations of this pair, the bill provides six exemptions—the Government, the blind, the traveler, imported libraries, whether bought *en bloc* or brought in by the immigrant, foreign newspapers or magazines, and the imported originals of English translations copyrighted here. In this line of eight beneficiaries, one misses two faces—the author, who gets not an added penny, and the general public for whom his work is done. These two would like to meet. The constitution would have them do so freely. This bill says they may, provided the buyer is a Government official, or bereft of eyesight, or content with a periodical, or has the money to take a trip to Europe or buy a whole library at once. But the searcher after truth in study and laboratory, the cultivated reader at home, the impecunious student who has not the price of an ocean voyage—they will pay heavily for the meeting, if the rider reaches his goal. The profiteer in foodstuffs for the body is held in execration. What more can be said of him who would corner the supplies of the brain?

And so, if the rider pulls rein at the White House, it will come to pass that librarians and bookbuyers of every degree will go very charily about their foreign acquisitions, for the penalty of a misstep is ugly. Never knowing what the registry of copyrights in Washington might show, they will in every instance first inquire whether some monopolist has beat them there. Is it thus we shall "promote the progress of science and useful arts?"

HISTORY OF THE PROJECT

This offering of the publishers is not a new one, tho the law of other countries knows it not. By it they attempt to retrieve one of their two historic defeats of the past thirty years—the first, suffered in the Act of 1891 when victory by ambush seemed certain till a month before the Session's end Senators Sherman and Carlisle discovered the stratagem and plucked the invaders; the second, suffered in three successive adverse verdicts in the Supreme Court of the United States in 1908 and 1913. As both these contests were waged in adherence to false theories of copyright, it is well to review them.

Copyright is the exclusive privilege of multiplying and first disposing of literary and artistic works. It is not a natural right, but one fixed by statute, as all rights in human society are. A natural right would be an absolute right, but absolutism is dead; one has not an absolute right to life itself. A criminal may be sentenced to death and a patriot yield his life at his country's command in its defence.

This grant is of distinctly modern origin and its entire development can be traced. The idea was unknown before the invention of printing, tho there was a lively manuscript trade during the Middle Ages and copyists abundant—no less than 10,000 in Paris and Orleans alone, it is said. By the end of the fifteenth century it was coming to be seen that if authorship, with its attendant advantages to the public, was to flourish otherwise than at the precarious pleasure of wealthy patrons, the author should for a limited term have the monopoly of production and sale. It was a national affair, however, the foreigner was not recognized, and the native author was protected against importation of the foreign reprint. Such was the typical situation in the United States when in 1891 Congress concluded at last to grant the foreigner copyright if he had his book made here. The publishers lay low, thinking to draw the old non-importation clause to prevent the customary sale of the original which they would then undertake to reprint under American copyright. While there is good reason to suppose that the attempt in court to prevent importation for use as against sale would have failed, yet the threat of such litigation might have proved a deterrent to libraries especially. So after mature deliberation, involving a distinguished Senatorial debate, Congress passed the Act with a specific proviso insuring to institutions and individuals the continued right of importation for use, tho restricted to two copies.

This decision greatly upset the publishers and they have made repeated efforts at its repeal, the present being the fourth in thirteen years. It is not generally known that they tried it twice during the war—January 8, 1915 (H. R. 20695), and January 27, 1916 (H. R. 10231)—when public attention was focused elsewhere, but these bills did not emerge from committee, since the American Bar Association's Committee on Patent, Trade Mark and Copyright, under the Chairmanship of R. H. Parkinson, of Chicago, was awake and made efficient protest.

Their most ambitious drive, however, came in connection with the Act of 1909. This campaign really ran over nearly a decade. Learned counsel was employed, and elaborate preparations carried thru. On May 1, 1901, the American Publishers' Association and the American Booksellers' Association, recently formed for the purpose, put into effect a joint pact placing most classes of books on a net basis, except for a discount of ten per cent to libraries.

Article III of the Publishers' program ran as follows:

"That the members of the Association agree

that such net copyrighted books and all other of their books shall be sold by them to those booksellers only who will maintain the retail price of such net copyrighted books for one year, and to those booksellers and jobbers only who will sell their books further to no one known to them to cut such net prices or whose name has been given to them by the Association as one who cuts such prices," etc.

The booksellers, on their part, voted "not to buy, not to keep in stock, nor to offer for sale, after due notification, the books of any publisher who declines to support the net price system"; to expel any member reported by any three of his fellows as having had commerce with a denounced publisher; to refuse such expelled member or a denounced dealer all discount.

Here was an agreement to destroy the business of any one who refused an oath to support whatever retail price a publisher might set and join in punishing those who did not. Here was plain combination in restraint of trade. One does not necessarily condemn maintenance of price in order to condemn the coercive methods here employed. The defence lay in the nature of copyright as a monopoly, which was alleged to place the proprietor beyond the reach of anti-trust laws, and as sole vendor to control resale.

Two results followed swiftly. First, libraries found their prices advanced about twenty per cent. The American Library Association, joined by the National Education Association, protested. Second, R. H. Macy and Company, black-listed and blockaded for retailing at \$1.24 a net copyrighted \$1.40 novel, purchased by them at forty per cent discount, brought suit Dec. 3, 1902 against both Associations and others. On February 23, 1904, the New York Court of Appeals declared the combination illegal so far as it sought to control uncopyrighted books. In March the agreement was changed to cover copyrighted books only, and two publishers instituted suits against Macy's shortly afterward. The Bobbs-Merrill Company printed under the copyright notice of "The Castaway," the following in each copy: "The price of this book at retail is one dollar net. No dealer is licensed to sell it at a less price, and a sale at a less price will be treated as an infringement of the copyright." Macy's price was \$.89.

Scribner's sought to attain the same end by printing in their catalogs and bills the following notice: "Copyrighted net books published after May 1, 1901, and copyrighted fiction published after Feb. 1, 1902, are sold on condition that prices be maintained as provided by the

regulations of the American Publishers' Association." In both these instances, the attempt was being made by reason of copyright monopoly to impose by notice a retail price on a dealer with whom there was no privity of contract.

The United States Circuit Court, Southern District of New York, found for Macy's July 11, 1905, and these verdicts were affirmed June 16, 1906 in the United States Circuit Court of Appeals for the Second Circuit.

This sequence of events is of the greatest significance to the case which we have in hand today, for it was in June and November, 1905, and March, 1906, that the three conferences to lay the basis for a bill "to amend and consolidate the acts respecting copyright," as requested by the Chairman of the Senate Committee on Patents, were held. The publishers swarmed over the place, for here was the chance of a lifetime to win in Congress a battle they were losing in the courts. Despite the substantial labors of the Copyright Office, an amazing strand of privileges, filched from author and public for the aggrandizement of the publisher, was woven into the fabric of the draft. Here they inserted absolute prohibition of importation unless with the reprinter's consent. Continued control after sale was covered by this astounding clause:

That the copyright secured by this Act shall include the sole and exclusive right: (b) to sell, distribute, exhibit, or let for hire, or offer or keep for sale, distribution, exhibition, or hire, any copy of such work.

A purchaser could not even show a book he had bought, let alone sell it at will, unless the publishers gave written consent, and a violation would incur the fine or imprisonment fixed for infringement.

And there was much else of the same ilk.

So deftly, however, was the work done by counsel and so assured the client's manner that the Congressional Committees were at first taken in and spoke for a brief space the approved patois of the publisher. The trend of events thereafter cannot more certainly be gauged than by reading side by side the two reports of Chairman Currier dated respectively January 30, 1907 and February 22, 1909. The primary rights of the public were the keynote of the latter. His eyes and those of the Senate Committee, which also adopted it, had been opened by the pleas of the American Library Association and the Library Copyright League, organized for the purpose by W. P. Cutter, but especially thru the appearance of a brilliant protagonist of the cultivated reader, at the Hearings of March, 1908, in the person of William Allen

Jenner, a New York lawyer, speaking in his own name. Mr. Jenner had already got the ear of Congress by the private publication in 1907 of a masterly analysis of the bill entitled "The Publisher against the People, a Plea for the Defense," to be followed after the Hearings by "The Octopus," similarly issued. Under his penetrating probe, the proceedings broke up and turned into a general rat-hunt by all aboard. At the end the importation right was back where it ought to be, the disposal section resumed its traditional tenor in the grant, "To print, reprint, publish, copy and vend the copyrighted work," and many other nests were cleared out.

One last stand was yet to be made. The Supreme Court on June 1, 1908, had affirmed the lower court decisions in the Bobbs-Merrill and Scribner cases, even tho in January, 1907, the Publishers had changed their "agreement" to a "recommendation," without, however, altering coercive practices. Thus the publisher could not by mere notice limit the price of resale, nor after the first vending exercise any further right. The final drive, made at the critical Hearing of January 20, 1909, was in the effort to insert the following clause:

"That subject to the limitations and conditions of this act copyright secured hereunder shall be entitled to all the rights and remedies which would be accorded to any other species of property at common law."

Here again appeared Mr. Jenner for the public, joined by Mr. Parkinson, who, as already seen, was still keeping his vigil in 1916.

This clause was to revive an old claim of the Stationers' Company of London, which, under the aegis of the Star Chamber, carried so high a hand for a century and a half from its charter in 1556. Since 1710 when the Statute of Anne, the first copyright act, went into effect, all copyright in published works has been statutory. So finally decided the House of Lords in 1774. In this spirit the American Constitution was written and the Act of 1790 so construed by the Supreme Court in 1834 and repeatedly since. The effect of the clause would probably have been to upset the Bobbs-Merrill verdict. It failed, and the bill only when so amended was signed by President Roosevelt on the last day of his second term in 1909.

The end of the American Publishers' Association came in 1914 with the payment of \$140,000 in damages following the third unanimous verdict of the Supreme Court Dec. 1, 1913, in favor of Macy's.

And now after all this history, with the fate of its sire full before its eyes, the young Na-

tional Association of Book Publishers, our nativity greetings hardly dead on the air, dashes up on the old steed, with the prettiest trappings the best copyright saddler in America could give him, determined once more to stay the free flow of the world's thought our way, thus begging American art, science and scholarship to fill a private till.

Memorandum on Copyright

THE following memorandum on the copyright issue has been sent to the Executive Board of the A. L. A.:

The address of Dr. Raney at the Detroit Conference involves so many erroneous impressions and twistifications that reply on some few points should be made, lest the library profession should seem to be placed in the position of running amuck against all others engaged in the production and distribution of books—authors, publishers and booksellers.

As to the slur that the "so-called" Authors League of America and previous author organizations are "but parade bunting hung on publishing fronts," the original American Copyright League was organized in 1883 solely by authors, Lowell being the first president, and it remained the active and leading advocate of international copyright thru the two campaigns resulting in the measure of 1891 and the code of 1909. The Authors' League of America was organized in 1912 and has a membership of some 1500, including musical and dramatic composers and artists. The original (Authors') Copyright League has gradually yielded to it the primacy in copyright progress which it has actively maintained. The co-operation of publishers was early sought and obtained, and the American Publishers' Copyright League was organized, in 1887, and has been recently merged in the Copyright Bureau of the National Association of Book Publishers with George Haven Putnam as still the leading spirit.

As to the statement that the bill was drawn by "two publishers," the facts are as follows:—The repeal of the manufacturing clause is the *sine qua non* of true international copyright and entrance into the Berne Union. Secretary Shuler of the Authors' League obtained the assent of the Typographical representatives to this repeal, on the understanding that the tariff measure should have precedence before pressure for a copyright bill. The first draft for the pending bill was made by counsel for the Authors' League. The Librarian of Congress declined to participate in the shaping of the desired measure but did not object to the use, unofficially, of Register Solberg's experience in copyright legis-

lation. Accordingly Mr. Solberg redrafted the more formal details of the bill embodying the repeal, and it was left to me to redraft the sections covering other questions involved in entrance to the Union which was done in close and frequent consultation with Mr. Shuler for the Authors' League, of which I also was a member. The publishers thru George Haven Putnam were not consulted until after this redrafting, but thenceforward it was our plan to keep the work in touch with the several classes interested—publishers, music people and librarians—the latter by information thru Dr. Raney with the purpose either of reaching agreement or making clear and concrete points of difference, of which the issue between publishers and librarians was the most difficult. If I am involved in the reproach of being classed with Barabbas I need only say that since, as a journalist, I came into the field of letters and not least since the formation of the A. L. A. for which I take some share of credit, I have endeavored, as have all my editorial and business associates, without exception, honestly to realize the general interest and minimize differences of the several classes—authors, librarians, publishers and booksellers—in the production and distribution of books.

As to Dr. Raney's dictum on property in copyright, authors and authorities hold that copyright is peculiarly a natural right since the expression of thought is a personal creation. Before the invention of printing there was recognition of this right as in the traditional Irish decision of the sixth century on a copied ms.: "To every cow her calf." The statute of 1710 provided remedies which were vague under common law. In 1774 the law lords decided, ten to one, on one point and seven to four on another, that copyright is a right under common law, but held, six to five, against Lord Mansfield and previous judicial decisions, that the language of the statute abrogated the common law right. This decision was followed in the paragraph in our own Constitution.

As to the imputation of publishers' plots and rats' nests, these are as baseless as they are discourteous and only weaken the library cause. There was no secrecy whatever, either at the conferences in New York and Washington presided over by the Librarian of Congress, or at the Congressional hearings, and the importation question was openly and thoroly discussed. The publishers stoutly asserted their right as assigns of the author, to the exclusive market and had precedent and authorities for their contention. The statute of 1710 prohibited importations without consent of the proprietor; Tauchnitz authorized

editions are confiscated in England; the trend of English judicial opinion is in the same direction; Canada requires importation thru the licensee, and the English as well as the American society of authors and Professor Röthlisberger, director of the Berne Union, hold the same view. The pending bill makes two concessions: by authorizing restriction only after registration and deposit, to which are to be added by agreement exceptions of second hand copies and works in foreign languages, and by requiring the American proprietor either to supply or to assent to importation of original editions. As this compromise has been rejected by the A. L. A. Council there should be a clean cut contest on this mooted point, but without acrimony or abusiveness by which Congressmen are not likely to be convinced.

R. R. BOWKER.

Two Foot Shelf For a Country School

THE ballots for the first twenty-five books for a country school cast during the conferences of the A. L. A. at Detroit and the N. E. A. at Boston have resulted in the following selection:

1. Alcott. Little Women.
2. Carroll. Alice in Wonderland and Through the Looking Glass.
3. Defoe. Robinson Crusoe.
- 4-5. Stevenson. Treasure Island.
— Twain. Tom Sawyer.
6. Nicolay. Boys' Life of Abraham Lincoln.
7. Kipling. Jungle Book.
8. Andersen. Fairy Tales.
9. Aesop's Fables.
- 10-11. Stevenson. Child's Garden of Verses.
— Pyle. Merry Adventures of Robin Hood.
12. Lamb. Tales from Shakespeare.
13. Arabian Nights.
- 14-15. Malory. Boys' King Arthur.
— Van Loon. Story of Mankind.
16. Wiggin. Rebecca of Sunnybrook Farm.
17. Stevenson, B. E. Home Book of Verse for Young Folk.
18. Dickens. Christmas Carol.
- 19-20. Irving. Rip Van Winkle.
— Mother Goose.
- 21-22. Dodge. Hans Brinker.
— Hagedorn. Boys' Life of Theodore Roosevelt.
- 23-24. Hawthorne. Wonderbook for Boys and Girls.
— Seton. Wild Animals I Have Known.
25. Spyri. Heidi.

THE good ship Ala (named in honor of the American Library Association) has recently distinguished herself by service to the steamship Eastern Dawn which, owing to engine trouble became disabled. For twelve days the Ala towed the damaged ship thru fog and storms for 2000 miles across the Atlantic.

Wanted by the Somerville (Mass.) Public Library to complete file of the A. L. A. *Book-list*, v. 1, nos. 1-4 or v. 1 complete.

The Detroit Conference

IN addition to the five general sessions, two Council meetings and an Executive Board meeting of the American Library Association which has now eight fully established sections and eight round table groups, several other associations contributed to the joyousness and strenuousness of the Detroit conference. These included the four Associations affiliated with the A. L. A.—The American Association of Law Libraries, The National Association of State Libraries, The League of Library Commissions and the Special Libraries Association—three National Associations not affiliated with the A. L. A.—The Bibliographical Society of America, The Association of American Library Schools and the Library Workers Association—and one local organization—The Michigan Library Association. The attendance included many distinguished guests not members of any of the Associations, among them several Detroiters who came to take part in or listen to the discussions, also Commander C. R. Train

who came to express on behalf of the United States Navy appreciation of the benefit of libraries in the Navy, due to the initiative of the A. L. A., John M. Gries representing Secretary Hoover, and L. Stanley Jast, librarian of the Manchester Public Libraries, who brought informal greetings from British librarians.

All Detroit and its neighbors seemed to have planned for the entertainment of the visitors. Librarian Strohm and the library staff were at home to all in the new Main Building on Monday evening after the opening session and tea

and guides were provided for callers daily throughout the week. The Board of Commerce, the Society of Arts and Crafts, the McGregor Public Library at Highland Park, the University of Michigan, the Ann Arbor Library Club, and, not least, the local committees, as well as other groups and individuals, had anticipated the delegate's every need and every pleasure, and had provided conference rooms for groups of all sizes, breakfasts, luncheons, tea and other refreshments as occasion served, a boat-ride, an orchestra, a song leader, an organ recital, guide books to Detroit and its Library, and to the Campus at Ann Arbor, and, at the end of a long perfect day, a place where to lay his head.

PUBLICITY

In honor of the Association the *Detroit Free Press* on the day before the conference had issued a twelve-page book and library supplement under the editorship of Mary Humphreys and during and after the conference an unprecedented amount of space in local and other

papers, was given to the week's discussions, for which thanks are due not only to the respective editors, but also to the indefatigable Publicity Committee of the A. L. A. For the *Detroit News* broadcasting service President Root spoke briefly on how the county library brings city benefits to the farm.

LIBRARY PUBLICITY COURSE

Over 150 persons attended the practical five-lecture course on library news writing organized by Ida F. Wright and Willis H. Kerr of the A. L. A. Publicity Committee and given by

GEORGE B. UTLEY, 36TH PRESIDENT OF THE A. L. A.

Professor William Grosvenor Bleyer, director of the courses in journalism at the University of Wisconsin. Professor Bleyer's course was given at a quarter past eight in the morning so as to allow delegates to be present at the morning sessions, and he also held consultations on specific problems with groups and individuals.

This course is the outcome of a feeling on the part of many conference goers that discussion of certain problems more extended than that possible at the group meetings of the Association is desirable, and the feeling of the Committee is that the result of the tryout has entirely justified the experiment.

At the close of the course there was considerable discussion of the possibility of a similar course next year. Sixty-two persons by ballot gave their choice of a subject to be covered in next year's course, twenty-five voting for public speaking, twenty-one for publicity campaigns; four for a second course in news writing; three for library printing; two each for exhibits and editing library bulletins and one each for advertising layout and design, modern literature, current events, county libraries and book selection.

EXHIBITS

Exhibits by commercial houses were more numerous than usual.* There were also shown a hospital library exhibit (first exhibited at the American Medical Conference in St. Louis in May) and a County Library exhibit under the direction of Loleta I. Dawson, librarian of Wayne County Library which has its headquarters in Detroit. This exhibit which was prepared with the needs of the librarian specially in view rather than those of the general public will be described by Miss Dawson in an early number of the JOURNAL, so as to record for other workers in this field the organization of an exhibit which proved so successful at this meeting.

REGISTRATION

The official registration was 1790, which by the addition of several members and non-members present at only a few sessions, who did not register, probably brought the attendance to a

* Exhibitors included:

The H. W. Wilson Company, Yale University Press, The Grolier Society, The American Scandinavian Foundation, The National Child Welfare League, The Macmillan Company, Dodd, Mead & Company, Barse & Hopkins, F. A. Stokes Company, G. H. Doran Company, D. Appleton Company, The Page Company, F. E. Compton & Company, Alinari Brothers, Charles T. Powner Company, John R. Anderson, C. V. Ritter, H. R. Hunting & Company, Gaylord Brothers, The Library Bureau, The Globe Wernicke Company, The Tablet & Ticket Company, Wagenvoord & Company, Helm & Hoth, Julius Mack & Company, The Library Book House, National Library Binding Company.

figure not far below that of the banner conference of last year when the registration was 1899.

THE OPENING SESSION

Altho many members attended only a few sessions a great number of those registered were present during most of the week arriving in time for the first session, at which after hearty welcome by the Hon. John C. Lodge, president of the Detroit Common Council, Marion Le Roy Burton, president of the Michigan University spoke of the librarian's rôle in adult education and of the contribution which the profession can make toward the new Americanism which must aim at open-mindedness wherewith to investigate facts rather than be content with the fixing labels; public-mindedness; and especially world-mindedness, with which to realize that it is not political boundaries but the things of the spirit that are essential.

A. L. A. PUBLICATIONS

Discussion of the A. L. A. publications was opened by Hiller C. Welleman in the paper outlining the publishing policies of the A. L. A. Mr. Welleman reviewed briefly Henry E. Legler's story of the Publishing Board as presented to the Council at Chicago in 1917. From its modest beginnings thirty-five years ago with a capital of \$458, its early members—including James L. Whitney, W. I. Fletcher, Melvil Dewey, Charles A. Cutter, R. R. Bowker, Charles Soule and especially William C. Lane, worked with such indefatigable devotion that an immense amount of work was accomplished. In 1902 Mr. Carnegie gave an endowment for \$100,000 "for the preparation and publication of reading lists, indexes and other bibliographical and literary aids."

From 1896 to 1916 the sales increased from \$2,558 to \$12,554. In the last five years the latter figure has almost doubled, sales for 1921 amounting to about \$24,000.

Under the constitution of 1921 the Publishing Board was abolished, since which time the Editorial Committee acts in an advisory capacity, the actual editorial work and publishing being done by the Secretary's staff under the general direction of the Executive Board.

Recent tendencies reflect the direction of the growth of the public library system, the requirements of the smaller public libraries and the library schools having received special attention. To the difficulty of preparing publications and the more limited field of distribution of publications for university and special libraries is due in a great measure the fact that the particular requirements of these libraries have not been so well supplied.

The publications have fallen roughly into three groups: those on administration and technique

such as books, manuals and cataloging codes; indexes, buying lists and other bibliographical aids; and material for library propaganda and publicity, including brief reading lists and reading courses for quantity distribution.

Recently special emphasis has been placed on this last group and under Secretary Milam's practical suggestions it ought to be possible greatly to develop this branch of the work, especially if the policy be adopted of issuing the lists at the bare cost of printing until libraries generally have acquired the habit of buying them. This seeming subsidizing of publications ought to be regarded as a sinking of capital in new enterprises.

Questions for discussion are whether publications should not be listed when feasible at a price sufficient to cover also the cost of preparation and perhaps even to yield enough profit to build up a reserve fund; whether royalties should be paid to all authors and compilers, especially to those whose work is undertaken at the request of the Association; and whether the *Booklist* which in its best form is best suited to public and school libraries, ought not be modified so as to meet the needs of the general reader.

The special emphasis of the public and especially the smaller public library's problems mentioned by Mr. Wellman found regretful agreement among the speakers on behalf of other libraries.

College and reference libraries are relatively unimportant to the A. L. A. said Andrew Keogh in comparison with the public libraries. If the Association has funds to spend on the needs of the scholarly library it might give first attention to the publication of foreign lists and of scholarly books, the cost of preparation of which makes them prohibitive. It might advance bibliography by the organization of union lists and, thru university librarians urge the preparation of bibliographies instead of theses for the higher university degrees.

Harry M. Lydenberg pointed out that opportunities for co-operation in important helps for scholars and investigators had been neglected. He suggested if funds were available for an extension of the activities of the Board that a library annual summarizing the statistics of the various libraries might properly be undertaken; also a record of important books or manuscripts, reproduction of which by photostat of similar process had been made in this country; a systematic survey of the manuscript resources of the larger reference and university libraries, as well as a union list of periodicals, a record of bound files of newspapers available for investigators, a publication summarizing by a brief abstract the

essential articles in the field of industrial arts, indexes to the great collections of reproductions of paintings, and indexes to pictures by subjects.

For the school library, according to Marion Horton the A. L. A. should act as a clearing-house for those ever necessary book lists which have been prepared and are being prepared in considerable numbers by schools. A copy of every list made should be sent to Headquarters, and "we should write to Headquarters before making a new list to see if anything has been printed on this subject." This might be expensive, but it is worth the expense. A specialist in bibliography should be a member of the A. L. A. Headquarters Staff and a fee might be charged for the information exchanged. This specialist should know books and their use in different types of libraries and be prepared to promote the exchange of ideas as the Smithsonian exchanges scientific information."

Adelaide R. Hasse, speaking for the special library, thought that the A. L. A. is not at present in a position to do much in this direction, due to the fact that the Association is not special-library-minded, and that it has not at present time to devote to the special problems of welfare, business, and technical librarians who have already an organization of their own, their own periodical and other publications.

The popular library, said Howard L. Hughes, wants more lists and chiefly more special lists, and he suggested that more attention be given to the co-operative preparation of these; the A. L. A. might accept for publication lists prepared by other libraries, or arrange to have type held for an A. L. A. edition of lists prepared for local purposes.

COPYRIGHT

Dr. Raney's paper on Copyright presented at the second session is printed elsewhere in this issue.

Opportunity was given at a later session by the President for reply to Dr. Raney's address by Frederic G. Melcher who, after repelling the charge that the authors' leagues are but stalking horses for publishers, pointed out that English authors here, as also American authors in England could not get as much return from sales to libraries and individuals as they would by having publishers market editions, as was suggested by the recent memorial of English authors—asking support for a complete edition of Tolstoy, who had enjoyed less circulation in England because of his waiver of copyright protection and consequent failure to assure to any one publisher a fair market. He also made the point that if a decision by the Supreme Court on a point of law is to brand the defeated contestants, the

advocates of a Child Labor Law would have to share the same ignominy as the publishers in their endeavor, by stabilizing prices, to encourage the development of book stores and to make possible a wider distribution of books.

RESTORATION OF LOUVAIN UNIVERSITY LIBRARY

A lantern lecture by Whitney Warren of Messrs. Warren and Wetmore, architects, New York City, on behalf of the fund to be raised for the rebuilding of the Louvain University Library was given at the second general session. This library like all libraries consists of books and a building and the books are pouring in by gift from America, France and Great Britain

also from German collections from which by the terms of the Treaty, Louvain has the right to make selections. But the building which America has promised is not ready to receive the books and Mr. Warren suggested that libraries might like to join educational institutions which are now combining to offer this monument to their elder sister in distress. Many institutions of learning have already replied to the appeal while others have promised to take up the matter in the fall. Among libraries, the New York Public Library has led the way with a substantial contribution.*

NATIONAL LIBRARY WEEK

The discussion of a proposed National Book Week was introduced by Willis H. Kerr, chairman of the Publicity Committee, who reviewed briefly the facts that Indiana, Missouri and other places had greatly benefited by book weeks within the last few months and suggested that a library week, emphasizing different phases of the work in different parts of the country depending on the local need—general publicity, a needed bond issue, special collections, or a book shower as the case might be—might prove of value. E. L. Craig, trustee of the Evansville (Ind.) Public Library told of the fine success of

THE COVERED ARCADE AND VESTIBULE OF THE LOUVAIN LIBRARY

Indiana's Book Week and reviewed briefly the plans made in preparation therefor. These have been described in some detail by Secretary Wm. J. Hamilton in the LIBRARY JOURNAL for March 15, p. 305-306. From Missouri, Charles H. Compton reported great success also in spite of the fact that the week had been undertaken on short notice and that relatively little preparation had been made. Experience had shown that newspapers are glad to give space to book week news, and in St. Louis alone three of the four newspapers had printed editorials showing an intelligent grasp of library needs. Thirty-three towns and cities reported their share in the Week and

thruout the State it seemed evident that results had entirely justified the effort made. (See LIBRARY JOURNAL for March 15, p. 300.)

How publishers are getting good national publicity was described by Marion Humble, assistant secretary of the National Association of Book Publishers. The Year-Round Book-Selling Committee was organized "to manufacture ideas which should help the book-seller and publisher to think more in terms of the average person." A seasonal program was adopted: February, for example, emphasized American citizenship and history, out-of-door books were stressed in spring time, books as commencement gifts in May and as wedding gifts in June, after which came books for vacation and camp. Posters and sales suggestions were prepared, semi-monthly news sheets took ideas to dealers, press releases were sent to newspapers and magazines which have published such articles as "The Bride's Book Shower" (*Good Housekeeping*, June, 1921) "A Unique Hope Chest" (*Woman's Home Companion*, April, 1922) and "Take a Book to Camp" (*Boy's Life*, July, 1922). That the interest in books is increasing not only in book buying circles is attested by a letter recently sent by the Oklahoma Commission which estimates that as a result of Children's Book Week in 1921, the circulation of books in libraries in that State had doubled with 600,000 to spare.

What publicity can do for a library was briefly described by Herbert Hirshberg who instanced some of his experiences while librarian

*Contributions totaling \$179,931, including \$805 from the New York Public Library, have already been received. Over two million francs have already been transmitted to the authorities of the University and construction is now under way, following plans made by Messrs. Warren and Wetmore. The secretary of the U. S. National Fund for the Restoration of the University of Louvain is Henry S. Haskell, 407 West 117th Street, New York.

of the Toledo Public Library which has opened seven branches within a few years and is planning soon to have fifteen branches, and stressing particularly the publicity day with the Advertising Club described by Wendell Johnson in the LIBRARY JOURNAL for March 1, 1920, p. 207-208. While entirely in sympathy with the publicity day and publicity week, Mr. Hirshberg

concluded that every day ought to be library day and every week in every library a national library week.

Louise Prouty said that during "house cleaning week" in Cleveland the library had recovered three hundred and fifty-four overdue books and had received gifts of some twenty-five hundred volumes, many of which are of good quality. Anne M. Mulheron said that Portland's library week, where publicity was done by a professional publicity agency, had brought in \$4000 worth of books.

RECRUITING

Library Recruiting was the topic of the third session held on Wednesday morning. Judson T. Jennings, for the past two years chairman of the A. L. A. Recruiting Committee, analyzed the causes of the shortage of good library workers as inadequate salaries, insufficient number of library schools, and lack of knowledge on the part of the general public as to the opportunities and demands of library work. Were adequate salaries available, there would be no more need of recruiting than there is for the medical and legal professions. The A. L. A. has now a Committee on Salaries and Mr. Jennings anticipates that in proportion to the effectiveness of the work of the Salaries Committee ought that of the Recruiting Committee be reduced. The condition of things whereby only about two hundred and twenty-five students or one per cent of the total number of librarians in the country is graduated annually by the schools belonging to the American Association of Library Schools and where "to secure training

THE NEW LOUVAIN UNIVERSITY LIBRARY

in one of the best schools" students have choice of only twelve schools in eight states ought to be remedied by united action on the part of the A. L. A., the A. A. L. S. and the state library commissions working towards the establishment of schools conveniently situated in sections where they are most needed. To remedy the lack of knowledge on the part of

the public has been so far the chief aim of the Committee, by equipping librarians and vocational advisers with material thru correspondence and by the distribution of printed matter. Much of this work has necessarily been in the nature of broad-casting, but this is easily remedied by the fact that those in charge of library schools can easily keep out the wrong type of worker.

As recruiting officer for the Canadian library army, George H. Locke of Toronto considers his first duty to see to the reorganizing of the army on war footing. that is to see that the army is well fed, well led and well supplied with all makes for an effective campaign. For the time is passing when people can be allured into the ranks of the army by telling them of the opportunities for self effacement and ultimate immortality, and Mr. Locke keeps in mind that there must also be "an incentive which has the qualities of the idea in it, something which appeals not only to the intellectual sense but above all to the moral feelings."

The paper on "Recruiting for School Librarians" was presented by Martha C. Pritchard, of Detroit Teachers' College, whose paper was the outcome of two years' experience in the public school system of the city of Detroit. During this time there have been opened one high school, three intermediate school and twenty-nine elementary school libraries. The librarian in charge is paid at the same rate as the regular teachers in each of the grades mentioned, and the Board of Education requires the same academic training as that of a teacher, with additional library training. In outlining

modern procedure in the socialized classroom Miss Pritchard pointed out that the librarian has more opportunity than anyone else to further progressive methods in the school. Nowhere outside of the principal's office is every factor of the school's life so readily understood as in the library. The person in charge of the library should have, therefore, maturity, experience, and personality with which to meet the entire situation. Recruits must be sought for this work among the flexible open-minded members of the library and teaching professions and for these there should be made available at the earliest opportunity a course of study similar to that outlined in Marion Horton's article on training for school librarians printed in the *LIBRARY JOURNAL* for May 15th.

In recruiting for children's librarians, it is not to the informing of vocational advisers nor yet to the publishing of articles in the general magazines, but to the librarian that the chief appeal must be made, said Clara W. Hunt. Recognition of the children's librarian as a professional worker and the demand of high qualifications of those entering this profession will remedy the present dearth of volunteers in this field, where for the eighteen millions of children at present in elementary schools in this country there are only seven hundred who even call themselves children's librarians, and of these many have had only the most meagre preparation. To all concerned Miss Hunt makes her appeal:

On the children's librarian she urges "pay your debt to your profession by opening next fall a training course, spend the summer planning the course and choosing candidates, and depend no longer for your supply on children's librarian enticed away from other libraries"; on chief librarians the seconding of the children's librarians effort in this direction, and the refusal to lower standards; on library school directors the establishment of a course in work with children adequate to give to graduates a sense of the educational value of the children's library and a knowledge of the basic principles on which the work is founded; on trustees the payment of salaries which will compare favorably with those of teachers so that the library profession be not cheapened in the eyes of the community; and on library commissions the addition as soon as possible of a children's librarian to the head-quarter's staff and the planning of a children's librarian for every county library.

Speaking for special libraries Alice L. Rose limited herself to a discussion of the business library, since most of the other classes into which special libraries fall require in the main qualifications in no way different from those

of university, college and public libraries. The business library is a regular collection of books with specialized service. For this service technical positions require as a rule college graduates, preferably those who have specialized in the junior and senior years in the direction of the business which they propose to enter, and who have either library school training with special emphasis on advanced cataloging, classification and reference work, or experience in a well organized catalog department, plus experience in a business organization or business library, and above all native ability and adaptability.

Colleges naturally suggest themselves as sources for recruits tho for some positions high school graduates may be used advantageously while being trained to fill more difficult positions. As foreign languages are very valuable in many libraries, assistants can often be obtained thru well placed advertisements, and the business library is somewhat uniquely fortunate also in the fact that some of its best recruits may come from the organization itself.

What the A. L. A. and the S. L. A. can do towards bringing about a general recognition of the professional position of the work, is to wage an intelligent publicity and propaganda campaign to show Mr. Business Man the practical help which such a department can give in his organization.

The library school point of view was presented by Alice S. Tyler who pointed out that our quest is not unique, that all other professions are also seeking the "virile red-blooded young men" and "the clear-eyed young women." The actual bringing in of recruits is the work of those outside the school, those who are daily in touch with readers and the users of libraries rather than that of the schools, whose duty it is to prepare the recruit for the special type of library work for which he is fitted. In a special sense, nevertheless, the school does act as a recruiting agency for it is the recent graduate with enthusiastic belief in the new vocation who is best prepared to enlist other young people for the ranks.

In addition to the points brought out by Mr. Jennings and other speakers, W. E. Henry speaking for college and university libraries, said that the profession "has come to be looked upon as a woman's profession not only because of the large percentage of womanly women engaged in it, but also because of the large number of ladylike men within the ranks," and stressed the need of some reform of librarianship and of the library schools which have not "usually appealed strongly to the strong, vigorous, progressive leaders among young men."

BUSINESS

Reports of the Secretary, Treasurer and the Finance and other committees which were printed and distributed to the members at the time of registration were presented by Secretary Milam at the opening of the fourth general session on Friday morning, and it was voted that these reports be received and filed.

REVISION OF BY-LAWS

Nominations and Elections—In view of the fact that the counting of the ballot of some 2950 members had occupied six or eight persons for several hours a day for three days, Matthew S. Dudgeon for the Committee on Constitution and By-laws, proposed that section 8 be amended by the elimination of the words "but ballots shall not be opened until after balloting at the regular meeting," and substituting, therefor, "the committee on election immediately after the mail vote has been received shall provide for counting the votes but shall not make public the result until after balloting at the regular meeting," and adding at the end of that paragraph "each enclosed in an envelope bearing the name of the member voting." Carried.

In view of the fact that candidates nominated for election, had in some cases found it impossible to stand for election, it was proposed by Dr. Steiner that section 8 a and b be amended to include a clause to the effect that the consent of the persons nominated be obtained before the publication of the report of the nominating committee. After discussion this was referred to the executive board which made recommendations for action at the fifth general session on Saturday morning, when it was voted to strike out from (Section 8 (a) lines 5 and 6) the words: "at least three" and "each" and to change the word "position" to "positions," and to add at the end of that paragraph: "No person shall be nominated unless his consent to such nomination be previously obtained;" also to add at the end of paragraph b in Section 8 the following words: "provided written consent of these nominees be filed with such nominations."

Chapters—Mr. Dudgeon, pointing out that the present by-laws were presented by the Committee on Constitutions and By-laws last year in view of a proposed further revision of the constitution, suggested that since chapters have not according to the present constitution proportionate representation on the Council, the section 11, paragraph 3 be amended by the elimination of the words, "these members shall be accounted in determining the apportionment of delegates to the A. L. A. Council." This was carried.

Committees—Mr. Dudgeon proposed to add to section 18 a clause defining the functions of

committees of the Council by adding to section 18: "The committees created by the Council shall be limited in function to the consideration of business of the Council." This was carried.

PERPETUAL MEMBERSHIP

The opinion of the Association was asked regarding a proposal that perpetual memberships be given on payment of \$100 in memory of professional or other important members of the Association. The general feeling seemed to be that altho due care would be exercised by the Executive Board in the awarding of these memberships, the practice would, nevertheless, be undesirable.

THE INDIVIDUAL'S DUTY TO THE PROFESSION

The individual's duty to his profession was the topic for discussion at the last general session when brief addresses were made by Dr. Kennedy on behalf of H. H. Emmons, president of the Detroit Board of Commerce, and Mary E. Hazeltine, who spoke on personality and adjustment as underlying all professionalism and pointed out that the librarian's duty to his profession requires that he offer himself with his character, understanding knowledge and conduct—and with the Hellenic virtues of temperance and proportion withal—and referred to Charles K. Bolton's formulation of thirty articles forming a code of ethics of librarianship printed in the *May Annals of the American Academy* and reprinted in the *LIBRARY JOURNAL* for June 15th as a measuring stick. Carl B. Roden's paper is given in full elsewhere in this number.

Following, Librarian Strohm, in a brief speech, wished the visitors Godspeed and expressed the honor which the Association had conferred upon the City and Library of Detroit in choosing this meeting place for deliberations tending towards the advancement of reading and of understanding.

RESOLUTIONS

In presenting its report the committee on resolutions strongly endorsed recommendations of the last year's Committee on Resolutions, urging "that in the future this committee be appointed early each year so that as many resolutions as possible may be submitted to it in writing in advance of the annual convention."

Resolutions recommended by the Committee were adopted as follows:

The American Library Association sends its felicitations to Thorvald Solberg upon the completion June 30, 1922, of a quarter-century service as the first and only Register of Copyrights and thirty-eight years' relation with the Library of Congress. It records also its gratification that in his seventy-first year his service is everywhere recognized, in view of his continuing energy, as the more valuable because of his long experience; and while approving the retirement under normal circum-

stances at a stated age of faithful public servants if a proper annuity method for their remaining years is provided, it makes protest against the application of enforced retirement of public servants still capable of good service without such appreciation of their past devotion to the public interest.

The American Library Association records its approval of the appropriations for library work in the Navy and Army, in accordance with the implied understanding between the Government and the Association after the close of the war service by the welfare organizations, but hopes that more generous appropriations may be made in the future for book service in the Army. It expresses its cordial appreciation of the successful efforts of Senator Wadsworth and his colleagues in the Senate in effecting the passage of the appropriation bill. It expresses also, its thanks to the Secretary of War for his endeavors to fulfill the understanding between the Association and his Department.

That this Association joins in the effort of other organizations for a nation-wide recognition of the birthday of Benjamin Franklin, on January 17 of each year, the no public holiday is desirable, and recommends that the two hundredth anniversary of the beginning of his career as a publisher be given special attention in 1923.

That the heartiest acknowledgment is made to the city officials, to all committees, associations, institutions, and organizations who have given of their time and energy in such generous measure; to the press of Detroit, for valuable library publicity; to the speakers and entertainers whose efforts contributed so vitally to the enjoyment of all in attendance; that special acknowledgment is due the Detroit Library Commission, the Librarian and members of the Library Staff; to the President, officers, committees, Librarian and assistants of the State University of Michigan for their unstinted efforts in behalf of the members of this Association in attendance upon this Conference.

OFFICERS

For officers for the year 1922-23, 2950 votes were cast resulting in the election of the following: For president, George B. Utley, Newberry Library, Chicago; first vice-president, Josephine A. Rathbone, Pratt Institute Library School, Brooklyn; second vice-president, Malcolm G. Wyer, Nebraska University Library; treasurer, Edward D. Tweedell, John Crerar Library, Chicago; trustee of endowment fund, Washington T. Porter, Cincinnati; Executive Board, Chalmers Hadley, Denver Public Library; W. W. Bishop, University of Michigan Library; J. I. Wyer, New York State Library; Council: Alice I. Hazeltine, St. Louis Public Library; Ernest J. Reece, Library School of New York Public Library; Charles E. Rush, Indianapolis Public Library; M. S. Dudgeon, Milwaukee Public Library; Edith Guerrier, Boston Public Library; James T. Gerould, Princeton University Library; Caroline Webster, U. S. Public Health Service, Washington, D. C.; Electra C. Doren, Dayton Public Library; Harriet A. Wood, Minnesota Department of Education; Herbert S. Hirshberg, Ohio State Library, Columbus.

Following the report of the tellers of Election Mr. Jennings escorted to the platform

President-elect Utley who was enthusiastically received and who in a few words acknowledged the honor shown in choosing him as thirty-sixth President of the Association whose ship during forty six years has been steered by such an array of illustrious men from Justin Windsor to Azariah Smith Root.

COUNCIL MEETINGS

Two meetings of the Council were held, one on Monday afternoon, the other on Wednesday evening.

CHAPTERS

Applications for affiliation as chapters of the A. L. A. many of which were passed upon at the December meeting of the Council were received and it was recommended that the following be made affiliated chapters of the A. L. A.

Alabama Library Association,
California Library Association,
District of Columbia Library Association,
Florida Library Association,
Kentucky Library Association,
Massachusetts Library Club,
Montana State Library Association,
Oklahoma Library Association,
Texas Library Association,
St. Louis Chapter as a local.

SALARIES

Charles H. Compton presented the report of the Committee on Salaries. Since this had been printed and was in the hands of the members Mr. Compton merely pointed out certain outstanding features. The Committee had sent out a questionnaire to about eighty public and forty college libraries, as a result of which statistics of salaries for about thirty-seven of the largest public libraries had been compiled. This is in the hands of Secretary Milam and is ready for printing. The Committee recommends that the state library commissions print statistics of salaries in their respective states; also that there be a comparison made in a certain chosen number of cities of salaries of librarians and teachers. Comparison with the Committee's report of 1919 shows that the average minimum salary of 125 libraries was \$684, whereas in thirty-seven libraries now reporting the minimum salary is \$1054. Of these libraries twenty-four are paying less than \$1200. The Committee feels that the yearly compilation and printing of these statistics will do much, especially if positions can be more standardized so that the figures will mean the same thing in different libraries.

In reply to a question by Mr. Parkinson, Mr. Compton said that the fixing of a minimum salary would have the same beneficial result as had had the recommendation of a minimum tax rate and he suggested \$1200 as the minimum. Mr. Windsor thought that it would be a great help if the Committee were to analyze the average initial salaries for certain types of work. Mr.

Compton explained that in sending out the questionnaire it was stated that it would be printed under symbols, and added that any librarian wishing to use it with his Board might have the key to the symbols. Miss Ahern moved that there be printed for the use of the Council a schedule of salaries in thirty of the largest city libraries and thirty of the university or normal school libraries, provided that the librarians sending those reports are willing to have them published. This was voted; and on a motion of Miss Countryman, it was voted that the Committee report a minimum salary for discussion by the Council.

SCHOOL LIBRARIES

The report of the Committee on Education was presented by Harriet Wood who offered for adoption a resolution embodying the "A. L. A. School Library Objectives," included in the Committee's report, p. 28-29. The feeling of the members being that this was unnecessarily detailed, the resolution was referred back to the Committee.

At the Wednesday evening session the revised report was presented and after discussion it was voted that:

The American Library Association believes that every student from the elementary school thru the university should learn to use and appreciate books and libraries, not only that he may study to advantage in school but also that he may continue thru adult life to benefit from the resources of libraries.

To accomplish this there should be a supervisor of school libraries in every state and province and a school librarian for every school system—city, county, township or district.

We, therefore, recommend as a minimum standard that there be at least one full-time school librarian for an enrollment of one thousand elementary and high school pupils.

Whether the school library supervisor or librarian shall be employed by school or library authorities, separately or jointly, is a matter to be determined by state or local conditions.

LIBRARY TRAINING

The report of the Committee on Library Training was presented by Malcolm G. Wyer who emphasized the desirability of correlating more closely agencies for training, so that each agency would have its own place in the library training system, and the need of some arrangement by which a student could secure credit in one institution for work faithfully performed in another as is the case in colleges. The Committee offered the following resolution:

1. That the regular library schools offer summer school courses in special subjects for which the same credit be given as for equivalent courses in the regular schools. 2. That some schools offer correspondence courses in certain subjects with credit. 3. That the various library schools adopt a uniform system of credits.

Miss Rathbone pointed out the difficulties in the way of a school like that of the Pratt Institute in arranging for credits on the college system and for the giving of summer courses, and Mr. Henry said that at the University of Washington, while there was no difficulty in obtaining good material for the regular course, it had been found that there was no demand for a summer school. There was much discussion on the advisability of giving correspondence courses and Mr. Wyer pointed out that some residence would of course be required of all groups, but that certain courses, for example cataloging, could be given by correspondence. After further discussion it was voted that the resolution be referred to the Association of American Library Schools.

STANDARDIZATION OF LIBRARY SERVICE

Standardization of library service was presented by Josephine Adams Rathbone who, as a member of the Committee on Certification, has gathered facts on schemes of service in about thirty of the largest libraries of the country. "Recognition of the need of such standards and for official certification of the fact that individual workers have reached the standards has come to be general. "For several years a committee has been at work on the subject of national Certification, tho so far no action has been taken toward the formation of a national board of certification. A preliminary to the successful operation of such a board, however, is knowledge of the schemes of service now used by individual libraries, whereby their assistants are classified or graded and their efficiency recorded."

The results of the survey show a great diversity of practice in the libraries surveyed. The grades vary in number from two to eleven, libraries under municipal civil service having as a rule a greater number of grades than libraries that control their own service. The latter libraries have many more exempted positions at both ends of the scale than those under civil service regulations. Fifteen of the libraries reporting have a non-professional class of service for clerical and manual work—work that in many cases, as typing or book mending, requires special training of quite a different kind from that of the professional worker. The libraries differ not only in the number of grades but the qualifications, duties and status of the workers in each grade. "Therefore comparison of requirements, duties and salaries between corresponding grades in different libraries is difficult if not impossible, and it would seem that before an inter-library certification scheme can become effective, there must be a preliminary effect toward systematizing library service."

Dr. Hill endorsed what Miss Rathbone said, namely that "we must have some scheme of this sort" and said that after what Miss Rathbone had said, he was willing "to leave this scheme of certification in the hands of her Committee for a little while anyway."

The Committee on Federal and State Relations had nothing to add to its printed report except that the N E A. had expressed its desire to have a resolution of reaffirmation for the Towner-Sterling Bill from this Association. W. I. Wyer, chairman, offered therefore, the resolution:

That the American Library Association reindorse the principles embodied in the Towner Sterling Bill and urge the creation of a federal department of education with a secretary in the President's cabinet; that it urge a provision for federal aid to encourage the states in the removal of illiteracy and in providing for the Americanization of the foreign-born, physical education, teacher training and the equalization of all educational opportunities.

On the motion of Mr. Wellman it was voted to amend by striking out everything after the words "President's cabinet," and on Mr. Winsdor's motion a further amendment by striking out the words "re-endorse the principles embodied in the Towner-Sterling Bill" and was voted. The resolution with amendments being now before the meeting, it was voted that the resolution be referred back to the Committee on Federal and State Relations.

A resolution offered by Mr. Roden to the effect that the A. L. A. records its approval of the project for the restoration of the library of Louvain as a free gift and testimony of fellowship from the librarians and other bodies representing the scholarship of America, was adopted.

Dorsey W. Hyde offered a resolution expressing willingness to support work of the information service to business and industry which had been carried on by the Department of Commerce. This was referred to the Committee on Federal and State Relations.

At the Wednesday evening session the report of the Committee on Sponsorship for Knowledge was presented by George Winthrop Lee who offered the following resolution:—

That this report be considered final, the Committee discharged and the Central Office of the American Library Association take measures necessary to officialize sponsorships at least one hundred in number during the year beginning July 1st, 1922. This was carried.

Mary E. Wheelock for the Committee on Book-binding read several letters giving further details on the bulletin printed in the LIBRARY JOURNAL for June 15, (p. 545-546) and asked for an expression of opinion from the Council regarding the poor quality of publisher's binding. Dr. Raney proposed a resolution to the effect that the

Council give support to the Committee on Book-binding in its effort to better the materials and workmanship of edition work on the part of the publishers. This was adopted.

Mrs. Eleanor E. Ledbetter in presenting the report of the Committee on Work with Foreign Born offered for adoption as an A. L. A. platform, the "general conclusions" of the year as printed in the Committee's report, p. 71-72.

While expressing entire sympathy with the purport of these resolutions Miss Tyler moved that this resolution be referred back to the Committee for simplification and report, and this was carried.

Reports of A. L. A. section and round table meetings and of other organizations meeting at Detroit will appear in our August number.

Reopening of Drexel Library School

THE School of Library Science of Drexel Institute will be re-opened September 25.

The entrance examination will be held on September 6. A one year course will be offered. This will conform to the standard thirty-six week course. For entrance a high school education or its equivalent will be required. Graduates of accredited colleges will be admitted without examination.

Previous library experience is desirable—also ability to use the typewriter.

The services of Miss Florence R. Curtis, 1896 N. Y. S., who was from 1908-1920 a member of the faculty of the University of Illinois Library School and later of the Government Preparatory School at Kaifeng, Honan, China, have been secured as chief instructor.

Adequate class rooms have been provided and are being decorated and equipped.

ANNE WALLACE HOWLAND, *Director*.

U. S. Army Library Appropriations

THE army appropriation bill as finally passed carries an appropriation of \$30,000 for libraries. This sum has been supplemented by \$40,000 made available for this work by the Chief of Staff and there are also certain funds already in the field and a possibility of some additional funds so that there will probably be between \$80,000 and \$90,000 for the carrying on of this work.

"We nominate for public librarian of Gopher Prairie the earnest lady who in a session of the American Library Association last week defined 'moral' novels as those which teach that 'the wages of sin is death.'"—*Detroit Free Press* for July 3.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JULY, 1922

THO the Detroit Conference with an attendance of nearly 1800 did not reach the high water mark, it outdid all previous conferences held in cities and surpassed any conference in extent and strenuousness of work. Thirty or more associations, sections and round tables gathered in twenty meeting places in eleven different localities, and the day's work, beginning for some with the lectures on library news writing, by a distinguished professor of journalism, lasted well—or ill—toward midnight. Those conscientious souls who tried to do their whole duty and listen to everything they should hear had difficulty indeed. The effective organization of Mr. Strohm and his Staff and the citizens of Detroit made the arrangements unusually efficient, and besides the novelty of a library supplement to the *Detroit Free Press* the preceding Sunday, a feature new in conference history, the establishment of an information service at the railway station was especially gratifying to the arriving throngs. The day at Ann Arbor was a happy relief from the hard work of other days and the welcome of Regent Clements at the luncheon at the University Union and of Mr. Bishop in the fine new library was cordially appreciated. Indeed at no other conference have visiting librarians had the opportunity of seeing two new library edifices of surpassing beauty and practical character as the Detroit Public Library and the Michigan University Library offered them. The program for the most part was of a very practical nature dealing directly with library problems, without oratorical generalities, and on the whole the great numbers of earnest librarians who overran all the big hotels felt repaid for the hard work of the crowded week. The task of Secretary Milam and his staff in reconciling the irreconcilable and accomplishing the impossible is worthy of all praise.

★ ★ ★ ★ ★ ★ ★

IT was perhaps the first conference at which there was present no survivor of the hundred present at the first conference in 1876, and this marks a natural break in the history of the A. L. A. which will become complete when before many years the last of the nine survivors

goes over to the majority. The most optimistic prophet of forty-six years ago could scarcely have imagined the wonderful development in library progress within that period, and the achievement to which the national association looks back with pride, as an earnest and inspiration for still greater work ahead. The fact that the conferences of today outnumber those of early years fifteen fold is striking indeed, but even this multiple is exceeded in the count of the many organizations, national, state and local which have developed from the initiative of the founders of the A. L. A. The colossal gift of Andrew Carnegie has multiplied library buildings into the thousands, but beyond libraries of such equipment, library work has ramified from more modest buildings and thru the great work of traveling libraries into the smallest communities and even to detached homes. The dots which marked the great American desert in the old time school geography have disappeared and the channels of library beneficence have fertilized the minds of our people, as the irrigation systems have made our waste lands productive of rich harvests. Our country has led the world in feeding the mind as well as the body and, tho there is a percentage of illiteracy yet to be redeemed, the rising generation of librarians will see to it that no man, woman, or child in the vast country is beyond reach of the book.

★ ★ ★ ★ ★ ★ ★

IT serves no good purpose to pour vitriol upon troubled waters and the address of Dr. Raney on the copyright bill castigating publishers, stealthy conspirators, and authors as their false fronts can scarcely help the library cause. The trend of recent years has been to recognize authors who create books, publishers who produce, and in many cases originate them, and booksellers who market them as co-operators with librarians in the great work of bringing books to the people; and abuse of any one class by another reacts unfavorably upon all engaged in this creditable effort. We do not recall any conference in which the A. L. A. has been put in such an unfortunate position before the reading public as by this address, and the tone thus adopted, too much

like that of the lawyer who makes the mistake of abusing the attorney on the other side, is not likely to have a favorable effect at the copy-right hearings. The library profession has a clear case for its side in the precedent in 1909, but such intemperate treatment of authors and publishers tends to make them only more resolute in asserting what they consider their legal rights. A happier tone was that of the recent Coronado meeting of the California State Library Association where the program centered on the history and product of American publishing firms in addresses by six different speakers preceded by a review by Helen E. Haines of the development of American publishing.

★ ★ ★ ★ ★ ★ ★

HEARTY welcome will be given by the other library schools and thruout the library profession to the Drexel Library School, as reincarnated under the inspiration of the new president of Drexel Institute. Dr. Mathews, whose appreciation of library values was developed in part through his service as a trustee of the Atlanta Public Library. No little credit for this happy return should be given to Miss Mary P. Farr, who has done so much to maintain the affection and devotion of Drexel graduates for the school and thus stimulate efforts toward its rehabilitation as an integral part of the Institute which had sent so many good workers into the library field. It is a fortunate circumstance that the successor of Miss Kroeger as the head of the school has been found in Anne Wallace Howland who in her widowhood returns to the profession of her first love. Succeeding her sister as the amateur librarian of a local library in Atlanta she became inspired with a kindling enthusiasm for library work which made her a notable figure in the library world in the nineties. The Congress of Librarians which she put on the program of the Atlanta Cotton Exposition in 1895, tho it consisted chiefly of seven visiting librarians from the North, gave occasion for a public meeting at which "the girl in the pink shirtwaist"—as she became known to newspaper and library fame—made her debut, and started the library development in Georgia which resulted in the Atlanta Public Library, The Library School endowed by Mr. Carnegie, and the State Library Commission. This remarkable career of Anne Wallace, who herself laments the lack of library school training in her own case, suggests that while technical training is of the utmost value, standardization and certification should not go so far as to exclude or discourage from the profession those "born librarians" who succeed against the handicap of lack of school training.

"**T**HEY also serve who only stand and wait," and those who waited and worked at home in the World War despite their longing to work overseas are entitled to no less credit, than those who fulfilled their desire. It is gratifying, therefore, that the library unit of the Women's Overseas Service League has elected Miss Caroline Webster an honorary member of their body, for none of those who made the journey abroad did more for their countrymen overseas as well as at home than this excellent worker. The library service, continued since the war under the Public Health Service, has now been transferred to the Veteran's Bureau, but remains under the supervision of Miss Webster. On the occasion of the transfer Surgeon-General Cumming expressed gratitude that the A. L. A. should have found it feasible to lend the services of Miss Webster under whom the work has been "developed, organized and managed" and without whose service "this organization would never have functioned with such satisfaction."

LIBRARY CALENDAR

- Aug. 30-Sept. 1. At Olympia. Pacific Northwest Library Association's thirteenth annual conference. Visitors to the Pacific Northwest will be particularly welcome.
- Sept. 11-16. At Alexandria Bay, Thousand Islands. 32nd Annual Meeting of the New York Library Association.
- Sept.—(Probably about the middle of the month). At Duluth. Annual meeting of the Minnesota Library Association.
- October 17-20. At St. Joseph, Mo. Joint meeting of Kansas, Missouri, Nebraska (and probably Iowa) Library Associations.
- Oct. 18-19. At Flint. Annual meeting of Michigan Library Association.
- October 19-21. At Chicago. Illinois Library Association's annual meeting. Headquarters at the Chicago Beach Hotel.
- Oct.—At Signal Mountain, Chattanooga, Tennessee. Joint meeting of southeastern state library associations.
- Oct.—At Yankton. Fall conference of the South Dakota Library Association, and three-day library institute.
- Oct. 24-27. At Altoona, Pa. Keystone State Library Association. Headquarters at the Penn-Alto Hotel.
- Oct. 25-27. At Austin. Annual meeting of the Texas Library Association. Dorothy Amann, S. M. University, Dallas, president.
- November 15-17 in Indianapolis. Annual Meeting of the Indiana Library Association and of the Indiana Library Trustees Association.

UNIVERSITY OF MICHIGAN STACKROOM ANN ARBOR, MICHIGAN

A view showing an intermediate tier of SNEAD STANDARD STACKS and CARRELLS or private study spaces incorporated in the Main Stack.

The advantage of providing study spaces in the stacks is obvious. This feature of the stack construction has in late years been developed to a high degree.

The University of Michigan installation represents one of the most modern methods of providing a convenient and sufficiently private space for students.

Universities and colleges are realizing the useful and serviceable feature of this arrangement.

Long experience in equipping libraries of all sizes has given our experts a fund of valuable information on Library construction and arrangement, which is available without charge or obligation to the Library Officials and Architects.

Detailed plans and descriptions of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific library construction.

BEARDSLEY, Arthur S., for the past three years librarian of Camp Lewis, Wash., has resigned in order to become law librarian of the University of Washington, Seattle, Wash. He is succeeded in his work at Camp Lewis by Major J. E. Carberry.

FOSTER, Mary E., 1922 C. P., appointed to take charge of the children's work and work with elementary schools for the Birmingham (Ala.) Public Library.

FURNISS, Mabel, 1912, N. Y. P. L., formerly librarian of the Mt. Washington Branch, Carnegie Library of Pittsburgh, has been appointed head of the Lending Department of the Bridgeport (Conn.) Public Library and is succeeded by Marion L. Hatch, 1918, Syr., first assistant, Wylie Avenue Branch.

GILBERT, Lucy, head of the Art Department of the Minneapolis Public Library, was burned to death on June 18 by a fire which destroyed the Lafayette Club. Miss Gilbert could have been rescued but she refused to leave an old and crippled friend.

GULLEDGE, John R., 1920 Ill., has resigned from the staff of the Texas A. and M. College library in order to become assistant librarian in charge of loans, at the University of Texas Library, Austin.

LANSDEN, Effie A., assistant librarian, succeeds the late Mrs. L. L. Powell as librarian of the Cairo (Ill.) Public Library.

MARION, Guy E., appointed assistant librarian of the Los Angeles (Calif.) Public Library, July 1st, to work in the field of science, technology, sociology and publicity, caring especially for the needs of commercial interests.

Mr. Marion founded one of the first industrial libraries in this country, that of the American Brass Company, Waterbury, Conn. In 1909 he became librarian of Arthur D. Little, Inc. Later he directed the organization of corporation and business libraries, among them the libraries of the United Drug Company, the Pilgrim Publicity Association, Boston; the Associated Advertising Clubs of the World, New York City and the record section of the Community Modern Picture Bureau, embracing over 300,000 entries. The collection of the Associated Advertising Club, gathered for the St. Louis National Advertising Convention in 1917, was exhibited also at the St. Louis meeting of the A. L. A. as "A Modern Business Library."

PILLSBURY, Avis M., 1920-21 Ill., has resigned as cataloger in the University of Minnesota Library to accept the position of head cataloger at the University of North Dakota.

PRICE, Marion, 1916, N. Y. S., appointed assistant in the Parlin Memorial Library, Everett, Mass.

STEELE, Katherine D., 1909 P.; 1916-17 N. Y. P. L., assistant librarian in charge of periodicals at the University of Minnesota, has resigned to spend some time in California. After a period of rest and recreation Miss Steele will probably engage in library work in California.

SANDOE, Mildred, appointed children's librarian of the Savannah (Ga.) Public Library, in succession to Janey W. Davant, who resigned owing to ill health.

UNTERKIRCHER, B., 1910 Wis., appointed principal of the Fiction Department of the Los Angeles Public Library.

WOODS, Charles F., librarian of the San Jose (Calif.) Free Public Library for the past five years, has been appointed librarian of the Riverside (Calif.) Public Library, succeeding the late Joseph F. Daniels.

WOODS, Harriet de Krafft, who has been since 1900 a member of the staff of the Register of Copyrights has been appointed to the charge of the Library of Congress building and grounds. A bill, effective July 1, abolishes the office of Superintendent of the Library Building, transferring to the architect of the Capitol the structural work and the operation of the mechanical plant, and to the Librarian the custodianship of the building and the work of the disbursing office. It is for this work that the Librarian has chosen Mrs. Woods as administrative assistant.

Two Needed Business Books

Do Not Overlook Them

SURETY BONDS

By EDWARD C. LUNT, M.A.

*Vice-President in charge of the Bonding
Department, The Fidelity and Casualty Company
of New York; Member of the New York Bar.*

Men in positions of responsibility are frequently required either to give or receive a bond. This work is therefore of direct importance to business executives, bankers, and lawyers, as well as to insurance underwriters. It is also a valuable reference work for the business reader. For seventeen years the author has been in charge of the bonding department of his company. His book offers an easily readable but thoroughly comprehensive account of the whole subject. Among the numerous types of surety instruments which he analyzes—nearly one hundred in all—are position fidelity bonds, bankers' blanket bonds, judicial or court bonds, contract bonds, license and permit bonds, and a number of special classes. The tabular index of all recognized types of bonds, with authoritative notes as to the conditions under which they may be underwritten, is an exceptionally valuable feature. Ready in July. About 360 Pages. Cloth Binding. Price \$2.50

CORPORATION PROCEDURE

By THOMAS CONYNGTON,

*of the New York Bar; R. J. Bennett, C.P.A.,
Member of the American Institute of Accountants;
and P. W. Pinkerton, C.P.A., Mgr., Commercial
Department, Coffield, Sanders & Co.,
Indianapolis, Ind.; Hugh R. Conyngton, Editor.*

Among corporation officials, lawyers, accountants, bankers, investors, etc., this publication is rapidly becoming the standard guide in matters of corporation administration. It gives full, definite, and authoritative counsel and working methods covering the three important divisions of corporate management—Law, Finance, and Accounting. In this one volume the authors show exactly what should be done in authorizing and managing corporate affairs. They give authoritative legal advice covering practically every contingency. They go right to the heart of the financial problems encountered and have worked out, with detailed examples, practically every conceivable accounting situation. 267 forms—the most complete collection ever brought together between two covers—are included. Published May, 1922. 1689 Pages. Cloth Binding. \$10

The SCHOOL for BUSINESS LIBRARIANS

ADELAIDE R. HASSE, Director

THE Business Librarian is a recent addition to well-rounded business organizations. Capable women specially trained for this work are in demand at good salaries. Our courses include a study of the primary sources of information; processes of compilation; cataloging and indexing; accepted methods of caring for and routing information. Professional ethics will be inculcated.

The same high standard of thoroughness is applied to these courses as for all others at

The **WASHINGTON**
School for SecretariesRoom 401, Commercial Bank Building,
Washington, D. C.

Appointments of the members of the class of 1922 of the Atlanta Library School have been made as follows: Nell Barmore, assistant, circulation department, Minneapolis (Minn.) Public Library; Verna Goode and Jessie Louise Head, assistants, Greenville (S. C.) Public Library; Odessa Gifford, assistant, Greensboro (N. C.) Public Library; Lydia Mathews, and Frances Stokes, assistants, Atlanta (Ga.) Carnegie Library; Ruby McWhorter, librarian, Hickory (N. C.) Public Library; Selma Wacker, assistant, Emory University Library, Atlanta; Sue Vernon Williams, cataloger, Birmingham (Ala.) Southern College.

Permanent appointments of graduates of the class of 1922 of the University of Washington Library School have been made as follows: Elva Batcheller, Reference Department, University of Washington Library; Clarissa Goold, Tacoma Public Library; Olive Kincaid, Catalog Department, University of Washington; Luella Larson and Berger Lundell, Circulation Department, University of Washington; Agnes Peterson, University of Idaho Library, Moscow; Frances Allen Town, Tacoma Public Library. The following temporary appointments in the Seattle Public Library have been made: Thelma Edwards, Esther Hitchings, Margaret Jones, Alice McDonald.

CURRENT LITERATURE AND BIBLIOGRAPHY

A Brief Survey of the Bradford Public Libraries 1872-1892, by Butler Wood, chief librarian, has been issued in commemoration of the fiftieth anniversary of the founding of the library.

"A Temple of American History," being William Warner Bishop's address on the occasion of the laying of the corner-stone of the William L. Clements Library at Ann Arbor last March, has been printed.

"Catalogue of Parliamentary Papers 1911-1920" published by P. S. King & Son, Ltd., Westminster, London, S. W. 1, (10s.) is the second decennial supplement to the Catalog of Parliamentary Papers 1801-1900.

With the June issue the *Monthly Bulletin* of the Public Library of the District of Columbia, has suspended publication, owing to lack of funds. New accessions and lists of recommended reading are available to the public as usual in the Sunday number of the *Star*.

A booklet commemorating the presentation of a portrait of Theodore William Noyes, president of the Board of Trustees of the Public Library of the District of Columbia has been published by the Portrait Committee. Besides the addresses made on the occasion of the presentation, the booklet includes a paper by Librarian George F. Bowerman on "The Public Library, a Continuation School" and a "Chronological Outline of the Public Library."

A bibliography of "all the fifteen Mather Authors from Richard (1596-1669) down to Moses Mather (1719-1806)" is in preparation under the editorship of George Parker Winship,

librarian of the Widener Memorial Library, of Cambridge (Mass.) and Thomas J. Holmes, librarian of the William Gwinn Mather Library, 1114 Kirby Building, Cleveland, O. It is proposed to make the bibliography "as complete as it can be made with title pages reproduced by photo-zinc-etching process and with a census of copies made as perfect as possible." To this end the editors invite the co-operation of all—librarians, collectors and others—who can render assistance in any way especially by reporting the location of copies of Mather works for the census.

For teachers, librarians and parents is designed the "Graded List of Books for Children" prepared by the Elementary School Library Committee of the N. E. A. last year and now published by the A. L. A. (235 p., cloth \$1.25) The list had its origin in that planned originally by the Committee under the chairmanship of Effie L. Power who has also given advice in the final revision.

The selection has been made by members of the N. E. A. Elementary School Library Committees for 1919-20 and 1920-21 consisting of Annie S. Cutter, Jasmine Britton, Nina C. Brotherton, Anne Eaton and Orton Lowe.

It is not assumed that the list will take the place of the "Children's Catalog" or the Pittsburgh "Catalogue of Children's Books." It is merely a general list which must be supplemented by text books and titles to meet local school needs. Useful features are the inclusion, in a separate section, of valuable books temporarily out of print, and of an index which is the work of the A. L. A. Editorial Staff.

The PIVOT of CIVILIZATION

By Margaret Sanger

Introduction by H. G. Wells

An important addition to sociology and the study of international politics and the causes of wars. Wells says of Mrs. Sanger in his introduction: "Her breadth of outlook is extraordinary, the quality of her mind truly scientific."

WISDOM OF THE HINDUS

Edited by BRIAN BROWN

A compendium of the religious and philosophical thought of an ancient and exceedingly wise race.

BRENTANO'S Publishers

Booksellers to the world Fifth Ave., New York

The Laureateship

By EDWARD KEMPER BROADUS \$5.00

"His book supersedes all that has been written on the subject before . . . not less entertaining than learned."—*Saturday Review*.

Young Industrial Work

By M. PHILLIPS \$1.50

A study of the educational needs and special characteristics of the young wage earner.

Form in Civilization

By W. R. LETHABY \$1.20

A most interesting collection of essays dealing with the practical as well as aesthetical side of home building, furnishing and decorating.

Ancient Indian Historical Tradition

By F. E. PARGITER \$4.00

The present volume is an examination of Puranic and epic tradition as well as of the Rigveda and Vedic literature. No conclusion is put forward but what is based upon definite statements, and the authorities for every statement are cited.

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small,

Expert and efficient service, the result of years' experience.
The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

Connecticut town of 8000 wants librarian with training. Good opportunity for developing work with children and with foreigners. Address T. W. 13, care of the LIBRARY JOURNAL.

The State Teachers' College, Valley City, N. D., wants an assistant librarian. Must be library school graduate. Salary \$1500 for 11 months. Address C. E. Allen, President.

Wanted: Assistant in circulation department to fill temporary position for ten months beginning September 10th. Salary \$125 monthly. Address Librarian, University of Wyoming, Laramie, Wyoming.

Public library in desirable southern California community wishes cataloging assistant. Moderate salary. Prospect of advancement. Send particulars. T. N. 13.

The State Employment Commission of Maryland will hold examination on July 22, 1922 for the position of Indexer and Cataloger in the State service. Salary \$1200 a year. Application blanks and full information as to the place and hour of examination, requirements, duties, etc., may be secured from the State Employment Commission, 22 Light St., Baltimore, Maryland. Telephone Calvert 2200. Present vacancy is in Department of Legislative Reference, Baltimore, Md.

The United States Civil Service Commission announces an open competitive examination for information assistant (aeronautics). A vacancy under the National Advisory Committee for aeronautics at \$8 a day when actually employed . . . will be filled from this examination Competitors will not be required to report for examination at any place but will be rated: Education 30 weights; experience 40 weights; publications or magazine and newspaper articles by the applicant (to be submitted with application) 30 weights. Application should be properly executed . . and must be filed with the Civil Service Commission, Washington, D. C. on July 25th.

The Chicago Public Library announces three Civil Service examinations to be held before September 1st, the exact dates to be announced later. (a) Catalogers and classifiers. Salary \$1680 to \$1980; and (b) High School librarians' salary \$1680 to \$1980; (c) Children's Librarians, salary \$1680 to \$1980. For the second

examination college graduation and adequate library training or experience or both would be required. In all examinations practical experience and training will count for at least fifty per cent. All examinations are of the non-assembled type, applicants being able to prepare the requisite papers at their homes or under the Civil Service authorities of the nearest city. Those interested are asked to communicate with Carl B. Roden, librarian, Chicago Public Library, without delay.

POSITIONS WANTED

Wanted in New York or vicinity, position in financial or civic library. Several years' experience in public library work. Address B. M. 13, care of the LIBRARY JOURNAL.

A librarian with some training and eight years' experience as head librarian in a public library would like a change. M. A. 13, care of the LIBRARY JOURNAL.

College graduate with one year's training and three years' experience in public library in large city wants position in high school, special, or public library. Address D. E. 13, care of the LIBRARY JOURNAL.

Librarian, graduate, experienced in high school, college, special, and public libraries, wants position as high school librarian on the Pacific Coast. Address H. E. 13, care of the LIBRARY JOURNAL.

College graduate with library training, long experience in library and social service work, prefers charge of school or college library, but will consider other good opportunities. Address T. Z. 13, care of the LIBRARY JOURNAL.

Wanted, by a college woman with library school training, and six years' library experience, work for one month. Salary sufficient to meet expenses acceptable. Address Y. Y. 13, care of the LIBRARY JOURNAL.

Library graduate with over fifteen years' experience in public library work, and with both, reading and speaking knowledge of French, German and Italian, would like position as early as September 1st. Would prefer charge of a public library or head of a department in a large public or College library. Experience largely administrative and reference work. Address C. E. 13, care of the LIBRARY JOURNAL.

OPERA SCORES

A SPECIAL OFFER

The following grand operas, mainly by famous American composers, are important to all interested in the development of contemporary opera, especially opera in America. This offer, pricing the scores practically at cost of manufacture, enables virtually every library to have the collection on its shelves. The offer is for the complete lot only.

QUALITY———SERVICE

A good library binding should first of all be durable, the sewing should be flexible, and only the very best of material should be used in the process of binding, together with excellent workmanship, thus insuring a binding that is attractive and which will stand up until the paper of the volume is worn out, making a second binding unnecessary. That's the way we do it.

BOOKS IN MOTION!

EVERY librarian whose service to the community requires information about books, publicity ideas in getting more books read, book production facts and forecasts and contact with all developments in the world of book distribution needs the PUBLISHERS' WEEKLY—The American Book Trade Journal. Library assistants and workers have found this periodical the one medium of exact fact that by itself will furnish them information about the books of all American publishers.

THE Publishers' Weekly
The American Book Trade Journal

Published by R. R. Bowker Co. at 62 West 45th Street, New York
R. R. Bowker, President and Treasurer; J. A. Holden, Secretary
Entered as second-class matter June 18, 1876, at the post office at New York, N. Y., under the Act of March 3, 1879. Subscription price, Zones 1-5, \$5.00; Zones 6-8, \$3.00; Foreign, \$7.00.

More Book Space—Less Floor Space

GF Allsteel Shelving in Milwaukee
Public Library

Ten to fifteen per cent more books per square foot of floor space can be placed on ALLSTEEL Library Shelving than on old style wooden shelving. Steel requires a smaller cross section of material to support the weight of books. Less space is required for the shelving and more space is available for the actual storage of books.

ALLSTEEL Shelving effects additional economy of storage space because of its quick adaptability to books of different heights. ALLSTEEL Shelving can be adjusted in one-inch steps by the library janitor with ordinary tools and without injury to the shelving.

In addition to its convenience, cleanliness and adaptability, ALLSTEEL Shelving reduces the fire hazard of libraries and thus aids the librarian in the custodianship of priceless volumes.

Write for illustrated literature.

The Washington School for Secretaries

announces the opening of the

School for Business Librarians

Under the personal direction of

Miss Adelaide Hasse

Many business houses and industrial plants are establishing libraries for their own use. Many specially qualified librarians are needed at once to fill these positions.

Such librarians receive a greater salary and have a brighter future than those of general library work.

The Washington School for Secretaries is the only institution in the country at the present time which trains and qualifies people for special library work. The department libraries in Washington offer our students material not to be compared with elsewhere.

Term opens Sept. 15th

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

Chivers Book Binding Company, Inc.,

911-913 Atlantic Avenue,

Brooklyn, N. Y.

Have You Inventoried Your Library Needs For Next Fall?

FIRST—

You will need plenty of our book cards and book pockets for those new books you are buying and for the old ones you are having rebound.

SECOND—

You will need application cards for the NEW readers you are attracting to your Library.

THIRD—

You will need our READERS CARDS for both old and new patrons.

HAVE YOU TRIED OUR WHITE INK FOR LETTERING? Use David's Letterine, or Bissell's Show Card Ink.

YOU WILL NEED AT LEAST ONE OF OUR PASTES
FOR THOSE POCKETS

DEMOCRAT PRINTING COMPANY
MADISON, WISCONSIN

*The American Library Association announces
the publication of the*

GRADED LIST OF BOOKS FOR CHILDREN

Compiled by the Elementary School Committee of the Library Department of the National Education Association.

This is the list from which was selected the tentative ballot of one hundred titles for the voting contest on the best 25 books for a two-foot shelf for a country school. The *Graded list of books for children* is a list for every school and every library. It represents the best judgment of both teachers and librarians. Approximately 850 titles are listed. The titles are arranged in three groups: Section A, grades 1-3; Section B, grades 4-6; Section C, grades 7-9. The entry for each book gives author, title, publisher, price, descriptive note and grades for which the book is suited. A list of sixty reference books (grades 1-9) and a list of valuable books now out of print are also included. There are complete title and subject indexes.

The *Graded list* will help in the selection of books, in using and grading books and in answering questions about books. Invaluable to librarians, teachers and parents.

225 pages, cloth. Price \$1.25

L

Have you investigated L. B. Commercial Standard cards?

Hundreds of libraries have found that L. B. Commercial Standard cards exactly meet certain requirements. Perhaps you have uses for cards less expensive than 100% rag-stock (Library Standard) cards, but which still have the erasive qualities, durability and strength essential for library catalog work.

L. B. Commercial Standard cards are made of 70% rag-

stock. They are carefully cut and inspected. They will give years of service even under harder-than-average working conditions.

And many librarians have found that due to our enormous quantity production—2½ million cards per day—they can buy at unusually attractive prices for such high quality cards. Write to our nearest branch today for testing samples.

The Correlation of Library School and Training Class Instruction*

BY ETHEL R. SAWYER.

Director of the Training Class of the Portland (Ore.) Library Association

AT the outset I should like it to be understood that any plain speaking in which this paper may indulge is the result of no upstart criticism of our library schools. Those thirteen young Atlases on whose harassed shoulders the weight of the entire library profession has come to rest, merit our entire sympathy in a most difficult situation. To borrow another ancient metaphor, librarians in active service are asking the schools to exhibit the dexterity of institutional Colossi and to stand firmly erect, with one foot supported by the raw and utterly inexperienced elementary student of library affairs, while the other foot must rest upon the experienced librarian who wants the professional polish and the highly specialized instruction of the graduate school. The resulting angle is neither graceful nor secure; and my vision shows me only two possible ways out of this difficult situation. Either fit the legs to the required attitude or stop trying to be a Colossus. To speak plainly, I see no firm foundation for our schools unless they can equip themselves to deal with their students in accordance with their needs and qualifications, differentiating between the experienced worker and the recruit; between the undergraduate's general course and the preparation for a doctor's degree—or its library equivalent. Or, they must frankly turn over to other agencies the elementary training in library technique and devote themselves to truly professional education.

Everyone knows at least one disappointed student, who, after years of practical work in a library, went to library school and there spent valuable hours in learning to do in class or in practice-time what she had actually been receiving several years' salary for doing just as

effectively. She had to mark time while a student who had never been in a library before her initial library practice, struggled with such elementary terms as shelf-list and corporate entry, and mastered the fact that Smith, J. M. files before Smith, James. It is true that later on some one else may have had to mark time while she filled up lacunae in her experimental knowledge. But how do these two wrongs make one right? One year is too short a time to allow for much time-marking in the mastery of so vitally taxing a subject as librarianship.

Also one year is much too short a time in which to teach both technique and those literary, social and professional matters which are supposed to distinguish a librarian from a library clerk. What becomes then of all the study of books and people, their reactions one on the other, the peculiar problems which devolve upon the librarian in this age, the enthusiastic and intelligent orientation of the librarian to his community, the clear visioning of the possibilities and the responsibilities of librarianship? Look at any library school curriculum and see what bare bones we are compelled to substitute for all this needed substance, and how pitifully few even those bones are. No one will agree with me more heartily, I am sure, than the library school instructors here present.

The fact being admitted, what is the remedy? There are several remedial possibilities which suggest themselves, and one is contained in the title of this paper: the proper correlation of library school and training class instruction. There are at present no less than ten training classes in the country, giving definitely organized elementary library training varying in time from six to nine months and fitting their students to hold certain positions in their respective libraries higher than mere clerkships. In the Portland Public Library graduates from the

* Paper read at the Detroit meeting of the A. L. A. Professional Training Section.

Training Class go into general assistant's positions at a salary slightly lower than that of a library school graduate; but everything up to first assistantships is open to them. Our graduates have been accepted on equal terms by the Seattle Public Library, and thruout the state of Oregon assistantships and, in the smaller libraries, even librarianships have been offered to them. The University of Washington has accepted graduation from our Class as an equivalent for a certain number of credits towards its Library School course. And yet no other library school, so far as I know, would excuse a student of ours from elementary technical courses. I do not mean to say that a girl going from the Portland Training Class to a library school might not, by judicious representation and after qualifying in some way, be released from certain glaring repetitions of courses; but, in general, her training class year would count for very little except in enabling her to make a better school record. And why should it? What does the course of the Portland Training Class mean to any library school? It may be very good, and again it may be very bad. Who knows?

Now the first correlation needed between library schools and training classes lies just here. Somebody should know! Let the training classes make the library schools acquainted with their work and let the library schools agree on some evaluation of the various training classes so that a student of any training class may know just where in any library school curriculum she can begin. The library schools could also tell the training classes just what portions of elementary library technique, for instance, they would be willing to have taught in training classes and to give credit for in their courses. Such an arrangement would work beneficially in at least two directions. It would release some of the energies of library school instructors for more advanced teaching, and it would furnish an incentive to training classes to maintain a standard of excellence acceptable to the library schools. Even more important to the training classes, it would insure official recognition to their students for work done.

This plan would fit in with the suggestion made by the Library Workers Association that the library schools' summer courses be so arranged as to allow of definite credits being earned towards a complete library school course. Such an arrangement would undoubtedly help the training classes to recruit more desirable students for their classes. Students who are unable to go to library school immediately, often turn away from library work altogether because the training class year would advance

them nowhere up the professional ladder. Their very ambition turns them from us to some better organized profession where their activities will count toward definite advancement.

This correlation of substance suggests another correlation which should be made between library schools and training classes, namely, methods of instruction. I cannot see why a method of teaching certain technical subjects cannot be decided upon by experienced teachers and a sort of manual prepared which could be used as a text-book by all training class and elementary library school classes at least. A manual of teaching elementary cataloging, for instance; not cataloging for any particular library but the general principles underlying all cataloging. We do not teach algebra according to the algebra used in the New York public schools or the schools of California. We teach algebra the fundamental principles, which we can use either in New York or in California. In California they may want more advanced algebra, but that comes later. Here it seems to me an inexcusable amount of time and energy is wasted thruout the profession. Surely we have passed beyond the period of experimentation in certain technical matters and, preserving sufficient flexibility to meet varying conditions, we could agree upon the formulation of certain best practices for typical conditions. Or is the amount of imprint to be put on a catalog card so abstruse and esoteric a matter that each school and each acting cataloger must thru tears and tribulation win to the ideal heaven of the perfect catalog card! I can conceive of a cataloging course which should be concerned chiefly with teaching its students how to use the various tools of cataloging, what sorts of cards should be made for what sorts of libraries, how to vary the normal card to meet various peculiar demands of your public, the difference between fundamentals and the variabilities in cataloging, and such matters as should make our students quick at adaptability rather than grounded in formality. The student of carpentry may not make a perfect kitchen cabinet at first, but he knows the use of all his tools, and doesn't use a plane where a jack-knife would produce better results. Sometimes I think we try to train librarians to make perfect kitchen cabinets at once before we have let them become familiar with their tools. To my mind the training classes can admirably serve to acquaint prospective students with the simpler library tools leaving the fine scroll-work and the high polish and the complexities and refinements of the profession to the library schools.

And here we must bring into play our powers of organization. It is a well-known psycho-

logical fact that certain habits of thinking, certain informational matters can be best assimilated by the student by permitting only the desired impressions to come into the brain at first. Every false impression not only excludes the correct one but has actually to be overcome before the correct one can find lodgment. "No false starts" should be the educational motto here. Expedition is demanded in conveying to the student certain rules and facts and such rules and facts could be standardized and put into concise form for distribution and for future reference at need. Yes, of course, I know there are the "A. L. A. Catalog Rules" and Kroeger's "Guide to Reference Books." But these invaluable tools were not prepared exactly with the needs of the elementary library courses in mind—indeed I doubt whether they were designed primarily for pedagogical use. They are tools of the trade rather than text-books.

Now that is exactly what I want to emphasize. We must go at our library teaching pedagogically. Why should we neglect all that other educational experts have discovered and placed ready to our hand? For, after all, we are, or should be, primarily teachers, we library school and training class specialists in the library schools; teachers, and as special as we *can* be, in the training classes. We must know *how* to teach—methods and psychology—as well as *what* we are teaching. And that means, or should mean, a definite organization for educational work within our profession—with the library schools at the head, and the training classes, summer classes, apprentice classes and eventually perhaps extension classes and correspondence classes—tho these latter would be a difficult problem to meet. The little old red school house days of library education are over and we must function along with state universities and professional colleges.

You will perhaps observe that I am not making the customary distinction between the field of library school and training class instruction, namely, that a library school gives a study of comparative library methods and a training class instructs only in the methods of one library. It is true that a library school should give a wider survey of the entire field of library procedure, but I find that it is not necessary to restrict the training class student's vision to so narrow a field. In fact comparison of her library's methods with those of other libraries makes for a more intelligent administration of local practices. I prefer to correlate the library school and the training class as elementary library instruction and advanced education. There has sprung up a third division in library training agencies owing to the development of

instruction in certain of the larger training classes, and that is the apprentice class proper. I think the distinction should be clearly drawn here between apprentice classes and training classes. The former group *now* is the training group whose interests are entirely local, and their training period rarely outruns three or four months. From the ranks of the apprentices should come our clerks and clerical attendants who are not eligible for real professional library services without further training.

Now and then I feel that we librarians are engaged in trying to lift ourselves by our own bootstraps. We urge more training and education in our members' we cry for recruits to librarianship, we deplore the possibility of the library clerk usurping the functions of true professional services; but we very slowly and inadequately prepare facilities for the cultivation of that higher type of librarianship and the obtaining of advanced professional equipment. Discouragement and slackened fibre attend upon disappointed ambition. I would not appear before you in the guise of a pessimistic gloom-bringer, but I do not see many indications of discouragement among some of the sincerest members of our profession. I believe that never before has library work had such an opportunity for development—but we shall have to bend every energy intelligently to the task of grasping that opportunity.

The library schools—with their present equipment—cannot do more than they are doing. But it is possible that with the cooperation of the training classes they might decide to do slightly different things, and things more in accord with their high professional status. I believe dissatisfaction or discouragement with requirements for admission does not operate so disastrously as dissatisfaction with opportunities after admission—and the results to the profession are incomparably preferable in the former case. At one end or the other the pressure must be severe and it seems to me that in the library schools the anguish must come at the lower end. Good training classes established and recognized thruout the country would shortly serve as preparatory schools and trying-out laboratories for the library schools, turning over to them an ever improving grade of students fit for professional work.

I said "with their present equipment." Of course the present equipment of most library schools is ridiculously inadequate. Propose to any other technical or professional school a budget of ten to fifteen thousand dollars a year for total administration and note the pitying smile you will receive. And yet how many of our library schools are financing themselves on

an even smaller budget! Now it is a truism that you cannot get something for nothing. Someone must pay. And it has usually been the school faculty out of whose over-worked blood and nerves the deficit has been wrung, or the student body, who have not received the quality of instruction or the breadth of training to which they were entitled. Professionalism cannot indefinitely thrive on a permanent budgetary deficit. Library school appropriations should be considerably increased to enable specialists and educators to be retained on their faculties, and to raise library education to a plane with other specialized training. So long as value is directly associated with the salary status it is not fitting that library school instructors should rank with the stenographers of an institution; neither is it probable that desirable teachers, except those few individuals who can afford to be so noble, will be found willing to undertake the taxing duties of teaching at a salary less than that of librarians in comparatively recent service.

This is, fortunately, not a paper on library school budgets. So I am not obliged to do more than exhort in general terms. However, if this were such a paper, I think I should elaborate on the text, "Ask and ye shall receive." I realize that "the petitioned" in the text was not a board of city or county fathers or anything of that ilk, but I like to believe that most of these old texts that are any good at all have rather a wide general applicability even to seemingly most irrelevant cases. And the outcome is so definitely stated as a result of the asking, that sometimes I wonder whether the library's notoriously small responses to financial prayers may not be due to faulty petitioning. I believe "to ask" is an active verb, definite, in the imperative mode, and we are too inclined to passive, indefinite hortatoriness.

While waiting for an answer to prayer, however, we might find partial relief for our financial stringency in a large use of co-operation. Would it not be feasible to supplement the regular courses in our schools with some sort of peripatetic lectureships, drawing on the resources of the entire country just as now all library schools draw for outside lectures on distinguished librarians in the vicinity?

Of course the obvious objection to that is the expense of such lecturers and their traveling schedules. There are desirable times for such irruptions into the orderly class routine—and less desirable times. Adjustments would have to be made. I refuse to believe, however, that a profession which has evolved the modern American library system—one of the most successful co-operative service organizations in existence today—cannot find a way to achieve co-

operative educational aims of at least as national a character as education in general has achieved. If not by this plan then why not try "exchange professorships" of three, or six, or nine months, which would assist in circulation of library ideas thruout the profession?

The important point is that we shall go at this whole matter of library education from a national standpoint, deciding upon what should constitute professional education in 1922—as distinct from 1890—what part of that education the library schools must give and what should be delegated to pre-professional or elementary training classes. Perhaps the profession as a whole would be most benefited by the encouragement of training classes widely scattered thruout the country giving three or six or nine months courses planned and accredited by the A. L. A. Professional Training Section, with the definite purpose of preparing suitable students for library schools later. Whatever the plan it should be something that has the entire library profession behind it, not a mere matter of the handful of library schools and training classes. It is the most vital matter before the library body today and demands the attention of everyone, just as the whole question of education is today demanding large national planning backed by the intelligent co-operation of the entire nation.

A FEW copies of the following reprints from the LIBRARY JOURNAL may be had from this office for the cost of postage:

Popular Names of Statutes, by Henry J. Harris, chief of the Documents Division, Library of Congress (L. J. March 1-15; April 1, 1921).

The Transportation Tax, a list of references compiled by the Bureau of Economics Library, Washington, D. C. (L. J. September 15, 1921).

What Is a Special Library? by Carlos C. Houghton (L. J. May 1st, 1921).

Libraries of Philadelphia and its environs a list compiled by the Special Libraries Council of Philadelphia and Vicinity (L. J. February 15, 1921).

Making Americans, a tentative annotated list of books compiled by John Foster Carr, director of Immigrant Publication Society (L. J. March 1, 1920).

High School Library Book Selection, a study made by Earle R. Glenn of the Lincoln School of Teachers College, New York (L. J. March 15, April 1, 1921).

Books for Workers by Elwood H. McClelland, technology librarian, Carnegie Library of Pittsburgh (L. J. December, 1919.)

The Library Assistants Association (England) has just published a list of English and American sequel stories, compiled by Thomas Aldred, chief librarian of the Hackney Public Libraries. The list, which contains over 5,000 entries, costs six shillings net.

Selecting Religious Books for a Public Library*

By FRANK GRANT LEWIS

Librarian of the Crozer Theological Seminary, Chester, Pa.

A GOOD public library is for all of the people of its community. The library should serve the community from all points of view. These principles require no argument to justify them.

Directly or indirectly all the people of the community are interested in religion. Even those who may be opposed to the churches thereby indicate their indirect interest in religious topics. An enterprising library recognizes these facts and attempts to respond to the varying religious views of all classes. To do less than this is to assume a sectarian position and become a partisan in the community.

A failure to recognize these basic items explains why public libraries are unsatisfactory from the point of view of religion and unused by a portion of the community which otherwise would be among the most interested patrons of the library service. As I have occasion to visit public libraries, especially those of moderate extent, I am impressed both with the limited number of books on religion and the antiquated titles of the books that are available. This is particularly unfortunate and even painful in a period which reveals new interest in religious topics and accordingly is open to the educational service which the public library renders if it responds at all adequately to the people within its reach. With the hope of aiding in this direction, I have consented to discuss the topic now before us.

For the purpose thus in hand, I shall assume that a public library is being organized. With this assumption it is possible to indicate somewhat definitely the place of religious literature in the library as a whole and some of the things which should be thoughtfully taken into account in the process of organization. For libraries already in operation the outline I offer may serve, according to its value, as a standard by which to estimate what the library now is and the changes that may be advisable.

In planning a public library one of the questions to be asked is, What part does religion occupy in life as a whole? Is it a fifth of life? Is it a seventh? Is it a tenth? Is it at least as much as a twentieth? At any rate it has some place, some fairly measurable part in the life of the community; and the library income for books and periodicals should have a portion of

it appropriated accordingly. Without such a thoughtfully considered designation for religious literature the religious needs of the community are neglected and the natural outcome is that which one observes in the large proportion of communities at the present time. No matter how small the income of a library is, a definite proportion should be carefully set aside for religious material. Indeed the smaller the amount of income the more necessary such a plan becomes, if the religious elements of the community life are to be regarded.

With these practical principles as a basis it is now in place for me to indicate concretely some of the literature which should be found in every public library.

The religious literature of first importance is the collection of sacred books. For Christianity there must be not only a good reference edition of the Authorized Version of the Bible but a similar copy of the American Standard Edition, of the Douay (Catholic) Bible, and the modern versions such as the Shorter Bible and the New Testament translations by Moffatt and Weymouth. Likewise there must be a copy of the excellent recent translation of the Jewish Bible, with which may well be placed a copy of the Hebrew, for it has been found that those who do not read Hebrew are interested and profited by looking at the arrangement of the books in Hebrew. Equally important is a copy of the translation of the Koran (Moslem Bible) and perhaps of the Arabic from which it is translated. Similarly, there should be a translation of some at least of the sacred books of India, of China, and Japan, all of which are now available at relatively low cost and are essential if the community is to have the privilege of educating itself religiously.

If, however, these books are to serve their largest use they must be accompanied by modern works which explain the origin and history of the sacred books themselves, because, indispensable as are the sacred books, even when well translated they at once stimulate inquiry for material which the books themselves do not furnish. In the case of the Bible, there should be such a companion as the one volume Dictionary of the Bible edited by James Hastings. For other religions the volume published in 1921 by Maurice A. Canney, entitled "An Encyclopedia of Religion," and the volume entitled "A Dic-

* Paper read at the Detroit Round Table of Libraries of Religion and Theology.

toinary of Religion and Ethics," edited by Shailer Mathews and Gerald B. Smith, also published in 1921, are timely and practical. These may serve as examples for selecting such material according to the library possibilities.

There must be also the best of recent discussions of religion. Every library should have a copy, for example, of "The Reconstruction of Religion" by Charles A. Elwood and of "The Fundamentals of Christianity" (Macmillan, 1922), by Henry C. Vedder. The enterprising librarian will be ready to order such books as soon as they appear, on the same principle that he orders the best new fiction by well known writers.

For the purposes of this discussion, books must include periodicals and other serials. Such publications are of prime importance in religion as in other aspects of literature. As the annual list of periodicals is chosen, some which deal directly with religious life and thought should be included. In this selection the varied points of view in religion must be recognized, and there should be care to show generosity for the so-called modern or liberal points of view; otherwise the library will fail in meeting one of its large opportunities. To be specific, each library should subscribe for one or more such periodicals as the *Journal of Religion*, the *Hibbert Journal*, the *Expository Times*, the *Christian Register*, the *Christian Century*, and the *Christian Register*. There should be also a good periodical representing each of the leading churches in the United States and especially each church represented in the community, including such religious newspapers as *The Baptist*, *The Congregationalist*, *The Continent*, and *The Christian Advocate*. Most of these will readily come as gifts if the need is brought to the attention of the leaders in the local churches. Of similar importance is a copy of the Year Book of each of the churches, without which the library cannot answer the questions which naturally reach it if the community becomes aware that the public library is a place for religious information as well as a source of current fiction.

I am not unaware how religious bias in a community makes difficult the carrying out of such a plan as I have proposed. It should be remembered, however, that one of the chief reasons why the plan is difficult in practice arises from the failure of libraries so largely heretofore to undertake any such reasonable plan as I am sketching, and then quietly introduce and develop it. We are the heirs of bad ages, not only of our fathers and mothers but sometimes of ourselves. Moreover, the longer present conditions are allowed to remain the more difficult intelligent action will be for the

future. In this matter as in others there is no time like the present for improvement.

Incidentally the place at which to begin is the librarian. The bad course of events up to today has naturally affected librarians as well as others, and the outcome finds many a librarian unconsciously subject to the religious prejudices which so largely engross the community as a whole.

The first step in progress, therefore, in many instances at least is a deliberate decision on the part of the librarian and the trustees of the library to put aside their personal religious sectarianism when they enter the library counsels and attempt to meet the religious needs of the community altogether. A librarian must be ready to welcome to the library a religious book recognized as valuable to others even though he himself would shrink from reading it.

I shall be happily surprised if the proposals I have offered do not meet at once the objection that literature of the type I have indicated will not be used sufficiently to warrant the outlay. I reply that of course such books will not be used if the librarian takes the position that they will not be read. There is little chance that the reader will get to a book if the librarian stands in the way. If, however, these books are not only placed in the library but given due publicity, put on a "new book shelf" in an attractive position, their arrival in the library bulletined as is the latest fiction, and a good reading notice placed in the local newspapers where it will catch the attention of the people who would like to go to the library for such material but now find on the library shelves nothing which satisfies their eager minds, the librarian will have opportunity to awake to a new day as regards the significance of religious books.

To Members of the A. L. A.

THE Executive Board of the A. L. A., on recommendation of the Membership Committee invites comment on the present basis of membership dues.

The Committee asks "whether the rates should be raised to permit every member to receive the *Hand-book* and *Proceedings*," and the committee feels that the hand-book should go to all members regardless of rates.

Question is also raised as to whether a special rate on the *Booklist* could be made to libraries which are institutional members and it has been suggested that this class of members be allowed to choose between the *Proceedings* and the *Booklist*. Suggestions from members will receive careful consideration.

CARL H. MILAM

A Union Index of Private Libraries

TO the library attempting to serve a large group of scientific and technical specialists in an industrial community, and handicapped by lack of an adequate book collection, the plan being worked out in the Technical Department of the Indianapolis Public Library may prove of interest.

We are building up here what is locally known as the "Union Index," an index, or simple card catalog, of the important private scientific and technical libraries in the city. The idea grew out of our need for wider resources along technical lines. Knowing of several strong private libraries in the city and supposing the existence of many others, we planned to make a union catalog of these libraries, to be kept in the public library.

The enterprise would of course have been impossible without the interest and co-operation of organizations among the men whom we wished to reach—the Sciencetech Club, a local organization made up of representatives from eight or nine strong technical societies in the city, and the local section of the American Association of Engineers. Both groups are primarily interested in civic progress and have from the beginning been warmly interested in the organization of the Library's Technical Department. Fortunately the same man was secretary of both societies at the time the Union Index idea was launched. On him and his special committee fell most of the labor of communicating the idea to the two societies, and of following it up until it actually resulted in lists from about two dozen strong private libraries.

These lists which were submitted on uniform sheets of paper providing space for author, title, publisher and date, were turned over to the library, and the items transferred to cards. The entries are very simple, an author and a subject card being made for each book.

Behind the idea of the Index is the hope of establishing a system of inter-loans among the technical men of the city. Many individuals will, of course, not lend their books promiscuously, but some will, and the library will serve as a go-between.

An important feature of the Union Index, from the standpoint of the Library, at least, which is still weak along this line, is the location of proceedings and files of technical magazines.

As the enterprise proves its value the index will of course grow. Other important libraries not yet listed will be reached and a central clearing-house of even greater value will be provided. One difficulty will be in keeping the

index up-to-date, but this will be less difficult than the securing of original lists. It will also be less important, for the library is now equipped with a special Technical Department which will supply up-to-date material. The Union Index will then serve primarily to locate older books available in the city.

Perhaps the greatest value of the Index is an indirect one, which lies in the arousing and cementing of unusual interest in the Technical Department. A personal feeling of responsibility for the growth of the Department is met with constantly among these men who, conscious of gaps in the library collection, are anxious to see them filled. Several files of society proceedings and sets of bound magazines have already been given to the Library as a result of this interest.

The Detroit Conference II*

National Association of State Libraries

THE National Association of State Libraries brought together from thirty-six states of the Union an unusual number of members for its twenty-fifth annual meeting. Twenty-five Governors from the various states had appointed delegates to the conference and many state librarians were in attendance for the first time. John M. Hitt, state librarian of Washington, and president of the Association, made a brief presidential address and introduced Hon. John B. Corliss of Detroit, who extended the courtesy of the city to the visiting librarians.

Mr. Hitt described at some length the application of a new patented process for the care of official papers. The process consists of a photographing set and reproduction apparatus with a screen. By this method a book of five hundred pages is reduced in a few hours to a film the size of a spool of thread.

Milton J. Ferguson, state librarian of California, discussed library administration, state and county, and Clarence B. Lester, Secretary of the Free Library Commission of Wisconsin, gave an address upon state library service to rural communities. The final paper of the morning, by Demarchus C. Brown of Indiana on "The Future of our Library Association," is to be found in our July number.

On Wednesday evening a joint session was held in conjunction with the American Association of Law Libraries. Details of this conference will be found in the report of the latter association. The results of a questionnaire on a survey of state libraries were presented by George S. Godard, of Connecticut, and the report of the Joint Committee on Closer Relations between the State Librarians and the Law Librarians was presented on behalf of the two committees. The committee reported that they had conducted a mail ballot and the voting was unfavorable to a merger of the two associations.

An additional session was held on Friday morning at which a round table on indexing of legislation was conducted by Gertrude E. Woodward. During the period of the conference two legislative reference round tables were conducted by Mr. Lester. At these conferences "Methods of Handling Legislative Bills" was discussed by John P. Dullard of New Jersey;

"Specialization of Research," by Herbert O. Brigham of Rhode Island; "Student Research Workers" by Miss Sherwood of Rhode Island; and "The Exchange of Librarians" by Miss Hochstein of Wisconsin.

At a business session it was voted that a resolution of congratulation be sent to J. M. Riggs, state librarian of Alabama since 1875. Thanks were offered to the Superintendent of Documents for his kindness in extending the selection privilege to depository libraries. The thanks of the conference were also extended to the University of Michigan, to the Hotel Tuller and to the J. L. Hudson Co. for special courtesies.

A notable feature of the conference was a reception and dinner given in honor of Mrs. Mary C. Spencer, for nearly thirty years state librarian of Michigan. William E. Henry, formerly State Librarian of Indiana, acted as toastmaster. The A. L. A. was represented by Clement W. Andrews, the American Association of Law Libraries by Frederick C. Hicks, the League of Library Commissions by Irving R. Bundy, and the Michigan Library Association by Jessie C. Chase.

Mrs. Spencer in response extended her heartfelt thanks for the courtesies extended to her and spoke briefly of the first meeting of the Association in Washington in 1898. George S. Godard of Connecticut, Johnson Brigham of Iowa and C. B. Galbreath, formerly of Ohio, all members of long standing, were among the other speakers.

The general discussion thruout the conference showed the need of permanent headquarters and the necessity of bringing the members together early in the week.

The following officers were elected: President, Mrs. Jessie P. Weber; vice-presidents, Mrs. Virginia G. Moody, and Herbert S. Hirshberg; secretary-treasurer, Herbert O. Brigham.

HERBERT O. BRIGHAM, *Secretary.*

American Association of Law Libraries

THE American Association of Law Libraries held its seventeenth annual meeting at the Hotel Statler, Detroit, from June 26th to July first. Vice-President Andrew H. Mette, of the Library Company of the Baltimore Bar of Baltimore, presided at the first two meetings of the Association; President Gilson G. Glasier, state librarian of Wisconsin over the final

* An outline of the general sessions of the A. L. A. Conference were given in our July number, p. 605-614. Here we give reports from other national library associations and from sections of the A. L. A. meeting at Detroit. Summer meetings of other organizations will be found on p. 670-676.

session. The presiding officer at the joint session with the National Association of State Libraries was President John M. Hitt of that Association.

The papers presented at the several meetings included a communication from President Gilson G. Glasier, printed in the LIBRARY JOURNAL for July; "Survey of State Libraries," by George S. Godard, state librarian, Hartford, Conn. "Problems of a Law Book Writer," by John R. Rood of the Detroit Bar, and a "History of Michigan Law Libraries," by Olive C. Lathrop, librarian, Detroit Bar Library.

"The Law Library as a Business Enterprise" was discussed on Tuesday, by the chairman, W. H. Alexander, assistant librarian of the Bar Association of New York City, George S. Godard of the Connecticut State Library, who read a paper on "The Connecticut State Library (a) as a Supreme Court law library, (b) as a legislative reference library, and discussed continuations by exchange, gift, and purchase, with forms of record; and "Law School Libraries," by Blanche E. Harroun, assistant law librarian of the University of Michigan. "Indexing Legislation" was considered at Wednesday's Round Table.

Gertrude E. Woodward introduced the subject followed by "The New York Index Legislation" by John T. Fitzpatrick, of the New York State Law Library, "Indexing and Classifying Legislation in the Pennsylvania Legislative Reference Bureau," by John H. Fertig, assistant director; and "Work of the Legislative Bureau in Analysing Legislation," by Frederick C. Hicks, Law Librarian of Columbia University.

At a special program at the second session biographical sketches of law librarians were read as follows: William J. C. Berry, by A. S. McDaniel, assistant librarian, Association of the Bar, New York City; Charles Carroll Soule, by Frank E. Chipman of Boston; Arba N. Crane, by Gamble Jordan, librarian, St. Louis Law Library Association; John William Wallace, by Luther E. Hewitt, librarian, Philadelphia Law Association; J. G. Marvin, by Margaret C. Klingelsmith, librarian, Biddle Law Library, Philadelphia; Stephen B. Griswold, by John T. Fitzpatrick; William George Eakins, by Charles Elliott, Law Society of Upper Canada, Toronto; Edward Brinley Adams, by Robert B. Anderson, assistant librarian, Harvard Law Library.

"Causes Célèbres," short sketches of unique cases within the personal knowledge of members, chosen for their human legal interests and the universality of their appeal occupied the final session. Among them were the Saco-Vanzetti case of Massachusetts, the Limberger case of Wisconsin, and the McCannon case of Ohio.

The report of the Committee on Checklist of

Bar Association Reports, read by A. J. Small, showed the checklist nearly ready for publication.

The Committee on *Index to Legal Periodicals*, reported a considerable gain in number of subscriptions. It was voted that the Committee be continued as now constituted. F. O. Poole, Chairman, George S. Godard, and Gertrude E. Woodward. It was further voted that if any condition should arise making necessary any change of administration, that, with the consent of the Executive Committee, the Committee on the *Index* have power to act. A special committee was appointed consisting of George S. Godard, John P. Dullard, F. O. Poole, E. A. Feazel and E. H. Redstone, to consider the financing of the *Index* and *Journal*.

Reports on National Legislative Information Service, on Affiliation of the American Association of Law Libraries with the American Bar Association, and on Closer Affiliation with the National Association of State Libraries were read and accepted. A vote of thanks was passed to the American Bar Association for its co-operation during the past year and the Committee on the *Index to Legal Periodicals* was requested to continue negotiations with the American Bar Association. It was also voted that the matter of closer affiliation with the National Association of State Libraries be referred to the Executive Committee instead of to the former committee.

A proposition from the publishers of the Standard Directory Company to print in their legal directory, without cost to the Association, a list of law libraries in the United States and Canada, was discussed, and a committee will be appointed to compile such a list.

Officers of the Association for the ensuing year are: President, Andrew H. Mettee; vice-presidents, Edwin Gholson, librarian of the Cincinnati, (O.) Law Library Association, and Mrs. W. F. Marshall, state librarian, Jackson, Miss.; secretary, Mary S. Foote, librarian of the New Haven, (Conn.) County Bar Library; treasurer, Anna M. Ryan, assistant librarian, Law Library of the Eighth Judicial District, Buffalo, N. Y.

MARY S. FOOTE, *Secretary*.

League of Library Commissions

TWENTY-SIX states were represented by the members of library commissions, state libraries, and their staffs at the meeting of the League of Library Commissions held in connection with the A. L. A. at Detroit, June 27-28.

Anna G. Hall applied the story of "Aunt Minerva's New Hat" to the county library system. With the aid of a map of a county, she indicated

the location of several small town libraries. Each town feared that the library would lose its identity if it became part of a county library. Miss Hall outlined the work of each library, showing that each could take on the additional extension work and yet preserve its identity.

"The Organization and Duties of Library Trustees," was discussed by Edmund L. Craig, trustee of the Evansville, Ind., Public Library, in a paper covering every phase of this large subject.

John A. Lowe's paper on "Hints for the Village Library Building Committee," will appear in an early number of the LIBRARY JOURNAL.

Mary Bell Palmer, chairman of the Publications Committee, reported the publication of the new Handbook and a new form for daily and annual traveling library statistics blanks for use of commissions.

It was decided to refer to the Publications Committee the request of the Special Library Association to co-operate with it in publishing a new directory.

Harriet A. Wood, speaking on "School Libraries," said that the League of Library Commissions is essentially interested in state supervision of school libraries, whether that office was under the Public Instruction Department or under the Library Commission. On motion of Miss Palmer the president was requested to appoint a committee to confer with Miss Wood and report at the next meeting.

FUNCTIONS AND STATUS OF THE COMMISSION

Potential functions and status of a Library Commission formed the general subject of the second session, presided over by Elizabeth Claypool Earl. Mrs. Dwight Peterson spoke on the first phase, "Responsibilities Assumed With Honor." Mrs. Peterson, who has recently been appointed to the Ohio Board, said that she believes that libraries should be kept out of politics.

The question was raised as to the advisability of the *ex-officio* members of the Commission. In some states these are found to be too busy to give much time to the Commission, altho interested in the work. In other states the *ex-officio* members help to keep down jealousy and prevent duplication of work. The question as to the number of meetings the Commission holds each year showed that in Kentucky the Commission meets twice a year; in Massachusetts once a month; in Ohio the new board has met four times since January; in Texas and Oklahoma once a year; and in North Dakota, the Board of Administration, which controls the work of the Commission, is in session all the time.

Henry E. Dunnack, Maine State Librarian, read an interesting paper entitled "Is the Proper Recognition of Library Commission Work Given

in Your State?" Mr. Dunnack is an appointed officer, with entire control for the state library and all of its bureaus, there being no board or commission. These facts influenced his paper.

Hiller C. Wellman, of the Massachusetts Commission, spoke on the various advantages of control by one official and on control by a board of at least part laymen. He thought by the latter plan more interest could be created in the community. Herbert S. Hirshberg outlined the new organization of the Ohio State Library, where the board consists of the Director of Education, chairman, and four members appointed by the Governor for a term of eight years. The Board appoints the State Librarian. Its other powers are advisory only. The efficiency of the department rests with the librarian, who appoints the rest of the executive staff.

Malcolm Wyer opened the discussion on "Greater Supervisory Power." He said that it has been the policy in establishing library commission work to place the commission in an advisory relation to the libraries and library interests of the state. The purpose of this is not to develop a centralized library system with the commission at its head but to provide some agency from which communities interested in developing a library could secure advice and assistance, by which struggling libraries could be organized and put on their feet and by which some help in the form of traveling libraries could be furnished to communities not yet able to support a library.

In cases where direct aid has been given, such as money for books, control of the selection has been given. In a few states the commission has been given full control of the administration of institution libraries. In recent years there has been a tendency to extend the influence of the commissions over school libraries and in such instances there has often been a departure from the early tendency of maintaining the advisory relation. Authority has been given to fix standards, determine the relationship between public and school libraries, select books and specify qualifications of school librarians, and in some states, direct supervision over the administration of county libraries is given to the Commission. Thus in many branches of the work the supervisory authority is exercised in conjunction with an advisory relation.

In most states where a commission has been working for twenty years the library idea is fairly well established and few towns able to maintain a good public library are without one. The chief problem now is how to raise standards, and how to make the library more effective agency for the betterment of life in the community. Mr. Wyer believes that the desired results

would be attained more quickly and effectively if the commission could be given greater supervisory powers over certain phases of the administration of small libraries, the appointment of the librarian, and the selection of books.

It was generally believed by those present that if the active interest of more library trustees could be secured, library work would develop faster. The League therefore passed the resolution that it would make every effort to organize library trustees in every state. This resolution is to be sent to every state library association and to all library commissions.

ANNA MAY PRICE, *Secretary*.

Special Libraries Association

THE Thirteenth Annual Convention of the Special Libraries Association was opened by a luncheon in the auditorium of the Detroit Board of Commerce. Approximately three hundred librarians sat down at group tables, each table being presided over by a member of the Local Acquaintance Committee of which Christine H. Haller, was chairman.

Librarian Adam Strohm in extending cordial greetings said that in his belief special librarians have a peculiar opportunity of presenting to business men the possibilities of library work and to spread an understanding of the influence of libraries generally. Harvey J. Campbell, Secretary of the Detroit Board of Commerce, extended welcome on his own behalf and for Harold H. Emmons, president of the Board. Mr. Campbell proved himself a talented and humorous speaker and told many interesting anecdotes showing the value and importance of fact information in business as supplied by the special librarian.

GENERAL SESSIONS

Following came the first general session, called to order by President Dorsey W. Hyde. John A. Russell, editor of the *Michigan Manufacturer*, member of the Detroit library board, and former President of the Detroit Board of Commerce, presented a most interesting address stressing the practical value of special library work, with particular reference to foreign trade extension, and describing plans for the development of a special library along these lines at the University of Detroit.

At the second general meeting, Ward Gavett, of R. E. Polk and Company, speaking on the importance of library service in solving problems of distribution of commodities, discussed city directories and told of the considerable number of directory libraries now being developed in a large number of American cities, and pointed out that modern business firms are analyzing the market for their goods and that

such investigations can be made increasingly effective by properly directed library service. John M. Gries, Chief of the Division of Building and Housing of the U. S. Department of Commerce, paid tribute to the increasing effectiveness of library service in America, and described the work of the Department of Commerce and, more specifically, the work of his division, to which the special library can be of real assistance in helping to locate facts and in acting as local distributors of the Department's data and information. A. E. White, director of Engineering Research of the University of Michigan, in a paper on "Library and Industry," read by Edith Thomas, stated that the field of industrial library service had hardly been scratched and that there is need for "selling" high-grade technical library service to industrial establishments.

The third general session opened with an illustrated address, by Mr. Frances E. Cady, research manager of the National Lamp Works of the General Electric Company, at Cleveland, on "Research and the Technical Library" which will be printed in full in *Special Libraries*. Following, Lent D. Upson, director of the Detroit Bureau of Government Research, discussed the need for collecting information about the government and educating the public in civic affairs, pointing out that there are many ways in which librarians can help to bring facts on government before the public.

GROUP MEETINGS

"The personality of the Special Librarian was the subject of the first meeting, presided over by Frances S. Cox who made an admirable presentation of the various aspects of personality in library service. Elsie L. Baechtold stated the outstanding qualifications of the special librarian as courage, stick-to-itiveness, anticipation, vision, tact, intuition and sympathy. Margaret Reynolds emphasized the importance of adaptability and enthusiasm. O. Louis Evans told a number of anecdotes showing the importance of the personal element. H. H. B. Meyer stressed the three c's—character, culture, and clarity (of expression); and George Deveneau explained certain tests of special library work.

Carlos C. Houghton acted as chairman of the second group meeting to discuss the training of the special librarian. Claribel R. Barnett's paper which opened the meeting will be published in *Special Libraries*. Ernest J. Reece told of the work of the library schools stating that the needs of the special librarian are now being recognized in some way by most schools. D. Ashley Hooker read a paper on what a special librarian expects of those in his library and how employees should be trained to meet these requirements. Andrew Keogh aroused consider-

able discussion on the definition of special library work, when, referring to the special collections at Yale University, he asked whether these might not be regarded as special libraries. Rebecca B. Rankin discussed the tendency in public libraries towards well-defined special collections with central administration.

The topic of the third group meeting was "The Objective of the Special Librarian." Chairman Maud D. Carabin outlined the general field to be covered. Mary B. Day emphasized three essential principles of every trained library worker: intensive study, careful planning, and rapid execution. Floyd J. Miller, director of the Reference Department of the *Detroit News* told of the objective in service to a newspaper. Josephine B. Carson said that the special librarian should aim to become an industrial or business engineer. Ethel A. Shields emphasized the importance of good methods in the realization of the special librarian's objective. The objective is "to set knowledge to work" said George A. Deveneau who stressed the importance of knowing the policies of one's firm.

Following came reports from local associations: Jean E. Graffen, presenting a statement on the work in Philadelphia; Harriet E. Howe, the report on that of the Boston Association; Alta B. Claffin, of the Cleveland Club; and Mary R. Bean, of the recently organized Special Libraries Association of Southern California.

BUSINESS MEETINGS

The annual business meeting was held on June 27th by the President whose address, "The Economic Value of Library Service," was printed in the July LIBRARY JOURNAL. Reports of progress were then received: O. Louise Evans on gains in membership, the total now being about eight hundred; Alfred B. Lindsay, on a treasury balance in excess of \$1000; Margaret Reynolds, on an exceptional volume of Association publicity, the publicity on the "Special Libraries Directory" alone being more than 330 column-inches; Adelaide R. Hasse, editor on *Special Libraries*; Ruth G. Nichols, on the work of the Committee on Methods; the President, in the absence of Chairman Estelle L. Liebmann, on the untiring efforts of the Employment Committee; and on the Membership Committee, temporarily without a Chairman; Lewis A. Armistead on the work of the Committee on Trade Catalogs; Herbert I. Brigham on that of the Committee on Commercial Information Services, and the President in the absence of Chairman H. H. B. Meyer, on the interesting activities of the Committee on Co-operation with the Department of Commerce, which culminated in the publication of the Committee's report under the title "Commercial Libraries and the Department of Commerce."

At the second business meeting, held on Friday afternoon, announcements and routine reports were heard and then the special committee on certification consisting of D. N. Handy, Rebecca B. Rankin and Catherine Van Dyne, appointed at the first business meeting, presented the following report:

Your Committee is of the opinion that the subject of Certification of librarians as proposed in the A. L. A. has not sufficiently developed to warrant specific recommendations at this time.

It believes, however, that the subject is of great importance and deserving of the serious study of each of our members. To the end that this study may have for its guidance the opinion of each of our members, your Committee recommends that there be printed in an early number of *Special Libraries* a summary and bibliography of certification with a request for an expression of opinion of members on which the special libraries attitude might be based.

Resolutions adopted were:

Appreciation of the expanding scope, definite achievements and increasing prestige which have marked the Association and its activities under the administration of President Hyde and Secretary O. Louise Evans, which has just come to a close; of Miss Hasse's devoted labors in connection with *Special Libraries*; of Christine H. Haller and the local Acquaintance Committee of which she was chairman, for courtesies extended during the convention; and deep regret for the loss in death of Eunice R. Oberly, librarian of the Bureau of Plant Industry, U. S. Department of Agriculture, and the assurance that her scholarship, enthusiasm and fellowship will ever be remembered by Association.

Officers were then elected for the coming year as follows:

Rebecca B. Rankin, president; Lewis A. Armistead, first vice-president; Alta B. Claffin, second vice-president; Alfred B. Lindsay, secretary-treasurer; Nelson W. McCombs, assistant secretary-treasurer; Bertha V. Hartzell and Louise Keller, Executive Board.

O. LOUISE EVANS, *Secretary*.

Bibliographical Society of America

THE Bibliographical Society of America met at Ann Arbor in the library of the University of Michigan on the afternoon of June 29, with an attendance of eighty. The program was designed to give a survey of the material for American history in libraries of the Great Lakes region, running from Buffalo on the east to Madison on the west, and taking in Detroit, Bay City, and Chicago by the way.

The paper by Augustus H. Shearer, secretary of the Bibliographical Society and librarian of the Grosvenor Library, read by Mr. Faxon, described the material for American history in the Buffalo libraries, public and private, especially that of the Buffalo Historical Society.

Clarence M. Burton, of Detroit, described informally his own collection on the history of Detroit and the Northwest, which now forms the Burton Historical Collection of the Detroit Public Library and which he has been over forty years in acquiring.

William L. Clements, of Bay City, described briefly his collection of Americana, which is shortly to become the William L. Clements Library of the University of Michigan, to be housed in a beautiful new building now in process of erection. Mr. Clements confined himself to describing those portions of his library which deal with the history of the Great Lakes, ignoring the much greater amount of material dealing with the Discovery Period, the Era of Colonization, and the American Revolution.

George B. Utley presented a synopsis of a paper covering the sources for American History in the libraries of Chicago, and Clarence B. Lester, of Madison, read a paper which Louise D. Kellogg had prepared on the collection of the Wisconsin Historical Society. Since many members of the Society wished to take an early train to Detroit, the President omitted his address.

The officers elected were: President, William Warner, Bishop of Ann Arbor, Mich.; vice-presidents, Lucius L. Hubbard, of Houghton, Mich. and Victor Hugo Paltsits, of New York; secretary, Augustus H. Shearer, of Buffalo, N. Y.; treasurer, Frederick W. Faxon, of Boston, Mass.

Association of American Library Schools

THE Association of American Library Schools met on June 28th and 30th. Twelve of the thirteen schools that are members of the association were represented and thirty-five faculty members met at luncheon on the 28th. A report on publicity, or advertising methods for the schools was presented and discussed. Malcolm G. Wyer, chairman of the Professional Training Committee of the A. L. A., presented three recommendations from the report of his committee for 1921-22 to the A. L. A. concerning (1) summer school courses for which the same credit is given as for equivalent courses in the regular school session, (2) the possibilities of offering correspondence courses in library subjects, (3) and the adoption of a uniform system of evaluating credits. The recommendations were discussed and the appointment of committees of the Association to investigate certain phases of the subjects was authorized. Ernest J. Reece, principal of the Library School of the New York Public Library, was elected president for the coming year.

MARGARET S. WILLIAMS, *Secretary*.

Agricultural Libraries Section

The Agricultural Libraries Section held two meetings. Lucy E. Fay, Chairman, presiding.

At the first session on June 27th, Professor Charles A. Keffer addressed the section on "The Place of the Library in a Program of National Development." He said in part:

"Any national program of agricultural development must include the library, both as a practical aid to the farm business and as an abiding source of interest and culture in rural life. We can not hope for a library—hardly for a well filled book shelf—in every country home; hence provision must be made for community, county, state, or institutional library service. . . . More than the city library, the rural library must be amply provided with books of a technical nature, that will aid farmers in their problems of soil fertility, crop production, livestock management, and marketing. Even more than men engaged in industry, the farmer needs such help. . . . In general reading the outstanding need of the rural family is to form the reading habit; hence the libraries of rural circulation should be replete with attractive books that will invite the reader. They should be quite as entertaining as informative, and they must recognize the value of the simple word. . . . The divisions of extension in the colleges of agriculture, by virtue of their varied experience and the nature of their organization, should be helpful in making plans for book distribution in rural communities.

The program of the second session, June 30, was divided into three parts: Organization, Administration, and Extension service in agricultural libraries. The Chairman spoke of the survey of state agricultural college and experiment station libraries which had been made by Charlotte A. Baker and E. Arlene Dilts of Colorado and Lucy M. Lewis of Oregon, and pointed out that the program of the session was based on the findings of that survey.

ORGANIZATION

The discussion of the organization of agricultural libraries was led by Claribel R. Barnett, who, in her introductory remarks, said that agricultural college work develops certain problems not found in general college work, and the same is true of agricultural college libraries. This fact had been forcibly brought out by the survey of them made last year. It is important that agricultural librarians see their work in relation to the policies and problems of the various departments of the institution. Every librarian should formulate a policy and have it down in writing.

Miss Barnett pointed out that there are three

types of agricultural college libraries: (1) The experiment station library kept separate from the college library and devoted somewhat exclusively to the use of the station workers, as is the case in Virginia; (2) The agricultural college and experiment station combined in a single agricultural library and kept separate from the university library, as is the case in Wisconsin and Minnesota; (3) College and Station collections of agricultural literature consolidated with the agricultural college or university collections in general and administered as one unit. This is the plan in Oregon. Which of these types is the best it is difficult to decide. However, when the topography of the campus and the location of the buildings are such as to make the third type feasible, the balance of the arguments is in its favor.

It was pointed out that the field of research to be covered in the collections of the college library is necessarily determined in a large measure by the librarian's appropriation. The students' needs must come first because the education of students is the reason for the existence of the college, but no librarian in an institution where research work is done, could be satisfied not to be able to supply at least some of the needs of the research workers. The librarian should be a recognized member of the faculty, both for the sake of the students and the faculty. He should be a member of the committee on station, college and extension publications and might well assist in the care of mailing lists.

In the discussion which followed Henry S. Green of the Massachusetts Agricultural College told of the library policy of that institution. Grace Derby of Kansas and Miss Fay both advocated centralized collections, while Olive Jones of Ohio stated that the needs of the Ohio State University are more adequately met by departmental collections.

ADMINISTRATION

The discussion of Administration was led by Olive Jones. The selection and purchase of books was discussed by Phineas L. Windsor of the University of Illinois, who gave a helpful account of the procedure at that institution. He stated that the tendency is to leave more and more of the funds assigned to the College of Agriculture to the use of the library committee of the college which is very desirable. Henry O. Severance of the University of Missouri explained that in Missouri the state appropriates funds for the library. The University Library buys general books and the books of special interest to a department are purchased at the request of that department until the quota set aside by the library for the department is spent. The discussion of bulletin material brought

forth the fact that most libraries keep two or more sets of bulletins. Several strongly advocated keeping a duplicate set arranged by subject. Linda E. Landon of the Michigan Agricultural College reported that she had a collection of duplicates and would be glad to supply missing numbers as far as possible. She will also place libraries on the mailing list to receive extension publications.

EXTENSION

The discussion of Extension was led by Henry S. Green, librarian of the Massachusetts Agricultural College. In his introductory remarks Mr. Green stated that the publication of library leaflets or book lists is a great aid in spreading information about extension work. Discussion brought out that county agents, home demonstration workers and college extension service workers can be of the greatest help in finding the people who need and want the extension service of the library. E. Kathleen Jones of the Massachusetts Department of Education described library extension work in that state and outlined the plans for the use next year of the new county fair method of bringing books to the attention of the visitors to the fair. There will not be a book booth as heretofore, but a few books, some free bulletins and some lists of books and bulletins in various exhibition booths. Poultry books will be placed with the poultry exhibit, canning instructions and garden books with fruits and vegetables. In the housekeeping equipment booth there will be novels, poems and various cultural books with a poster advocating the purchase of the equipment and the reading of the books.

Willard P. Lewis, librarian of the New Hampshire State College, presented a report on the financial situation of the *Agricultural Index*, which stated that with very few exceptions librarians have paid the increased price with a good grace and have written letters expressing their appreciation of the value of the *Index* and their willingness to do their part to keep it going.

Miss Barnett, chairman of the resolutions committee presented a resolution on the death of Eunice R. Oberly which was ordered to be printed. Miss Barnett also announced the plan for a memorial in the form of an annual or biennial prize for the best bibliography in the field of agriculture or the natural sciences, which will probably be administered by the A. L. A.

Henry O. Severance, librarian of the University of Missouri, was elected chairman for the next meeting and Mary G. Lacy, librarian, Bureau of Agricultural Economics of the U. S. Department of Agriculture, secretary.

ANNA DEWEES, *Acting Secretary.*

Catalog Section

The Catalog Section met on Tuesday and Friday afternoons, Mrs. Jennie Thornburg Jennings of the Public Library, St. Paul, presiding.

A letter was read from W. Dawson Johnston, director of the American Library in Paris, suggesting the extension of the use of printed cards in European libraries and offering his co-operation. The chair appointed a committee to confer with Dr. Johnston: Charles Martel, Mildred M. Tucker, and Clement W. Andrews.

Frank K. Walter, librarian of the University of Minnesota, presented the results of a widely distributed questionnaire upon the subject of "The Catalog Situation: A study of present conditions in the light of last year's discussion."*

J. C. M. Hanson, associate director of the University of Chicago Library, read a paper on "The Training of Catalogers: what it should be and what it lacks."

A discussion on catalogers' training followed, led by Sophie K. Hiss, Cleveland Public Library, who presented the public library standpoint, and by Esther Betz, Carnegie Library, of Pittsburgh, who presented the standpoint of the person trained. In the general discussion which followed Mr. Martel brought out the idea that emphasis on executive positions had resulted in a scarcity of assistants and warned against too much administrative interference which cannot improve poor work and can only hurt good work. Harriet E. Howe of Simmons College, discussed matters from the Library School point of view and Mary E. Baker, Carnegie Library of Pittsburgh, from that of the public library.

Mildred M. Tucker, Harvard University Library, read a paper on "The Catalog Department and its Bibliographical Work Outside the Department."

The second session met in two divisions, a large libraries division and a smaller libraries division.

A round table discussion on catalog problems in smaller libraries was led by Miss Hedrick. Harriet P. Turner, Public Library, Kewanee, Ill., read a paper on "Who Catalogs the Smaller Libraries?" Susan G. Akers, Wisconsin Library School, presented "Suggestions for Solution of Cataloging Problems in Smaller Libraries."

Edith M. Phelps, secretary of H. W. Wilson Co., read a paper on "Debate Material in Smaller Libraries." Miss Hedrick presented the subject of greater representation of catalogers' interests in the affairs of the state and national associations. The Smaller Libraries

Division drafted resolutions on this point which were later submitted to the Large Libraries Division.

The large Libraries Division met also on Friday to hear a paper by George Watson Cole, on cataloging the rarities of the Henry E. Huntington Library. A paper was read on "Lessons in Americanism Learned While Cataloging a Collection of Local Historical Material." by May Wood Wigginton of the Denver Public Library. Ruth Rosholt, of Minneapolis, discussed "A Selective Catalog: Plans for Making the Large Catalog Usable."

Music cataloging and a proposed index to songs were generally discussed. Mrs. Jennings presented the results of a questionnaire on the subject, and Franklin F. Hopper, New York Public Library and Agnes S. Hall, Denver Public Library, led a discussion on the song index. Mr. Wilson announced that the H. W. Wilson Company planned to issue such an index in the near future.

Amy C. Moon, of the St. Paul Public Library, read a paper on "Principles of Cataloging for Branch Libraries," as illustrated in the methods of the Carnegie Library of Pittsburgh and the St. Paul Public Library. Abbie F. Gammons of the Detroit Public Library explained the method of cataloging for branch libraries in Detroit.

Aksel G. S. Josephson, described the care of maps at the John Crerar Library. This paper will appear in an early number of the LIBRARY JOURNAL, as will that of Rudolph Armbruster on geography in the Grosvenor Library, Buffalo.

H. H. B. Meyer, Library of Congress, described his "A. L. A. Catalog" based on the *Booklist* and supplemented by titles recommended by experts. He urged treating the catalog as a collection of books and recommended duplicating small portions of it for special subjects.

The following resolutions were adopted:

The Catalog section heartily indorses Mr. Hanson's contention that a thoro education, preferably four years of college, is essential preparation for good cataloging work. This preparation to emphasize foreign languages, especially Latin and German at this time.

The Catalog section would urge that this matter be given consideration by all library schools and authorizes the secretary to call this resolution to the attention of the Association of American Library Schools. . . .

Resolved, That the Catalog section authorize the incoming officers to carry forward the work on the proposed Index of Songs and to report progress at the next meeting.

It was voted that the chairman appoint a committee of five to prepare a report on the question of organizing an association of catalogers and outlining a method of procedure, and the chair appointed three of the committee, Margaret Mann, chairman, Ellen Hedrick and Clara P. Briggs.

The following officers were elected: Chairman, Helen B. Sutliff, Leland Stanford, Jr., University Library; Secretary, Ruth Wallace, Indianapolis Public Library.

RUTH ROSHOLT, *Secretary.*

Lending Section

The Lending Section met June 30th, John A. Lowe, presiding.

"Essential Books of Drama in the Schools," by Mabel Williams, supervisor of work with schools, New York Public Library, was read by Leonore St. John Power. The paper was based on experience gained thru the "Exhibition of the Amateur Stage" arranged by the New York Public Library and the New York Drama League and held last spring at the 58th Street Branch Library. The books to be exhibited were decided upon by a committee of teachers, librarians, playwrights, amateur producers and members of the Drama League. A selected bibliography, including only the books most talked of and most appreciated during the Exhibition was prepared later and multigraphed copies were distributed.

In a paper entitled "Fitting the Book to the Reader" Bessie H. Kelsey of the Popular Library Division, Cleveland Public Library, said the four most important elements in this process were the staff, equipment, advertising and joy in service. Every member of the staff needs interest in people, familiarity with fiction or willingness to learn, agility of mind and a sense of humor. In addition to those general abilities, individual qualifications should always be recognized and applied. In Cleveland these general and special qualifications are supplemented by careful training, thru staff meetings, guidance of the reading of younger members and the study of the Division's clientele. The equipment most used in serving the public includes a subject index for fiction, a file of sequels, reading lists and bibliographies and personal knowledge on the part of staff members. Advertising is necessary because it is impossible always to give personal attention, because some people prefer to help themselves, and in order to insure speedy service. The methods most used are book displays, posters, reviews pasted within the book covers, "ladder lists" pasted within books to lead the reader from one to another, and the display of book

jackets, authors' photographs, bits of poetry and current announcements on the winged frame.

The reserve book problem was considered by Margery Doud, first assistant in the Circulation Department of the St. Louis Public Library. Her conclusions, drawn from information about the reserve practice in the public libraries of Cleveland, Detroit, St. Louis, New York, Philadelphia, Brooklyn, Seattle, Los Angeles and Chicago, were:

1. Many reserved books are wanted by a certain date and are of no use to the borrower later. By including on the reserve postal the sentence "Book not wanted after——" with a space for the date, the reserve would be automatically cancelled if the book were not available by that time. This would do away with many reserves which stand on the shelves unclaimed.

2. The exempting of seven day fiction, pay duplicates and current periodicals from reserve, obtains from them the fullest and most timely use.

3. A reserve fee of five cents is a fair charge for extra service which demands both time and trouble.

4. At a rough estimate, from the statistics gathered the equivalent of one full time assistant is needed for an average of forty reserves daily.

Mary A. Batterson, head of the Circulation Department of the Tacoma Public Library, spoke on book selection in the public library. Her paper precipitated a discussion of what constitutes morality in fiction, in the course of which a number of the modern novels were analyzed. The only definite conclusion arrived at was that morality or immorality in books is dependent as much upon the reader as upon the book.

On Saturday, Professor Henry F. Adams of the Department of Psychology, University of Michigan, spoke informally on the psychology of salesmanship and advertising as applied to the public library. The number of library patrons can be extended by making a canvas of potential borrowers, and then, by applying the principles of good salesmanship, making them want what the library has to offer. "Psychological Contacts" by Carolyn F. Ulrich, chief of periodicals division of the New York Public Library, read by Miss Power, was a plea for the introduction of the study of psychology into library training.

"What Corporation Training has to Teach us," by Frank K. Walter, librarian of the University of Minnesota, was read by the Chairman. His analogy between corporation management and library management concluded: "The library has no right to keep in stock anything which it cannot freely give to its users. The crux lies not in

the sale, that is in lending it to those who ask, but in selecting only those things which really promote growth.

The new officers are: Chairman, Bess McCrea, principal of the Loan and Registration Department, Los Angeles Public Library; vice-chairman, Marie L. Fisher, librarian of the Lawrenceville Branch, Carnegie Library, of Pittsburgh; secretary-treasurer, Ruth M. Barber, Head of Circulation Department, Cossitt Library, Memphis.

MARY U. ROTHROCK, *Secretary*.

School Libraries Section

The first session of the School Libraries Section was called to order June 27 by the chairman, Marion Horton.

Martha Pritchard first summarized the achievements of the section for the last two years. Miss Pritchard reported that the results of the investigation in training for school librarianship, made during the two years of her chairmanship, have been incorporated in the report of the Library Training Section and will be the basis of further recommendations. (See A. L. A. Annual Report 1921-22, p. 49-51).

Marion Lovis, librarian of the Hutchins Intermediate High School told of the special features of her school library, a beautiful room with adjoining conference rooms, as well as a library class room.

May Ingles, librarian of the Technical High School Library, Omaha, then conducted a Round Table on the relation of the high school librarian to different departments of the school. Rachel Baldwin, librarian of the Deerfield-Shields Township High School, Highland Park, Ill., discussed the library as a laboratory of the history department. As very few history classes confine themselves to texts, the students ought to get inspiration thru the school library. Edith M. Schulze, librarian of the Redondo (Calif.) High School, discussing service to the Science Department, pointed out that the librarian must study the aims of the scientist and the spirit in which he works. She must read scientific periodicals and be able to show to the teachers the material available, and explain to the students how to use this material. An up-to-date, well balanced collection of books, periodicals, pamphlets, clippings, pictures, slides and films to furnish background should supplement and enrich the course of study. Miss Carter, librarian of the Oak Park and River Forest (Ill.) Township High School, discussed relations with the English department. Altho the high school library is indispensable to all departments, the English department leads all in variety of demands, since most of the outside school activities such as literary, drama and

debate clubs, school publications, etc., are conducted under the auspices of that department. The assistance of teachers is of value in book selection, in investigating the voluntary reading done by the students and for helpful insight into the varied interests of the boys and girls. Mary J. Booth, librarian of the Eastern Illinois Normal School, pointed out the value of watching constantly for supplementary material in pictures, lantern slides, government pamphlets, booklets issued by manufacturing firms, bulletins issued by the various Schools of Home Economics as well as thru educational exhibits.

At the second session, held Wednesday evening, June 28, the first speaker was William Heyliger, author of "High Benton," who discussed books for boys. Harriet Wood, chairman of the A. L. A. Education Committee, presented a recommendation outlining the fundamental principles of school library work which had just adopted by the A. L. A. Council. (See LIBRARY JOURNAL for July, p. 613.)

Following came papers on various phases of school work, Jasmine Britton and Laura G. Smith of Los Angeles handling the elementary and junior high schools, respectively; Stella Whitaker of Providence the high school and Grace Vile of Buffalo State Normal School.

Miss Wood presented the Constitution for the School Libraries Section which was drawn up by a special committee. It was voted that this be tried for a year, before its final acceptance.

The round tables of elementary, normal school and childrens librarians met in the school auditorium, Bertha Hatch of Cleveland presiding.

The program of the general section was as follows:

Teacher's and Children's Reading, Margaret Wright, assistant supervisor, school department, Cleveland Public Library. "Reading in the Elementary Schools," Ruth Paxton, head of the school department, Library Association, Portland, Ore., with discussion by Miss Steele, Cleveland, O. "The Child's Own Choice of Books," Carrie E. Scott, chief, Children's Department, Public Library, Indianapolis, with discussion by Elva Smith, Pittsburgh, Pa. Miss Goodrich, librarian, spoke informally concerning the work done in the Pattengill School.

At 4:30 both groups met for the annual business meeting. After discussion as to the best means of collecting, exchanging and co-ordinating bibliographies, the report of the Elementary School Committee was received. This was an informal report of progress made which was given by Miss Cutter for C. C. Certain. It was voted that this committee, of which Mr. Certain is chairman, be continued another year.

The reports of the Committees on School Directories were then received. Bertha Hatch reported on the Normal School Directory and Charlotte Smith reported on the High School Directory which had been completed during the year, and Miss Pritchard on the Elementary School Directory. These directories, with one exception, that of the Elementary Schools, which is not quite finished, were turned over to the secretary.

The following officers were elected:

Chairman, Harriet Wood, Supervisor School Libraries, State Department of Education, St. Paul; Vice Chairman, Susie Lee Crumley, Principal, Library School, Carnegie Library of Atlanta; Secretary-Treasurer, Marion Lovis, Librarian of the Hutchins Intermediate School, Detroit, Mich.

FRANCES H. KELLY, *Secretary*.

Small Libraries Section

THE second meeting of the Small Libraries section, which was originated at the Swampscott Conference, last year, was held on the evening of June 27, with Constance Bement, librarian of the Public Library, Port Huron, Mich., in the chair. In opening the session, the chairman brought out the fact that the definition of a "small library" was not clear, but the sense of the meeting showed that it applied to those libraries in towns and smaller cities whose staff membership did not exceed six, whose staff organization was consequently informal, and which maintained no extensive branch systems in the city itself, admitting those with rural stations.

THE "ONE-MAN" LIBRARY

The program was largely devoted to the problem of the "one-man" library, to which the first paper, by Elizabeth Briggs, librarian of the Township Public Library, Royal Oak, Mich., was entirely devoted. The advantages of this position, which Miss Briggs characterized as the "great adventure" in librarianship, were: (1) The librarian must be more carefully chosen than in a system where the short-comings of one member of the staff will be compensated for by the others; (2) Work must be limited to the ability of one person, and in consequence no machine methods can grow up; (3) The librarian can make her personality count to the utmost, as she herself is the library, and the service is necessarily intensely personal; (4) She can herself put her ideals across, without their being modified in passing thru the minds of untrained assistants of varying standards; (5) Technique is of less importance than general background and education; (6) The librarian is an essential part of her small com-

munity and not a cog in a machine. The disadvantages of the position are that the open hours of the library are necessarily limited by the ability of the librarian to be present; evening opening is much needed, and yet if the librarian must be on duty every evening she is cut off from most of the social life of the town. Librarian and board are not apt to recognize the time when the library's activities demand an increased staff. Miss Briggs found that the small library averaged a circulation of 14,000 a year for each person on the regular staff, and concluded that when such a library exceeded this approximate average, that its staff must be increased or the quality and effectiveness of its work will lessen.

IDEALS FOR A SMALL LIBRARY

Katherine Sleneau, librarian of the Public Library of Highland Park, Mich., spoke on "Ideals for a Small Library." She asserted that no town of over 2000 should maintain permanently a one-man library, and showed that for towns under 5000, the A. L. A. set up a circulation standard of 5 per capita, and that Wisconsin had found an actual average among its libraries of six and one-half per capita, which she considered better. Every good movement in the community should originate from, or find active support in, the library, all classes of patrons be asked for help and cooperation—lodges, schools, clubs, business men, and all civic activities. Their appreciation will bring to the librarian of the small library more immediate satisfaction and visible results than is possible in the more impersonal work of the large system.

THE SMALL LIBRARIAN

Edith Patterson, librarian of the Public Library, Pottsville, Penn., gave the third paper, devoted to the "Small Librarian" as the essential factor of the efficient "Small Library." That the librarian is the common denominator of all library problems, whether of the small or large library, and that according as she is "small" or "large," so is her library, was her thesis. To develop the friendly spirit, which distinguishes the small library from the business régime of the larger institution, should be the chief aim of the librarian, and "Library use made easy" be her slogan.

In discussing these papers, the necessity for cutting routine to the minimum was emphasized, as was the need for a thoro knowledge of short-cuts.

Officers for next year's section are: Margaret Wade, librarian of the Public Library, Anderson, Ind., chairman, and Elizabeth Ronan, secretary.

ELIZABETH C. RONAN, *Secretary pro tem*.

Trustees' Section

The Trustees' Section met in the ball room of the Statler Hotel on June 27, with a large attendance. Mrs. Elizabeth Claypool Earl presided.

The subject of the day, "What Must be Done to secure increased funds from taxation for the needs of the public libraries," was opened by Arthur A. Stearns, vice-president of the Cleveland Public Library Board, who spoke on the high cost of "free" public libraries and of the trustee's duty of keeping informed the officials who control the public revenues. The American people, he said, is irrevocably committed to the maintenance of public libraries by taxation. The taxpayer is reconciled to paying for things that directly affect him, such as fire and police protection, and the courts which protect his vested rights; but he does not as yet visualize the necessity of an educated citizenship. In Cleveland less than one-eighth of all the people pay all taxes; two per cent of the people pay 95 per cent of the taxes. To the federal government two per cent pay 98 per cent of the income tax. The people have an antipathy to paying taxes for any purpose. The patrons of the library are chiefly non-taxpayers, and they criticize the free service, but they do not pay the tax. It is the business of the trustee, therefore, to persuade two per cent of the people to pay the library bills of 98 per cent. Mr. Stearns believes that American genius and foresight will successfully accomplish this.

William L. Pieplow, president of the Milwaukee Public Library Board, pointed out that money collected for taxes must be expended productively. The library is a necessity for good government, and therefore must receive financial support. The library is the great continuation school of the people. The City Council, being elected by the people, is the proper body to levy taxes, whereas trustees are appointed. Their work is to educate public opinion. They must work for a spiritual quickening, drive into the consciousness of the people the necessity of increased appropriations and promote the library constantly.

W. L. Jenks, president of the Port Huron Public Library Board, stated that Michigan was the first state to announce the principle that free public libraries must be maintained. There are two ways to obtain the money, by gift and by taxation. Taxes may be secured in two ways: by persuading state legislatures to give an appropriation to be spread over the state (Ontario, for example, compels an appropriation of fifty cents per capita); or the public may be appealed to—not the two per

cent.—but the representatives of the people, the Common Council. No longer do we have grumbling about the school tax. The American people has a passion for education. We must carry on a campaign of education. The library is the poor man's university; not a luxury, but a necessity. However, it must not be a part of the schools. We must have separate and distinct boards.

Rev. Dr. Robert J. Renison, chairman of the Hamilton (Ont.) Public Library Board, said: "I do not feel bound by the rule that we must talk only of money. The library must be related properly to life. If civilization is to be conserved it must be done by education. The two per cent paying taxes perform the greatest service in the world when they pay for libraries. Business men need reading more than the masses. Books are the greatest thing in the world. My log shack on the desolate frozen shores of Hudson Bay, where I lived fifteen years, held the best things in all the world in its books. The movies give only the obvious; they miss the subtle. A book is a living thing."

John H. Leete, director of the Carnegie Library of Pittsburgh, gave an amusing sketch of Noah's librarian on the ark. He said the library is doing a big work but not big enough. We provide culture, inspiration, recreation; we supplement schools and colleges; we help business; we work for American democracy; but we must do more for the commonwealth if we want more support. When we ask for more money we must have a definite purpose and use the money for that purpose only. In Pittsburgh we went before the Engineers' Society and interested its members and it went before the common council in our behalf. We must organize the support of the bodies we are serving.

Mr. Willard, of the Minnesota State Board of Education, precipitated an animated discussion, when he advocated the union of the library and school boards. Washington Porter, of Cincinnati. Judge Wildermuth of Gary and Mr. Craig of Evansville, spoke in opposition to this idea.

After the election of officers: President, Mrs. Elizabeth Claypool Earl, Muncie; vice-president, W. L. Jenks, Port Huron; secretary, Mrs. Dwight Peterson, Toledo, and the adoption of a resolution voicing the approval of the section of the policy of one dollar per capita for good libraries, the meeting adjourned to join the Detroit Library Commission, which entertained at dinner all visiting trustees in the dining room of the new library.

ORA THOMPSON ROSS, *Secretary*.

College and Reference Section

This section met on June 28 with about three hundred in attendance. The program was in charge of Charles J. Barr of the Yale University Library.

Harry M. Lydenberg reported for the committee on Foreign Periodicals of the War Period that after distribution of receipts from the *Notgemeinschaft* it would be best for each library to order directly thru Harrasowitz; Mr. Garould reported for the Committee on Revised form of Library Statistics a desire for simpler form. J. C. M. Hanson for the committee on Printed Cards for Monograph series, said that sufficient cards at least for half of the fifty-seven series had been subscribed for and that probably sufficient subscriptions for a large number of the remainder would be secured.

Anne S. Pratt, of Yale University, read a paper on inter-library loans. Inter-library loans at Yale have increased thirty per cent in ten years. The cost of searching references and preparing for shipment and the necessary correspondence, raises the question of possible charges to cover actual expenses. Because of the difficulties in securing refunds on postage Yale ships by express. E. D. Tweedell of the John Crerar Library reported on the policy of that library, which has a time limit of two weeks without renewal. Fanny Borden, of Vassar expressed the appreciation of the smaller librarians who are borrowers more often than lenders, and suggested a charge of fifty cents per loan be made by the loaning library to cover necessary expense.

Joseph G. Pyle's paper on the function of the James Jerome Hill Reference Library at St. Paul will appear later in the *LIBRARY JOURNAL*.

W. W. Bishop spoke on preparation for a book-buying trip in Europe. His advice is: Procure from the recognized agents of your library a general authorization to the dealers guaranteeing the payment of any purchases shipped to your agent. This will cost ten per cent but is worth it. Carry your wants and desiderata with you. Have titles typewritten arranged in three columns and reduced by photostat.

Edith M. Coulter of California University presented a paper on the university librarian, his preparation, position and relations to the academic departments of the university making practical suggestions for improvements.

Mr. Henry of the University of Chicago gave an account of the development of the rental collections at Chicago as a supplement provision for reserved book reading.

Willard S. Austen of Cornell was added to the Section's Committee which now consists of William E. Henry, University of Washington; E. D. Tweedell, John Crerar Library, and Mr. Austen.

EDWARD D. TWEDELL, *Secretary*.

Children's Librarians Section

There were held three overflowing meetings of the Children's Section which now numbers some seven hundred members. Practical papers which will be given in whole or in part later in the *LIBRARY JOURNAL* were contributed by Margaret B. Carnegie, of Pittsburgh, whose subject was "Modern Fairy and Folk Stories;" Annie I. M. Jackson, of Toronto, "Recent Fiction for Girls;" Marion F. Schwab, of Brooklyn, "Recent Fiction for Boys;" Mary S. Wilkinson, of Muskegon, Mich., "Fiction Reading for Older Boys and Girls;" Elizabeth D. Briggs, of Cleveland, "Present Day Interest in Children's Books;" Mary E. S. Root, of Providence, "Charted Seas" on the development of library work with children; Edith L. Smith, of Morristown, "Giant Killing in the Children's Department"—on the shortage of trained children's librarians; Jasmine Britton, of Los Angeles, "New Roads in Library Work with Children;" and Sarah C. N. Bogle on "The Demand for Children's Librarians."

At the close of the first session was made the presentation of the John Newbery medal which by a large majority of the Children's Librarians of the country was awarded to Hendrik Willem Van Loon for his "Story of Mankind." Frederic G. Melcher briefly explained his idea in donating the medal; namely, that it might give new impetus to the writing of children's books if writers of creative ability were made aware that there is a large and continuing clientele for children's books. The medal is to be awarded annually at the A. L. A. conference to the author of the most distinguished book for children published during the preceding calendar year. The presentation was made by Clara W. Hunt of Brooklyn, Chairman of the Section, and Dr. Van Loon informally replied in merry vein.

At the business meeting a constitution for the Section was presented and adopted. On the motion of Franklin Mathews, librarian of the Boy Scouts of America voted that the Children's Section co-operate with the Boy Scouts in compiling a list of books to be distributed in connection with Children's Book Week and that the A. L. A. be asked to publish this.

The officers elected were: Chairman Elva S. Smith, of Pittsburgh; vice-chairman Della McGregor, of St. Paul; and secretary, Alice Meigs, of Detroit.

Library Buildings

The topic announced for discussion at the Library Buildings Round Table was "Recent Branch Library Buildings and Town Library Buildings." The chairman, Willis K. Stetson, brought to the meeting plans of branch buildings recently completed, or under construction, in Baltimore, Boston, Bridgeport, Brooklyn, New Haven, Newark, Toronto, West Quincy and Washington, as well as the pamphlet showing elevations and plans of recent branch buildings in Detroit. Studies of the proposed building for Elmwood Library, Providence, were also shown. Township libraries were represented by plans of Lethbridge, Alberta, Okmulgee (Okla.), and Webster (Mass.) libraries. Jeannette M. Drake of Pasadena showed the plans of the childrens library building in Pasadena.

The larger part of the session was devoted to the discussion of township buildings. Among the topics discussed was that of high windows, that is, entirely above the regular height of bookcases. These are increasingly favored. Recent branches in Baltimore and Denver have only high widows, Bridgeport low widows in front and high on the other walls, while Boston has all low windows. In some cases one-third of the available wall space is lost thru low windows.

The defects of plastic floors were mentioned, showing that the claims of such floors need to be carefully investigated. In one case instanced it was found desirable to put linoleum over the composition used. Linoleum was considered to be satisfactory in place of cork-carpet and is now generally used.

There was some discussion of two-story branches, Newark and Toronto are both building these, with adult and children's rooms on different floors. Attention was called to the fact that rooms usually placed in one-story buildings are placed in the Detroit branches in a mezzanine story in the rear part of the buildings.

The plan given in John Cotton Dana's "A Library Primer," 1920 edition, p. 40-41, was alluded to as in general a good plan for township libraries. The Okmulgee library shows this plan modified for a larger building.

Chalmers Hadley of Denver spoke of the desirability of having the delivery desk near the rear of the building with working space for the library staff, and yet also having the desk not too far from the front entrance, hence a building should not be too deep. He would have the working space behind the desk shut off by partitions the same height as the desk.

WILLIS K. STETSON, *Chairman.*

Hospital Libraries

Round Table meetings for the discussion of hospital library problems were held Tuesday June 28th. There was a large attendance especially at the second meeting which brought together between two and three hundred people. The first meeting, Caroline Webster, of the Library Sub-Branch, U. S. Veterans' Bureau, presided over an informal discussion of the problems arising in hospital work when the libraries are administered as a part of the public library system.

Representatives from the libraries at Detroit, Chicago, Cleveland, Pittsburgh, Evansville, Sioux City, all spoke with enthusiasm of the work in hospitals. Clarence W. Sumner of Sioux City, who is probably one of the most enthusiastic believers in the possibilities in this branch of the service, assured his hearers that it was always possible to get a good response to requests for funds for this branch of library work. Two assistants at Sioux City give full time to this work.

Miriam E. Carey, chairman of the A. L. A. Committee on Institutional Libraries presided at the second meeting. Miss Webster gave a brief account of the library work carried on for ex-service men during the past year, and pointed out that the greatest difficulty of today is the lack of trained workers for a field which offers unusually interesting experience. The hospital is no place for the mechanics of library work, or for those trained only for the comfortable places; but it is rich in rewards for those who can interpret their knowledge and experience in terms of service.

The paper by C. H. Lavinder, assistant surgeon general of the U. S. Public Health Service, on the general subject of hospital libraries will be printed in an early number of the LIBRARY JOURNAL. Before reading his paper Dr. Lavinder said if evidence were needed of the place that libraries are taking in hospital administration, it is to be found in the fact that the Doctor responsible for appearing before Committees of Congress to answer questions concerning administration of hospitals during the coming year, takes time at the beginning of the fiscal year to go hundreds of miles to speak to librarians on the value of the work.

Following by Mrs. Herbert Gurney, chairman of the Board of Trustees of the State Hospital at Foxborough, spoke in an unusually delightful and forceful way of the need, not only for books but for library service in a mental hospital. Unfortunately Mrs. Gurney spoke without notes so that it is not possible to give her paper.

CAROLINE WEBSTER, *Chairman.*

Work with the Foreign Born

The Round Table on Work with the Foreign-Born met on Tuesday afternoon, June 27, when the group included representatives from one Roumanian and three Polish newspapers. Mr. M. C. Kozlowski, Polish vice-consul at Detroit, also attended the meeting and later contributed to the discussion.

Mrs. Eleanor E. Ledbetter's paper, "Is the Library Democratic?" ably summed up the larger aspect of the whole problem of rendering library service to the foreign born. Specific difficulties of securing books in foreign languages were discussed. Pauline Reich of Cleveland reported on the Hungarian book situation. Dr. Jacob Vorzimer of the Polish Book Importing Co., sent a written survey of the conditions of present day Polish Book trade. Dr. M. C. Kozlowski, Polish vice-consul at Detroit, added a few remarks which somewhat lightened the pessimistic view held by Dr. Vorzimer. A letter on Yiddish publishers from Jennie Meyrowitz of New York, was then read, and a written report on the Greek situation was received from Mrs. Alison B. Alessios of Chatham Square Branch Library, New York.

Mrs. Ledbetter informed the meeting that Mr. Boro Petrovic, 1561 E. 36th St., Cleveland, was qualified to give most valuable help in the selection of Serbian titles. Dorothy Hurlbutt told of an interesting experiment which the library in Hibbing, Minn., made to secure Serbian books from Belgrade. A letter was read from the Roumanian Educational Bureau, 3133 Broadway, New York, offering to supply Roumanian books free to libraries in proportion to the Roumanian population.

Mrs. A. H. Watterson, formerly in charge of the Order Department of the Cleveland Public Library, read an inclusive list of publishers both in the United States and abroad, from whom foreign books could be obtained. This list is published elsewhere in this number.

At the close of the discussion, the report of the Committee of the New York Library Association on Work with Foreign Born, outlining their work in securing the translation into Yiddish of American titles, was read. After discussion the following resolutions were adopted:

"The A. L. A. Committee on Work with the Foreign-born wishes to go on record as approving the work of the Committee on Work with the Foreign-born of the New York Library Association, in the matter of securing the translation of American books into foreign languages. The Secretary of this meeting is instructed to send a copy of this resolution to the Library Association, New York.

"The A. L. A. Committee on Work with the Foreign-born recommends the translation into Yiddish, Polish and Italian, of Anna Howard Shaw's "Story of a Pioneer."

"The Secretary of the A. L. A. give sufficient space adequately to incorporate the material brought out in the present meeting in the printed *Proceedings* of the A. L. A.

JOSEPHINE GRATIAA, *Secretary.*

Libraries of Religion

The Libraries of Religion and Theology Round Table was conducted by Reverend John F. Lyons on the evening of June 29. The general subject, "Religious Books in the Public Library," was first treated by Frank G. Lewis, librarian of Bucknell Library, Crozer Theological Library, Chester, Pa., in a paper, "Selecting Religious Books for a Public Library," printed elsewhere in this number. Bernard C. Steiner of Baltimore discussed "Public Libraries and Sunday School Teachers."

Marion Humble, executive secretary of the Year-Round Bookselling Plan, said that Religious Book Week, among the many "weeks" that are nationally observed is really unique because it is *religious* but has no denominational or other religious barriers, and it gives each individual religious organization an opportunity to use the aims and publicity of the Week to increase interest in religious books of their own belief, as well as others. The first Religious Book Week in 1921 was organized with the same idea as Children's Book Week—to give to individuals a better understanding of the enrichment which religious books add to life, and to impress book-sellers with the importance of strong departments and advertising of religious books. The movement immediately won the support of the churches, with the co-operation of literally thousands of ministers, realizing that the power of the spoken word can be greatly extended thru the printed word. The denominational publishers in preparing for the Week have sent out thousands of letters and circulars to ministers thruout the country; and special sermons, special book talks and book exhibits in the churches, special notices in the church calendars were a result. The Religious Book Week Committee includes Presbyterian, Methodist, Baptist, Congregational, Catholic, Jewish and several general publishers with religious books. The public libraries played a large part, holding exhibits of books, distributing lists, arranging for special talks at club meetings and before church societies. The third Religious Book Week will be held March 4th to 10th, 1923.

Paul M. Paine, librarian of the Syracuse, N. Y. Public Library, in discussing "The Bible

in the Library" in a paper read by Orlando C. Davis, librarian of the Public Library, Waltham, Mass., said that nothing illustrates more plainly the difference between school advantages and public library advantages than the recommendation which was made in Dr. Bostwick's article on religious books in the library in the June *Bookman*. It is that every form of religion should have its able defender in the public library.

The Reverend Gains Glenn Atkins, pastor of the First Congregational Church of Detroit, also spoke on the relations of the church and the library.

The following resolution was adopted: "That public libraries and theological libraries be encouraged to co-operate fully with the Third Annual Religious Book Week, March 4-10, 1923."

The Round Table voted to request the newly elected officers to ask the A. L. A. to recognize the libraries of Religion and Theology Round Table as a section of the A. L. A. to be known as the Religious Book Section.

Officers for the coming year are: chairman, Mary M. Pillsbury of the General Theological Library, Boston; secretary, Elizabeth Herrington of the U. S. Public Health Service Library, Chicago.

GRACE J. FULLER, *Secretary, pro tem.*

Public Documents

EIGHTY librarians were present at the first meeting of the Public Documents Round Table held on June 27, with H. H. B. Meyer presiding. The report of the sub-committee on the Handbook on the popular use of documents was submitted by Jessie Woodford, chairman. The work was reported as under way, after many delays, altho not so far advanced as the committee hoped. The plan is for a small, hundred page handbook, to provide a clear, simple outline of successful and practical methods for carrying on popular work with documents for smaller as well as larger libraries. The outline of chapter headings was given. An explanation of the very interesting graphs which had been made to illustrate the results of the questionnaires on the use of documents which were sent last year to public libraries, was later given by Miss Woodford.

THE DISTRIBUTION OF PUBLIC DOCUMENTS

Mary A. Hartwell, of the office of Superintendent of Public Documents, Washington, D. C., read a valuable paper on "The Year's Developments Toward Betterment of Public Documents Service to Libraries," to be printed later. Mr. Meyer paid tribute to the work of Mr. Tisdell,

Superintendent of Documents, which has accomplished so much for libraries.

The Discussion of the daily distribution of documents was opened by President Root, who has found it extremely satisfactory because he is able to produce a document as soon as news notice was given. The use of documents had been increased and inquiries for document material have been greatly stimulated. Mr. Goodrich, of the Michigan University Library, also favored the plan of daily distribution and had found it a great help in reference work.

The Congressional Digest was described by one of the editors, Mabel Gram. Mr. Meyer warmly commended the magazine, which is strictly non-partisan, presenting both sides of all questions, and aims to give accurate information on Congressional matters.

The need for a petition to Congress on the need for passing a law to allow depository libraries to circulate documents was brought up by Miss Woodford. Miss Hartwell in this connection read a letter from Mr. Tisdell regarding present practice. It was decided that the Chair, with consent, would appoint a committee to draw up a resolution to this effect. Miss Woodford asked for a resolution in regard to the discontinuance and changed form of various government periodicals. The Chairman appointed Mr. Severance, Mr. Goodrich and Miss Woodford as a committee on resolutions.

Miss Woodford also spoke on the increased confidence on the part of the public, especially business men, which had come as a result of receiving documents daily. The Public Library of Chicago is receiving documents even earlier than newspapers and in a few cases before release to the executive departments. F. Mabel Winchell testified that the use of documents has doubled in Manchester, N. H., and Mr. Brigham said that he had been saved much money for telegrams, thru the daily distribution.

The second session was held on Wednesday evening, June 28, with Mr. Meyer in the chair. The attendance was 105.

LIBRARIES OF U. S. GOVERNMENT PUBLICATIONS

A paper by George F. Winchester, librarian, Free Public Library, Paterson, N. J., on "Suggestions for a System of Libraries of United States Government Publications," outlined briefly a plan for making United States Government publications readily available and economically administered by having such libraries in each state.

The matter of the selective distribution of documents for depository libraries was considered, with an explanation by Mr. Meyer that the function of the present depository libraries would not be displaced. It was not thought necessary to discuss the question on the program

"Shall the Number of Depository Libraries be Increased?" because the selective plan when in operation would take care of the matter of depositories.

SCHOOLS AND DOCUMENTS

A paper on "Schools and Documents: the new civics and its problems," by Josephine Lesem, teacher of Community Civics, Senn High School, Chicago, was read by Miss Woodford. Miss Lesem stated that the aim of the new schools' curriculum should be teaching citizenship and that the core of material should be furnished by social studies. A social studies course inaugurated in the Chicago high schools two years ago, which Miss Lesem conducted, was the basis of her experience. The texts used were Dunn's "Community and the Citizen," Nida's "City, State and Nation," and Hughes' "Community Civics," but it was not a text-book course since it emphasized in every way pupil experience and the development of student initiative and co-operative activities. Reference books, magazine articles and pamphlet material of all kinds were used to supply the fresh and up to the minute information which could not be found in texts. Government documents now available are not always suited to the demands made upon them by the new social studies courses. Miss Lesem suggested that special condensed editions of documents be issued by the United States Government for school and general use.

In commenting on the paper Mr. Meyer spoke of the need for revision of certain documents and for adequate indexing, especially the *Congressional Record*, for which the Library of Congress has found it necessary to make its own subject index. He added that the suggestion for a special condensed edition indicated a lack of perspective on the part of the teacher, since the government publications are not prepared primarily for school use, but for department purposes. Miss Woodford pointed out that such an edition would also be useful to any citizen.

A short time was devoted to the discussion of the topic, "Attitude of Library Assistant to Documents—How can it be improved?" Miss Woodford and Dr. Carr have found all assistants keen and interested, an opinion which was heartily endorsed.

The question of whether the documents survey be carried further to cover college, reference, school and special libraries, was discussed at some length. Miss Woodford submitted that it had been of such service to public libraries that a similar questionnaire, conducted by a committee of specialists, would be highly advisable. Dr. Carr suggested a survey from

Washington. Mr. Meyer thought that the matter should wait, especially since he could no longer retain the chairmanship of the Public Documents Round Table, and preferred to have such an undertaking begun by his successor.

Resolutions were adopted as follows:

Whereas, the distribution of Public Documents by the Office of the Superintendent of Documents in the past year has witnessed many improvements in the service which have been entirely for the benefit of libraries, therefore be it

Resolved, That we express our hearty appreciation of these constructive measures and improvements, especially the daily distribution of documents to the depository libraries.

Whereas, Thru the necessity for economy the Government has suspended several periodicals of importance and special interest to the public, such as *Public Roads*, *Vocational Summary* and *School Life*, therefore be it

Resolved, That the Documents Round Table in session request the early consideration of the resumption of these and other similar periodicals because of the demand for these, and their practical and educational value, and be it further

Resolved, That copies of these minutes be sent to the Public Printer, the Superintendent of Documents, the Joint Committee of Printing, and to the various government officers concerned.

Training Class Instructors

A Round Table of Training Class Instructors was held at the Detroit Public Library on Wednesday evening, June 28th, in the staff auditorium. In the absence of the officers, Lucy L. Morgan, of Detroit, acted as chairman, and Carrie E. Scott, of Indianapolis, as secretary.

A report on the organization of the section of Training Class instructors prepared by Julia A. Hopkins, supervisor of staff instruction at the Brooklyn Public Library, was read by Marie A. Newberry, supervisor of training at the Public Library of Toledo, O. The acting chairman was authorized to present the petition asking for the organization of a Training Class section to the A. L. A. Council with the twenty-five required signatures.

Discussion of the practice work of apprentices and students of training classes as handled in individual libraries followed. A list of 81 libraries registered as interested in staff training, compiled from the questionnaire sent out by Miss Hopkins, was distributed. The list is arranged alphabetically by states, and under each state alphabetically by towns. The items given are (1) name of library; (2) name of librarian; (3) form of training—individuals, apprentice class or training class; (4) length of course; (5) title of person in charge of the course; (6) name of person in charge of the course. Of the eighty-one libraries on the list, three are seventy public, six college or university, three state, one county, and one is a state library com-

mission. In eight libraries the instruction is in charge of a person whose whole time is given to the work; in eighteen, the work is in charge of a department head; in twenty-four the librarian has charge. Twenty-five are listed as training classes; twenty-three as apprentice classes; eighteen train individuals only. Eleven libraries conduct a course lasting nine months; three have eight months; one, seven months; thirteen, six months; four, five months; four, four months; eleven, three months; two, two months; and one, a one month's course.

CARRIE E. SCOTT; *Secretary pro tem.*

Work with Negroes

A round table meeting was held Wednesday evening, June 28th, Ernestine Rose, of the New York Public Library, presiding. About one hundred were present.

The chair announced as the purpose of the meeting the consideration of a permanent organization following up the informal discussion at Swampscott, and called upon George T. Settle, of the Louisville, Ky., Free Public Library, to open the question.

Mr. Settle gave the object of the Round Table as an opportunity to exchange ideas and report for mutual benefit what is being done. Louisville has organized a negro department to its training class and has already trained eleven colored assistants from other southern cities. A separate library for colored people is maintained, giving very effective service. The city is doing its part by the negro to make his residence a mutual benefit. It is intended to establish a library school in connection with the library with a colored department.

The Chair reported that a questionnaire designed to get a clear understanding of the status of library work with colored people had been sent out during the year. The report on this questionnaire was tabulated by Marion P. Watson, of the 135th Street Branch of the New York Public Library.

SUPPORT AND CONTROL OF NEGRO LIBRARIES

Lloyd W. Josselyn, of Birmingham, Ala., followed with a paper on the support and control of negro libraries. It is not fair to the negro to judge him by standards of the white race; his needs are different from our needs and his problems must be seriously studied, as well as our problems in working with him. This study is best made by personal contact supplemented by the best sociological work of negro as well as white authors. The amount of financial support should depend on the literacy of the negro, the ability of the literate negro to make use of library service and the cost of giving such service. One dollar will buy more service for the

negro than for the white man. Adequate service to the negro is 25 per cent cheaper than to the white, as personal service is cheaper by 40 per cent, books 15 per cent, periodicals 10 per cent, miscellaneous expenses 10 per cent. Since public libraries are controlled by the people through suffrage, the whites, being in the majority, control the negro libraries. In response to a questionnaire the replies from fifteen southern libraries indicate that a mixed board of control is impossible, a white board with an advisory negro board impracticable, and a negro board unsuccessful.

Informal discussion brought out the following points:

Birmingham bases the cost of negro service in libraries on costs obtained from various educational and business institutions. Books are cheaper because more elementary.

Louisville considers the cost of negro service greater per capita than for white people. White and colored assistants are paid the same salaries, while double the number of colored assistants is used. The same complete reference library is provided as for white service. An attempt is made to cultivate social imagination as distinct from folk imagination, by awakening interest in the better type of modern fiction. More books per capita are read than in any white community in the south.

Evansville, Ind., finds its colored branch most expensive, as a larger staff in proportion to those served must be provided. Salaries are based on efficiency and the attempt is made to give equal service to both races, tho in separate buildings.

Roanoke, Va., reports a colored adult circulation of 80 to 90 per cent fiction; juvenile 50 to 55 per cent fiction, with religion second in both instances.

Norfolk, Va., has a colored advisory committee which formulates a policy for the colored library keeping within the policy of the white library. It selects its own assistants and discusses its problems with the white librarian.

Mary U. Rothrock, of Knoxville, Tenn., advised workers with negroes to think and listen and say little. General principles should be modified in the light of local conditions. A negro is entitled to equal opportunities and to the generous consideration of the white majority. A book collection should be provided with a view to its usage, but not inferior to the white collection. The cultural advantage of good architecture in the library building ought to be given and ample financial support assured. As the majority rules, the white race is in control and the practical problem remains to arrange complete co-operation with the least friction.

Negro citizens do not approve a colored advisory committee.

TRAINING FOR WORKERS

Kansas City, Mo., has a new branch which is about to be housed in a high school, to be administered like other branches. The book problem is not different from other branches, the negro clientele being very intelligent.

Ethel McCollough, of Evansville, Ind., read a thoughtful paper on the training of negro workers. Evansville's negro branch, the first of its kind north of the Ohio River, was organized eight years ago. The work of training colored assistants is still in the pioneer stage. The choice of material among negroes is much more difficult than among whites, because of their sensitiveness and lack of mental training. The trained negro librarian gives very acceptable service to her own people. Four colored apprentices have been graduated, sometimes with the regular class, sometimes by special training. Certificates are issued to them.

Jennie L. Flexner, of Louisville, Ky., thought both industrial and classical training necessary for whites and colored alike, to develop an improved relationship between the races. The majority of southern negroes are farmers and farm laborers, who must not only be trained to get something out of their lives, but must have an outlet for leadership provided for them. Racial integrity should be kept by training leaders to develop co-operation with white people. While other professions have growing numbers of negroes, only a few librarians have been trained. The trained negro librarian has a virgin field to work among his own race. He is much needed to supplement the work of schools, which are often open for only a few months in the year.

Thomas F. Blue, of Louisville, Ky., sketched the training given colored librarians in the Louisville library, where he is in charge of the colored department. Local applicants for the Training Class are required to have a good high school education, or its equivalent, and to pass the annual examination. The class spends four to six months in the study of library methods and practice work. Instruction is given by the head and senior assistants of the Colored Department, and heads of departments at the Main Library. This training has been taken by thirty-four persons. Aside from the training of its own assistants, the library has trained most of the young women who are serving in colored branch libraries in the South. Eleven young colored women were sent to Louisville for library training by the librarians at Houston, Birmingham, Atlanta, Evansville, Memphis, Knoxville, Nash-

ville, and Chattanooga. All of these have served in public libraries thruout the South. At present seven are serving in colored branch libraries at Atlanta, Nashville, Knoxville, Chattanooga, Birmingham, and Houston, and from all indications are "making good."

E. Gertrude Avey, of Cincinnati, reported a separate colored branch since 1912, with three colored assistants trained in the local library under special instruction. A second branch will soon be opened in charge of a colored librarian trained with the regular local apprentice class. This has been more satisfactory than giving special instruction. The colored branch costs the same as any other branch, the same methods of book selection are used and the assistants attend the regular staff meetings.

OPPORTUNITY FOR WORK AND WORKERS

J. F. Marron of Jacksonville, Fla., stated that there is plenty of opportunity in the real south for work and workers. Most large cities have little of such service and there is none in the smaller communities. Where already established it is capable of larger development. Progressive colored people will become available for training and the larger minds among them will handle the question of missionary work among their own race. All colored institutions of learning will need such libraries. No high school library is now known in Jacksonville. This is not possible at present as colored schools are overcrowded.

Tommie Dora Barker, of Atlanta, Ga., opened a colored branch in July, 1921, in the largest negro center in the city, combining a business section with residences. She considers the school and the library important restraining influences for negroes. The library registers four thousand users. It is hoped to establish stations auxiliary to this branch in other negro centers of the city. A proposed local program of enlarged school activities will give the library opportunity to obtain room in the high school for a colored library. Large returns are received from the number reached. The present expenditure for administration is large; it is not a cheap investment.

Pearl Hinesley of Roanoke, Va., reported that Roanoke is about to organize a colored branch and has received much inspiration from a colored assistant loaned by Louisville.

SEGREGATION

Miss Rose spoke of the North coming rapidly to a problem similar to that in the South. In New York, the 135th Street Branch is the only one at present having colored assistants, altho other branches are in large, growing negro centers. It is a question whether it should be

made a colored branch or whether colored assistants should be put in other branches. Segregation will be a large problem for the North to solve, altho it is not yet realized in most quarters. Legally, colored and white are on the same ground, but in many cases there is not a real feeling of equality in the library.

Miss Rice of Chicago, felt that the Chicago Public Library had no problem to discuss. No separate branches are considered and work does not differ from that with foreigners. The branch in Abraham Lincoln center has a fast growing colored patronage, with two colored assistants.

William F. Yust, of Rochester, N. Y., thinks there is no race problem there. The problem of control and management is bound to bring forth conflicting experiences in various localities. The varying success of governing boards indicates that advisory boards hold great possibilities of friction and dissatisfaction. It would have been valuable to have statistics collected in the recent questionnaire as Mr. Bertram, secretary of the Carnegie Corporation, recently asked for such figures, which could not be supplied.

ORGANIZATION

Upon the Chair presenting the matter of organization into a permanent A. L. A. section, it was moved by Mr. Settle, and seconded by Miss Ohr, Indianapolis, that such organization be effected. Discussion brought out a feeling that the matter was not yet ready for such a step. Some of the speakers thought the purpose could be served by a Round Table for at least another year, or that all difficulties would be cleared away after four or five years of Round Table discussion. Others deemed the problem too sectional in character to be regularly organized as an A. L. A. section. The motion was therefore amended in such manner as to instruct the Chair to ask the president of the A. L. A. for a Round Table next year, if in her opinion it is necessary.

ERNESTINE ROSE, *Chairman.*

Wanted—A Teachers' Advisor

To the Editor of the LIBRARY JOURNAL:

On my return from a two weeks vacation I find an accumulation of mail, each letter in which is accompanied by a stamp meaning of course that there is urgent need for an answer not to be denied.

In condensed form these are some of the questions:

I must order my books for the year from the county library. My list must be in by September. I have the first four grades. I am helpless. Please make out the list for me. I am entitled to twenty books for each grade.

I have thirty-eight children in the sixth grade. Only three are Americans. What shall I give them to read? They understand only the simplest texts.

Please send me a list of the fifty best books for seventh and eighth grades. I have some money to buy books but do not know what to order.

The school wishes to purchase three sets of supplementary readers for the third grade. What shall I order?

My Board wishes to purchase a set of reference books. It is a rural school. All grades. What would you advise us to get? Please send the name of the best set with the name of the publisher and the price.

What are the best books for teaching home economics in rural schools? We can buy about ten this year.

Please send me a list of about twenty books suitable for a teachers' reading club. We want books about children. Nothing professional. Something human like "Emmy Lou" and "The Evolution of Dodd."

Is Wells' Outline of World History a good book to put into the library for our eighth grade?

My sixth grade has about 75 per cent of foreign children. We cannot use the State English Text. What shall I do?

I am teaching in — county. I am ordered to use the — readers, which they are very difficult since my children are all Swedish. What can I get from the County Library to use before this reader. First grade.

We wish to organize our school library. We have several hundred books. Could you send us a plan for cataloging that is not as complex as the Dewey Decimal. We are none of us experienced librarians.

Why are teachers not taught such things?

CHILDREN'S LIBRARIAN

Postal Card Notices of Fines

In *American Municipalities* for July is given the correspondence between the Secretary of the League of Iowa Municipalities and the Post Office Department with reference to dunning postal card notices. This ruling would apply to the postal card notices with reference to fines which libraries send out. The gist of the matter is that a statement of an amount that is due, and calling attention to a regulation with reference to accounts, etc., may be mailed on a postal card. The following sentence bears on this point:

... This does not include cards that bear notice of assessments of fraternal and other societies which contain a respectful reference to the rules of such order or society that failure to pay such assessment will cause the member to be suspended or that his certificate will become void, if the assessment referred to does not appear to be past due.

The Bookshelf for Boys and Girls

The Bookshelf for Boys and Girls will be ready about the middle of August. Librarians desiring quantity lots of this catalog for distribution during Children's Book Week and the Holidays should place orders immediately. The early printing ensures delivery in time for checking and making possible purchases before the good book weeks.

R. R. BOWKER CO.

THE LIBRARY JOURNAL

669

TWICE-A-MONTH

AUGUST, 1922

THE complexity and perplexity of the many meetings at A. L. A. Conferences is not likely to be lessened so long as the present system prevails of binding everything in a single week's annual program. Unfortunately, the situation is aggravated by the tendency to multiply sections and other sub-divisions, and in this case it is indeed true that "multiplication is vexation." There is already a separate association of the library schools, in addition to the Professional Training Section of the A. L. A., and there is now a proposal to make still another organization of library teachers in a third field. More and more it seems probable that a larger solution of the problem must be attempted, such as the holding of the Conference biennially, with subordinate meetings in the alternate years, which would incidentally provide for a presidential term of two years in which a president might actually exert some useful influence on the policy of the Association, as is scarcely practicable when the initial address of the president is also his valedictory.

★ ★ ★ ★ ★ ★ ★

A SURPRISING vote was called out by the new scheme of electing an A. L. A. president and other officials. No less than 2950 members out of a total of 5307 eligible voted and the result was equally a compliment to President-Elect Utley and to the rival candidate who polled so substantial a number of votes. It is an embarrassment to a voter to have to decide between two candidates when there is no difference of principle on which they respectively stand, and possibly the decisive element in the vote for president was the fact that one was candidate from the East, for Chicago is east to many of the western brethren, and the other was from the far West, so that probably there was geographical distribution of votes. The elections at A. L. A. Conferences, often calling out scarcely more than a hundred votes, had become so perfunctory that the new plan was worth trying, altho it is scarcely to be expected that interest will continue to be shown to the same extent after the novelty of the plan has worn off, and there may be some loss in interest in this method in contrast with that of having an actual poll when there is no real question of rivalry.

★ ★ ★ ★ ★ ★ ★

A T A. L. A. conferences the sessions of the Children's Librarians Section are not only the

largest section gatherings as a rule, but in many other respects surpass the other section meetings in enthusiasm and wide-awake interest. This year one of the meetings was especially interesting because of the first presentation of the Newbery medal for the best children's book of the previous year, as determined by the ballot of children's librarians. By a large majority, it was decided that Van Loon's "The Story of Mankind," originally intended for his own children, tho it has had a large vogue for adult as well as juvenile reading, was entitled to this distinction, and Dr. Van Loon's presence to receive in person the merited honor made the occasion one of unusual interest. The Newbery medal has another function as a memorial of the earliest publisher of books for children, so that it links the past with the present and future in significant fashion, and incidentally illustrates the immense development both of publications for children and of interest in the reading of children. The presentation of this medal will doubtless continue to be one of the salient features of the section's session at future conferences.

★ ★ ★ ★ ★ ★ ★

WHEN Bernard R. Green had completed the construction of the Library building and incidentally developed for its use what is now known as the Snead Snack, it was natural and proper that he should be associated with the Librarian of Congress in its custody and care, and with the office of Superintendent of Building were associated certain duties more properly within the function of the Librarian. After his death this division of functions was less appropriate, and a recent enactment has now placed the maintenance and repair of the edifice in charge of the architect of the Capitol and placed the other functions under control of the Librarian, thru an Administrative Assistant who will be the disbursing officer and will have house-keeping and welfare relations within the library organization. This new position has been filled by the appointment of Mrs. Harriet de Kraft Woods, who has for years been an effective and much trusted official within the Copyright Division of the Library and has there won golden opinions. The change is in the direction of more efficient organization and the appointment of Mrs. Woods is the more interesting because for the first time a woman has been placed in so important a position in the national library.

LIBRARY ORGANIZATIONS

NATIONAL EDUCATION ASSOCIATION LIBRARY DEPARTMENT

THE Library Department of the National Education Association, organized as to membership this year and now numbering more than one hundred and eighty members, held its annual meeting with the Association in Boston from July 5-7. There was an attendance of about one hundred and fifty at each of the three afternoon assemblies, at which the development of adequate library service, library service proper and the reading of school students respectively were discussed.

In discussing the first topic, Joy E. Morgan, editor of the Association's *Journal*, declared that no other single educational agency has in proportion to its cost greater undeveloped possibilities than the free public library. Less than twenty per cent of the people of the United States enjoy the privileges of local library service. Development may be encouraged by establishing workable units of administration, such as county libraries, and by more clearly defining the responsibility of the Federal government and of the states for the development of adequate policies of library promotion. There should be, said Mr. Morgan in Washington a Bureau of Libraries with an appropriation of at least a million dollars a year, charged with promoting the development of libraries.

Sherman Williams, chief of the School Libraries Division, Albany, N. Y., said that pupils should be trained to form the reading habit, and led to make use of a public library in order that their after-school education may partially make good what they failed to acquire at school. Public libraries are the only institutions that can satisfactorily serve as continuation schools for any large number of people. They also furnish the only school for the adult immigrant.

Establishment of service in the school was discussed by Martha C. Pritchard, Teachers' College, Detroit, Mich.; in the locality by Sarah B. Askew, of the New Jersey Public Library Commission; in the state, by James I. Wyer, director of the New York State Library. Florence M. Hale, of Augusta, Me., spoke of "Libraries and Rural Schools," and Ruth E. Drake, of Chazy, N. Y., on "The Consolidated Rural School Library."

The next day's discussion of library service had papers on "How the Library Helps the Foreigner to Make His American Contribution," by Ernestine Rose, New York Public Library; "Ef-

fective Co-operation Between the Public Library and the Public School;" by Bertha McConkey, of Springfield, Mass.; "The Daily Newspaper in School," by O. S. Rice, of Madison, Wis.; and "The Spirit of Library Service," by Mrs. Edward Carter, of Port Arthur, Texas. Edith C. Parker, of Buffalo, spoke on "Story-Telling, its Relation to Literary Appreciation," and Mary E. Hall, of Brooklyn, N. Y., on "The Pupils' Contribution to the Success of the School Library."

Some of the hindrances to outside reading enumerated by A. B. de Mille, of Winthrop Highlands, Mass., in his discussion of books for boys, at the assembly on the reading of school students, were lack of time due to athletics, social clubs in school, the automobile, the moving pictures, and the cheap magazine, immense increase of school population, inadequacy of library facilities, shortage of teachers, and lack of home influence. The most important factor, in the view of the boys, is lack of time, and the only way to awaken their interest in books, so that they will read of their own accord, is to read them short striking passages from sound books in minutes snatched from routine periods, or to organize occasional half-periods outside of school hours for a few interested ones.

To enrich the school program, to enliven a difficult study and to inspire the individual child are among the opportunities of junior high school work, said Laura Grover Smith, librarian of the Virgil Junior High School of Los Angeles, Cal. The plan of grouping the seventh, eighth and ninth grades was first tried in California and worked out as feasible in Los Angeles, where there are now eight junior high schools and three more under construction. The child with the first year of the high school spent in the junior high now enters the tenth grade with much of his restlessness gone and with an ambition to finish the high school. The part of the library is to furnish "valuable, vivid, and cumulative interest" to the daily routine.

If the child finds the way to his own type of reading and starts his own personal relation with books, there is no danger that group instruction will mean standardized product, was the opinion of Frederic G. Melcher, whose paper on "The Child's Own Reading" is printed in the *Publishers' Weekly* for July 22, as is Helen Cosgrave's paper on "The Stimulation of Home Reading."

Librarians of normal schools should see to it

that their students associate, during their normal school course, with the kind of library they wish the students to imitate in the public schools, said Mary E. Richardson of the State Normal School, Geneseo, N. Y. Besides being instructed in the use of their own library with intelligence and without loss of time, the students should be given an outline of lessons to give to the grades, two or three a year, so that at the end of the eighth year in school children will be able to go to any public library and find material on a given subject for themselves. "Training for School Librarians" was also considered by Ruth Tobey of Terre Haute, Ind.

Numerous exhibits added to the interest of the meeting. In the Teachers' Reference Room was arranged an exhibition illustrating school library work. This exhibit, which was in charge of a committee under the chairmanship of Edna Woodbury of the Somerville High School with the co-operation of Simmons College and the H. R. Hunting Company, included material illustrative of the methods of high school libraries and a very suggestive collection of books adapted for school library use. The Boston Public Library, as its contribution to the occasion, arranged a number of special exhibits. In the Teachers' Reference Room was shown a delightful collection of chap books, toy books, primers, and other children's books of the eighteenth and early nineteenth century. In the Exhibition Room on the third floor was a comprehensive exhibit of early text books, together with a series of photographs of school-houses recently erected in Boston and a large collection of pictures of early Boston school-houses presented an interesting contrast to these modern buildings.

In the entrance hall of the building the Library maintained an information desk for the convenience of the visiting teachers. In this hall were also displayed a number of interesting library maps. One of these showed by the use of colored pins the locations of the 320 distributing agencies of the Boston Public Library, together with over one hundred special libraries in the Boston district. A second map, by means of colored circles, showed the proximity of the branches of the Public Library to the people whom they serve. A third map showed the number of public libraries and in the various cities and towns of the metropolitan district; the total number, including branches, is 125, with 2,800,000 books, and an annual circulation of 7,200,000 volumes. A fourth map illustrated in a similar graphic way the library resources of the State of Massachusetts. The Extension Service also made an interesting exhibit in the entrance hall, presenting concrete illustrations of the

sources of information made accessible by the service.

Officers were elected for the coming year as follows:

President, Martha C. Pritchard, Teachers' College, Detroit, Mich.; vice-president, Mrs. Edward Carter, Port Arthur, Texas; secretary-treasurer, Della Frances Northey, Indiana Public Library Commission, Indianapolis, Ind.

MARGARET E. ELY, *Secretary.*

MEDICAL LIBRARY ASSOCIATION

THE 25th meeting of the Medical Library Association was called to order by the Vice-President, Dr. C. F. Wylde, in the absence of the President, Dr. L. F. Barker, at 10.15 A. M., on May 22, 1922, in the Medical Library Building of the Washington University, St. Louis, Mo.

Dr. George Dock, of the Washington University, read the first paper on the program, "The Washington University Library; its growth, use and administration." "The Pioneer Physician" was read by J. Christian Bay, of the John Crerar Library. A discussion was led by Dr. Carl E. Black, of Jacksonville, Ill., on "What part should public library directors take in maintaining a medical library?"

Dr. Wilde brought up the question of having the next meeting in the fall of 1923, as there is no hope of the Osler books arriving until then. A vote showed that the majority was in favor of having the meeting at that time. The meeting then adjourned and the members were guests at luncheon of the Washington University Medical School.

The afternoon session was called to order by the Vice-President, Dr. C. F. Wylde. In the absence of the Secretary-Treasurer, Dr. John Ruhräh, Miss Noyes read his reports. She also said that Dr. Barker had sent out a large number of letters to individual men asking them to join the Association. This letter was read, and Dr. Wylde gave the list of names of the men who had applied for membership. It was moved that all these be elected.

Dr. Taylor moved that the Association send a telegram to Dr. Garrison as he is about to leave for the Philippine Islands for three years. Dr. Barker, President of the Association, spoke on "Our Debt to Medical Librarians." Mr. Fisher moved that a vote of thanks be extended to the President for the work he has done during the past year. A vote was taken as to whether the name should remain the Medical Library Association or be changed to the Medical Library Association of America. The vote was 12 to 9 in favor of the original name, Medical Library Association.

The following officers were elected for the year 1922 and 1923; President, Dr. C. F. Wylde, Montreal, Canada; vice-president, Dr. Henry Barton Jacobs, Baltimore, Md.; secretary-treasurer, Dr. John Ruhräh, Baltimore, Md.; Executive Committee, C. Perry Fisher, Philadelphia; J. H. Ballard, Boston; Dr. L. H. Taylor, Wilkes-Barre.

MASSACHUSETTS LIBRARY CLUB

THE summer meeting of the Massachusetts Library Club, held at North Scituate, June 15 to 17, considered among other topics training for library work, the value of leisure hour reading and the status of modern fiction, the relations of special and public librarians, and the art of story-telling.

The Club was welcomed to Scituate by Frederic T. Bailey, Commissioner of Plymouth County. Margaret Deland gave a reading of her story, "An Encore." At the business meeting which followed officers were elected for the ensuing year as follows: President, Harold T. Dougherty, librarian of the Newton Public Library; vice-presidents, Frank H. Chase, of the Boston Public Library, Florence E. Wheeler, of the Leominster Public Library, and Lucinda F. Spofford, of the Attleboro Public Library; secretary, Orlando C. Davis, of Waltham; recorder, Frank H. Whitmore, of Brockton; treasurer, George H. Evans, of Somerville.

TRAINING FOR LIBRARY WORK

The first paper on training for library work was read by Harriet E. Howe of the Simmons College Library School. The question of having the Club provide a scholarship for some library school student was raised by Mr. Dougherty. A contribution of one hundred dollars from June R. Donnelly was supplemented by an equal sum from members of the Club before the close of the meeting. George H. Evans conducted a symposium on "The Training Class in Theory and Practice" to which Clarence E. Sherman, Lynn; May Ashley, Greenfield; Harold A. Wooster, Westfield Athenaeum; Hiller C. Wellman, Springfield; and Mr. Evans contributed. Mr. Evans stated that in Somerville practice work is secured in six major departments. The class is closely linked with the graded form of service, and promotion later is thru experience and examination rating.

EMPLOYMENT AND RECRUITING

"What the Librarian Looks for in Employing and Promoting Assistants" was discussed by Donald K. Campbell, Haverhill; Frank H. Whitmore, Brockton, and Clarence E. Sherman. Six steps in recruiting were enumerated by Eliza Ruth Pendry of the Harvard Graduate School of Education as: opportunities for try-outs in the

profession; dissemination of accurate information about the vocation; counselling of those interested by persons equipped to do this; vocational education programs emphasizing the social service of the profession as well as its theoretical side; an intelligent placement system, and, as corollary, a follow-up system whereby any necessary readjustments may be made.

PROFITABLE LEISURE READING

The desirability of following the individual bent in the choice of reading was emphasized by Frank H. Chase in his discussion of "How to Make Leisure Hour Reading Count Toward Advancement." For this reason he preferred the Pigskin Library to the Five Foot Shelf, and did not prescribe the classics. Growth must primarily be individual, and it is impossible arbitrarily to map out another's reading. There is no danger in reading slowly or even sparingly if proper mental use is made of the material. As a general aid Winchester's "Five Short Courses of Reading in English Literature" is useful.

MODERN FICTION

John Clair Minot, literary editor of the *Boston Herald* surveyed current fiction. The outstanding and prevailing type, he said, is the biographical novel of protest and discontent, undeniably clever, but frequently marred by incoherence and hysteria. It mirrors the bewildered and baffled youth of a hectic era, groping for self-expression and blindly seeking truth.

May Lamberton Becker of the New York Evening Post *Literary Review* disclaimed any intention of analyzing the popularity of the books mentioned in her talk, "The New Books" she sought rather to formulate an expression of a need. The reading public has a right to expect that American authors shall give it work in the key of American life. This is not the key of tragedy, which never comes into the life of an individual nation until the idea of finality arrives, an idea not natural to the American, in whose life the sporting element bulks large. The approach to middle age, which Mrs. Becker referred to as entering the "dividend years" should not be treated too somberly. One should not, on the other hand, be too insistent on the happy ending, which after all is merely a bend in the road.

SPECIAL AND PUBLIC LIBRARIANS

The Saturday afternoon session was held under the auspices of the Special Libraries Association of Boston, with Laura R. Gibbs, in charge of the Research Department of the Tel-U-Where Company, presiding. Rebecca B. Rankin, librarian of the Municipal Reference Library of New York City, whose topic was "Our Likenesses," mentioned the dissimilarities as

UNIVERSITY OF MICHIGAN STACKROOM ANN ARBOR, MICHIGAN

A view showing an intermediate tier of SNEAD STANDARD STACKS and CARRELLS or private study spaces incorporated in the Main Stack.

The advantage of providing study spaces in the stacks is obvious. This feature of the stack construction has in late years been developed to a high degree.

The University of Michigan installation represents one of the most modern methods of providing a convenient and sufficiently private space for students.

Universities and colleges are realizing the useful and serviceable feature of this arrangement.

Long experience in equipping libraries of all sizes has given our experts a fund of valuable information on Library construction and arrangement, which is available without charge or obligation to the Library Officials and Architects.

Detailed plans and descriptions of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific library construction.

well as the likenesses between the work in her own field and that of public libraries.

George W. Lee in the ensuing discussion said that special librarians have less in common with each other than they have with general librarians, hence it is difficult to make their meetings profitable without the presence of the latter class. Mr. Chase disclaimed any feeling of superiority on the part of public librarians. The name does not matter. The man who changes his occupation does not change his point of view or ideals. He suggested, however, a distinction between those who are the custodians of books and the research workers or "go-getters." Mr. Belden pointed out that public librarians cannot do the work performed by special librarians, and altho able to furnish books must turn more and more to specialists. Ruth Canavan, librarian with Metcalf and Eddy, Boston, discussed the limits to which a librarian may be expected to go in searching for specific information.

STORY TELLING

Margaret Shipman Jamison spoke on the topic "Story Telling as a Fine Art," giving two delightful examples of her own art in telling a Czecho-Slovak fairy tale and Daudet's "Sub-Prefect." The story teller must be mentally alert, she said; skilful enough to change a program at a moment's notice and to bring a story quickly to a close. The Chair at the end of Mrs. Jamison's talk was instructed to appoint a committee of three to confer with the League of Story Tellers for the development of story-telling thruout the State.

MOULTON FUND

After the last session there was an auction of dealer's samples, the proceeds going to the John G. Moulton fund. Many members of the Club remained in town over Sunday to hear Ethel M. Knapp of the Bridgewater Normal School speak on "Poetry for Children" and read some representative children's poems.

FRANK H. WHITMORE, *Recorder.*

NEW YORK LIBRARY CLUB

AT the end of its year of activities on May 20, 1922, the New York Library Club had a membership of 749, including 138 new members elected. One hundred and three members had resigned and or had been dropped. Six numbers of the club *Bulletin* were issued during the year at a cost of \$325, and 4,800 copies mailed to members, libraries, schools and periodicals.

Certification for librarianship was the topic of the first meeting held October 20, in the auditorium of the Central Y. W. C. A., and was pres-

ented by Dr. Charles C. Williamson of the Rockefeller Foundation.

Speakers at the meeting of November 17 in the Stuart Room of the New York Public Library were Dr. W. N. C. Carlton, Annie Carroll Moore, and Jessie Carson, who discussed "Books for our French Friends." Motion pictures showing the library work done with French children by the American Committee for Devastated France were exhibited.

The intimate bookshops of New York were described by Marian Cutter of the Children's Book and Frank Shay at the meeting of January 19, shop, Mrs. Mowbray-Clarke of the Sunwise Turn, held at the Prospect Branch of the Brooklyn Public Library.

Stark Young, dramatic critic of the *New Republic* and Edwin Van B. Knickerbocker of the New York City High Schools discussed "The Play's the Thing," at the meeting of March 30, again held at the Y. W. C. A. The year closed with a meeting on May 18 in the auditorium of the Brooklyn Museum, when the new library building of the University of Louvain was described in an illustrated lecture by its architect, Whitney Warren, with an introductory illustrated talk on historic libraries of Europe by Edward F. Stevens of Pratt Institute Free Library.

Theresa Hitchler of the Brooklyn Public Library is the new president of the club. Claude G. Leland, of the Board of Education of New York City, vice-president, Marion F. Schwab of the Brooklyn Public Library, secretary, and Paul North Rice of the New York Public Library treasurer.

MARION F. SCHWAB, *Secretary.*

CALIFORNIA LIBRARY ASSOCIATION

AT the annual meeting of the California Library Association held at Coronado, June 12th to 15th, President Althea Warren of San Deigo, said in her report on the affairs and conditions of the association:

"We have eighty-seven more members than a year ago. Our treasury is \$2.99 richer. The types of our membership and their ratio to the whole are probably fairly represented by the registration for this meeting, which on Saturday of last week showed that one hundred and ninety-seven reserved rooms, of whom seventeen were men. Three were school librarians, two were special librarians, three were college librarians, three were trustees and the remaining ninety-four per cent were county, state, city or town librarians engaged in general departmental work. Out of a membership of over a thousand we are assembling at our annual meeting about twenty per cent. In addition nine district

20 Vesey St. New York

meetings have been held since January. Probably fifty per cent of our members have this year attended either a district, or the annual meeting. Almost our entire expenditure is made for these meetings. The Association pays printing, postage and stationery charges for the districts as well as traveling expenses for the mid-winter meeting of the executive committee when plans are made for the annual convention. Our only other expensive venture is the yearly publication of the handbook which is chiefly a report of the annual meeting.

"It seems as if the Association should supply some other form of service to the half of its membership which, because of the size of our State and the expenses of travel, cannot attend library meetings. The organization of a Certification Committee has been one effort at such service. The plan of the Committee gives the librarian who has not had professional training an opportunity to get a certificate based on years of service, at the same time giving recognition to college and library school training as forces tending to lift us from the clerical to the professional plane. To make the large expenditure which such education represents a paying one is the chief argument for certification. Ours

is the first state library association to issue certificates. The only way to make it a success is for every member of the Association who voted for the venture to apply for a certificate.

"Another form of service which has been experimented with this year is the publication of a quarterly bulletin. Members have complained that the appointments of district officers and new committee members are slow in receiving publicity. *News Notes* the only medium for the announcements, is a quarterly and its summer number is published so soon after the annual meeting that appointments of the new president are seldom printed in it until January. The executive committee, therefore, voted at their mid-winter meeting to try the experiment of a bulletin to contain C. L. A. news and reading lists of special value to California. One number appeared in March and another in May. They cost approximately \$60 each to print, address and mail. A list of the best books and magazines on California gardens by Sydney B. Mitchell, and a report of the C. L. A. salaries committee were included in these numbers. The matter of continuing them will be put to a vote at this meeting.

IN THE LIBRARY WORLD

MASSACHUSETTS

Cambridge. The Cambridge Public Library has received from an anonymous donor a copy of a book, which, "unless all signs fail, is destined to rival in interest the famous Mazarin Bible." This is "the first compiled Protestant Bible ever printed in Latin" writes librarian T. Harrison Cummings in the *Boston Transcript*. "The editor was John Rudelius, a graduate of the University of Frankfort, who writes the foreword in good scholastic Latin, dedicating the book 'to the most wise and learned Fathers, to the most distinguished men of the city of Frankfort, and to the Consuls and Senators most highly esteemed and always to be honored by me, their student and disciple,' making no mention of any church in particular, but referring in a general way to the good of the state."

Of the "Biblia Sacra" which was issued by the press of Peter Quentel of Cologne in 1527 no other copy is recorded as existing, and of a second edition published in 1529 no copy can be found. The book is excellently preserved as is its binding which is probably not of later date than 1555 which is the date of the owner's autograph on the title page.

NEW YORK

Albany. Messrs. Fuller and Robinson have been appointed architects for the new Harmanus Bleecker Library building to be erected by the Young Men's Association of Albany at a cost of about \$100,000.

Ithaca. By decision of the Appellate Division of the Supreme Court, Cornell University loses the bequest of a library valued at \$65,000 given in the will of Benno Loewey because there is only \$35,000 available which is insufficient to carry out the purpose of the will. The Decedents' Estate Law provides that no person having a wife living shall bequeath to any benevolent, charitable, library, scientific, religious, mission society more than half his estate.

NEW JERSEY

Newark. The contract for the construction of a two story extension of the Newark Free Public Library has been awarded.

West New York. An ordinance appropriating \$105,000 for the erection of a Public Library building has been passed.

MARYLAND

Baltimore. Librarian John Parker, of the Peabody Institute, who recently completed his fif-

*We relieve you of all detail and unnecessary expense***CHARLES SCRIBNER'S SONS,****597 Fifth Avenue, N. Y. City**

tieth year at the library, has prepared a special report describing the growth of the library in the half-century. When Mr. Parker entered the service of the Institute on April 24, 1871, as assistant in the reading room of the library, Philip Uhler was librarian, having succeeded Rev. Dr. John G. Morris, librarian from 1861 to 1867. The library had been open for five years and contained 43,659 volumes, a collection of unusual quality due to the literary taste of Dr. H. N. Morison, the Provost, and the scientific knowledge of Mr. Uhler. The library moved into its present building in 1878. It published its first printed catalog in 1892 in five volumes, followed in 1905 by the second edition in eight volumes, containing 5,422 pages and 300,355 entries, which was "received with great joy by the libraries of the country because of the analytical work which it contained. It represents the labor of 35 years and will always be an achievement of which the Peabody Institute should be proud."

Mr. Uhler resigned in June, 1913, as a result of failing eyesight, and died the following October. Mr. Parker succeeded him. Among the constant users of the library whom Mr. Parker recalls are Josiah Royce, Sidney Lanier, Daniel Coit Gilman, Edward Everett Hale, Basil L. Gildersleeve, and H. L. Mencken.

VIRGINIA

Richmond. The City Council's Committee on Utilities has recommended that a site be purchased for a Public Library at a cost of \$90,000 also that a bond issue of \$150,000 be made to cover costs.

ALABAMA

Birmingham. Gifts to Birmingham-Southern College recently announced include \$50,000 for a library, the name of the donor withheld.

OHIO

Cleveland. Ground for the new Public Library will probably be broken this fall, says the *Cleveland News*. The council has approved an ordinance granting the Library Board the right to erect its building in conformity with the street line of the Federal Building.

WISCONSIN

Milwaukee. The seventy-seventh county branch of the Milwaukee Public Library system has been opened. A new system of parcel post delivery has been arranged, whereby those in outlying communities may have books mailed to them with the time limit of three weeks. The library pays the postage to the borrower, who pays the return postage.

MINNESOTA

Minneapolis. Actual work on testing the site of the new Minneapolis Public Library has been begun and it is expected that construction will be begun in the autumn.

St. Paul. Construction of a library building for the University of Minnesota is to be begun shortly. The building, which will cost about \$1,500,000, is part of an extensive program inaugurated by the University in 1919, in which it is expected to spend about \$6,000,000 during the next ten years.

TEXAS

Waco. Preliminary plans have been made for the Baylor University Library building to replace that destroyed by fire in the spring.

Waco. The Waco Public Library has scored a victory for increased appropriation. On July 11 fourteen amendments to the city charter were submitted to the people. Of the seven which carried only two involved increased taxation: one additional cent for Camerol Park and one additional cent for the library. The library which won by 1164 votes to 637 now has three cents on the \$100 valuation.

Galveston. Construction of a library, museum and central heating plant for the Medical Department of the University of Texas is contemplated in the near future. The building will cost about \$150,000.

Houston. On May 6th a bond issue of \$200,000 was favorably voted for a new central library building for Houston. It is expected that the \$200,000 will provide the first unit of a larger building. A plot of ground two or three blocks from the site of the present library building will be purchased by the City. The present library building (a Carnegie building) and its site will be sold. It is expected that about \$100,000 will be derived from this property. This amount will be used for the construction and equipment of branch library buildings in Houston Heights and on the north side of the City.

CALIFORNIA

Pasadena. The sum of \$300,000 has been given to the California Institute of Technology. Of this \$250,000 will be used for an extension of the recently completed Norman Bridge laboratory and the remaining \$50,000 toward a scientific and technical library for the Department of Physics. The plan is to spend \$10,000 in book purchases during the coming year and to set apart \$40,000 as a permanent endowment fund.

OPERA SCORES

A SPECIAL OFFER

The following grand operas, mainly by famous American composers, are important to all interested in the development of contemporary opera, especially opera in America. This offer, pricing the scores practically at cost of manufacture, enables virtually every library to have the collection on its shelves. The offer is for the complete lot only.

BUCHHALTER	A Lover's Knot	<i>Net</i>
DAMROSCH	Cyrano	\$2.50
DE KOVEN	Rip Van Winkle	4.00

The Keyless Lock Binder

All we ask is the opportunity to prove the merit and quality of these Library Magazine Binders. Strongly and firmly built they withstand the wear of long and continued usage.

But more than that: Finished in Holliston Library Buckram they reflect the taste and beauty of the well-appointed Library.

Made in all sizes and styles of Binding.

A New Department by

WILLIAM LYON PHELPS

Professor of English Literature in Yale University

SCRIBNER'S MAGAZINE

In this monthly meditation MR. PHELPS will discuss new books, new plays, music — anything connected with literature and the arts. He will not talk about politics or sociology, but he may use any new book or new play as a point of departure for reflections on contemporary literature, life, morals, and manners. No one is responsible for his opinions or statements except himself. He will frankly use the first person singular, and will talk to the readers of SCRIBNER'S MAGAZINE as candidly and intimately as possible, so that every reader may feel that he is engaged in a personal conversation with the author, for it will be talk, not oratory, comments rather than rhetoric.

Perfumes and Cosmetics Their Preparation and Manufacture

By G. W. ASKINSON

The Latest Book Published on Perfumery

354 Pages

Fully Illustrated

A comprehensive treatise, in which there has been nothing omitted that could be of value to the perfumer or manufacturer of toilet preparations. Complete directions for making handkerchief perfumes, smelling salts, sachets, fumigating pastils; preparations for the care of the skin, the mouth, the hair, cosmetics, hair dyes and other toilet articles are given, also a detailed description of aromatic substances, their nature, tests of purity, and wholesale manufacture, including a chapter on synthetic products, with formulas for their use. A book of general as well as professional interest, meeting the wants not only of the druggist and perfume manufacturer but also of the general public.

Fifth Edition, Much Enlarged and Brought Up-to-date.

WHAT IS SAID OF THIS BOOK:

The most satisfactory work on the subject of Perfumery that we have ever seen.

We feel safe in saying that here is a book on Perfumery that will not disappoint you, for it has practical and excellent formulas that are within your ability to prepare readily.

We recommend the volume as worthy of confidence, and say that no purchaser will be disappointed in securing from its pages good value for its cost, and a large dividend on the same, even if he should use but one per cent of its working formulas. There is money in it for every user of its information.—*Pharmaceutical Record*.

Children "Read Without Persuasion"

THE BOOK OF KNOWLEDGE

THE CHILDREN'S ENCYCLOPEDIA

No reference set has ever been given broader practical tests than the Book of Knowledge has received at the hands of tens of thousands of children, to whom it has been made available in the library, the home and the school.

I. H. McINTIRE, *Supt. of Schools, Muscatine, Iowa*, writes: "The Principals report that no books in the libraries have been used as much as these books have and that the children thoroughly enjoy them and read them without persuasion. In my opinion there is no set of books written for children that approaches this set in value. They contain material of such a nature, and are written in such an attractive manner, that children devour them as eagerly as they do fiction and derive incalculable benefit from them."

The Boston Public Library Is Using 72 Sets of The Book of Knowledge

THE BOOK OF KNOWLEDGE is in extended use among libraries. The Boston Public Library has bought 72 sets. The very complete index adds greatly to its value for reference purposes. Many librarians have noted with approval its inclusion of so much out-of-the-way information, not found in any other work. The Book of Knowledge also contains 10,000 educational pictures.

Every opportunity is afforded to librarians to examine the Book of Knowledge without obligation to buy.

THE TECHNIQUE OF THOMAS HARDY

By JOSEPH W. BEACH

A new study of Hardy's novels for all lovers of English literature. This book discusses the structural style of the author in each of his novels and shows the gradual subordination of artifice to art in Hardy's successive writings. The reader who is interested in noting the various methods of novel-writing employed by one great author will enjoy this volume on literary craftsmanship. Mr. Beach's work is an aid to the better appreciation of good books.

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

SEPTEMBER 1, 1922

Books and Book-making in the United States*

By HELEN E. HAINES

JUST a century ago, in the oracular columns of the *Edinburgh Review*, there appeared a critical article upon a recent work of American history. It was Seybert's "Annals of the United States"—annals of a nation not yet fifty years of age—and the veteran reviewer to whom it was assigned summed up one aspect of those annals in a single sentence:

"In the four quarters of the globe, who reads an American book? or goes to an American play? or looks at an American picture or statue?"

Sydney Smith's famous question has gone down thru succeeding years invested with a malice that is undeserved. It was not necessarily malicious: a perfectly justified and natural question, to which only one answer was possible. But it offers a vantage point from which to review the annals of books and book-making in the United States to-day that brings out the full magnitude of the contrast between the thin stream that in 1820 was struggling over its narrow, stony course, and the great flood-tide of 1922, on which we who work and live with books are borne resistlessly along.

This flood-tide of the books of to-day is the central theme for our present meeting. Our libraries are the reservoirs filled from these flood-waters, helping to distribute them in a thousand channels of service, extending each year to wider areas their enriching and fructifying influence. Too often, I think, librarians look on this ever-renewing book flood as an intolerable handicap, even a menace, to their ambitions. How much we could do if we did not have to spend so much time and money on books! We could have such fine library buildings, such beautiful lighting systems and reading tables, such bulletins and reading lists, we could pay such munificent salaries, if only we could escape from this ceaseless outpouring of superfluous, annoying, expensive, space-filling

books. It is a perfectly natural grievance—until we reflect that, in the last analysis, books are the only reason for and justification of our existence. We as librarians are by-products of the book development of to-day. The life and growth of our libraries is inseparable from the rise and swell of the flood of books that is sweeping thru our world.

So, it seemed both interesting and useful to make "Books and book-making" the subject for special consideration at this meeting. "Book-making in the United States" does not mean only native literature, but the whole book field. Our purpose is to present it, not as librarians choosing as few books as possible, but as lovers of and workers among books, surveying our domain, rejoicing in its richness and variety, and tracing the causes, aims and influences that have formed and directed its development. To present this theme most effectively, we are tending it on the publishing houses which are the chief sources of our present book production, reviewing the chief general factors in the development of book-making, and then setting forth in broad groups the work of representative American book-makers—the influences that fostered and strengthened our native literature in the building up of such historic old publishing houses as Houghton Mifflin, and Little Brown; Putnam, and Harper; the influences that thru Macmillan, thru Scribner, in later years thru Doran, and Dutton, have made us so close a part of the commonwealth of English letters; the newer influences of thought, of questioning, of after-war disillusion and of reinvigoration that are finding expression in the most recent literature of to-day; the growth and the immense range and development of our book-making in the field of science, as shown in the steady rise of specialized technological publishing and in the multiplication of subjects upon which a whole new body of technical literature is rapidly building. We see within a quarter-century our university presses developing until they

*Paper read before the California Library Association at Coronado, June 12, 1922.

are now an important factor in American book production, giving opportunity and encouragement to undertakings otherwise impracticable; and we see book-making for children, bursting the small brown pods of the Rollo books and the Franconia stories to expand into the rich-hued fruit of Van Loon's "Story of Mankind" and the delicate confection of "Peacock Pie."

This presentation is supplemented and illustrated by a generous gleanings of the books themselves, chosen to illustrate the development, the influences and the tendencies of modern book production; and in this exhibit alone I think any library worker will find embodied the reason and the purpose of library service.

As a matter of fact, the annals of American books and book-making fall in almost their full entirety within the period since Sydney Smith wrote his review.

Setting aside the story of publishing in the Spanish possessions, and of rare and older works, of the Cambridge Press, of the early almanacs and New England primers, the polemical treatises and political dissertations, which belong rather to Americana and national bibliography than to a survey of American book production, only a few names appear on the roster of American publishers before 1820.

When John Dunton, the ill-fated and eccentric English bookseller-publisher, made his voyage to America with a cargo of books in 1688, there was no book-trade in America, tho printing had started in three or four places in New England. There were book-sellers and printers in Boston, but Dunton found no sale for his cargo as he travelled leisurely thru the larger cities—and he complained bitterly that "he who trades with the inhabitants of Boston may get plenty of promises, but their payments come late." Before the Revolution there were not in the Colonies any publishers who were not also printers and booksellers, and it was only gradually thru later years that publishing came to be a distinct and specialized calling. Benjamin Franklin, tho he has long been adopted into the publishers' guild, was in fact a printer rather than a publisher.

Up to 1820, Isaiah Thomas and Matthew Carey were the only names of first importance and wide activity in the annals of American publishing. Isaiah Thomas for many years issued from his great publishing house in Worcester, most of the Bibles and school-books and other general literature in New England; he imported the first font of music type that was used in this country; he wrote the first American history of printing; and he founded the American Antiquarian Society and endowed it with large bequests.

Matthew Carey had a career even more active and influential. The publishing house he founded in Philadelphia in 1785 still exists, tho under a different name, and is one of the oldest in this country. Carey was what we would call to-day an enterprising general publisher. He had a vision for aims and methods far ahead of his day, for he sought to organize and stimulate the book-trade, was first president of the short-lived American Company of Booksellers, and planned the "literary fairs," of which one was held in New York in 1802, much like the Marshall Field and Wanamaker's and other book-trade fairs of the present. He published the poems of Philip Freneau, poet of the Revolution; he published the first American best-seller—Mrs. Susanna Rowson's tearful novel, "Charlotte Temple," wept over by successive generations and still commemorated by the grave in old Trinity Churchyard, in New York, where the original Charlotte lies, and which I have seen not so many years ago, almost always marked by fresh flowers. From Carey's publishing house came the works of Noah Webster, the dictionary maker; the early books of Washington Irving, Cooper and Charles Brockden Brown, and Weems' Life of Washington. By 1820, Carey's business had grown to wide extension thru the United States and he had agents in England, Europe and South America. He was established in the largest and most prosperous city in the United States—the "red city" of Philadelphia, that we still see mirrored in the novels of Dr. Weir Mitchell. Until 1817 he had no rivals; but in that year a sturdy Methodist farmer lad from Long Island set up a small printing press in a narrow brick house in old New York; his three sturdy young Methodist farmer brothers joined him there; and by 1820, when Sydney Smith swept the American horizon with a glance and found it void, the infant firm of Harper Brothers was vigorously at work for the future transformation of the landscape. Within fifteen years from 1822 the Harpers had been reinforced by Charles Wiley (father of the John in the present firm name); by Daniel Appleton; by the indefatigable young George Palmer Putnam; by Moses Dodd; and in Boston by the new fledged firm of Little and Brown—and the foundations of modern American book production had been firmly laid.

To present in a brief comprehensive survey so great a subject needs broad strokes of generalization. We may, I think, in such generalization, consider the beginnings of modern American book production as coming within the fifty years, 1800 to 1850; and its development as falling in two broad divisions, pre-international copyright, which brings us to 1890; and post-

international copyright, from 1890 to the present.

For the first quarter of the nineteenth century the chronicle is scanty, save for the few names previously mentioned. Newspapers were the chief vehicle of our native writers. Irving, Bryant, Whittier, Poe, N. P. Willis, Joseph Rodman Drake, all made their first appearance in newspapers. Mrs. Trollope visited us in 1827, and reported her highly distasteful impressions in her famous book, "Domestic Manners of the Americans." In it, she gives one chapter to literature and her opinion is as frank as Sydney Smith's and equally justifiable. She is able to mention three novelists, three poets, two preachers and one historian who possessed some claims to consideration; beyond them, a vacuum. Such book production as there was was confined almost entirely to reprints of English works. In 1820, when Irving and Cooper began their careers, our book production was seventy per cent British. Then gradually there came an increasing interest in and representation of native writers, and by the mid-century the names that still stand as the first fruits of American literature—the names of Emerson, Holmes, Hawthorne, Mrs. Stowe, Longfellow, Dana and Channing and their fellows—were rising upon the horizon. Then and for some time to follow Boston was the chief center of literary and publishing activity; Philadelphia had lost ground; and New York was striding to the front in the development of the business of book production—of actual printing and publication, the Boston still held prestige as the home of literary associations and authorship. These years and the forty years succeeding were the Years of Piracy, the pre-copyright days—a period of development, but development retarded and narrowed by the immense circulation of cheap reprints of English books, and by the cut-throat competition of the publishers issuing them. All English books were the prey of the American publishers who could first secure them—despite the effort to maintain a certain standard of so-called "trade courtesy." English authors had no rights in the United States and received little if any compensation from their American reprinters. Native American literature had slight encouragement to grow under the handicap of the flood of English reprints issued at lower prices than the copyrighted work of American writers could compete with.

There is a flavor of genuine piracy in the publishing annals of those days, when emissaries from rival publishing firms waited at the docks for the arrival of the packets bearing the precious packages of new books from London, each rushing to seize his consignment and dash with it to

his printing office, where the pages were torn apart, the printers worked furiously, and the lucky firm "scooped" its rival by getting out its reprint a week, or a day, or even a few hours ahead. The most familiar products of the pre-copyright era were the various series of paper-bound quarto reprints—Harper's Franklin Square library and the Seaside Library of Munro were perhaps the most popular. They will be remembered even to-day by those of my own generation, who can look back upon hours of delight spent absorbing the closely packed pages thru which William Black, Wilkie Collins, Charles Reade, Thackeray, Hardy, Blackmore, Mrs. Oliphant—yes, even the Duchess (Do you remember Molly Bawn and "Portia, or, By Passions Rocked?"), and Rhoda Broughton—moved our young hearts to thrills of excitement, palpitations of sympathy, and throbs of romantic emotion that Dr. Freud would today label by some unnecessary and unpleasant name. That the era of piracy instilled thru the length and breadth of the United States an astonishing wide acquaintance with English literature I think must be admitted. It was an educational influence, despite its dishonesty and injustice—and a curious example of the interweaving of good and evil in human experience. But the bitterness it caused among defrauded English authors long left its stigma upon American publishing. It is expressed with unforgettable damnatory power in Kipling's "Rhyme of the Three Captains," which most Americans read enjoying its gusto of vituperation, but little realizing that it is an anathema invoked upon the American pirate firm of Harper and Brothers.

In 1891, after nearly thirty years of effort, the first international copyright law was enacted by Congress, and American book-making entered upon its second period of development. In the long struggle for copyright the publishing world had been divided into two opposing camps, the Putnam firm heading the advocates of this step toward honesty and justice and the House of Harper leading the opposition, with commercial and educational arguments.

By the 1891 act, copyright protection was extended to transatlantic authors whose countries gave reciprocal protection to American authors. This protection, however, was limited and qualified by the famous "manufacturing clause," which provided that to receive copyright protection all books must be manufactured in the United States. This provision was continued in the amended and improved act of 1909, and so far it has prevented the United States from becoming a participant in the International Copyright Union, in which the civilized nations of the world guarantee the protection of literary

property. At the present time the copyright law is again under revision, and the amendatory bill now pending in Congress repeals the manufacturing clause and provides for full acceptance by the United States of the established principles of international copyright.

This may seem superfluous detail, but the whole subject of international copyright is closely woven into the development of our national book-making. It has special significance to librarians, aside from that, in its relation to importation. According to the present copyright law libraries are permitted to import English books in the original editions or institutional use. The amendatory law greatly restricts this privilege in conditioning such importation upon the consent of the proprietor of the American edition. This of course would mean an almost complete check upon the present practice of libraries, of importing many English books in the English editions which are less expensive than the American edition. This provision seems to be the only feature of the amendatory bill which has involved contest—it is still being urged, on the one hand, by American publishers, and protested, on the other, by American librarians.

The effect of international copyright upon American book production was a stimulating one. It encouraged native literature, giving a fairer field and greater prospects of reward to American writers. It developed the mechanical side of book-making, in its greater control of the market. It greatly increased the price of books; and of course it checked and finally exterminated the cheap paper reprints of current English literature.

Our post-copyright period seems to fall naturally into three broad divisions—the period of adjustments and growth, from 1891 to 1914; the war period, 1914-18; and the period after the war, from 1918 to the present, which it seems to me we have seen pass thru reaction and revulsion to re-invigoration.

Thru nearly a quarter-century, from 1890 to 1914, we can trace the process of adjustment and growth—marked by the increasing supply of American books, the fostering of American writers by publishing firms, and the rise of the "best-seller." The first monthly list of "best-sellers" was published by the *Bookman* in its first issue, January 1895. There were improvements in printing, higher standards and better taste in typography and design. There was a growing specialization and diversity in publishing, an inflowing of European influences enriching the older currents of English and American influences in our literature; and there was a steady movement toward more effective stand-

ardization and organization of trade methods—in price maintenance, in efforts toward the training of book-sellers, in more widespread publicity, and in a growing solidarity of action. These seem to me the special tendencies of the years before 1914, when American book production reached its zenith, with a total annual publication of over 12,000 books. For, in spite of our conviction that the tide of new books mounts higher every month, the total American book production of 1921 was nearly four thousand volumes less than that of 1914.

Then came the war years, 1914 to 1918—a strange and terrible period to look back upon now, with their increasing tensity, their transformation of our world, at first gradually, then holding us in unescapable grip. American book production dropped over two thousand volumes in 1915, the first full war year. It regained a little ground in the two following years, but in 1917 when the United States entered the war it fell still lower, and this decrease has steadily continued.

The war brought its own distinct kind of books. There was a general shifting in the proportionate representation of classes. History mounted; personal narratives reached flood tide; military and naval science suddenly came into existence (there was no appreciable production of military books in the United States before the war); books in technology, aviation, shipbuilding, books on food values and food resources, pushed out fiction and children's books. Bookstores and libraries alike were congested with war books and it seemed as if nothing else would ever be produced in the world; when on November 11, 1918, the monstrous structure suddenly collapsed, and we found ourselves in the strange and bewildering dawn of another period—after the war. What has become of the thousands of war books that then, as if by the stroke of an enchanter's wand, suddenly became lifeless? We see some of them still, in close-packed ranks on our stacks, undisturbed, gathering dust; but the immense quantities that filled the bookstores within a few months were gone—melted down, perhaps; dissipated, mysteriously abolished.

Our after-the-war period, from 1918 to the present, as I said, seems, tho less than four years old, to have passed thru reaction and revulsion and to be now entering upon a stage of reinvigoration. At first there was an immediate gasp of relief, as when one wakes from a nightmare—a desire to escape even from remembering what was unforgettable. Publishers turned from war themes, especially from novels of the formerly most desired type. In

fiction and in the movies (both seeking to gauge public taste) the war dropped out of sight. Along with this came the movement of revulsion: bitterness, disillusion, fires of resentment smothered under repression, now breaking out in fierce and burning expression. This revulsion has strongly tinged our present literature and is a growing stream of influence, not only in novels on war themes (such as "Three Soldiers," or "The Lonely Warrior,"—but in the temper of our realists and naturalists in fiction, and in much of the work being done in contemporary history, in biography (such as the recent autobiography of Ludwig Lewisohn), in literary criticism, in sociology and in philosophy. On the industrial and commercial side also there was depression and great economic difficulty, almost paralyzing production.

Yet now I feel that a fresher and stronger vitality is succeeding to revulsion and disillusion; that we are in course of re-invigoration and that American book production is entering upon its richest period of development. That this belief may not seem a bit of shallow optimism I should like to indicate the reasons on which it is based. There are four reasons: the present development of publishing in variety and organization; the development of printing and book-making; the development of contemporary literature in workmanship and in content; and the development of united effort to stimulate the use of books.

The present development of publishing will be evident in detail in the later papers on our programme. Tho probably a dozen new general firms of importance have come into the field since 1914, there has been more intensification than extension of activities. Our leading general publishers are still those whose names are part of American book history—Harper; Little, Brown; Holt; Houghton; Macmillan; Dodd Mead; Appleton; Scribner; and the rest of the familiar company. None of these have been discontinued. In spite of economic difficulties there has been no serious failure in the publishing world for nearly a quarter-century. The general firms of more recent development—Dutton, Doran, Doubleday, Knopf, Boni and Liveright, Harcourt—have found stability and success. Publishing is centering more and more in New York in its literary activities, but on the mechanical side the great book-making plants are being transferred to suburban locations. The latest move in this direction is that of the Harpers, who are to leave their historic "ogre's castle" in Franklin Square for uptown New York offices and a great printing plant in Camden, New Jersey.

Specialized publishing has greatly increased. Such firms as the Ronald Press, Shaw (business books); Spectator (insurance); World Book Company (reference and educational), and the various new firms identified with technology, show the growing demand for books which are tools for workers.

Chicago, Indianapolis and Cleveland have their firmly established and notable publishing houses, as Boston and Philadelphia still have their historic firms; but more and more "the great trade" centralizes in New York. One of the marked tendencies since 1914 is the great increase in good English translations of foreign books. Every year brings more promptly to American readers the best continental literature—Spanish, Russian, Dutch, Polish, Scandinavian; and there is a steadily rising stream of South American books available in translation. The widening familiarity with such books as "Hunger," "The World's Illusion," "Clerambault," "Growth of the Soil," "Maria Chapdelaine," must steadily diminish American provincialism, and deepen and enrich our own literary art.

Another factor in this development is the rise of our university presses. Few of us realize that the first of these was the Chicago University Press, founded in 1892, in which year it issued two books and a few pamphlets. At present it has a list of 900 publications; and its work is paralleled or exceeded by a dozen other American university presses—such as the University of California with its constant outflow of scientific monographs, Yale with its great popular historical series and its volumes of essays and poetry, Harvard with its increasing number of works of scholarly and reference importance. Our university presses are now, with an historic background of thirty years, emulating the work done thru four centuries by the great presses of Oxford and Cambridge.

In the same way we see the development of printing and book-making—the early work of DeVinne, the later work of Updike and his Merrymount press, and the present influence of Bruce Rogers have all been instrumental in setting higher standards of art and workmanship; and there are many delightful examples of this in the current publications of the day—in spite of the epidemic of typographical errors that since the war seems to have ravaged every publisher's composing-room.

On the development of contemporary literature in craft and in content I can barely touch. True, we have a mass of the trivial—platitude, and shibboleth, and commercial product. Our defects are made known to us all in the caustic commentary of our Menckens, our young intellectuals and our radical Jeremiahs. There is

truth enough in this commentary. But there is also a welling up of invigoration and achievement in the stream of current literature. Barrett Wendell's magnificent summary of the literary traditions of Europe; such a biography as Beveridge's Marshall; Hendrik Van Loon's "Story of Mankind"; such a thought-transforming work as "The Mind in the Making"; such significant poetry as Edwin Arlington Robinson's; the brilliancy and precision of Edith Wharton and Hergesheimer—these are just a few names that hint the richness and stimulation and the artistry of workmanship in our present native literature. And this of course does not represent the full tide of current book production, in which we see represented all the influences moving the world, in thought and ideal and action. To look over the lists of Macmillan, of Scribner, or turn the pages of the Trade List Annual, one cannot but feel the universality of the domain of human thought and the vital energy of the world to-day.

Last comes the development of united effort to stimulate the use of books. We are beginning to realize that libraries, publishers and booksellers alike are working for the same end: for the better knowledge and the wider use of books by the great American public. The effects of this realization are evident in the revival of bookselling, so notable within the last year or two; in the organization of book trade publicity, and especially in the working out of the Booksellers "year-round campaign," in which libraries have shared and profited. The better publishing and the better bookselling we have; the more books read and used; the more the service of the public library will be needed and the more effective it can be. It is as Edmund Lester Pearson said in his pungent article "What's the Matter with the Public Library?" the one great complaint against the public library is that it never has any new books. And there really is no remedy for this grievance. "Not the brightest and most efficient wonder-worker of a trained librarian can make three copies of Mr. Wells' 'Outline of History' go round among four hundred people who wish to read it, without forcing some of them to wait a long, long time. There is no modern scheme of efficiency which will make ten copies of 'If Winter Comes' or of 'Cytherea' satisfy the insistent demands of hundreds, thousands, of applicants who wish the book within a few weeks of publication. . . . If the public libraries are to be satisfactory more people must be willing to buy books for themselves, or to spend ten or fifteen cents to hire a novel from a commercial circulating library." The more books that are sold for home consumption, the more relief the public library will have from

one of its most pressing difficulties, and the freer it will be to improve its collection and broaden its service.

As we close this brief and partial survey of the field of modern book production, we can hardly escape a feeling of hopelessness before the immensity and the onward sweep of the flood of books pouring out thru the years. What will our libraries do, as time goes on and this unceasing tide continues? No slackening of the flood is possible. On the contrary, its rise is sure and steady—a part of the acceleration of life itself. You remember Henry Adams' estimate of this acceleration:

"The world did not double or treble its movement between 1800 and 1900; but by any standard known to science—by horsepower, calories and volts, mass in any shape—the tension and vibration and volume and so-called progression of society were fully a thousand times greater in 1900 than in 1800, the force had doubled ten times over and the speed approached infinity and had annihilated both space and time."

But our concern is not with the future. How the libraries of the year 2000 shall deal with the book production of their day need not disturb our peace of mind or rouse gloomy forebodings. Let us know our books and use them, house them as best we can, and rejoice in their abundance and their promise. For the future, I think the best presage we can have is given by the recent announcement of the special committee of the Sage Foundation on a Plan for New York City and its environs. Here is outlined a metropolitan area that will embrace territory in New York, New Jersey and Connecticut; that will be developed on an elaborate system of linked industrial and residential centers, ensuring approved standards of living, of education, and of labor; that will provide for a population estimated at thirty-seven millions in the year 2000. It was only a little over one hundred years ago that the original street system of New York was laid out, and its planners then said: "It may be a subject of merriment that the commissioners have provided space for a greater population than is collected at any spot on this side of China. . . . It is improbable that for centuries to come the grounds north of Harlem will be covered with houses." At that time New York had a population about one hundred thousand; at the present time it has nine millions; at the end of the century it will reach thirty-seven millions.

And so, with this portent for the future, I think we may feel that the annals of book production in the United States have so far covered but the opening chapter.

Libraries and Museums

By JOHN COTTON DANA, Librarian of the Free Public Library, Newark, N. J.

VI. Pictures in Place of Objects

A COLLECTION of pictures is as truly a museum as is a collection of objects. If the pictures are many and are classified by the subjects they portray, they form a good museum. If they are thousands in number, and are well classified, and if they include motifs for designs and pictures of objects commonly displayed in museums of art, industry, history and science, they form a very good museum. And, once more, if they are many, are well classified, depict such objects as museums show, with suggestions for design added, and, if they are so installed as to be easily examined and are open for examination to all inquirers and are lent freely to those who wish them for home and office use,—then they form a museum of greater utility and of greater educational value than do collections of objects in most of the museums of this country.

That statement repeats and emphasizes a paragraph in No. III of this series (L. J., Sept. 1, 1921, p. 698).

The Newark Public Library has 500,000 pictures, classified under 3,600 subjects. Of these pictures, 60,000 are mounted, each on a separate card, 13x17½ inches in size; the rest are grouped by subjects in folders of heavy manila and are in alphabetic order by their subjects with those which are mounted.* The mounts and folders are labeled by subjects in upper left corner, and stand in boxes which are open for use. They may be examined for needed items much as are cards in a card catalog. Little is said in this paper of their use for purely illustrative purposes, that use being largely as aids to teachers. The fullness of the collection along this line is suggested by the fact that on the subject of Christmas alone it contains over a thousand items, half of which are colored. To this should be added the fact that as Christmas approaches the supply of pictures appropriate to the season is always entirely exhausted.

What has all this to do with a museum? The question has been answered in the statement already made, that a collection of pictures such as has just been briefly described is in itself a

museum. In Paris is a great collection of pictures, with no accompanying objects, which frankly calls itself a museum.

Consider what the average casual visitor gets from a museum visit. He sees rare and expensive paintings; and incidentally it should be said that, if he looks at more than a dozen or two his feet and legs ache from the journey over polished floors, his back aches from being held long in the proper picture-gazing pose, and his eyes, tho they may not smart with fatigue, are so wearied by looking long and earnestly at colors that they have lost much of their normal powers of discrimination and enjoyment. Assume that he wanders long; visits a hall of armor; marvels at the quantity of vases that experts consider worth his examination; is momentarily enthralled by plaster casts; is entranced by bits of ancient cloth seen thru glass rather darkly; and reads the names of scores of painters and sculptors, he goes away somewhat pleased with his powers of persistence in pursuit of art, and exceedingly tired of museums.

That describes fairly well, I believe, the burden of joy and weariness which the average museum grants to the average visitor. If we ask what they gain who go to museums for definite purposes, we find, first of all that those who thus go are few in number. Then we learn that of this few the greater part are trying to learn the art of painting; that some are students of painting in a general way, with perhaps special interests in certain parts of the whole field; that a small handful is looking for hints on household furnishings and decoration; and that a still smaller group is interested in design and perhaps is seeking designs for a specific purpose. None of these visitors, it should be noted, can, save in exceptional cases which must be duly certified by the authorities, touch, handle and examine closely the objects they may wish to study and make use of.

All this is not said by way of criticism of museum methods; but merely to contrast the homely, practical value of an easily accessible collection of pictures with the lack of usefulness which the casual visitor and inquiring and seeking soul alike find in the average museum collection of objects. I should add that in the ordinary museum of science visitors usually find their travels less tiring—perhaps because few of them are persuaded into a museum of science unless they have keen interest in certain collec-

*See "The Picture Collection, Revised," 1917, \$1.00; "Decorative and Educational Pictures," 1912, \$1.00; "Aids in High School Teaching," 1916, \$1.00, all in the American Library Economy Series. For sale by Elm Tree Press, Newark Office, 14 Mt. Prospect Pl., Newark, N. J.; The H. W. Wilson Co., 958 University Ave., New York City; and Grafton & Co., 8 Coptic St., Bloomsbury London, W.C. 1, England.

tions in it—and because, if students, they gain more readily permission to handle and study closely the objects that appeal to them.

Instead, now, of attempting to draw a contrast specifically between the experiences of museum visitors and those of users of such a collection of pictures as forms in fact a veritable museum, I give a few examples of the use made of Newark's iconographic encyclopedia—its picture collection,—and then add references to some of the many books and portfolios of plates that have been broken up and added to it.

By way of parenthesis let me repeat what has already been said in previous numbers of this series that the coming museum will be conceived and administered much after the methods of the public library of today, making little of rarity, age and cost, thinking not over much of installation, of grand and lovely galleries and of painfully guarded preservation, and much of service to the public and of use by the public. And let me add to this the suggestion that a library which has ambitions toward a museum within itself, or toward encouraging and aiding the beginnings of a museum in its community, will be wise if it makes first of all a museum of wide appeal and large utility in and by a carefully and conveniently arranged collection of pictures.

Here are a few of the inquiries recently answered by the picture collection and fairly suggestive of many others:

An ivory carver, making figures of animals, wished to learn of the hind foot of a camel, and got what he needed from half-tone prints of photographs which showed the feet of camels in several different positions.

A moving picture corporation needed a view of the main street of the town in which Lincoln practiced law, at the time when Lincoln was there; also a picture of a garden in the suburbs of Paris of the date of Peter Ibbetson; and furniture and dress of the period; also pictures of men smoking in Peter Ibbetson's day to determine which were then more commonly used, cigars or cigarettes; also a view of Chinese restaurants in San Francisco and China,—and secured them all.

The inventor of a fire-proof thatch asked for and found pictures of English thatched cottages with drawings showing how a thatch is laid,—all for an advertising campaign.

A maker of automobile bodies got pictures of mackerel to help in making a design for the side of a fish market's delivery motor; and a woman who is decorating lunch wagons easily found the pictures of fruit and vegetables which she needed.

A woman who was planning a room with

certain mural decorations asked for pictures which would give her Chinese color harmonies and design, the main "note" of the room being an old Chinese rug. Sheets from Jones' "Grammar of Ornament," from Speltz's similar work and from other books gave her what she needed.

An architect and designer asked for colored pictures of Scandinavian peasant furniture to help him in planning painted furniture for a log house in the Adirondacks.

Hundreds of other examples can be given of the use made of the Museum of Pictures in the Newark library. Inquirers usually get a comfortable seat and make for themselves the search for the specific things needed, after being shown the group of pictures in which they are likely to be found. It takes them only a few minutes to examine hundreds of items, whether all are mounted on cards or are chiefly in portfolios. To search for material akin to that mentioned in the examples given above would, if made in a museum of art, take many hours instead of minutes; would in most cases not give the seeker any better "sources" than do pictures; would be conducted almost entirely while standing and thru the glass fronts of cases; would not be facilitated by handling; and certainly would not end, as do most inquiries in the library, in the carrying away, to home, office, studio or shop, of as many pictures as may be needed.

I have used purposely the word "pictures" in speaking of this utilitarian museum, for I wished not to exalt its character in any degree by giving it a high-sounding name. As a "collection of pictures" it is a thing which the smallest library can acquire, making of course a small museum at first; but aspiring to bigger things as time goes on.

But having emphasized the pictorial side of the collection, without describing even briefly the enormous use—more than a hundred thousand items lent for school and home use each year—which is made of it for purely illustrative purposes, (for making countries, peoples, customs, costumes, cities, mountains, rivers, occupations, games, etc., etc., in all parts of the world a little more striking and realistic, especially to young folks in school)—having noted its pictorial side, a word must be said of its value as a collection of designs. A recent writer insists that designs of to-day, if they are to be found worthy, must be based on the approved designs of the past; and adds, in effect, that the designs of the past which the experts approve can be studied only in the great museums of art which have gathered the objects wherein or whereupon those approved designs appear. Of his first statement there is space here to

express only the complete disagreement which will come at once to the mind of all who realize that the statement is equivalent to saying that man has lost all power of originating design!

To the second statement this whole paper is itself somewhat of a negation. To particularize for a moment, consider textiles. The value of the thousands of rare bits of old textiles in our art museums runs into millions of dollars. They are almost never used, as my own inquiries have shown. Of those who use them scarcely one has ever sought them out to get from them more than pattern and color, none, one may almost say—to study the weave for reproduction or other purposes. The pattern, the design, the color—these are the aspects of them which would attract designers, if we had a body of designers in this country and if they could easily—as they cannot—gain permission to handle and examine them.

Now pattern or design, and color are admirably shown in pictures of textiles. Of these the Newark Collection has not less than twelve thousand sheets, each containing from one to a dozen designs. They cover the textiles of scores of countries, thru several thousand years. Here are hundreds of items from prehistoric Peru, so skilfully depicted that the very soul of the weave itself can be seen in them; many Japanese products shown in like detail, with thousands of others giving little more than color schemes; and hundreds of sheets in color of ancient rugs from the far east, of peasant work from the Balkan region, and so on.

Some are still in book form, many have been taken apart and added to the picture collection. They all may be seen, handled, copied, in the library or at home.

But textiles are not alone in the field of design. The plates grouped under this subject include designs based on scores of different kinds of objects. Of design based on the bird alone, to give one more illustration, there are about five hundred mounted sheets, containing about twenty-five hundred different treatments, and several thousand more are found in classified folders, or in loose sheets, formerly books, which the demand by users has not yet brought into the mounted collection.

I am writing this for librarians, and by some of them it may be asked why a public library should go so deeply into the picture business and attempt thereby to usurp the museum's field? At present I can only reply, "Why not?"

Here are the titles of a few of the hundreds of books which have been cut up to go into the collection. The main source of supply for the illustrative material has been picture-journals. The prices are what we paid for them, some many years ago, some recently, and are given merely to emphasize the fact that the collection includes much that is highly esteemed.

Kopenheyer's Motives from Bukovina lace, \$20.
Wallis's American architecture, decoration and furniture of the 18th Century... measured drawings etc., \$1.50.

Grasset's Animal in decoration, \$13.50.
Henri's Chinese embroideries. 3 parts, \$10.
Czechoslovak peasant embroideries, \$12.75.
Gerlach's Plant in art and industry, \$16.50.
Weise's One hundred historical costume pictures, \$3.

Bestette's Examples of decorative art (Italian), \$49.50.

Verneuil's Studies of the sea, fauna and flora. 2v., \$25.

Meyer's Norwegian peasant art. 3v., \$19.50.
 Jones' Grammar of ornament, \$15.
 Prisse d'Avennes' Polychrome ornament, \$10.

And here are names of a few of the many pictures which come in sets or in groups (with publishers and prices) such as have been added to the collection.

Seeman's Colored reproductions of paintings. 9"x7". 35c. each.

Seeman's Wall pictures. Black and white reproductions of paintings, sculpture and architecture. 24"x30".

Longmans' Historical illustrations. 12"x9 1/2". 8c. each.

British Museum postcards. Average 5c. each.
 Dekorative Vorbilder. Plates of design. 9"x13". \$3 for 12 nos.

Shimbi Shoen, Ltd., of Tokio. Reproductions of Japanese prints. \$1.25 to \$3 each.

R. D. Szalatnay, New York. Slovak and Bohemian costume postcards. 10c. each.

University Prints, Newton, Mass. 8"x5 1/2". 500 for \$4.50.

Hart Schaffner & Marx, Chicago, Posters and smaller prints. Given away on request.

Joseph H. Dodson's Mumford colored bird and nature pictures, Kankakee, Ill. 7"x9". 3c. each.

Perry Pictures Co., Malden, Mass. Black and white. 3"x3 1/2" to 10"x12". 3c. to 10c.

County Libraries Solve the Problem

THE California State Library has been sending out news stories to librarians thruout the state who use them as a basis for stories in their local papers, usually adding something in regard to similar work which is being done in their own libraries. The following which is no. 6 in the series has so much interest that we give it almost in full:

"To transport eighteen children of all the grades from a country school ten miles to a convention of librarians in order to demonstrate how music records can be used successfully in rural schools seemed a test inviting failure. But to add to the strange environment into which the children were plunged was a sea of unfamiliar faces with eyes focused upon them.

"Then as if courting disaster these country children were given over to an utter stranger to make the demonstration and as if to fling defiance into the face of success the children came from a rural school without a music machine and were untrained in the use of educational

music records. Such were the conditions existing at a recent demonstration given at the county librarians' convention at Coronado to show how to use educational music records successfully in any country school as well as in city schools.

"The demonstrator had twenty minutes to get acquainted with the children, learn their names, and have them seated before the audience assembled. It was a marvelous exhibition of understanding of child nature as well as the use of music records. In a few moments the children seemed to forget all of the strangeness and were held by intense interest in the stories told by the music records and songs sung by professional musicians and so adapted to children that their own childish voices blended harmoniously.

"Pictures of all the instruments used in an orchestra were shown to the children, then a record by a fine orchestra was played. In a short time the children recognized the different instruments with evident satisfaction.

"Appreciation of music became more than a mere expression as the children entered into the spirit of the beautiful records. Their quickness in getting the meaning of the music was a revelation. They heard not just notes but the murmur of the brook, the raging of the torrent, and all the rest.

"It was a fine illustration of how educational music records can be used in any school to increase interest in the subjects taught and develop concentration, memory, exactness, appreciation, and other qualities that tend toward success in life to say nothing of the daily joy given to the children.

"The country schools of California contain many organs and pianos that are unused because no one can play them. Many music machines were formerly purchased for the schools but became practically useless because of an inadequate supply of records.

"The county libraries of California, however, have now solved the music record problem. Over two thousand one hundred school districts of California have joined county libraries and pooled their school library funds in their respective county libraries. Each one of these county libraries is building up, as a part of its work with the schools, a collection of music records. In one of these counties the collection now numbers over one thousand records. In each of the counties with county libraries music records are circulated to the co-operating schools giving a service that would otherwise be impossible. The demonstration at Coronado showed the librarians how these music records could be made to do even greater service."

Charted Seas*

By MARY E. S. ROOT

Recently Supervisor of Children's Work for the Public Library, Providence (R. I.)

THE little ship which was the children's library movement left the parent ship over twenty years ago with some spectacular fireworks—not without a wake of over sentimentalism. It sailed over uncharted seas with unsteady pilots. There were no lighthouses, no bellbuoys to warn from rocks—and the ship often hit reefs, suffered collisions, lost speed from escape of steam, narrowly escaped wreck. There were also enemy guns. Fortunately, it always had friendly convoys over hostile waters. Mr. Greene of Worcester, Mr. Foster of Providence, Miss Hewins of Hartford, Mrs. Fairchild of Albany and Miss Plummer of Brooklyn were some of these early convoys. We owe them much.

At my first A. L. A. conference twenty-two years ago, Miss Hewins took us, a little group of would-be pilots banded into a Children's Librarian Club (I well remember Miss Moore, Miss Hunt, Miss Olcott, Miss Power, Miss Engle and Miss Dousman) and talked to us, read to us, assured us we had only to send out S. O. S. calls to her did we need her help. Mr. Foster and Mr. Greene early pushed school work, the others were convoys their lives long.

Looking back over these twenty-two years, the "Seven Joys of Reading" bequeathed to us by Miss Plummer in a little pamphlet, seem to me not unanalogous to the "seven joys" of a children's librarian. These were the shock, surprise, sympathy, expansion, familiarity, appreciation and revelation.

Shock was one of my first experienced joys. Shock from confusion, noise, grimy hands, contaminated air, battered books, "smarty" boys, flirtatious girls, games of tag, games of solitaire with books slips, of billiards with books as balls, of racial disputes between "Tony" and "Micky" or "Little Black Sambo" and "Ikey." "I didn't call him names," (Him being "Little Black Sambo") protested "Ikey," "I only said I didn't like chocolate drops." First impressions were nothing but a succession of shocks. Only time could teach what shock absorbers to use, and where to pour oil on troubled waters.

Surprise came early too, and ever-increasing surprise—at the daily manifestations of abnormalities in children—thieving, lying, truancy, feeble-mindedness, neglect, where one expected normality and strength. Surprise at the avidity

with which children read, at the trivial, commonplace books most of them read, at the unconcern of parents about this, and lastly but not the least, surprise at children's range of information and one's own lack of mental equipment to meet it. How was one to know that "the little men with cockeyes" were the Brownies, "the man who committed tragedy and was not guilty" was Hamlet and "A book about crooks" was "Campaigning with Crook"?

Sympathy and expansion were born together. The former was a lighthouse which kept the little ship from the rocks of smug satisfaction and led into the deeper channels of human interests. The latter was a radio apparatus which both broadcasted and "tuned in" with every school parents' organization, Y. M. C. A., playground and school garden in the community. Surveys of the activities of children were made which brought to light reading habits of children and the library's poor publicity. The early pilots learned that there was no educational, religious or social agency which could not serve as an amplifier to a sanely organized children's work.

They also learned, however, that disaster was imminent for the craft which failed to make a nice distinction between making the library a clearing house for wider dissemination of books and actual participation in corrective organizations. A boat sucked in by a whirlpool is helpless.

Familiarity and appreciation also were born together. Familiarity with school systems, with social agencies, with many, many individuals and many, many books brought not only ease in administration problems but a wisdom in book selection.

Touching, clinging, paternalism, fearsome reluctance in expressing views on book values, marked the first ten years of the movement. At the Magnolia conference in 1902 there was an abortive attempt to prepare a recommended list of books. There was much discussion as to the inclusion of such titles as "Little Lord Fauntleroy," the Reid books, etc. One father scathingly but truthfully remarked that he would hate to trust his boy's reading to the tender mercies of the children's librarians. But time has mellowed and broadened her book horizons as it has her human horizons. Learning by doing she has finally managed to keep the ship steady, true to her course, and to carry more and more passengers.

*Paper read at the A. L. A. Children's Section meeting at Detroit, June 28, 1922.

In twenty-two years the little ship has grown into an ocean liner with great displacement and high speed.

Big libraries have established systems with their supervisors of children's work, their branch children's librarians, their specialized story-tellers and club workers.

The contribution of the lives of millions of children to the library and the library's contribution to their lives in these years would make a wonderfully interesting human document if half could be told. This contribution is no longer a disputed fact. The old convoys had the clear vision. Appreciation has come. The pilot of today whose good judgment was looked upon with distrust in the past must travel early and late if she would begin to meet the demands made upon her for lectures on children's books before mother's clubs, library clubs, library schools and summer schools. (Her latest demand is for radio story telling.) She must go sleepless if she would prepare all the lists asked of her. She must check the A. L. A. *Booklist* and other co-operative lists and, crowning triumph in the year of our Lord 1922, she is jury of award for the John Newbery medal, given the most distinctive juvenile published this year. She is now counted worthy to select a boy's book which is realistic and dynamic yet not pedantic or idiotic or barbaric.

THE UNDERMANNED SHIP

Much of this demand upon her is undoubtedly due to the shortage of workers. The ship is undermanned and a large part of the present personnel as young workers unprepared to handle the problem and who make slight progress along executive lines, if they are not mowed down early by the matrimonial scythe.

The children's worker today, if the ship should travel at top speed, must know every rope. She need not, and cannot waste time experimenting. It is wicked waste of time for the library, poor psychology for the child. If she marries early there is all the more need that the few years she gives to the work should be full ones.

Some of the pilots of twenty years ago are still at the wheel. They alone know how long it takes to learn by doing. Many mistakes they made. There is no greater service they can give to their profession than that of pushing vigorously a movement for more training schools for children's librarians and recruiting students for those schools. I think I would put it inversely, a vigorous recruiting for workers, who in turn demand training, is bound to result in the opportunities to be trained.

PREPARATION REQUIRED

Any person today, who would step into an executive position in any one of our highly organized children's libraries must know at least these things:

How to equip a library with strong furniture which will help in discipline and yet give every inch of space. What measures of ventilation and sanitation are necessary to safeguard health—her own and the children's.

How to acquire exhibits with strong drawing power and how to arrange these exhibits so that they meet the best standards of a library's aesthetic responsibility.

How to choose books, which means knowledge which can never be acquired by a group of lectures heard in a general library science course, but knowledge of the historic development of children's books, knowledge of editions and knowledge of the present book field, good, bad and indifferent.

It means knowledge of budget management, what proportion to spend for replacements, for rebinding, for duplication, for new titles, and how to distribute these purchases thru the year so as best to meet the drain on her resources.

How to control with tact and firmness large numbers of dissimilar children without reaping antagonism. This can be learned only thru experience, but such experience should be gained in connection with a training school. I have known of splendid students graduating from our general library science courses who had a strong bent toward children's work, yet who were afraid to accept a position as head in a city where the rough boy element was a problem. They dared not risk failure.

How to push her books steadily so that they will not be completely "buried under" by the more strident notes of the movie, the motor, the radio and the sport "fans." This means study of publicity methods and good salesmanship.

How to dispatch work with speed, accuracy, thoroughness and system, and how to stimulate her co-workers to do likewise.

How to steer abnormal children (and how can she know abnormality if she knows not child psychology?) and yet not attempt alleviating work herself.

How to handle reference work of a peculiar type. This again requires intimate knowledge of the book's contents. A mother wishes a book for a boy who reads nothing but Boy Scout stories or Tarzan books or Zane Grey. Another mother wishes a book with deep spiritual truths. A minister desires stories for Lenten talks to bring out attributes of a fighting soldier, a child who has seen the film of "The Prince and the

Pauper" wants the "Story of Mary Pickford." Material must be on hand for a circus problem project within the grasp of a fourth grader and on "industrial nursing" for an eighth grade vocationalist. She must not make the fatal error of offering to a boy a book on radio which features the "crystal detector" when for *two whole months* that has been superseded by the "vacuum tube."

How to tell stories and how to conduct clubs, not in a way to feature entertainment only, but to lead to wider reading.

How to speak with effectiveness and force before any body whatsoever of educators or social workers, and how to prepare lists and write newspaper stories.

All these things require preparation and afterwards tremendous resourcefulness and power to carry thru.

RECRUITING

So much for preparation, now about recruiting. Recruits would surge to the ranks could these pilots of twenty years convey, tho only in part, thru a message to every graduating class in every girl's preparatory school and every freshman class in the women's colleges, the amenities and rewards of a children's librarian.

These are a few:

1. It is a work where you get life at the spring. It is a privilege to work with young, vehement, strong patrons, not neurotic, or rheumatic, or dogmatic, but just real live little boys and girls with now and then a toothache or a broken finger, or an incipient whooping cough germ. Their fresh vigor is contagious. Football scores, boat races, fires and the circus are quite the most exciting things possible! Banister sliding is inevitable and you must look the other way—if you have banisters.

The birches that dance on the top of the hill
Are so slender and young that they cannot keep still;
They bend and they nod at each whiff of the breeze
For you see they are still the children of trees.
But the birches below in the valley are older
They are calmer and straighter and taller and colder,
Perhaps when we're grown up so solemn and grave
We too will have children who do not behave.

2. It is a work which broadens your sympathies and forces you into community interests.

3. It is a work which gives opportunity for initiative and execution.

4. It is a work which brings constantly growing appreciation of what is finest in books and an opportunity to see the splendid response of youth to the best when it is presented to them.

5. It is a work wherein one can see results in one's own lifetime. Familiar faces after a lapse of years come into the children's room again—now for books for their own boys and girls. This is a priceless amenity.

6. It is a work where you have the full confidence of your patrons. One boy's note upon returning an overdue book proves it. "Mr. door opener will you please look in back of out side door and you will finde book please give it to book lady."

7. It is invariably hard work full of routine but, says S. B. Stanton, "routine is a conduit which brings down the refreshing waters from high moments to water the arid days," and hard work is as nothing when there are "high moments." Therein lies our Revelation.

8. It is a work in which one has the undying satisfactions of the story teller—the opportunity to light many fires in dark rooms.

9. It is a work wherein one is privileged to work with patrons who believe in the unseen.

There is a difference between this world and the world of Faery, but it is not immediately perceptible. Everything that is here is there, but the things that are there are better than the things that are here. All things that are bright are there brighter. There is more gold in the sun and more silver in the moon of that land. here is more scent in the flowers, more savour in the fruit. There is more comeliness in the men and more tenderness in the women. Everything in Faery is better by this one wonderful degree, and it is by this betterness you will know that you are there if you should ever happen to get there.

"If we once realize how children see things we can never patronize them again" is Grace Hazard Conklin's truism. Children's library work can never again be patronized. It has proved its part in the education of the child. It has proved the strongest publicity weapon the library owns and there is now one clear call. To train new leaders to fill in the ranks of the old leaders., as they fall—to give to those leaders the type of assistants they need to gain their ends, and to send trained executives to those parts of our United States where, we are told, there are still millions of people who have no access to free public libraries.

TO RECAPITULATE

The acceptance and discard of what is vital to the conduct of a children's library today has been thrashed out over a wide term of years.

Every librarian in planning his library's best usefulness to this community makes plans for a children's department. He is obliged to take what material he can get. If it is a chief he desires, it is almost an unknown thing for him to be able to get a graduate of a special training school for children's librarians who has had a few years experience in executive work, in a library which is connected with a large school system. If he is fortunate enough to secure a graduate of a general library science course he is confronted with two problems.

The first is the outgrowth of a better salary situation. If a vacancy occurs and the salary

attractive, a graduate is likely to be attracted toward it who has previously in her course given no thought to the children's side of library work.

The second problem is the difficulty of any graduate "keeping to the course" because of the limited experience in children's administration problems and a limited knowledge of children's literature.

Wouldn't it well pay library schools to cut something from lectures in library construction, classifying, etc., and spend more time on this human side? Even a head librarian needs to know at first hand what are the needs of one third of his readers; moreover, how can a library school recommend a graduate to a librarian with any fairness when there has been no opportunity to judge her fitness for the work?

But most librarians are not fortunate enough to attract any trained workers. They often have to use young high school graduates who never see the vision of the port to be made and who often stay only long enough to fill a "hope chest." And for one of marked ability there is frequently not opportunity for her to get intensive training.

We need to turn the thoughts of young, alert, sympathetic women, who have an abiding love for children and books, toward the field of children's library work, and we need to establish in different sections of the United States training classes where they may receive the training they require.

The pilot of today need no longer fear criticism of over-sentimentality. She needs instead to shout from the house tops that when you give a child the right book you don't give him just paper and printer's ink but—"stars."

Oh, the unforgettable conversation of Patou and Chantecler!

Patou: Oh, better than all marrow-bones!—the fresh illusion of lapping up the stars!

Chantecler (surprised at Patou's having lowered his voice to utter the last words): "Why do you drop your voice?"

Patou: You see?—If we speak of stars nowadays we must do it in a whisper! (He lays his head on his paws in deep dejection).

Chantecler (Comforting him): Be not downcast!

Patou (Lifting his head again): No, it is too silly and too weak! I'll shout it if I please! (He howls with the whole power of his lungs.) Stars! (Then in a tone of relief). There, I feel better!"

"The branches [of the Chicago Public Library] are discontinuing the replacement of books, substituting extra copies for the worn-outs, which amounts to the same thing but saves several miles of red tape. They are also working toward doing their own discarding instead of shipping tons of soiled derelicts down town."

Library Imports Held

To the Editor of the LIBRARY JOURNAL:

Is it possible to bring any further pressure on the Treasury Department with reference to Treasury Decision No. 39108, which is causing no end of trouble to all librarians who import and which must be causing the import book trade in New York much greater difficulties? This decision was signed by Mr. Dover, whose resignation has just been accepted. The moment may, therefore, be favorable for some action in Washington. I have been trying, thru Senator Townsend, to secure some action from the Secretary of the Treasury, but apparently we are blocked with the usual *non possumus*. The authors of the decision take comfortable refuge behind the fact that the language of the statute is mandatory. Why nobody ever discovered it to be mandatory before I cannot imagine, nor can I understand why the prima facie evidence of the title page should not be accepted by the Treasury Department in the Customs Service just as it is in the ordinary course of business and in all scholarly investigation.

We have several cases of books now being held in New York because the title pages are not stamped with the country of origin and it looks as if we should not get them in time for

the opening of the University in the fall. Our mail packages are being held up, and the latest news is that not even a rubber stamp on the title page reading "Made in Germany" will be accepted as effective marking, because the Treasury Department holds that such a stamp can be erased later. I am sure I do not know what they want in place of it, nor why the legitimate business of libraries should be thus interfered with by an interpretation of the statute which is both unnecessary and illogical. The language of the Tariff Act of 1913, on which this decision is based, was, I am assured, practically that of all the other tariff acts going back to the McKinley Bill. I have not the facilities at hand for investigating this latter statement, which was Dr. Raney's verbal remark to me at the Library Association meeting here.

It seems to me that the New York importers of books must be in a very curious situation, if the decision is enforced against them as it is against importing libraries.

WILLIAM W. BISHOP, *Librarian,*
University of Michigan Library.

Leave of Absence with Pay at Grand Rapids

THE Grand Rapids Public Library Board of Commissioners at its June meeting approved the amendment to the Regulations providing for extra leave of absence with pay for professional development.

This applies to the senior assistants, chiefs of departments and the librarian. Those who have been in the service not less than five years may receive once in five years an extra leave of absence with pay to be spent in travel outside the United States, or in pursuing studies as regular registered students at any standard college university or library school, or for the purpose of scholarly research work and study likely to be of use to the Library. Such leave of absence shall not exceed three months, and if more convenient for the person or for the Library these three months may be divided for use in more than one year. Not more than two persons may be absent at one time and not more than one per cent of the previous year's payroll shall be paid for leaves of absence of this kind in any one library year. With the application for leave must be made a statement of how it is proposed to use it, and within two months after return to the library a report must be made on the way in which the leave has been spent. It is understood that those receiving leave will remain in the library's service not less than one year after return.

This is probably the first library to adopt any such definite scheme for leave of this kind.

Counting a Library

By HOWARD L. STEBBINS

Librarian of the Social Law Library, Boston

CAN a library of 70,000 volumes be counted and classified in a forenoon? For a law library the answer is "Yes"—with reservations.

By careful preliminary planning and by systematic use of the brief time at our disposal the Social Law Library in Boston was counted and in large measure classified by seven people in four and a half hours. The method employed contains many points applicable to libraries in general.

By "classification" must not be understood the 340's of the D. C. or any elaborate special scheme but merely the apportionment of our 64,000 bound volumes among the grand divisions into which law books quite naturally fall. We adopted the following eleven divisions: Reports; Digests and citations; Session laws; Statutory revisions; Textbooks and legal encyclopedias; Legal periodicals; Briefs; Trials; Bar associations; Documents; Miscellaneous.

Eleven years ago a physical count of the library was made. Subsequent statistics were not scientifically kept, classification was disregarded, so that all-in-all the labor of another count was deemed worth while. Absence of patrons being a prerequisite, we set the party for April 19th, a legal holiday in Massachusetts. This day was selected as unlikely to be very hot or very cold, a matter to be taken into consideration since the court house in which the library is located is not heated on Sundays and holidays. Members of the staff were offered another free day in exchange for their holiday, and all agreed to work.

Careful planning made possible what was accomplished. Not only was the bulk of the work compressed into a few hours but it was ordered in such a way as to leave a check upon the accuracy of the participants, and to reduce to a minimum the margin of error.

A distinction was made between sections where practically all books fell into the same division and locations where classification as well as counting was necessary. The latter territory was divided between the librarian and assistant librarian; five other assistants took care of the former. The idea of working in pairs, one to count and one to keep tally, was abandoned because of the smallness of the staff and the simplicity of much of the work.

In general all sets containing twenty-five or more volumes in one numbered series were

listed in advance. Volumes belonging to these sets were disregarded on April 19th, wherever found. In this way we escaped the actual counting of 15,000 volumes, long sets making up a great proportion of every law library.

Assistants were instructed to count the actual number of bound and unbound pieces in each vertical section and to record their figures on specially prepared tally sheets. As only one section contained over two hundred books the librarian had here the material for a close check on the accuracy of the work. A superficial comparison next day indicated that all members had made a close enumeration.

In a preliminary survey the librarian picked out material here and there that fell into other divisions than the one claiming the bulk of the books in a given location. All this was noted to be counted by him on April 19th. To classify these sections the librarian's detailed figures were deducted from the totals reported by the assistants. This did not give the exact classification that would have been obtained in a volume by volume examination of the shelves, but it will be recognized by law librarians as offering a very close approximation to theoretical exactness.

Actual enumeration began a few minutes after nine on the morning of the great day. The first work had been to restore all possible books to the shelves and then to broadcast a warning against moving anything on pain of death!

The librarian visited nearly all sections of the library and stack enumerating the material which did not fall into the general classification of its section. He also counted and classified the card file of missing books, material en route for the bindery, display of new books, volumes on patrons' tables, etc. This with general supervision occupied him until about eleven, at which time he was able to take over a part of the territory in which the assistant librarian was working. The latter's assignment had been to classify as well as to count.

The minor assistants completed their apportionments between half past eleven and twelve. The librarian worked until one and the assistant librarian until half past one. At this time the entire ground had been covered with the exception of the librarian's office, the catalog room and a pair of locked cabinets, all of which were done next morning. The assistant librarian turned in complete data for his ter-

ritory; with the staff tally sheets and his own the librarian now had the material for determining the results at his leisure.

For those yearning to count their own collections some figures of speed will be interesting. The librarian and assistant librarian counted and classified at the rate of about 2,000 volumes per hour. In simple counting, distinguishing only between bound and unbound pieces, one young man who had done considerable work as a stock clerk before entering the library, reached a speed of 4,200 volumes per hour. All others were unaccustomed to this work. While the entire staff counted accurately, the speed varied from 2,900 volumes

per hour by those with the best mental equipment to 2,000 for those with fewer educational advantages.

The larger the library the more opportunities for exceptions to the rules. By planning for these irregularities in advance we paved the way for a consistent and unified piece of work. We do not claim an absolutely accurate result from this rapid fire inventory. We believe that the total 70,503 is a very close approximation of the actual size of the library and that the classification has given us a reasonably accurate idea of the proportion of books in the various divisions and a sound basis for future statistics.

The Letchworth Book Club

THIS memorandum is prepared at the instance of a number of enquirers in England and America who have heard of the Letchworth Book Club. It is not an advertisement of achievement or a propagandist proposal. The Club was simply an expedient devised to meet a need in a growing town of ten thousand inhabitants. The expedient has proved its value over a period of five years and has attracted some attention from people interested in libraries, owing to its novelty. The object of this memorandum is to set down in order the methods and rules which have enabled the Club to do its work.

The aim of the Club is to make all the important books on the shelves of private libraries in the town available to all serious students and readers. The owners of the books have the satisfaction of knowing that the capital represented by these libraries is not lying idle. The books are in constant use and the owner is guaranteed against unreasonable trouble and loss. The reader gets the benefit of whatever books on his subject are in the town at a very small cost. In the case of Letchworth this has proved particularly valuable to readers who are consistently following up some special line of study such as architecture, theology or engineering. Some readers have been found who follow a line of this kind for two years or more.

Residents who have libraries of more than twenty books are asked to catalog their books, or to allow some one on behalf of the Book Club to do so. The special catalogs are then digested into a common catalog and card-indexed under authors and subjects. The common catalog is kept at a central place in the town where a librarian is in attendance for two hours every day in the week. The town is divided into districts each under the care of a sub-librarian whose duty keeps him in constant touch with

the lenders. On receiving an application for a book the librarian refers to the card-index catalog—finds where the book is located and sends a postcard to the sub-librarian for the district in which it is. The sub-librarian leaves the postcard with the lender who places it in the shelf where the book usually stands as a reminder of where the book has gone. In return for the card the sub-librarian receives the book and takes it to the book club centre during library hours. The borrower calls for the book the next day and on paying two pence receives the book on loan for one week. If he is a student and requires the book for a longer period a payment of two pence for each week secures the book for as long as it is wanted.

Some modifications of this general system have been found desirable in working. Some lenders have found it desirable to put into the Club only a portion of their books, others allow all their books to be cataloged but notify on the catalog that certain books are retained for reference on their own shelves and can be used by any one who wants them but not removed from the premises. This is generally done in the case of dictionaries, encyclopaedias, books which have a scarcity value and books whose binding might suffer by being too freely handled. In order to guarantee the lenders against loss the Book Club Committee guarantees to make good the cost in case of loss or misuse of books lent. This seldom occurs in the Garden City where books borrowers are above the average in honesty and intelligence, but when it occurs the Committee purchases a new copy and keeps the old one if it comes to light.

The Book Club has no endowment and no invested funds. It therefore is entirely dependent on its own earnings and on voluntary subscriptions. The annual subscription is five shillings and this entitles subscribers to the use

of all books in the Club. Readers who do not become members pay for books as they borrow them on the terms described above i. e. two pence weekly, one penny for the book and one for postage. These funds would not suffice to pay the small salary of the librarian, rent of room, rates, heating, lighting and cleaning. In order to meet these charges and make the Club self-supporting, an ordinary lending library with a good stock of readable novels and general literature is conducted on the premises. Any one may come in and select a book for himself from this library and borrow it on payment of one penny per week. The receipts from this library nearly, but not quite, cover the cost of maintaining itself and the Book Club. Occasionally when a good general library of one or two hundred books is for sale it has been purchased by special subscription. Occasional deficits have also been made up by promoting

special lectures or courses of lectures on literary subjects. The centenaries of great writers such as Dante or Keats have been celebrated in this way and there is sufficient public interest to make these profitable.

The essentials for a neighbourhood Book Club may be enumerated as follows:

1. A sufficient number of public spirited lenders to put their private libraries at the service of the public.
2. A central place where a librarian can attend to keep and use the card-index of all available books.
3. Sub-librarians willing to undertake charge of districts which together cover the town.
4. A committee willing to put enthusiasm and care into the task of socialising books for the public good.

DUGALD MACFAYDEN.

Psychological Tests in Library Examinations

IN the final examination given last session in one of the bibliography courses at The Ohio State University Library, an attempt was made to apply one of the forms used in the psychological tests employed during the war in the United States army. Similar adaptations are in use in the Department of Psychology and in the Department of Sociology in this university.

The class in which this examination was tried consisted of forty-two students, juniors and seniors in the College of Commerce and Journalism. They had finished the course known as "Bibliography of Social Sciences" in which they had heard thirty lectures on various topics and each one had had laboratory practice in the library in working out about ninety problems.

The examination consisted of two parts: the first was of the usual descriptive order, and the other part included the adaptation of the army mental test. The students were asked to indicate which one of the three possibilities is true in the following twenty-five statements:—

1. *Readers' Guide* indexes books, documents, magazines.
2. The Library of Congress issues a check list of state publications annually, quarterly, monthly.
3. The U. S. Children's Bureau is in the Commerce Department, the Labor Department, the Interior Department.
4. The main entry in the dictionary card catalog is made under the title, author, subject.
5. The Encyclopædia Britannica is strongest in French, English, American affairs.
6. Engineering magazines are indexed in the *Industrial Arts Index*, *International Index to Periodicals*, *Agricultural Index*.

7. A biography of Lloyd George is found in *Jewish Encyclopedia*, *Britannica Year Book*, *Who's Who*.

8. *Poole's Index* covers the years, 1915-1921, 1900-1915, 1800-1900.

9. An index to Ohio documents has been prepared by the Secretary of State, the Carnegie Institution, the U. S. Bureau of Labor Statistics.

10. Existing Ohio law can be found in the Constitution, Page and Adams' Annotated Code, the Statutes at Large.

11. Government publications can be purchased from congressmen, the issuing office, the Superintendent of Documents.

12. The *Survey of Current Business* is issued by the Census Bureau, Babson, the Bureau of Foreign and Domestic Commerce.

13. Hearings of congressional committees are indexed in *Document Index*, *New York Times Index*, *Monthly Catalogue of Public Documents*.

14. Recent English periodicals are indexed in the *Subject Index*, *Poole's Index*, *Magazine Subject Index*.

15. The income statement of the Columbus Oil and Securities Company is found in the Ohio Blue Book, the Columbus Directory, Moody's Manual.

16. Statistics concerning the amount of money received by the Federal government in income taxes is found in *Statesmen's Year Book*, *Congressional Record*, *Statistical Abstract*.

17. Call numbers for library books are found on catalog cards, in *Cumulative Book Index*, by asking reference librarians.

18. The Document Catalog lists municipal publications, state publications, federal publications.

19. The *Congressional Record* is issued daily, weekly, monthly.

20. Detailed statistics of imports and exports are found in Commerce Reports, Navigation laws, Monthly Summary of Foreign Commerce.

21. Municipal documents are listed in *American City*, *Municipal Index*, *City Bulletin*.

22. Prices of new books are found in *Cumulative Book Index*, card catalog, American Year Book.

23. The *Congressional Record* index gives texts of bills, references to speeches, biographies of congressmen.

24. *Public Affairs Information Service* is issued by Ohio State University, the Federal government, H. W. Wilson Company.

25. 109 O. L. 105 means page 105 of volume 109 Ohio laws, or page 109 of volume 105 Ohio laws.

The results of the examination were very interesting. No one answered all the questions correctly. The largest number of questions missed by a single individual was ten, so all of the forty-two students answered fifteen or more questions correctly. One student said the *Britannica* is strongest on American topics; another thinks the Document Catalog indexes state publications; and a third one secures his call numbers for books from the reference librarians! Questions 9 and 23 were missed the most times, the general guess being that the Secretary of State issues an index to Ohio documents and the Index to the *Congressional Record* contains the texts of bills. Question 14 was missed many times, due to confusion between the *Subject Index* and the *Magazine Subject Index*. Careful distinction was not drawn between Page and Adams' Annotated Ohio Code and the Statutes at Large. The card catalog came in for its share of confusion in the difference between subject, title and author entries.

The method of scoring such an examination is to subtract the number of incorrect answers from the number of correct answers, and the result is the grade on the examination. In case a student answered twenty questions correctly and missed five, his grade was fifteen.

It is interesting to note the effect of guessing in such an examination. The facts are that any one can guess half the questions correctly. If there are twenty questions in an examination, and they are answered by guessing, the result would be ten correct and ten wrong. Subtract the incorrect from the correct, and the result is nothing. If in the same examination, a student answered ten questions correctly, and guessed on the other ten, he would have fifteen correct, five wrong, and his grade would be ten, which is the same as he would have received without attempting to guess. The examination therefore indicates exactly the information in the student's mind.

Needless to say, this style of examination needs refining, and some of the weaknesses found in its initial test will be remedied the next time it is used. The chief one pointed out by the Department of Psychology was the need for four alternatives, instead of three. It seemed to the compiler of this set of questions that sufficient mental labor has been performed in getting

three alternatives, but now a fourth must be added!

CHARLES WELLS REEDER,
Reference Librarian.

Ohio State University Library.

Photographically Reproduced Books in American Libraries

A COMMITTEE of the Bibliographical Society of America was appointed at a recent meeting for the purpose of collecting information as to the location of photographically reproduced books and manuscripts in American libraries. This Committee is anxious to secure the cooperation of librarians and others in its effort to locate information and to present the same in some systematic form. It begs therefore to offer the following suggestions:

I. Libraries and other institutions which have photographic reproductions of manuscripts and rare books (in whole or in part), are asked to prepare an entry for same and send it to the Card Division of the Library of Congress. The entries should adhere to the rules adopted by the American and British Library Associations and published in 1908. A note should be added giving the location of the original from which the photographic copy was made.

II. The Library of Congress will print and distribute these entries under the rules governing its other printed cards and will place copies in the various depository catalogs.

III. Libraries which do not have the Library of Congress depository catalog or would like a separate set of these cards, are requested to file their subscriptions with the Library of Congress Card Division.

The Committee is unable to say at this stage whether or not the entries thus printed on cards, may be later issued in book form. Should the support received from institutions or individuals be sufficient to warrant it, steps will likely be taken later on to publish a census or union list which shall aim to give information in regard to location of photographs of manuscripts and book rarities in this country, supplementing therefore the Census of Fifteenth Century books previously published by the Society.

On behalf of the Committee,

J. C. M. HANSON.

WANTED

Copies of the LIBRARY JOURNAL for April 1 and 15, 1922 and for August 1921 are wanted by the publication office. Twenty-five cents a copy will be paid for copies in good condition. Please write name and address of sender on the wrapper.

THE LIBRARY JOURNAL

TWICE-A-MONTH

SEPTEMBER 1, 1922

IN view of the provisions on the free list which are not likely to be altered, libraries are not much concerned with tariff duties, except as they affect the price of books which may be purchased here. The Senate decision to retain the duty on books at fifteen per cent, except that books of American authorship are to be raised to twenty-five per cent, reflects in the exception the fear of the Typographical Unions, who seem potent if not omnipotent in politics, that publishers will print editions abroad, should the manufacturing provision of the copyright bill be repealed. It was alleged by the printers that this had been done already, but no evidence can be found to support the statement and it is scarcely probable that this course will be taken, in any event. The item of real importance to libraries, and even more to private collectors, whose collections are apt to find their final place in libraries, is a provision in the House Bill that books more than twenty years old, otherwise not dutiable, should pay duty at their full value if rebound within twenty years. Senator Lodge, who has truly acted as the scholar in politics with reference to the book tariff, has taken the position that the duty on such books should be confined to the cost of the binding and should be at the rate provided for binding, and this contention is happily likely to prevail in conference. Of course, no prophesy can be made as to what will happen to a tariff bill in conference between Senate and House, and doubtless the A. L. A. Committee will be on the watch to prevent any retrogression in the liberal provisions for libraries.

★ ★ ★ ★ ★ ★ ★

THE Treasury Department has not yet withdrawn the foolish revival of a discarded ruling, made apparently under the direction of a government official, who has since resigned, because he had also antiquated notions as to how government offices should be filled and administered. Mr. John Macrae, for the National Association of Book Publishers, had done libraries as well as the book-trade service in obtaining a suspension until September 15th of the ruling that the imprint "London" or "Leipzig" is not sufficient evidence that a book was made in England or Germany, and the further absurdity that a rubber stamp cannot be used because such an imprint can be erased. As a result, importation for libraries held up in the Custom Houses have been or will be released. Meantime a hearing has been asked for

and librarians individually, as well as collectively thru the A. L. A. Committee, should endeavor to illuminate the Treasury officials as to the uselessness and embarrassment of this ruling, as Mr. Bishop points out elsewhere. The situation created by such a ruling would, indeed, be worse for libraries than for the book-trade, for while publishers and booksellers are chiefly interested in current publications on which the required "Printed in Great Britain" can be printed, libraries must continue to buy books of earlier years on which no such legend can be printed—an *impasse* indeed.

★ ★ ★ ★ ★ ★ ★

THE death of Mrs. Melvil Dewey after long illness loses to us another of the lessening remnant of the men and women who took part thru the Conference of 1876 in the founding of the American Library Association. Miss Annie Godfrey, then librarian of Wellesley College, was one of the few women librarians participating in that Conference, and her marriage with Mr. Dewey was one of the first of the several marriages within the A. L. A. In her calm and gentle way she had continued her interest in libraries ever since, and she shared the enthusiasm of her husband also in respect to spelling reform to the extent that for some time she signed her name Ani Dui. Miss Mathews, on her bed of illness at Lynn, is now the only woman survivor from the '76 Conference. Of the seven men survivors, Mr. Peoples, retired from the New York Mercantile Library, tho he regained some sight, remains very ill in his country resting place, and Mr. Van Name of Yale is in happier retirement, wintering in Florida. Mr. Evans is still presumably at work at Rogers Park near Chicago in continuing his great bibliography. Mr. Griffin, at the Library of Congress, and Mr. Foster, at the Providence Public Library, are continuing their good work into their eighth decade. There still remain two of the three who planned for the A. L. A. by taking the initiative for the 1876 Conference, Mr. Dewey, still interested in the library cause as his continuing of D. C. and his presence at the Swampscott Conference indicate, and the present writer, still endeavoring to do his bit toward library progress as an unprofessional, hopefully desirous to live long enough to see this country admitted to that family of nations known as the International Copyright Union and to participate in the half century celebration of the A. L. A. in 1926.

LIBRARY ORGANIZATIONS

VERMONT DISTRICT MEETINGS

TWELVE district meetings were held, jointly by the Library Association and the Library Commission during May and June at the following libraries: Middlebury, Wallingford, North Bennington, Townshend, Brandon, Shelburne, Essex Junction, White River Junction, Washington, St. Johnsbury, Newport and Swanton. The attendance at the various meetings averaged sixteen.

The same general program was carried out for all the meetings. An exhibit of the aids in book selection, such as the *Booklist*, the New York State Library's "Buying List of Books for Small Libraries," and the annual "Best Books," "The Children's Catalog," "Children's Books for First Purchase" and others, served as an introduction to an informal discussion of the most useful aids from the point of view of the small library. A talk on mending supplies, and a mending demonstration given by the V. L. A. president, Miss Elizabeth McCarthy, and by Mrs. Helen M. Richards evoked much interest. Book reviews were given, based on a list containing two dozen recent books, altho the discussions were by no means limited to these, which served merely as a point of departure.

Supplies for a simplified Newark charging system were at hand and were explained to any who were interested in installing a new charging system. Publicity posters, library posters, a Children's Book Week poster, a Book Review Bulletin, and movie slides advertising the library were used as samples of library publicity material. The librarians who had observed Children's Book Week told what they had done, and the helps available from the Children's Book Week Committee, were discussed.

The new bookwagon began its public career in the Vermont library world at the Essex Junction meeting, carrying books, supplies, exhibit material and two passengers. It was also used for the meetings at White River Junction, Washington and St. Johnsbury.

JULIA CARTER, *Commission Secretary.*

LIBRARY ART CLUB

ON entering its twenty-fifth year the Library Art Club has a membership of seventy-three. The report of the 1922 annual meeting just published shows that the seventy-three exhibits in circulation for the year 1921-22 were circulated 801 times at a cost of \$425 which is met by the \$6 membership dues (\$5 for branch-

es). The 239 sets of pictures have now practically made the round of the Club.

Officers for the year 1922-23 are: President, Alice G. Chandler, Lancaster, Mass.; vice-presidents, Charles F. D. Belden, Boston, and Mabel Temple, North Adams; secretary, Beatrice E. Kelliher, Indian Orchard; and treasurer, Joseph L. Harrison, Northampton.

NEW YORK STATE LIBRARY ASSOCIATION

THE annual meeting of the New York State Library Association will be held at Alexandria Bay, Thousand Islands, N. Y., September 11-16 with headquarters at the Hotel Westminster. The theme of the meeting is the public library in the service of education. Speakers include Drs. W. A. Howe and Robert P. Hill of the State Education Department whose subjects are "The Public Library and Health Education" and "Adult Education: The Workers Educational Movement," respectively; Charles W. Spencer, librarian of the Colgate University, "The Library's Part in Political Education"; Augustus H. Shearer of the Grosvenor Library, Buffalo, "The Public Library and Local History"; Frank B. Gilbert, Deputy Commissioner of Education, "The Education System of New York State"; James I. Wyer, Ellen F. Chamberlayne, Walter L. Brown, Sherman Williams, Burgess Johnston and Ruth Sawyer (Mrs. Albert C. Durand.)

Round Trip excursion rates are offered by the New York Central Railroad at the following rates: Buffalo \$16.26, Rochester \$12.31, Syracuse \$7.67, Albany \$12.98, Utica \$7.53, New York \$21.19. These rates permit stopover at all points en route and are limited for return till October 31. Applications should be made to C. M. Burt, chairman, Trunk Line Passage Association, 143 Liberty Street, New York.

The proceeds of a rummage sale will be given to the N. Y. L. A. Scholarship Fund. For the sale which will be held during the entire week of the convention each librarian is asked to bring from the local library two or more suitable books.

Rates at the Hotel Westminster, which accommodates 300 guests, are: For board and room without bath \$4 per day per person; with bath \$5. No single rooms are available; and as we go to press comes word that all rooms with bath have been reserved.

IN THE LIBRARY WORLD

MASSACHUSETTS

New Bedford. The seventieth year of the New Bedford Free Public Library was marked by a circulation exceeding half a million. In all 543,739 adult and juvenile books were loaned, or more than $4\frac{1}{2}$ per capita of population (129,733). The picture collection, now including more than 52,000 pieces, was used to the extent of 95,000 circulation. Civic, patriotic, literary and educational societies used the library rooms available for public meetings more than ever before, so that five hundred were held during the year, and on one day six different meetings. Library funds alone did not increase. Expenditures for salaries and wages were \$50,082; for books, periodicals and binding, \$11,632.

NEW YORK

New York. The Library of the Metropolitan Museum of art has received seven hundred fifty-three valuable volumes on ancient art, architecture and sculpture and many important art periodicals, the gift of Pierre Le Brun.

Teachers College is to be enlarged by the addition of a new library building and power plant. This building will be located on 120th Street, with a frontage of about two hundred feet east of the present Teachers College. The library itself will have a depth of seventy feet, and will be six stories in height above the street, with a lofty tower to dominate the entire group.

In the two lower floors of the new building will be installed the executive offices of the College. The four upper floors will contain reference, reading, and seminar rooms. A book stack to include the present needs of the library building with expansion for many years to come occupies the tower over the lofty main entrance hall. The storage capacity of stacks is 250,000 volumes, and reading rooms will shelve 25,000 and the basement 75,000. Each of the four large reading rooms will have a seating capacity for two hundred and fifty readers.

The new building will be built in Gothic style to harmonize with the adjacent buildings and the material will be brown stone trim and brick facing. The building, which will cost over a million dollars, will be completed by the fall of 1923. The architects are Allen & Collens of Boston, who designed the Theological Seminary group adjacent to the College

INDIANA

Indianapolis. The Indianapolis Public Library records notable accomplishments for the year ending June 30th. It circulated 1,191,980 books—an increase of 34 per cent, as well as 32,958 pictures, 1580 clippings, 254 maps, 1540 lantern slides and 3244 records; registered 22,793 new readers bringing the total of borrowers up to 79,992; established 2 new branch libraries—one being for colored people, 5 new school deposit stations for school and neighborhood use and the tri-weekly book wagon service in the wards of the City Hospital and at Robert Long Hospital; answered 62,443 reference questions, cataloged 52,883 books, held 801 story hours for 40,556 children, obtained 1677 publicity items, trained 13 staff members, organized the beginning of a technical collection, maintained booths at the National Flower Show and the Indianapolis Health Exposition resulting in several new registrations, received over 52 gifts including many rare and valuable books, pamphlets, magazines, sheet music, maps, pictures and posters.

Gary. The outstanding features of Louis J. Bailey's thirteenth and last annual report of the Gary Public Library, are the opening of a branch library at Chesterton and extension of service to Westchester township. The circulation of books increased from 418,155 in 1920 to 520,496 in 1921, but was successfully handled by an augmented staff. The circulation of pictures and music rolls also increased, and the rental library of fiction returned \$180. The special collection of city directories was kept up by R. L. Polk Company. With a book stock of 90,000 volumes, the library serves a population of 66,518. In 1921 its receipts were \$90,088, of which \$24,043 was spent for books, periodicals and binding, nearly equalling the salary roll of \$25,082.

MINNESOTA.

Minneapolis. In the August LIBRARY JOURNAL we placed the new building for the University of Minnesota in St. Paul instead of in Minneapolis where the main campus of the University is situated. The agricultural department is in St. Paul.

OREGON

The Dalles. The circulation of 76,396 books from all agencies of the Wasco County Library in 1921, representing an increase of 15 per cent over 1920 and 35 per cent over 1919, was in a

large degree a victory over adverse physical circumstances. The area to be covered is 2,340 square miles of mountainous country. The farthest branch is 92 miles distant, and there is railroad service to only five library stations, so that supervision of branches and stations must be made by the county librarian, Flora F. Carr, by use of machine transportation. The library, moreover, does not own its own car.

The Central Library in The Dalles circulated 48,792 books, and 14,333 were borrowed from the branches at Antelope, Dufur, Mosier, and Tygh Valley; 4,404 from the fifteen stations scattered thruout the county in stores, post offices, and homes; 5,017 from the stations in the public schools in The Dalles and 3,850 from those in the county schools. The leading centers in the county have all been provided with branches and stations, and more neighborhood libraries will be the next to receive attention. The expenditures of thirteen months, December, 1920, thru December, 1921, were \$10,177, including \$2,673 for books, periodicals and binding, and \$4,362 in salaries.

WASHINGTON

Seattle. A large increase in the circulation of books, a decrease in the funds available for maintenance and the erection of a new branch building with Carnegie funds are featured in the 1921 report of the Seattle Public Library. Books loaned for home use numbered 2,097,858, or fifteen per cent over that for 1920 and represents a circulation of six and one half books per capita. Business depression caused a slump in tax receipts and the library was forced to operate with a slightly smaller staff and with a smaller book fund.

The Fremont branch building was completed at a cost of \$35,000. Seattle now has eight branches in permanent buildings. Two hospitals were provided with regular library service. City firemen and steamship officers are two other classes who find it difficult to come to the library so the library goes to them. Deposit stations are maintained in twenty-three fire stations and in the Admiral Line Officers' Club.

Service to the blind took a tremendous stride in 1921 when a union list of all books for the blind in the Northwest libraries was commenced by a committee of the Pacific Northwest Library Association.

Since 1910 the number of books loaned for home use has increased 225 per cent while the library's appropriation has increased only 120 per cent. In 1921 the total amount received from the city was \$286,887 of which \$212,068 was spent for salaries and \$48,958 for books, periodicals and binding. All of these amounts

are somewhat reduced for 1922. The library contains 348,146 volumes.

The report shows a departure from the practice of former years of issuing an elaborate report. It contains only eight pages and the page size has been reduced. A large edition will be printed for local distribution and from this edition most of the statistical tables will be dropped, leaving only a few pages of popularly written text with a picture of the new branch and a chart showing gains in circulation.

CALIFORNIA

Los Angeles. Announcement of the anonymous gift to Occidental College of a new library building has been made by the president of the College. According to the *Los Angeles Express* the building is to be modeled on the lines of the library at Brown University. The work has begun.

NEW ZEALAND

Auckland. The history of the Auckland Public Library and Art Gallery is sketched by John Barr in his "History of Auckland" just published by Whitcombe and Tombs. The Mechanics Institute of the City had fallen on evil days and the City Council acquired the premises in 1880. Two years after the founding of the public library the offer of a considerable collection of books and pictures belonging to Sir George Grey influenced the Council in its decision to erect a new building. The foundation stone was laid in 1885 and the library opened in March 1887. The growth of the library and gallery has been rapid. At its inception the stock consisted of some 6,000 volumes, the majority of which were acquired from the Provincial Council Library. At the opening of the new building the collection numbered 15,000 volumes. During the next ten years valuable gifts were received so that "the library obtained what is perhaps an unique position among municipal libraries thruout the world. . . Among the 15,000 volumes which Sir George Grey presented are many rare early manuscripts, some being illuminated, a valuable array of incunabula including three Caxtons, and a number of literary treasures among which the First, Second and Fourth Folios of Shakespeare are worthy of special mention." Other valuable bequests to the library include the J. T. Mackelvie collection, the McKechnie collection, the Fred Shaw collection, and the Henry Shaw collection, the last mentioned of which runs on somewhat similar lines to those of the Grey collection and contains many oriental and other manuscripts, fifteenth and sixteenth century printed books, and a fine collection in general literature.

Who's Who in Engineering

A Biographical Dictionary of Contemporaries

Edited by **JOHN W. LEONARD**

THIS volume, now ready, contains the life statistics of 10,496 Engineers, including nearly all of the most distinguished and most active members of the various branches of the Engineering profession.

The collection of data for this reference book has occupied over two years, and the finished volume contains a vast amount of valuable information in regard to the personal and professional records of Engineers whose past achievements and present activities form the most constructive factor of modern progress. Most of this information is nowhere else readily accessible. All of it is up to date, as every record in the book was, within a few months prior to publication, submitted to its subject for approval or correction.

The volume is chiefly concerned with American and Canadian engineers, although some foreign engineers of distinction (chiefly those who are members of our American Societies) have been included, and many Americans who are at work abroad are in the book.

No question of payment or subscription has influenced in any way the inclusion of any engineer's record. It is a book of reference and not a write-up scheme. There are no advertisements in this edition, and

THERE IS NOT A PAID LINE IN THIS BOOK

The volume contains 1,509 pages (9 x 6), brimful of information concerning all important members of the Engineering profession in the United States and Canada about whom the requisite facts could be secured.

Its scope is broad and its purpose inclusive, all sections of America being represented and all branches of professional engineering included. It is absolutely free from superfluous verbiage, flattery, fulsomeness or criticism.

Its editor is the most experienced man living, in the compilation of works of this kind, having been the introducer of the Who's Who idea in this country, originator and long editor of "Who's Who in America"; later doing creative work on "Who's Who in New York," "Who's Who in Finance," "Woman's Who's Who," and others.

The volume is handsomely and substantially bound in red cloth, and the price is Ten Dollars per copy, net.

BEAL, Marjorie, 1913 C. P., has given up her position as librarian of the Oneida Public Library to become librarian of Stout Institute, Menomonie, Wis.

BUVENS, Margaret, 1919 R., succeeds Bessie G. Frost, 1921 R., as librarian of the Citrus Experiment Station of the University of California at Riverside. Mrs. Frost has joined the staff of the Carlton College Library at Northfield, Minn.

DAVIS, Gertrude, 1920 S., appointed librarian of the Women's Educational and Industrial Union, Boston.

DEWEY, Annie Godfrey (Mrs. Melvil Dewey) died suddenly at the Lake Placid Club on August 3rd. A pioneer in many fields, Mrs. Dewey was the first librarian of Wellesley College and attended the first A. L. A. conference at Philadelphia in 1876.

DICKSON, Lillian L., for the past year acting librarian, and for thirteen years on the staff of the Riverside Public Library, has resigned to become librarian of Park College, Parkville, Mo., beginning September first.

DIESCHER, Irma E., 1916 C. P., appointed supervisor of story-telling, Carnegie Library of Pittsburgh, and instructor in the Carnegie Library School.

EVANS, Alice G., librarian of the Decatur (Ill.) Public Library since its foundation forty-seven years ago, received one more mark of appreciation when the branch library opened on July 21, was named in her honor. Mrs. Evans attended her twenty-seventh consecutive A. L. A. conference at Detroit which is probably

a record in conference going, tho there are still eight members of the Association who have attended more Conferences.

FOERSTER, Robert F., for twelve years a lecturer at Harvard on social ethics, and director of the Social Research Council of Boston, has been appointed professor of economics at Princeton University in charge of the library of industrial relations about to be established by gift of John D. Rockefeller, Jr., who will provide \$12,000 yearly for five years.

GLOVER, Abbie G., 1917 S., has resigned from the Women's Educational and Industrial Union Library, Boston, to join the staff of the Insurance Library, Boston.

HASSE, Adelaide R., appointed a member of the Agricultural History Society's Committee on Participation in the Sesqui-Centennial Exposition of Philadelphia. The chairman of the Committee is Dr. Rodney H. True.

HENNING, Ruth, 1920 S., appointed assistant librarian of the Minnesota State Teachers College, Moorehead, (Minn.).

HIGGINS, Alice G., 1906 S., since 1917 classifier and executive assistant at the Boston Athenaeum, appointed instructor, Library School of the New York Public Library. Miss Higgins served as a children's librarian at the Worcester (Mass.) Free Public Library at the 1908 to 1911; in a similar capacity at the Utica (N. Y.) Public Library from 1911 to 1913; as assistant to the Supervisor of Work with Children at the New York Public Library from 1913 to 1914; and as special assistant at the Somerville (Mass.) Public Library from 1914 to 1917, during which time she was also instructor in the Simmons summer school.

JACKSON, Margaret, 1915, N. Y. P. L., instructor at the Library School of the New York Public Library, appointed librarian of the Hempstead (L. I.) Public Library. Miss Jackson will retain her connection with the Library School as a lecturer, coming from time to time to meet appointments in the junior book selection course. Her place will be taken by Alice G. Higgins, classifier and executive assistant at the Boston Athenaeum.

MORSE, Stella, 1920 S., has left the Kalamazoo (Mich.) Public Library, to become assistant librarian of the Schenley High School, Pittsburgh.

PERKINS, Madeline E., of the Seward Park Branch of the New York Public Library has been awarded the Staff Association's scholarship which will enable her to take the course of the Library School of the New York Public Library.

ROBBINS, Mary E., in charge of library instruction at the Rhode Island College of Education, and formerly associate director of the Carnegie Library School of Atlanta and director of the Simmons College School of Library Science, has been appointed assistant librarian and professor of library science at Syracuse University.

WARD, Langdon L., supervisor of branches of Boston Public Library died on August 15th after a brief illness. Mr. Ward entered the service of the library in 1896 and two years later was made supervisor of branches. During his twenty-four years incumbency four new independent branch buildings were erected and three branches in municipal buildings added.

WHEELOCK, Mary E., supervisor of binding at the Des Moines (Ia.) Public Library, has resigned to occupy a similar position in the Cleveland Public Library.

Appointments of members of the class of 1922 of the Riverside (Calif.) Library Service School have been made as follows: Zella Ditzler, cataloger, Redlands (Calif.) Public Library; Mary Forrest, assistant, University of Southern California Library, Los Angeles; Julia Heath, assistant, Pomona (Calif.) Public Library; Cora E. Wise, librarian of the Southern Sierras Power Company, succeeding Amy Johnson; Jean Woodruff, cataloger of the Peris (Calif.) Union High School Library; Hazel Schultz assistant, Medical School and Hospital Library, University of California, San Francisco, succeeding Helen Mason, 1918 R., who will spend a year in travel and study.

Recent changes among Illinois librarians include the following: Lena Adams, 1922 W. R., becomes librarian of the Hoopston Public Library; Vilda Beem resigns the Marion librarianship to succeed Vera Snook who leaves Ottawa to become county librarian at Libby, Mont.; Grace Walker who resigns the charge of the Kankakee Public Library to become reference librarian at the State Library is succeeded by Dorothy Brown; Gertrude Andrews who joins the staff of the State Normal University is succeeded at the Morris Public Library by Catherine Volker of Sapulpa, Okla.; Helen Welch has been appointed librarian at Highland Park; and Anna Whitmack librarian of the Argo-Summit Library.

Students of the class of 1922 of the Carnegie Library Schools, Pittsburgh, have received appointments as follows: Ruth C. Belding, reference assistant, Public Library, Canton, Ohio; E. Lenore Casford, assistant, School Department, and Johanna E. Dresel, children's librarian, Library Association of Portland, Ore.; Florence Ewing, librarian, New Brighton, Pa.; Mary E. Foster, children's librarian, Birmingham, Ala.; Inez C. Haskins, and Margaret Hickson, children's librarians, Public Library, Seattle, Washington; A. Raye Hoofnagle, children's librarian, Public Library, Allentown, Pa.; Ruth A. Howe, cataloger, Public Library, Cedar Rapids, Iowa; Emily Jane McNary, librarian, School of Dentistry, University of Pittsburgh; Gertrude E. Marsh, children's librarian, Public Library, Danbury, Conn.; Rose C. Pickering, first assistant, Wylie Avenue Branch, Carnegie Library of Pittsburgh; Margaret M. Reid, Rose L. Griffith, Alice McCann, and Elizabeth Nesbit, assistants, Children's Department, Carnegie Library of Pittsburgh; Marion W. Thompson, children's librarian Public Library, Everett, Wash.; Florence I. Wilson, librarian, Junior High School Library, Lakewood, Ohio.

For School Librarians

To the Editor of the LIBRARY JOURNAL:

I have read with interest the letter on page 658 of your August number from the Children's Librarian. Permit me to call to the attention of all who may be or ought to be interested that the "Graded List of Books for Children," compiled by the N. E. A. and published this summer by the A. L. A. is planned to meet just such requests.

We are hoping that librarians will help the A. L. A. to obtain for this book a very wide distribution among teachers. It is more than a list, more than a useful tool, it is excellent propaganda for the school library idea.

CARL H. MILAN, *Secretary*, A. L. A.

HALF-PRICE SUBSCRIPTIONS TO THE LIBRARY JOURNAL

Half-price subscription rates (\$2.50 instead of \$5.00) apply to:

- (a) Any library having an income of \$3000 or less;
- (b) Any librarian or library assistant having a salary of \$1500 or less; and
- (c) All duplicate copies ordered by any library, whether for the use of trustees or staff members.

CURRENT LITERATURE AND BIBLIOGRAPHY

Several series of French documents for sale at the Imprimerie Nationale have been exhausted by recent American orders. Librarians desiring to purchase any of the publications still available should secure the "Catalogue des Publications en Vente a l'Imprimerie Nationale," 87 rue Vieille-du-Temple, Paris. W. D. J.

"School Library Management," by Martha Wilson, librarian of the Lincoln Library of Springfield, Ill., has now reached a third revised and enlarged edition incorporating suggestions from many sources, especially from articles written by Mary E. Hall and from C. C. Certain's Standardization Report.

The price is 85c. (H. W. Wilson Co.).

"Branch Libraries in School Buildings" is the title of the July *Bulletin* of the St. Louis Public Library. This is a 32-page summary of material gathered by eight members of the staff desiring to qualify for appointment as department heads or branch librarians. One of the reports, that of Antoinette Douglas, appeared nearly in full in the *LIBRARY JOURNAL* for March 15.

The first part of a supplement to the "Catalogue of the Books, Manuscripts, Maps and Drawings in the British Museum (Natural History)" has just been printed. This part which covers the first nine letters of the alphabet forms Volume VI. of the Natural History Series, all of which has been prepared by B. B. Woodward. Extension addenda and corrigenda to 10 Vols. I. and II. (A—Hooker) form a 48-page supplement to this volume.

Recent publications of the New York Public Library, reprinted from the *Bulletin* are: The Spalding Baseball Collection, 20c.; Letters of E. A. Pole from G. W. Eveleth edited by T. A. Mabbot, 15c.; Handspinning and Handweaving: a list of reference compiled by William B. Gamble, 15c.; Timothy Dexter and His Pickle for the Knowing Ones, 15c.; The Beadle Collection of Dime Novels, which appeared in the July *Bulletin* will shortly be ready for distribution.

The Faculty of Law of the University of Paris has inaugurated a *Bulletin de Documentation Legislative et Sociale*, the first number of which is a union list of serials relating to law and the social sciences currently received in twenty-nine different libraries in Paris. It lists some one thousand five hundred titles, of which about one hundred and fifty come from the United

States. Number 2, which is of more than local value, is a summary of the principal laws and regulations published in the *Journal Officiel* from January 1 to April 30. It is planned to continue this.

A supplement to the "Catalogue of the Dante Collection Presented by Willard Fiske" containing additions made from 1898 to 1920, just issued by Cornell University Library, is the work of Mary Fowler, curator of the Dante and Petrarch collections from 1907 to 1920, and compiler of the Petrarch collection Catalogue of 1916. Between 1900, when the second volume of Theodore Wesley Koch's Catalogue was published, and the Sixcentenary year, the collection increased from 7000 to 8375 volumes. "The form of the supplement is, naturally, that of the original catalogue, deviations being due to accident rather than a purpose to amend" (Preface).

The *New Statesman* (London) in its July 1 issue, has a leading article "The Use of Public Libraries." The writer maintains that it is a worse mistake to exclude second-rate fiction from its shelves than it would be to fill them with it. Much space is devoted to the hooking up of the library with the work of the Workers Educational Association. There is also a plea for enlarging the unit area of library service, on the ground that a half dozen bad services are no substitute for one good service, when one good service may be obtained by combining the efforts of half a dozen struggling institutions. With reference to the movement that libraries be placed under the educational authority, the writer believes that while it is not desirable at the present time sooner or later that will be the result.

The Library of the U. S. Department of Agriculture has recently issued two new numbers, namely, nos. 2 and 4, in its mimeographed series of Bibliographical Contributions. No. 2 is "A Checklist of Publications of the State Agricultural Experiment Stations on the Subject of Plant Pathology, 1876-1920." This list was prepared in the Bureau of Plant Industry library by Eunice R. Oberly, librarian, and Jessie M. Allen, assistant librarian, being completed by the latter after Miss Oberly's death. It contains 179 pages and gives a general survey of the work in the various stations on plant pathology as shown in their publications. No. 4 is an annotated "Bibliography on the Preserva-

MYRICK BUILDING
SPRINGFIELD MASS.

tion of fruits and vegetables in transit and Storage." It consists of 78 pages and was prepared by Katherine G. Rice in the library of the Bureau of Markets and Crop Estimates (now the Bureau of Agricultural Economics).

"A Valuable Suggestion" by Louise Hunt in the *American Federationist* for August is a plea for the building up of a large reference collection on labor economics and sociology, with particular reference to the need of it to organized labor and to those interested in the whole labor problem. Reference is made to the existing resources in and around New York on this subject at the present time, and attention is directed to the fact that a contribution of only twenty-five cents a year from each member of organized labor in and around New York city would give an annual budget for a labor library of over \$2,000. Attention is called especially to the library started by a subsidy from Ernest Solvay and built up by the Belgian Labor party since 1911.

It is suggested that a separate building which could be made more or less self-supporting in New York city to provide office space to rent to labor organizations, etc., something like the engineering society building with its library, would be a most worthy undertaking.

"Why Do we Have Librarians," by E. V. Wilcox in the June *Harvard Graduates Magazine* is written largely from the point of view of one who works in a reference or a special library, and emphasizes particularly the lack of definite statement on the part of users of the library as to what they really want to know when they come for information to the librarian. Much attention is given to the kind of information that is called for in the departmental libraries at Washington. The following paragraph is of particular interest:

"All this means merely using the available libraries by making the librarians full-fledged staff workers in whatever organization they are serving. The business man with his special library has shown us how to do the trick. But in the Government departments the libraries, instead of being considered an integral part of the working organization, are thought of as a sort of overhead charge along with the janitor service, the water-coolers, and the oval flower-beds. And many of the workers in these departments are so unfamiliar with their own library and so embarrassed in the presence of unveiled books that they choke to death and die with the secret in them rather than tell the librarian what they want."

"The Act of Incorporation and Journal of the Board of Trustees, 1802-1805" of the Town of Detroit, recently printed under authority of the Common Council of Detroit, was prepared for publication by the Burton Historical Collection of the Detroit Public Library. The trans-

cription includes, says Historiographer Clarence M. Burton in his introduction, the first charter granted to Detroit by the General Assembly of the Northwest Territory to Chilicothe, January 18, 1802, together with the proceedings of the council that was appointed and elected under that charter. These proceedings extend from 1802 until the organization of the Territory of Michigan in 1805, ending abruptly in June, 1805, a few days before the great fire that destroyed the village and most of its contents. So far as is known, however, none of the official records of the place were burned. The Journal and the copy of the Act of Incorporation occupy about eighty-six pages in an ordinary notebook of the period, thirteen inches long by eight in width and less than three-quarters of an inch thick, now in the Burton Historical Collection. The transcription follows as closely as typographical limitations allow the characteristics of the original.

THE NATIONAL LIBRARY BINDERY COMPANY

1965 East 66th Street,

CLEVELAND, OHIO

We have established with our Cleveland bindery a "Department of Service" conducted by our technical representative, Miss Gertrude Stiles, formerly supervisor of binding in the Cleveland Public Library.

For information in regard to this department write directly to Miss Stiles.

Our other binderies are located in

Springfield, Mass.
728 Myrick Bldg.

Atlanta, Georgia
127 W. Peachtree St.

The Keyless Lock Binder

All we ask is the opportunity to prove the merit and quality of these Library Magazine Binders. Strongly and firmly built they withstand the wear of long and continued usage.

But more than that: Finished in Holliston Library Buckram they reflect the taste and beauty of the well-appointed Library.

Made in all sizes and styles of Binding.

WILLIAM G. JOHNSTON COMPANY

1130-42 Ridge Ave., N. S.,

Pittsburgh, Pa.

Now Ready

THE PUBLISHERS' TRADE LIST ANNUAL 1922

The most frequently used reference book in all book-stores and public libraries in the United States

"No bookseller, even the humblest, if he knows his business, can afford to be without the 'Publishers' Trade-List Annual,' often spoken of as 'the big catalogue book,' which contains the price lists of all the publishers in the country."—THE NEWSDEALER.

"The humblest dealer in the smallest town needs his 'Trade-List' and its wide yearly circulation is one of the commendable results of the PUBLISHERS' WEEKLY having always sold it at a nominal price—a price we imagine that scarcely pays the cost of binding."—GEYERS' STATIONER.

"If the holy book was as often consulted by the public in proportion as the Trade-List is by the booksellers the cry that it is a 'neglected book' would never be heard, for in every shop and in every public library this familiar 'jumbo' in pebbled green is in constant daily use."—THE BOOKSELLER

R. R. BOWKER COMPANY, Publishers

If you ask your local printer to duplicate "Durostock" Borrowers' Cards, or Gaylord Brothers' new Style "FL" Book Pockets, he'll probably say, "I guess I can give you something just as good."

When you order library supplies from Gaylord Brothers you *know* that they are made according to accepted standards for library use, and have been tried out successfully elsewhere.

It is a good rule to patronize home industries when ordering ordinary printed matter, but when ordering library supplies, to patronize firms which specialize in their manufacture and in service to libraries.

Home industries deserve your support. So do the industries of your profession.

Gaylord Bros
SYRACUSE, N. Y.

Helpful Books for Teachers and Pupils

You have widely used, in the past, many of the Palmer Company books: We remind you therefore of the following, some of them old, some new:

- THE KINGSLEY OUTLINE STUDIES:** 91 in number; covering the literature studied in the classes in English; 20 cents each. Send for detailed list. "Will supply teachers the methods and insight that a critical study demands." Prof. John Erskine, (Columbia Univ.) "Of untold value to the teacher of English." Brother Leo, (Sacred Heart Coll., San Francisco.)
- THE KINGSLEY ENGLISH TEXTS,** with Outline Study combined. We have Julius Caesar, Merchant of Venice, Macbeth, Evangeline, Old Testament Episodes, King Lear, Sir Roger de Coverley, Lady of the Lake, Burke's Speech, Ancient Mariner, Vision of Sir Launfal, As You Like it. Prices vary from 45 to 65c.
- THE KINGSLEY LATIN OUTLINE STUDIES:** cover the Caesar, Cicero and Virgil courses. 10 volumes. 40 cents each. Send or detailed list.
- THE KINGSLEY HISTORY OUTLINES:** cover Ancient, Grecian, Roman, English and United States history. One vol. on each. 5 vols., 50 cents each.
- GRAPHIC LATIN CHARTS.** Handy Edition. A graphic presentation of the main principles of the Latin language; its eight parts of speech are presented on four charts, each 14 by 18 inches, folded once and fastened in heavy manila covers. Let your pupils see Latin! Price 50 cents each.
- GRAPHIC LATIN WALL CHARTS:** Same as above only printed like a wall map and mounted on spring rollers, to be hung up before the class. Size 68 by 45 inches. Price, 1 chart, \$7.00; Set of 4, \$25.00.
- HISTORY DRILL CARDS.** By Clara E. Parker. A set of 61 cards containing questions and answers on U. S. history. Excellent in conducting reviews in history, after the manner of a spelling match. Price per set, 50 cents.

NEW BOOKS (Just Published)

- DIACRITICAL MARKS.** By N. E. Hamilton. An easy method for teaching a very important and much neglected subject. Diacritical marks appear in all standard dictionaries and every person is supposed to be familiar with them; but heretofore few attempts have been made to teach them in the schools. Without a knowledge of them many mistakes in pronunciation will be made. This little book will fill a long felt want in Grade and High Schools. Price 20 cents.
- EDUCATION AND THE ARMY.** By Captain Elbridge Colby, U. S. Army. The Author before entering the service was an Instructor in Columbia University and the University of Minnesota. His book tells what the Army is doing and has done in its schools. It has been a great work. You should know about it. His book is controversial and is sure to interest educators. Price \$1.00.
- INFORMAL ORAL COMPOSITION.** By George Pickett Wilson, (University of Wisconsin). This is something new upon this important subject. We speak a hundred times where we write but once. Yet there are a hundred books about how to write our thoughts, to one about how to effectively speak them. Professor Wilson's book shows young men and women how to gain this coveted power to express themselves, on any subject and under all kinds of circumstances. Think what this will mean to one applying for a job, or in selling goods, or in a thousand other situations in life! A fine text for adoption in High Schools and Colleges. Price \$1.20.

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

Make European War material instantly available

Every library has a considerable amount of material about the Great War. Every day more books on the subject are published. And to facilitate research and study an European war guide set is necessary.

After much experimental study, Library Bureau offers a war guide set which represents the most used sub-divisions selected from the U. S. Cata-

log, the "Reader's Guide to Periodical Literature" and the Library of Congress list of subject headings.

The set will save you time in the selection of proper headings when sub-dividing war material. It is printed on our well known card stock with celluloid projections.

The set contains 65 guides, and may be furnished immediately, price \$2.75.

THE LIBRARY JOURNAL

TWICE-A-MONTH

SEPTEMBER 15, 1922

The Huntington Library

By GEORGE WATSON COLE, Librarian

THE Huntington Library is a marvel of library history and one of the wonders of the twentieth century. The library world has nothing to be compared with it. All libraries of international renown have been the results of slow growth. The British Museum was founded in 1753 and has absorbed several collections whose histories run back to the time of King Henry VIII. The Bodleian Library dates from 1602 and that of Cambridge University from 1475. All of these libraries have from time to time been enriched by the acquisition of many well-known private collections. Furthermore, they have been fostered and supported by governmental or corporate aid. Our wonder increases, therefore, when we realize that a library, which in some respects rivals, if indeed it does not surpass, those ancient institutions, has been brought together by a private individual within the short space of fifteen or twenty years.

That this was possible is due to three important factors. The first is the man. Mr. Huntington has spent his life in conducting great affairs. That he has been so successful in everything he has undertaken is due primarily to the fact that he is a man of vision. He has the faculty of looking into the future and realizing with unerring foresight what is bound to take place. He then, with the means at his command, aids in bringing his visions to pass. The second factor has been the capital at his command with which to carry out his plans. Once they are made he leaves no stone unturned to accomplish his purpose. Without vast resources it is needless to say this great work could not have been brought to its present state of completion. But more than all Mr. Huntington has been blessed with such opportunities for carrying out his philanthropic project as have never fallen to the lot of any other man. Almost immediately after he had made up his mind to form a great library opportunities arose for the purchase of several important libraries en-bloc, and for the acquisition of many of the rarest books in the world by the dispersal of other libraries. During the past

fifteen years Mr. Huntington has bought some twenty libraries out and out and no important sale in New York or London during that time has passed without his having secured many rarities from each.

Of entire libraries bought by him the most important was that of the late E. Dwight Church of Brooklyn. This contained one of the finest collections of Americana in this country and the finest collection of Shakespeare folios and quartos outside of England. The library of Mr. Beverly Chew, tho smaller in numbers, contained an unusually fine collection of English poetry. That of the late Frederic R. Halsey was rich in both Americana and English literature. The remaining American libraries purchased, tho not as important individually, contained choice collections in special lines which have gone far toward giving the library its present prominence.

Of English collections purchased outright the earliest, and one of special significance, was that of the Duke of Devonshire. It contained twenty-five books printed by William Caxton, England's first printer, and the famous Kemble-Devonshire collection of plays. The latter, consisting of some eight thousand plays in English, was collected by John Philip Kemble, the actor, during the latter part of the eighteenth and beginning of the nineteenth centuries. The Bridgewater House Library, bought of the Earl of Ellesmere, was an ancestral library, the foundation of which was laid by Thomas Egerton, a favorite of Queen Elizabeth and the Lord Chancellor of King James. This library was remarkable in showing what a family of culture would naturally acquire in the field of English literature during the Elizabethan period, the Golden Age of our literary history. Another valuable acquisition was the American portion of the library of Mr. Christie-Miller purchased in 1916. This was one of the earliest sales of the Britwell Court Library and a precursor of the complete dispersal of one of the most remarkable, tho least known, English private libraries.

The purchase of so many libraries, as might be expected, brought together different copies of the same work, many of excessive rarity. This has given the Huntington Library an unprecedented advantage. In the first place it permitted of the comparison of copies which otherwise would never have been brought together. This showed that many copies supposed to be duplicates really contained differences. These consisted of different issues, editions, or variant readings, necessitating the keeping of both. As a result the Huntington Library has not only acquired many of the rarest books in the English language but copies in the finest possible condition, being those that the most eminent English collectors have for many decades selected to grace their shelves. The purchases thus made at the dispersal of various libraries has enabled Mr. Huntington to fill in and round out his library in a most satisfactory way.

The deaths of E. Dwight Church, Robert Hoe, and Alfred H. Huth, which closely followed one upon the other, brought into the market three libraries of international fame. The first named, as already mentioned, was bought entire by Mr. Huntington. From the sales of the Hoe Library he carried off the lion's share, and the Huth sales, extending over a period of nine years, were carefully watched and many volumes of the greatest rarity secured. Finally the recent dispersal of the Christie-Miller Library has brought into the book market many of the rarest volumes in the whole range of English literature. This library was founded by Mr. William H. Miller who began collecting early in the last century. He was a discriminating buyer who insisted on securing only the rarest books and those in the finest possible condition, a policy followed by his successors. In this library, to which access was difficult and its contents practically unknown, there have lain hidden for decades many books known to be extant but which had completely dropped out of sight. By the breaking up of this famous library, Mr. Huntington has been enabled to add many unique books and others of greatest rarity to his already superlatively fine collection.

The high prices Mr. Huntington has been willing to pay for bibliographical rarities, rather than let them escape, has naturally attracted the attention of owners of other libraries, who, having examined their shelves, have found many book rarities and placed them in the sales rooms. This has resulted in bringing to light many books the very existence of which has heretofore been unsuspected. By keeping a vigilant watch on the sales catalogues many extremely rare books of that description have from time to time been obtained and the Huntington Library has thereby been greatly enriched.

In addition to these sources many books have been bought from booksellers and private individuals. In short, every method employed by book-collectors has been pursued and no opportunity neglected to enrich and complete the collection in the fields in which Mr. Huntington has decided to confine his collecting.

The fields in which the Huntington collections have been made are as follows:

(a) English and American Literature. This term is to be taken in its most comprehensive sense embracing other fields than that of purely belles-lettres.

(b) American History, from the discovery of America down to the present time, stress being laid on the period of discovery, exploration, and settlement, especially of the English colonies. Local history of the United States is not systematically collected, except that of California. Of this the Library probably possesses the best collection of printed books in the State, excepting the Bancroft Library, at Berkeley.

(c) Incunabula. A small but representative collection of early printed books, consisting of some five hundred volumes, has been brought together. This includes the famous Perkins-Hoe copy of the Gutenberg Bible, printed on vellum.

(d) Miscellaneous. In the library are several small collections on railroads, aeronautics, etc., etc.

(e) Manuscripts. A fine collection, of both literary and historical interest has been brought together, some of them being of international importance.

ENGLISH LITERATURE

In this field the library is especially strong. Attention has been called to the Kemble-Devonshire collection of English Plays. This contains a very complete collection of the Elizabethan dramatists. Of the Shakespeare folios and quartos the Huntington Library possesses, without doubt, the finest collection in the world. In Miss Henrietta C. Bartlett's "Mr. William Shakespeare," recently issued, the library is credited with seventy-four copies of books by Shakespeare or of Shakespearean interest of which not more than five copies of each are known. In the same category the British Museum is credited with seventy-one copies and the Bodleian with seventy.

Special attention has been paid to collecting books by English authors, printed in English either in England or on the continent prior to 1641. Of this class the library already contains 7,660 titles. Some idea of the importance of this phase of the collection may be obtained by comparing it with the best estimate we have of the three great English libraries—the British Museum with sixteen thousand volumes, the Bodleian with eleven thousand and the Cambridge

THE HUNTINGTON LIBRARY—MAIN FACADE

University Library with eight thousand. These figures show that Mr. Huntington's collection already has almost as many volumes as the University Library at Cambridge; but, if quality instead of numbers is taken into consideration, the Huntington Library leads. As very many of these books are represented by unique copies it will be seen that no scholarly work can be successfully carried on where they are involved without recourse to this great storehouse of original source books. It should not be forgotten that the entire period of English literature is also quite fully represented, from the first book printed in our vernacular to the latest publications of contemporary authors.

AMERICAN HISTORY

In the Spanish phase of American History the collection contains all procurable editions of the letters of Columbus announcing the discovery of America. Here too are to be found the first Editions, in Spanish and Latin, of the Cortes letters announcing the conquest of Mexico; as well as the original editions of the "Narratives of the Earliest Circumnavigators." There is also a unique collection of De Bry's "Voyages," and a superlatively fine set of those published by Hulsius.

Of early works relating to New France, or Canada, the Library possesses Cartier's Voyages, first editions of Champlain's Works, and those of Hennepin and Lescarbot. Its collection of the Jesuit Relations is as nearly complete as it

can be made, most of the volumes being in the original vellum bindings. These contain the reports of the missionaries in Canada to their Superior in France. Owing to the narratives of the experiences, sufferings, and martyrdoms of the missionaries among the Indians, which they contained they were read with such eagerness by their contemporaries that most of them were worn to shreds and so have become of the utmost rarity.

But it is perhaps in works relating to the exploration and settlement of the original thirteen colonies that the library shows its greatest strength. The works of Captain John Smith occupy a prominent position, as do the two works of Brereton and Rosier, "The verie two eyes of New-England historie," as they have been called. Of the former the library possesses both issues, a fact which would give distinction to any library. Works from the first presses of Cambridge, Boston, New York, and Philadelphia, are found in considerable numbers, including the "Bay Psalm Book," Bradford's "Laws of New York" (1696), two copies; and "Eliot's Indian Bible." Of the works of the celebrated Mather Family there are some two hundred titles.

Works on the American Revolution are to be found in great numbers. Some eight hundred eighteenth century pamphlets were acquired in a single collection bought of Judge Benedict of New York. To these many more have since been

added, so that this period of our history, which was weakly represented in the Church Library, has been astonishingly strengthened. The naval history of our country is adequately covered by the Harbeek Collection, while that of Civil War material is distinguished in quality and numerically large.

As already stated the collection of printed books on California and the West Coast is second to none in its field. This portion of the Library has recently attained this prominence by the purchase of the Henry R. Wagner Collection.

MANUSCRIPTS

Much attention has been paid by the public press to the printed books in the library. It is not generally known that its collection of manuscripts places it in the front rank of manuscript collections in this country. Most prominent in the field of English Literature is the Ellesmere copy of Chaucer's "Canterbury Tales." This was written about 1405 soon after the author's death. In the Bridgewater House Library were also copies of Gower's "Confessio Amantis," Lydgate's "La Danse Macabre," and Milton's "Comus." Here also was a much larger collection of plays, of later date. This consisted of about two thousand plays submitted to John Larpent, Inspector of Plays from 1778-1824, and to his predecessors in office, covering the period from 1737 to 1824. A considerable number of these are autograph copies, and many are accompanied by letters from their authors—Dryden, Garrick, the Sheridans, the Kembles, and others.

In the Kemble-Devonshire collection was a copy of the Chester Mystery Plays, the earliest of five manuscript copies. By a recent purchase the library has secured the unique copy of the Towneley Mystery Plays. These two manuscripts are of the utmost importance for the light they throw on the early history of the English drama.

Here also are to be found the manuscripts of many authors whose names are still upon the lips of every well-read person. Among such are Thackeray's "Adventures of Philip," Reade's "Cloister and the Hearth," Trollope's "Belton Estate," Tennyson's "Idylls of the King," a long line of William Morris's works, including his translations of the *Odyssey* and *Æneid*, Swinburne's "Rosamund," Gissing's "The Whirlpool," Stevenson's "Child's Garden of Verses," Meredith's "Diana of the Crossways," Conrad's "Nostromo," Kipling's "From Sea to Sea," and criticisms of over one thousand works by Meredith written when he was employed as a literary reader by Chapman and Hall, the London publishers. The manuscript of Ruskin's "Seven Lamps of Architecture," with many of his

original drawings, is a delight to both mind and eye.

The manuscript collection contains many autograph letters, but none can exceed the confidential character and literary interest of a little collection of only three. In the first of these Charles Lamb proposes marriage to Frances Kelly, the actress and singer. Then comes her letter in which she graciously declines the offer with which he honors her. In the last he lovingly accepts her decision with the expressed desire that the harmonious relations that had previously existed between them might remain unbroken. All three letters are dated July 20, 1819.

Manuscripts of interest in American Literature are not wanting. Among a few that may be named are Mark Twain's "Prince and the Pauper;" Thoreau's "Walden;" Bret Harte's "Two Men of Sandy Bar;" Cooper's "Ned Meyers;" and Stockton's "The Lady or the Tiger." Among copies of well-known poems in the handwriting of their authors are "America" by Samuel Francis Smith; "Annabel Lee" by Poe; and "Home Sweet Home" by John Howard Payne.

Among documents of great historical importance are the records of the Dutch West India Company, which have never been printed. When they are they will throw an entirely new light on the early history of Manhattan Island.

That most deplorable event of the War of the Revolution, the treachery of Benedict Arnold and the subsequent arrest and execution of Major John André is represented by "André's Journal," a letter by Benedict Arnold to Lord North acknowledging the receipt of £6,000 for betraying his country and pleading to be placed on the British Establishment in order adequately to support his numerous family, and that portion of the manuscript of Washington Irving's "Life of George Washington," giving an account of this tragic event. Four letters in the handwriting of George III., explaining his reasons for reluctantly granting independence to the American Colonies and the Minutes of the Privy Council on the same matter give us an insight into the arcanum of English statecraft and is doubtless one of the most important documentary cornerstones of the history of the United States in existence.

Papers of an intimate personal character are to be found in the Autobiography of Benjamin Franklin and in the Genealogical and Family History of the Washington family, in the handwriting of Washington himself, and written in 1792 when he was able to say of himself "now President of the United States."

Among other manuscripts might be mentioned

PLAN OF THE MAIN FLOOR

Paul Jones's commission as Admiral; Aaron Burr's Journal, kept while living abroad after his duel with Hamilton; Lincoln's Note Book, giving his utterances on negro equality, as enunciated in his debates with Douglas; Herndon's "Life of Lincoln;" Sherman's Memoirs; and all of John Fiske's histories together with many of his letters and other writings.

Manuscripts of California interest are not wanting. Among them are the Fort Sutter Papers, long lost, but recently brought to light, and the Records of the San Francisco Vigilantes of 1856.

Those named above constitute but a few of the important manuscripts that have been acquired by the Huntington Library. They are even now innumerable, and priceless in value, and will grow more and more in value and importance as the years pass by.

THE LIBRARY BUILDING

These treasures and others yet to be added, are to find a home in the fine library building that Mr. Huntington has erected on his estate at San Marino, California. The library building is within two and one-half miles of the center of Pasadena. The estate consists of about five hundred acres and comprises some of the finest land in the foot-hills of Southern California. Besides the library building it contains the stately residence now occupied by Mr. and Mrs. Huntington, ultimately to become a Museum and Art Gallery. Here are collected antique

bronzes, tapestries, and other objects of art. Its chief feature, however, is the finest collection ever brought together of the masterpieces of English portraiture, represented by the works of Gainsborough, Romney, Reyburn, Reynolds, and other English portrait painters. Everything that landscape gardening can do has been employed to beautify the estate. There is a Japanese garden, the first sight of which always brings forth exclamations of admiration from the beholder. A Cactus garden, containing over three hundred and fifty varieties, is located on a hillside near the main driveway. On the park-like grounds will be found trees, shrubs, and plants from every corner of the earth that can be made to grow in the climate of Southern California—in short the whole will constitute an arboretum such as can be found nowhere else in America.

The library, "built in the renaissance style presents an appearance of rich but refined luxury. The main façade includes a pylon at each end in which the entrances are placed, while between these pylons and placed upon the high basement story rests a series of engaged columns which support the entablature and cornice, above which rises the low pitched red tile roof. The structure is planned upon the model of a letter E, the middle wing being devoted to the stack room. The remainder of the building is planned as reading and exhibition rooms, an office for the personal use of Mr. Huntington, and offices for

the librarian, assistant librarian, and the staff of catalogers."

The main facade is 210 feet in length and the building has a depth of 150 feet. The bronze doors which give entrance to the library at either end are richly ornamented in the spirit of the Italian renaissance. They are arranged in eight panels with two additional panels above which serve as a transom giving the effect of a higher opening when the doors are closed. The main reading-room occupies the central portion of the building, and is flanked on the right by the main entrance to the library and the Founder's room. On the left is the entrance to the exhibition rooms which occupy the whole of the left wing. The right wing is the only portion of the building two stories in height, the main floor being used as the cataloguing rooms. The second floor is at present used for the temporary storage of such books as have already been unpacked. These are to remain here only until the stack occupying the central wing is complete. This will consist of three floors, the only entrance to it being from the main reading-room upon its second level. It will have a capacity of a quarter of a million volumes.

It is planned to have those desiring to make use of the library enter at the right hand entrance and pass directly thru it into the public catalog room beyond. An attendant will assist readers in making use of the catalog. The reader having procured the information of which he is in search, passes thru into the main reading-room. At the desk in front of the entrance to the stack will be found an attendant who will bring him the books he needs.

The reading-room is of beautiful proportions, being 110 feet in length and 30 feet in width and height. It is lighted by high windows on the south side, towards which the building faces, and will be artificially lighted by diffused light from three chandeliers. The room is to be finished in antique oak with readers' tables extending lengthwise thru the center, while the walls will contain cases for the exhibition of prints, maps, etc.

As the building is not as yet completed and as many of the books already purchased have not yet been received, while many others are still unpacked and uncatalogued, it will be a year or two before the Library will be opened to the public. No rules regarding its use have as yet been made, but it is safe to say that no one doing research work of a scholarly character nor any well accredited student seriously engaged in literary work will find any difficulty in gaining access to its treasures. In fact a limited number of scholars have already been welcomed and have made use of them. It may

be added that the resources of the library are of such a character that none but those engaged in serious scholarly work will be permitted to make use of them.

Deeds, dated respectively August 12, 1919 and April 3, 1922, have already been executed by Mr. and Mrs. Huntington by which this magnificent estate with all its treasures and an adequate fund for its growth and maintenance has passed into the hands of a board of self-perpetuating trustees, in trust for the benefit of the public, subject only to the life interest of the donors.

It is but natural to ask what position the Huntington Library is to occupy among the educational institutions of the country, consisting as it does to a very great extent of the source books of English literature and American history.

It will be strictly a reference library and no books will be permitted to leave the building. It will be resorted to by advanced students, those carrying on research work on the subjects it contains. As such it will in no sense be a popular library but one that will be made use of by professors, graduate students preparing theses for degrees, and others engaged in research work.

The great number of unique volumes which the library possesses will naturally attract students from all over the world, as here are to be found books on many subjects that cannot be found elsewhere.

The above but inadequately describes a few of the many treasures that have been brought together thru the generosity of Mr. Huntington for the delectation of literary scholars and lovers of the beautiful.

A bibliography of the periodical literature of America prior to and including the year 1800 is in preparation by William Beer, librarian of the Howard Memorial Library of New Orleans. A list of the collections of the Library of Congress, New York Public Library, American Antiquarian Society, Boston Public Library and Boston Athenaeum, now being compiled, will be printed in the LIBRARY JOURNAL to form a check-list, and it is expected that the final list will be completed at an early date.

With its September number *Gaylord's Triangle* enters upon its second year in the service of quality and new ideas in library supplies. The "Corner Gossip" on the last page is arrived at via "Behind the Bookstack" (of the Minneapolis Public Library's *Community Bookshelf*) and appropriately matches in form the "Literary Lobby" of the *Literary Review*.

Sources of Material for Library Extension Service*

BY LENOIR DIMMITT, Extension Librarian, University of Texas

WHEN one of my friends learned that I had been asked to prepare a paper for this conference on the subject of "Sources of Material for Library Extension Service," he said, "You could ask for nothing easier. You will have to use only four words—magazines, newspapers, books, pamphlets." While it is true that this would be a correct answer to a query in regard to sources, it would be of little help to a librarian striving to build up a collection of material. She would want to know which magazines are best for this kind of work, and, since it takes many magazines of the same date to meet the demands for literature on the most popular subjects, how it is possible to make her subscription fund cover the cost of them. She would want to know how many and which newspapers are needed for clipping. She would want to know if she should buy any books. And most of all she would want to know where to get pamphlets containing good, authoritative material.

A list of all the magazines suitable for this kind of work is too long to give here. A few which have proved to be the most useful are *Current History Magazine*, *Literary Digest*, *World's Work*, *Review of Reviews*, *Congressional Digest*, *Survey*, *Monthly Labor Review*, *Annals of the American Academy*, *National Outlook*, *Scientific American*, *Arts and Decoration*, *American Magazine of Art*, *Playground*, *National Geographic Magazine*, *School and Society*, *Education*, and *Bookman*. It is not necessary to subscribe for more than two copies, as others may be obtained by the simple device of begging back numbers from friends of the university. Our own experience in sending a form letter to the members of the faculty asking for their magazines when they had finished reading them was very gratifying. The material came in so fast that all our available space was soon overflowing. The sending of a letter of this kind has to be repeated each year so that the new members of the faculty will always receive it and the older ones will not forget about it. The book stores and news stands are often willing to contribute unsold back numbers of their magazines. A notice put in the local newspapers produces good results, especially during spring house-cleaning season.

It does not pay to clip many newspapers. They are expensive to buy and expensive to put

in form suitable for circulation. Then too, subjects which are important, except those of purely local interest, are usually treated in a better way in the weeklies which come out by the time the demand for a subject reaches the library. Several state papers, covering different parts of the state, the *New York Times*, and the *Christian Science Monitor* are sufficient. Arrangements can always be made to receive some of these as gifts from friends.

Few books have to be bought except those on very live subjects, such as the *Wilson Handbook Series*; debate books, such as the *University Debaters' Annual*, *Intercollegiate Debates*, and the *Wilson Debaters' Handbook Series*; and some reference books, such as an encyclopedia, *World Almanac*, and the *Statistical Abstract*. It is sometimes necessary also to buy a few books on subjects for which there is a very great demand, like that chosen for inter-scholastic league debates. As a rule it is better to leave the purchase of books to the State Library Commission and the State University, since we have the privilege of borrowing from their collections for our patrons.

There are many ways of finding what pamphlets have been published and of obtaining copies for them for our library extension service. There are many institutions and associations with which we can arrange to have our libraries put on their permanent mailing lists, by exchange, by gift, or by payment of a certain sum. There are lists of current pamphlets which are printed regularly in magazines, and others which are printed as separate publications. Bibliographies from various sources may be consulted when material is being collected on specific subjects. Then too, references to pamphlets are found in unexpected places, such as newspapers and bulletins.

One of the most prolific sources of free pamphlet material is the United States Government Printing Office. While it is well to have our libraries placed on the mailing list for some of the government publications, such as the *Congressional Record*, *School Life*, *Commerce Reports*, and bulletins of the Children's Bureau, Public Health Service, Department of Agriculture, and Bureau of Education, there is little danger of our missing anything of importance even if we were not on the mailing lists, because the publications are listed in so many places. All government publications are listed in the *Monthly Catalogue of United States Public Documents*, but this is always about two months

*Paper read at the A. L. A. University Library Extension Service Round Table at Ann Arbor, June 29, 1922.

late in reaching us and by that time the things in which we are interested have been listed in a more convenient form (by subject instead of by publisher) in other places, namely the *Monthly Record of Current Educational Publications*, *Experiment Station Record*, U. S. Department of Agriculture's *Monthly List of Publications*, the *Booklist*, *Public Affairs Information Service Bulletin*, *Journal of Home Economics*, *Monthly Labor Review*, *American City*, and other magazines.

AGRICULTURE

There is a wealth of material to be had on agricultural subjects. Besides the United States Department of Agriculture, the agricultural experiment stations, state agriculture departments, and agricultural colleges all print many free bulletins. It is better to check the *Experiment Station Record* and other lists for these rather than ask to be put on the regular mailing list for any except those of our own states. The International Harvester Company² is another source of free agricultural material.

BANKING

The larger banks and trust companies print free pamphlets on the subjects of banking, business conditions, foreign trade, and industrial problems. Some of the banks on whose mailing lists it would be profitable to ask a place are the American Bankers' Association,³ the American Exchange National Bank,⁴ the Bankers' Trust Company,⁵ the Equitable Trust Company,⁶ the Guarantee Trust Company,⁷ the Irving National Bank,⁸ the National Bank of Commerce in New York,⁹ the National City Bank of New York,¹⁰ and the Old Colony Trust Company.¹¹

BIOGRAPHY

A number of book publishers print short pamphlet biographies of present-day authors for free distribution. Some of the companies which do this are D. Appleton Co., Century Co., Dodd, Mead Co., Frederick Stokes Co., George H. Doran Co., Doubleday, Page Co., Harper and Brothers, Henry Holt and Co., Houghton Mifflin Co., John Lane Co., Little, Brown and Co., Mac-

millan Co., G. P. Putnam's Sons. The Michigan State Library has printed an excellent pamphlet called "Biographical Sketches of American Artists" which may be obtained for fifty cents.

CHILD WELFARE

There is a large number of associations which print pamphlets on child welfare. Some of the most noteworthy of these are the American Child Hygiene Association,¹² Child Health Organization,¹³ National Child Labor Committee,¹⁴ National Conference of Social Work,¹⁵ and the Russell Sage Foundation.¹⁶ Material on this subject may also be procured from the U. S. Children's Bureau, state children's bureaus, state departments of health, and universities.

COMMUNITY ORGANIZATION

Community organization and recreation are two popular subjects which are well provided for by the Playground and Recreation Association of America,¹⁷ the Russell Sage Foundation, Community Service,¹⁸ and university publications. Among the colleges which have printed good bulletins on these subjects are North Dakota Agricultural College, University of Minnesota, Massachusetts Agricultural College, University of North Carolina, and Wisconsin University. Some of the state boards of education, such as those of Illinois, Washington, and Indiana, and the United States Bureau of Education have printed bulletins on community centers.

DELINQUENCY

The American Prison Association¹⁹ has recently printed a short bibliography covering the subjects of delinquency, probation, and prison reform. This association and others, notably the National Committee on Prisons and Prison Labor,²⁰ National Probation Association,²¹ Prison Association of New York,²² and National Conference of Social Work,²³ print good material. It is quite worth while to be on the mailing list of all these associations.

¹² American Child Hygiene Association, 1211 Cathedral St., Baltimore, Md.

¹³ Child Health Organization of America, 370 7th Ave., New York.

¹⁴ National Child Labor Committee, 105 East 22nd St., New York.

¹⁵ National Conference of Social Work, 25 East 9th St., Cincinnati, Ohio.

¹⁶ Russell Sage Foundation, 130 East 22nd St., New York.

¹⁷ Playground and Recreation Association of America, 1 Madison Ave., New York.

¹⁸ Community Service, 1 Madison Ave., New York.

¹⁹ American Prison Association, 135 East 15th St., New York.

²⁰ National Committee on Prisons and Prison Labor, 116th St. and Broadway, New York.

²¹ National Probation Association, 132 State St., Albany, N. Y.

²² Prison Association of New York, 135 East 15th St.

²³ National Conference of Social Work, 25 East 9th St., Cincinnati, Ohio.

¹ Public Affairs Information Service, 11 West 40th St., New York.

² International Harvester Company, Harvester Bldg., Chicago.

³ American Bankers Association, 5 Nassau St., New York.

⁴ American Exchange National Bank, 128 Broadway, New York.

⁵ Bankers Trust Company, 16 Wall St., New York.

⁶ Equitable Trust Company, 37 Wall St., New York.

⁷ Guaranty Trust Company, 140 Broadway, New York.

⁸ Irving National Bank, Woolworth Bldg., New York.

⁹ National Bank of Commerce in New York, 31 Nassau St.

¹⁰ National City Bank of New York, 55 Wall St., New York.

¹¹ Old Colony Trust Company, Boston, Mass.

EDUCATION

A subject which rivals agriculture in the amount of material printed on it is that of education. It is well to be on the mailing lists of the U. S. Bureau of Education, the Federal Board of Vocational Education,²⁴ state departments of education, and universities. The proceedings of the National and state educational associations always contain valuable material.

FIRE PREVENTION

Fire prevention is a subject about which there is a good deal of agitation at present. The fire insurance departments of some of the states, such as Arkansas, Kansas, Louisiana, Minnesota, Missouri, Nebraska, New Jersey, North Carolina, Ohio, Tennessee, and Texas print literature on this subject. Material may also be procured from the American Eagle Fire Insurance Company,²⁵ the Continental Fire Insurance Company,²⁶ the Fidelity-Phoenix Fire Insurance Company,²⁷ the National Board of Fire Underwriters,²⁸ and the Ohio Department of Public Instruction.

HEALTH

Health material is so plentiful that we sometimes wonder how there can be any sickness in the world when there is such a quantity of material on health education being distributed all the time. Besides splendid publications printed by the United States Public Health Service and the state health departments, there is a large number of associations and life insurance companies which put out pamphlets on public health. Among these are the American Public Health Association,²⁹ Child Health Organization of America,³⁰ Association of Life Insurance Presidents,³¹ Metropolitan Life Insurance Co.,³² National Organization for Public Health Nursing,³³ National Conference of Social Work,³⁴

²⁴ Federal Board of Vocational Education, Washington, D. C.

³⁵ Prudential Insurance Company of America, Newark, N. J.

Prudential Insurance Co.,³⁵ National Tuberculosis Association,³⁶ and the Rockefeller Foundation.³⁷

HOUSE PLANNING

Good pamphlets on house planning may sometimes be obtained from lumber, brick, and cement manufacturers. The American Face Brick Association,³⁸ the California Redwood Association,³⁹ Northern Hemlock and Hardwood Association,⁴⁰ Southern Cypress Manufacturers Association,⁴¹ and Southern Pine Association⁴² have printed such pamphlets. The Atlas Portland Cement Co.⁴³ has recently printed a booklet containing very attractive and practical house plans, called "The Stucco House."

IMMIGRATION

Immigration is a subject which will probably be a live one for a long time. A splendid outline may be obtained from the Ward, McDermott Co.⁴⁴ Both the universities of Virginia and of Texas have printed bulletins containing briefs and selected articles. Pamphlets may be obtained from the American Jewish Committee,⁴⁵ Guaranty Trust Co.,⁴⁶ Immigration Restriction League,⁴⁷ Inter-Racial Council,⁴⁸ Commonwealth Club of California,⁴⁹ National Committee for Constructive Immigration Legislation,⁵⁰ National Liberal Immigration League,⁵¹ National Association of Manufacturers.⁵² The U. S. Census Bureau publications and reports of the Commissioner of Immigration are valuable for statistics. A great deal of *Congressional Record* material may be obtained, either directly from the congressmen in the form of reprints, or from the Superintendent of Documents. Many magazine articles may be found, both in current numbers, and in back issues.

³⁶ National Tuberculosis Association, 370 7th Ave., New York.

³⁷ Rockefeller Foundation, 61 Broadway, New York.

³⁸ American Face Brick Assn., 1105 Dearborn St., Chicago, Ill.

³⁹ California Redwood Assn., San Francisco, Cal.

⁴⁰ Northern Hemlock and Hardwood Assn., Oskosh, Wis.

⁴¹ Southern Cypress Manufacturers Assn., New Orleans, La.

⁴² Southern Pine Assn., 600 Interstate Bank Bldg., New Orleans, La.

⁴⁸ Inter-Racial Council, 233 Broadway, New York.

⁴⁹ Commonwealth Club of California, 153 Kearney St., San Francisco, Cal.

⁵⁰ National Committee for Constructive Immigration Legislation, 105 East 22nd St., New York.

⁵¹ National Liberal Immigration League, 108 E. 31st New York.

⁵² National Association of Manufacturers, 30 Church

LABOR

One of the most important subjects with which we have to deal is labor. Some of the sources of material are U. S. Bureau of Labor Statistics, American Association for Labor Legislation,⁵³ American Federation of Labor,⁵⁴ League for Industrial Rights,⁵⁵ Merchants' Association of New York,⁵⁶ National Association of Manufacturers,⁵⁷ and American Anti-Boycott Association.⁵⁸

MERCHANT MARINE

Merchant marine and ship subsidies are prominent subjects just now. Some of the institutions and associations which are printing pamphlets on them are the American Steamship Owners' Association,⁵⁹ Atlantic Coast Shipbuilders' Association,⁶⁰ Committee of American Shipbuilders,⁶¹ National Foreign Trade Council,⁶² Navy League of the United States,⁶³ Bankers Trust Co.,⁶⁴ and Mechanics and Metals National Bank.⁶⁵ Speeches and reports made in Congress may be obtained from congressmen.

PEACE

Some of the associations which are printing important publications on peace and disarmament are the American Association for International Conciliation,⁶⁶ League to Enforce Peace,⁶⁷ Society to Eliminate Economic Causes of War,⁶⁸ Carnegie Endowment for International Peace,⁶⁹ and World Peace Foundation.⁷⁰

⁵³ American Assn. for Labor Legislation, 131 East 23rd St.

⁵⁴ American Federation of Labor, 9th and Mass Aves., Washington, D. C.

⁵⁵ League for Industrial Rights, 70 Fifth Ave., New York.

⁵⁶ Merchants Association of New York, Woolworth Building.

⁵⁷ National Assn. of Manufacturers, 30 Church St., New York.

⁵⁸ American Anti-Boycott Assn., 135 Broadway, New York.

⁵⁹ American Steamship Owners Assn., 17 Battery Place, New York.

⁶⁰ Atlantic Coast Shipbuilders Assn., 30 Church St., New York.

⁶¹ Committee of American Shipbuilders, 30 Church St., New York.

⁶² National Foreign Trade Council, 1 Hanover Sq., New York.

⁶³ Navy League of the United States, 110 South Dearborn St., Chicago, Ill.

⁶⁴ Bankers Trust Company, 16 Wall St., New York.

⁶⁵ Mechanics and Metals National Bank, 20 Nassau St., New York.

⁶⁶ American Association for International Conciliation, 407 West 117th St., New York.

⁶⁷ League to Enforce Peace, 130 West 42nd St., New York.

⁶⁸ Society to Eliminate Economic Causes of War, 67 Wellesley Ave., Wellesley, Mass.

⁶⁹ Carnegie Endowment for International Peace, 2 Jackson Place, Washington, D. C.

⁷⁰ World Peace Foundation, 40 Mt. Vernon St., Boston, Mass.

SOCIAL PROBLEMS

For social problems some of the best sources of material are the American Red Cross,⁷¹ American Unitarian Association,⁷² National Conference of Social Work,⁷³ Russell Sage Foundation,⁷⁴ and Wisconsin State Conference of Social Work.

Covering the subjects of architecture, art, biography, domestic art, history, literature, music, nature, popular science, and travel are the Mentor⁷⁵ booklets. They are issued monthly in the form of a magazine, each number being devoted to only one subject, with the exception of a very few short articles in the back. They are beautifully illustrated and contain authoritative material. Back numbers may be bought for 25 cents and 35 cents per copy.

The Pan American Union⁷⁶ prints excellent pamphlets on the different Latin American countries. There is usually a small charge for these, but it is sometimes possible to obtain them free by writing to your congressman.

One of the important collections in every library which offers extension service to club women is that of club programs. The fastest way of building up such a collection is to ask each club in the state to give the library a copy of its yearbook. Some good programs are procured in this way, and, when sent in advance, they help in early collection of material in time to meet the demands which are sure to come later in the year. The H. W. Wilson Study Outline Series includes a number of subjects. The General Federation of Women's Clubs,⁷⁷ the Wisconsin Library Commission, and H. A. Davidson of Claremont, California, have prepared outlines. A number of University extension bureaus have printed study courses for clubs in bulletin form, among which are the universities of Iowa, Indiana, Cornell, North Carolina, Oklahoma, Minnesota, and Texas. The American Federation of Arts⁷⁸ has prepared some typed outlines on art subjects. The Drama League⁷⁹ has printed a large number of Outlines on the drama. The U. S. Children's Bureau

⁷¹ American Red Cross, Washington, D. C.

⁷² American Unitarian Assn., 25 Beacon St., Boston, Mass.

⁷³ National Conference of Social Work, 25 East 9th St., Cincinnati, Ohio.

⁷⁴ Russell Sage Foundation, 30 East 22nd St., New York.

⁷⁵ Mentor Association, 114 East 16th St., New York.

⁷⁶ Pan American Union, 17th and B Sts., N. W. Washington, D. C.

⁷⁷ General Federation of Women's Clubs, 415 Maryland Bldg., Washington, D. C.

⁷⁸ American Federation of Arts, 5th Ave., and 82nd St., New York.

⁷⁹ Drama League of America, 59 East Van Buren St., Chicago, Ill.

and the National Child Labor Committee⁶⁰ have printed outlines on child welfare. Sometimes reading lists prepared by libraries are helpful in arranging programs and copies of them may be filed with the club program material.

The number of subjects on which material is collected for library extension service is so large that it has been possible to mention only a few of them. We must turn our attention now to the various lists of pamphlet publications which it is necessary to check regularly in order to keep in touch with all the sources of material.

LISTS OF PAMPHLET PUBLICATIONS

The *Booklist* always contains a good list of pamphlets printed by associations, foundations, commercial concerns, banks, chambers of commerce, etc. The *Bulletin of Bibliography, Public Libraries, LIBRARY JOURNAL, and Special Libraries* nearly always note a few pamphlets, particularly those publications, like bibliographies, which are of special interest to librarians. This is true also of the *Wisconsin Library Bulletin*, altho it more often contains a fairly long list of pamphlets of general interest than do the other four library magazines mentioned. The *Cumulative Book Index* lists some pamphlets along with the books on various subjects. The *Monthly Check-List of State Publications* is more useful for reference purposes than for checking. It hardly pays to check it, because it contains so few references to publications useful to us which we have not already procured by some other means. It is valuable sometimes in looking up state reports on certain subjects which are just being introduced into our states. For instance, if there were a discussion in my state as to the advisability of the establishment of a state teachers' pension fund, we should want to get reports of boards administering similar funds in other states. By referring to the *Monthly Check-List of State Publications* we should find that such a report has been published by the Illinois Board of Trustees of Teachers' Pension and Retirement Fund.

There are two monthly lists which cover agricultural subjects. One of these is the United States Department of Agriculture *Monthly List of Publications*. The other is the *Experiment Station Record* which lists U. S. Department of Agriculture Bulletins, experiment station bulletins, publications of agricultural associations and colleges and state boards of agriculture, together with magazines and books. This list is arranged under seventeen different subjects. Of this number there are only five which it is worth our while to check carefully. These are forestry, foods, rural engineering, rural economics and

sociology, and agricultural education. References to forestry publications are also to be found in the *Current Literature Monthly list* of the Library of the U. S. Forestry Service.

Many magazines covering specific fields contain lists of literature published on subjects in those fields. Lists of current publications in the field of education can be found in the *School Review, Education, Elementary School Journal* (which practically duplicates the list in *Education*), and *Pedagogical Seminary*. But the most complete list of educational literature is printed in the *Monthly Record of Current Educational Publications*, which is a classified list.

Lists on health are contained in *Public Health Nurse and American City*; home economics in the *Journal of Home Economics*; municipal problems in *American City* and *New York Municipal Reference Library Notes*; recreation in *Playground* and in *Parks and Recreation*; social problems in *American Journal of Sociology, American Political Science Review, and Journal of Delinquency*.

All the lists which I have mentioned are duplicated to a certain extent in the *Public Affairs Information Service Bulletin*,⁶¹ which is by far the most inclusive list printed. If those of us who have the responsibility of making large collections of material on current questions were told that we were going to be deprived of all lists except one and had the choice as to that one, I believe that the *P. A. I. S. Bulletin* would receive a unanimous vote. I should not like this to happen, however, because there are always some references in the other lists which are not in the *P. A. I. S. Bulletin*.

Some of the advantages of this bulletin are that it is issued frequently; it is classified by subjects and is cumulative, which makes it valuable for reference purposes; it covers most of the subjects in demand in library extension work; it announces the formation of new associations and the publication of new magazines; and it announces approaching meetings of associations and analyzes their proceedings as soon as they are published. It lists pamphlets, magazine articles, and books.

Further aids which we have in finding clues to material are bibliographies prepared by libraries and other institutions. The *Bulletin of Bibliography, Special Libraries, and, sometimes, LIBRARY JOURNAL* contain bibliographies. The Library of Congress prepares lists of references on timely subjects, such as Kansas Court of Industrial Relations and Soldiers' Bonus. The *Price Lists* of the Superintendent of Documents are useful when collecting material on specific

⁶⁰ National Child Labor Committee, 105 East 22nd St., New York.

⁶¹ Public Affairs Information Service, 11 West 40th St., New York.

subjects. A valuable list which might be mentioned in this connection is the one by Mary Josephine Booth called "Material on Geography Which May be Obtained Free or at Small Cost." This was printed as Bulletin No. 69 of the Eastern Illinois State Normal School. It is not only a good list from which to order, but it should be included in every package library on the teaching of geography.

DIRECTORIES

References to publications of associations and societies which are found in bibliographies and other places often do not give the address of the publisher. This necessitates a knowledge of places to look for such information. The cumulations of the *P. A. I. S. Bulletin* give a key to periodical references, with addresses, and a directory of book publishers. They also list the associations, with their addresses, whose proceedings have been analyzed in the *Bulletin*, but this is a small number. The addresses of other associations and institutions are given in the body of the *Bulletin* where their publications are listed, but since these are arranged by subject only, it is almost impossible to find them for directory purposes.

The *World Almanac* contains a list of associations and societies, with addresses and the *Cumulative Book Index* lists some in its directory of publishers. On the general subject of agriculture the *Directory of American Agricultural Organizations* printed by the U. S. Department of Agriculture may be consulted. Besides purely agricultural associations, it includes those whose work concerns good roads, bird protection, and kindred subjects. The U. S. Department of Commerce has printed a directory of commercial organizations in the United States. The annual educational directory published by the U. S. Bureau of Education includes educational associations and a few learned and civic organizations. Addresses of libraries and library organizations may be found in the *A. L. A. Handbook*. The *Playground of March, 1922*, consists largely of the yearbook and annual report of the Playground and Recreation Association of America which contains the addresses of officers of recreation commissions, boards, and associations.

Each issue of the *Survey* contains a short directory of social agencies. The American Red Cross has published a recent book called "Handbook of Social Resources in the United States." In 1915 the H. W. Wilson Co. printed "A Subject Index to About 500 Societies Which Issue Publications Relating to Social Questions." This was a most useful publication but it is out-of-date now. The Wilson Company would render

a valuable aid to all extension library and other reference library workers by publishing a new and revised edition of this.

Even with all the directories named at hand, there are still times when it is difficult to find certain addresses. Because of this we in Texas have found it convenient to keep a card index file of associations and institutions that publish material on the subjects in greatest demand. This is arranged in two parts, one by publisher and the other by subject. The first is used as a directory, while the second helps in locating material on specific subjects.

It is doubtful whether it would be possible to make a complete list of all the sources of material for library extension service. It certainly cannot be done in a paper of this length. An attempt has been made only to point out the most important sources.

Help for Russian Librarians

WE have received thru the kindness of Avrahm Yarmolinsky, chief of the Slavonic Division of the New York Public Library, a translation of a letter from a librarian in Southern Russia sent to Nikolai A. Rubakin, the prominent Russian bibliographer. Lest it react unfavorably upon the author and her colleagues references which might identify the library are here omitted.

From the long and informing letter we extract the following.

One group of workers who are perhaps most seriously affected has been to a great extent forgotten by those who have to come to the help of Russian intellectuals. I mean the librarians. During the revolutionary years the library workers have borne a tremendous burden.

Our efforts have not always been successful, and yet during these years of the revolution a national library of more than a million volumes has been built up in Kiev. We have also preserved practically all the regional libraries. We have carried on the work in unheated buildings. . . . And under these conditions we actually extended and improved the libraries. For many months the librarians received no salary or rations, and in order to exist they had to sell their clothing. . . . Personally. . . my situation was somewhat better than that of the others. . . . Since October they have not received any ration and like all the other employees they receive their salaries irregularly. . . . In the winter the stronger among them worked at night on the railway, shoveling snow, and then, tired from their night-work they came to the library to work in an unheated room. We receive less than the women who scrub the floors in the library buildings. . . . Last winter two employees contracted tuberculosis, and one died. There are now twelve of us, four in the children's section, eight in the adult's, and of these twelve, are five who are most in need. . . .

Dr. Yarmolinsky has consented to forward gifts directly or thru the American Relief Commission and to send acknowledgments directly to any of our readers who can help. Ed. L. J.

The Detroit County Library Exhibit

By LOLETA I. DAWSON

Librarian, Wayne County Library, Detroit, Mich.

ALMOST a quarter of a century has passed since the idea of county libraries took form in Maryland and Ohio, and was recognized as the most promising unit of organization for giving library service to all the people. What progress has the movement made since 1900? What is its present scope? Is there uniformity in the methods used? Can the experience of the better organized county units be summed up for the benefit of those just beginning?

It was with the hope of answering these questions that the joint committee appointed by the A. L. A. and the League of Library Commissions prepared a county library exhibit for the Detroit convention.

The general plan of the exhibit may be discussed under three headings: Material contributed by the various states and counties; Special information collected by members of the committee; and Publicity features.

The great mass of material shown was selected from exhibits shipped to Detroit from all parts of the country, in response to letters sent out in March to each of the twenty-nine states having a county library law and to Hawaii, Canada and Scotland. In spite of the fact that the committee started in good time with the idea of making a comprehensive display, the exhibit in its final form was not well-balanced, but rather one which very obviously had many omissions and irregularities. High grade library publicity is always difficult to obtain. No doubt we were too optimistic in hoping that this first exhibit might be complete; in expecting that within three months most of the county libraries in operation, rushed as they are with a multiplicity of pressing needs in their own regions and limited as to staff and funds would be able to prepare charts which would graphically display the conditions and results of their work or obtain pictures which would emphasize the unique features in their experience.

Of the material collected, some subjects were thoroly covered, while others were scarcely touched, such as the sections of the exhibit devoted to book wagons, shipping cases, forms and publicity. The pictures of book wagons, with the information as to their cost, capacity and special features, and with some blue prints and drawings showing construction, included almost every book truck now in use. The shipping cases displayed presented the types adapted to various needs. The one from Menominee, Michigan,

illustrated the combination shipping case and book case. A specially constructed box being tried out by the Wisconsin Library Commission represented the type used for sending books by express. A lighter box better suited to libraries that make their own deliveries, was exhibited by Wayne County, Michigan. These were supplemented by pictures, models, and examples of mailing bags from other localities. Forms for use in county libraries were presented by a series of effective posters from Gaylord Brothers and by Miss Zana K. Miller's pamphlet, "County Library Records," copies of which were distributed. The exhibit in its permanent form will include posters showing the records worked out by Miss Miller for the Library Bureau.

The publicity material contributed was very meagre, and in no way measured up to the interest shown in that subject. All over the country is felt the need for helpful suggestions on how to make the first presentation of the county library idea, or how to plan a campaign for having the proposition authorized. Now and then a new locality is reported as having planned some successful publicity but as yet there seems to be no way of collecting this scattered material or of encouraging librarians to preserve it.

As to the pictures, posters and maps representing various parts of the country engaged in county library work, even greater discrepancies were evident, since the exhibits were in no way proportionate to the amount of work being done. For clear well chosen pictures giving a real library story, the two hundred sent from California and the exhibit from the Hamilton County Library at Cincinnati were conspicuous. The posters from Hawaii with their colored photographs, and the map of Cooke County, Texas, with the kodak pictures of each of the library stations attached, were of special interest. On the other hand, a number of states were either entirely omitted or only partially represented, and this, in many cases, due to circumstances over which the librarians had no control. Among the notable omissions were Utah, Wyoming and South Dakota. Other northwestern states, Montana and Oregon, which are leaders in the work, were far from adequately represented. The same is true of Indiana and Minnesota, both actively supporting a number of county libraries, as well as of Washington County, Maryland, one of the pioneers.

To develop the exhibit from its Detroit form

into one which will effectively display the conditions governing the work in county units, it should be built up in two posters presenting clearly the basic factors in the organization of each county library, e.g., the size and geographical features of its territory, the number and types of borrowers to be reached, the means available for sending out the books, and the size of the appropriation. With the county system gaining much of its significance from the fact that it can be adapted to a great variety of conditions, it becomes necessary for any satisfactory comparison of results, to bring out these circumstances. Secondly, there is need of many more pictures showing libraries functioning in unusual ways and places, pictures which tell in a convincing way of an active, human interest in books. To be suitable for exhibition purposes, these pictures should be large enough to show up at a distance—probably 8x12 inches at least. A number of the pictures contributed were of kodak size, unsuitable for posters, and altho the more interesting of these were included on a table display rack they received very little attention.

Perhaps some of the practical problems involved in the exhibit should be recorded. We found Routzahn's "A B C of Exhibit Planning"* a valuable help as a beginning. The authors advise first a clear statement of the purpose of your exhibit and a visualization of your audience so that all the material will be adapted to one point of view. In this case the exhibit was planned distinctly for librarians, so that much more detailed information was included than would be suitable for an exhibit to be used with the public. This should be kept in mind by those who wish to borrow the exhibit from A. L. A. headquarters. Whether the next exhibit should be made with a similar point of view or have a more popular appeal, is a subject for debate. Discussion during the convention seemed to indicate a need for two permanent county library exhibits, one for the profession and one for the public.

The most earnest advice we would give anyone forming an exhibit is to begin early, and insist that all material be on hand several weeks

THE NEW BURLINGTON DEPOSIT OF THE CINCINNATI PUBLIC LIBRARY SITUATED IN A GENERAL STORE IN A SMALL UNINCORPORATED VILLAGE SERVES THE FARMING SECTION IN THE NORTH-CENTRAL PART OF HAMILTON COUNTY

before the exhibit opens. Correspondence by letter, or even by telegram, takes time, delays are bound to occur in the best laid plans, and a host of petty practical problems may make one's last days full of anguish. One may be faced with the question of how to show the fourteen panels called the A. L. A. County Library Exhibit in a compact way, and only after hours spent in scouring the city for a suitable rack, hit upon the simple expedient of combining a parking sign and a towel rack. Exhibiting in a hotel room in which the usual displays are bed-room slippers or children's hats, one is likely to find that there is no picture moulding and no way of hanging pictures and maps without disfiguring the walls. This difficulty we solved satisfactorily by renting a series of ten beaver board screens, freshly painted a cream color to match the walls. Each screen consisted of three sections 73x24 inches so hinged together that they could be set into corners or arranged in alcoves. This actually increased the wall space. A curved portion at the top of each section added a finishing touch to the screens and furnished a suitable place for the headings.

Many were the problems in connection with the posters, their size, lettering, color scheme and the selection and arrangement of the pictures on them. Their size was determined by that of the screens; they were made 23 inches wide and 20 inches long. The color chosen was a soft brown, for the reasons that it would fit almost any background, had more warmth than gray, and yet was near enough to neutral for use in large quantities. The lettering was in black to match

*Routzahn, A. G. and Mary B. *The A B C of Exhibit Planning*. New York: Russell Sage Foundation, 1918. \$1.50.

THE CINCINNATI PUBLIC LIBRARY'S CALIFORNIA DEPOSIT STATION IS IN THE POST-OFFICE WHERE THE POST-MISTRESS CIRCULATED 24,000 VOLUMES LAST YEAR. THERE IS DELIVERY SERVICE TWICE WEEKLY.

the pictures, with touches of gold used in the larger letters of the headings for contrast. The alphabet used was one which combined clearness, and ease of execution with a good decorative effect. A finishing touch which gave very good results consisted of narrow black lines drawn one-eighth of an inch from the edges of each picture and three-eighths of an inch from the edges of the posters. A certain uniformity was possible because most of the pictures were sent unmounted, and for the forty or fifty posters made by members of the Detroit Public Library staff all the most important lettering was blocked out by one person.

One idea to each panel was our plan. A terse statement of the main facts was given in commanding letters, the supplementary lettering giving in a few telling words some further development of the impression. The distribution of the blank spaces both on the posters and for the whole exhibit we slighted, with a consequent loss of effectiveness. The room assigned to us at the Hotel Statler proved too small for the material shown and offered no proper perspective.

In the hope of unifying the whole and of offering some variety and contrast to the great number of pictures displayed, special features were introduced in the exhibit room. A toy village showing the super-modern Main Street with a book collection huddled in with its groceries caught the eye of those passing as of those entering. Miss Helen S. LeFevre's map of the United States, colored to show the states having workable laws and the counties giving full or partial service, attracted much attention,

and was especially commented upon by librarians whose localities were not properly recognized. A comparative study in chart form of the budgets of representative county libraries, prepared by Miss Harriet C. Long proved of exceptional interest to county librarians and formed the basis of much interesting discussion.

Some publicity was planned both to attract conference visitors to the exhibit, and to spread the news of county library work among people outside the library profession. Some of the most interesting pictures exhibited were reproduced in a two-page section of the *Detroit Free Press* Rotogravure Section on the Sunday preceding the conference

"Pesasus," the Dodge book truck used by the township library at Elkhart, Indiana, was driven to Detroit and placed on display at the new Main Library. On Wednesday morning, President Root gave a ten-minute radio talk on county libraries, which was broadcasted from the *Detroit News* to all the surrounding country and was also received by the convention at its third general session.

What was the value of this A. L. A. County Library Exhibit? Members of the committee having worked with the material for a considerable time cannot have that fresh point of view necessary to form a fair judgment of the results. And yet this same close association with the subject gives rise to a few impressions that may prove suggestive.

Probably the exhibit succeeded to some degree in advertising the county library movement to people at large and in crystallizing its significance and present stage of development in the minds of those attending the convention. The exhibit room, altho situated on the thirteenth floor of the Statler, attracted a constant stream of visitors from early morning until late at night and served as a meeting ground for all who were interested in the subject as a whole or in any of its particular phases.

The consensus of opinion among the committee members is that the exhibit's most important service is as a starting point for future exhibits. With the gospel of county libraries spreading rapidly, with practically the whole of the profession "sold" to the idea, with many speakers referring to county libraries as to a magic solution for all problems, it is time that an effort

TWO CALIFORNIAN STATIONS. TO THE LEFT TEMESCAL SCHOOL WHICH WAS THIRTY MILES DISTANT FROM A LIBRARY UNTIL THE ESTABLISHMENT OF THE VENTURA COUNTY LIBRARY. TO THE RIGHT A DESERT SCHOOL ENJOYING THE FRESH SUPPLY OF BOOKS SENT BY THE KERN COUNTY LIBRARY.

be made to store up the fruits of experience for the many new workers in the field and to establish professional standards of service. Discussions at the County Library Round Table and in the exhibit room indicated quite clearly one fact; that at present each county librarian is working practically alone, solving his local problems with little opportunity of comparing policies with others, and with no ready way of learning about the people who are meeting similar situations and difficulties.

People interested in county library work fall into three distinct classes: those planning to start a county organization, those involved in the initial problems of the first two or three years, and those absorbed in the policies of a well established system. In any discussion of the work, members of these different groups have little in common. The psychology of a county worker seems to include such rapid changes in point of view and such complete absorption in each set of puzzles, that any problem belonging to an earlier epoch of experience is consigned to oblivion. It is, therefore, difficult to maintain an openminded helpful attitude toward the younger members of the clan, altho this is a service much needed.

In spite of the difficulties inherent in any effort aiming to tabulate facts about county libraries, it seems important that such an effort should be developing along with the general growth of this great movement. There is pressing need for the establishment of a clearing house of information on this ever changing subject. Perhaps this could be accomplished thru A. L. A. headquarters; probably the most likely group to foster such a project is the newly formed County Library Round Table of which Miss Corinne A. Metz is chairman. This first exhibit, in practically the same form as shown at Detroit, has been shipped to A. L. A. head-

quarters for permanent use, and is being borrowed for state library meetings, fairs, etc. It is hoped that a circulation of the exhibit will bring criticisms and improvements, an addition of material to fill in the weak points, and will lead to future exhibits that will be more finished and more effective. It is further hoped that this initial effort to co-ordinate county library work will prove only the first stepping stone toward a movement to establish constructive leadership.

In the office of the Chief of Engineers U. S. Army, Washington, D. C., are a few copies of back numbers of *Occasional Papers*, Corps of Engineers, which might be of value to libraries. Libraries desiring to complete their sets of these should get in touch with this office, attention Intelligence Section.

"The great length of the counter in the periodical room [of the Chicago Public Library] has been broken by the merry-go-round card catalog for magazines, arranged by title and subject and representing many months of work. It states where each magazine is kept, whether or not it is bound, whether received by subscription or gift, and in what guides it is indexed."

The July number of the *Law Library Journal* contains the proceedings of the 17th annual meeting of the American Association of Law Libraries; Gilson G. Glasier's presidential address; W. H. Alexander's paper which opened the discussion of The Library as a Business Enterprise; and an appreciation of the late Edward Brinley Adams, formerly librarian of the Harvard Law School, by Robert B. Anderson, Assistant librarian.

Summer Library Science Courses

MASSACHUSETTS INSTITUTE FOR LIBRARIANS. The Seventh Annual Institute for Librarians conducted by the Massachusetts Division of Public Libraries was held as usual at Simmons College, Boston, during the second week of July. This Institute is held primarily for the librarians of the small towns and rural communities, and their needs are considered exclusively in arranging the program. No classes in library technique are held, because librarians wishing such courses may attend the Simmons College Summer School, to which the Board of Free Public Library Commissioners pays the tuition of from one to three small town librarians each summer. There was, however, a demonstration in book-mending given each day by Ruby Tillinghast.

Ten states besides Massachusetts were represented by the two hundred and forty-one students registered. Eighty-four cities and towns of Massachusetts, of which fifty-six are distinctly small towns, sent representatives. There were four hospital, one prison and two business librarians, and nine trustees. The Boston Public Library, as usual and natural, sent the most representatives—twenty-five; Somerville sent thirteen; Brookline, Lynn and Woburn eight each; and Newton seven.

SIMMONS COLLEGE SCHOOL OF LIBRARY SCIENCE. The summer school class of thirty-seven students completed their six weeks of hard work on August 15. The course given by Marion Lovis on high school library work, in which twenty-four women enrolled, was especially helpful. One half of the class belonged to Massachusetts, but ten other states, and the District of Columbia, were represented, as well as Saskatchewan, Canada.

The first week was the most exciting one, when the regular courses competed with, and tried to include much of, the N. E. A. Conference, and the Institute for Librarians under the joint auspices of the College and the Division of Libraries of Massachusetts.

NEW HAMPSHIRE SUMMER LIBRARY SCHOOL. The School held its third and most successful session from July 24 to August 5 at New Hampshire College Library, Durham. Emphasis was laid upon regular instruction and practical work by the seven instructors. Twenty-three students were regularly enrolled and there were ten visitors at one or more sessions.

COLUMBIA UNIVERSITY LIBRARY ECONOMY COURSES. The session for 1922 opened with

sixty-five students from twenty-seven states and foreign countries. The group varied in educational qualifications from high school and normal school graduates, to post-graduates of colleges and universities.

The course was in charge of Harriet E. Howe of Simmons College School of Library Science. Alma Penrose, who was to have taught the cataloging and classification course, was ill after the first week and the work was carried by Mrs. Bertha V. Hartzell, of the Social Service Library of Boston.

The exhibit of school library work, with suggestions also for teachers, held in the Library School quarters, attracted a great many visitors.

NEW YORK STATE LIBRARY SCHOOL. Two summer courses of six weeks each were held this year for the first time at the State Library School, one from June 19 to July 28 for workers in the small public libraries of the State; the other from July 10 to August 18 for school librarians.

At a combined session of three weeks from July 10 to July 28, work common to both the public library and the school library was discussed in joint session, emphasis being placed on co-operation between these two types of libraries. During this period two special series of lectures were given, one on library work with children by Clara W. Hunt and Marian F. Schwab of the Brooklyn (N. Y.) Public Library; the other on reference books by Margaret S. Williams of the Library School faculty.

Each course had three weeks of independent study, when instruction was given in the more technical subjects with adaptations for the small public library and the school library respectively. The subjects studied at some length were classification, cataloging, subject headings, book selection, and in the second course the purpose and development of the school library. In addition to Mildred Pope, state library organizer, who conducted the first course, and Sabra W. Vought, state inspector of school libraries, who was in charge of the second course, many special lecturers gave one or more lectures.

Forty-four students were in attendance, including representatives from Vermont, Pennsylvania, Massachusetts, Ohio, Rhode Island, New Jersey and Washington as well as New York State.

NEW JERSEY SUMMER SCHOOL. The School opened on July 17 at Navesink the headquarters of the Middletown Township Library. Fifty-one pupils were in attendance representing forty li-

braries in the State of New Jersey. No one outside of the state has been admitted this year because of the large number of applications for enrollment from within the state and the limited accommodation at the Teachers Club in Navesink. The Community House and Library built and owned by the Navesink Library Association was used for class work and as a lecture hall. Sarah B. Askew of the Public Library Commission was in charge of the school. The courses were given by Francis Hobart and Lily Dodgen, single lectures or series were given by a dozen visiting specialists. The school closed with a State day when the heads of the State Departments of Agriculture, Home Economics, Child Hygiene, Institutions and Agencies, Conservation and Development and Education presented to the school the work of their respective departments and its relation to the libraries.

UNIVERSITY OF GEORGIA SUMMER LIBRARY SCHOOL. A six weeks' summer library course was given by the University of Georgia at Athens, June 24—Aug. 4, under the direction of Duncan Burnet, librarian of the University Library, with Susie Lee Crumley, principal of the Atlanta Library School in charge of the instruction. Miss Crumley taught classification, cataloging and reference work; Mr. Burnet book selection; Charlotte Templeton of the Library Commission, library administration; and Fanny Taber, of Montevallo, Ala., gave lectures on children's work. One of the most valuable features was a series of talks by members of the faculty on the literature of their various fields.

The registration, which was limited to librarians and high school teachers in charge of libraries, brought thirteen students from five states. The success of the course, in the opinion of the Director of the Summer School, justifies its continuance as a regular course in the University Summer School.

UNIVERSITY OF NORTH CAROLINA. Two summer school courses in library science were given in the Summer School of the University of North Carolina, with Louis R. Wilson and other members of the staff offering instruction. The first was a course in book selection, classification, and cataloging, and was intended primarily for the benefit of teachers assuming charge of high school libraries. Eight students were enrolled. The second course in the use of books and bibliography was intended for college students and carried regular University credit. Twelve students were enrolled.

Inasmuch as the Southern Association of Secondary Schools and Colleges and the North Carolina State Department of Education have

adopted a requirement that all schools in order to be placed on accredited list must establish libraries of at least 500 volumes, considerable interest is being manifested in the upbuilding of the high school libraries. The coming year will witness a marked advance in this phase of library activity in North Carolina.

INDIANA LIBRARY SUMMER SCHOOL. Forty students attended the course this year: one trustee, seven librarians and thirty-three assistants. The regular courses in cataloging, classification and reference as well as the minor courses were handled largely by the regular Commission staff. The course in children's work was given by Carrie E. Scott of Indianapolis and that in book selection by Julia S. Harron of Cleveland. The course lasted seven weeks instead of the usual six and it was found that this was of advantage to both students and faculty. The school was held at the Shortridge High School, Indianapolis, which is close to the Public Library.

UNIVERSITY OF MICHIGAN. Eight courses in Library Methods were given in the Summer Session of the University of Michigan, which began on June twenty-sixth and closed on August eighteenth. Eighty-three students elected these courses, which was an increase of twenty-six over 1921, and of forty over 1920.

UNIVERSITY OF ILLINOIS SUMMER LIBRARY COURSES. Fifty-one students were enrolled in the library courses this summer, twenty-six from Illinois, and the rest from fourteen other states and Japan.

Two groups of courses were offered, each group occupying the full time of the students. The six weeks' courses were open to high school graduates and were intended to meet primarily the needs of assistants in the smaller libraries of Illinois and twenty-seven students registered for these. The eight weeks' courses were open to college graduates, and were the same as certain courses in the regular session of the School; twenty-four students registered for these, five of whom were doing their second summer's work. These eight weeks courses carry credit toward the library degree.

The faculty were Mr. Cleavinger, Miss Bond, and Miss Boyd, of the Library School faculty; Miss Whitcomb of Chicago, Miss Matthews, of the University of Arkansas Library, and Miss Shoup, of the Library School. Miss Price of the State Library Extension Division, gave three lectures and held personal conferences with those students from Illinois.

Of the thirty-seven students having library positions, sixteen were in public libraries, thir-

teen in college or University, two in normal schools, three in high schools, two in state libraries, and one in a library commission office. The average salary of the eight weeks' students reporting was \$1330; of the six weeks' course, \$832.

IOWA SUMMER SCHOOL FOR LIBRARY TRAINING. The total enrollment for the 1922 session was thirty-nine. Of this number twenty-six students took the full library training course and thirteen additional students took only special courses.

The staff was as follows: Jane E. Roberts, resident director; Blanche V. Watts, director; Mae C. Anders, instructor in book selection classification; Blanche Smith, cataloging; Grace Shellenberger, children's literature; Julia A. Robinson, library administration; Ora King, minor subjects.

The well attended third annual library conference was held on July 5-6.

UNIVERSITY OF WISCONSIN LIBRARY SCHOOL. The twenty-seventh Summer Session of the Library School of the University of Wisconsin was held from June 2 to August 4. Of the fifty-four students registered, twenty-three took the course offered for workers in public libraries, thirty the course for Teacher-librarians and one special work.

The class had opportunity to attend many of the special lectures offered by the University during the Session, and several social functions were planned by the faculty of the Library School.

UNIVERSITY OF OKLAHOMA. Unusual success crowned this year's summer school held from June 19 to August 1. The instruction was chiefly in the hands of Mary E. Goff, chief cataloger of the University of Texas Library, and Isabel Smith.

UNIVERSITY OF TEXAS DEPARTMENT OF LIBRARY SCIENCE. Students in the two summer courses numbered twenty. Seven were juniors, seniors or graduates of the University, seven were teachers, the remainder were heads or assistants from the county, public and college libraries in the state. The courses given were Classification (the first term's work of the long session), and Library Administration. Credit for these courses toward the B. A. degree is given to students who have junior standing in the University.

COLORADO SUMMER SCHOOL. Twenty-four students, representing eleven states, registered in the library summer school of the Colorado Agricultural College at Fort Collins. Of these nine took the preliminary week in bookbinding, twenty-one the six weeks' course in library sci-

ence, one registered for the children's week, and one for the two weeks' course in reference work.

RIVERSIDE LIBRARY SERVICE SCHOOL. The summer short course of six weeks closed on August 4. Thirty-five students were in attendance, many of them coming from states outside of California. For the first time classes were held in the new library school building adjoining the library.

Unusual interest was shown in the two weeks' course in story-telling and children's literature given by Edna Whiteman, formerly of Pittsburgh. In connection with the course two public story hours were given, one for adults and one for children which proved very popular.

MCGILL UNIVERSITY SUMMER SCHOOL. The School held its regular session during June using for class rooms the new extension to the University Library which has just been completed. This school which was founded by the late Charles H. Gould is Canada's first library school and demand for training has been so constant that the establishment of a regular winter course is being contemplated.

Subjects were grouped as: technical, bibliographic and administrative. The course involved one hundred fifty hours of lectures and practice work, a special exhibit illustrating the development of the arts of record, and showing some fine examples of mediaeval illumination and of incunabula, was arranged in the new library museum. Seventeen students including one from the University of Pennsylvania, attended the course.

We have secured a few copies of the following scarce numbers of the LIBRARY JOURNAL: January 1, January 15, February 1, 1921. These will be supplied at twenty-five cents a copy by
THE PUBLISHERS

"Showing Off the Library," by Anna P. Mason, librarian of the Carondelet Branch of the St. Louis Public Library is an attractively illustrated story of the expansion of the Library from its foundation, with special emphasis on the ways in which the library has been going forth into the many-sided life of the City and "showing off" its varied resources.

Instruction of "Students in the Use of Technical Literature"; an unexploited phase of engineering education is contributed by Elwood H. McClelland, technology librarian of the Carnegie Library of Pittsburgh, to *Engineering Education* v. 12 no. 9.

Book Advertising—Wise and Otherwise

FOR some time we of the Seattle Public Library have been questioning the value of the practice of issuing current statements of the most popular books of fiction and because we realize that in a question that concerns libraries in general action must be concerted if it is to be felt, we ask its consideration by the LIBRARY JOURNAL and its readers.

When we were invited some years ago to join other public libraries in making monthly surveys of the most popular books, we thought we saw the attainment of one of our most cherished ambitions in a library publicity which would attract attention to the fact that libraries were functioning as a whole and not as individual units. The resulting library lists contrasted favorably with the lists of "best sellers" and were widely copied and our impression that people want to read and be known as reading the books that "everyone is talking about" was confirmed. We found that for the books we advertised in this way we could not begin to supply the demand, and we were forced to admit even while rejoicing at our success, that our efforts to substitute other good books on the same subject or of the same type did not meet with the appreciation we could have wished.

"The Four Horsemen of Apocalypse" and "The Education of Henry Adams" were the first to stir us out of our complacency. They were good books and possibly a few persons who really read them would have missed them if they had not been so continuously advertised. Soon we had purchased thirty-five copies of the "Four Horsemen" but the number of reserves ran into the hundreds.

The South Sea craze was another instance of our clamoring for the privilege of turning the grindstone for booksellers and publishers and only at long last have we come to realize that by pushing individual titles we are not creating a taste for reading but an unnatural demand for a certain few titles that no library could ever satisfy; that we are not giving satisfaction to the public; that we are making inroads on our book fund which means certain failure to supply legitimate needs and that we are crowding our stack with ephemera that are as lifeless as yesterday's May-flies.

It is not part of our purpose to lay any blame on publishers and booksellers. The rapprochement which is springing up among all distributors of books cannot be too heartily encouraged but we agree with Mr. Swinnerton in feeling that it is better for libraries to stand back of good publishers than to exploit individual titles on their lists.

Can we not find some way of advertising books and libraries that will not make trouble for ourselves and over-emphasize a few titles at the cost of the many? Are we doing ourselves or our communities any good by cultivating a restricted public taste especially for viands, some of which are good enough in themselves but too highly spiced or over-done to be taken for daily food?

The power of the spoken word is after all the most potent. The best way to get books into circulation is to circulate information about them. Broadcasting book information by radio has already become a feature of certain libraries and seems to offer unusual opportunities.

The book talks that have been tried in some libraries offer another field that should prove fruitful. Thru them the library assistants are equipped to introduce books to borrowers with the assurance that comes from definite acquaintance. Where such book talks have been open to the public they have perhaps not reached their greatest usefulness because they have not reached the right people. If announcements could be sent to selected groups of borrowers until the book talks became well established they might help us to bring the right book to the attention of the right reader.

Radio broadcasting and book talks are only suggestions. We hope someone will discover other effective channels thru which we can advertise our services and our books without the disastrous results which follow the publication of the "most popular books of the month."

SARAH VIRGINIA LEWIS,

*Superintendent of Circulation,
Seattle Public Library.*

Subject Headings for the Literature of Military Science

A tentative system of subject headings for the literature of military science compiled by Fremont Rider for the use of the editors of the *International Military Digest* has been published by the Cumulative Digest Corporation, N. Y. (\$18). "As a system of subject headings it is avowedly incomplete and tentative altho the main headings have proved out fairly well in their six years' use. . . . The professional bibliographer should remember that the system was printed as a guide to a frequently changing body of office editors not all of them familiar with subject-heading technique. It seemed wise, therefore, to be clear in the form rather than unduly concise."—*Preface.*

Library Legislation 1921-1922

LAST year's special session of the Missouri legislature and the regular session of California, which ended too late for full inclusion in Chairman William F. Yust's last year's report of the A. L. A. Committee on Library Legislation are included with the present account of library laws passed in Kentucky, Maryland, Massachusetts, New Jersey, New York and Virginia in 1922. Eleven states held legislative sessions this year, but no library legislation was enacted in Colorado (special session), Georgia, Louisiana, Mississippi and Rhode Island.

ESTABLISHMENT AND TAX

New York state passed a number of minor amendments to the general education law relative to libraries. A New Jersey act permits a municipality to appropriate in the current budget for its library a sum equal to that paid into the general treasury by the library the preceding year. Such sum shall be in addition to the regular appropriation. This refers to the fines and other money earned by the library, which had been taken away from libraries in the budget act. Missouri at the extra session last year amended the regular library law, providing that in case of an increase in valuation of the taxable property within an incorporated city the common council may reduce the levy provided by law for library maintenance to an amount which the council deems sufficient, but not over ten per cent more than was levied the previous year.

STATE AGENCIES

In the general amendment of the political code last year California abolished the board of trustees of the state library and transferred their powers and duties to the state department of finance. "The Division of Libraries" becomes one of the six divisions of this department. The change makes practically no difference in the operation of the state library. The Kentucky Library Commission law was amended by omitting four words limiting the secretary's salary, which is now at the discretion of the Commission. In Maryland the functions of the library commission now devolve upon the state superintendent of schools as the result of the governor's "comprehensive plan of re-organization of the entire state government with a comparatively small number of departments." The governor is to appoint five persons, who with the state librarian and the librarian of the Enoch Pratt Free Library shall constitute the Maryland Public Library Advisory Commission, which shall advise with the superintendent with respect

to his library duties. In Massachusetts a movement to abolish work among aliens in libraries was forestalled by securing an amendment to the law defining the functions of the Board of Free Public Library Commissioners.

COUNTY LIBRARIES

A 1921 California law amended the political code relative to county officers by adding a "county librarian" to the list of sixteen enumerated county officers. This gives the county librarian a legal status equal to that of other county officials, one result being that "most of the county library salaries were increased by amendment to the county government act rather than by amendment to the county library law." Salaries now come up for consideration in the general salary bill passed by the legislature for each county; hitherto they were prescribed in the county library law. Salary increases made last year affected the county librarians in 30 counties, increases ranging from \$200 to \$600 per person, so that present salaries range from \$1,000 to \$3,000, the largest number being between \$1,800 and \$2,400.

A New Jersey amendment specifies the power of the county library commission to purchase supplies and equipment and limits such purchases to the amount appropriated. The members of the Mississippi Library Association failed again to get a liberal county library law passed. Two years ago a law was passed permitting counties with an assessed valuation over eighteen million dollars to appropriate not over \$3,000 annually toward the support of one or more public libraries in the county. Only nine counties in the state could qualify under this law, and of these only three are contributing to the support of libraries. In some of the other counties there are no public libraries, negroes outnumbering the whites by several hundred per cent.

SCHOOL DISTRICT LIBRARIES

In California apportionment of the fund for school district libraries is to be "such sum as may be requested by the school trustees of such district," but not less than \$25 for each teacher. If the trustees fail to file request the county superintendent shall make apportionment not exceeding \$50 per teacher. Formerly this was on a percentage basis, five to ten per cent of the school fund, but not to exceed \$50 per district except in districts having five or more teachers, where it was to be not under \$10 or over \$15 per teacher.

New Jersey amended her law authorizing state

duplication of money raised by any school district for library purposes, \$20 for establishment and \$10 annually. The amendment provides for these amounts to be paid by the state thru the county library commission of any county where a co-operative agreement has been made between the county library and the local school.

SPECIAL LEGISLATION

Laws applying to special places are not generally included in the committee's reports, but note is made of a few in New York state on account of their possible suggestiveness to those interested. Of three laws passed for the benefit of law libraries in Catskill, Plattsburgh and Albany, the latter provides for consolidating the Albany county law library with the appellate division library, third department, and makes an appropriation for the librarian's salary at not exceeding \$3,500. An amendment to the Oneonta city charter changes the name of the Oneonta Public Library to "The Huntington Memorial Library", pursuant to the request of Mr. Henry E. Huntington, who proposed to endow the library in memory of his parents. An amendment to the Greater New York charter permits the sale of corporate stock for the erection and equipment of the central library in the borough of Brooklyn. The Board of Estimate and Apportionment must now authorize the sale of the stock.

Another amendment to the charter passing the legislature but not approved by the mayor gave public library trustees power to select library sites subject to the approval to the Board of Estimate, prepare plans, award contracts and supervise construction of new library buildings. In the acquisition of such sites the library board was to have all the powers of the Board of Education and contracts for the construction of new library buildings were to be let in the same manner as contracts for new school buildings.

APPROPRIATIONS

Reports on appropriations for all available states follow. Amounts given are for two years unless otherwise stated.

Kentucky: State Library Commission \$15,000, State Library \$13,824, State Historical Society \$10,000.

Maryland: Public Library Commission \$11,982, State Library \$11,600, Legislative Reference Bureau \$3725 for 1923 and \$7550 the next year.

Massachusetts: Department of Education, Division of Public Libraries \$24,100 for one year.

Missouri: State Library Commission \$1200 in addition to previous \$25,500 for two years, 1921-1922.

New Jersey for one year: Public Library Commission \$47,980; State Library \$19,900; Record Bureau (which takes place of historical society) \$10,500. The following amounts are appropriated to the departments named but spent under supervision of the Public Library Commission: Agricultural extension department \$3,000, for books in agriculture for their farm demonstrators; department of institutions and agencies \$5,000, for libraries in institutions; department of education \$1,000 for teachers' libraries.

Virginia: State Library \$41,142.50 for year ending February 1923, and \$41,067.50 the next year; State Law Library \$7,250 each year; Legislative Reference Bureau \$8,851 and \$9,451; World War History Commission \$7,500 each year; aid to local school libraries each year \$3,000. The general assembly made an appropriation sufficient to enable the State Library Board to secure the services of a library organizer. It is hoped that the legislature of 1924 will provide the funds to erect the memorial library to commemorate the services of Virginia troops in the world war authorized two years ago by the general assembly. The 1922 assembly found that no progress had been made on the work of erecting a building and not only refused a further appropriation but also took away the amount appropriated two years before. This leaves the library board and the war memorial commission, the two bodies designated by law to erect the building, without any funds, but with a site on which to erect the building.

Free on Request

The following will be given to any library willing to pay transportation charges:

The American Magazine Subject Index 1915, 1917, 1918, 1920.

Guide to Periodicals and Serials in the United States and Canada compiled by Henry O. Severance, 1909.

THE LIBRARY JOURNAL

TWICE-A-MONTH

SEPTEMBER 15, 1922

THERE are under way plans of authors and publishers, thru the Authors' League and the National Association of Book Publishers, for a joint committee of counsel rather than of censorship in regard to books of doubtful character and a committee is in process of formation with George Creel as its probable chairman. Meantime a discussion as to book censorship had been started in the daily press, especially in the *New York Times*, in connection with prosecution by John S. Sumner, successor of Anthony Comstock of the Anti-Vice Society, and Mr. Sumner has since expressed his satisfaction with the proposals of authors and publishers. Libraries have always before them the problem of dealing with such books, of which the fewer the better, and the inquiries we have made suggest a general tendency to avoid advertising such books and to treat them when purchased as books of record rather than for circulation. It is quite certain that calling attention to such books by name provokes salacious curiosity and demand, and therefore it has been the policy of the LIBRARY JOURNAL to avoid calling public attention to them by title.

★ ★ ★ ★ ★ ★ ★

AN interesting question, in regard to books of abnormal demand, is raised in a contribution from Seattle regarding books advertised from month to month as in library demand or as big sellers. Every library which buys freely of new books, especially novels of the day, presently finds its shelves encumbered by books which have passed their vogue and are "dead as door-nails." If a library orders copies of a popular book by the score, there are sure to be hundreds of disgruntled readers "hopping mad" that the book they want is "always out." Entry of their names on a reserve list is not always soothing, and indeed reserve lists are subject to such abuse that a remedy has been sought in charging five cents as a reserve fee, which incidentally covers the cost of post-card notice. Another scheme which has been fairly effective in large libraries is the special loan collection, cognate with the ordinary circulating library, where a fee of two cents per day is charged for new books and the proceeds applied to buying duplicate copies. With careful attention, this scheme works out

fairly well pecuniarily, but even this cannot always satisfy readers. After all, the best course is to buy only a reasonable number of such books and to induce readers to take the "next best thing" in the line of their desires. When some of the books of the day are contrasted with such sterling novels of the living past as Weir Mitchell's "Hugh Wynne, Free Quaker" and "The Red City," books of high literary value dealing with the actual history of the days of Washington, it does seem that library influence should be stoutly in action to keep the better class of books in active use.

★ ★ ★ ★ ★ ★ ★

INTERESTING light is thrown on the American prices of English books by a comparison of American and English prices of two hundred and sixty such books of English authorship recorded in the *Book Review Digest* March—August number of the present year. There are three classes of books of English authorship priced by American publishers, those reprinted here, those imported in small editions in sheets and those brought over in smaller lots in English binding. The facts seem to be that on remade books prices are practically identical, as \$2.00 for 7s. 6d. novels; that on editions on which duties are paid on sheets alone, the prices are also closely equivalent; and that on bound books where duties are paid commercially on the English wholesale price calculated by the customs authorities as one-third off retail price, there is a substantially higher price in America, running about thirty-five cents to the shilling. There are of course exceptions, and averages are often misleading. Libraries are chiefly concerned, it would seem, with the importation of the last named class in which the duty free provision counts for most and on which the publishing importer is most heavily handicapped. The *Book Review Digest* does a real service to librarians in making this comparison.

★ ★ ★ ★ ★ ★ ★

LIBRARY Legislation for 1922, of which this year report was made at the Detroit Conference, was not of salient importance, partly because most states now hold biennial sessions in odd numbered years and only eleven legislatures met last year. Two tendencies, however, were noteworthy, that toward higher assessment

valuation of taxable property involving decreased percentage in taxes the possible increased returns, and that toward concentration of state departments, which sometimes gives the library strange bedfellows. Naturally libraries should be classed with education, but California has found it advisable to transfer from nominal connections with the schools and take incongruous shelter with the finance department. The New York law authorizing the issue of cor-

porate stock beyond the debt limit for the Brooklyn library was based on the wholesome theory that libraries are investments tending to increase the public wealth as well as welfare. The Mississippi State association is entitled to high credit for its persistent endeavors, which must ultimately be successful, to obtain legislation that will put this backward state in the path of progress in library as well as school education.

LIBRARY ORGANIZATIONS

LIBRARY WORKERS' ASSOCIATION

THE Library Workers' Association held its third annual meeting on June 29th at the Chamber of Commerce, Detroit, President Catherine Van Dyne in the chair.

The secretary presented the report on the questionnaire on library training sent to both libraries and library schools. The library schools were found to favor a system whereby credits for library school work may be obtained at different times. They approved granting credits for work at summer schools, provided it was the equivalent of other school work, but a few saw some difficulty in standardizing such courses. The question of the standardizing authority remained unsolved. Attention was called to the fact that instead of the profession standardizing the schools, the schools seem to regulate the profession. On the question of the possibility and merit of correspondence courses, opinion was evenly divided.

The questionnaire for libraries was to ascertain the general practice along these lines of library training and the answers proved that the practice differed almost universally with each library. The question whether libraries could successfully train their assistants and fit them for promotion was answered by the majority in the affirmative. On the question of a time allowance for training assistants, in libraries, answers varied from granting time for both recitation and study, time for recitation only, to so many hours per week or no time allowance at all. On the question of direct recognition in salary for assistants taking additional training courses, the concensus of opinion seemed to be that the direct recognition would be given provided that the assistants' work were more efficient and valuable to the library for having taken the course. One librarian wrote that if an assistant wanted to take a special course during the sum-

mer he would be inclined to think that the assistant was merely remedying deficiencies in her preparation. It was pointed out that few libraries can afford to pay enough to provide for an entire staff of fully equipped assistants only, that is, with college and library school preparation. Since they cannot afford to meet such a standard, they may expect to get either people without preparation and provide no incentive for preparation, or others with possibilities. They may assist these to add to their equipment, but after proper recognition of the library's assistance, the salaries should increase in proportion to the increased equipment. Many of the librarians stated their willingness to aid in any effort towards the correlation and standardization of the unaccredited library school course, altho several had doubts as to the advisability of so much standardization.

Following, John Cotton Dana talked on the younger generation. He said that if the Library Workers' Association had done nothing else, it had justified its existence by sending out and publishing such a questionnaire,—that one of the things most needed in the library profession as in all others nowadays, was a question mark—a constant interrogation as to why and how various things were done and if another way might not be better. One of the greatest mistakes in the profession was a too placid acceptance of things as they are; the tendency to follow too closely the paths laid out twenty or forty years ago. Conditions have changed. A flood of print is inundating the country. Mail order catalogs, pamphlets, all varieties of magazines are finding a way to remote hamlets and are developing a class of readers which a new school of librarians must face. Are the systems under which we have worked and the methods of training we have produced still adequate to meet present conditions? The question has been raised

The Following Titles Will Be in Demand This Fall

Business Books Recently Published:

- CORPORATION PROCEDURE.** By Thomas Conyngton, R. J. Bennett, and P. W. Pinkerton; Hugh R. Conyngton, Editor. 1922. (2d Ptg., 1922.) 1689 Pages. Cloth. \$10.00

The Copley Prints

A most inspiring, instructive and stimulating picture to hang upon library walls. For information write to CURTIS & CAMERON, Publishers, 98 Harcourt St., BOSTON.

The Melting Pot

From the giant steamship at the left comes a procession of the various races of the earth. Each one brings some gift of art or skill or labor to lay at the feet of America, his new motherland. To the right the immigrants pass on, using opportunity to gain prosperity. They and their children gain education; they contribute their share to the wealth, the government, and the defense of the land. Below the pedestal, on which America sits, are the stirring words of St. Paul: "AND GOD HATH MADE OF ONE BLOOD ALL NATIONS OF MEN TO DWELL ON THE FACE OF THE EARTH." Send for full story of this picture (gratis). Copyright by Vesper George; from a Copley Print copyright by CURTIS & CAMERON, Publishers, 98 Harcourt St., BOSTON.

whether we are standardizing the schools or the schools standardizing us? They grew out of earlier conditions. Are they fixed or flexible? Have they been required to note and develop along the lines that will meet present and future conditions? Are librarians fully conscious of what they need to know?

Adelaide R. Hasse, who was in the audience, was asked to tell something of the work of her School for Business Librarians. Miss Hasse said that the school is still in a formative state. The course of instruction was being developed thru the problems it is called upon to face. Duncan's "Commercial Research" is used as a text. Such things as cataloging and classification are not taught. It is assumed that the students know these things. They are taught, or rather, find out as a group, how to collect and present in the best form, complete information on any phase of industry.

Following Miss Hasse, Anna Thompson of the Syracuse Public Library presented a report on extension courses in library work.

The discussion of pensions in libraries was led by Ernestine Rose who outlined the New York Public Library's efforts to establish a pension system. The discussion involved such points as the difficulty of getting public support for such a measure by an institution privately controlled and the relative worth of a pension as against higher salaries.

MARIAN C. MANLEY, *Secretary*.

CHINESE LIBRARIANS IN CONFERENCE

THE annual conference of the National Association for the Promotion of Education was held at Tsinanfu, Shangtung, on July 3-8, 1922. During these days the Sessions of the Library Section formulated the following proposals. Opinions were expressed and ways of carrying them out were suggested.

1. That all schools should have instruction in the use of books.
2. That the normal schools in China should offer courses in Library Science.
3. That extension of school libraries should be emphasized.
4. That the chief cities, such as Shanghai, Hankow, etc., including provincial capitals, should establish libraries.
5. That a National Library should be properly established in Peking.
6. That the publishers of new books should present one volume to the Board of Education, and one volume to the National Library.
7. That primary schools, within certain regions, should unite to establish joint libraries.
8. That a committee for the study of Library Science should be organized by the National Association for the Promotion of Education.

The following librarians were invited to the meetings of the Library Section: S. K. Chen, registrar of Peking High Normal College; K. C. Chu, cataloguer of the Southeastern University Library; D. U. Doo, library commissioner of the Educational Commission of Kwangtung; Y. F. Hung, librarian of Southeastern University; T. Y. Seng, librarian of Boone University; S. B. Sung, librarian of the School of Commerce, Southeastern University; T. C. Tai, librarian of Tsing Hua College; Julie Rummelhoff (Mrs. T. C. Tai) cataloger of Tsing Hua College Library.

Y. F. HUNG.

A Child's Reading

DO you realize the tremendous importance of selecting books for young people which will not only entertain but will help to *mould character* as well? Such books are the famous animal classics, Black Beauty and BEAUTIFUL JOE, stories which have never failed to hold the children's attention to the very end. They read and love the story of BEAUTIFUL JOE, the homely and abused little dog who was rescued and adopted by a sympathetic family. And they read it without realizing for a moment that they are absorbing one of the greatest lessons a child can learn—the lesson of *unselfishness*.

More than a million copies of BEAUTIFUL JOE have been sold

A story that will never grow old, and one that speaks not for the dog alone, but for the whole animal kingdom. Through it we enter the animal world, and are made to see as animals see, and to feel as animals feel.

BEAUTIFUL JOE

By Marshall Saunders

has just been revised and re-issued in handsome cloth binding, with colored picture-cover, many illustrations, and charming end papers by Charles Copeland.

Be sure that your library has the new edition, dated April, 1922. \$1.50

Nov. 12-18. In every public library. Fourth annual Children's Book Week.

Nov. 15-17. In Indianapolis. Annual meeting of the Indiana Library Association and of the Indiana Library Trustees Association.

THE ARTISTIC CRAFTS SERIES

DRAWING FROM MEMORY AND MIND PICTURING. This is the only work in the English language dealing with the subject. The eminence of the author in the world of art makes the book of first importance. He gives his matured opinions and a series of remarkable results gained by methods he has devised. The book should find a place in the library of everyone concerned with Art if only for the beauty of the illustrations and the innate excellence of the book as a whole.

With 43 full page plates, \$3.00

EMBROIDERY AND TAPESTRY WEAVING. By Mrs. A. H. Christle. Third edition. 420 pp., 178 Diagrams and Illustrations by the Author. 16 pages of Collotype Reproductions. \$4.00

WRITING AND ILLUMINATING AND LETTERING. By Edward Johnston. Seventh edition. 512 pp., 227 illustrations and diagrams by the author and Noel Rooke. 8 pages of examples in red and black. 24 pages of collotype reproductions. \$3.50

DRESS DESIGN: AN ACCOUNT OF COSTUME FOR ARTISTS AND DRESSMAKERS. By Talbot Hughes. A handbook on historic costume from early times, containing over 600 Figures, 35 collotype reproductions of 100 specimens of genuine dresses, besides 80 scaled patterns taken from antique apparel, together with over 400 illustrations of headdresses and footwear. \$4.00

HAND-LOOM WEAVING. By Luther Hooper. 368 pp., 125 drawings by the author and Noel Rooke. Colored and collotype reproduction. \$3.50

L. A. WELLS
Waltham, Mass.
Established 1908

IN THE LIBRARY WORLD

MASSACHUSETTS

Cambridge. Counting all departments, the Library of Harvard University now has over two million titles. The College Library, including departmental collections, has well over a million and a quarter titles, and the 41,300 volumes added to it last year represented an outlay of \$73,396. In all 92,834 books were added, a figure again confirming an estimate that the Harvard Library has doubled every twenty years since 1800. The Medical School added 10,387 books, making a total of 107,000. The Law School took full advantage of favorable rates of exchange and added some 30,000 volumes to its collection of 238,500.

Loans from the delivery desk to undergraduates rose from 60,621 in 1916-1917 to 70,559 in 1920-1921. Graduate students used 21,983 books in the stack. The number of graduate students and visiting scholars authorized to work in the stack was 921 last year as compared with 643 six years ago.

Newton. The city of Newton, with a population of 46,000, was served with 429,984 books in 1921, an increase of 51,691 over the preceding year, and the largest gain in any one year in the history of the public library. As there are about 9,000 homes in Newton, the average circulation in each home was forty-seven volumes, and the entire cost per home of maintaining the library for the year was \$6.38, "a striking example of the benefits resulting from cooperation." The house-to-house circulation increased by one-third. Children borrowed 124,823 books. The city appropriation was \$56,450; the entire receipts \$57,881, from which \$27,525 was paid out in salaries and \$12,000 for books, periodicals, and binding.

Quincy. The Thomas Crane Public Library circulated an average of eight volumes to each resident of the city during 1921. This was done at a cost to the city of eight cents per volume. The circulation also averaged eight times per volume in the library. Thirty-seven per cent of the population of the city were enrolled as borrowers during the last two years and a half. The Americanization work done by the library is its most striking feature and an illustration of the work adds interest to the report. The report is written largely as a plea for a more adequate book fund. Of a total income of \$34,846, books cost \$7,130; periodicals, \$765; binding, \$1,771 and salaries \$17,732.

Fitchburg. In the library year ending November 30, 1921, the Fitchburg Public Library loaned 102,719 books for home use, according to the annual report of Librarian George E. Nutting. Disbursements of \$12,251 were made from receipts of \$12,290, of which \$2,047 was derived from the County Dog Fund. The library owns 64,391 volumes. The music collection is growing in popularity with music lovers not only in Fitchburg, but also in the surrounding towns and cities particularly in Leominster.

FLORIDA

Jacksonville. Improvements and changes made in the main library building of the Jacksonville Public Library in the past year have resulted in an increased capacity for use of the reading rooms, but have shown that the limit of the capacity of the building to shelve books will soon be reached. The Board of Trustees is recommending the establishment of three branches, one for coloured readers. At present the only branch of the library is the Lackawanna branch established in May thru arrangement with the Seaboard Air Line Railway, by which about 2,500 books owned by the company and located at the shops in the west part of the city were made available to residents of the city as well as to railroad employes. The branch is open one afternoon a week in charge of a library assistant.

The library had 58,982 volumes at the end of the year, a net increase of 1,931, and circulated 242,081 volumes, the greatest number in its history. The children's room circulated 61,519 books. Friends of the library assisted Clara B. Josselyn, the regular story-teller, among them Bernice Marquis, sister of Don Marquis. The *Florida Times-Union* and the *Florida Metropolis* published weekly annotated lists of new books, besides giving the library much editorial space in the case of the former paper. The weekly bulletin of the Rotary Club also carried a library article. Expenditures were \$29,908. books, periodicals and binding taking \$8.445 and salaries \$11,310.

ILLINOIS

Springfield. The Lincoln library emphasizes in a biennial report the need of additions to its meagre collection of Lincolniana, which is inadequate to supply the needs of visitors who come to the library when the State Historical collection is not available. The library on

The Author Said:

"As I worked with business people I noticed that all the books were really written for business men—and so I decided to try my hand at something for the business girls who so often came to me for advice."

That is why Jean Rich (Helen Thompson of the Yonkers Public Library) wrote and the Womans Press published

OXFORD UNIVERSITY PRESS

American Branch

35 West 32d St., New York

February 28, 1922, owned 84,315 volumes, and had circulated three hundred thousand books in the year then closed. Beginning in November, 1920, the extension librarian began systematic service to the patients in the Springfield hospital. Work with schools was carried on thru all departments. The speakers at the four book talks given under library auspices were Stephen Graham, A. P. Herbert and J. C. Squire, Helen Nicolay, and Clarence Bennett.

Chicago. "The Library of the National Safety Council has continued to grow in scope and usefulness. . . under the direction of Mary B. Day. During the past twelve months 2,677 research requests were answered; more than 24,000 pieces of literature distributed, and assistance given in the preparation of the revised Safety Slogan booklet; the Annual Congress exhibit; bibliography for text book on School Safety; the preparation of twenty portfolios illustrating the national Council's service, and many other such items.

—*National Safety News* for September.

Chicago. By the middle of February, 1921, the number of active branches of the Chicago Public Library had been reduced from forty-five to twenty-nine as the result of retrenchments made necessary to meet the budget. The staff dropped from 629 to 520 assistants, and there was only \$75,000 available for buying books, or \$25,000 under the sum for 1920. In the face of these difficulties the home circulation of books in 1921 reached 7,472,768, only 180,000 less than in the preceding year, or about one average week's figures. The inclusion of the Regional Branch for the first time with a circulation of 267,621 for its first year accounted for a large part of the increase. The reopening of the John Crerar Library in its new quarters across the street from the Public Library did not have the anticipated effect on the patronage of the latter, which continues to increase at the normal annual rate. The close proximity of the library has, however, led the Public Library to take steps to avoid duplicating reference material that properly belongs in the field of that institution.

The increase in Illinois library tax rates, as already reported (*LIBRARY JOURNAL*, July, 1921) assures the library a fixed and irreducible rate of eight-tenths of a mill this year, or about fifty cents per capita of population, a sum which lifts Chicago from its former place at the bottom to somewhere near the middle of the column of large American cities in the matter of public library support. The receipts for the year were \$850,069, of which \$539,054 was disbursed in

salaries, \$92,260 for books, and \$71,894 for binding. With net additions of 24,419 books (73,586 subtracted), the number of books in the library on January 1, 1922, was 1,099,711.

WISCONSIN

New quarters in the Capitol Annex greatly facilitated the work of the Traveling Department of the Library Commission, which during the year ending June 30 shipped 131,750 volumes to all parts of the State. Of these over 34,000 were sent in 598 collections to supplement local library collections both for general use and for the benefit of women's clubs or other groups. Books went to 1351 different communities, so that "if we except the communities served thru their public libraries from our total number of 1351 communities served, we find that more than 1200 volunteers acted as distributing agencies," says Harriet C. Long in the *Wisconsin Library Bulletin*. Schools distributed over 45,000 volumes in 2338 collections, and 30,000 were sent in response to 5918 requests from individuals.

MISSOURI

St. Joseph. The year's circulation of books from the St. Joseph Public Library showed still another increase over previous records, as nearly fifteen per cent more books were issued than in 1920-1921, or 368,643 in all in the year ending April 30. March proved the busiest month. The Carnegie branch continued its work with the study clubs of South St. Joseph, with the Benton High School students and the pupils of the upper classes in the grade schools, besides giving fortnightly service to two fire-stations and the Ross Dugger Post of the American Legion. The library has 92,962 volumes. More books were discarded and worn out in the Juvenile and Schools Department than were added, a condition which is soon to be remedied. Of the expenditures of \$40,952, books, periodicals, and binding represented \$10,782, and salaries \$22,496.

HALF-PRICE SUBSCRIPTIONS TO THE LIBRARY JOURNAL

Half-price subscription rates (\$2.50 instead of \$5.00) apply to:

- (a) Any library having an income of \$3000 or less;
- (b) Any librarian or library assistant having a salary of \$1500 or less; and
- (c) All duplicate copies ordered by any library, whether for the use of trustees or staff members.

Riverside Library Service School

Charges to Washington should be prepaid. The books will then be forwarded by the Smithsonian Institution to Poland.

THE TOUCH OF THE OPEN MIND

WHETHER at the club or by the fireside, in town or in the country, we want to match our minds with those who have ideas. We want to read of what is being done; we want to know what is being thought; we want to hear more of those who are doing the acting and the thinking; we want the touch of *the open mind*.

To bring this a little more directly to our great family of readers, Scribner's in the September issue will inaugurate a new department under the direction of William Lyon Phelps, Lamson Professor of English of Yale University. Probably no man of letters is better and more widely known in this country than Professor Phelps. For many years he has guided thousands of young men in the alluring field of contemporary literature, poetry, novel, and drama. He has charmed thousands of audiences by his grace of style and his ready wit, and has fostered a liking for the best in letters, old and new.

In the ripeness of his rich experience he has set out on the great adventure of speaking each month to the host of Scribner readers under the caption, "AS I LIKE IT." It is a pleasure and a privilege to welcome as our regular contributor one who is so true to the best of American traditions and ideals as Professor Phelps, just now when it seems that we are on the threshold of an American renaissance. The Book of the Year for Young People

THE VOYAGES OF DOCTOR DOLITTLE

By HUGH LOFTING

Author of "The Story of Doctor Dolittle"

The famous little doctor goes on another amazing voyage. This book is three or four times as long as "The Story of Doctor Dolittle" and three or four times as funny. With two full pages in color, striking picture jacket and eighteen unique black-and-white illustrations by the author. *Cloth, 5½" x 8¼", net \$2.50.*

Previously Published: THE STORY OF DOCTOR DOLITTLE, price \$2.00

Other Outstanding STOKES Books:

THE MOUSE STORY

By K. H. WITH

This quaint and delightfully humorous tale of a father and mother mouse and their children is a classic known and treasured in Denmark. This first English translation, authorized by the owners of the copyright, is by Gerda F. Behrens and Dorothea Prall. *With color frontispiece and 8 quaint black-and-white pictures, cloth, 5½" x 8¼", net \$1.50.*

DAYS OF THE COLONISTS

By L. LAMPREY

Author of "Days of the Discoverers," etc.

Great events in our early days vividly described and vitalized by the use of fresh material. Not only does the author tell the important facts about the colonies, but she brings out the human side of history and the beginnings of some of the most significant features of American life. *With 4 illustrations in color and 11 in black-and-white, cloth, 5½" x 8¼", net \$2.50.*

THE GIRL'S BOOK OF VERSE

By MARY G. DAVIS

A Treasury of Old and New Poems

Dorothy Canfield Fisher in her Introduction to this book says, "Miss Davis has made, it seems to me, exactly the right sort of anthology for girls... There are poems to touch any one of the infinite variety of girl moods and phases." *Cloth, 5½" x 8¼", net \$2.00*

BOBBY OF CLOVERFIELD FARM

By HELEN FULLER ORTON

Author of "Prince and Rover of Cloverfield Farm."

Cloverfield Farm is a place with a big, homey family, friendly animals and delightful happenings. This volume tells of Bobby's adventures there from the first kite-flying days to the time of nut-gathering. *With 8 full-page illustrations and chapter head-pieces in two colors, cloth, 5½" x 7¾", net \$1.00.*

STORY LIVES OF MASTER MUSICIANS

By HARRIETTE BROWER

Author of "Home Help in Music Study," etc.

Vividly told life stories of twenty-two great composers, from Palestrina, Bach and Handel to Mac Dowell and Debussy: *With portrait of each composer, cloth, 5½" x 8¼", net, \$2.50.*

A copy of our 32-page, illustrated booklet describing all our Holiday Publications is yours postpaid for the asking.

Appleton's Famous Boys' Books

ALEXANDRE DUMAS'

"The Three Musketeers" is now obtainable in the one volume Leloir Edition, with the 250 illustrations by Maurice Leloir. "A public service has been performed by issuing this great novel in such attractive form with all the illustrations."—William Lyon Phelps. \$3.00

FREDERICK TREVOR HILL'S

"On the Trail of Washington" (\$2.50), "Washington the Man of Action," illustrated in full color by "Job" (6.00), and "On the Trail of Grant and Lee" (\$2.00), are wonderfully fine historical narratives.

MOLLIE ELLIOT SEAWELL'S

Stories of famous naval characters are excellent and unusual reading for young people. They include "Little Jarvis," "Paul Jones," "Decatur and Somers." Each \$1.50

THE RADIO DETECTIVE SERIES

By A. Hyatt Verrill
These four books, ingeniously combine adventure and the use of the popular radio. "The Radio Detectives," "The Radio Detectives Under the Sea," "The Radio Detectives Southward Bound," "The Radio Detectives in the Jungle." 4 in a box, \$7.00; Each \$1.75

THE BOY SCOUTS YEAR BOOK

Edited by F. K. Matthews

All-ways the big boys' book of the year. Stories, articles on all a boy's interests, pictures. \$2.50

COXSWAIN OF THE EIGHT

By Ralph Henry Barbour

Barbour writes one of his best school stories, with the theme of the school crew. \$1.75

DAN'S TOMORROW

By William Heyliger

The new story by the author of "High Benton" tells of what some boys found in the industrial world. \$1.75

SCOUTING WITH MAD ANTHONY

By Everett T. Tomlinson

No one else writes quite such well-turned tales of Revolutionary days as Dr. Tomlinson. This one centers about "Mad Anthony" Wayne. \$1.75

THREE SIOUX SCOUTS

By Elmer Russell Gregor

The accurate Indian lore this author puts into his lively stories is noteworthy in this Indian "Three Musketeers." \$1.75

ANDY BLAKE IN ADVERTISING

By Edward Edson Lee

An advertising man has written this vocational story of how a boy found himself in advertising. \$1.75

AT HILLSDALE HIGH

By Earl Reed Silvers

As in his college stories, Silvers here tells a true-to-life high school story. \$1.75

RENFREW OF THE ROYAL MOUNTED

By Laurie York Erskine

The wonderful bravery of the Northwest Mounted Police in their dangerous duties is inspiring in this fine story. \$1.75

ROGUES' HAVEN

By Roy Bridges

Boys will enjoy to the full this very well-told tale of pirate gold. \$1.75

SCOTT BURTON AND THE TIMBER THIEVES

By Edward G. Cheney

Interesting forestry information is incorporated into this story of a government forester in the Florida swamps. \$1.75

JOSEPH A. ALTSHELER'S

books are surely among the finest boys' stories ever written. His popularity grows with the years, and the publishers find that hardly a week passes that some one, and usually more, of these splendid books have to be reprinted. "The Young Trailers Series," "The Texan Series," "The Civil War Series," "The World War Series," "The French and Indian War Series," "The Great West Series," and the miscellaneous stories, include 40 titles.

Each \$1.75

WALTER CAMP'S

stories, "The Yale Series," "The Danny Fists Series," are full of the clean, sturdy spirit of college days. Six titles, each, \$1.75. His "Football Without a Coach" speaks for itself. \$1.50

BIBLE STORIES IN BIBLE LANGUAGE

By Lorinda Munson Bryant

The pick of the Bible stories, with the fine old Bible language of the King James version retained, with extraneous matter cut out and reparagraphed into straight prose. The perfect collection of Bible stories for children. Illustrated from famous paintings. \$2.00

Books for the Young

CLASSIFIED -- GRADED -- PRICED

This is the title of a high-grade, very carefully compiled list of titles regarded as the best books for children's reading. It is a guide to books of value, such as may be justly regarded as the treasures of juvenile reading. Only books of tested merit and literary purity find a place in this list. This catalog is distinctive in that it classifies the books. The books are graded and described by short comment, and the publisher's list price and the wholesale price to libraries are indicated after each title.

Copies will be mailed free to librarians of school and public institutions, children's librarians, chairmen of purchasing committees, and others charged with the purchasing of books in quantities.

The following extracts from letters will give you an idea of the value of this catalog:

From a Mid-West State Normal School Librarian:

"We are grateful to you for the valuable catalog of Books for the Young. It is unusual cooperation, for which schools and libraries ought to be very grateful."

From a librarian of one of the leading State Universities:

"No two people ever agree on a selected list of books, but you have an unusually good list and if all booksellers pushed books as good as those in your catalog the level of juvenile reading would be very considerably raised."

From the secretary of a State Public Library Commission:

"I find that the catalog is one of the best booksellers' catalogs which it has been my pleasure to examine."

From a public librarian in England:

"I am very grateful to you indeed for sending the copy of your catalog entitled 'Books for the Young' and I can assure you that I have found it of very great interest and consider it is a most useful combination, especially from a Librarian's point of view."

From others:

"It is a real tool for librarian and teacher. You have made a great advance in catalogs of books."

"I have looked through your catalog and it is surely the most convenient and comprehensive one of the kind that I have ever seen."

"I want to congratulate you on making what seems to me the most comprehensive, attractive and useful list of books for younger readers classified under the various headings that I know of."

"You are to be complimented on having issued a carefully classified and properly graded list which should be extremely helpful to educators, librarians and parents in making selections for young readers."

BOOKS FOR

BOYS AND GIRLS

Special Gift Editions

THE ADVENTURES OF A BROWNIE

(Together with "The Little Lame Prince" and "Poor Prin.")

By MISS MULOCK

This year we have selected Miss Mulock's charming quaint folk tales as the new volume in our special series uniform with CORNELLI, HEIDI, and PINOCCHIO.

Gift Edition, handsome binding, 14 illustrations in color. \$3.00

De Luxe Edition, special binding with gold decorations, 14 pictures in color mounted on gray mats, silk marker, lining papers, page decorations, in a box. \$6.00

Miscellaneous MARVELS OF THE WORLD'S FISHERIES

By SIDNEY WRIGHT. Illustrated. \$1.75

TWO FORM CAPTAINS

By ELSIE J. OXENHAM. Illustrated. \$1.75

THREE PICKLES IN AND OUT OF SCHOOL

By MAY BALDWIN. Illustrated. \$1.75

PEPPERY PAT AND THE OTHERS

By L. E. TIDDEMAN. Illustrated. \$1.50

TEDDY LESTER IN THE FIFTH

By JOHN FINNEMORE. Illustrated. \$1.75

COMRADES EVER

By ESCOTT LYNN. Illustrated. \$1.75

RED-ROBIN

By JANE ABBOTT

The author holds a unique place among the writers of fiction for young girls. Her popularity today is equalling that of Louisa May Alcott in her day. She resembles the latter writer in her happy and optimistic outlook on life.

Red Robin is the delightful story of Robin Forsythe who falls heir to a fortune which is the beginning of as merry a series of incidents as one could imagine. 4 illustrations. \$1.75

Jane Abbott's other stories are "Aprilly," "Highacres," "Larkspur," "Keineth" and "Happy House." Each illustrated. \$1.75

WINONA ON HER OWN

"CAMP FIRE GIRLS SERIES"

By MARGARET WIDDEMER

The author knows what girl scouts like—adventure, fun, frolic and a story of real doings. Winona Merriam and her old chum Louise, accept positions as Counsellors in a camp of lively but spoiled girls. The results are amusing, instructive and highly diverting. This is the kind of story that the average girl likes. 4 illustrations. \$1.75

PETER COTTERELL'S TREASURE

By RUPERT SARGENT HOLLAND

The author takes a personal interest in the Boy Scout movement. His books reflect his knowledge of the boys and their life. In consequence nearly every scout and wide awake boy in the country knows Holland's books. PETER COTTERELL'S TREASURE is an adventure story in his best vein. A hunt for treasure with a surprising climax. 4 illustrations. \$1.75

AN OLD WOLF'S FAVOURITES

By SIR ROBERT BADEN-POWELL

Sir Robert has had more adventures with wild animals than most men would hardly deem possible. There is not an English speaking boy in the world that does not know of his wonderful exploit in Germany during the Great War. His experiences and adventures with wild animals form a book that will delight the heart of every lad. Profusely illustrated by the author. \$1.25

By the same author "What Scouts Can Do." Illustrated. \$1.50

THROUGH THE CLOUD MOUNTAIN

By FLORENCE SCOTT BERNARD

This book is a distinct find and we have endeavored to present it in a form worthy of its unique character. It will be met with acclaim by youngsters as it tells the new story of Jan, the little boy left behind by the Pied Piper and how he gained entrance to the mountain and there met all the story book folk. Beautifully illustrated in color with specially designed lining papers and title-page. \$2.50

CHILDREN'S FAVORITES

MYTHS EVERY CHILD SHOULD KNOW

Edited by H. W. Mabie

Illustrated by Mary Hamilton Frye

¶Among every people and in every language there are to be found stories, superstitions, and traditions, which cannot be explained by present day thoughts and ideas. Most people tell these stories without understanding where they came from or what they meant when they were first used.

Price, \$1.75

FAIRY TALES EVERY CHILD SHOULD KNOW

Edited by H. W. Mabie

Illustrated by Mary Hamilton Frye

¶There are the old stories of "Jack and the Bean Stalk," of the "Ugly Duckling," of "Puss in Boots," "The Princess on the Pea," and others that have delighted children since the days of Grimm, Andersen, and Perrault, Miss Frye's drawings are unique in American illustrating.

Price, \$1.75

THE WONDERFUL ADVENTURES OF NILS

By Selma Lagerlöf

Illustrated by Mary Hamilton Frye

¶Selma Lagerlöf's story of Nils, the bad boy, who turned into a tiny elf, and of his adventures in animal land, has become a real fairy classic. Miss Frye's pictures are very quaintly drawn, and the fairy story takes on a new realism in her delightful interpretation of it.

Price, \$1.75

JUST SO STORIES

By Rudyard Kipling

Illustrated by Joseph M. Gleeson

¶Any one who loves the delicious blending of humor and natural history which are found in the "Just So Stories" will experience a new and unexpected delight at seeing Mr. Gleeson's illustrations.

Price, \$2.50

Edited by Kate Douglas Wiggin and Nora Archibald Smith

THE FAIRY RING

¶The thirty-three illustrations by E. M. Mackinstry have all the charm and feeling of the fascinating old fairy stories which make up this volume.

Price, \$1.50

THE POSY RING

¶Short poems, admirably selected, simple in language and sentiment such as the very youngest children will understand.

Price, \$1.50

THE TALKING BEASTS

A Book of Fable Wisdom

¶From Æsop and La Fontaine to the almost unknown fables of India, China, and Japan have been drawn these some hundreds of short tales in which birds and beasts delightfully convey the wisdom of the ages.

Price, \$1.50

HOW many sets of the Book of Knowledge have been sold in North and South America?

SEVEN HUNDRED THOUSAND SETS.

WHY has the Book of Knowledge had this, the largest sale of any educational work for children?

Because librarians, teachers and parents have found it so satisfactory that they have recommended it—and because children recommend it to one another.

WHAT is the best test of the worth of the Book of Knowledge in a library?

Wherever the Book of Knowledge has been placed where the children have easy access to it, they have used the volumes constantly.

WHO would like to receive specimen page booklet and pamphlet of opinions of librarians and teachers?

The publishers will be glad to send full particulars upon request.

A BOOK FOR CHILDREN AND --- FOR EVERYONE ELSE

The ADVENTURES OF **MAYA** THE **BEE**

By WALDEMAR BONSELS

*A Piece of Literature to be ranked with
"Alice in Wonderland"*

Half a million copies sold in the original. Translated into seventeen languages

Maya was not a bee like other bees. From the very hour of her birth she made up her mind that she was not going to work and make honey, day in and day out. She would go out and see the world for herself and have adventures and experiences. And she did. She had adventures in plenty, more, sometimes than she liked. She met many different kinds of insects, learned many things about the way they lived and about the way they thought and felt. And she learned a little about human beings, also. She had such an interesting life that in reading about it in this book we can hardly catch our breath at times. We laugh and we cry; we are happy and we are sad. For Maya is not an ordinary bee. She is a great character and we get to love her. And what happens to her is very important. 8vo. \$3.00

Illustrated with head and tail piece in black and white for each chapter and with four full-page colored illustrations by HOMER BOSS

Thomas Seltzer, *Publisher*

New Roads in Library Work With Children

By JASMINE BRITTON

LIBRARIAN, ELEMENTARY SCHOOL LIBRARY, LOS ANGELES

THOSE who have thoughtfully observed the trend of recent library expansion see the development of a new phase in work with children. While a library has always been considered an essential in colleges and universities, it is only in the past twenty years that high schools have improved the quality of their work by providing a librarian to administer their books. Today we are coming a step nearer to reaching all the people with books, and are considering an elementary school library. What a large field it is, and what an important service it can render to the entire community! When one considers the scope of the elementary school system and how essential it is that it be thoroly alive, it is surprising that organized library service within the schools has not been undertaken before. The elementary schools need exactly the special assistance in finding the right books and other material which a librarian can give. A capable children's librarian in a school can be of immeasurable value to the teacher and a source of joy to the children. She can revive a droning room and put every child mentally on tip-toe. One teacher said to me not so long ago, "The new material you brought enlivened the class for the rest of the day." While a large proportion of a librarian's duties may be supplying the books that are needed for reference and definite instructional purposes, nevertheless no children's librarian who is worthy of the title can avoid finding opportunities for suggesting recreational and inspirational reading to the children. The complete trinity of interests in books is information, recreation and inspiration. These interests are part of life, and there is a constant need to be filled by the librarian who has a sympathetic ear. Many times it is the teachers who ask this help for their own personal reading as well as the children.

The advantage, to the library, of working in

the public schools is that they offer the one place where all the children of all the people are gathered together. Here they are, in numbers too enormous for the average person fully to comprehend, and opportunities await the librarian greater than have yet been attempted. Here most of the day for most of the year may be found thousands of human atoms. They form a vast horde of youth discovering life and its multitudinous interests in an ever broadening horizon. The elementary schools offer a large untouched area for educational endeavor to those who believe in books, in children, and also in the dynamic possibilities when a child discovers the right book at the right time.

The strategic position of working within the school system as an integral unit of the organization, is an immeasurable advantage to the library. There is a within-the-family feeling, which far exceeds co-operation between separate institutions, each abiding by long-established standards and their convictions as to the field of activity each can legitimately undertake. The teacher feels free to request from her school library special or unusual assistance when some need arises or educational experiment is undertaken.

In addition to the regular work with the eight grades there are several divisions of a modern elementary school system which offer alluring possibilities. Among these are the parental schools where the boys are sent who are unusually obstreperous or have repeatedly played hookey. A superabundance of animal spirits has resulted in some misdeed, and if allowed to continue may lead to lawlessness or later a reformatory. The man in charge of these imps of darkness must be good-humored, calm, and competent to give the boys something to make or do a major portion of the time, to conduct their recitations informally, and to cultivate the fun of reading. These children do not like school. It bores them. The books that go to a parental school must include books that are interesting, books that

* Paper read at the Children's Librarians Section Detroit meeting of the A. L. A.

are exciting, books that are funny, and books that are not too hard. Some of the boys at first will do no more than look at stereographs, or turn the page of *Popular Mechanics*. The teachers tell me librarians are apt to grade their book collections too high. Possibly this happens because their experience is with children who read easily and enjoy reading. What book bait would you use? It is a problem in which the answer is always changing.

Then there is the library work with the psychology department which brings up to grade under its supervision, in one or several subjects, children who have been temporarily handicapped, perhaps because the family has moved from one town to another, or there has been illness. This field is fascinating to watch because each child charts his own progress from day to day and becomes so interested in the task that he works off his handicap in an amazingly short time. The library supplies books in history, biography, geography and recreational reading to fit special needs, books which must be more than text-books and will compel attention.

There are also classes for the super-bright children. Critics of public school education have pointed out that children of superior mentality and talent have always been held back by the slower members of the class. They have been hampered by the dead level of standardized mediocrity, and their latent power for accomplishment or leadership wasted. It is not the aim in these special groups of gifted children to rush them thru grade after grade, thereby losing the educational value of associating with children their own age. The same curriculum is greatly enriched for them according to their varying abilities instead. These children with keenly alert minds study England more intensively than do the others. They devour "Men of Iron," "Merry Lips" and "Master Skylark." They are interested and occupied. They develop mental muscle to search out and explore all kinds of thought-provoking questions which arise in their class discussions. We were interested recently to discover nine pairs of twins in the Sixty-First-Street School, and to find that two pairs of boy twins in this school tested mentally far above the average child. It goes without saying that the browsing collection which the library supplies such a room is a rare opportunity for the children's librarian to indulge her loftiest ideals in the best of literature and where, too, she can more nearly satisfy Bernard Shaw's first condition of a children's library, that there should be no children's books in it.

Part-time classes are conducted four hours a week for children who must work. While the boys and girls are usually in their teens, they can do only elementary work as a rule. For the most part the subjects taught are related to the work they are doing. There is little time to direct their reading, which in the majority of cases can be encouraged only with the popular simple type of story.

Teachers also carry our books to their classes in the children's hospital and to the moving-picture studio. The law requires that all children taking part in the plays shall receive four hours of instruction every day. We hear certain criticism concerning the effect of the studio life on these children, that they lack application and form habits of inattention, lose interest in keeping abreast with other children, are nervous, erratic, not well behaved and need constant watching, while their minds are filled with false values of life. Such criticism led to a survey recently made in Los Angeles, which brought out the surprising facts that there is a higher percentage of advance grade pupils in the studios than in the total for Los Angeles, that the percentage of under grade pupils is only one-half as great as the rest of the system, and that there are only one-half as many failures.

The report from Jackie Coogan's teacher is interesting to the library in its account of the books which the small boy reads.

"In the sixteen weeks of actual study and recitation he has read eight books: two Primers, two First Readers, one Second Reader, and is now completing his second Reader. He has spelled correctly at the first attempt without any preparatory study all but twelve of the Second Grade words in the State Speller; under the same conditions he has spelled all but forty-two of the Third Grade words. He visualizes most remarkably well; almost all words that he recognizes in reading he spells correctly.

"During the time we have been working and playing together we have read "Mother West Wind," stories, "Just So Stories," "The Jungle Book," Hawthorne's "Wonder Book," some Trojan War stories and some Fairy Tales. When I say "we" have read, I am not speaking editorially—Jackie sits beside me, or on my lap, and frequently reads sentences or whole paragraphs.

"Altogether this wonder-child has the finest mind of any child that I have ever come in contact with in my twenty years' teaching experience. I wish I had time to tell you, and you had time to listen to the truly extraordinary things he says and does."

In the evening school classes no formal text book can possibly meet the demands of various nationalities, various degrees of education, various temperaments. For each individual a book must be found which most nearly matches the needs and interests which he has. There are simple books to be supplied to the afternoon classes for foreign mothers. There are also separate classes for foreign children until they have mastered the English language in which they are asking for picture books so that they can learn the words by means of the pictures.

It is a long step from the needs of our little foreign children to the professional demands of the superintendent's office for books on administration, the curriculum, or some recent government statistics relating to education in Wisconsin, but this is another stimulating part of our varied field.

The elementary school library in Los Angeles is much more than a library of books, for in addition it furnishes the teacher with pictures for her classes in geography, history, nature-study and literature. There are lantern slides and moving-picture films which closely correlate with the lesson. At present it is difficult to find satisfactory films for educational work. A number can be borrowed from large manufacturing plants, such as wheat, from the McCormack Harvesting Co., oil, from the Standard Oil Co., lumber, from the Hammond Lumber Co., Yosemite and Grand Canyon slides from the Santa Fé Rail Road, rubber, from the Goodyear Co. Many educators believe that films will be planned and made soon, which will be of the greatest value in teaching foreigners and retarded children.

The most important part of our circulation of phonograph records is in co-operation with the music department, which conducts each winter a musical memory contest among the children. In addition to recognizing and correctly naming the music, it is necessary for the children to know something of the story or theme of the composition and the life of the composer. Those successfully competing are given scholarships in either voice, piano or violin. There are season tickets to the Philharmonic concerts for others. The influence this has on the community is very great. At every turn we hear kindly comment on the discriminating pleasure in good music which the contest develops in the children, and the effect thru them on the quality of music heard in the homes. One business house said it could have sold twenty thousand dollars worth of records to parents if it had had the stock on hand.

The elementary school library of the future will have a central collection to meet special

demands, and a branch and teacher-librarian in every school. It is the only way in which we can hope to reach all the children and to establish an appreciation of books and a zest for reading which will carry them on to the wider interests of the public library.

The Books Children Like

IT is always a mistake to generalise about children, and never more so than in connection with the books they read. One has to be what is called a children's author, perhaps, to know what it feels like, after writing a book for children, to discover that one has written a very nice story for fathers or aunts. But then, it is also sometimes the other way about. I once knew a little boy to whom came every Christmas a pile of gilt-edged gift books, all illustrated by the very newest artists; and I remember finding him buried in Napier's "History of the Peninsular War." No doubt he would have considered this a dull book if it had reached him as a Christmas present, but, having discovered it for himself, he found it entrancing. . . .

The very young child is dependent not only upon pictures but also upon letter press that bears being read aloud. That is a severe test, and one that many well-written books will not survive, while a thoroughly commonplace record of the everyday life of some child or animal, written in a commonplace manner by someone whose name never appears, may easily become first favourite. . . .

. . . We are all apt to forget the one supreme fact about childhood—that no child thinks of himself as a child. When he is not pretending to be an engine-driver or a pirate, or some other definite assumed character, he is to himself a person like anybody else, a dweller in a common world; only very rarely does he think of himself in a separate class as a child. That is why he resents anything that segregates him in this manner. And I think that the only sort of book really acceptable to most children is the book that makes them feel on a level with the author, whether it is actually written for them or their elders. As long as he approaches them as equals, just as he would approach grown-up readers, a writer may select his subject and his characters with special reference to their youth without being found out; otherwise—if he writes down to them in any way—he will drive them straight to any book that cannot possibly be suspected of having been written especially for children. So long as they chance upon good literature in this way, that will not matter; but it is not always this that happens.—Evelyn Sharp in the *Manchester Guardian Weekly*.

Direct-by-phone Advertising to Children

A CHILD'S natural feeling of importance upon receiving a personal telephone call and the resulting impulse to comply therewith, prompted the Stockton (Calif.) Library to undertake a direct-by-phone advertising campaign among children.

A list of prospects is the first requisite for any form of direct advertising. As a by-product of the five-minute visits made to all elementary school rooms during Children's Book Week, class-room rosters (no combined school enrollment existing) had been obtained to an extent of twenty-five hundred names and addresses, subsequently used effectively for mailing lists. Later, after the proportion of library abstainers had been reduced by mail advertising, all names were eliminated which appeared in the library's registration of borrowers. Those remaining were then compared with similar surnames in the telephone book. Where identical addresses were found, the telephone numbers were copied, completing a working list of prospects. Approximately one-third of the total list of non-library users was found to be equipped with telephones.

A little experimenting showed that morning was the most effective time for reaching prospects. Not only were children more often at home at that time, but also, a message delivered early in the day afforded a longer period in which to respond before the impulse could be weakened by a night's sleep. When called before noon, forty per cent of those responding appeared on the same day.

The recruiting was done by an assistant from the Young People's Department, who telephoned for two hours each Saturday morning (and other days during the vacation period), using a private, one-party line in order to accomplish the maximum amount of business, free from interruption. Imagination and dispatch proved to be essential in operating such a campaign: the first, so as quickly to adapt the appeal to the attitude of each prospect addressed; the second, in order to reach a large number of prospects within a limited period.

The following is the actual procedure of a typical "phonolog":

Recruiting Assistant. Hello! Is John at home?

Parent. (surprised). John? Yes. I'll call him.

John. (aside). Who wants to talk to me Ma? (At phone, importantly) Hello!

R. A. Hello. John. This is Miss Green in the Young People's Room of the Public Library.

John. (very much subdued). Ooo, yes ma'am.

R. A. John, have you ever read about Robinson Crusoe or Peter Cottontail?

John. (quite naturally and excitedly). Our teacher read us all about Peter Cottontail, but I never read Robinson Crusoe.

R. A. Well, why don't you come down to the library and get a card, and find out about Robinson Crusoe, and see all the other fine books here for boys.

John. But, gee, I ain't ten yet!

R. A. Never mind. Now you can have a card as soon as mother will let you.

John. Can I? But do I have to bring it all the way home and get it signed?

R. A. No, John, not any more. Just come down and you can take your books home right away.

John. Oh, I'll come right down this afternoon! (And he came, bringing several of his neighborhood chums with him).

As a result of the first ten two-hour periods of phone work, extending over a stretch of six weeks, 303 calls were made; 237 children were reached either personally or thru a member of the family; and 167, or seventy per cent responded by using the library for the first time.

Whether the direct returns of this "Hello" campaign be reckoned as fifty-five per cent of the number called or seventy per cent of those actually reached, the percentage far exceeds the results obtained thru direct-by-mail advertising among children, which has been bringing a keyed return of only ten per cent. There is also to be taken into account the indirect, unkeyed return thru the incidental propaganda of the children among their playmates and families. Frequently, a telephone recruit appears with a friend in tow. Now and then, a solid phalanx marches in. We are convinced too, that adults are reached indirectly thru the present procedure, on the well established principle, that what interests the children interests the parents.

HERMAN O. PARKINSON, *Librarian*,

Psychological Tests in Library Examinations

To the Editor of the LIBRARY JOURNAL:

I have read with interest the article in the September 1st LIBRARY JOURNAL by Mr. Charles W. Reeder on "Psychological Tests in Library Examinations."

We used similar tests in our training class entrance examinations last July. They proved a valuable supplement to the general examination, and we believe such tests of alertness, speed, and accuracy have an important place in library school and training class examinations.

HILLER C. WELLMAN, *Librarian*.
City Library Association, Springfield, Mass.

Giant-Killing in the Children's Department*

By EDITH L. SMITH

Morris County Free Library, Morristown, N. J.

THIS paper is entitled "Giant-Killing in the Children's Department," and the answers to the questionnaires sent to twenty-one city libraries and sixteen library schools will be used as slingshots. In the fairy tale the cruel giant is slain in the end. I wish that it were to be so here. This giant may be designated as "Lack of Trained Librarians in the Children's Department" and he carries as a club "Lack of Funds or Proper Budgeting for the Children's Department." Deprived of his club, he should be easier to conquer.

Visits to several libraries in the East last summer disclosed that the children's departments had a decidedly down-at-the-heel appearance as compared with the adult departments. In every case this was because the department was without a children's librarian. The work was done by scattered workers who were scheduled there when it seemed necessary. The town in which I spent my early days pestering the neighbors for books, has no more books now than it ever had, beyond a few privately purchased. So much for the optimist who looks at the circulation of the large city libraries and thinks that children's work is showing a normal development. Children's librarians have to some extent pointed the way to the benefits of proper silent reading for children, but they have been handicapped by lack of numbers and organization until this extremely important branch of library work is beginning to be absorbed into the school system. The interest of the school is whole-heartedly in the children. The library has mixed interests. The children in the library are frequently neglected for the new business branch, the reference department, or even the new fiction. Often in a city of over one hundred thousand people where more than six hundred teachers are employed, there is but one children's librarian. Obviously, she cannot take care of the book needs of all the children.

The answers to the questionnaire sent to the library schools give a picture of what is being done to train children's librarians.

Replying to the question how many hours in the general lecture course are given to work with children, two schools report from 150 to 172 hours, six from 30 to 45 hours, four from

20 to 30, and four from 10 to 20 hours. The subjects covered are selection of books, administration of the children's department and other subjects pertinent to the work. In most cases, two hours of preparation are required but not always even that. In other words, according to some library schools it takes no longer to become an expert in this highly specialized branch of literature than it does to learn to drive a Ford.

The amount of practice work required ranges from two schools which offer none, to five schools demanding less than 45 hours, five between 45 and 100, and four from 160 hours to as much as 272. It is often elective though a minimum number of hours is required in thirteen of the schools. Reports on student work are always required. The general library schools exact attendance at all lectures on children's work the first year; in the second year it is elective. Story-telling in two schools is optional.

An average, rather blindly determined, of less than twenty-five per cent of the graduates of all the schools immediately upon graduation go into library work with children or to branches which largely circulate juvenile books. That many remain in the work, is the general statement from the schools, though some qualify this by "Remain as long as in other lines of library work," or, "Stay until married." Other reasons given for change are "Low salaries," "Lack of opportunity for advancement," citing quicker promotion and larger service of general librarianship; others answer, "Narrowing effect of the work," "Tired of dirty children," "Dislike page and clerical duties," and "Object to supervision." Two schools cite tempting openings in other lines, such as bookshops. Of the graduates of the library schools, 338 are children's librarians at the present time, 100 are high school librarians, and eleven are in normal schools. The large number of school librarians is significant of the present tendency of children's library work to turn from the apathy of the public library to the attentive interest of the school.

Replies to the questionnaire sent to twenty-one large public library systems revealed that the circulation of juvenile books is considerably larger where the children's department is distinct and has a sufficient number of assistants.

*Paper read before the Children's Librarians' Section of the A. L. A. at Detroit, June 28, 1922.

The fifth city in population has the third largest juvenile circulation. This library has the greatest number of thoroly trained children's librarians. A city exceeding this in population by over a million has a juvenile circulation of 500,000 less. This latter library realizes its deficiencies. The supervisor of children's work writes, "A few years ago I should have put your questionnaire in the waste basket preferring to keep our answers in the dark, believing the situation in this city would improve. Now, however, the situation is so menacing to the *general work of the library* here and elsewhere that I am giving you our figures in the belief that they will bring down the general average to figures which may be more convincing to the argument in hand." The highest paid children's librarian in that city receives a salary of ninety dollars per month. The problem of keeping assistants is further complicated, says the head of the children's department, because "the qualities which attract me seem to be those which attract marriageable men."

All the libraries prefer library school graduates as heads of departments. When library school training is not required, candidates as well educated and as widely traveled as possible, with natural aptitudes such as habits of reading, ease with children, and knowledge of children's books, are sought.

Seventeen of the twenty-one libraries train their children's workers to some extent. Four do not have any special training. The entering age required for students of the training classes is eighteen at least. A high school education or its equivalent and examination are required by all. Some ask one year at college. Lectures are on the usual subjects.

Answers to the question as to what salaries are paid to children's librarians show that the lowest maximum is \$1080, and the highest \$2400. The replies do not include salaries paid to supervisors of work with children. The lowest minimum salary paid to the children's librarian is \$1080; the average beginning salary for heads of children's rooms is about \$1300. This average is low because children's librarians from training courses in libraries begin in these libraries at lower salaries than do graduates of library schools. Nine answer that children's librarians' salaries compare favorably with those of other departments; two lower, two higher, three equal to first assistantships in branches.

Seventeen of the librarians report frequent changes in the staff, tho one writes that some of the best of the children's librarians have remained from ten to fifteen years. In one

library one-third of the staff changes annually and "it seems necessary constantly to lower the standards in order to keep anyone," writes the librarian. It seems necessary constantly rather to raise the standards asked of our assistants in order to keep the attention of an intelligent community directed toward the subject of good reading for children.

The reasons for deserting children's work in the order in which they are most frequently given, are:

(1). Marriage. The recruiting committee might find "punch" in this for attracting people to the work. Tho some librarians reported that their best children's librarians marry, for many visible reasons I do not agree with this. One children's librarian in New Jersey eloped recently while her librarian was away attending the state meeting. The moral of this is that she should have been taken to the meeting.

(2). Better salaries.

(3). Change to adult department for executive work and the better salary that goes with it.

(4). Resignation for positions nearer home.

Other reasons are too close supervision, dissatisfaction with the type of work, and ill health. It has been said, also, that the work is "finicky," that the practical, tangible side has not been sufficiently emphasized.

The National Education Association's programs show the teacher's growing interest in the pupil's silent reading. This presages an even greater need for children's librarians. More children's librarians must be recruited, but we feel that this must not be done by lowering the bars. Raising the standards of requirements should attract the intelligent college woman; lowering them will repel her. Higher standards, shorter hours, if necessary, that the children's librarian may be more a part of the life of the community, less sentimentality about the work, and a helpful, not a patronizing, attitude on the part of the library toward the school will increase the value of the work and recognition in the way of better salaries should result.

It is recognized that growth in intelligent use of the adult department which all libraries show, is due in great part to the early work of the children's departments. A chief librarian whose children's department is weak because of too few and untrained assistants is truly building his or her work on a poor foundation.

The covers of *Good Housekeeping* beginning in November will depict famous children of literature: by Jessie Willcox Smith. November, David Copperfield and his mother; December, Tiny Tim and his father in church.

Recent Fiction for Boys*

By MARION F. SCHWAB, Brooklyn Public Library

ADVENTURE

Bridges, T. C. *Martin Crusoe; a boy's adventure on Wizard Island.* Harcourt, 1920. \$1.75.

By seaplane to the Sargasso Sea, to an island whose existence had been unsuspected, is the beginning of this wild fantastic tale in which the imagination will revel.

Brill, Ethel C. *When lighthouses are dark; a story of a Lake Superior island.* Holt, 1921. \$1.75.

Ingenuous tale of three boys and a girl stranded for the winter on an island, alive in the summer, but deserted after the fishing season. The feeling of cold, snow, and desolation is excellent, and a just emphasis is placed on the responsibility placed on the young people.

Hartley, George I. *The boy hunters in Demerara.* Century, 1921. \$1.75.

Natural science and adventure well combined in this story of specimen collecting in the Mazaruni country, introduced to boy readers in William J. La Varre's "Up the Mazaruni for Diamonds" (Marshall Jones, 1919. \$1.50). Full of the humor sadly lacking in some recent books.

Spears, Raymond S. *Driftwood.* Century, 1921. \$2.00.

Good story of a new kind of fight, that of humans against floods, and of the struggle between the river pirates and the river engineers. Three boys carried away by a Mississippi River flood help themselves and others by clear thinking and practical assistance.

Schultz, James W. *In the great Apache forest; the story of a lone boy scout.* Houghton, 1920. \$1.75.

A seventeen-year-old boy acts as fireguard on Mt. Thomas during the war. Friendly Indians help him, a deserter from the army and two I. W. W.'s hamper him. Unhackneyed glimpses of the forest service.

Tolman, Albert W. *Jim Spurling, millman.* Harper, 1921. \$1.60.

Continues the adventures of "Jim Spurling, Fisherman" (Harper, 1918. \$1.25), and provides a good struggle between a group of college boys and a gang of unscrupulous men.

Wallace, Dillon. *Ragged Inlet guards; a story of adventure in Labrador.* Revell, 1920. \$1.50.

Young boys, old men, brave women and girls bear their share of war's hardships while the young men go to fight. No sensationalism, no glory, but patriotism and a true sense of duty.

—Troop One of the Labrador. Revell, 1920. \$1.75.

An example of the manly, rugged kind of book desirable for Boy Scout stories. The enthusiasm of the youngest scouts should not be wasted on much of the tawdry stuff masquerading as Boy Scout stories.

THE FAR NORTH

Snell, Roy J. *Soolook; wild boy.* Little, 1920. \$1.75.

Soolook lived with the dogs, fought bears and wolves, encountered hostile Indians and friendly white men. The author successfully creates real atmosphere without pausing in his stride to do it.

Sullivan, Alan. *Brother Eskimo.* Century, 1921. \$1.75.

Vivid picture of life on the Melville Peninsula, when an igloo with two brothers in it is detached from the icefloe and carried away to strange regions, where the boys must learn anew the habits of the animals and the science of pursuit. A plain, unvarnished tale relieved by occasional touches of humor.

HISTORICAL ROMANCES

Hawes, Charles B. *The great quest; a romance of 1826.* Atlantic Monthly Press, 1921. \$2.00.

A story of mystery and adventure almost as good as his "Mutineers" (Atlantic Monthly Press, 1920. \$2.00).

Lisle, Clifton. *Diamond Rock; a tale of the Paoli massacre.* Harcourt, 1920. \$1.75.

An excellent spy story of real suspense and complete probability.

Barbour, Ralph H. *Metipom's hostage.* Houghton, 1921. \$1.75.

A carefully written account of a boy's adventures in the first year of King Phillip's war.

Bishop, Austin. *Tom of the raiders.* Harcourt, 1921. \$1.75.

The World War has not taken away interest in other wars, as shown by the popularity of this good story of the Civil War.

Marshall, Bernard. *Cedric the forester.* Century, 1921. \$2.50.

A carefully told narrative of the days of King John which, however, lacks the fire necessary to make it a second to "Ivanhoe," to which it has been compared.

SCHOOL STORIES

Boyer, Wilbur S. *Johnnie Kelly.* Houghton, 1920. \$2.00.

The adventures of the son of an Irish policeman when he is transferred to a new grammar school in New York City. Under Johnnie's mischief and slang lie the qualities found in most boys—desire for leadership, zest in competition, scorn for girls, and ruthless carrying out of ideas of loyalty and patriotism, be they right or wrong. Notable for its humor and its remarkably sincere picture of the relation between teacher and pupil.

Gollomb, Joseph. *That year at Lincoln High.* Macmillan, 1918. \$1.35.

Example of the new type of school story written for the boy of today.

Heyliger, William. *High Benton.* Appleton, 1919. \$1.50.

Story of high school life in a little New Jersey town, so obviously written with the purpose to show

* Compiled from a paper read before the A. L. A. Children's Librarians Section at Detroit, June 27, 1922.

the value of education as a foundation for progress that many doubted its popularity. The record of Steve's struggles, however, found hosts of readers among the boys for whom it was intended—the boys who want to leave high school before the completion of the course.

—High Benton—worker. Appleton, 1921. \$1.75.

Interesting and timely sequel of the hero's later struggles in the conflict between capital and labor.

Latham, Harold S. Jimmy Quigg, office boy. Macmillan, 1920. \$2.00.

Subject of boys in business treated in a lighter and livelier manner.

Paine, Ralph D. First down, Kentucky! Houghton, 1921. \$1.90.

An up-to-date college story offering a new setting for its action.

THE WEST

Ames, Joseph B. Curly of the Circle Bar. Century, 1919. \$1.50.

All the old sensational stunts of the old wild west story.

Hart, William S. Golden West boys, Injun and Whitey. Houghton, 1920. \$1.90.

—Injun and Whitey strike out for themselves. Houghton, 1921. \$1.75.

The desire to tell a "safe" and moral story conflicts with the desire of the moving picture star to provide thrills for his readers.

Newberry, Perry. Black boulder claim. Penn Pub. Co., 1921. \$2.50.

Not as good as "Castaway Island" (Penn Pub. Co., 1917. \$2.50), but offers satisfaction for the craving for stories of the West.

Pumpelly, Raphael. The travels and adventures of Raphael Pumpelly. Holt, 1920. \$1.75.

Enough thrills and gory details to satisfy the most blood-thirsty. Pumpelly learned from experience the important truth that has evaded most writers of western stories—that life in that new country depended not upon arms alone, but upon courage and caution as well.

Rolt-Wheeler, Francis W. The book of cowboys. Lothrop, Lee & Shepard, 1921. \$2.00.

Not fiction, but an excellent combination of history and adventure, as is Paul L. Haworth's "Trailmakers of the Northwest" (Harcourt, 1921. \$2.50).

Recent Fiction for Girls*

By ANNIE I. M. JACKSON, Toronto Public Library.

Brill, Ethel C. When lighthouses are dark. Holt, 1921. \$1.75.

Castaway story with heroine as well as heroes, that may serve to introduce girls to some of the best boys' adventure stories.

Gilchrist, Beth B. Kit, Pat and a few boys. Century, 1921. \$1.75.

As in her earlier "The Camerons of Highborough" (Century, 1919, \$1.35), the theme concerns the awakening and transformation, thru wholesome companionship and environment, of a sophisticated city girl into one with appreciation of relative values in conduct and character, as well as of the beauty of the country.

Hornibrook, Isabel. Pemrose Lorry, campfire girl. Little, 1921. \$1.75.

Sample of the undesirable type. Overwrought style and sentiment.

Tarn, William W. The treasure of the Isle of Mist. Putnam, 1920. \$1.90.

An unusual book for the unusual girl. The past year has produced nothing to equal it. In it there is humour and fancy, strong and attractive personalities, high standards, and an irresistible heroine.

HISTORICAL ROMANCES

Knine, Emilie B. Diantha's quest; a tale of the Argonauts of '49. Macmillan, 1921. \$1.75.

Well done, but is less a historical story than a pure adventure tale.

Taggart, Marion A. A Pilgrim maid; a story of Plymouth colony in 1920. Doubleday, 1920. \$1.60.

Rose Standish colorless, and historical sequence not strictly observed.

—A Mayflower maid. Century, 1920. \$1.90.

Historical atmosphere, character drawing and story interest good, altho the latter flags occasionally. Puritan character not overdone.

MYSTERY STORIES

Adams, Katharine. Midsummer. Macmillan, 1921. \$1.50.

Good characterization and atmosphere make distinctive this story of the happenings during the holiday two American children spend with their Swedish grandfather in his gloomy castle.

Meigs, Cornelia. The windy hill. Macmillan, 1921. \$1.75.

Similar in plot to her "The Pool of Stars" (Macmillan, 1919, \$1.60)—a selfish and ungrateful relative who has obtained a mean power over a more generous member of the family is brought to repentance, the trouble cleared up and the mystery solved by the young heroes and heroines. Literary quality above the average.

Johnson, Constance F. Mary in New Mexico. Macmillan, 1921. \$1.50.

Unmotivated; little local color and less literary worth.

Seaman, Augusta H. The dragon's secret. Century, 1921. \$1.75.

Not too bad of its kind, altho not equal in quality to its author's previous work.

Turpin, Edna. Treasure Mountain. Century, 1920. \$1.75.

Much of the melodrama and snobbishness of "Pemrose Lorry," but more real out-of-door atmosphere and less sentimentality in the relations between girls and boys.

* Compiled from a paper read before the A. L. A. Children's Librarians' Section, Detroit, June 27, 1922.

—The old mine's secret. Macmillan, 1921. \$1.75.

Another hackneyed German spy story, interesting enough in plot, but not of especial merit.

SCHOOL STORIES

Adams, Katharine. *Mehitable*. Macmillan, 1920. \$2.50.

Mehitable herself likable, with her imagination, love of beauty, and genuine appreciation of her historic surroundings in the old French chateau that is her school-home. The school-girl escapades are not unduly exaggerated, and the local atmosphere is well preserved.

Judson, Clara I. *The camp at Gravel Point*. Houghton, 1921. \$1.75.

True picture of ordinary high school girls with an interest in athletics, notably holding up to ridicule the "crush" phase.

Richards, Laura. *Honor Bright*. Page, 1920. \$1.65.

Honor a nice and not faultless little girl, and the slight story gives a good picture of school days in Switzerland and of Alpine peasant life. Books are frequently mentioned in such a way as to interest readers in them—often an effective means of opening out paths of more advanced reading to girls.

STORIES OF FAMILY LIFE

Price, Edith B. *The happy venture*. Century, 1921. \$1.75.

Miss Price shows more literary ability than any other present writer of girls' books, with the possible exception of Cornelia Meigs. The present book an unlikely but likeable little story.

—*Silver Shoal Light*. Century, 1920. \$1.75.

Has all the pleasing qualities of the other book, and is generally of more consequence. A courageous, dreamy invalid boy with a passion for ships and the sea, and his understanding, companionable father and mother have their effect on their girl guest. A German spy episode is a minor feature.

Richards, Lela H. *Then came Caroline*. Little, 1921. \$1.75.

Light and not very profitable reading, with the merit, however, of emphasizing how utterly ruinous to character being adopted by a rich relative may prove, a fact frequently overlooked by authors who thus provide for their heroines.

Taylor, Katharine H. *Real stuff*. Harcourt, 1921. \$1.75.

Perpetual family friction and the usual emphasis on clothes and desire for wealth. Painful thruout despite the wholesale reformation at the end.

Stockton's County Fair Exhibit

IT is a common observation that anything in miniature has a universal power of attraction. This miniature tableau, typifying county library service in California, was displayed by the Stockton Library (which is also the county library) at the San Joaquin County Fair. Attached to the gate post is the familiar orange sign of California, indicating the presence of a branch library close by. In the foreground, an "overall boy" is resting on his spade, and, sitting in a wheelbarrow among products of the soil, is his partner in industry, consulting "The A-B-C of Gardening" by "One Who Knows." Upon the wheelbarrow appears the slogan, "Do it with Books."

H. O. P.

To Special Librarians

The New York School of Social Research, 465-9 West 23rd Street is offering tuition to members of the New York Special Libraries Association, provided ten or more members enroll in any one of its courses. Those interested are asked to communicate at once with

Juliet A. Handerson, Russell Sage Foundation Library, 130 East 22nd Street, who has agreed to act as Registrar for the Association.

A special rate of \$10, instead of \$30 the usual fee, will be given to our members. The hours are from 5:20 to 6:50 p. m. and 8:20 to 9:50. The dates of registration are Oct. 9-16th.

R. B. RANKIN,
Authorising for Frances Cox,
Pres. N. Y. S. L. A.

Free on Request

"Reading List on Publicity Methods" is a first draft of a selected reading list for practical use by workers in social welfare publicity, prepared by Mary Swain Routzahn, who is joint author with E. G. Routzahn of "The A. B. C. of Exhibit Planning," published by the Russell Sage Foundation in 1918. A copy of the limited first edition will be sent to anyone who asks for it. Address E. G. Routzahn, 130 East 22nd Street, New York City.

The Howard Memorial Library, New Orleans, La., has for distribution some copies of a pamphlet entitled "Art and Artists in New Orleans during the Last Century" by Dr. I. M. Cline," which is the only special publication on painting in New Orleans. Librarians desiring a copy should apply early to the Howard Memorial Library.

Good Films for Young People Based on Literature

A LIST OF NEW OR CURRENT FILMS SUITABLE FOR YOUNG PEOPLE UP TO EIGHTEEN YEARS, SELECTED BY THE NATIONAL BOARD OF REVIEW OF MOTION PICTURES. THIS IS A SUPPLEMENT TO THE LIST GIVEN IN THE LIBRARY JOURNAL FOR OCTOBER 1, 1921

- ALI BABA AND THE FORTY THIEVES. Fox. 5 reels. Stars: Gertie Messinger and Georgie Stone. From the Arabian Nights.
- AND WOMEN MUST WEEP. Educational. 1 reel. Short scenic with poetry story, from Charles Kingsley's poem, "The Three Fishers."
- BEGGAR MAID, THE. Hodkinson. 2 reels. From Tennyson's poem and Burne-Jones' painting.
- BONNIE BRIER BUSH, THE. 5 reels. Famous-Players Lasky. All star. Scotch costume romance; from the novel by Ian Maclaren.
- CALL OF HOME, THE. Robertson-Cole. 6 reels. All star. New England and South-American drama; from the novel "Home."
- CALL OF THE NORTH, THE. Famous Players-Lasky. 5 reels. Star: Jack Holt. Romantic drama of Canadian trappers and the "long traverse," from the story by Stewart Edward White.
- CAMERON OF THE ROYAL MOUNTED. 6 reels. Hodkinson. All star. Young Scotchman in mounted police; from the story by Ralph Connor.
- CAPPY RICKS. Famous-Players Lasky. 6 reels. Star: Thomas Meighan. Sea story of captain and the company's president; from the stories of Peter B. Kyne.
- CERTAIN RICH MAN, A. Hodkinson. 6 reels. Star: Claire Adams. Drama of family life, business, and wealth, from the novel by William Allen White.
- CONFLICT. Universal. 7 reels. Star: Priscilla Dean. Northwestern melodrama with fine scenery and situations, from the story by Clarence B. Kelland.
- CONNECTICUT YANKEE IN KING ARTHUR'S COURT, A. Fox. 8 reels. Star: Harry Myers. From the novel by Mark Twain.
- CONQUEST OF CANAAN, THE. Famous-Players Lasky. 7 reels. Star: Thomas Meighan. Rise of man against a small-town reputation; from the novel by Booth Tarkington.
- DICTATOR, THE. Famous Players-Lasky. 6 reels. Star: Wallace Reid. Comedy drama of Central American revolutions from play by Richard Harding Davis.
- DISRAELI. United Artists. 7 reels. Star: George Arliss. Historical drama; from the play by Louis N. Parker.
- FLAME OF LIFE, THE. Universal. 7 reels. Star: Priscilla Dean. From the novel "That Lass of Lowrie's," by Frances Hodgson Burnett.
- FLIRT, THE. Universal. 7 reels. Stars: Eileen Percy and Helen Jerome Eddy. Rural domestic drama of a flirt and her plain sister, from Booth Tarkington's novel.
- FOREVER. Paramount. 7 reels. Stars: Wallace Reid and Elsie Ferguson. From George Du Maurier's novel "Peter Ibbetson."
- GET-RICH-QUICK WALLINGFORD. Famous-Players Lasky. 7 reels. All star. Story of American business and short cuts to success; from the stories by George Randolph Chester.
- God's CRUCIBLE. Hodkinson. 6 reels. Star: Wilton Lackaye. Melodrama of Russian immigrants and Western Canada, from Ralph Connor's story. "The Foreigner."
- GRAY DAWN, THE. Hodkinson. California story of 1856, from the novel by Stewart Edward White.
- GREAT IMPERSONATION, THE. Famous-Players Lasky. 7 reels. Star: James Kirkwood. English detective story; from the novel by E. Phillips Oppenheim.
- GYPSY PASSION. Vitagraph. French gypsies and their pet bear; from story, "Miarka, Daughter of a Bear," by Jules Richepin.
- HANSEL AND GRETEL. Universal. 2 reels. Star: Baby Peggy.
- HEADLESS HORSEMAN, THE. Hodkinson. 6 reels. Star: Will Rogers. From Washington Irving's "Legend of Sleepy Hollow."
- HEROES OF THE STREET. Warner. 7 reels. Star: Wesley Barry. Drama of a policeman's little son, from a story by Lem Parker.
- IRON TRAIL, THE. United Artist, 7 reels. Melodrama of Alaskan railway building; from Rex Beach's novel.
- ISLE OF ZORDA, THE. Pathé. 9 reels. From Jules Verne's romance, "Mathias Sandorf."
- JANE EYRE. Hodkinson. 7 reels. Star: Mabel Ballin. From the novel by Charlotte Brontë.
- KINDRED OF THE DUST. First National. 8 reels. Story of a man's devotion and faith, from the novel by Peter B. Kyne.
- LADY GODIVA. Pathé. 5 reels. Based on Tennyson's poem.
- LAST TRAIL, THE. Fox. 7 reels. All-star. Western melodrama with bandits, from Zane Grey's story.
- LES MISERABLES. Fox. 12 reels. Star: William Farnum. Tragedy of Jean Valjean, from the Victor Hugo classic.
- LIGHT IN THE CLEARING, THE. Hodkinson. 7 reels. All star. Small town story of honest politics; from the novel by Irving Bacheller.
- LION'S DEN, THE. Metro. 5 reels. Star: Bert Lytell. Rural church drama, from the short story by Orrin Bartlett.
- LITTLE LORD FAUNTLEROY. United Artists. 10 reels. Star: Mary Pickford. From the novel by Frances Hodgson Burnett.
- LITTLE MINISTER, THE. Vitagraph. 6 reels. Star: Alice Calhoun. From the novel by Barrie.
- LITTLE MINISTER, THE. Famous Players-Lasky. 6 reels. Star: Betty Compton.
- LITTLE RED RIDING-HOOD. Universal. 2 reels. Star: Baby Peggy.
- LONG CHANCE, THE. Universal. 5 reels. Stars: Walthall, Daw, Graves. Gambler's romance, from the story by Peter B. Kyne.
- LORNA DOONE. First National. 7 reels. Star: Edith Bellamy. From the famous romance by R. D. Blackmore.
- MEN OF ZANZIBAR, THE. Fox. 5 reels. Star: William Russell. From the story by Richard Harding Davis.
- MAN FROM HOME, THE. Famous-Players Lasky. Romantic drama of Italy and the U. S. from the play by Booth Tarkington and Harry Leon Wilson.
- MISS LULU BETT. Paramount. 7 reels. Star: Lois Wilson. Story of spinster in small town; from the novel by Zona Gale.
- MISSING HUSBANDS. Metro. 7 reels. Spectacular and mystery story; from Pierre Benoit's romance "Atlantida."
- MONTE CRISTO. Fox. 10 reels. All star. Melodrama of Edmond Dantes' imprisonment and revenge from the romance by Alexandre Dumas.
- MORALS. Famous Players-Lasky. 5 reels. Star: May

- McAvoy. Romance, from William J. Locke's novel, "The Morals of Marcus Ordeyne."
- MORAN OF THE LADY LETTY. Paramount. 7 reels. Stars: Dorothy Dalton and Rodolph Valentino. Adventures of shanghai lad on Pacific sailing boat; from the story by Frank Norris.
- MYSTERIOUS RIDER, THE. Hodkinson. 6 reels. All star. Melodrama of cattle rustling; from novel by Zane Grey.
- NO TRESPASSING. Hodkinson. 7 reels. Star: Irene Castle. Romance of stock deals with Cape Cod scenes, from Joseph C. Lincoln's novel "The Rise of Roscoe Paine."
- OLD SWIMMIN' HOLE, THE. First National. 6 reels. Star: Charles Ray. Based on James Whitcomb Riley's poem.
- PENROD. First National. 8 reels. Star: Wesley Barry. Comedy boy drama; from Booth Tarkington's stories.
- PRISONER OF ZENDA, THE. Metro. 10 reels. All star. Romantic drama of imaginary Balkan kingdom, from Anthony Hope's novel.
- PRODIGAL JUDGE, THE. Vitagraph. 8 reels. All star. Drama of a judge turned tramp; from novel by Vaughn Kester.
- RAGS TO RICHES. Warner. 7 reels. Star: Wesley Barry. Revolt of a small boy against the restrictions of riches, from a story by Charles A. Taylor.
- RED COURAGE. Universal. 5 reels. Star: Hoot Gibson. Western, from Peter B. Kyne's story "The Sheriff of Cinnebar."
- RESTLESS SOULS. Universal. 5 reels. Star: Earl Williams. Comedy drama of pretended suicide of a man to cure his wife, from the story by Richard Harding Davis, "Playing Dead."
- RIP VAN WINKLE. Hodkinson. 7 reels. All star. From the story by Washington Irving.
- RIVER'S END, THE. First National. 6 reels. Star: Lewis Stone. Northwest drama, from the story by James Oliver Curwood.
- ROBINSON CRUSOE, ADVENTURES OF. Universal. Serial in 18 episodes of two reels each. Star: Harry Myers. From the story by Daniel Defoe.
- SELF-MADE MAN, A. Fox. 5 reels. Star: William Russell. Humorous melodrama of Wall Street and a successful battle, from the stories by George Horace Lorimer.
- SENTIMENTAL TOMMY. Famous-Players Lasky. 8 reels. Stars: Gareth Hughes; May McAvoy; Mabel Taliaferro. Scotch costume romance from the two novels by Barrie.
- SHERLOCK HOLMES, ADVENTURES OF. Educational. 2 reels each. Star: Eille Norwood. A Case of Identity; The Copper Beeches; The Devil's Foot; The Dying Detective; The Empty House; The Noble Bachelor; The Priory School; The Red Headed League; A Scandal in Bohemia; The Solitary Cyclist; The Tiger of San Pedro; The Yellow Face.
- SHERLOCK HOLMES. Goldwyn. Star: John Barrymore. From the stories by Sir Arthur Conan Doyle and the play by William Gillette.
- SILAS MARNER. Pathé. 7 reels. All star. Drama closely following George Eliot's story.
- SILVER CAR, THE. Universal. 6 reels. Star: Earl Williams. English romance, from a story by Wyndham Martyn.
- SON OF WALLINGFORD, THE. Vitagraph. All star. Comedy drama; from the stories by George Randolph Chester.
- STROKE OF MIDNIGHT, THE. Metro. 6 reels. Story of the redemption of a man down and out, with supernatural features, from Selma Lagerlöf's story "The Waggoner of Death."
- THREE MUSKETEERS, THE. United Artists. 10 reels. Star: Douglas Fairbanks. Melodramatic romance adapted from Dumas' romance.
- TILLIE. Famous-Players Lasky. Star: Mary Miles Minter. Pennsylvania Dutch story; from novel by Helen R. Martin.
- TOL'ABLE DAVID. First National. 7 reels. Star: Richard Barthelmess. Realistic drama of southern hill country family feuds, from the story by Joseph Hergesheimer in his "The Happy End."
- TREASURE ISLAND. Fox. 6 reels. Stars: Francis Carpenter and Virginia Corbin. From the story by Robert Louis Stevenson.
- TWO KINDS OF WOMEN. Film Booking Offices. 6 reels. Star: Pauline Frederick. Experience of a young girl managing an inherited ranch, from the story by Jackson Gregory, "Judith of Blue Lake Ranch."
- UNDER TWO FLAGS. Universal. 8 reels. Star: Priscilla Dean. Romance of French Legion in Morocco, from Ouida's novel.
- VALLEY OF SILENT MEN. Famous Players-Lasky. 7 reels. Star: Alma Rubens. Western melodrama from the story by James Oliver Curwood.
- WHEN ROMANCE RIDES. Goldwyn. 6 reels. All star. Western romance with a wild horse and racing; from Zane Grey's novel "Wildfire."

The Doll Tableaux at the Forbes Library

AT the Forbes Library we have found the doll tableaux more attractive and effective than pictures for teaching the children about other countries and different periods.

Our first dolls, an Alsatian school boy and girl, were sent us from France by a friend who was collecting souvenirs of the war for the library. A wax doll was given by a lady leaving town. It was nearly fifty years old and, being dressed in a silk gown of that period, was considered too fine to play with, so had always lived in a glass case. Then two Puritan dolls were obtained from the "Olde Deerfield Doll Shop" for the Pilgrim tercentenary. A real Indian doll, which had once belonged to a Blackfoot child, an Indian chief and a squaw with a papoose on her back and an Esquimau were bought for us by a friend spending the winter in California. A Chinese lady was given by a missionary in China.

We exhibited them in a glass case which we had. This is thirty-six inches high, thirty-four wide and fourteen deep. It answers the purpose well, but would be better if it were a little deeper. When the Indian dolls were first shown, we used real little pine trees and the wigwam which came with the Olde Deerfield paper dolls. This suggested the painting of backgrounds for the doll case. These are

painted on cloth and follow the broad lines of scenery used in a theatre. We were fortunate to be able to get the scenic artist at our municipal theatre to do the work. The street of an Alsatian village was taken from "L'Histoire d'Alsace" by Hansi. A Dutch windmill with a small group of buildings by a canal we took from a book of stories of Holland. This, used with a Dutch doll and boat, gives a vivid picture of the country. The "Old Indian house" which stood the attack of the Indians on Deerfield in 1704 was copied from an old print. This makes an effective background for Stephen Williams and Thankful Stebbins, the Deerfield dolls, who are named for children taken captive at that time. We try to have both dolls and background accurate in order to bring to the children as much of the spirit of the period and country as possible.

We plan for at least one story hour given to the country or period that we are representing; and we post on the bulletin board pictures from the Art Department and a list of children's books on the subject. As far as possible we exhibit related material at the same time. Thus, when the Indian dolls were shown, we borrowed and exhibited some Indian curios. With the Chinese doll, we had an exhibit of Chinese children's clothing, toys and other articles in-

TWO OF THE FORBES LIBRARY'S DOLL GROUPS

teresting to children—all borrowed from friends. A friend in Chinese costume told the children about her trip to China at one of the stoy hours. The Dutch doll and boat were loaned by a teacher in the Art Department of Smith College. The same friend loaned two charming little dolls in eighteenth century costume which she had brought from England, and planned the background for the "room" in which they were shown. One of the art students carried out the idea.

Some of our dolls have been given to us and some we have asked friends to buy for us when abroad. So far we have only made a beginning. Our aim is to get enough dolls to enable us to co-operate with the geography teacher, so that when the children are studying a country they can be sent to the library not only for books, but also to see a scene in that country.

We have found the doll case useful for other tableaux also. At Thanksgiving we represented the first Thanksgiving. As the tables were set out of doors, we used our forest background. We loaded our table with turkey, venison, elms, etc. We used our Puritan dolls as Pilgrims, so Stephen as Governor Bradford conducted the Indian chief to the table and Thankful was a Pilgrim maiden who served. At Christmas we used the background we have for the Esquimau and had Santa Claus with his reindeer ust jstarting from the Northland with a sleigh load of gifts.

The possibilities of the doll case are limited only by our resources and our ingenuity and the popularity of the tableaux has been unbounded, girls and boys, even big boys, giving it equal attention.

MYRA L. BOYNTON, *Children's Librarian.*
Forbes Library, Northampton, Mass.

TAX foreign books, let publishers alone import their choice, brand them as they come 'Made abroad'—three thrusts in a year at the buyer of European publications. Alert or confiding, he must have been puzzled by these sudden attacks. Seemingly they all come from Washington, but Washington is a dial registering the nation's thought. When a bureau or committee moves, the impulse is external. This is the essence of representative government, and the response is noble or ignoble according to the motive.

The tariff, copyright and marking proposals above noted have a common origin. They all spring from the uneasy relations between publishers and printers. Here the fundamental demand of the printers and their allies is that American work shall be done in America.

They charge that American manuscript is being sent abroad for manufacture into books. To stop or discourage this practice they asked for a high tariff on *all* incoming books. Hence the Fordney tariff measure. But as their interest lay not in bona fide foreign publications, the A. L. A. compromise of one duty on such recent English issues and a higher one on those of American origin proved acceptable, while the Senate Committee rejected the plea of the publishers that the higher rate remain on both but be assessed on the invoice rather than the wholesale price, since the international publisher would thus gain a reduced duty against the raised one to the public.

The printers charged next that much of this foreign manufacture escaped general detection thru evasion of the marking law as customarily interpreted. A section of every tariff act for thirty years has required that imported goods be stamped plainly with name of country of origin in English. The imprints of books have been held to meet this requirement. But tricks are being played, it appears. Erasable markings and removable pages have been employed. Hence a demand that the law be literally enforced, and so the Treasury Decision that the marking be ineradicable and on the title page or cover. Unfortunately, this situation arose after tariff bill amendment was past. Doubtless a compromise like that effected in the tariff rate might have been accepted. Now the way out is very difficult.

Finally, if American work could thus be kept at home, the printers were willing to forego their former demand that foreign books also be manufactured here as a condition to United States copyright, and thus the path to American membership in the Berne Union would be cleared. But the publishers balked and insisted on a proviso annulling the public's ancient right of importation when an American agency had been established.

It is a pretty contest, but, as usual, when the operator publisher and the miner printer fall out and then sign a new schedule, the People are apt to have a bill to foot.

This Committee has in all three cases tried to do justice to all concerned. How hard, perhaps but few may know. Librarians may well continue to give it their confidence unsparingly and be assured that if a move is made there is a reason.

Children's Book Week in the Libraries

CHILDREN IN THE PROVIDENCE PUBLIC SCHOOLS SUBMITTED POSTERS FOR AN EXHIBIT HELD AT THE PUBLIC LIBRARY DURING CHILDREN'S BOOK WEEK. THE CHILDREN'S INTERPRETATION OF BOOK PUBLICITY ATTRACTED WIDE INTEREST IN THE COMMUNITY—THE PARENTS, THE CHILDREN THEMSELVES, THE PRESS

THE circulation of libraries in the state doubled with 600,000 to spare, as the result of the third Children's Book Week, wrote the Oklahoma Library Commission last fall, and reports scarcely less encouraging came from many other places in which the Week was observed.

Preparations are going forward for the fourth annual Week of correlated effort on the part of all organizations working for boys and girls for the encouragement of a love for books among children and the discussion of young folks' reading.

Every library, as the Children's Book Week Committee points out, can make some celebration of the Week.

Among practical suggestions for exhibits are the displaying of the Children's Book Week poster,¹ the distribution of lists of books recommended for the children's own book shelves, and exhibitions of such material as is readily available. Books recommended for purchase, for example, might be exhibited in the lobby or

open shelf room. Some of the new titles, new editions and replacements in the fall orders might be held for this exhibit and retail prices and a sign referring would-be purchasers to local bookstores might be given. Photographs of the children's own book corners and libraries would be contributed by the children themselves and the Children's Book Week Committee will award prizes of \$10 and \$5 respectively to the child sending the best and the second best photograph of his own book shelves with the list of books included. Actual bookcases made by the children are also suitable for exhibit. The Thomas Bailey Aldrich bookcase plan is here illustrated and others will be suggested by local manual training instructors or by books on carpentry.

Another contest is the essay contest, already popular everywhere. *Farm and Fireside*, 381 Fourth Avenue, New York, offers prizes of \$10, \$5, \$3 and \$2 for the best short letter about five books which the writer prefers. An announcement of this contest suitable for posting on the bulletin board, has been prepared.

The "pictorial" essay which had great success at Providence last year may be found as a pleasing variant. A talk about books good to own including readings from each book mentioned and giving some information about the author will be welcomed as an addition to the story hour.

Outside agencies will usually be found willing to co-operate, especially if sufficient time is given in which to make preparations. The librarian's advance notice of books recommended for purchase will help the bookstore manager to have those books in stock. The schools will be glad to observe the Week by arranging for book talks by local authors, book discussions and book essays in class rooms, book plays at school parties, bookcase making in the manual train-

SCALE 1/16" TO 1". STOCK 5/8" WHITE WOOD. NO BACK. HUNG BY CORD PASSING THRU HOLES AT TOP OF SIDES; CORDS SUSPENDED FROM MOLDING OR FROM MOORE PUSHLESS HANGERS

¹To be obtained from the Children's Book Week Committee, 334 Fifth Avenue, New York.

ing classes, and poster designing in the art classes. Local clubs will find useful the program prepared by the General Federation of Womens' Clubs given elsewhere in this number; scout masters will help to distribute posters, invitation cards, etc., and a scout day in the library may feature exhibits of camping books and pictures, western stories, etc., with a talk about books by the scout master or some local author. Announcements of the Week made early in October to ministers' associations meetings will probably produce announcements of library and bookstore exhibits and programs in the November church calendar. Local art museums might exhibit illustrations of children's books and a talk in the library or at the museum by the art institute director on the making of beautiful books for children would be appropriate. Recent and forthcoming magazine articles are numerous. Some of these are listed elsewhere in this number, as are motion pictures suitable especially for young people, selected by the National Board of Review of Motion Pictures. "Stills" from the book films running at the local theatres will afford the library good exhibit material. The newspapers will probably give space for plans, lists and exhibits, and press releases for newspaper publicity are being distributed by the Children's Book Week Committee.

Other material available thru the Committee are: the Jessie Willcox Smith poster (please state number required); cards with a miniature poster on the face, blank reverse, suitable for

local printing of lists, invitations or programs; streamers reading "Happy is the Child with Books;" circulars of suggestions for librarians or teachers and for booksellers, the Club program prepared by the General Federation of Womens' Clubs and the book film list prepared by the National Board of Motion Picture Review.

The Library at a National Convention

TO bring directly to the 2,000 delegates in attendance at the National Safety Congress the activities of the Library and Information Bureau, to show what the library service is and how it may be used; represent graphically recent developments in accident prevention and industrial health work; what the 3,500 members are accomplishing; what new government, state and city reports have been issued and what are the forthcoming safety codes, etc.; and to do a certain amount of reference work—these are the problems which Librarian Mary Bostwick Day set out to solve by the exhibit held in the new Cass Technical High School, Detroit, August 28th to September 1st.

Attractive hall exhibit cases were used, giving ample space to exhibit the fifty large dark green mats with the white lettering, which carried out the Council's colors, green and white. Books, pamphlets, charts, magazines, including a collection of member company house organs, were also in the cases.

THE LIBRARY JOURNAL

TWICE-A-MONTH

OCTOBER 1, 1922

CHILDREN'S Book Week is November 12-18. Don't forget. Make ready in advance. See that everybody co-operates—teachers, ministers, booksellers, and people generally. Use the telephone freely as is suggested by practical experience recorded on another page. Invite children to bring their parents and parents to bring their children. Thus Children's Book Week will be a greater success than ever, which is saying a good deal.

★ ★ ★ ★ ★ ★ ★

THE awakening of the South to library interests should be quickened by decision to hold the next A. L. A. conference at a place which will be a convenient centre for librarians from the several Southern states. The second gathering of Southern librarians, at Signal Mountain, near Chattanooga, to be held next month, will be a happy prelude to the general conference, and should be the means of assuring an adequate attendance from the South at the general meeting. Arkansas Hot Springs has been favorably mentioned as such a centre, and might be the starting point for a tour thru Texas to inspect the libraries in that great state, which are foremost in library progress in their part of the world. Dallas and San Antonio in that state, are also under consideration, and invitations have been given or are expected from other important centres in the South, as from Memphis, Atlanta, and Asheville. It is interesting to note that the regional meeting at St. Joseph, Mo., will be the first official response to the change in the A. L. A. constitution which provides for such regional meetings. Of course there have been many interstate conferences, notably that at Atlantic City, for twenty-five years past, but these have not hitherto been in direct relation with the A. L. A.

★ ★ ★ ★ ★ ★ ★

THE "library week" in New York, successfully celebrated at the Thousand Islands, last month despite inadequate hotel accommodations, has always attracted an important library assemblage, usually including librarians from other states, and is another example of the value of meetings which are neither so comprehensive in program nor crowded in numbers as the gatherings of the A. L. A. and

thus give more opportunity for individual relationship, and the making of acquaintances. The papers at this Alexandria Bay conference and the talks there were perhaps most interesting to the smaller libraries, and this is an example to be encouraged and followed. A chief use of regional and state meetings should be to initiate the "smaller librarian" into the spirit of the library profession, and in some measure to deal with the minor library problems which were uppermost when the A. L. A. began its work nearly half a century ago. There must always be new libraries and new librarians coming to the front in this growing country, and it is of first importance that they should be early inoculated with a very lively kind of library bacillus.

★ ★ ★ ★ ★ ★ ★

THE doll is a personage of social importance, already finding place in museums, and now looking forward to library usefulness. The most ancient form of doll theatre was illustrated by Mr. Tony Sarg, when at Asbury Park he delighted library grown-ups with his marvelous marionettes. One of the most remarkable collections of dolls is at Wenham, Mass., for which an official residence is to be provided, and the Alden and other collections have made useful pilgrimages from place to place. The Children's Museum in Brooklyn, connected with the Brooklyn Institute, and including a Children's Library, has one room devoted to American history, in which doll figures, with suitable background, represent important episodes in our national annals. The Forbes Library at Northampton, as described on another page, has utilized a collection it is making, for the direct purposes of the Children's room, and it is evident that dolls, geographic, historical, or other, may be a useful means of interesting the little folk. Children's librarians may indeed put the doll to many good uses cognate with library aims, as in having doll parties in which the dolls are dressed to represent well known characters in books, but there should always be caution against "dolling up" over much, and forgetting that after all it is the book and not accessories that should be the chief instrument and aim of the children's room.

THE gentle satirist, at present in the succession as the Librarian of the *Boston Transcript*, pokes amiable and amusing fun at the organization of "Friends of Reading" in Syracuse, in a recent issue of the "Tea and Toast" representative of the "Hub of the Universe," as Boston was once known. The pleasantry will do no harm, and will be appreciated by librarians without the capital "L" as well as by other readers, and will not discourage the "Friends of Reading" either with or without capitals. But the idea of local associations of this kind and under this well chosen name, should not be laughed away. In the

smaller cities and in the larger country towns, such an organization may very usefully come to the help of libraries in many ways, from encouraging a taste in reading to stimulating their citizenry to larger pecuniary support of the library. Therefore, greeting to the Friends of Reading at Syracuse in the hope that the example may be followed in many places the country wide. It is good to note that the idea has taken well in Syracuse and that the initial meeting was highly successful in bringing together an important and representative gathering of citizens.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION REGIONAL CONFERENCE

A REGIONAL conference of the A. L. A. promoted by the Nebraska, Kansas, and Missouri Library Associations will be held at St. Joseph, Mo., Oct. 17-19. The tentative program provides for general sessions, group conferences, round tables, and business meetings of the separate state associations. Something of interest and benefit is being planned for all sizes of public, college and reference libraries. President Utley and Vice-President Malcolm G. Wyer will represent the A. L. A.; a large attendance is expected from Iowa, and librarians from Illinois, Arkansas and Oklahoma have announced their intention of being present. Headquarters will be at the Robidoux Hotel and reservations should be made directly with the managers of the respective hotels.

The rates (European plan) are:

Robidoux. (headquarters) Single room without bath \$2; with bath \$3; double room without bath \$3; with bath \$4 and up.

St. Francis. Single room without bath \$1.50-\$2; with bath \$2.50, \$3.50; double room without bath \$2.50-\$3; with bath \$3.50, \$4.

St. Charles. Single room without bath \$1.50; with bath \$2; double room without bath \$2.50, \$3; with bath \$3.50.

One and one-half fare round trip tickets on the certificate plan will be available for Missouri, Kansas, Nebraska, Iowa, Illinois and points in the Central and Southwestern Passenger Association territory.

This is the first regional conference to be planned under Section 22 of the By-laws of the A. L. A. providing that "The Executive Board may arrange for regional meetings to include such chapters or library associations as it sees fit to group."

SOUTHERN LIBRARIANS' CONFERENCE

A MEETING of southern library workers and others interested will be held at Chattanooga, Tenn., November 2-4 with headquarters at the Signal Mountain Hotel. The program will include round tables on such subjects as children's work, publicity, cataloging, county libraries and commission work, and book reviews. Exhibits of library forms, equipment binding, etc. are to form a feature of the meeting. Hotel rates (European plan) are: Single room and bath \$3.50 per day; double room and bath \$6 per day. Reservations should be made as early as possible with Miss Margaret Dunlap, librarian of the Carnegie Library at Chattanooga. RUTH M. BARBER, *Chairman*
Committee on Arrangements.

FRIENDS OF READING

"TO know the best that has been said and thought in the world" is the motto of the "Friends of Reading" who have for their aim library promotion in Onondaga County, N. Y.

With a view to increasing interest in books and the wise use of them the organization proposes: "Speakers to be ready to appear as representatives of this organization before clubs and societies, native and foreign, and schools. to advocate the cause; carefully considered plans for publicity—each member to do his part in the propaganda of increasing the interest in books."

The advantages include: Bulletins about books and subscriptions to publications of book and library interest to be included in the membership fee; a meeting occasionally; a congenial fellowship without burdensome obligations.

At the organization meeting at Syracuse on September 18th, which was well attended by

representative citizens, an address and readings were given by Frederic G. Melcher, secretary of the National Association of Book Publishers; a simple constitution was adopted; and officers were elected: Rev. Henry H. Hadley, rector of St. Paul's Church, president, Mrs. Carl E. Dorr, vice-president; Douglas E. Petit, treasurer of the Onondaga County Savings Bank, treasurer; Louis A. Keating of the W. Y. Foote Bookstore, financial secretary; and Librarian Paul M. Paine secretary.

The constitution provides that: "Any person may become a member upon election by the Executive Committee and payment of the annual fee of \$2; persons professionally engaged in the sale or library use of books may become members upon election at a club rate to be established by the Executive Committee.

"LIBRARY WEEK" AT ALEXANDRIA BAY

NEARLY three hundred persons were present at the 32nd meeting of the New York Library Association held at Alexandria Bay September 11 to 16th. Of these 25 were winners of State Meeting scholarships of this or former years.

After an address of welcome by the Rev. N. E. Fogarty of Alexandria Bay, "Libraries and Civilization" and the more specific subject of "The Library in a Democracy" were discussed by the Hon. Edward N. Smith of Watertown and by the president, Joseph D. Ibbotson of Hamilton College, respectively. Dr. Ibbotson urged that those fair words of democracy—liberty, fraternity, equality—be taken as honest slogans for the democratic library, pointing out that in the really free library aiming at intellectual freedom censorship of books will be undertaken with the utmost caution, the mere suspicion of propaganda either by inclusion or exclusion will be avoided, and equality of privilege, opportunity and responsibility will be given larger recognition.

The library in education was the main topic of the week.

"The Library's Part in Political Education" was the title of a short paper by Charles W. Spencer, Colgate University's librarian. Political education was described as a supremely important and complex social process in which many agencies participate. The maintenance and elevation of the standard of intelligence among great masses of voting population calls imperatively for the development of habits of more intelligent interpretation and discriminating judgment on the part of these masses. Acquisition of a wider range, and, above all, a more thoro command, of informa-

tion is a more reliable path of approach to the formation of such habits than the method of popular "crusades." The library's part in this process consists in effective co-operation with other educational agencies, and, while by no means spectacular in its appeal, is critically indispensable.

In order to present the ways in which the public library can help in workers education Robert T. Hill of the New York State Division of Extension Education outlined the development of the workers education movement, told something of the work of the Workers Education Bureau of America as a clearing house for information and an agent in the production of suitable books. The difficulty of finding the right book is diminishing, and Dr. Hill cited as examples of works written specially for the worker Henry Clay's "Economics for the General Reader" and Mary Beard's "Short History of the American Labor Movement," as well as the useful "series of modern constructive books on labor, science and literature for men and women of the labor movement, in preparation co-operatively by the Bureau and the G. H. Doran Company. Libraries may obtain from the Bureau pamphlets, reprints about workers education, a bibliography and posters on the "Worker's Bookshelf," so that in time to come workers may look to the libraries as they have begun to look to certain colleges and individuals and the statement of Secretary Milam in his "What libraries learned from the war" namely "The great majority of men under ordinary circumstances are not influenced directly by books and libraries" may be happily modified.

One whole day's meetings were devoted to the library and the school, discussion of which was opened by Ellen F. Chamberlayne's paper on the organization of the high school library toward enabling our citizenry not only to live but to live well. Miss Chamberlayne pointed out some of the ways in which the schools have already done much to this end and indicated further steps towards the library's broadening and enriching every department of the school, giving definite professional assistance to every teacher as well as providing stimulating reading for his leisure time, and help and inspiration for every pupil.

"The primary purpose of the school library," said Sherwin Williams, "is to lead the pupils to acquire a taste for reading that which is worth while in order that in all their after school life they will be likely to make their reading a source of both recreation and profit. A secondary but far less important purpose of the school library is its use to supplement the

study of geography, history, science and other subjects taught in school." It is in the grades that this work must have its foundation, for this habit, like all others, is best learned early; also but few children ever enter a high school, and to those who do the prescribed studies and the various forms of social life leave all too little leisure. Dr. Williams would like to see all schools interested in the reading certificates for the comprehensive courses planned some years ago by the Association of District superintendents which ensure a considerable variety of reading in the groups called: 1. Some Books for Young People. 2. Myths, legends and fairy tales. 3. Stories. 4. Historic fiction. 5. Travel. 6. Biographical. 7. Historical. 8. Out of doors. 9. Miscellaneous. 10. Poetry.

Much has been said at library conferences on how the library can help the school, and too little on what the school does for the library, said Walter L. Brown of Buffalo. Mr. Brown then outlined the "Buffalo plan" by which the schools give space to over a thousand class room libraries, thus offering an effective channel for library extension.

Other benefits which the school has contributed to the library was made clear in a paper on libraries from the viewpoint of a superintendent of schools read by Frank Tisdale, Watertown's superintendent of schools. One of these is the elimination of illiteracy, the creation of a reading nation. Another is the early establishment of the school library which in many cases became later the public library; and a third the development often in the rural school of gifts which lead to the possessors acquiring high professional or business position and wealth, which in not a few cases have been devoted to the development of public libraries.

A somewhat detailed résumé of a questionnaire sent to some forty superintendents and principals regarding the conditions of the school libraries given by Mr. Tisdale showed that there is much organized effort towards the establishment and improvement of the school library. Books are for the most part adapted to the needs of the school, chosen from lists issued either by the Education Department or other carefully selected lists, by the librarian or the principal. Replies show that on the whole the high school seems to be somewhat better cared for in this respect than is the elementary school which avowedly is receiving inadequate attention.

The development of the public school system of New York State was discussed by Deputy Commissioner F. B. Gilbert, who outlined conditions existing prior to 1912 when an act was passed providing for state aid by common

schools in organized districts. This act did not make the schools free to all children residing in such districts, a condition resulting from the act of 1851, which provided free schools for children whose parents were not able to provide for their instruction, and from that of 1867, which ensured that the entire expense of school maintenance be met by tax levy, and from the enactment of 1895 which made mandatory the provision of a system of free common schools for all children of the state. Dr. Gilbert spoke in some detail of the acknowledged defects of the present system and referred to proposed changes in the law relative to city school administration and to improvements for rural schools.

The Scholarship dinner which forms the central feature of Library Week was presided over by Paul M. Paine.

State meeting scholarships were awarded as follows:

Group A. Pop. Under 500. Mrs. L. B. Lougee, Marilla; Mrs. Fanny M. Preston, Roxbury; Mrs. Ann B. Coats, Richburg.

Group B. 500-1000. Mary E. Peacock, Waddington; Alice M. Curtis, Marion; Mamie T. Beals, Lime.

Group C. 1000-2000. Mrs. Elizabeth P. Hopkins, Montour Falls; Ettie C. Hedges, East Hampton; Dorothy M. Emmel, Millbrook.

Group D. 2000-5000. Alma L. Jones, Coxsackie; Florence S. Hall, Canton; Nellie H. Willis, Canastota.

Honorable Mention: Mrs. Caroline S. Johnson; Dorothy Payne, Shelter Island; Mary Hubbell, Caldwell-on-Lake George; Mrs. Jenny Scanlon, Keene Valley; Mrs. E. May Chrisler, Marcellus; Mrs. Arling P. Baker, Andover; Emma Piehl, Westfield; Lillian A. Achilles, Albion.

After dinner, Mrs. Albert Durand (Ruth Sawyer) spoke briefly on the story hour and delighted her audience by her telling of several stories.

Following came "Itsa," a one-act play by George Hibbard and Marjorie Taber, presented by the Buffalo players. This was the first of the week's series of playlets, to which the Brooklyn players contributed "Suppressed Desires" and the New York players William B. Gamble's "The Jolt."

The after dinner speaker on Thursday was Professor Burges Johnson, whose lay ideal of a librarian is one that might also serve as a professional ideal. In any town, however small, one hopes to find at least three people who are not provincial, three people whose horizons are not bounded by the village landmarks: the clergyman, the schoolmaster and the librarian. A provincially minded librarian should be an impossibility. With breadth of vision ought to come widened human sympathies, humor and discernment, and on this foundation the speaker constructed in more detail his ideal of a librarian, which demands three loyalties: loyalty to

SUPREMACY IN CHILDREN'S BOOKS

Of the nine hundred and one titles in the "Graded List of Books for Children" prepared by the Elementary School Library Committee of the National Educational Association, and issued by the American Library Association, one hundred and thirty-six, or fifteen percent of the whole, are Houghton Mifflin Company's publications as against a total of seventy titles for the publisher having next largest representation.

This lead of nearly two to one in what is probably the most definitive list of the best juveniles that has been published, confirms the selection made by the New Jersey Public Library Commission whose "Thousand Good Books for Children" contained one hundred and twenty-three Houghton Mifflin Company titles, or over twelve percent of the total.

We are particularly glad to bring this record to the attention of librarians as confirming once more the guarantee of quality implicit in the Houghton Mifflin Company imprint on children's books.

the job, loyalty to the community and loyalty to self, amplifying happily each of these with explanation and anecdote.

The illuminating talk on A Newspaper Library and Scraparium by Lee A. White, chief librarian of *The Detroit News*, will be given shortly in the LIBRARY JOURNAL as will also the paper on the motion picture in the service of the library by William F. Jacob, librarian of the General Electric Company, and Dr. Shearer's discussion of the library's part in collecting local history.

In the fall number of *New York Libraries* will be found the paper by Frank L. Tolman which supplemented the account of the progress made in a special effort of the New York State Library to extend the borrowing of books to the six hundred libraries connected with it, given by Librarian James I. Wyer.

Noon hour round table meetings formed as usual an important feature of the meeting. Mary Eastwood of the New York State Library had charge of the book selection section and Jacqueline Overton of the New York Public Library of the children's work section which devoted one day of informal discussion of new children's books, one to story telling from picture books and one to clubs and books for older boys and girls and the fourth to bringing the school closer to the library thru visiting classes, etc. The classification and cataloging problems of the small library were discussed under the leadership of Mildred H. Pope; those of the school library by Ellen Chamberlayne of the Binghamton High School; and house keeping problems—what to mend and how; what is dead timber and what shall we do with it—by Mrs. Eliabeth W. Blackall of Oneonta. The unusually varied and attractive exhibitions included the New York State Library's collection of best books of 1921; the State Library School's mounted collection of photographs of public libraries in New York State; a display by the H. R. Hunting Company of the A. L. A.—N. E. A. two-foot bookshelf in various editions; of new and standard devices by the Library Bureau, Gaylord Brothers, the Mutual Binding Company; some new books by Longmans, Green Company and some standard sets by the H. W. Wilson Company.

Probably the most important business transaction of the meeting was the decision of the Association to affiliate with the A. L. A. as a chapter.

Resolutions adopted were: An expression of deep sorrow at the death of Mrs. Melvil Dewey; a petition to the State Fuel Commissioner urging preference for public libraries so as to ensure uninterrupted service; endorse-

ment of the project of restoring Louvain University Library by America; and appreciation of the efforts of all who had contributed to the Scholarship Fund and of all who had helped to make the meeting a success: the many speakers from outside the membership, the Grosvenor, Brooklyn and New York dramatists and performers, the talented singers from Utica and Brooklyn, and the management of the Hotel Westminster for its care for a more-than-capacity conference.

Officers elected are: President: Augustus H. Shearer, Grosvenor Library, Buffalo; vice-president: Mary Eastwood, State Library, Albany; secretary: Margery C. Quigley, Free Library, Endicott; treasurer: Carl L. Cannon, New York Public Library.

LIBRARY CALENDAR

- Oct. 2-3. At Devil's Lake. Annual meeting of the North Dakota Library Association.
- Oct. 2-4. At Duluth. Minnesota State Library Association meeting.
- Oct. 9-10. At Milwaukee. Annual meeting of the Wisconsin Library Association.
- Oct. 12-14. At Yankton, S. D. meeting of the South Dakota Library Association following a three days institute for untrained librarians.
- Oct. 12-14. At Berea. Kentucky State Library Association meeting.
- Oct. 17-19. At St. Joseph, Mo. Headquarters at the Hotel Robidoux. Regional conference by the A. L. A. promoted by Nebraska, Kansas and Missouri Library Associations.
- October 19-21. At Chicago. Illinois Library Association's annual meeting. Headquarters at the Chicago Beach Hotel.
- Oct. 23. At Cedar Rapids. Annual meeting of the Iowa Library Association. (Date subject to change).
- Oct. 24-25. At Flint. Annual meeting of Michigan Library Association.
- Oct. 24-26. At Van Wert. Annual meeting of the Ohio State Library Association.
- Oct. 24-27. At Altoona, Pa. Keystone State Library Association. Headquarters at the Penn-Alto Hotel.
- Oct. 25-27. At Brattleboro, Vt. Annual meeting of the Vermont Library Association.
- Oct. 25-27. At Austin. Annual meeting of the Texas Library Association.
- Nov. 2-4. At Chattanooga (Tenn.) Headquarters at the Signal Mt. Hotel. Conference of southeastern librarians and others interested in library work.
- Nov. 15-17. In Indianapolis. Annual meeting of the Indiana Library Association and of the Indiana Library Trustees Association.

ABINGDON

Forceful Pages

NOW and again we need to hear some clear voice call us to a realization of the finer emotions of life, to stir within us a consciousness that we may be building a lop-sided heritage for tomorrow's citizens.

From the Abingdon Press have come some sincere volumes written by people with a fine understanding of what is worth while.

These books are offered because they will abide with the intelligent reader through many profitable hours.

SHADOWS ON THE WALL

By F. W. Boreham

In his brief introductory note to this volume of his delightful essays the author remarks, by way of explanation of its title and characterization of its contents: "The figures that float across these pages are like shadows dancing on the wall. They show that life is crowded with realities and flooded with radiance, for without substance and sunshine there can be no shadows."

Price, net, \$1.75, postpaid.

THE INEVITABLE BOOK

By Lynn Harold Hough

This charming volume comprises a series of stories of the fashion in which men and women from the most varied groups met the time of crisis in their lives. Each comes to the decisive hour in need of a living word to be spoken from somewhere and in each case the word comes from one compelling, powerful Book. These stories show how that Book lives again in lives made different by its presence.

Price, net, \$1.25, postpaid.

THE VALIDITY OF AMERICAN IDEALS

By Shailer Mathews

In this discussion of the history and significance of America, Dean Mathews attempts "to help the generation that bore the brunt of the war to take up the course of development interrupted by that great tragedy."

Price, net, \$1.25, postpaid.

THE IDEALS OF FRANCE

By Charles Cestre

How much does the world owe to France? Which is the debtor, France or the world? These are really the fundamental issues discussed in these lectures. No more timely topic could be considered. In respect of content and style of treatment Professor Cestre's Ideals of France is a volume of first importance. One who would understand the heart and mind of France must needs know this book.

Price, net, \$2.00, postpaid.

ROOSEVELT'S RELIGION

By Christian F. Reisner

Many books have been published relating to various phases of the life, character and services of the late President Roosevelt, but this is probably the only book that devotes itself exclusively to his religion, which was such a definite element in his life. This book emphasizes, in a very convincing way, by comment, extract, illustration and argument, the place and power of religion in Roosevelt's life, both domestic and public.

Price, net, \$2.50, postpaid.

LIBRARY WORK

MAPS, THEIR CARE AND CATALOGING

THIS is the title of Rudolph Armbruester's paper on the Grosvenor Library's methods, read at the Detroit Conference. Books, atlases and magazines are cataloged and filed in the regular manner. An extra card of each of these publications is furnished to the geographical department, which prepares, in some cases, especially if these publications contain maps, analytical cards. Sheet maps are accessioned, cataloged, and filed in the geographical department. The numbering system is based upon ten index maps, of which there is one of each, namely: Canada; United States; Mexico; Central America and the West Indies; South America; Europe; Asia; Africa; Australia and the Islands of the Pacific; North Polar Regions; and the South Polar regions. On these index maps the border lines of the maps are indicated in colors, and the maps numbered in consecutive order, each index map beginning with the number one. The number of the map is written in the lower left hand corner of the index lines. By this system the index map shows at once whether the library has maps on file covering the desired territory.

The index card contains the description of the map, the name of the index map, the number on the index map and the number of the drawer of the filing cabinet, or the shelf number in case the map is another publication.

The card index is divided into three sections: Number Index, Author Index, and Subject Index. This index contains also the Armbruester's GI cards, the analytical index cards for geographical magazines.

In order to save space the maps are filed according to size in a steel cabinet of 48 drawers, ranging from 18 in. x 23 in. to 52 $\frac{3}{4}$ in. x 64 in., with an inside height of 2 inches. From 5,000 to 6,000 sheet maps can be filed in this case, for which a floor space of only 45 square feet is required. The maps are marked with a rubber stamp: Grosvenor Library. Asia No. 14 Map Case Drawer No. 5. Sheet No. 3.

In order to furnish people with easy access to maps which cover territories and subjects of present or daily interest, a display fixture of 35 wings, each 82 in. x 54 in., equal to a display area of 2152 square feet, is used.

Maps are filed flat, in strong manila paper covers, with the numbers on the maps marked on the outside. Very large wall maps are on spring rollers in Nystrom's Rotary Cases.

The Library of Congress System is followed for the United States Geological Survey Topographical Maps. That is, the maps are arranged by states and pasted at the top in loose-leaf manila books, size 20 by 25 inches, not more than three maps on a page, with an index map in the front. Old maps are also filed in these loose-leaf manila books, by territories and year, thereby forming historical atlases.

The aim is, if possible, to have the official maps on file, one on a small scale as a general map, and one on the largest scale obtainable; also, maps showing special features, as political, physical, racial, historical, statistical, industrial, etc.

THE RECORD OF SCIENCE

ADVANTAGE more of age than of enterprise, geographical smallness as contrasted with continental sweep and range has enabled Europe to build up stronger scientific libraries than America can boast, declares William Warner Bishop in a paper on "The Record of Science," in *Science* for August 25th.

Elimination of competition and agreement among scientific libraries on the limitation of the several fields of specialization can be the only remedy for American libraries. A half-dozen rare or expensive sets spread over the country should suffice with the development of the inter-library loan and of photo-duplicating machinery. The agreement between the Chicago libraries made in 1895 has been carried out since to the lasting benefit of scholarship, says Mr. Bishop. In twenty years he hopes to see the University of Michigan library part of a regional group of libraries, owning its share of the minor society publications and journals, with a fairly complete whole ready for rapid use, sent out every few hours by air-mail in response to wireless telephone requests. It should have a complete printed list, kept up to date, of all the periodicals and transactions, perhaps all the books, available both in the libraries of the region and the whole United States. It should also have a bibliographic equipment which will furnish with the minimum of effort a practically complete list of all articles and books on any topic, arranged in inverse chronological order, the latest to appear coming first. For it is apparent that sooner or later America must assume the burden of indexing scientific, indeed all learned, literature, as post-war conditions have halted European bibliographical enterprises.

Are These Books On Your Shelves?

THE TECHNIQUE OF THOMAS HARDY

By Joseph W. Beach

A new study of Hardy's novels for all lovers of English literature. A critical volume on novel-writing which will give the reader a greater appreciation of good books. \$2.50 net.

EDUCATION FOR BUSINESS

By Leverett S. Lyon

For the man who wants to know how business courses are taught today, considered in the light of the results that should be attained through proper division of work. \$3.50 net.

THE COMMUNITY CHURCH

By Albert C. Zumbrunnen

A new volume for those interested in the practical part the community church is able to play in the religious life of today. Full of suggestions and illustrated examples of what is being done in this field. \$1.50 net.

THE RURAL MIND AND SOCIAL WELFARE.

By Ernest R. Groves

The movement of population from country districts to the cities and the new economic and social problems of the rural peoples makes this study of the psychology of the country dweller especially important. \$2.00 net.

BAKER, Mary N., 1910-11 N. Y. S., resigned her position in the Circulation department of the Seattle Public Library to reorganize the traveling library work and to become supervisor of the Lending department of the Ohio State Library.

BAYER, Edna E., 1915 N. Y. S., of the Rochester (N. Y.) Public Library, is now in charge of the Jefferson Junior High School Library of Rochester.

BEDLOW, Elinor, 1917 S., appointed librarian, and Helen Weatherhead, 1921 S., cataloger, of the National Bank of Commerce, New York.

BERRY, Ethel I., 1911-12 N. Y. S. has resigned the librarianship of the Public Library of Oil City, Pa., to take charge of the Franklin Avenue branch of the Minneapolis Public Library.

BLESSING, Arthur L., 1917 N. Y. S., recently resigned as Corps librarian at Fort Benjamin Harrison to succeed Edwin Wiley as librarian of the Naval War College at Newport, R. I.

BLACKBURN, Bertha F., 1921 Ill., formerly head cataloger of the University of Tennessee Library, appointed cataloger of the Lincoln Library, Springfield, Ill.

CANNON, LUCIUS H., librarian of the Municipal Reference Library is joint author with William E. Rolfe, of "The Municipal Bridge of St. Louis; a record of municipal effort," which forms the August number of the *Monthly Bulletin* of the St. Louis Public Library.

COFFIN, Dorothy D., for the past eight months organizer under the Iowa Library Commission, resigned on September 15th to be married to Mr. Herbert Hickey of Hurley, New Mexico.

She is succeeded by Margaret A. Gramesly, of Charleston, Ill.

COUNTRYMAN, Gratia A., is the subject of the biographical sketch and frontispiece of the May-August *Bulletin of Bibliography*.

CRAIGIE, Annie L. 1916 S., appointed librarian of the U. S. Veterans' Bureau, Hospital 35, St. Louis, Mo.

DARBY, Claire, appointed librarian of the Engineering Library of Columbia University.

EDWARDS, Mrs. Sarah Scott, 1916-17, N. Y. S., appointed reference librarian at the State University of Iowa, Iowa City.

HAMILTON, W. J., since 1917 secretary of the Indiana State Library Commission, appointed librarian of the Gary (Ind.) Public Library, in succession to Louis J. Bailey.

HEDRICK, Ellen, appointed reference librarian in the U. S. Department of Agriculture Library.

HIGGS, Marguerite, 1918 S., is organizing the high school library at Kinston, North Carolina.

HODGSON, James, 1917 N. Y. S., appointed assistant librarian of the University of Arizona Library.

HARDING, Elizabeth B., 1919, N. Y. S., chief of the Circulation Department of Iowa State Teachers College Library, appointed librarian of the Rayen High School of Youngstown, Ohio.

FREEMAN, Marilla W., formerly librarian of the Goodwin Institute, Memphis (Tenn.) and recently of the staff of the foreign law department of the Harvard Law Library is now librarian of the main library of the Cleveland Public Library in succession to Louise Prouty who was promoted to the vice librarianship of the Cleveland Public Library.

As school librarians have been appointed the following: Margaret Ann Fife 1917 C. P.; Louise Hamilton 1916 C. P.; and Mrs. Eugenia Wilford Glenn 1908 C. P.; and as children's librarian Harriet W. Leaf 1915 C. P.

HAWKINS, Jean, 1902 N. Y. S., who has been for the past two years assistant librarian of the National Industrial Conference Board, has resigned to reside with her mother in the upper part of the state, and is succeeded by Mary Ethel Jameson, N. Y. P. L. 1912-14.

JACKSON, Anne W., librarian of the Illinois School for the Deaf, Jacksonville, Ill., is becoming known to the musical world as a composer of songs, says *Illinois Libraries*.

WHY PAY MORE?

The Nineteenth Century and After, The Fortnightly Review, The Contemporary Review, Blackwood's Magazine, Edinburgh Review, Quarterly Review.

Published and supplied by The Leonard Scott Publication Company are the Original English Editions. They are not "Just as good," or "The same"; they are the Original English Editions. Yet the saving in cost is nearly 50 per cent on the entire list.

Librarians and others interested in keeping down their expenses should specify Leonard Scott Editions for all these periodicals, and effect a substantial saving in money.

ANNUAL SUBSCRIPTIONS AND COMBINATION RATES

		U. S.	Canada
Nineteenth Century	any one	\$ 7.00	\$ 7.35
Contemporary Review	any two	13.50	14.00

JEFFERS, LeRoy, manager of the book order office of the Circulation Department of the New York Public Library and librarian of the American Alpine Club whose extensive collection of mountaineering literature and photographs is housed in that Library, is the author of a handsome volume just published by Dodd, Mead, entitled "The Call of the Mountains," rambles among the mountains and canyons of the United States and Canada.

NORTHEY, Della Frances, supervisor of school libraries for the Indiana Public Library Commission, appointed acting secretary of the Commission pending the appointment of a successor to William J. Hamilton, resigned.

STULL, Maud I., 1915-16 N. Y. P. L., school librarian of Kansas City (Mo.) appointed librarian of the Passaic (N. J.) Public Library, in succession to Edna B. Pratt who resigned at the time of her marriage to T. A. R. Woodlatte.

VAN KIRK, Ruth, C. P. 1918, appointed first assistant in the Schools Department, Carnegie Library of Pittsburgh.

WILLARD, Ruth, branch librarian at Kansas City and formerly instructor at the Western Reserve Library School, gave up her work to marry Willis Benton Kyle on September 3.

CURRENT LITERATURE AND BIBLIOGRAPHY

"The Compensations" is the title of Asa Don Dickinson's address at this year's commencement exercises of the Library School of the New York Public Library printed in the August number of the Library's *Bulletin*. It is, says the *Boston Transcript*, "a commonsense statement of facts which every librarian should know but which few do know." They are very pleasantly presented too.

The "List of English and American Sequel Stories" compiled by Thomas Aldred, chief librarian of the Hackney Public Libraries, and recently published by the Library Assistants' Association is being sold for the benefit of the Benevolent & Orphan Fund of the L. A. A. The list which contains over 5000 entries is published at 6/- net and may be obtained from the Hon. Secretary of the Association (which during the time the book was in press changed its name to Association of Library Assistants) Public Library, Bancroft Road, Mile End, London E. 1.

The third edition of "The World of Books," being "a guide to reading for young people in which may be found volumes of many kinds both grave and gay" compiled by Max J. Herzberg, head of the English department of the Newark (N. J.) Central High School has been published. The 64-page list is divided into four parts corresponding to the four years of the secondary school, and each year is further sub-divided into nine reading groups. Included are lists of "Great Men and Women," "Heroes and Heroines of History in Fiction," "American Poets and Dramatists," "Shakespearean Drama," "Letters and Letter-Writing," "Books of Travel and Description," "Johnsoniana," "Orators and Statesmen," "Modern and Con-

temporary Drama," "Older Drama," "Vocational Guidance," "Vocational Information," "English Poetry," "American and Contemporaneous Poetry," etc. (The Palmer Company, Boston. 30c.).

To the editor of the LIBRARY JOURNAL:

A plea to help a useful bibliographical undertaking comes from the publishers and the American editor, Professor Archer Taylor, Washington University, St. Louis, of the "Volkskundliche Bibliographie," compiled annually by Edward Hoffmann-Krayer. This is an extremely painstaking enterprise, giving the current bibliography not only of folk-tales, ballads, superstitions, witchcraft, proverbs and similar branches of folk-lore; but also material on peasant houses and their equipment, arts and crafts and costume—in short the whole social field comprised in the term "Volkskunde." Periodicals are indexed also, and there are author and subject indexes.

As a bibliographical tool it gives information not to be found elsewhere. Unfortunately the venture has been losing money, causing the publishers to threaten discontinuance. More subscriptions are needed; and as but few American libraries seem to know the work, I venture to draw attention to it.

The cost is moderate: M 7.40 for the volume covering the 1917 literature, M 20 for that of 1918; the volume for 1919 has just appeared. By subscribing to the work, American libraries will not only strengthen their own reference collections, but aid a worthy bibliographical enterprise.

GORDON W. THAYER,

Librarian of the John G. White Collection.
Cleveland Public Library.

SCANDINAVIAN ART

SCANDINAVIAN
ART

Until now there has been no book available in English to which either the critic or the layman could turn for comprehensive discussion of the artistic production of the three nations of the North. The volume SCANDINAVIAN ART is intended to fill this want. It gives in readable, well-ordered form, fully illustrated, and yet within the convenient compass of one volume, exactly what the American reader wishes to know about the art of Sweden, Denmark and Norway.

A SURVEY OF SWEDISH ART by Carl G. Laurin

DANISH ART IN THE NINETEENTH CENTURY by Emil Hannover

MODERN NORWEGIAN ART by Jens Thiis
INTRODUCTION by Christian Brinton

660 Pages, frontispiece in color, 375 illustrations,

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

Chivers Book Binding Company, Inc.,

Reducing The Library Fire Hazard

ALLSTEEL SHELVING IN LIBRARY OF
LELAND STANFORD UNIVERSITY,

In every library there are rare volumes long out of print, whose duplication would be difficult if not impossible. Storing such priceless works on flimsy, wooden shelves introduces a fire hazard that more than once has resulted in their total destruction.

GF Allsteel

LIBRARY SHELVING

Library books placed on ALLSTEEL Shelving have a better chance of preservation for present and future generations. Books themselves do not easily ignite. The danger lies in the surroundings. With ALLSTEEL Shelving there is no easily combustible material in proximity to the books.

ALLSTEEL Shelving reduces the probability of fire by eliminating combustible wooden shelving. And this is true even in libraries housed in buildings of fire-proof construction.

Write for illustrated literature.

THE GENERAL FIREPROOFING COMPANY
YOUNGSTOWN, OHIO.

“GLUEY”

A Refined Library Paste with the Tenacity of Glue

A creamy compound made from the finest adhesive ingredients imported from far off Asia, Australia, the West Indies and Cuba that is unexcelled. Its distinctive qualities make it the ideal paste for use in Public Libraries.

LIBRARY OPPORTUNITIES

POSITIONS WANTED

Trained librarian, college graduate, with experience in organizing wants position in New York. L. R. 17.

Wanted, position as children's or school librarian by trained librarian with experience in children's, high school and general adult work. A. C. 17.

Cataloger and reference librarian, library school graduate with experience in special and university libraries wants cataloging position in or near New York. L. O. 17.

Public school teacher, who has been principal of a ward school and who has had some library training, wishes position as library assistant. Mrs. L. B. Niles, Coldwater, Mich., R. R. 8, Box 28.

POSITIONS OFFERED

Chisholm (Minn.) a village of 9000, wants a librarian with library school training and experience especially in work with children and foreign born. Address Lillie Lilliequist, Librarian, Chisholm, Minn.

A first assistant is wanted in the Randolph-Macon Woman's College Library, Lynchburg, Va. Applicants should give qualifications, previous experience and references, and state salary that would be considered. Write to the Librarian.

Wanted, immediately, a library school graduate possessing adaptability for cataloging, for three months at least, temporary work, to catalog the library of a large consolidated rural school in northern New York. State salary expected. D. D. 17.

The Civil Service Bureau, St. Paul, Minn., announces the following examinations (residence requirements waived) to be held on November 27th: General library assistant, \$105; Reference librarian, \$116.80; Junior branch librarian, \$116.80; Senior branch librarian, \$138; Principal assistant (Reference Division) \$138; Hospital librarian, \$166.25; Sociology librarian, \$166.25; Technology librarian, \$166.25.

The salary limits for all positions are fixed by the City Council. The salary limits mentioned indicate the compensation for the respective positions on the date of this announcement.

For application blank, sample questions and further information inquire at the Civil Service Bureau, Room 413, Court House, St. Paul.

THE ARTISTIC CRAFTS SERIES

DRAWING FROM MEMORY AND MIND PICTURING. This is the only work in the English language dealing with the subject. The eminence of the author in the world of art makes the book of first importance. He gives his matured opinions and a series of remarkable results gained by methods he has devised. The book should find a place in the library of everyone concerned with Art if only for the beauty of the illustrations and the innate excellence of the book as a whole.

With 43 full page plates, \$3.00

EMBROIDERY AND TAPESTRY WEAVING. By Mrs. A. H. Christle. Third edition. 420 pp., 178 Diagrams and Illustrations by the Author. 16 pages of Collotype Reproductions. \$4.00

WRITING AND ILLUMINATING AND LETTERING. By Edward Johnston. Seventh edition. 512 pp., 227 illustrations and diagrams by the author and Noel Rooke. 8 pages of examples in red and black. 24 pages of collotype reproductions. \$3.50

DRESS DESIGN: AN ACCOUNT OF COSTUME FOR ARTISTS AND DRESSMAKERS. By Talbot Hughes. A handbook on historic costume from early times, containing over 600 Figures, 35 collotype reproductions of 100 specimens of genuine dresses, besides 80 scaled patterns taken from antique apparel, together with over 400 illustrations of headdresses and footwear. \$4.00

HAND-LOOM WEAVING. By Luther Hooper. 368 pp., 123 drawings by the author and Noel Rooke. Colored and collotype reproduction. \$3.50

When Writing to Advertisers

The LIBRARY JOURNAL is of continuing service to its subscribers, as the many enthusiastic letters to the publishers attest. This appreciation of the editorial efforts of the magazine also extends, we are confident, to the advertising pages, in which the leading feature is always special service for the librarian.

Our advertising columns are heartily commended to the attention of our readers, who will find in each succeeding issue numerous suggestions in the way of supplies for the well-equipped library. It will be highly appreciated if in responding to announcements you will

Please Mention the Library Journal

COMPTON'S PICTURED ENCYCLOPEDIA

is endorsed by great educators

BELOW are a few excerpts from letters of endorsement written by men who are devoting their lives to education.

I wish that every home in America might have a set."

William B. Owen, Pres.,
National Education Association.

You have demonstrated that it is possible to be informing without being dry."

Edwin E. Slosson,
Author of "Creative Chemistry,"
"Easy Lessons in Einstein," etc.

I would like to see every boy and girl in America exposed to these books."

Albert E. Winship, Pres.,
Journal of Education.

INDIANAPOLIS PUBLIC LIBRARY
CHARLES E. BUSH, Librarian In Clear Street, INDIANAPOLIS

June 10, 1922.

F. E. Compton & Co.,
Chicago, Illinois.

Gentlemen:
 Compton's Pictured Encyclopedia is one of the best acquisitions we have made to the juvenile reference collection of the Indianapolis Public Library. The articles are interestingly written, concise, yet full of authentic information presented in a very readable style, and attractively illustrated. What more can one wish for an encyclopedia planned for children? There is something in it for the child of every grade in elementary schools and high schools. Adults in search of up-to-date information will find it a store of knowledge.

Very sincerely yours,
Carrie E. Scott
 Supervisor of Children's Work.

"As a practical Encyclopedia for young people, it has no rival."

F. E. Spaulding,
Head of the Dept. of Education,
Yale University.

"They were being read by my sons before they were in the house."

George D. Strayer,
Prof. of Education,
Teachers College,
Columbia University.

"Constitutes an object-lesson for all who teach, write or make books."

William C. Bagley,
Prof. of Education,
Teachers College,
Columbia University.

Write today for 100 free sample pages of Compton's Pictured Encyclopedia, which has been so enthusiastically received by educators and librarians wherever the books have been seen.

100 sample pages FREE

COMPTON'S PICTURED ENCYCLOPEDIA

Up to Date—New in text and treatment.

Every word written since the World War. **Pictured**—Pictures convey essential ideas; unnecessary parts of photographs removed. Thousands of pictures, one for every idea that needs a picture, 95% of which are in halftone or color. The only encyclopedia in which halftones are incorporated with the text they illustrate—right where they belong! Each picture makes a distinct contribution—specially written caption above and legend below make each picture tell its full story. Every one indexed. Pictures shown have been greatly reduced.

New Maps—Every one made since the World War.

Headings—That catch the interest and lead into the article.

Text—Composed in clear, vivid style to catch and fix the attention of the reader; but not written down to the child.

Comprehensive—All organized knowledge included.

8 Volumes—Unique Fact-Index makes this encyclopedia complete in 8 volumes.

Alphabetically Arranged—With Guide Posts to indicate the contents of each page.

For 100 Sample Pages Free,

Please address Dept. 3010

F. E. COMPTON & CO.

58 E. Washington St. Chicago

When hungry, the chameleon "lies low" with its color adjusted to its surroundings. When an insect passes by, the chameleon shoots out its long tongue, striking its prey with the skill of a trained marksman. The insect is seized to the tip of the sticky tongue and is drawn back and swallowed. A motion-picture camera caught the scene above.

If you were floating in space some thousands of miles away from the Earth, this is the way an eclipse would appear to you. The Moon, you see, has come in line with the Sun, and casts down its conical shadow. Complete darkness comes in only one comparatively small circle—in this case in the middle of the Sahara Desert in northern Africa. But partial darkness extends over a much larger area, where only part of the sun can be seen.

DISENCHANTMENT

By C. E. MONTAGUE

"The first book that tells the truth about the war. A book that sums up 'the ardors and endurance' of earth's great crisis. A book that shows sane and sweet knowledge of our poor, frail tough, bedevilled human nature. A book delicately and firmly written. If we tried to tell you how deeply moving and true we found Disenchantment, you might be alarmed. We have vision of Disenchantment selling as well as H. G. Wells does—passing from hand to hand, quoted, sermonized, becoming the fashionable topic of the season." *Christopher Morley.*

"Disenchantment has been called the best book about the war. It is that, and more. It is a commentary upon all wars among civilized nations. The magnificent English prose of Disenchantment overtops any that is being written today for beauty, for pungency, for calm reserve."—*Baltimore Sun.*

\$2.00

FROM MORN TO MIDNIGHT

By GEORG KAISER

The drama of a bank cashier who tosses away honor, home, family, the dull web of contented days which has meshed him—and absconds. In seven tremendous dramatic scenes, each word poignant with emotion, he is shown seeking desperately, in dissipation and in religion, for the consummate joy of life, for an apotheosis beyond mortality. The New York Theater Guild's success of Autumn, 1922, hailed by the metropolitan press as the greatest thing yet done by the Guild.

Illustrated with 7 scenes from the play. \$1.50

MEMORIALS OF ST. JAMES'S STREET: and Chronicles of Almack's

By E. BERESFORD CHANCELLOR

History of a famous London street during the 17th and 18th centuries, including much unknown gossip of the fashionable life of the times. \$4.50

THE FRENCH REVOLUTION: A Historical Sketch

By WALTER GEER

The swiftness of an outline and the intimacy of a biography. Walter Geer deals with men. He revitalizes, he recreates the people of revolutionary France, with all their passions, ideals, hatreds, and hopes. A history of unique vitality. Geer's recent great successes, *Napoleon the First: An Intimate Biography*, and *Napoleon the Third: The Romance of an Emperor*, have opened for him an enthusiastic public.

Illustrated. \$5.00

ITALIAN ROMANCE WRITERS

By JOSEPH SPENCER KENNARD

History of the Italian novel, showing its inter-influences with other European literatures, together with a panoramic view of the powerful new Italian romancers from Alexander Manzoni to Gabbrielle D'Annunzio. \$2.50

DEGENERATION IN THE GREAT FRENCH MASTERS

By JEAN CARRÈRE

A discussion of the art and life of Zola, De Maupassant, Chateaubriand, Balzac, Musset and other leaders of French literature, giving much new light on their habits of work and living. \$4.00

CHINESE NIGHTS ENTERTAINMENTS: Stories of Old China

Edited by BRIAN BROWN. Foreword by Sao-ke Alfred Sze, Minister from China to the U. S.

Magical tales of the East, strange stories of emperors, dragons and demons, for the first time collected and given to English readers. A book worthy in every way of a place beside Mr. Brown's recent *The Wisdom of the Chinese* and *The Wisdom of the Hindus.* \$2.00

GREAT PIRATE STORIES

Edited by JOSEPH LEWIS FRENCH

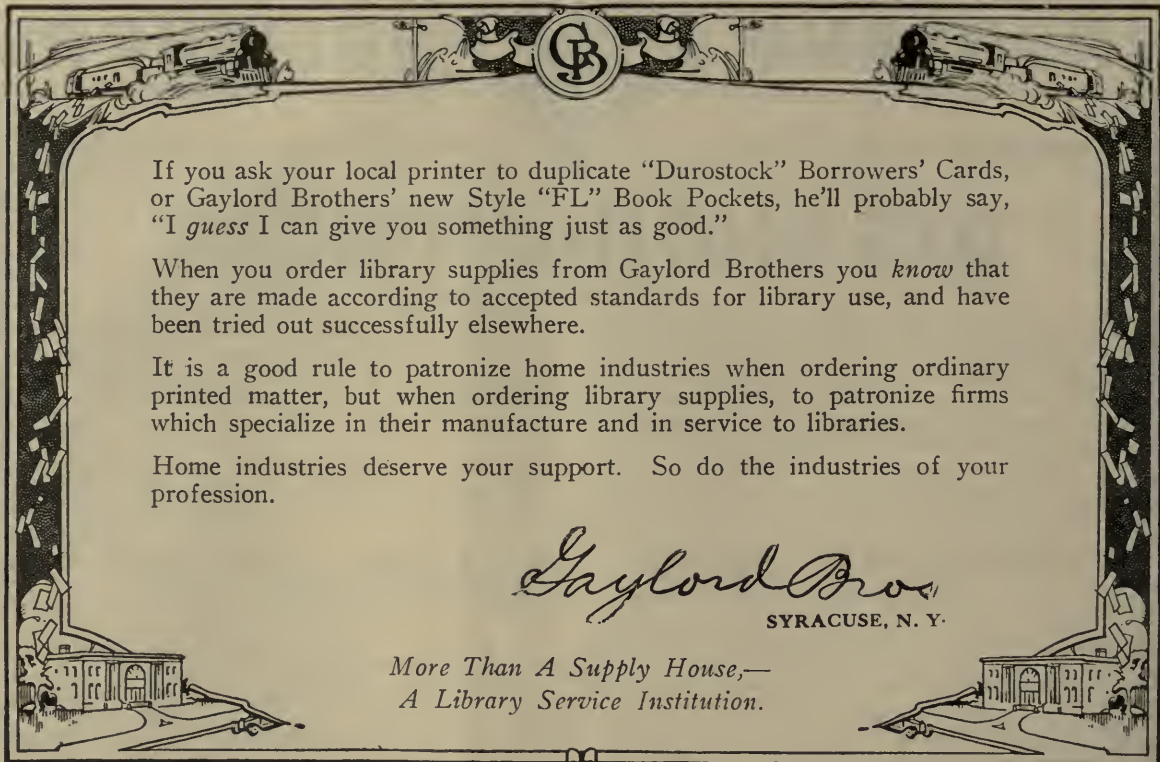

An anthology of masterpieces of literature dealing with pirates—tales of sea fights, land forays, wreck, pillage and buried treasure. A companion volume to *Great Sea Stories.*

Each story is complete. Each story is remarkable both for its narrative power and for its art in construction and wording. \$2.00

SWALLOWED UP!

By MRS. WILSON WOODROW

A lively mystery story of a beautiful young heiress captured on Fifth Avenue in open day by a powerful gang of murderers. The battles of wit and courage she undergoes to save her life and honor fill this book with excitement. A book that can't be laid down! Its characters stand out, true to life and to their various natures. You are tired of dull stories, and stupid stories, and mean stories, and vulgar stories. *Swallowed Up!* is filled with clean, abundant life. \$1.75

If you ask your local printer to duplicate "Durostock" Borrowers' Cards, or Gaylord Brothers' new Style "FL" Book Pockets, he'll probably say, "I guess I can give you something just as good."

When you order library supplies from Gaylord Brothers you *know* that they are made according to accepted standards for library use, and have been tried out successfully elsewhere.

It is a good rule to patronize home industries when ordering ordinary printed matter, but when ordering library supplies, to patronize firms which specialize in their manufacture and in service to libraries.

Home industries deserve your support. So do the industries of your profession.

Gaylord Bros.

NEW PUBLICATIONS

Applied Business Finance

By EDMOND E. LINCOLN, M. A. (Oxon.) Ph. D.

Sometime Assistant Professor of Finance,
Graduate School of Business Administration, Harvard University

IN this book, the author outlines the principles of financing which actually arise from day to day in the operation of the average business concern. The financial problems of business also are very definitely linked up with the changes in the Business Cycle, and much attention is given to the lessons which may be learned from the past five years. Moreover, the problems of financing are regarded from

the point of view of *business administration* and not as a separate end in themselves; and, hence, are studied in their relation to the problems of construction, purchase, production, distribution and consumption of goods. The long time outcome of various financial policies is constantly kept before the reader. About 750 pages. Cloth. Illustrated. Ready about November 1. *Net, \$4.*

Some Problems in Current Economics

By M. C. RORTY, M. E. E. E.

President, National Bureau of Economic
Research Inc., Assistant Vice-President,
American Telephone and Telegraph Co.

MR. Rorty presents here a stimulating discussion of many of the important social and industrial questions which have arisen in the distribution of wages, land rents, interest and profits. After describing the origin and growth of our present industrial system from its crude beginnings, he indicates the form that this system may take and specifically applies balance sheet methods to a discussion of the business cycle and the round flow of income and expenditure in the economic organization. 143 pages. Cloth. Illustrated. Ready about October 15. *Net, \$1.25.*

Applied Business Correspondence

By HERBERT WATSON

Advertising and Sales Specialist of New
York.

THIS book explains, illustrates and applies the underlying principles of successful letter-writing and tells specifically how to apply these same principles in writing your own letters. There are test questions to bring out clearly the points in each chapter. Key problems give actual practise in the most effective ways to apply the ideas of the book. The definite instruction which Mr. Watson gives you will help to write more effective letters. 598 pages. Cloth. Illustrated. Ready. *Net, \$6.*

American Railroads: Government Control and Reconstruction Policies

By WILLIAM J. CUNNINGHAM, A. M.
James J. Hill Professor of Transportation,
Graduate School of Business Administration,
Harvard University.

FROM his broad observation the author furnishes a current commentary on the rapidly changing situations in the operation of American railroads during the periods of Federal Control and Reconstruction. He gives a clear-cut analysis of current transportation problems, relates them to the underlying principles of economics and to historical background, and suggests some solutions. His discussion throws light upon many present-day problems in railroad management and public relations. 414 pages. Cloth. Ready about October 20. *Net, \$3.*

Problems in Export Sales Management

By HARRY R. TOSDAL, Ph. D.

Professor of Marketing, Graduate School of
Business Administration, Harvard University.

THIS book presents for analysis and decision a series of actual problems, gathered first-hand from a wide variety of concerns doing an export business. The author recognizes that fundamentally selling problems are much the same, whether one is engaged in domestic transactions solely or is dealing with buyers located in foreign markets; and he brings out at every opportunity the differences in circumstances upon which decisions are based. Cloth. Ready about October 20. *Net, \$5.*

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

Chivers Book Binding Company, Inc.,

OCTOBER 15, 1922

Questionable Books in Public Libraries—I

By LOUIS N. FEIPEL,

Editor of Publications, Brooklyn Public Library

AT the request of the Editor of the LIBRARY JOURNAL, the writer undertook to secure the views of a number of representative public librarians and State library commissioners on the subject of objectionable books in public libraries. A questionnaire was drawn up and sent to thirty-one public librarians and six State library commissions. Thirty-three answers were received, of which all but seven supplied useful information.

Among the reasons given by those not furnishing the desired information are: "Owing to the many things claiming my attention"; "Discussed it with one of the members of the Board of Trustees, who is Chairman of the Advisory Committee to the Purchasing Committee of Books and Magazines. . . [and] we reached the conclusion that the—Library did not care to take part in this symposium"; "From my experience, all discussion of objectionable books inevitably brought in the mention of specific books of this sort, and merely served to advertise them"; "The Librarian's absence from the Library"; "Our present state of mind in regard to it is so chaotic, and subject to change, that there would be no use in trying to record it"; and "One of this library's New Year's resolutions was 'Commit no questionnaire,' and a logical corollary seems to be, 'Countenance no questionnaire from others.'"

The great majority, however, seemed to look forward with interest to the publication of the results of this questionnaire; and nearly all of them appeared to have quite well-defined policies in regard to the subject.

The term "objectionable book," as used in the questionnaire, was understood to cover "suggestive" fiction of the type of which many examples from authors of repute are but too well known, books honestly or otherwise offering physiological information, the classics which are usually grouped in book-catalogs under the heads of *Erotica*, *Facetiae*, or "Curious," including unexpurgated editions of such works as the "Arabian Nights."

GENERAL POLICY

The Chicago Public Library authorities think they have evolved a working policy with the results of which they are well satisfied.

"In the case of novels written by reputable authors, published by respectable publishers, often printed serially in high-class magazines, and sold by established dealers, it is both futile and unwarranted for a public library to undertake an ex-post-facto censorship to the extent of refusing to provide them for the use of persons of maturity and discretion. The same public opinion that supports authors and publishers in the production of such books, operates to justify public libraries in making them available to that part of its public which is composed of persons of maturity and discretion who wish to read them. Books of the class under discussion are subject to the same selective processes as are applied by the library to all other books, and the decision for or against their acquisition must be based upon availability and general literary worth, without special or preliminary consideration of their ethical content. . . .

"In the larger public tax-supported libraries . . . this problem is affected by the rapidly increasing element of the population that has both the taste or interest to desire and the maturity and discretion to appraise and appreciate the work of reputable, often the best, writers, when they are preoccupied with abnormal psychologic or pathologic phases of life. This element . . . in the larger communities . . . comprises a considerable, and often a representative segment of the constituency of the public library. That institution, therefore, when it commands resources ample to supply, first, the best books for the greatest number, and, second, the best books, i.e., those of the highest literary worth without any of the above qualifications, has the plain duty of serving its patrons to the extent of its resources.

"Perhaps only the largest and wealthiest libraries possess the right to acquire all of the

best in literature, without reference to any more utilitarian considerations; tho this would seem to set up a sorry and sordid distinction. But surely these do have not only the right, but the duty so to do, and equally the right to invoke the prevailing and accepted literary and æsthetic canons as their guides in such acquisition. The librarian is, after all, the servant of his generation, and cuts a poor and visibly self-conscious figure when he attempts to assume a more censorial character.

"They—the large libraries—have, of course, the ancillary duty of devising such methods of distribution as will ensure the rightful use of the 'objectionable' among their books, by persons of maturity and discretion only; and the mandatory obligation of protecting the immature and indiscreet from the effects of wrongful use. This does not seem to us to be as difficult as it sounds.

"As a matter of fact, we have come to the conclusion that most of the works of contemporary fiction which may be regarded as fraught with danger or offense, contain within themselves a sufficient preventive against wrongful use to make them much safer than they appear to be. They do not often tell a good story in the elemental sense. There is little to attract the youthful and immature mind to their perusal unprompted. Their attenuated plots, depicting the actions and reactions of groups of neurotic and unexciting personalities, afford few thrills comprehensible to any not equipped with a complete psychology of experiences. In short, these books, against which we are so sedulously seeking to protect a definite portion of our readers, are for the most part inherently fool-proof in style, plot, and treatment, and may safely be left to themselves with as little agitation and advertisement as possible. The average young, untutored, simple-minded, or otherwise immature or unsophisticated person whom we here connote in no offending sense by the ancient and generic monosyllable employed above, will rarely get farther than page ten. And these, we assume, are the only ones we have to guard, or to guard against. People endowed with the discretion that comes with years, but whose moral concepts do not accord with the presentments of the modern fictionist, may be expected to exercise that discretion in their own behalf, conceding to their fellow citizens the same inalienable right.

"And so this library quietly examines and weighs all modern novels from the single standpoint of literary value, adding those which are found worthy, according to the standards of the time, and having regard as well for all the numerous classes of readers whom it professes

to serve. In common with most public libraries, it disclaims the office of serving the expert or the specialist to the fullest extent of his specialty, whether that be science, philosophy, or pornography. But in the service of the normal and average man, whose kind comprises the greatest number, it exercises sufficient latitude and assumes sufficient judgment to seek to supply all of his normal wants, stimulated or created tho they may be by influences, tendencies, and fashions that it had no voice in formulating. And tho we may deplore them, we have felt no vocation to assume the rôle of Mrs. Partington, and to employ our little broom, contrived for other ends, in a futile attempt to sweep back the waves of the sea. . . .

"This library has only a very small assortment of books that are segregated from the general collections. These comprise the handful whose titles have been handed down thru the generations as classics of pruriency, which every school-boy is tempted sooner or later to try to secure. In these cases it is not the character of the books, but their spurious ill-fame, that compels their seclusion. Fool-proof tho most of them are, by reason of their tedious and antiquated or highly specialized style, their evil repute has served to destroy their intrinsic character, and has rendered them a nuisance among books and a vexation to librarians.

"In the matter of the sex-hygiene books, the difficulties are plainly pathologic. The wrongful use of these harmless and wholesome manuals clearly betrays the person of perverted impulses, against whom and the gratification of whose aberrations society must be protected. For this reason alone, these books are held for restricted circulation, to such persons only as exhibit satisfactory evidence of normal tendencies and good faith. This is not a difficult problem to solve.

"We have intentionally refrained from mentioning book-titles in connection with this discussion, and suggest the wisdom of eliminating them from the published report of this investigation."

St. Louis omits all objectionable books that have no permanent informational or artistic value. Informational sex-books are purchased only on recommendation of the local association of the American Social Hygiene Society.

In—¹suggestive fiction is rejected unless it has literary merit or other qualities which appear to justify its purchase in spite of its objectionable features. Non-fiction discussing sex problems is selected carefully, with the aid of

¹ Wherever the name of a library is omitted, it means that the library in question preferred not to be quoted in this discussion.

authoritative reviews and advice of specialists. Most of the classics indicated are contained in the library, but are in one of the special reference collections, which is used mostly by special students, and is easy to control. Sometimes, as in the case of much advertised novels, purchase was deferred until after the popular demand was over, but ordered later at the request of some club or readers who wished the books for legitimate reasons.

Pittsburgh believes that books of an objectionable character which are useful in showing a phase of the life of a period, or are important from the standpoint of the evolution of literature, or have distinct literary merit, should be included among the resources of the library. Books purchased of this character, however, are placed under restricted circulation regulations. This basis of purchase is not interpreted to include the novel whose only claim to attention is its salaciousness.

The librarian in—believes that a library should have all classics, whether objectionable or not, as well as substantial medical works.

In the District of Columbia they are very strict in their choice of books for children, but try to be as liberal as possible in their choice of books for adults. The Librarian says: "We have a constituency perhaps as highly educated as any in the United States, and I am not disposed to go very far in the direction of deciding that such a constituency shall not have certain books which are on the market and allowed to go thru the mails. In making choices, there is always the individual judgment and the personal equation to be reckoned with. I distinctly do not think of myself as a public censor. If books have in them very much that is really disgusting, I am not ordinarily in favor of having such books. However, even among them their might be some that we would feel it necessary to have and to keep in locked cases. If I were to exclude all fiction that is suggestive . . . a very considerable percentage of the books now published would be excluded. Just now (April, 1922) I am somewhat concerned about the character of a large number of books on Freudianism that find their way into print and are asked for by readers. When I really come to face the question of excluding such books, or of refusing to buy them, I hesitate to take such responsibility. Perhaps we will have to meet the question by restricting their use. After all, is not the important thing to treat adult readers as tho they had grown up, and put the responsibility on them; and ought not the library to limit its responsibility to an attempt to keep objectionable books out of the hands of immature readers? In this matter we ought to have

better co-operation on the part of parents, and not be obliged to assume the responsibility entirely, as we are.

"I shall be much interested in your article. I hope your inquiry will not show that public librarians generally have become pruders or public censors; tho I confess that the 'strong stuff' now published gives strong provocation in this direction."

In Jersey City, the best and most important books on sex problems are placed in the library. "The unexpurgated editions of the classics, such as Boccaccio, etc., have not been placed in our library. The expurgated editions are sufficient for the needs of most of the students who patronize our library; and students who might have a legitimate need of the complete editions are so few, that we have never felt justified in placing such editions in the library. . . . The writer has been criticized by library patrons for having in circulation 'The Vicar of Wakefield,' 'The Three Musketeers,' and 'The Old Soak' by Don Marquis. On the other hand, some have complained because we did not circulate other books notoriously questionable, such as certain editions of Boccaccio and some books on sex."

The Librarian in Portland, Oregon, says: "Our policy, if we have one, is to be as broad as possible. . . . We are not trying to educate the people along these lines, but rather to safeguard young people whose morals might be affected. . . . Personally, I feel very strongly that the librarian's personal bias should not enter into the matter of the exclusion of books. If a book has sufficient literary merit to receive good reviews in creditable columns, it should be on the library shelves. What we should rule out, I think, is pure trash and pornographic literature." The general policy of the City Library Association, Springfield, Mass., is "to avoid the purchase of objectionable books, except in the case of books that are really noteworthy, of special literary merit, or otherwise valuable; but we mean to purchase, as a rule, current novels of real merit which perhaps would not be suited for general circulation. We do not consider sex-books objectionable, and of course we intend to own the classics. Current novels, unsuited to general circulation, which we purchase, are very few—hardly more than one or two a year."

Brockton, Mass., expresses itself as follows: "At one extreme, the library rejects outright books of slight merit. At the other extreme, it takes with almost equal readiness books of undoubted literary worth and substance, if they show any marks of permanence. This latter group are usually restricted in circulation, or, as we say, starred. In between these two ex-

tremes are naturally varying grades of books which we find it difficult to reject outright, or to put in general circulation. If we feel that a book is of sufficient literary merit or substance to add in spite of features which might be objectionable for young people or censorious readers, we purchase, and restrict its circulation."

At Indianapolis, in the case of objectionable books of literary merit, discussed seriously by reviewers of authority, for which there is a probable demand, the decision to purchase them is generally favorable, even tho they may be considered unsuitable for indiscriminate lending to young or inexperienced readers. "In the case of sex-books, an endeavor is made to have available enough of the best of these written for laymen or young people, discussing sex questions in a clear, serious, but non-technical way, such as those mentioned in the questionnaire or the approved list of the American Hygiene Association. Occasionally the more technical books on the subject are purchased for use by physicians and students in our medical department. As for classics grouped as 'Erotica,' etc., our purchase of these depends solely upon the legitimate demand, and the state of our book fund. We recently purchased for the general reference department a set of 'Arabian Nights,' unexpurgated."

The policy of the St. Paul Public Library is not definitely settled, the present plan being rather experimental. "Our objectionable books fall into four classes: (a) Sex-books and extreme socialistic books, which are in the Social Science Section; (b) Books of art anatomy, in the Fine Arts Section; (c) Books of obstetrics, biology, etc., in the Industrial Arts Section; (d) Suggestive fiction, in General Circulation. . . . Some persons object to our inclusion of objectionable books, others think we are too puritanical."

The Librarian of Denver holds common sense more highly than absolute consistency in the application of his library's policy. "Every book is judged on its intrinsic merits and value to a reading public, always remembering, however, the inability of the book fund to meet every need. If sex-books . . . are written by accredited, high-minded authors, and issued by publishers with ethical and professional standing, such books are purchased. Novels which reveal great artistry, and are written in a style to attract only sophisticated and experienced readers, are purchased even when they occasionally offend the taste and sense of propriety of some conservative and sensitive reader. Books of outstanding literary achievement, particularly those which thru years have become classics, are

purchased even if they be offensively frank in subject and unmoral in attitude. . . . No book which is immoral in intent or effect on the ordinary, moral, self-respecting citizen is knowingly purchased.

"The Denver Public Library is conservative and cautious in its careful selection of books for children and young readers. In these days characterized by 'the lost art of reticence,' the Denver Public Library is liberal in judgment regarding the purchase of books for adult readers, provided these books have literary and artistic merit. Since subjects, largely of sex, once taboo among nice people, are now frankly presented in club meetings, public discussions, newspapers, movies, and even in school, until as one professor remarked 'it has made the teaching of botany indecent,' the Denver Public Library, after selecting its books carefully, does not take too seriously the self-appointed censor of public morals, who usually reads entirely thru a frank book himself, but is vastly concerned over its moral effect on other readers."

Kansas City believes that the statement that the library cannot buy all books—even all the best—has generally been accepted as a broad explanation of the absence of certain titles. The Librarian adds: "It is a serious question in my mind whether such a discussion as this should be printed. It will subject libraries to derisive laughter on the part of the so-called 'young intellectuals.' It is a real problem, however, and I believe responsible library people would be benefited by a personal discussion at the A. L. A."

The policy of the—Public Library is to reject absolutely the worst, and to put on the "Permission Shelves" books by authors so well known that readers are sure to ask for them. "We have very few complaints, either on the part of citizens of very strict morals, or from those who wish to read such literature. I really think that we have adopted a middle course, which relieves us of severe criticism from either side."

The Detroit Public Library in the main approves for purchase such objectionable books as seem to be possessed of literary merit.

As for state library commissions, Wisconsin says it is seldom called on to exercise a strictly moral censorship in regard to fiction. "We do include in our list books on sex-hygiene and sex ethics, and make an effort to bring to the attention of our libraries books which treat these subjects with sanity and scientific knowledge. Books of the third class, known as 'Erotica,' etc., are entirely outside our scope."

In New Jersey, the Public Library Commission does not buy objectionable books, except

under most unusual circumstances. "Our book funds are so limited that we do not feel that we can invest in books that are not the best, and cannot be generally circulated. We did buy one copy of a war experience book, because of the controversy regarding it, and because it was a contribution to a subject which many wished seriously to study. One debated novel we would not consider under any circumstances, because there is no element in it that contributes to the solution of any problem, social or economic. If upon consideration we find that the contribution to human knowledge or toward the solution of a problem is great enough to outweigh the objectionable features, we buy one copy, or perhaps two, of the book. Even in this we consider whether the dirt is brought in merely for dirt's sake, or because it is necessary to the working out of the problem.

"A leading book on adolescence we buy as freely as the demand necessitates, and as our funds permit, because it never occurred to us that any one could consider it an objectionable book. The sex series we do not buy at all, because we think that this is not a subject that any public library is competent to handle. We do not buy the 'amerons' or the like, but depend

upon a large library to lend them to us when necessary."

The Public Library Commission of Indiana does not aim to purchase objectionable books which cannot be freely circulated; but, as in all libraries, these slip in occasionally. They are then kept on the regular shelves, but not sent out except on special calls from libraries or clubs familiar with their contents. "We have a few books on sex-hygiene; but these, too, are not used indiscriminately in general travelling libraries. We do not purchase or keep any sets of certain unexpurgated editions which could not be generally circulated."

The California State Library reports: "We buy no fiction, which, of course, eliminates the large part of the material under discussion. Of the sex-books we buy those which are well reviewed and seem of some value, and circulate them freely. Certain titles are reserved for the use of students and physicians; but the majority of the books are circulated without question. We buy editions of the classics which have a literary value, whether they are expurgated or not, and circulate them without question."

(To be concluded)

Favorite Books of the Lightfingered

THE losses from the Rental Collection are much higher than from any other class of books in the Grand Rapids Public Library. There seems to go with the reading of certain classes of modern fiction an extra moral hazard. Or perhaps one might better say that one type lives on a different moral plane from the type reading another class. It would be a valuable study to be able to determine what relation, if any, exists between the readers of different authors in the Rental Collection. For example, does the average person who reads Sinclair (Bower) have less conscience about stealing (this is a harsh, but nevertheless the only proper word that applies) a book by his favorite author than the reader, say, of Main Street. To be able to apprehend the persons responsible for improperly taking one hundred rental books would afford the opportunity for a most interesting and valuable study in psychology and morals.

Books by the following authors to the number of three or more were improperly taken—without having them charged and without returning them—from the Rental Collection during the year:

Curwood, James Oliver, 5. (3 copies of Valley of Silent Men.)

Fox, John, 6. (3 copies of Erskine Dale.)
 Grey, Zane, 5. (3 copies of Rainbow Trail.)
 Oppenheim, Edward Phillips, 6.
 Ostrander, Isabel E., 3.
 Raine, William MacLeod, 3.
 Sinclair, Bertha M. (B. M. Bower). 11. (3 copies of Skyrider.)
 Ward, Arthur S., 5. (3 copies of Golden Scorpion.)
 Williamson, Charles N. and Alice M., 3.

It will be noticed that the authors whose books are most subject to being taken without leave are all writers of adventure, detective, or western stories.

The following authors who are represented in the Rental Collection by equally large numbers of books, and in one or two cases even a larger number than any of those mentioned above, are not represented at all in the list of books that disappeared from the Rental Collection. Their titles in the Rental Collection to the number of five or more copies are mentioned:

Fisher, Dorothy Canfield. Brimming Cup.
 Hutchinson, Arthur. If Winter Comes.
 Irwin, Wallace. Seed of the Sun.
 Lewis, Sinclair. Main Street.
 Lincoln, Joseph C. Galusha the Magnificent.
 Lynde, Francis. Fire Bringers.
 Rinehart, Mary Roberts. Amazing Interlude.
 Rinehart, Mary Roberts. More Tish.
 Tarkington, Booth. Alice Adams.

The rental books are shelved in the Registration Room where everyone has free access to them as to all the other books in this room. On a busy Saturday over a thousand people use this room, but the only books in the room

subject to unusual loss are those in the Rental Collection. When the room is overcrowded, as it frequently is, it is extremely difficult to detect the taking of a book improperly.—From the report of the Grand Rapids Public Library for the year 1921-1922.

The Potter Free County Library at Amarillo

THE Potter County (Texas) Free Library and Rest-room at Amarillo, the first building in Texas constructed especially for a county library. It is built of buff face brick with white stone trimmings, and is situated on the southwest corner of the courthouse grounds. The library feature predominates; the Library occupying the entire main floor, and above the main entrance is the inscription "Potter County Free Library." The county rest-room occupies

about half of the basement on the south side, and there is an assembly room on the north side. A pleasing feature of the rest-room is the fact that it is entered not by stairs, but by an inclined plane to accommodate baby carriages easily. The rest-room and assembly hall have separate entrances. The building is heated with steam. The library has hardwood floors, walls of gray tinted plaster, and cream colored ceiling. E. W.

The Greek Immigrant and the Library*

By MARGERY QUIGLEY
Librarian Endicott (N. Y.) Free Library

IF one walks thru a Greek neighborhood and reads the names of the coffee houses, one sees how widely scattered the "home-towns" of the Greeks are. Many café signs unconsciously proclaim that the proprietor has emigrated from far east of Constantinople, for Turkey in Europe, and Asia Minor contribute great numbers of Greeks to America.

Irrespective of country of birth, Greek is the mother tongue of some four hundred thousand immigrants to the United States, one-fifth of whom are naturalized citizens. There are twice as many Greeks in America as in Athens. Consulates in the United States number twelve.

Rev. N. M. Lacey says, "So evenly is the Greek population distributed that a recent list of Red Cross contributors published in a Greek newspaper represented nearly every state in the Union and contained the names of numerous towns, small, obscure, remote and unfamiliar." The Greeks have penetrated certain business activities so thoroly that possible points of contact with them are more frequent than with most new immigrants. Many live scattered thru the city near their places of business instead of in a single colony.

Business activities of the Greeks include the fruit and flower trade, candy stores, hotel and restaurant management, importing and the management of vaudeville and movie houses.

A few large and conspicuous colonies are the result of single industries. Among these are the sponge fisheries of Florida, the lobster fisheries off the New England coast and the colony at Lowell made up of workers in textiles. In the west great numbers work in the meat packing houses or in building railroads.

Especially among the Greek and Balkan immigrants and the people from Asia Minor the communal system of living, or "boarding," is the rule. The young men come over alone and if they have families send for them later. Boarders in such seriously overcrowded quarters do not draw books for home use to any extent. In their scant leisure they avidly read the newspapers, with their brief items, and crowd the coffee houses. Half the patrons of a Greek coffee house are either reading the

newspaper or discussing it. The assistant in charge of the public library deposit at Hull House reports that the Greeks there would rather read newspapers than books. The boarding house problem is connected closely with the coffee house, a desirable social complement in many cases. The best estimate of the Greek coffee house is given in the Cleveland Recreation Survey in the volume "Commercial Recreation."

In general, the library can not be said to offer the usual Greek male adult the companionship, diversion and rest of the coffee house. The coffee house, however, makes a fine medium of library publicity. Peabody, Mass., reports, "With the aid of a young Greek friend the library has placed lists of the collection in the various Greek halls and coffee houses." Many are glad to give library signs space on their walls. Another library has tried a deposit at a coffee house.

When we realize how many Greeks live in boarding houses, we see the value of such libraries as are working with hospitals. When a Greek is hurt or ill he goes to a hospital, chiefly because there is no place in the lodging house for him to obtain the necessary care. Davis finds that altho hospital care is practically ignored among the Poles, Italians and Jews, the Greeks use the hospital very frequently. Greek societies employ a doctor on contract who cares for members in some hospital where the expenses are paid by the society. The public library in Salt Lake City reports "We have given out more thru our hospital service to Greek patients sent in from the mines than directly from the library." Greek travelling libraries have been loaned by the Massachusetts Division of Public Libraries to the Parker Hill Hospital.

Greek women here are in the approximate proportion of one to every nine men. Few if any of the Greek women here work outside the home. As a rule they are good housekeepers and cooks and are eagerly sought in marriage. The pictures of Greek cakes and delicacies in Mrs. Dragoumis's "Under the Greek Skies" and the recipes in Davis' "Immigrant Health" give one a new idea of Greek households. The International Institutes of the Y. W. C. A. have eleven workers speaking Greek in Lowell, New York City, Reading, Pa., Pittsburgh, Akron, Detroit, Brooklyn, Toledo. These workers visit

* This is the sixth paper in a series furnished by the A. L. A. Committee on Work with Foreign Born of which Mrs. Eleanor E. Ledbetter of the Cleveland Public Library is chairman.

the Greek women in their homes and help in every way possible to make connections for the women with the various American social institutions. They co-operate heartily with the libraries. The libraries of Detroit, Gary, Springfield, Mass., and Pittsburgh make special mention of this relation.

Children born in this country of Greek parents are now to be found in the early grades of the schools and in the children's rooms of libraries. The total number of Greek children in the United States is not large. Gary, for example, reports that there are only one hundred and eighty-eight Greek children of school age in that city. Schools are attached to the church in the few cases where there are enough children and means to pay a teacher. These are not parochial schools in the accepted sense but are more nearly simple language and religion classes teaching the church service primarily. Detroit has one of these parochial schools with one teacher who "comes to the library."

Daniels sums up the Greek "community" clearly in "America via the Neighborhood." Participation in the management of the church by the men is anything but a passive matter. All Orthodox Greeks in a colony are organized into an "Orthodox Greek Community" whose elected officers in a truly democratic manner establish and maintain the church and assume responsibility for the group in all matters of general concern. The president and not the priest is the head of the community. The St. Louis Public Library at one time placed a deposit of Greek books in one of the Greek churches, to be issued as in a Sunday School library. The reports and general management were not considered very satisfactory or definite.

"The Immigrant Press and Its Control" by Park covers the Greek newspapers, the literary language and the dialects, and many social facts so adequately that I should advise reading this book at once in connection with work with the Greeks. Most libraries which subscribe to Greek papers take either or both of the New York dailies, *Atlantis* (203 West 25th Street) and the *National Herald* (134 West 26th Street). The former, founded in 1894, is the organ of the Royalist faction, the *Herald* of the Venizelos party. The subscription lists of both papers are fairly large, so that many libraries think that the Greeks in their towns are pretty well reached thru their own subscriptions.

Between ten and fifteen Greek papers, chiefly weeklies, are published in the United States. Some of the papers listed in Ayer's last Newspaper Annual and Directory, among them the *Loxias* of Chicago and the paper published in Salt Lake City, have already gone out of ex-

istence or moved to another town. Peabody reports the publication of articles about the library in the local Greek paper. Detroit says that the "one Greek paper occasionally published here prints from time to time lists of the new Greek books in the Library."

The pitfalls for librarians in work with the Greeks will be discovered rather more rapidly than in work with many nationalities. First, there is the warning in regard to book selection and book purchase which Mrs. Allesios stresses. Then the factions into which the Greeks divide are always snags for the unwary. Just now American Greeks are divided on home politics—Constantine or Venizelos. One must also be careful not to mistake a very small organization for something which represents the whole body of Greeks in the town. At no time do Greeks work well together. Instead countless groups of about ten men from the same village start sick benefits or clubs which endeavor to raise money for some public enterprise in the home town. In the West work with Greeks is not always satisfactory because of the lack of permanency in the larger labor groups. Greeks there are largely of the floating population.

In connection with health work among the foreign-born, Davis in his "Immigrant Health and the Community" says, "the large city has been the experiment station for technique—the small community is the place where these policies and methods must be applied if they are to reach the mass of the people." From the reports I have received this seems to hold true for library work with the Greeks. The large city libraries send discouraged reports of circulation and "contacts" while the librarians in places of five thousand and thereabouts are getting good results in proportion to the Greeks in their communities.

Personal relations established by the library are valuable and frequent. The librarian at Ipswich, Mass., for example, formed a Greek girls' club which has been going on for about ten years. The small libraries are trying to work out plans for pools or for interchange. Such books as state commissions own are constantly in circulation.

Of the publicity material in Greek for distribution outside the library, there have come to my attention three different examples: an invitation to use the library issued by the Worcester (Mass.) Library; a list of books by the City Library of Springfield, Mass., and a placard directing Greek readers to the Chatham Square Branch of the New York Public Library. Commercial Library supply houses have no posters, bookmarks or other publicity in Greek type. A large percentage of the libraries

report visits to the library by Greeks under the direction of their teachers of English; and occasionally the priest or the consul may act as leader of the expedition. The LIBRARY JOURNAL for January 1, 1920, describes a successful gathering at the St. Louis Public Library, with some two hundred Greeks in attendance. Forms taken by similar "Greek nights" include lectures in Greek interpreting the spirit and the political routine of America, as those held under the direction of the Massachusetts Division of Public Libraries at the beginning of the War and those in Springfield, Mass., and Denver.

Most libraries criticize themselves for not following up the lectures and receptions in some way. Some of the letters I have received have brought out the fact that there should be a Greek guest or "outside speaker." The names of Greek students in the United States who would be suitable speakers may be obtained thru the Y. M. C. A. (address Miss Rhoda Lawrence, 347 Madison Ave., New York City) which is now making an index of all foreign students, male and female, in the colleges of this country. Greek students in New York City are listed with Harry Edmonds, Cosmopolitan Club, 2928 Broadway, and those in the vicinity of Boston with the *Helicon Society* (in care of the Greek consul, 62 Long Wharf Street, Boston). In every case more native Americans should be invited, representing as many sections of the community life as possible. The factions among the Greeks themselves are, of course, an additional problem in such receptions.

Two hundred Greek titles with translations were printed in English type in the *Monthly Bulletin* of the Carnegie Library of Pittsburgh for November, 1921.

The English-Modern Greek and Modern Greek-English dictionary published by Atlantis, c 1917, contains an appendix of given names which may be useful at times in figuring out signatures. The Library of Congress publishes two transliteration cards which are as useful at the registration-desk as they are in cataloging. These cards read at the base "L of C Cat. rules (Suppl.) Rule II—Printed Jan. 26, 1905." The heading of each card is Transliteration—Modern Greek.

When one member of the family writes in Greek and another in English there is often considerable difference in the general appearance of the name, particularly when the names in the original Greek begin with those letters which resemble our B, P, X, and H. Transliterated or respelled by the school teacher these letters appear in English as V, R, H, and I, respective-

ly. The L. C. transliteration cards explain the variations.

In "The American Language," Mencken has a chapter called "Proper Names" which might well be used as a manual at the registration desk of libraries with foreign borrowers. On the authority of S. S. Lontos, of *Atlantis* he gives the following English substitutes which the Greeks have frequently adopted after a short residence in this country.

"The Greek Triantafyllopoulos (signifying rose) is often turned into the English Rose, Giannopoulos becomes Johnson, and Demetriades becomes Jameson. So, too, Constantinopoulos is shortened to Constant or Constantine, Athanasios to Nathan or Athau, Pappadakis, Pappadopoulos of Pappademetriou to Pappas. Transliteration also enters into the matter, as in the change from Mylonas to Miller, from Demopoulos to DeMoss, and from Christides to Christie. . . . The Greek Athanasios is changed to Nathan or Tom, Panagiotis to Peter Constantine to Gus, Demetrios to James, Chasalambos to Charles and Vasilios (Basil) to Bill."

Librarians will find useful the following:

A business men's library to "include the ten most authoritative books on every branch of business and industry" is being collected by Mr. L. M. Boomer, managing director of the McAlpin Hotel, where the collection will be lodged.

Selection and Purchase of Modern Greek Books

FOR a period of about ten years the New York Public Library has been building up a collection of Modern Greek books, and experience has shown that it is more satisfactory for libraries to buy from either of the two most prominent Greek newspapers, both published in New York, the *Atlantis* and the *Ethnikos Kyrix* (*National Herald*), unless the librarian has sufficient acquaintance with the language to choose the books for herself, or has sufficient faith in the local dealer giving her what is asked for. Both of these newspapers are widely read and each maintains a publishing and order department. Many of the best type of books come from Athens, but conditions in Greece are now so unsatisfactory that it seems as tho the libraries would do better to be content with what can be had in America, and wait for settlement of Greek affairs before ordering from abroad. It is true that the lowered value of the drachma might seem to be favorable to purchasing, and it is also true that there are book-stores in Athens which have excellent and representative collections. Nevertheless, importation is not advised at this time. Before the appended list was completed, the *Atlantis* and the *National Herald* were both visited and the list checked up with their stock, so that these titles at least should be available. The *Atlantis* is preparing a new catalog of books, and *National Herald* has one which is fairly up-to-date.

There are certain pitfalls to be avoided in making a selection of Greek books, and the one which is certain to entangle the feet of the unwary is that of taking inexpert advice as to the kind of books likely to have an appeal. There are amiable and kindly persons who will offer a librarian a selection of books for purchase which presupposes a far greater culture than will be found among the readers to whom the books are expected to appeal. Dealers are very likely to belong to this class of persons. Also, many of them seem to feel that one book is quite as good as another, so that if the title asked for is not in stock, they will make up the desired number with another title desirable, or not. I do not intend to imply that the dealers are not honest; I want simply to point out that they do not understand the public library point of view, and a library which can afford only a limited number of books should naturally have those with the widest appeal, and books for first purchase should also be of this type.

Here is a list of books in modern Greek. It does not pretend to be an exhaustive one; it is a list of popular books available at the present time. (A) indicates *Atlantis*, 203 West 25th Street, New York; and (N) the *National Herald*, 134 West 26th Street, New York.

Chatham Square Branch,
New York Public Library.

The John Rylands Library

ONE of the favorite philanthropies of John Rylands of Manchester was adding to the studies of the poorer Free Church ministers gifts of books which their own means did not allow them to purchase, as Henry Guppy, the present librarian of the Rylands Library, relates in his illustrated "Brief Record of twenty-One Years' Work" of the library (Longmans, Green, 1921). It was therefore natural for Mrs. Rylands when on the death of her husband in 1888 she considered establishing a library to plan it a theological library, a religious foundation to be administered and enlarged with unusual liberality of outlook. In 1892, two years after the construction of the library building had started, an opportunity occurred which broadened her first plans, when Earl Spencer decided to dispose of the Althorp Library and Mrs. Rylands acquired it *en bloc* for nearly a quarter of a million pounds. The library, numbering more than 40,000 volumes is "by common consent the most splendid part" of all the Rylands collections, now numbering more than 250,000 volumes. The library building and its contents were formally dedicated to the public October 6, 1899. In August, 1901, an equally important acquisition was made with Mrs. Rylands' purchase of the celebrated collection of illuminated and other manuscripts belonging to the Earl of Crawford, numbering upwards of six thousand items, for little less than had been paid for the Althorp library. This addition gave the library a position with regard to Oriental and Western manuscripts which it previously occupied as regards early printed books thru the possession of the Althorp collection.

Mrs. Rylands undertook to defray the cost of cataloging the Crawford collection, but died in 1908 before she could see the completion of the undertaking, altho several of the catalogs have appeared and others may be expected shortly. These and the numerous other printed catalogs issued have formed part of the plan of the board of governors to make the riches of the library available to scholars and the general public. Special working quarters where rare books may be used under supervision and the installation of a photostat machine have provided for the needs of the one class as exhibitions, public lectures and bibliographical and other demonstrations have for the other. The *Bulletin*, commenced in 1903 and continued by annual issues until 1908, was temporarily

discontinued in the latter year, resuming publication in 1914 to meet the demand its absence had caused.

The library, as befits its origin, is very rich in patristic and scholastic theology and in Bible texts, and its liturgical section is very strong. In other fields of literature later developed it has a collection of upwards of 3,000 volumes printed before the year 1501. The famous block-print of "Saint Christopher" bearing an inscription and the date 1423 is the earliest known piece of European printing to which an "unquestioned and, until recently, unchallenged" date is attached, and is the only known copy. There are fifty examples of the productions of the first press or presses of Mainz, with which the names of Gutenberg, Fust, and Schoeffer are connected. With the exception of the "Donatus", of which not even a fragment of the 300 copies is known to exist, the library possesses a copy of every book mentioned in the famous Sweynheym and Pannartz catalog of 1472, published by these printers, who set up their press in the Benedictine monastery at Subiaco in 1465. Many examples from presses in Venice, Naples, Basle, Paris, Lyons and other centres of printing are owned by the library. It has sixty Caxtons, four of which are unique. The collection of Aldines is considered to be the largest ever brought together, numbering as it does upwards of 800 volumes, many of them printed on vellum. The Dante collection numbers nearly 6,000 volumes. Shakespeare is well represented with two sets of the four folios and the "Sonnets" of 1609 and 1640. While all departments of knowledge are fully represented in the library, the historical, bibliographical and periodical literature sections are particularly stressed.

The collection of manuscripts now includes more than ten thousand pieces, systematic development beginning with the acquisition of the manuscripts of the Earl of Crawford and Balcarres.

The most notable achievement of the library of recent years outside its own activities has been its part in the restoration of the library of the University of Louvain. Four months after the destruction of the library by the German army in August, 1914, the governors offered 200 volumes as the nucleus of a new library. In April, 1915, the co-operation of other libraries was asked thru the *Bulletin*, when the John Rylands Library announced its willingness to be the custodian of all suitable

books offered as gifts until such time as Belgium had been freed of invaders and the University repatriated. Altho the work of receiving, binding and repairing, registering, cataloging, repacking, making ready for shipment and the huge amount of correspondence involved in all these activities were sometimes a serious tax on the resources of the library, the staff regarded it as a labor of love, and felt itself repaid by the fact that a total of at least 40,000 volumes were assembled and presented to Louvain.

The Harvard War Collection

BESIDES the war books and pamphlets which the Harvard Library has acquired by gift, purchase, and even capture, as in the case of a collection of German publications rounded up in England by the British censor and presented to the library after the cessation of hostilities, a great collection of war posters, songs and periodical publications has been amassed, according to M. P. Wood in *Harvard Library Notes* for May. Posters of all nationalities, Russian, Italian, Belgian, French, American, British, Czech, Austrian, German and Polish are included.

Of the papers published by and for the men in the service the library has a complete file of *Stars and Stripes*, the official newspaper of the A. E. F., and the *Bulletin des Armées de la République*, issued by the French government for circulation among the soldiers, finally censored and ceasing publication in December. It has recently been fortunate in acquiring a complete file of *La Libre Belgique*, the elusive publication issued by Belgian patriots during the occupation under the noses of the German invaders, who tried in vain to suppress it. The "famous or rather infamous" *Gazette des Ardennes*, published by the Germans for propaganda purposes in the occupied territories of northern France, is also complete.

The big foreign newspapers represented for the war years by complete files are the London *Times*, the Paris *Illustration*, and *La Belgique*, a paper issued in Brussels by the Belgians during the occupation. The Vienna *Neue Freie Presse* is nearly complete, and there are full sets of the *Frankfurter Zeitung*, *Fliegende Blätter*, and *Simplicissimus* are in the collection.

The map room owns French, Austrian and German staff maps. The Italian, Russian, Balkan and Turkish fronts are all represented in the war classification, notably the long series "Diario della Guerra d'Italia; raccolta die bulletini ufficiali," giving a full survey of the whole field of Italian activity.

Classification of war material has been planned on broad and elastic lines. Purely literary works, fiction and poetry, have been placed in the literature groups. Books on the political and domestic phases of the history of an individual country during the war period are placed with that country. Histories of military operations and campaigns go into the war group. With France, Belgium and Serbia, countries which were invaded and where military and political activities cannot well be separated, the books have fitted for the most part into the war classification.

An Impostor

To the Editor of the LIBRARY JOURNAL:

A man calling himself Mr. Russell and claiming to be employed under the supervision of the superintendent of buildings in the Detroit Public Library, came to the office recently, said he was on the way to Rochester, Minnesota, for an operation and wanted to borrow \$5.25 because he had lost his pocket-book. He offered no means of identification but agreed to leave his traveling bag as security. We told him he could have the money if he would leave his bag and he went out to get it but did not return.

In reply to our letter of inquiry, Miss Hazel C. Clark of the Circulation Department of the Detroit Public Library says:

"I had a somewhat similar experience about two weeks ago. A man claiming his father was connected with the janitor service of the Cleveland Public Library, and who gave his name as Russell, appeared here on Saturday night, asking for a loan of about eight dollars for his fare to Holland, Michigan, where he was to join his family."

CARL H. MILAM, *Secretary*, A. L. A.

Clippings in Minneapolis

"The subjects most in demand in the Clipping department of the Library are: cancellation of the allied debt, capital punishment, crime, effects of prohibition, flappers, government regulation of coal prices, jokes, Great Lakes, St. Lawrence waterway, Kansas court of industrial relations, independence of Ireland, Minneapolis city charter, Mississippi river dam, Muscle Shoals, open versus closed shop, Passion Play at Oberammergau, professionalism in college athletics, restriction of immigration and the soldier's bonus. The circulation of clippings was 20,489 in 1922 and 18,021 in 1921 for the six month period. The gain to date is 2,468."

—Community Bookshelf (Minneapolis).

Best Books of 1921 for Children

THE following table represents the vote of thirteen of the leading children's librarians of the country as to the best books published in the year of 1921 for the children's shelves of a public library, the vote being based on a tentative list selected and presented by the book selection section of the New York State Library. The titles are given in the order of number of favorable votes received by each. The sign ++ indicates books which in the voter's judgment should surely be included; + books which are good and deserving favorable consideration; — books which are judged not worthy of inclusion.—*New York Libraries.*

Total number of favorable votes		++	+	—
13	Hawes, C. B. <i>The great quest.</i> (Atlantic Monthly)	8	5	0

Serious Books and Their Readers

THE accusation that the American public does not read a serious book a year is not borne out by the records of the Carnegie Library of Pittsburgh. A great variety of persons have shown their interest during the summer in books very far removed from fiction and that light reading supposed to be in demand for summer perusal.

The records of eight copies of Van Loon's "Story of Mankind," which had circulated during a period of four months, show a wide range of readers. During that time, they were read by sixteen school teachers. That is not surprising, as this book is on the Teachers' Reading List, but it was also read by a consulting engineer, a fireman, three clergymen, a chemist, a mechanic, a writer, two laborers, two salesmen, an editor, a mining engineer, a pattern maker, a physician, one motorman, a stock boy, a real estate agent, three clerks, a car repairer, five librarians, a baker, a merchant, a police lieutenant, a jeweler, thirteen students, and eleven people of leisure.

Of the seventy-two people who borrowed it a little more than one-third were women. From the home of a day laborer, to that of a consulting engineer, from the baker to the jeweler and then on to the police lieutenant, the book journeys on. It would be interesting to know what each reader thought about it.

During this same period, "Outwitting Our Nerves" by Jackson and Salisbury was read by four stenographers, a broker, three private secretaries, three librarians, one clerk, one minister, an inspector, two unemployed women, a consulting engineer, a manager, a lawyer, four students, the members of a woman's club, a teacher, a social worker, and an advertising manager. We all want to outwit our nerves if they show signs of outwitting us, but the women do not seem to specialize in them as we have been led to believe.

Two copies of Harry A. Franck's new book "Working North From Patagonia," the narrative of a journey, earned on the way, thru southern and eastern South America, have been in the library for about six months. They have been read by a Court House clerk, a purchasing agent, an attorney, a civil engineer, three students, a teacher, two clerks, two women of leisure, one employee of the United States Bureau of Mines, a librarian, an agent, a stenographer, one unemployed man and a worker in a dental laboratory.

Robinson's "Mind in the Making," on the relation of intelligence to social reform, is proving just as interesting as the others. It has been in the library about two months, and salesmen, clerks, physicians, restaurant employees, a representative, a janitor, a contractor—"all sorts and conditions of men"—are requesting it.

In this democratic land, it means a great deal to know that our democracy is that of the intellect as well as that of politics.

GRACE E. WINDSOR.

The Students' Exhibition at Princeton

AN exhibition recently held at Princeton University Library, is unique in the history of that library, and possibly in the history of college libraries in the United States. It was an exhibition of books, manuscripts and autograph letters belonging to the students themselves. The collection filling six cases, contained manuscripts, illuminated and otherwise, incunabula, early English and American editions, many of them "firsts," Princetoniana, and examples of modern binding and printing, as well as some old newspapers and many autographed letters.

One of the books, the *Logica* of Paulus Pergolensis is said to be the only copy in the United States. There were twelve parchment manuscripts, deeds of land of the twelfth and thirteenth centuries: two illuminated Books of Hours of the fourteenth and fifteenth centuries: the Nuremberg Chronicle, 1497, with over two

thousand woodcuts, and many others of the fifteenth and sixteenth centuries. To many people the most entertaining contribution was "A History of the American Revolution; in Scripture Style," 1823. The following is a selection from the chapter on "The Expedition to Princeton."

"And the men of Britain fled to a certain building, where children were taught after the perfect manner of the law of their fathers: moreover they were taught to speak in foreign tongues! and to cut curious figures on paper! and there were also some stargazers amongst them! Now the building was called a college."

The idea of the Exhibition was conceived and executed within two weeks. Doubtless the display would have been larger, had there been more time for preparation. Only the undergraduates took part. The owners of the books were enthusiastic co-operators in collecting and arranging the exhibits, and were the most constant visitors, coming in several times a day, either to gloat in private over their treasures, or to bring in some comrade to whom nonchalantly to display their names typed on catalog cards below their volumes. The windows of the Exhibition Room look out on that "certain building" where children are still being taught after the imperfect manner of their fathers. The old college is proud of this creditable exhibition of some of its students.

ANNETTE REYNAUD.

Help for Russian Librarians

THE American Relief Administration, in transmitting an appeal from Russian librarians, says this kind of appeal "comes with a cry from all classes of intellectuals in Russia. They are hungry and the assistance rendered by the United States, which has put the actual famine behind Russia has not greatly relieved people of this class, and we believe that economic conditions will not materially improve for them for a long time. . . Various groups in this country have already sent relief to similar groups in Russia;" and the hope is expressed that American librarians will help out the librarians of Petrograd.

For every \$10 paid to the American Relief Administration approximately 117 pounds of balanced rations will be delivered to one person in Russia.

Checks should be made payable to Edward D. Tweedell, treasurer of the American Library Association, 78 East Washington St., Chicago, Ill. who will forward the money to the American Relief Administration.

CARL H. MILAM, *Secretary A. L. A.*

Library School Notes

New York State School

THE New York State Library School opened on Wednesday, September 20, with a final enrollment of 57: 7 men, 50 women. Of these 11 are seniors, 33 are full-time juniors, 4 are junior specials and 9 are State College students taking the special course for teacher-librarians. The registration represents 17 states and 2 foreign countries—China and Norway. New York State leads with 26; Indiana and Minnesota follow with 4 each; Massachusetts and Oregon with 3 each; California, Missouri and China with 2 each; Colorado, Illinois, Iowa, Kansas, New Hampshire, New Jersey, Ohio, Pennsylvania, Vermont, Washington and Norway with one each. Thirty-one colleges and universities are represented by bachelor's degrees, three by master's degrees and six by some graduate work. All but a very small percentage of the students have had some previous library training, as well as teaching or other professional experience.

Simmons College School

THE College began its new year on September 14. The total registration of the Library School is about one-tenth that of the College, and so far this year has reached one hundred twenty-five. In the four-year group there are twenty-seven freshmen, twenty-two sophomores, twenty-nine juniors, twenty-two seniors, seven transferring from other colleges with from one to three years of academic credit. The one-year group includes thirteen graduates of other colleges, and five special students. A place is held for each accredited senior until the official registration days, unless she signifies earlier her intention to withdraw. Withdrawals of Seniors, however, are the rarest of occurrences.

The dormitory accommodations, unfortunately inadequate, mechanically limit the number of Freshmen and undergraduates applying to enter with advanced standing from other institutions, so that sometimes some of them have to be given the cold comfort of a waiting list. College graduates, entering to attend the one-year library course, as they live outside the dormitories, may be accepted up to the maximum.

Pratt Institute School

THE Pratt Institute library class of 1923 numbers twenty-five students, its full quota.

and for the first time in several years no entrance examination was held in September. Geographically the students stand as follows:—five from New York, three from Oregon, two each from Canada, Florida and Iowa, with one each from Massachusetts, Connecticut, New Jersey, Pennsylvania, District of Columbia, Virginia, Tennessee, Kansas, Nebraska, Iowa, Mississippi and South Dakota. Fifteen are college graduates; nineteen have had some library experience, ranging from summer substituting to eight years' service as branch librarian and including work in public libraries, large and small, college, normal, high school, state, and reference libraries. Several have taught and four have been in active business. Altogether the common store of class experience is unusually rich and the prospect is excellent for an interesting year.

New York Public Library School

THE year at the Library School of the New York Public Library opened with the coming of fourteen students for the period of preliminary instruction and practical work on Tuesday, September 5. As was the case in 1921-22 this was under the direction of Miss Carolyn F. Ulrich, chief of the Periodical Division of the New York Public Library. On September 18 the rest of the junior class reported, there being forty-two in all including a few part time students. There is the usual range of geographical representation, the students enrolled coming from thirteen states of the United States and in addition from Norway, France, and Canada. Twenty-one students hold bachelors' degrees and one a masters' degree. About two-thirds of the entire number have had some library experience. It is too early to announce definitely what the final senior registration will be, but about six students are expected. It is intended to offer open courses as in the last three years.

Miss Alice Higgins, who has been appointed to a place on the Faculty, is expected to assume her duties on November 1st. Miss Janet Doe, a member of the junior class of 1921-22, is acting as reviser at the School for the current year.

Drexel Institute School

THE Drexel Institute School of Library Science re-opened on September 25th with a registration of sixteen students.

The faculty consists of Anne Wallace How-

land, director; Florence Rising Curtis formerly of the University of Illinois Library School, vice-director; Marie Hamilton Law and Martha Lee Coplin.

The courses offered in the first term are cataloging; classification; order accession, shelf and loan work; reference; book selection; and administration.

Carnegie School of Atlanta

THE Atlanta Library School is planning a record year for 1922-1923 with a registration of twenty students. This expansion comes with the demand for training in the Southeast and the increase of the practice field in Atlanta. In addition to the practical work in the Atlanta Library, which has recently opened its seventh branch, use will be made of the libraries of the colleges in the city and vicinity—Emory University, Oglethorpe University, Georgia School of Technology, and Agnes Scott College. The office of the Georgia Library Commission will offer interesting experience, as will the libraries in the small towns nearby, while the special libraries in the city furnish a varied demonstration. While this increase in numbers is in a way experimental, the faculty is confident that the facilities in Atlanta will prove more than adequate to the new demand.

The students for the new class come from Alabama, Florida, Georgia, Kentucky, North Carolina and Virginia. Five hold degrees from colleges of the highest rank and seven are graduates of normal schools, or junior colleges, or have had some college training. Eight have had library experience.

Several changes have been made in the faculty for the coming year. The instruction in loan work and the supervision of practice work in that department is to be in charge of Miss Fannie Cox, 1914 Wis., who has held positions in the Detroit Public Library, has seen war service on the Mexican border, was librarian of the Janesville (Wis.) Public Library for two years, and since April head of the Lending Department of the Atlanta Library. The selection course is to be given this year by Miss Crumley and the instruction in cataloging by Clyde Pettus, who after training and several years' experience in the Brooklyn Public Library with Miss Hitchler, became cataloger to the Lawson McGhee Memorial Library at Knoxville, Tenn. For the last two years she has been first assistant in the Catalog Department of the Carnegie Library of Atlanta.

One change in policy here announced for the first time is that, beginning with the class of 1923-1924, a tuition fee will be charged. The amount of the fee will be determined later.

Carnegie School of Pittsburgh

ON September 20 the Carnegie Library School opened for the twenty-second year with the largest registration in its history.

Of the forty students enrolled, thirty-one have had a year or more of academic work beyond the secondary school. Fourteen are college graduates and three are completing the senior year of the Academic Library Course given by the Carnegie Institute of Technology and the Library School. A number of the students have had normal school training and many have had either teaching or library experience.

Students who lacked library experience, spent the two weeks previous to the opening of school, in required preliminary practice. The regular assignments for practice work began October 2. Visits to the various Pittsburgh libraries in which the students are to have their practice were scheduled during the first two weeks of school.

Western Reserve School

THE School has a total enrollment for 1922-23 of forty-four students. Of these twenty-six are enrolled for the General Course, with two for single subjects in this course; sixteen are enrolled for the course in library work with children, with active service in the children's rooms of the Cleveland Public Library system. Twelve members of the general course have college degrees and in the course in library work with children five have college degrees and five have graduated from regular library school courses, and all have previous experience in work with children.

Geographically the representation is as follows: Ohio (aside from Cleveland) twelve, Cleveland ten, Pennsylvania four, Indiana three, Iowa three, Wisconsin two, Minnesota, Illinois, Montana, Alabama and Connecticut, each, one. Five foreign students come from New Zealand one, Canada one, France, one, Norway two.

University of Illinois School

THE new year's work began with registration on September 18-19, and class work began on the following day. A total of forty-six students are enrolled, including several taking only a part of the work; thirty-one are Juniors and fourteen are Seniors; four are men.

The students come from sixteen different states, and have their degrees from twenty-six colleges or universities, six of them from the University of Illinois.

The faculty and curriculum remain the same as last year except that Miss Emma Mae Shoup

is assistant and reviser in the place of Mrs. Mary Eastman Severns who resigned at the end of last year.

University of Wisconsin School

THE seventeenth year of the Library School of the University of Wisconsin opened on September 18, with an enrollment of thirty-seven, the full capacity of the School.

The students come from ten states and three foreign countries: fourteen from Wisconsin, five from Indiana, three from Iowa, two each from Alabama, Illinois, Michigan, Minnesota, and New York, and one each from California, Oklahoma, China, Denmark, and the Philippines.

Eighteen are college graduates, and twelve others have had from one to two years of college training. Six have had from four to twelve years of library experience, seven have had two years, and one, one year, ten have less than a year of actual library work, and thirteen meet the requirement of one month of actual work in a library. Two have had good business experience, while several have been successful teachers and teacher-librarians. Miss Helen Turvill who has been connected with the School since 1908 resigned at the end of the Summer Session. The courses in cataloging, classification and related groups and in Library Economy, have been assigned to Miss Susan G. Akers. Miss Julia W. Merrill who resigned in April, is succeeded by Miss Ethel M. Fair, a graduate of Vassar and of the Library School of the New York Public Library, with much library experience in the Harrisburg (Penn.) Public Library, the Library of Purdue University, and elsewhere. As her experience further includes several years of teaching, special training in story telling, giving normal instruction in story telling, and survey work under the U. S. department of labor, Bureau of labor statistics, she enters upon her work thoroly equipped to carry instructional work in the School, and field work for the Commission.

St. Louis School

THE class of 1923 contains 24 students of whom 4 have college degrees, five have had three years of college work and four have had two years, six one year and only five have had no education beyond high school. Eight have had public or college library experience of from a few months to three and one-half years.

Missouri sends most of the class; the rest come from Iowa (2) Oklahoma (1) and Norway (1).

University of Texas School

The University of Texas opened September 25, with nineteen students in attendance in the Department of Library Science, all of whom are from the State of Texas. Of this number six are graduate students, three of whom are covering all the work this year, six are seniors, six juniors, and one is a special student who is a member of the University Library Staff. The graduate students all have their degrees from the University of Texas, all but two having graduated within the last seven years. Seven of the graduate students and seniors will be ready for work next June.

Los Angeles School

THE Los Angeles Library School opened September 25th with the largest class in its history: thirty students. Nineteen of the class come from California; two from China and two from Maine. The others come from Oregon, Idaho and the middle west. Eighteen are college graduates and twelve have had library experience.

University of Washington School

THE University of Washington Library School opened on October 4th with a registration of thirty, the largest in the school's history. Eight of these are University graduates and twenty-two are seniors. Mrs. Mary Alfonso has joined the teaching staff and will give instruction in cataloging.

National Certification of Librarians to be Discussed at Chicago

THE A. L. A. Committee on National Certification is anxious to ascertain the views of the members of the Association on this subject before submitting a report to the mid-winter meeting. There is not time to send questionnaires to individuals. The chairman will be glad to receive from any members of the association an expression of opinion on the following points: (1) Are you in favor of national certification for librarians? Please give reasons pro and con. (2) What standards would you suggest as a basis for such certificates? (3) What should be the organization of the certifying body? (4) What forms or grades of certificates should be issued? (5) What should be the relation of national to state certification?

Please address Frank K. Walter, Chairman, A. L. A. Committee on National Certification, University of Minnesota Library, Minneapolis, Minn., no later than November 20.

Addison VanName

THE death of Addison VanName, University Librarian from the Civil War period to 1905, removes one of the builders of the University that we know to-day, as it ends the career of practically the last survivor of that remote time who was officially associated with Yale. Known personally to but few of the present generation, Professor VanName was a familiar and respected figure to the undergraduates of an earlier time. The Library and Professor VanName were one and the same to those men; it was his unflinching courtesy and sympathy that made that center of Yale's life a hospitable place to them. He was however, above all else a great librarian and assembler of books at a time when such a profession was little understood and when buying obscure books for future users was an unpractised art. For one of the remarkable things that Professor VanName accomplished was to buy, and buy economically, over a long range of years, an enormous number of books in a very wide field, the value of which was not understood well then but which since then has made the Yale Library a Mecca for students. He was one of the few survivors of those leaders of his profession who attended the conference in 1876 which resulted in the formation of the American Library Association. He was always interested in linguistics, having written on the Creole dialect and being a member of the American Dialect Society. His special field was Orientalia, and his writings include articles on the Arabic and on the Chinese languages, and one on the early history of Japan. He built up the Yale collection of texts in Chinese and Japanese until it became one of the best in America. He taught Hebrew at Yale for four years, and was for many years Librarian of the American Oriental Society. His own collection of books on the Orient he gave to Yale. His intimate connection with the University was further established by his marriage to Julia, the sister of the famous Professor Josiah Willard Gibbs, of the Class of 1858.

He had a very unusual range of interests and a remarkable ability to see clearly what the University should build its library collections on and in what proportions. It was due to this gift that Yale's great collections of books to-day are not a hit-or-miss collection, of which the total number of volumes is the chief thing of interest, but an extremely well selected and well rounded assembly, in which hardly a subject of study is not thoroly well represented, often by books not to be found elsewhere in the country. Yale to-day has one of the great scholarly libraries of the world, and it was very largely

due to Professor VanName that its foundations were so laid that this has proved to be the case. It is not too much to say that Addison VanName belongs to the select list of the founders of Yale University, and it is no less on this account than as a man that Yale honors his memory.—*Yale Alumni Weekly* for October 6.

Motion Picture Book Week

A MOTION Picture Book Week has been launched by the National Committee for Better Films in connection with the Fourth Annual Children's Book Week, November 12-18. The Committee, which is part of the National Board of Review—the body that passes upon all pictures before release—has prepared a list of over one hundred good films suitable for young people up to eighteen years of age, based on approved literature, together with a plan of community co-operation. The list which is given in the LIBRARY JOURNAL for October 1, p. 817-818, and plans are going to 15,000 exhibitors. 5000 libraries and booksellers, and approximately 8000 women's clubs, school superintendents and parent-teacher associations all of whom are asked to "get together" to make the week a success. Communities which tried out the idea last year reported large audiences of young people, satisfaction with the films, and increased calls at libraries for the books from which they were drawn. The Committee has already written to nearly 4000 clubwomen and 3000 school superintendents in addition to the 15,000 exhibitors.

The librarian will, therefore, find the way paved for community co-operation. A form letter for use in requesting the booking of these selected pictures during the Week may be obtained from the committee; and exhibitors who have already booked up may often be induced to change a booking so as to include one or more of the titles desired. Schools, parent-teacher associations, mothers' congresses and clubs are writing to the committee for material, so that the librarian will do well to plan her request in co-operation with local organizations.

A limited number of copies of the recommended film leaflet and form letter (please enclose postage) will be sent free by the National Committee for Better Films, 70 Fifth Avenue, New York. If wanted in quantity 25 cents a hundred should be sent for leaflets and 50 cents for letters. The committee has also a Motion Picture Book Week Poster for sale at ten cents.

THE ROCHESTER PUBLIC LIBRARY BOOTH AT THE ROCHESTER EXPOSITION, SEPTEMBER 4-9, REPRESENTED IN FLOOR SPACE AND BOOK COLLECTION, ONE-TENTH OF A BRANCH LIBRARY. IT WAS MUCH USED BY THE PUBLIC AS A READING AND REST ROOM. A LIBRARY ASSISTANT WAS IN CHARGE FROM 10 A. M. TO 10 P. M. TO ANSWER QUESTIONS ABOUT THE LIBRARY SYSTEM

American Books in Yiddish

THE committee on work with the Foreign born of the New York Library Association according to its report presented to the Association at its Alexandria Bay meeting, has been interested for the past two years in securing the translation of American books into foreign languages with plans which have been cordially approved by the A. L. A. Committee on work with the Foreign born.

During the past year attention has been concentrated upon the effort to have books reflecting American life translated into Yiddish, which is the language poorest in translation from American life and one specially useful in view of the large influx of Yiddish-speaking immigrants from southeastern Europe.

A list of titles proposed was submitted to librarians for voting in the LIBRARY JOURNAL. Of the titles suggested Hawthorne's "Scarlet Letter" and Harte's "Luck of Roaring Camp" were already in preparation with Mr. Max Maisel, but publication had been postponed on

account of business conditions. These will be issued first, and it is hoped that Muzzey's American history will be undertaken next as there is at present no one-volume history of the United States in Yiddish. At the request of the publisher and the committee, Ginn & Company will probably waive royalty rights for the first edition of two thousand copies and while the response from libraries has not been as large as was hoped, the committee has been able to assure Mr. Maisel of about two hundred twenty-five advance subscription for these three titles as well as for Charnwood's "Lincoln" and Garland's "Son of the Middle Border".

Miss Florence King of New York, librarian during the war of Base Hospital No. 3 is at present in Italy. She writes that at the Book Fair at Florence last spring she found Polish publishers greatly interested in translations from American literature. Miss King has made comments which should be valuable in considering possibilities of translations into Polish and Italian.

There are two ways in which the work of interpreting America thru the literatures of our immigrants may be followed, says the report. "One is thru the encouragement of existing agencies—the foreign publisher, the foreign press and the immigration societies—to undertake the translation of such American books as have a strong appeal to the foreigner. The second way is thru the formation of large committees which will be able to collect money and to underwrite the whole project." The first method, while much less spectacular seems to the committee the wiser and calculated to give better results.

Literature and Libraries

JUST as of old knights rode forth to champion the cause of the oppressed, so to-day various 'literary knights' come forward to champion the cause of the public libraries. It is as well that the public should fully realize the educational value of these institutions, and their importance in the social welfare of the nation; and it should specially realize that economy practised at the expense of such institutions is false economy in the long run.

"The following opinions are here printed for the first time:—Sir Arthur Quiller-Couch, the eminent author and King Edward Professor of English Literature at Cambridge University, makes the statement: 'Let me say, as a public lecturer in one of our universities, that in my opinion a guided access to the shelves of a great library is of far greater worth than attendance at lectures can possibly be. Lectures may stimulate; private talk, in my experience, stimulates better. Both have their uses. But the true key to understanding is the key of a library.' Sir Gilbert Parker, the popular author and educationist, says as follows: 'As for public libraries, the immense extent to which they are used is profound evidence of their value. No man, woman, or child need be ignorant now, libraries are so universal. There is no man of sense who would not advocate and support these steps to a higher life, for that is what libraries are.' Sir Hall Caine contributes the following epigram: 'Although I should hesitate to say that a city without a library is a city without a soul, I should not fear to declare that it is a city with a soul that is starved.' Sir Owen Seaman, the editor of *Punch*, strikes a new line of thought in his expression of opinion: 'The spread of knowledge of decent literature through our public libraries is one of the best means of defeating the evil work of those who teach sedition and class-hatred in Communist schools.'

"Authors who are not knighted but are,

nevertheless, knights of the pen, have contributed opinions. On the subject Mr. W. J. Locke writes: 'If the study of the approaches to literature trains the thinking powers, what of the subject-matter, the infinite groves of golden fruit ripe with the wisdom of the centuries—the garden of the Hesperides—fruit to your hand for the plucking? And the garden is there for every one to enter—in the great public libraries of the country.' Dr. L. P. Jacks, Principal of Manchester College, Oxford, and editor of the *Hibbert Journal*, considers that the question of the adequate upkeep of our public libraries is a very important one; and Lord Shaw of Dunfermline states that it is safe to say that libraries are 'the most economical means of imparting information.'—W. A. B. in the *London Times Literary Supplement*.

The Symphony Concert

INTRODUCTORY

Scholes, Percy A. The listener's guide to music, with a concert-goer's glossary. London. 1919.

Contents.—What the listener really needs to know.—How the composer works.—The principle of design.—The sonata-form.—The symphony as a whole. The orchestra and its instruments.

Boston Public Library Ten-Book List No. 35 September 23, 1922

THE LIBRARY JOURNAL

TWICE-A-MONTH

OCTOBER 15, 1922

THE death of Addison Van Name, Yale's librarian for forty years, reduces to seven the pioneers of 1876. Mr. Van Name was a connecting link between the college librarian of old days and the university librarian of today. Appointed librarian at the close of the Civil War, he had been a dozen years at the head of a great library at the formation of the A. L. A., in which Guild of Brown and Vinton of Princeton were his leading college associates. He came to his task with special equipment as a philologist of wide range, and philology which was always his hobby led Yale to specialization in collections more noteworthy as the years pass. A wide buyer of prescience for future needs, he laid a broad foundation for the University library which he began to build, whose value will not be fully recognized until it is properly housed in the adequate and splendid building which the Sterling foundation now makes possible. It is pleasant to think that he died with the full knowledge that Yale, under his able successor, Andrew Keogh, is to have a library edifice which will rank it in equipment as well as contents with the great university libraries of the world.

★ ★ ★ ★ ★ ★ ★

THERE are '76-ers, however, who were not present at the A. L. A. Conference of 1876, notably Caroline M. Hewins, who completed her seventy-sixth year on October 10th. Tho not present at the initial conference nearly half a century ago, she had begun at Hartford the year before the work whose development has made her a beloved and honored leader among American library women. She will, therefore, complete a half century of service the year before the A. L. A. celebrates its semi-centenary—a half century of service notable alike for quantity and quality. Her work with children began in those days not far from Mother Sanders' beginnings, and one of her first contributions to library literature was the early list of books for children, published by Frederick Leyboldt. From the state capital of Connecticut her work has radiated thruout the state as Secretary of the Connecticut Public Library Committee, virtually a state commission, but in fact the whole country has been her field, for there is scarcely a librarian who has not felt the in-

spiration of her influence. Her visit this year to the David Copperfield Library in London, of which she will give an account in our next issue, and the weekly letters to "her children" which she wrote from abroad indicate that she is still "going strong," and it is to be hoped that she will not only continue in present health and effectiveness thruout the half century, but extend her direct work and influence into the years beyond.

★ ★ ★ ★ ★ ★ ★

NOT infrequently a conscientious librarian sends us a suggestion, which we are glad to receive, that librarians should be cautioned against the purchase or circulation of a book, often of current popularity, questionable for popular reading and of doubtful literary value. Nevertheless, we have not usually printed such suggestions, for the simple reason that advertising such a book by name often calls the attention of salacious-minded readers to it and provokes an embarrassing demand upon librarians. A negative comment against such a book is the omission of the title, if it is a book popularly exploited, from the A. L. A. *Book-list*, but, unfortunately, that reaches many libraries too late to be of service. It is a difficult and delicate question whether more is gained by frankness or by silence in this matter. There is certainly no objection to the communication of such hints from one librarian to another, but whether adverse comment in the public press does not lead to greater exploitation is at least debatable.

★ ★ ★ ★ ★ ★ ★

ON this difficult subject the LIBRARY JOURNAL accordingly asked Mr. Feipel to obtain the views of leading librarians and library commissions, and in this issue he submits his record of the general policy of those answering his questionnaire. This mentioned titles in three classes of questionable books as indicating those on which definite lines of policy could be laid down, but in publishing the record it has been thought inadvisable to print a list which would be a guide to the salacious reader, especially as librarians can easily identify the lines of books. It can scarcely be said that there is any general policy indicated which can guide the inexperienced librarian. The larger libraries, as a

rule, find it desirable to make purchases on the broadest lines, tho in many cases endeavoring to restrict the use of questionable books from those whose interest would be only or chiefly from prurient motives. Perhaps the best suggestion that can be made to the smaller libraries, whose funds are especially limited, is that preference should be given in buying to those books which are healthy in tone as well as of value as literature. Of course, for serious students or those having special reason to consult such books the system of inter-library loans, now so generally in operation, can be utilized to obtain books which it is unnecessary or undesirable to keep in the smaller libraries. As the English writer, quoted in the second part of Mr. Feipel's paper, puts it, "We can save our trust-funds for better things." This second part will deal with specific methods of purchasing and shelving, and with restrictions on the use of questionable books as practiced in representative libraries.

★ ★ ★ ★ ★ ★ ★

QUITE another class of books which will bear watching is indicated by Mr. Ranck's

record of experience at Grand Rapids, which many librarians have had unfortunate reason to share. There seems to be some deep psychological reason why detective novels and stories of wild west adventure lead to brigandage of books, or perhaps some physiologist will discover a germ which can somehow communicate itself by brain process from the book to the reader and develop in him a library speciality in hold-ups or kleptomania! In the children's room, also, librarians have found that certain authors or lines of books induce like tendencies in juvenile minds and fingers and it is a real problem how this danger, which, despite all joking, is rather serious, may be met. "Who steals my purse steals trash," but the child who steals a book makes a bad beginning which may offset much of the future good that devotion to the children's room may bring to him. These books are usually not of first importance and it will, perhaps, be well to avoid duplication of them, especially on open shelves, and keep only one copy which the nefarious will be less likely to steal and which, if stolen, can usually be replaced.

IN THE LIBRARY WORLD

RHODE ISLAND

Pawtucket. The Deborah Cook Sayles Public Library overtopped its previous record circulation of 179,000 books in 1915 with the 198,000 loaned in 1921, an increase attributed in part by Librarian William D. Goddard to more extensive book purchases made possible by special appropriations. The city government also granted an extra appropriation for a branch library at Nathanael Green school to serve the Fairlawn section. The staff had the benefit of the free services of an extra member, due to a rule of the Rhode Island College of Education requiring its students to give 200 hours of apprentice service in some library before their graduation. Expenditures of \$26,900 included \$15,179 for salaries and \$6,548 for books, periodicals, and binding.

Newport. The Redwood Library celebrated its 175th anniversary on September 4th when about two hundred people assembled in the front or original library room and in the room adjoining. Following the Rev. Roderick Terry, president of the Board who gave an informing history of the library, one of the oldest subscription libraries in this country, Admiral Sims spoke feelingly of the influences of books, and while disclaiming knowledge of the

technique of library work showed that if he had not been a great naval commander he might have made a very up-to-date librarian. The felicitations of the libraries of the United States were presented by Arthur E. Bostwick of St. Louis who dwelt on the modern idea that the reader is as important a library unit as the book and sketched briefly some of the changes wrought in libraries by the popular movement of the last fifty years. Following came an informal reception and inspection of the beautiful building, especially of the original part, the work of the colonial architect Peter Harrison.

CONNECTICUT

New Haven. Preparations for two new branch buildings, a circulation surpassing other years by about 100,000 volumes, and new staff appointments to insure more direct attention to important library activities were features of the work of the New Haven Public Library in 1921. Dixwell Branch's new building was begun toward the end of the year, following the authorization of an issue of bonds to the amount of \$50,000 to supplement the amount of \$40,000 from Carnegie Corporation. A site for Congress Branch was to be considered next. The main library and five branches, besides deposit

stations, circulated 661,994 volumes. L. Lindsey Brown, the new assistant librarian, has undertaken the promotion of knowledge of the library by the public at large thru newspaper publicity and talks to organizations. The city appropriated \$75,000 of the receipts of \$84,579, somewhat less than sixty cents per capita of population. Salaries for the library staff were \$38,330. For books \$15,375 was spent. Altho more than 13,000 books were added net additions were only 4,000 after allowance was made for worn out, lost and stolen volumes.

NEW YORK

Legislation in New York State in 1922 follows, as reported by William F. Yust, Rochester's librarian and chairman of the A. L. A. Committee on Legislation, to the New York State Library Association at its Alexandria Bay meeting on September 12.

The General Education law was amended (Chapter 345 Laws of 1922), to permit counties which make a contract with existing libraries for library service to exempt from the payment of a library tax any municipality which already contributes to the support of a registered free library. The original law permitted this exemption when a county established its own library but failed to mention it under the contract provision.

Section 1123 relates to trustees, their term of office and method of election or appointment. When in this respect the charter provisions of a library differ from those of the 1921 law, the charter provisions are to stand until the charter is amended by the regents.

State grants of money to free libraries are to be made in accordance with appropriations by the legislature from the income of the United States deposit fund, instead of simply "in accordance with regents rules." For a number of years libraries could and many did receive as much as \$200 a year, provided they raised an equal amount from taxation or other local sources. Then for lack of sufficient appropriations by the legislature these grants were reduced by the regents to a maximum of \$100, which was the rule for 18 years. Last year many libraries received as little as \$44.75. Accordingly an amendment to the law was passed this year stating that each free circulating library complying with regents requirements shall receive \$100 annually except that no library shall receive an amount greater than that provided for the same purpose from local sources. This removes the question from the "grace of budget committees or appropriating bodies."

Three special laws relate to law libraries. One amends the education law, establishing at

Catskill the "Emory A. Chase Memorial Library," a law library for the third judicial district. Another amends the education law relating to the law library at Plattsburg for the fourth judicial district. It requires the library trustees to submit to the county supervisors annually an estimate of the amount required for equipment and maintenance of the library, "the amount of which estimate shall be included in the amount to be raised in said county for court expenses for such ensuing year." Apparently the county supervisors have no option in the matter, but must accept whatever amount is called for by the library trustees. If so, here is a case of a library tax being fixed by the library trustees and not subject to review or reduction by the tax-levying body of the county—a power coveted by many public institutions. It is conferred by state law on public library trustees in the state of Indiana, the only state which has such a law. School boards in this state are fighting for just this power. A third law consolidates the Albany County law library with the library of the appellate division, third department, and provides for its management, including an appropriation for the librarian's salary at \$3500.

A previous report (L. J. for September 15, p. 766) reviewed measures changing the name of the Oneonta Public Library to "The Huntington Memorial Library," permitting the sale of corporate stock for the erection and equipment of the central library in the borough of Brooklyn, and a law passing the legislature but not approved by the mayor, amending the Greater New York charter to give public library trustees power to select library sites subject to the approval of the board of estimate.

Two laws, altho not referring to libraries, are considered of great interest and importance to librarians. They refer to the state retirements system, which was established by Chapter 741 of the laws of 1920, amended by Chapters 207 and 365 of the laws of 1921 and again by Chapters 591 and 592 of the laws of 1922. That system creates various funds by state, county and city appropriations and deductions from salaries in accordance with actuarial computations. The amount of salary deduction varies according to the age of the individual from three per cent plus to eight per cent plus. It provides for service retirement, disability retirement and discontinued service retirement. Service retirement is permitted at 60 and is compulsory at 70. Payments are to be made in the form of annuity, pension on account of prior service and pension on account of service as a member and pension on account of prior service. The annuity and the pension together provide for the average employee a total

allowance of about half the final compensation. The system is declared by experts to be based on sound actuarial principles.

The law made membership in the system optional with state employees in the service Dec. 31, 1920. It now makes membership optional with county and city employees in such service June 30, 1922, providing the governing body of any county or city approves. Approval must be given in a county by the board of supervisors; in a city by the local legislative body and the board of estimate. It makes membership compulsory on future entrants into the classified service of the state and of a county or city which has adopted the system unless the department entered is otherwise provided with a pension plan. Chapter 591 of the laws of 1922 forbids the creation of a new retirement system by any county or city. In case an employee withdraws from service "prior to attaining retirement conditions, his accumulated contributions, together with four per cent compound interest, shall be payable on demand." This law has been adopted by the following counties: Essex, Hamilton, Monroe, Onondaga, Rockland, Saratoga, Schenectady, Steuben and Washington. The following cities have approved it: Newburgh, New Rochelle, Rochester, Schenectady, Watervliet and Yonkers. A pamphlet issued by the State Comptroller gives full information and answers numerous questions about the system.

Chautauqua. The Chautauqua School for Librarians this year graduated its third class completing the full year's course under the installment plan of four summers. The school had the largest enrollment in the 22 annual sessions held, 66 students representing 22 states and the following types of libraries: County and public 37; college 11; university 6; high school 6; agricultural college 3; normal school 2; military academy 1. Instructors in charge of the courses were: Director Mary E. Downey, organization and administration; Edna M. Hull, classification and reference; Ellen Hedrick, public documents, book selection and bibliography; Mary B. Nethercut, history of libraries and book making and library economy; and Mav Byerley, book binding.

NORTH CAROLINA

Chapel Hill. The library of the University of North Carolina now shares with Virginia and Texas the distinction of being one of the three university libraries in the South having more than 100,000 volumes. The titles in the North Carolina collection were increased by 775 volumes and 2109 pamphlets. Plans for the new library building are under consideration.

The funds for books, periodicals and binding for the year 1921-1922 were \$22,500.

GEORGIA

Atlanta. The English Avenue Branch of the Carnegie Library of Atlanta was opened on July 17. The branch occupies its own building, erected at a cost of about \$23,000, \$10,000 of which was given by Fulton County and the balance by the City. The site was purchased by the city for \$3000. The branch adjoins the largest elementary school in the city which has an enrollment of over one thousand two hundred pupils.

This is the second branch library of the Atlanta system to be open this year. The Inman Park Branch was opened on April 22nd, in a rented store building which was equipped with suitable shelves, furniture, etc, and a collection of about three thousand books.

The Atlanta library system now has seven branches, four of which occupy their own buildings. As these branches are widely distributed over the city, the next expansion of the system will be thru the schools and deposit stations, tho two of the branches now occupying store buildings need to have buildings of their own.

MICHIGAN

Kalamazoo. The statistical statement of the work accomplished by the Kalamazoo Public Library in its fiftieth year ending in June shows a circulation of 265,427 books among the 19,400 registered borrowers, or forty per cent of the population. The net accessions were 2572 books. Of the expenditures of \$42,299 fifty-three per cent represented salaries and fourteen per cent books.

ILLINOIS

Chicago. Business house deposits are among the most successful of the installations of the Chicago Public Library, and the number is growing steadily. The chief deposits are those at Armour Packing Co., Butler Brothers; Deering Harvester Works; Federal Reserve Bank; Marshall Field; Hart, Schaffner and Marx (four plants); Montgomery Ward and Co.; Philipsborn Co.; Sears, Roebuck; Western Electric Co.; and William Wrigley Co. Montgomery Ward and Co. had the largest circulation, 30,157, altho their book stock of 1208 volumes was not much more than half that of Marshall Field's, which numbered 2019 and was circulated 26,830 times. The latter firm, with Armour, the System Company, La Salle Extension University and a few others employ library school graduates as librarians. Often members of the regular office staff detailed to administer the collection have developed both

interest and skill. The main library keeps in touch with all business libraries thru a telephone reference bureau or "Short Loan Desk," and the business librarians are accorded the freedom of the building and the stacks.

IOWA

Dubuque. The Carnegie-Stout Free Public Library closed its nineteenth year in December, 1921, with a record-breaking circulation of 168,651 books, or four volumes per capita, from its stock of 39,567 volumes. The tax rate of one and three-quarters mills, an increase of one-half mill, is expected to provide well for the future, altho the present fiscal year, covering fifteen months due to a change in the city form of government, will strain the Library's available resources.

MISSOURI

St. Louis. Next in importance to the increased use of the St. Louis Public Library system, in the year ending April 30, 1922, involving a circulation of 2,303,533 volumes, or 100,433 over any previous year, was the opening of two complete branch libraries, equipped for community service, in new school buildings. The library gained 27,160 books, raising its stock to 634,777 volumes. The staff numbers 276 persons, exclusive of the 15 students in the library school. Of these 96 are men and 180 are women. Resignations accounted for the loss of 167 of the staff, of whom 29 were classed as full time permanent assistants. The Traveling Library Department circulated 426,088 volumes, or 30,369 more than last year, thru schools, clubs, associations, hospitals, churches and commercial and industrial plants. There are in all 256 agencies thru which books are distributed, including branches and sub-branches, deposit and delivery stations, and the traveling libraries. Expenditures for salaries were \$239,295, for books, periodicals and binding, \$108,502, bringing the total with other expenses to \$397,133. The year's receipts were \$431,322, exclusive of \$231,106 balance in bank and on hand April, 1921 to meet bills due during the year.

KANSAS

Wichita. The Wichita City Library, under Julius Lucht's administration circulated 242,655 books in the year ending May 14, 1922, as compared with the 49,627 circulated from 1915 to 1916, following the opening of the Carnegie building May 14, 1915. The registration in the same period grew from 1,990 to 21,852; the number of accessioned volumes

from 7,829 to 29,391; and the population of Wichita from 53,722 to 77,061. The income from city taxes, \$7,500 in 1915, was \$26,541 in 1922. Salaries for library service in 1921 were \$12,298, and the expenditures for books, periodicals, and binding, \$6,935.

TEXAS

San Antonio. The close on May 31 of the nineteenth year of work of San Antonio's Carnegie Library saw 194,124 books circulated, an increase of 20,778 over 1920-1921. The total would have been still larger had not it been necessary to close the library for part of September on account of the damage caused by flood. Twenty-nine boxes of books were sent to schools and institutions, which circulated the books 20,283 times. The library had 56,006 volumes at the beginning of its new year. Receipts were \$22,994; expenditures, \$22,560, of which \$10,239 was paid out in salaries for library service. The charter revision committee has allowed the trustees to insert a clause in the proposed amendments to the city charter soon to be submitted to the voters, providing for a tax of not less than two cents or more than three cents on the \$100. It is hoped if an adequate tax rate is secured to establish branch libraries, of which at present the library has none.

CALIFORNIA

Alhambra. The report of work accomplished by the Alhambra Public Library for the year ending June 30, 1922, shows that 130,547 books were circulated, 1,663 new borrowers registered, indicating that about 48 per cent of the population are library users. The total number of volumes is 25,679. Several excellent art exhibits were held during the year and a series of lectures on literature and art was given in the spring. The annual wild flower exhibit was unusually successful. A lecture on Birds of this region given under the auspices of the Los Angeles Audubon Society attracted general interest.

HALF-PRICE SUBSCRIPTIONS TO THE LIBRARY JOURNAL

Half-price subscription rates (\$2.50 instead of \$5.00) apply to:

- (a) Any library having an income of \$3000 or less;
- (b) Any librarian or library assistant having a salary of \$1500 or less; and
- (c) All duplicate copies ordered by any library, whether for the use of trustees or staff members.

LIBRARY ORGANIZATIONS

NEW HAMPSHIRE LIBRARY ASSOCIATION

OVER sixty were present at the annual meeting of the New Hampshire Library Association held at Lancaster September 13-15 in the hall of the Weeks Memorial Library. A social evening preceded the opening session on Thursday morning, at which Caroline B. Clement, president of the association, presided. Merrill Shurtleff, chairman of the Board of Trustees of Lancaster presented the keys of the town to the members of the association in a cordial address of welcome. A business meeting was followed by brief accounts of the neighborhood meetings held in different sections of the state, given by their leaders. F. Mabel Winchell spoke on the purpose of the Summer School at Durham and announced that the anonymous donor who gave a scholarship last year to send some librarian in the state to the school would continue the gift next summer.

"Rainbow and Leaden Skies in the Poetry of Today" a talk by Maria F. Kidder of Manchester, and a discussion of "Fiction, Sterling and Plated" by Grace Blanchard, librarian of the Concord Public Library, and a talk on book binding by Henry R. Hunting of Springfield, Mass., made a good afternoon's program.

The winner of the first State Meeting scholarship was announced in the evening at a "Sociability Supper" arranged by the ladies of the Congregational Church. The purpose of the scholarship was presented by A. T. Dudley of Exeter, member of the State Public Library Commission, and the certificate was conferred by Kate L. Tilden, a trustee at Keene. Ellen L. Brown of Hinsdale, the winner, received a certificate of excellence for being the librarian in a town of from 1,000 to 5,000 population who had done the most exceptional work in her library during the past year. Honorable mention was given to Elizabeth Brewster of Wolfboro and Martha E. Cutler of Peterboro. Chorus singing was led by Mrs. Frederick C. Hicks of New York, and interesting readings given by Mrs. Thomas L. Marble of Gorham were much enjoyed. In the evening George Foot Moore of Harvard University addressed the meeting on "Books and Libraries in Former Times."

Grace E. Kingsland, secretary of the Public Library Commission, acting as leader of a round table discussion of "Everyday Problems," brought the meeting to a close on the next morning.

Officers for the coming year are: President, Willard P. Lewis of Durham; vice-presidents, Alice Rowe, of Nashua, and Etta Clarke, of Hanover; secretary, Winifred Tuttle, of Manchester; treasurer, Annabell Secombe, of Milford; delegate to the A. L. A. Council, Caroline H. Garland, of Dover, with Annabell Secombe as an alternate.

WINIFRED TUTTLE, *Secretary.*

NORMAL SCHOOL LIBRARY DISCUSSION AT THE BRIDGEWATER CONFERENCE

A LONG step ahead in the development of the normal school libraries idea was taken, when, in the fifth annual conference of the State Normal School Teachers of Massachusetts, held at Bridgewater, Sept. 5-8. A large part of one of the general sessions and two special sessions were devoted to discussions of the place of the library in the normal Schools and in the training of teachers.

Adeline B. Zachert, director of libraries, Pennsylvania State Department of Education, Harrisburg, was the chief speaker. In all good fellowship, she pictured the rather casual thing which, until recently, "jest grewed" into a normal school library and which included contributions from spring house-cleaners, enterprising book agents, and private theological, medical, and law libraries. By way of contrast to the old type library and to show what were the minimum attainable requirements, Miss Zachert outlined the requirements agreed upon by a committee of librarians and school administrators and known as the "Measuring stick." For a normal school of three hundred students this includes reading and periodical room, reference room, children's room, library classroom and cataloging and work room. Twenty thousand volumes are needed and there must be adequate equipment and at least \$2500 yearly appropriation, exclusive of salaries and building maintenance. Most important of all, there is the soul of the library, the librarian, who must be not only library economist, but also practical psychologist, salesman, advertiser, and so charming a hostess that the library becomes the social centre of the school. In salary and position she stands on a par with the full professor—and she must have adequately paid assistants with the rank of instructors.

A definite stand for modern school libraries was taken by the Association in the passing of the following resolution: That this Association

**PERSIA**

By SIR PERCY SYKES Net \$2.50

A history of Persia from the earliest times to the present day. The author, who has constantly travelled in Persia and Baluchistan, was in command of Southern Persia until the end of 1918.

WESTERN RACES AND THE WORLD

Essays edited by F. S. MARVIN Net \$4.20

This new volume extends our vision beyond Europe and considers the evolution of world-relations between the Western races and their less progressive neighbors.

THE PROBLEM OF STYLE

By J. MIDDLETON MURRY \$2.20

"Mr. Murry's book is most illuminating and to be compared with Arnold's *Essays in Criticism* in its power to subtilize the reader's perceptions, to refine his sensibility and to bestow coherence upon his ordinarily scattered judgements."

THE POPULATION PROBLEM

By A. M. CARR-SAUNDERS Net \$7.00

A book of extraordinary interest dealing with human fecundity, the regulation of numbers, the influence of environment, heredity, evolution, and tradition, and their relative importance.

Library Service for Men

The man in commercial life appreciates the service you render him when you place reliable books at his disposal. Here are a few suggested for your fall additions:

CONTROL OF QUALITY IN MANUFACTURING. By George S. Radford.

An important book for executives of manufacturing plants, large or small. Presents a method of keeping the quality of a product uniformly good. Can be applied in any plant by the management itself. Written in simple, non-technical terms and illustrated with some fifty halftones and twenty line cuts. 404 pages, Cloth, \$5.00. Now Ready.

MERCANTILE CREDITS. By F. H. McAdow.

This volume will be appreciated by the executive who handles his own credit problems as well as by the practical credit man. It has been written by a credit man of many years' standing. It presents a careful study of the problems met in granting credit today and of the principles to be applied in solving them. Numerous successful examples taken from the author's own experience are included. 200 pages, Cloth, \$2.00. Now Ready.

ACCOUNTING THEORY—With Special Reference to Corporate Enterprise. By W. A. Paton, Ph.D.

This is a book every accountant will want. It is a new and noteworthy treatment of accounting theory written from an entirely fresh angle, and discusses in a broad way the developments in that theory that have been made necessary by changes in commercial practice. The ideas expressed are not only highly progressive but eminently sound. 508 Pages, Cloth, \$4.00. Ready, October 10th.

DEPRECIATION—PRINCIPLES AND APPLICATIONS. By Earl A. Saliers, Ph.D.

This is an enlarged and fully up-to-date development of Dr. Saliers' former book on this subject. Without neglecting the underlying principles of depreciation he lays stress on the practical application of these principles as changed by the developments of the last few years. Both the legal and accounting features are fully considered. About 500 pages, Cloth, \$5.00. Ready, October 20-25th.

AUDITING: THEORY AND PRACTICE

(Vol. II). By Robert H. Montgomery, C.P.A. Covers the special points in making audits in seventy typical lines of business. The author brings out for each class the important characteristics that affect the auditor's task, and discusses the points that require special attention or peculiar treatment. A book of constructive business analysis for the executive and accountant. Supplements Volume I (published in 1921), 564 pages, Cloth, \$4.00. Ready, October 25th.

STORES AND MATERIALS CONTROL. By N. M. Cartmell.

A comprehensive discussion of the procuring and handling of materials—from the initiation of the purchase order to the shipment of the finished product. It is the only book which approaches this subject from the point of view of the executive or production manager rather than from that of the accountant. Presents an unusually complete series of forms that will sell the book on sight. It can be used either in large or small establishments. About 450 pages, Cloth, \$4.50. Ready October 25th.

of States Normal School Teachers request the Department of Education seriously to consider the establishment in each Normal School of the State of an adequate library, properly housed, organized, and equipped, administered by a trained school librarian and trained assistant who shall be members of the faculty of the school, and that a supervisor of school libraries of the state, such as other states now have, be appointed under the division of Public Libraries.

ELISABETH HARDMAN FURST,
*President New England School Library
Association.*

SCOTTISH LIBRARY ASSOCIATION

MEETING in Dunfermline, the native town of Andrew Carnegie, the Scottish Library Association was welcomed on June 8th by Provost Norval on behalf of the Corporation. He spoke of the powerful influence of the public library for social betterment, which had been recognized to the full by Mr. Carnegie, who gave of his wealth that his ideals might be realized. Marked improvement in the status and remuneration of librarianship have been the result of librarians putting their whole heart into their work in spite of unrecognized status and unattractive salaries. Sir John Ross, chairman of the Carnegie United Kingdom Trust and the Carnegie Dunfermline Trust also said that altho formal acknowledgment had perhaps not yet been made, that it was coming.

In his presidential address John Minto reviewed the developments in the Scottish library movement during the past year. Inquiries into the conditions of service in Scottish public libraries undertaken by the Council of the Association had met with a disappointing response. Referring to the partially successful outcome of the negotiations between the Government and the Faculty of Advocates regarding the position of the Advocates' Library he said that the chief value of the amount of £2,000 announced as a grant towards the maintenance of the library was in the implied recognition of the Advocates' Library as the nucleus of a national library for Scotland. The President also emphasized the importance of publicity work. Authorities must be persuaded to use the increased rating powers, and the public must be convinced that they are getting value for their money.

"The Scottish Central Library for Students: Its Policy and Purpose" was the subject of an address by Colonel J. M. Mitchell, secretary to the Carnegie United Kingdom Trust, who reviewed the principles of the rural library service as initiated by the Trust. Arising from the experiences of six years the Central Library was

established to supplement the resources of Scottish county library stocks by the provision of advanced or expensive works which by reason of these characteristics should not properly be a charge on the county funds. It is understood that Colonel Mitchell's address will be printed in full. Arrangements for a course of lectures on library practice to be given in Glasgow during the week of October 2nd were detailed by S. A. Pitt. A resolution put the Association on record as favoring publicity work as desirable in the interests of the Scottish library movement, and requesting the Council to consider the advisability of appointing a publicity committee. A visit was made to the Public Library and an exhibition of rural library appliances and stationery in the Rural Library Depository, after which the members were the guests of the Carnegie United Kingdom Trust at tea at Pittencrieff Glen.

An invitation from the Town Council of Stirling was extended to the Association to make that town its place of meeting in 1923, and was accepted.

EDGAR H. PARSONS, *Hon. Secretary.*

GRIFFITH, Florence 1915 P., of the Reference Catalog Department of the New York Public Library has been made cataloger at Connecticut College Library.

HARDING, Elizabeth B., 1919 N. Y. S. appointed librarian of the Rayen High School, Youngstown, Ohio.

HILEMAN, Janet E., 1915 P., of the Carnegie Library at Pittsburgh, appointed librarian at the State Normal School, Clarion, Pa.

MAURICE, Nathalie A., 1906 P., head cataloger at the Smithsonian Institution, was married on September 2nd to Theodore Van Brunt Bennett.

MERRILL, William Stetson, head of the reference department of the Newberry Library, Chicago, completed on September 30 a third of a century of service to that institution. In recognition of the occasion the trustees gave him a check and the members of the staff also presented him with an anniversary gift and a letter of greeting. In June, 1889, Mr. Merrill accepted an offer from W. F. Poole, the Newberry's first librarian, to join his staff, so that he has seen the library develop from nearly its initial purchase to its present size and began his services there four years before the completion of the present building.

MILLENER, (Mrs.) Jessie Scott, 1914-18 N. Y. P. L., is now librarian, Pocatello (Idaho) Public Library, succeeding Edith Gantt 1916-18, who has become head of the Loan Department of the Modesto County (Calif.) Public Library.

PICKETT, Amelia T., 1915 C. P., has resigned from the Dimmick Memorial Library, Mauch Chunk, Penn., to become librarian of the Public Library, Pottstown, Pa.

RICHARDSON, Louise, 1913 P., has been made librarian of the Florida State College for Women, Tallahassee, Fla.

RUSH, Mary Gladys, 1916 P., acting librarian of the Iowa State College Library at Ames, Iowa, was married on August 10th to Cornelius Gouwens of Ames.

SEDEYN, Rachel, 1922 P., was made librarian of the University of Brussels on her recent return to Belgium.

VANNAME, Addison, librarian of Yale University from 1865 to 1904, died on September the 29th. Mr. VanName was one of those who attended the conference of 1876, at which the American Library Association was founded. He was also librarian of the American Oriental Society and of the Connecticut Academy of Arts and Sciences.

WHEELER, Joseph L., who has been on leave of absence since May 1, 1921 in Vermont, has returned to his work as librarian at the Youngstown (Ohio) Public Library, Ethel M. Ruch has recently joined the staff as first assistant in the lending department and Mrs. F. Edith Omelvena formerly of the Grand Rapids and of Pittsburgh public libraries as librarian of the South Side Branch.

Appointments of members of the Western Reserve class of 1922 have been recently made as follows: Anna L. Whitmack, librarian, Argo (Ill.) Public Library; Agnes Brennan, children's librarian, Council Bluffs (Ia.) Public Li-

brary; Bonnie Elliott, children's librarian, Perth Amboy (N. J.) Public Library.

Recent appointments of members of the New York State Library class of 1922 are: Leta, Perry, librarian of the high school library at Fort Wayne, Ind.; Ellen H. Jakway, librarian at Grinnell College, Grinnell, Iowa; Grace L. E. Bischof, chief of the Circulation Department of the Public Library at St. Joseph, Mo.; Lucy M. Buker, librarian of Marshall College, Huntington, W. Va., Gladys H. Hinsdale, 1921-22, has been appointed loan assistant at the Buffalo Public Library.

CURRENT LITERATURE AND BIBLIOGRAPHY

Volume 14 of *Islandica*, the annual relating to Iceland and the Fiske Icelandic collection in Cornell University Library has just been issued (Ithaca, N. Y.: The University. \$2). This volume which covers the Icelandic books of the seventeenth century is, like the other volumes in the series, edited by Halldor Hermannsson.

The fifth volume of Philip Alexander Bruce's "History of the University of Virginia, 1819-1919" (Macmillan) follows the custom of the preceding volumes in tracing the growth of the library. Special collections, use, income, and additions to the art collections are discussed. The library became the largest in the South in 1913-1914 when its collection had increased to eighty thousand volumes.

"A List of Books for the First Six Grades" compiled by Mary Josephine Booth, librarian of the Eastern Illinois State Teacher's College at Charleston forms number 73 of the quarterly *Teacher's College Bulletin*. The books in the school room library of the first six grades of the elementary school are the basis of the list. At first it was intended to include only books actually in these libraries but later it seemed best to add others, as many books used in these grades are not in the school room libraries but are in the general library for use of all the grades. . . Only books in print at the time the list was prepared are included and there are listed books which may seem too old for the average child, but which are intended for the brighter pupils of the grade, or for reading aloud. Descriptive notes have been taken for the most part from authorities and credit given. (148 pages)

From numerous replies received in answer to the article by Elizabeth Kirkwood on "Life

and the Librarian" in *Scribner's Magazine* for June, the editors have selected "The Human Touch and the Librarian" by Eleanor E. Ledbetter, librarian of the Broadway branch of the Cleveland Public Library, which appears in the October number. In contrast to Miss Kirkwood, who emphasized the undesirability of many types of people which frequent large public libraries, Mrs. Ledbetter assures a college student who comes to her to discuss library work as a vocation that "it is the finest kind of social work, since it is constructive, and it has for the worker a wholesomeness which does not exist in those types of social work which deal always with the abnormal and frequently with the pathological. In the library one meets the normal, the sane, the intelligent, and the progressive and one helps them on the up-grade. What can be more truly social work?"

To the Editor of the LIBRARY JOURNAL:

I notice that in both the translations of "Les Matinées de la Villa Saïd" by Paul Gsell, one by Boyd and published by Knopf, and the other by Frederic Lees and published by John Lane, the author and the title of the pamphlet recommended, and lost, by Anatole France, are given incorrectly. On page 171 of the Lane translation and page 206 of the Knopf, the "instructive" or "edifying" little work is given as by Rozière, entitled "La Revolution à Meulan." The book referred to is by Rosières (Raoul), "La révolution dans une petite ville," Paris, 1888 (220 p). It seems to me that it would have been a distinct advantage if either of these translators had verified his references. I trust that this information may save trouble to some other library.

ROGER HOWSON, *Assistant Librarian.*
Columbia University Library.

A BARGAIN**SPRING BACK PERIODICAL BINDERS
FOR READING ROOM USE.**

We have a surplus stock of Elbe spring back binders, bound in genuine Du Pont Fabricoid, extra strongly made with the special inside pocket. They cost us wholesale \$1.10 each. We will sell them, assorted, without stamping, in lots of ten or more to one address, at 50 cents each, while they last.

They will take periodicals up to 8½ x 11 inches in size and up to one inch thick. Samples submitted on request.

Redwood, Sir Boverton, bart. Petroleum: a treatise on the geographical distribution . . . of petroleum and natural gas; the physical and chemical properties, production, and refining of petroleum and ozokerite; the characters and uses, testing, transport, and storage of petroleum products; and the legislative enactments relating thereto . . . 4th ed. London:

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, Of the LIBRARY JOURNAL, published Twice-a-month, at New York, N. Y., for October 1, 1922.

STATE OF NEW YORK, ss.
COUNTY OF NEW YORK,

Before me, a Notary Public in and for the State and County aforesaid, personally appeared J. A. Holden, who, having been duly sworn according to law, deposes and says that he is the Business Manager of the LIBRARY JOURNAL, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

- Publisher* R. R. BOWKER CO.
62 West 45th St., New York.
- Editor* R. R. BOWKER
62 West 45th St., New York.
- Managing Editor* ELEANOR FF. DUNCAN
62 West 45th St., New York.
- Business Manager* J. A. HOLDEN
62 West 45th St., New York.

2. That the owners are:

- R. R. BOWKER CO., 62 West 45th St., New York.
- R. R. BOWKER, 62 West 45th St., New York.
- MARION A. OSBORNE, Montclair, N. J.
- J. A. HOLDEN, 62 West 45th St., New York.
- F. G. MELCHER, 62 West 45th St., New York.
- CAROLYN T. BOWKER, 62 West 45th St., New York.
- A. C. FRASCA, 62 West 45th St., New York.
- A. R. CRONE, 62 West 45th St., New York.
- ELEANOR FF. DUNCAN, 62 W. 45th St., New York.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are:

NONE.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation, has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

J. A. HOLDEN, *Business Manager*.

Sworn to and subscribed before me
this 19th day of September, 1922.

LIBRARY OPPORTUNITIES

POSITIONS WANTED

Librarian with two years' training and seven years' experience wants position in special library in New York City. W. P. 18.

Trained experienced librarian wants position as librarian of a small city or of a branch library in a large system preferably in the east or middle west. R. Y. 18.

POSITIONS OFFERED

Wells College Library, Aurora, N. Y., needs an assistant the greater part of whose time would be spent in cataloging. Apply, giving qualifications, to the Librarian.

A growing Mid-Western public library must fill positions as follows, January, 1923: Three assistants, ranking next to Head, in the Order, Catalog and Children's department respectively. Requirements: B. A. degree and at least one year of library school training. Initial salary \$1600. Address application to E. E. 18.

Public Library of 50,000 volumes, in a Massachusetts industrial city of 25,000 population, needs at once an assistant librarian with training and some experience. An all-around worker is desired with emphasis on reference work. Salary \$100 a month, with increase if satisfactory. Address: A. B. Jackson, Public Library, North Adams, Mass.

The United States Civil Service Commission announces an open competitive examination for junior librarian on November 8th. Vacancies in the United States Department of Agriculture and in positions requiring similar qualifications will be filled from this examination at salaries ranging from \$1320 to \$1620. Competitors will be rated as follows: Library economy, 20 weights; catalog, classification and bibliography, 30 weights; modern languages, 15 weights; education and experience, 35 weights; total 100. Applicants should apply at once for form 1312, stating the title of the examination desired (junior librarian) to the Civil Service Commission, Washington, D. C. or to the local secretaries of the United States Civil Service Board.

Books Wanted for the Far Eastern Republic

The Institute of International Education, 419 West 117th Street, New York, has received a request from Professor P. J. Devine, President of the Teachers College of the Far Eastern Republic in Vladivostok, Siberia, for the books and periodicals mentioned in the list given below. If any readers of the LIBRARY JOURNAL can furnish some of the books needed, these should be sent to: President P. J. Devine, Teachers College of the Far Eastern Republic, 119 Svetlanskaya St., Vladivostok, Siberia; Care of International Exchange Service, Smithsonian Institution, Washington, D. C.

Charges to Washington should be prepaid. The books will then be forwarded by the Smithsonian Institution to Siberia.

Copyright, 1922.

THE BEST BOOKS FOR YOUNG PEOPLE

This series of Gift Books represents the highest standard in the art of color reproduction and bookmaking

- TALES FROM SHAKESPEARE.** By Charles and Mary Lamb. Illustrated with ten full-page plates in color and ten in black and white by Elizabeth Shippen Green Elliott. Beautifully bound in cloth, boxed Net \$5.00
The most beautiful edition of this well-known classic ever published. The entire work has been designed by the artist. The illustrations are real works of art and will be a delight to artists and Shakespearean scholars.
- ROBIN HOOD.** By Paul Creswick. Illustrated with plates in full color by N. C. Wyeth Net \$3.50
Mr. Wyeth has caught the spirit of this wonderful story that fairly reeks with the spirit of the out-of-doors, sunlight and wind, dark forests and shining meadows. The men that roam this countryside are flesh and blood, faces sun-tanned and roughened, their clothes coarse made and stained and fragrant of wood-smoke and scorched venison! One feels them to be capable of all the deeds, good and bad, attributed to them. We become identified with real people. We sense a contemporary quality in them.
- AT THE BACK OF THE NORTH WIND.** By George MacDonald. Illustrated with plates in full color by Jessie Willcox Smith Net \$3.50
"When Our Mother realizes that there are —there must be—children who have not read 'At the Back of the North Wind,' she feels that there should be a society founded, with a president and by-laws and a recording secretary, to see that every child under twelve should own a copy."—*Josephine Daskam Bacon.*
- THE PRINCESS AND THE GOBLIN.** By George MacDonald. Illustrated with plates in full color by Jessie Willcox Smith Net \$3.50
Another one of George MacDonald's child stories that has been read and reread for nearly fifty years. It will be a special privilege for a child to make his first acquaintance with "The Princess and the Goblin" with the aid of Miss Smith's charming illustrations.
- HANS BRINKER, OR THE SILVER SKATES.** By Mary Mapes Dodge. Illustrated with plates in full color by Maginel Wright Enright Net \$3.50
There are few better stories for boys and girls, and a more appropriate gift than this edition with Mrs. Enright's illustrations would be hard to find.
- THE BLUE FAIRY BOOK.** Edited by Andrew Lang. Illustrated with plates in full color and black and white by Frank Godwin. Net \$3.50
The most entertaining collection of Fairy-Tales ever written, including Cinderella, Little Red Riding Hood, Aladdin and the Wonder-Lamp, Beauty and the Beast, and many other old favorites that have pleased children for generations. A Beautiful Gift Edition, large type, good paper and binding and sixteen full-page illustrations by Frank Godwin
- MOTHER GOOSE.** Twelve full-page colored plates and a separate black and white illustration for each rhyme. Illustrated by **Monro S. Orr** Net \$2.50
Mr. Orr has given an entirely original set of illustrations for the old rhymes, which will make glad the hearts of children to whom "Old Mother Goose" is always new. The pictures are works of art, and Mr. Orr has put new life into our old friends without in any way causing them to lose their time-honored identity.
- RIP VAN WINKLE.** By Washington Irving. Illustrated with plates in full color and seventy black and white illustrations by N. C. Wyeth. The most sumptuous edition of this American legend ever published Net \$2.50
- BIBLE STORIES FOR CHILDREN.** By Margaret Livingston Hill. Illustrated with plates in full color by C. Arnold Slade. A story of the Bible beautifully told in a simple way which makes it interesting to children from six to ten years of age. Net \$2.00
- A CHRISTMAS CAROL.** By Charles Dickens. Illustrated with eight full-page plates in full color, and five chapter headings. Wrapper printed in four colors. Bound in cloth, stamped in gold. 12mo. Net \$1.25
- A CHILD'S GARDEN OF VERSES.** By Robert Louis Stevenson. Twelve full-page illustrations in full color and numerous black and white illustrations by Millicent Sowerby Net \$1.25
A beautiful edition of these old favorite verses, which continue to delight both young and old.
- POEMS FOR LITTLE MEN AND WOMEN.** Edited by Norma Bright Carson. Eight full-page illustrations in full color and numerous black and white illustrations by William Francis Taylor Net \$1.25
An anthology of children's poems selected from the writings of Eugene Field, R. L. Stevenson, James Whitcomb Riley, and others. This book contains many children's favorite poems, including "Wynken, Blynken and Nod," "Little Orphant Annie," and "The Boy Lives on Our Farm."
- JOAN OF ARC.** Illustrated in full color by M. Boutet De Monvel Net \$1.50
An artistic volume, appropriately illustrated in color. As the author says in the preface: "Open this book with reverence, my dear children, in honor of the humble peasant girl who is the Saint of her country, as she was its Martyr. Her history will teach you that in order to conquer, you must believe that you will conquer. Remember this in the day when your country shall have need of all your courage."

"THE MOST FASCINATING BOOK IN YEARS"

"It has remained at our elbow nights and days and burned its story into our memory."
Harry Hansen, Chicago Daily News

HARRY KEMP'S
Autobiographical Novel

TRAMPING ON LIFE

Excerpts from the first reviews :

"The next award for the best American Autobiography—last given to Edward Bok—should go to Harry Kemp for his TRAMPING ON LIFE. The book is unique in America, and, so far as we know, in any biographical literature. We have read the 438 pages not only with the liveliest interest, but for the most part with a very real sympathy."—Mrs. N. P. Dawson,
New York Globe.

"TRAMPING ON LIFE is one of the most enthralling of modern autobiographies. . . . It is a beautifully simple prose. . . . In addition to simplicity, the book possesses frankness to a high degree. . . . Many an

autobiography has been ruined by those twin curses, tact and reticence. . . . Kemp just blurts everything out. He reveals himself to an extraordinary degree and yet as we read it, it seemed exactly what he should do."—Heywood Brown,
New York World.

"TRAMPING ON LIFE is a truly distinctive story that should rank with the great biographies of the earth, because it shares with them the qualities that give them enduring life—honesty, simplicity and candor."—Harry Hansen.
Chicago Daily News.

"The publishers declare this autobiography to be 'one of the most amazing self-revelations since Marie Bashkirtseff and one of the most interesting since Jean-Christophe,' and for once they have not exaggerated. but to American readers this book will far surpass either of the books mentioned, for it is the story of an American and all that that means in the way of atmosphere and environment."
St. Louis Globe Democrat.

"The book has been recommended by a far from 'radical' critic for this year's Pulitzer prize in autobiography, and here is an enthusiastic second to the recommendation. Its audacities, its naivete, its vivid, forceful presentation, above all, its grip on several of the most important phases of modern American life, are great."

New York Tribune.

The TEEMING MILLIONS of
BRITAIN'S INDIAN EMPIRE

This picture takes you into the very heart of the story of India. It presents two of the most important aspects of that mysterious land—its crowded population and the powerful influence of its ancient religions. For here we see a dense throng of pilgrims bathing in the Ganges River near the city of Benares. From all parts of India they have come to wash away their sins in the "sacred waters." Back they will go, probably scattering broadcast the germs of plague and cholera. Before the conservatism of the East, Western civilization still stands almost helpless, unable to penetrate the ranks of this vast army of people, unable to teach them the laws of health or sway them from their age-old customs.

INDIA. A land of fascinating and infinite variety is India, which thrusts 1,900 miles downward from the Himalaya Mountains into the Indian Ocean and is inhabited by almost one-fifth of the human race. And what contrasts among these crowded people! They are divided into numerous races and clans; they speak more

than 100 distinct languages and dialects; they profess

Extent.—North to south, 1,900 miles; east to west, 2,000 miles. Area, about 1,800,000 square miles. Population, about 315,000,000.
Physical Features.—Himalaya Mountains, the highest in the world (20,000 to 29,000 feet); Vindhya Range and Eastern and Western Ghats, including the Deccan plateau; deserts in Sind and Rajasthan. Principal rivers: Indus, Ganges, and Brahmaputra.
Products.—Millet, rice, wheat, barley, oil-seeds, cotton, jute, sugar, indigo, coconuts, tobacco, tea, and opium; cotton and silk manufactures, metal work; coal, gold, and petroleum.
Chief Cities.—Calcutta (1,225,000 population), Bombay (980,000), Madras (520,000), Hyderabad (500,000), and Delhi, the capital (235,000).
History.—Aryan invasion, about 1500 B.C.; rise of Buddhism, 6th century B.C.; Alexander the Great's conquest of the northwest, 327 B.C.; Mohammedan conquest, 1001 A.D.; establishment of Mogul Empire, 1526; English East India Company obtained trading posts at Madras (1639), Bombay (1668), and Calcutta (1696); Battle of Plassey established British supremacy over the French, 1757; expansion of British India, 1774–1856; Indian Mutiny, 1857; British Crown takes over government from East India Company, 1858.

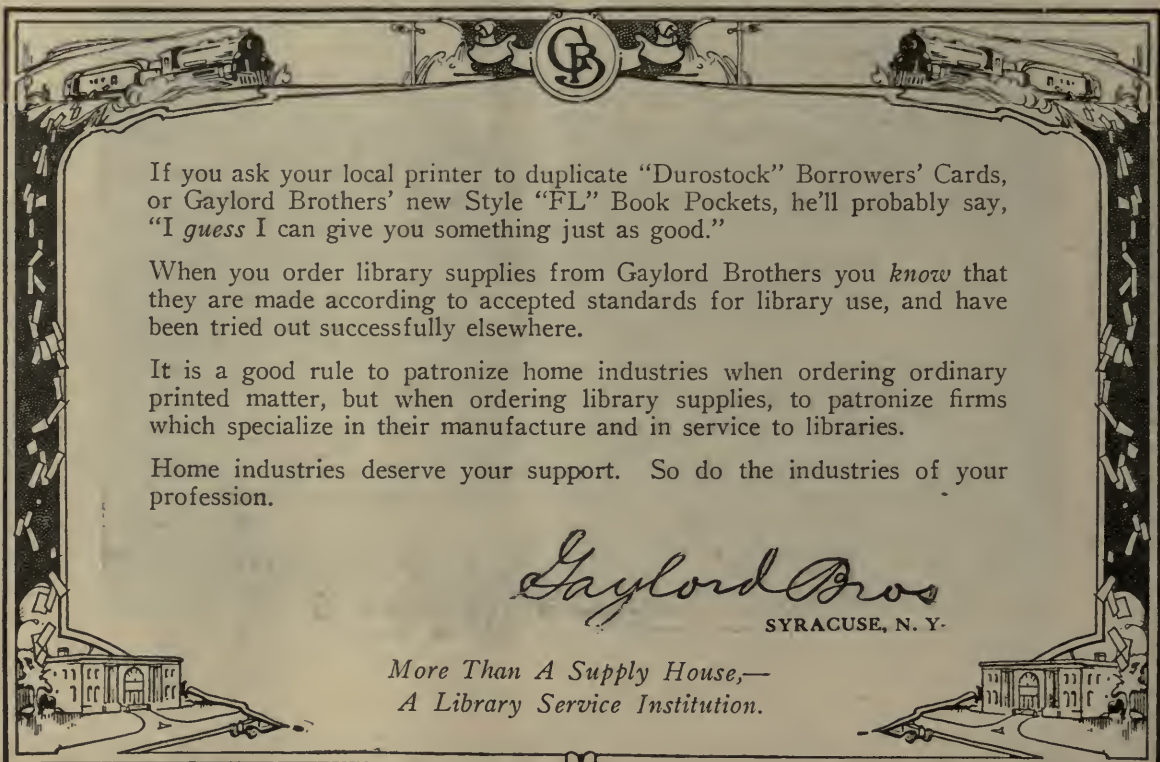

thousands more, weakened by hunger, fall victims to the plague.

The land itself presents almost as many contrasts as the people. In the north the granite peaks of the Himalayas, the highest mountains in the world, are cloaked in eternal snows (see Himalaya Mountains), while in the extreme south Cape Comorin dips its coral-studded foot into warm tropical waters. Be-

COMPTON'S PICTURED ENCYCLOPEDIA *is* NEW!

ABOVE is part of a typical page from Compton's Pictured Encyclopedia, reduced in size 20%. This is the kind of thing that Dr. A. E. Winship had in mind when he wrote, "I wish that every boy and girl in America might be exposed to these books." The remarkable synthesis of picture and title, which introduces the reader immediately and irresistibly to the most fundamental character of India; and the legend below which develops the full significance of the illustration—this is what a prominent librarian meant when she said, "I have seen visual education for the first time." No librarian who seeks to supplement the work of the modern school will overlook the value of these points; the tabloid information, another feature typical of the eight volumes; and the very interesting character of the text. For 100 equally valuable sample pages, free, please address Dept. 3011, F. E. Compton & Co., 58 E. Washington St., Chicago.

If you ask your local printer to duplicate "Durostock" Borrowers' Cards, or Gaylord Brothers' new Style "FL" Book Pockets, he'll probably say, "I guess I can give you something just as good."

When you order library supplies from Gaylord Brothers you *know* that they are made according to accepted standards for library use, and have been tried out successfully elsewhere.

It is a good rule to patronize home industries when ordering ordinary printed matter, but when ordering library supplies, to patronize firms which specialize in their manufacture and in service to libraries.

Home industries deserve your support. So do the industries of your profession.

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

GF ALLSTEEL SHELVING IN REUBEN McMILLAN
PUBLIC LIBRARY, YOUNGSTOWN, OHIO

Does Your Shelving Meet the
Eleven Essential Points of

GF Allsteel LIBRARY SHELVING

1. Reduces fire hazard by reducing the quantity of combustible materials present.
2. Effects economy of floor space and increases book storage capacity.
3. Does not require re-varnishing as do wooden shelves and their supports.
4. Can be easily fitted to any space with little trouble.
5. Easily installed and altered to conform to new requirements.
6. Alterations can be made without injury to shelving.
7. Reserve supply of shelving can be ordered and kept on hand for emergencies.
8. Can be taken down and stored in very small space and re-assembled when conditions require it.
9. Can be optionally reinforced on lower shelves if desired, thus providing greater strength for supporting person's weight.
10. Spacing between shelves can be altered without disturbing adjacent stacks.
11. Label strips for classification of books.

If your shelving does not meet these requirements, let us send you further information.

THE GENERAL FIREPROOFING COMPANY, Youngstown, Ohio

McClurg's —

specialize in library service. Librarians can leave all details of their orders to our care. This is made possible by our long years' of experience in handling the book business of Public Libraries, Schools, Colleges and Universities, together with our comprehensive stock of books of all American publishing houses.

THE PERIODICAL OF Books in Motion

Librarians who must or wish to keep constant check on new publications as they come from the presses of publishers will find *The Weekly Record of the Publishers' Weekly* the most complete survey not only of important books but of pamphlet literature covering every field.

Interesting Current Features About Books

American First Editions. A series of Bibliographic Check-Lists, edited by Merle Johnson and Frederick M. Hopkins. A list of recent and contemporary American authors most wanted among book collectors.

The Weekly Record of New Publications. Aims to be a complete and accurate record of American book publications. Descriptive annotations.

"To every librarian who aims to keep abreast of the times your journal is indispensable both for its comprehensive booklist and its general news items."

ROBERT K. SHAW, Libn.,
Free Public Library, Worcester, Mass.

"I regard the PUBLISHERS' WEEKLY as one of the most valuable, practical publications received by this library."

J. G. PYLE, Libn.,
James Jerome Hill Reference Library, St. Paul, Minn.

"Apart from being an indispensable tool in our work, it has been a real pleasure to pick up the PUBLISHERS' WEEKLY and read."

K. C. WALKER, Libn., New Jersey Zinc Co.

"We have been able to keep in closer touch with new publications at the expenditure of a negligible amount of time. This shows the PUBLISHERS' WEEKLY a real asset."

W. L. POWLISON, Libn.,
Nat'l Automobile Chamber of Commerce.

Monthly Announcement of Forthcoming Books. An alphabetical list of books scheduled for publication during the month ahead.

SAMPLE COPY ON REQUEST

For CHILDREN'S BOOK WEEK

GIFTS FOR CHILDREN'S BOOK-SHELVES. A new list of 85 titles, compiled by the Children's Librarians Section of the A.L.A. at the request of the Library Commission of the Boy Scouts of America, and issued especially for Children's Book Week. Books for younger children and for older boys and girls are included. Each entry gives author, title, publisher and price. Many beautifully illustrated editions are mentioned as well as less expensive ones. Envelope-insert size; 16 pages. Prices: 100 copies, \$2.00; 250, \$4.00; 500, \$7.00; 1000, \$12.00; postage extra.

CHILDREN'S BOOKS FOR CHRISTMAS PRESENTS. A new edition of this popular annotated list, compiled by Sarah C. N. Bogle, has been issued and is in great demand by libraries, schools and book stores. One hundred and twenty-two titles are given, with descriptive notes for each. Printed in two colors; illustrated cover. Envelope-insert size; 16 pages. Prices: 100 copies, \$2.50; 250, \$5.00, 500, \$9.00; 1000, \$17.00; postage extra.

EXHIBIT ON CHILDREN'S READING. Ten panels of heavy grey cover stock, 20x26 inches, mounted with 14 photographs and printed with appropriate captions. Effective for window display, for use at exhibits and meetings, and in the library. Price: \$10.00 for the set; postage extra.

A SHELF OF BOOKS FOR A ONE-ROOM SCHOOL. An attractively illustrated leaflet listing the 25 books for a school library selected by ballot by librarians and teachers at the conferences of the A.L.A. and the N.E.A. The books are listed in the order of their popularity with the voters and each is briefly annotated. Publishers and prices are given. This leaflet is being used and distributed widely to help the cause of good reading for children. Envelope-insert size; 4 pages. Prices: 100 copies, \$1.00; 1000, \$5.00; postage extra.

Questionable Books in Public Libraries—II

By LOUIS N. FEIPEL

Editor of Publications; Brooklyn Public Library

APPROVING OR DISAPPROVING FOR PURCHASE

THE questionnaire asked for information as to who passed on the desirability or undesirability of particular books for purchase; and the answer in four cases was simply, the librarian, or the librarian and board of trustees. But most of the answers went into more or less detail on this point.

In Indianapolis, objectionable or debatable titles are discussed at the weekly meetings of the book-selection committee (composed of the Librarian, the heads of departments serving the public directly, the heads of the catalog and order departments, the supervisor of the branches doing general library work, and the heads of the two branches specializing in work with business men and with teachers), as they come up, and a decision is then made.

In the District of Columbia, all fiction is carefully examined before purchase, either by Dr. Bowerman (the chief librarian) or Mrs. Bowerman. Sex-books are chosen from those recommended by boards of health and other authoritative sources. Books of non-fiction, for which no reliable reviews are available, are borrowed from the Library of Congress before being purchased.

In St. Paul, the rejection or approval of objectionable books of non-fiction rests with the chief of the reference division, assisted by those in charge of the various sections concerned, doubtful cases being referred to the Assistant Librarian and the Librarian. All new fiction is received on approval and read by members of the staff, with a view to restriction or exclusion, if necessary.

In Detroit the decision is made by the Book Committee, composed of the Librarian, heads of departments, the Chief of the Civics Division, the Chief of Publicity, the Instructor of Apprentices, with an added member from the Circulation, Reference, Technology, and Extension Departments.

In—*new books are read or carefully examined by one or more responsible members of the staff, and reviews looked up. They are then reviewed and discussed at a staff meeting. Final decision is made by the librarian.

In Portland, Ore., every book of fiction is read by some member of the staff, and its moral tendency commented upon. If the Librarian has reason to doubt the judgment of the reader, another review is requested. Even after a book is passed upon, the cataloger considers it; and if she has reason to believe that it should be restricted, the matter is brought up further. Often, after a book is on the shelves, it is removed, because of complaints from the public.

In Springfield, Mass., the Librarian's decision is based on the recommendations of department heads and of qualified readers outside the staff.

In Pittsburgh, all books of fiction are first read by some member of the staff, after which they are passed upon by a book committee of the staff, subject to the Director's approval.

Brockton, Mass., in addition to its own book committee, has two other persons giving time to reading and passing judgment on fiction of doubtful merit or suitability. In Denver, also, occasionally some outside reader in whom the library has much confidence, is asked to advise regarding a particular book. Two other libraries, which prefer to remain unknown, have outside readers make recommendations in this regard.

In Jersey City, the Librarian arrives at a decision from a careful study of the various reviews, and when necessary the more or less painful process of reading the book itself. He, of course, often obtains the advice and assistance of the members of the Board of Trustees and other readers before reaching a decision.

* Wherever the name of a library is omitted, it means that the library in question preferred not to be quoted in this discussion.

The Pratt Institute Free Library, Brooklyn, N. Y., requires the reading of every new novel by a member of the staff before acceptance. If uncertainty arises about the desirability of the book, it may be referred to another's reading, and finally to the Librarian.

The remaining libraries do not throw any additional light on this phase of the question.

RESTRICTIONS PLACED ON BOOKS

Indianapolis places one or two copies of objectionable novels in the Central Library only. While every effort is made to keep these copies out of the hands of immature readers, they are circulated without question to adults. Sex-books are not put on a reserve shelf, but are shelved where they can be carefully supervised, and where an effort can be made to keep them from the hands of those who desire to read them from salacious motives. The same method is employed in the case of Boccaccio, etc. They are purchased for the library in good editions, but are issued only to such patrons as can appreciate them as literature. In cases where restriction seems wise, the books are stamped "Closed Shelf" on the pocket, and kept at the desk. They are thus issued to those responsible adults asking definitely for that particular book, but to no others.

In the District of Columbia, books on sex instruction are kept in locked cases, and circulated thru application at the reference desk and the information desk. The less desirable fiction, if purchased, is not duplicated. Certain standard fiction, objectionable in translation, is classed as literature, and placed in closed stacks, instead of being on open shelves with other fiction.

In St. Paul, the assistant in charge of the social science section keeps the least objectionable sex-books where she can keep an eye on the shelves. Those that are more objectionable she keeps under lock and key and they are issued only to those who do not seem to be asking for them just from curiosity. The books on art anatomy are under the special care of the fine arts assistant, and objectionable books in the industrial arts room are under the care of the assistant there. On the advice of the District Attorney, all books on the making of alcoholic drinks are kept off the open shelves. Suggestive fiction, as mentioned above, is in general circulation. This library never stamps the word "Restrict" on any of its public catalog cards.

In the Chicago Public Library, this class of books is shelved in the closed stack. Such of them as are admitted to a few of the larger branches, largely patronized by adults, are held in the custody of the branch librarians, and, on personal application, are issued at the branch

librarians' discretion. They are not ordinarily displayed among the "new books," or otherwise exhibited or exploited in any manner calculated to render them attractive or desirable to persons unacquainted with their quality and tendencies. But when they are asked for, they may be issued from the closed stack. "On the other hand, they may be easily withheld, in the event of plain misapprehension of their purport on the part of the applicant. And the latter phrase covers a multitude of contingencies."

In Detroit, suggestive fiction and "Erotica" are provided with "For Study Purposes Only" slips, are kept on closed shelves, and are given out at the discretion of the Circulation Department. Sex-books are not usually restricted.

The St. Louis Public Library places such books either on closed shelves in the stack, or in the reference department, or in the Librarian's office, according to their character; and they are circulated only among persons who will evidently use them legitimately.

Books which the—Public Library believes to be morally harmful, are marked "Restricted," kept off the open shelves, given out only on request, and given to young people only when the assistant is convinced that it is right for them to have them. The branch libraries have very few restricted books.

In the—Public Library, the ordinary practice is to buy only a single copy of this class of books, and to give this out only on special application. "No such books are permitted in the Juvenile Department of the library, nor would we circulate them to minors, even upon request."

In Jersey City, objectionable fiction is restricted in circulation to mature readers. This is accomplished by placing a distinguishing letter on the book and charging-card, which indicates to the attendant that the book may be lent to responsible adult readers. The Librarian says: "This method has worked satisfactorily in this library; but any restriction such as this must be handled very carefully, and must be given as little publicity as possible, or it may defeat the end for which it is intended. . . . Sex-books are kept in separate collections, such as Teachers' Library or the Medical Department and their circulation is carefully restricted. They are only listed in the card catalog. The unexpurgated editions of the classics, such as Boccaccio, etc., have not been placed in our library."

In the Pratt Institute Free Library, books recognized as meritorious writing, but of questionable or erotic tendency, are subject to restriction, being significantly marked, retired to less accessible locations, or actually locked up.

In Kansas City, a popular series on sex hygiene is issued to adults only. The library does not have all of them. An unexpurgated edition of the "Arabian Nights," altho in the library, is not listed in the card catalog; and its use is restricted.

In Toronto, such books, if recognized classics, are put in the Reference Library and are starred. They are given out only with the approval of the head of the division.

In Baltimore, likewise, objectionable books are starred, and circulation is permitted only on special approval.

Denver places these books on shelves closed to the public, and loans them only on request.

Brockton indicates volumes restricted, in general circulation, by placing a star near the call number.

In Springfield, objectionable books are kept in locked cases, the circulation being restricted to adults, except that sex-books are given, with discrimination, to minors. The library does not attempt to discriminate among adults, "as it is hardly for the library to say who is fitted to take a book, and who is not."

In Portland, a label reading "This book is not issued to minors" is pasted in every objectionable book. Such books are kept in locked cases. If a sex-book is on a social study list, it is put on the open shelf, so that the user is not put to the inconvenience and annoyance of having to ask for it specially. There is usually such a demand for these books, used in certain courses, that it is only the students of the course who secure access to them.

The Public Library Commission of the State of New Jersey circulates objectionable books only to those people who wish them for study purposes, and it asks that they be returned to the Commission immediately, and not loaned further.

In Indiana, books retained by the Commission because of their literary value and in spite of their sex emphasis, are used only for special calls from libraries and clubs familiar with their contents.

The remaining replies do not add anything of importance to this phase of the subject.

LISTING OBJECTIONABLE BOOKS

The question was asked whether or not the library (or commission) listed its approved objectionable books in its printed lists of additions. Nine libraries and two commissions answered categorically, "No." Four libraries answered equally categorically, "Yes." The Jersey City Public Library replied that it did not generally list such titles, but had no fixed rule. So also the St. Louis Public Library, which says

the listing or non-listing depended on circumstances. One library says that it does list objectionable books, but that some fiction is omitted. The Carnegie Library of Pittsburgh lists objectionable books, "with very few exceptions." From Springfield, Mass., came the reply, "Yes and no, according to circumstances." The—Public Library never lists such books in its weekly list of additions, and only rarely in its monthly bulletin. Finally, in the Public Library of the District of Columbia, books that are not objectionable in themselves, but must be circulated only to appropriate readers, are sometimes listed in the printed bulletin.

GIVING REASONS FOR NON-APPROVAL

Librarians appear to be unanimous in believing that it is inadvisable to give general publicity in their communities to the fact that certain works are not approved by them for acquisition; but as regards giving reasons for not approving certain titles to particular library users on request, opinion seems to be about equally divided for and against.

The Pratt Institute Free Library, of Brooklyn, is always glad to state its reasons for not buying a certain book. And with respect to general publicity on this score, it refers to a statement made in its *Quarterly Booklist*, Spring Issue, 1922. The stand there taken is to the effect that as the cost of books restricts library buying, certain books simply cannot be afforded, on the ground that they are less essential than others.

The St. Paul Public Library keeps a file of review cards for all fiction read by the staff, and this includes rejected and restricted books, with reasons for rejection and restriction. These reasons are imparted to individual inquirers on request.

The—Public Library gave a decidedly affirmative reply to the question about giving reasons to particular persons. "It furnishes," so the librarian states, "an opportunity to enlighten inquirers regarding standards of book selection, and it sometimes makes them more thoughtful and more critical of moral tendencies in their own reading, or that of their young people." In one case the Library printed extracts from adverse reviews and handed them to people asking for the book, with good results.

The City Library of Springfield, Mass., prefers not to give reasons for rejection to particular inquirers, but does so if the inquirer persists. The reasons given are general, however, rather than specific. In this connection the Librarian adds: "We do not argue."

The Library Association of Portland, Ore., while not believing in giving general publicity

to this matter, nevertheless does not hesitate to give reasons for rejection, when asked for them. For the most part, their general excuse is that lack of funds makes it imperative to buy the books which will have the widest use.

NEWSPAPER CRITICISM

The practically complete non-occurrence of newspaper criticism on this subject would seem to be a matter for self-congratulation. Only three libraries made replies other than categorical "No's" to the question whether or not any newspaper controversies had arisen under their administrations with regard to this class of books. The—Public Library said, "Nothing worth mentioning." The St. Paul Public Library said: "No. But many comments have appeared in the newspapers." The Public Library of the District of Columbia said: "Newspapers sometimes try to draw us into a statement that a certain book has been rejected or excluded. Usually able to dodge."

WITHDRAWING OBJECTIONABLE BOOKS

The answers to the question whether or not the various libraries (or commissions) had ever withdrawn an objectionable book after it had once been added to their collections, were extremely various. They ranged from categorical "No's"¹ and "Yes's,"² to "No, but books have been transferred to the closed shelf after having circulated from the open shelf" (Indianapolis), "Almost never" (Springfield), "Very rarely" (Pittsburgh), "Once in a great while" (—Public Library), "Occasionally" (St. Louis Public Library and—Public Library), "Yes, a few" (Kansas City), "Yes, on rare occasions" (Pratt Institute Free Library), "Yes, even librarians sometimes make mistakes" (Jersey City), "Yes, i.e., if book proves really objectionable, it is withdrawn or removed from open shelves for restricted circulation" (District of Columbia), and "Yes, if the library has made a mistake in purchasing an objectionable book, either thru a written review of the book or in its recommendation for purchase . . . [but] no book has ever been withdrawn on which final judgment has been passed by the library, even if this book has been objected to by a reader" (Denver).

The Detroit Public Library recalls only one instance of such withdrawal. The Librarian in Portland, Ore., writes: "We often withdraw objectionable books, that is to say, we remove them to the Minor Label shelves. I think it is rather exceptional that we will ever take them from the library, altho we would not hesitate to

do so, if there were a real reason. Recently the American Legion requested us to withdraw a war novel. This we refused to do, but we were willing to make it a Minor Label book." The Indiana Library Commission withdrew one novel sordidly realistic as to sex; another (favorably noted in the *Booklist* for November, 1921) for general worthlessness; and a third for describing college life as all debauchery and flabbiness.

APPROVED AND REJECTED TITLES

In response to the request that librarians give some examples of objectionable titles which they had approved for acquisition, and also some objectionable titles which they had not thus approved, quite a variety of titles was given. Seven librarians declined to mention such titles. The Toronto Public Library, desirous of avoiding the exploitation of titles, nevertheless hinted at scores of current novels, most of which came from Great Britain. A striking feature of the lists of approved and disapproved titles is the fact that in a number of instances one and the same title has been approved by certain libraries and rejected by others.

A BRITISH VIEW

In conclusion, and by way of comparison, it might be well to consider the views of a British writer on the subject, as expressed in the May issue of the *Library World*, in connection with a controversy waged in the *Manchester Evening Chronicle*. The writer says:

"In the first place, it will be well if we remember that the librarian does not act so much as a guardian of public morals as an expender of public monies. He must distinguish between artistic and moral issues. In the former he should lead, in the second follow public opinion. Taste and culture belong to a cultured minority—morality is the expression of the opinion of the majority. A work of art may be for the few, but a moral law is justified only to the extent to which it can be universal. To come to the losses, tho ninety per cent of the rate payers may fail to see the point of duplicating Conrad instead of multiplying Corelli, the librarians should turn a deaf ear to their protests, but if thirty per cent decided that a book were undesirable on moral grounds, it should be barred—with one reservation to be discussed later. The librarian has no right to spend public money on anything which the public as a whole does not consider desirable—the decadent poem, the revolutionary news rag, and the productions of the innumerable quacks with which the world is infested, all come under this heading. Note the word I used—'desirable.' The public never ventures to describe

¹ Chicago, Brockton, and one that prefers to remain unknown.

² Toronto, Baltimore, Newark, St. Paul, and two who prefer to remain unknown.

any work of literary value as undesirable, even tho' it may be above its head.

"It may be argued that this theory is based upon a fallacy—that there is always a large demand for the scandalous and undesirable. This argument, however, is the result of a false assessment of opinion, the result of hearkening to the loudest shout. Tho fifty fanatics might fill the 'silly columns' of the entire press with demands that folk should wear sandals and walk bare-headed, the fifty million who wear ordinary boots and common or garden hats would never dream of mentioning the subject. Similarly, tho the few who look to find 'Salome' in their local library write to the papers, the many who don't want it ignore its existence. If the evidence is properly examined, it will be found that the majority of people have no wish to read doubtful literature. If the majority did countenance this kind of book, it would *ipso facto* be impossible for it to be described as immoral.

"The question now arises of what should be done with regard to the immoral book which is also a literary masterpiece. I should have said that the question would have arisen were there any such books, but there aren't. A masterpiece could not be immoral. If Euripides had lauded Helen as a great lover instead of bewailing the calamity born of her sin, we should have a very different opinion of the worth of his plays. But altho there are no immoral masterpieces, there are unsuitable masterpieces—that is to say, works of art that it is not possible to circulate freely. This is not the fault of the books but of the readers. There are some who are unable to understand moral values. Here the librarian must exercise his judgment, not, however, as to which books people should read, but as to which people should read certain books. This is the answer to so much of the cavilling of those who expect to find Rabelais in the junior library. Mr. Jast, of Manchester, who is taken to task in the before-mentioned article for not placing "The New Machiavelli" on the open shelves, is not guilty of passing judgment upon the morality of H. G. Wells' book. He is passing judgment upon the immorality of some of the people who might want to read "The New Machiavelli"—which is a very different matter. I have little doubt that this book is available, if only the Manchester *Evening Chronicle* Special Correspondent would trouble to make proper enquiries, with certain safeguards applicable to several score of similar works, which belong to the class of unsuitable books. . . . These are not [by] immoral writers, but unsuitable—unsuitable for the degenerates who would use their books only as aphrodisiacs; unsuitable for those who are

immature physically, mentally, or morally. If these books were immoral, we should have no right to buy them—but, as it is, they are works of value when placed in the right hands, and of no harm when kept out of the wrong ones. What, then, is an immoral book? It is not so much a question of theme as of treatment; therefore, so far as librarians are concerned, we might substitute in our argument the word unhealthy for immoral. In a sense, morality is concerned only with the health—the health of nations, the health of men and women. The law of civilization which discourages prostitution is maintained only with a view to furthering the development of the human race; the immorality of war is only recognized as such, when it is recognized, because of the retrogressive effect of war. So an unhealthy book is the same as an immoral book; but to state the question in those words is to remove a deal of worry to the censor. We librarians do not like to pose as moralists, but we have no objection to taking upon ourselves the duties of the physician. And as doctors, we can have no hesitation in sterilizing our shelves, in cutting out and casting from us the morbid, neurotic, wrong-headed decadent books, of which there are too many written nowadays. We must not act against any man who wishes to deal with any question, no matter what its potential dangers may be, so long as his aim is to help mankind to live. We can keep his work away from the wrong people—but when the only effect of a book upon anyone who took it seriously would be to induce morbid pessimism, we save our trust-funds for better things."

Free on Request

A copy of "Eyesight Conservation" being bulletin one issued by the Eyesight Conservation Council of America (Times Building, New York), and covering the subject Eye Conservation in Industry will be given to any library requesting it. This is part of the study of waste in industry being conducted under the auspices of the Federated American Engineering Societies.

The *Hospital School Journal*, published by the Michigan Hospital School, Inc., in the interest of the welfare of cripples will be sent free to public libraries undertaking to keep them for permanent use. Joe F. Sullivan, Farmington, Mich., is the editor.

It should be noted that not all pamphlets mentioned in "Sources of Material for Library Extension Service" (L. J. September 15) are free. The Ward McDermott Press has been receiving requests for Loughran and Madden's "Immigration and Americanization" and "Our Foreign Policy and the Monroe Doctrine," which retail at forty cents the copy.

Humanizing the A.L.A.—Detroit, 1922*

BY MILTON J. FERGUSON
Librarian, California State, Library

IT may be news to a few of the 5000 sturdy souls who make up the American Library Association, that it really stands in need of being brought more closely in touch with human affairs, that it is not now a cog of first importance in the big world machine. But the facts are that it does lack certain essential qualities and characteristics which, if strenuously sought, might be attained, that its members are strangely enough too unearthly, too sublimated, too far off the ground to be able to accomplish their mission of high importance on this earth. I have long had a vague feeling that the indictment above made might be true; I have, perhaps, in times past tried to phrase portions of the charge; but its full burden did not touch my consciousness until the meeting in Detroit. The contrast between the functioning of that great dynamic city and of our large but static order was too vivid to escape even my eyes, accustomed as they have become to considering what is in the A. L. A. is right. I may add that a western business man, who in June, 1922, got his first insight into the workings of the Association, was an instrument in my awakening. What he thought . . . may be expressed in the thought I have tried to convey in choosing my title: the A. L. A. does stand in need of being humanized.

The *Detroit News* of June 27 carried an editorial entitled "The Librarians." To begin with it sketches in a general way the thought implied in the word progress; and decides that in the development of a community other things are "to be considered besides mere geographical expansion and increase in population." It concludes that, "A lively and many-sided interest in the affairs of the community in the part of all its members is the best safeguard for the progress of the group." It holds the belief that "ideas can be spread only thru the medium of books . . . that the more books are read in any community the more will that community be safe against ignorance and prejudice." The job of circulating enough books to squeeze error and prejudice and ignorance out of the land, the writer quite naturally leaves to the A. L. A. and its membership. The indictment innocently enough and quite unintentionally comes near the end of the editorial in these words: "Altho removed from intimate contact with the noise and

bustle of the communities from which these delegates come, they do none the less play an important part in the progress of the cities in which they labor quietly behind circulation desks and in between the stacks."

In the opinion of this writer, librarians are still cloistered, still myopic, still quietly unobtrusive; but do, nevertheless, wield some sort of influence in the life of the community. I am willing to agree with him, I can see certain signs of a less untroubled sleep; and am only impatient that the entire Association does not perceive its shortcomings more clearly and set itself energetically to the correction of its failure. As a good example of progress, there is the city of Detroit—about whose working, more later.

It is not to be denied that all conferences held in the heart of a thriving, business environment suffer a heavy handicap. I have had some little experience with other associations, however, and I am almost convinced that the A. L. A. permits itself to be dominated by circumstances. It is not quite able to rise superior to its surroundings and thereby register a triumph greater than if it worked unimpeded. The trouble, perhaps, is that while our band upon the road it is not of a mind where it is going. It were unkind, in substantiation of this statement, to cite the enlarged program. A great potter was made, the world was on edge, all that remained for the librarian to keep it so was for him quickly and neatly to slip his chunk underneath. And while he set about the job with enthusiasm he soon found that his various members do not work in co-ordination; and for every foot he gained in one direction, he lost twelve inches in the other. He was unconvinced himself; he was, therefore, not a very convincing advocate before the jury of the world.

It would not be surprising if an association with a membership running into the thousands and coming together only once a year were unable to do team work; but one would expect rather definite action from the leaders. In the Council of the A. L. A. we may safely assume that the directing forces of the organization are to be found. Here, if anywhere, we should find plan, method, system, precision of action. But do we? We do not. The Council comes together in solemn conclave; questions previously announced come up for determination and action. They are discussed, revised, amended; and almost invariably are referred back to the

* Reprinted from *News Notes of California Libraries* for July—slightly abridged.

committee whence they came, there to slumber for another year. Thus nothing is done. What is characteristic of the Council in large measure is characteristic of the whole Association.

If one should venture to pick out a tag for the present period of American history, he might not be far wrong if he called it the "age of conventions. . . ." Holding conventions has become an art of a kind. This year in Detroit it began to appear that even the A. L. A. had learned some of the rudiments of the game: the machinery of registration ran smoothly and for the first time in its history a registration fee—small, as might be expected—was collected. It costs somebody money to stage a big gathering. Nobody would expect to get into any sort of show without the price; yet it was estimated that several hundred persons failed to put up their little dollar, and others even spoke on the convention floor against the iniquity of expecting librarians to pay. If our directing forces could be induced to investigate a number of big gatherings organized on a business basis, it might be possible to develop sufficient sentiment to put the A. L. A. financially, on a par with modern convention practices.

The great difficulty, as I see it, is that the library profession has grown upon an unwholesome diet of penury. No other public service is being maintained at such a low rate. The people expect the library to function on almost nothing a year; and librarians themselves have too generally acquiesced in the arrangement. . . . No one expects the public school system to be supported by private benefaction. The people may squirm at the enhanced cost of new school buildings which are rising like mushrooms of great stability all over the country, they may look twice at the pretty fair salaries of the present day teaching profession; but they foot the bills.

Yet, if I remember correctly, one of the speakers at Detroit lifted a prayer for another giver of library buildings. What we need rather is a well planned and continued campaign to convince the public of a fact with which all ages have been conversant, that if a thing is worth having, it is worth paying for, and that gifts too often defeat their good intentions. Rome was not built up thru munificent donations; but, if I read history aright, much giving accompanied that once glorious nation on her downward course.

One of the subjects attacked from all angles was that of recruiting for the profession. The battalions representing America, Canada, college libraries, special libraries, school libraries, children's libraries, and library schools all poured in their hottest fire on this strongly fortified citadel in the Hindenburg line resisting li-

brary progress. No startling, or all-saving charges were driven home; but a belief was somehow current that in the end all would be well. Now as a matter of cold fact is the problem of recruiting not merely one of figures? The work is fascinating to individuals of a certain type; it gives opportunity for that missionary spirit which no longer finds its happiness in ministering to the heathen; it offers employment to a finer element of modern society which actually wants to serve society. The men and women who entered its portals years ago could not be driven therefrom except by physical force. The rub comes, however, with the younger additions, the latest accessions to the ranks, as it were. They are subject to modern demands in the matter of dress, entertainment, table and domicile. It is not to be supposed that they are going to enter upon a professions of doubtful monetary rewards while others of greater promise, and shorter hours, beckon alluringly. Yes, just plain money in sufficient quantity will fill the library ranks; and I, for one, have no fear as to the quality of the recruits.

In one respect librarians in convention are under a great handicap. Their work, as the editorial writer in the *Detroit News* has expressed it, is behind desks and between quiet stacks. The public is induced by whispered example, during fifty-one weeks of the year, to modulate its voice, to speak indeed as tho someone were dead in the house. Is it to be wondered, then, that during the fifty-second when in convention assembled the librarian is unable to raise his voice over his chin? It has so long been accustomed to go trickling down his collar that to do otherwise would be bolshevistic, or revolutionary to say the least, even though the audience behind the tenth row in chorus repeat and reiterate, "louder, louder." My urgent recommendation, therefore, would be that all professional speakers on library programs subscribe for and actually take a full year's course in public speaking before making a bow before the gathering. How vividly did President Burton of the University of Michigan stand out in contrast to almost every librarian who appeared on the program. A little more of the dramatic in the presentation would quite obviously make up for certain dryness of matter.

Librarians who were on the program and who struggled to get it over may, if by accident they should ever learn of my strictures, counter with the charge that library audiences are really not easy to speak to. And I for one would have to acknowledge the justness of the retort. It has become customary in most big conventions to have a sergeant-at-arms and an efficient corps of assistants, who would see to it that the aud-

ience was properly seated, that aisles and exits were not blocked and that the speakers were not duly handicapped by the incoming and outgoing of restless auditors. Librarians bring their whispering faculties, sharpened by long practice, into the meeting; they take the opportunity there to greet old friends and catch up on the past year's news; they indulge in much note or letter writing—which? they seem unable to sit thru even the best of the program; and they gather in a dense crowd at the main entrance. The speakers, therefore, do play an uphill game; in the language of an old time sentimental song, they are more to be pitied than censured.

The Association, in the opinion of a noted visiting English librarian, is too large. His judgment may be correct; perhaps we ought to divide our delegates, permitting some of them to come within the voting pale while the larger group remains without merely as auditors. Certainly it is difficult for all to get together in general assembly; and when members are scattered into sections and allied associations, it is difficult to get appreciable results. Librarians, if one may hazard a guess, are very much like the churches: they are individualists; they believe in splitting the faith; they do not run well in the pack.

As a westerner I was more than moderately interested in the time and attention given to the subject of county libraries. Not so many years ago the topic was one which was whispered about, but not put on the printed program. Unfortunately, the President's radio talk thereon got by me; my receiver was not working properly, or perhaps cross currents interfered. But whatever the ideas expressed, the plan was a good one and I trust those more fortunate than myself were properly convinced—especially, of course, the nonprofessional listeners-in. The county library section was a disappointment. Why should anyone travel even one mile, to say nothing of fifteen hundred, to hear an endless discussion of whether county branch custodians should be called librarians or custodians; and whether a branch is a branch or merely a deposit station. After all, beloved, the county library is no esoteric philosophy: it is merely an attempt to secure enough money to give a fair service under competent direction. It is much more a matter of rates and incomes than it is of deposit stations, custodians and book wagons.

There are always, however, interesting features about these annual gatherings—in addition to the struggle to get three meals of a sort each day. The town, the local setting, is a consideration. As there are few repetitions in the place selected, a regular attendant ought in time to know his country pretty thoroly. Of Detroit we have all

heard much . . . Naturally a city which doubled in stature in ten years, jumping from 500,000 to 1,000,000, would be interesting to a resident of the only state boasting a Los Angeles. . . .

One of the big attractions of Detroit professionally is, of course, its beautiful new main library building which is evidence sufficient that this big city on the St. Claire River believes in library service and is willing to pay for it. Here on the first evening of the conference was held the annual reception under conditions which contributed vastly to the enjoyability of the event.

Detroit, you may know, is a very popular convention city. It is full of life and activity; and has cultivated the art of hospitality to a degree which makes the visitor feel the whole business was staged for his personal entertainment. The Public Library in its every-day work has developed a sense of its responsibility for the human side of its staff and of their relationship to the local citizenry. Thru the office of its social secretary, a work which with great profit might well be emphasized among libraries generally, it was easy for the A. L. A. and Detroit to plan and execute the happiest of arrangements for the "parties" of the convention. The plays given by local talent, the dance, and the "moonless" moonlight excursion on the good ship "Brittania" were events of first importance in the humanizing of the A. L. A. The next city in which the Association gathers may not be so fortunate in the personality and ability of its director of social events, it may not have a river St. Claire made picturesque by the dachshund of water commerce, the ore vessels, it may not be able to offer as added attractions factories of the bewildering complexity of the Ford plant; but it should present something which will give the librarians knowledge of new conditions and people, and an interest beyond their field limited too often to a view from behind the charging desk. Detroit acknowledges that she is both "beautiful and dynamic." Where do we go next year?

"Books for Sunday School Teachers and for Bible Students in the Norwich Public Library" is a 70-page annotated and classified list, prepared as the result of co-operation between the Norwich Public Library Committee and the Norwich and Norfolk Sunday School Union, with a view to giving the Sunday School Teacher opportunities to improve his technique and to increase his knowledge of the subject matter of instructions so as to arrive at that standard which is set up by the day school and which inevitably causes children to make comparisons between the day and Sunday schools in favor of the former.

International Co-operation in Intellectual Work

BY ERNEST CUSHING RICHARDSON, Director of Princeton University Library

THE recent appointment of a League of Nations' Committee on Intellectual Co-operation* has turned a new attention to the bibliographical enterprises fostered by the Belgian Government and under the direction of Senator Lafontaine and M. Paul Otlet. These were at least the occasion of the League Committee and it will necessarily take these into consideration. It did in fact send a Member of the Secretariat to the Brussels meeting of August 20-22, on the future of this work, at which the A. L. A. also had a representative. This representative was however, as at the meeting of the International Catalog of which I shall speak later, an observer rather than a member, for practical membership consisted in representatives of some twenty governments and the representative of the League. The resolutions passed looked to these governments and to the League, not to anything in which the A. L. A. would directly take part. The whole matter is a good deal in the air still and dependent on what the League Committee does.

Meantime it may be interesting to American librarians to have a brief account of what the enterprises really are and the first reaction of the Association's representative.

THE BRUSSELS ENTERPRISES

The Palais Mondial which houses the enterprises is a wing of the great exhibition building at the Place du Cinquentaire. It is splendidly set in the park at the end of the one straight street which leads from the heart of the city and then on again in a superb boulevard indefinitely towards the Congo Museum. The floor space is extensive and for the present adequate. It forms a splendid standing ground for

a group of international enterprises whether under local or League direction.

The enterprises themselves similarly offer a concrete basis and starting point for a number of important enterprises which belong to any universal plan for organized co-operation in intellectual work together with one or two which are less concrete and less bibliographical but are none the less going concerns recognized as of an evident practical character for the real proposition of International Co-operation in intellectual work.

The enterprises are as follows:

1. The Universal Repertory of Printed Books.
2. The International Library.
3. The Universal Encyclopedia.
4. The Joint Catalog of Belgian Libraries.
5. The International Museum.
6. The International Summer University.
7. The Union of International Associations.
8. To this should be added the Palais Mondial itself and the project for an International City.

1. The Universal Repertory. This now contains about twelve million cards, about half and half author and classified. The classified cards, however, contain a vast number of periodical references and the author catalog, which is made up by uniting the Library of Congress cards with pasted slips of the British Museum and Paris printed catalogs and various other printed catalogs, contains a great many duplicate cards of the same title. I figure, however, that it contains about one-third of the world's printed books which are figured in the very interesting museum exhibits as about eleven million. These cards are not edited but entered under the entry of the library itself. It forms therefore a strictly joint catalog of the many libraries included. The name of the library is stamped on the card, as well as obvious from its type, and the net effect is that one has before him the exact data by which to enquire for a book in its library. It may be that it is all the better for being unedited. Its value as a universal catalog is still very partial but as a finding list for books which exist in only one or two of the libraries included, its usable value is very considerable and its possible value, if carried out on a large scale, very great indeed. Scepticism about this grandiose effort toward listing universal literature is wasted in view of this concrete demonstration on a large scale of the real simplicity and utili-

* The Committee consists of D. N. Banerjee, professor of political economy at the University of Calcutta; Henri Bergson, professor of philosophy at the College of France; Mlle Bonnevie, professor of zoology at the University of Christiania; Dr. A. de Castro, director of the faculty of medicine at the University of Rio de Janeiro; Mme. Curie-Skłodowska, professor of physics at the University of Paris; M. J. Destree, member of the Royal Academy of Archaeology of Belgium, and formerly Minister of Sciences and Arts; A. Einstein, professor of physics at the University of Berlin; Gilbert A. Murray, professor of Greek philology at Oxford University; G. de Reynold, professor of French literature at the University of Berne; F. Ruffini, professor of ecclesiastical law at the University of Turin, and formerly Minister of Public Education; I. de Torres Quevedo, director of the Laboratorio Electro-Mecanice at Madrid; Dr. George Ellery Hale, professor of astrophysics at the University of Chicago.

ty. One might criticise details but must admire the long step towards realization of a good idea. The classified part is sketchy still and incomplete. It would need an enormous amount of attention before it half realizes the sanguine hopes of M. Otlet, but there are even now sections among the six million cards which are carried to enough fullness to be of real service to workers. It would, however, be very disappointing to one looking for a consistently developed system.

All Americans are familiar with the stupendous extension of the decimal classification which was prepared for this repertory by the Institute. This is now out of print and a meeting of the Institute was recently held to consider its revision and reprinting.

2. The International Library. This is made up by joining sixty-two small libraries of an international character existing in Brussels and is thus a sort of rough and ready international library in the sense of one which touches all sorts of international questions. It has been suggested that this be extended into an international library in the sense of one which tries to have the literature of all nations—a sort of huge library to which the repertory would be a fitting catalog. There is a real place for a library handling internationalism and international topics in a large way. The League Library is a library of this sort; and something more extensive at Brussels or elsewhere would meet a real need, but the bigger scheme rather staggers the imagination. As a matter of fact the idea simply duplicates the task of the national library. It is based more or less on the idea of receiving copyright copies. Altho the idea has been favourably looked and almost adopted by the League Committee, it is in substance unpractical in view, first, of the difficulties of getting copyright book depositories increased; second, the fact that many copyright books are worthless for intellectual work; and, third, the enormous expense of keeping and administering worthless books.

The Library is of course very miscellaneous and its organization far from complete: it numbers now about a hundred and fifty thousand volumes, aims at two million and suggests twelve million.

3. The Universal Encyclopedia, on which much local interest and hope are now concentrated, is simply a classified collection of pamphlets, clippings, etc., with which American libraries are familiar and many of them practice on a large scale—a sort of dossier of the subject in vertical file form. This collection numbers about a million items in ten thousand groups of folders. It is therefore a

real thing, and in its ambition perhaps unique, but not as unique an idea as it was thought.

4. The Joint Catalog of Belgian Libraries is useful as far as it goes but is not very fully carried thru, and is of course not as extensive as the union catalog of the Library of Congress or even those of other libraries which file the printed cards of the Library of Congress, Chicago, Harvard, John Crerar, etc.

5. The International Museum consists of a great series of forty rooms rather after the fashion of an international exposition exhibiting the intellectual culture of the various nations. Quite a number of nations have taken hold of the project of forming and sustaining the rooms for their respective countries. Other rooms are rather sketchily provided with matters illustrating various aspects of these countries but most of them contain one or more strikingly ingenious exhibits—often statistical charts and graphic representations. This is another big idea with a concrete outlined sketch and some parts filled in sufficiently to give an idea of what the thing might become with general national support.

In addition to these individual national museums is the museum of International Bibliography in several rooms, exhibiting the history of the book, the psychology of the book, etc. . . . It has a wealth of ingenious graphic illustrations and statistics suggesting an almost unlimited field for this museum of international bibliography.

6. The International University is a summer school on international topics by a highly international faculty. It has its analogy in the Williamstown Summer School and the school started this summer at Geneva—made notable, by the way, by a couple of slashing lectures by former ambassador Hill. A striking tribute to this feature was paid by the Chinese representative who said that Chinese students in America, England and the other countries naturally got their ideas from the standpoint of that country thru the year, and they found it of great value to enlarge these impressions in the summer by getting ideas from the standpoint of various countries and in association with the students of the various countries. It is a real idea and one in advance of Williamstown or Geneva. The provision for this university consists of half a dozen rooms in the Palais Mondial for lecture and audience rooms. These are simple in the extreme and the arrangements for lodging and food are equally simple and inexpensive—in dormitories as low as fifteen cents for lodging and breakfast. Living in Brussels for those who can pay more is proportionately cheap for first class accom-

modation. They get perhaps one hundred to two hundred students from a score of nations.

7. The Union of International Associations has some sort of adhesion from more than two hundred associations and nearly one half of all the registered intellectual associations of an international character. It strikes perhaps nearer the centre of the problem of organized international co-operation and intellectual work than any of the others. These associations are themselves organizations of intellectual work in their field and a general organization of these organizations is obviously the starting point for any effort for practical international co-operation covering all branches of intellectual work.

8. The Palais Mondial, housing as it does all these enterprises and granted by the Belgian government for this purpose, is the material basis of the work and the germ or starting point from which the fertile minds of the originators of this great group of organizations are evolving the project of an International City. This at first sight sounds more unpractical and visionary than the others did when they were started, but like the rest it has the beginning of a concrete realization in the Palais Mondial itself. This is a concrete, practical affair, a going concern. What this really means is that the Palais, like the work should be very greatly extended and they have a practical suggestion as to how it should be done, *i.e.*, that the coming world's exposition be held in Brussels a few years hence, that its buildings be so planned that they may remain permanently and house the expansion of these enterprises, especially that of the International Museum.

The first observation on all this is that Mr. Bishop and the others who thought that this matter deserved more attention from American librarians, were right. These plans and their authors have been treated by many as grandiose, visionary and unpractical, and have been neglected by us, but the authors of the idea have pegged away for twenty-seven years and have produced for the world of which we are a part, a going concern with all these features of real usefulness and a concrete property of organized results. It is true that most of these are not only incomplete but in large part only sketchy. On the other hand at almost every point the material, so far as it goes, is organized in such a way as to be a concrete and permanent contribution toward the respective propositions, to which all accretion in the established methods will be a contribution toward a complete result. Even where unorganized in detail there is little that can be called confused.

It is an orderly, methodical result, all along the line—astonishingly so for the force at disposal.

Further than this it is a monument of concrete permanent result for the amount of money expended. When it is considered that the total amount expended is (considering the rate of exchange in the last few years) less than a million gold francs, or less than two hundred thousand dollars and that it has with this produced the repertory of twelve million cards, a library of a hundred and fifty thousand volumes, the Museum, Encyclopedia, Union Catalog and the operations of the University, it is little short of a marvel economically. Much more imperfection could be excused than can be found.

It is true that this result has been achieved at this cost only because Messrs. Lafontaine and Otlet have had no salaries and have given or loaned considerable sums to the enterprise. It is an open secret for example that the Nobel prize which Senator Lafontaine received was largely absorbed into this. Moreover the directors have had an extraordinary personal influence in enlisting voluntary collaboration and the accepting of positions at almost nominal salaries. Still at best the amount of cost is surprisingly small for the results.

While both the directors are men of ideal and enthusiasms, it is quite beside the mark to think of the men or their enterprises as visionary. To begin with, Senator Lafontaine has been for very many years a practicing lawyer and Belgian Senator. He has kept the leadership in the Socialist party, which has been growing stronger and stronger, and he is at present a vice-president of the Senate. Moreover, he and M. Otlet have not only put their enterprises in this well ordered position for development, but have selected and trained an unusually intelligent staff of workers to carry things forward. It is obvious that if they had more money it would be spent toward these objects with a minimum of waste. Now whatever the amount of enthusiasm, this kind of thing is the opposite of the visionary, who jumps at an idea, leaving a trail of confusion in his wake.

It must be confessed that at some point these universal ideas are held without a full perspective, *e.g.* the bulk and cost of a universal library, the proportions that the classified catalog must reach before M. Otlet can begin to put in operation his idea of photographing any group of cards for any users. Nevertheless the directors are quite aware of the limitations and deficiencies of their work, and nothing certainly could be more modest than

Senator Lafontaine's attitude and expression in all these matters. One can well believe the stories that are told of his great social influence among the masses in Brussels and of his achievements for social and industrial peace.

When one considers that the whole amount put into these enterprises is less than the annual budget of many American libraries, including several university libraries, one wonders whether we are extravagant, or else these men in Brussels have not handled their small resources so that they deserve to rule over not less than "ten cities."

In view of this achievement, it is idle to pick technical flaws. These men have at least pointed out something which ought to be done, set up a working example of it and developed methods for carrying it to full or large practical realization.

THE INTERNATIONAL CATALOG

The meeting of the International Catalog on July 22nd was a good deal of a surprise. Not only were there nine or ten nations represented by official government representatives but several of these showed a very vigorous interest and a disposition to continue contributions and assist in paying the accumulated debt. It appears that there are more than two million slips prepared for publication and only awaiting means. The members also showed a strong disposition to get together with the Zurich Index and other enterprises. This was the trend of a written communication of the Smithsonian Institute, which expressed in a very sensible way what would be the natural American way of looking at the matter. It seemed quite obvious that some provision must be made for the scientists, first for the bibliography of their subjects and then for annotated titles or abstracts, as is the term now used. The biological professors are agitating this strongly. They say that the mass of monographic literature in their subjects has become so great that when they do get the stuff on their thesis together it takes all their time to read it—hence the need of abstracts. They are even demanding that the university librarian make them and put them on the card catalog—a truly colossal request. But they need the material, and it can be done by co-operation.

THE CONCILIUM BIBLIOGRAPHICUM

Another visit of very great professional interest was one to the Concilium Bibliographicum at Zurich. The operations of this were stopped by the war and reorganization hindered by the death of Dr. Field. Thanks to the American National Research Bureau, however, and the funds which it secured for the purpose, the work of reorganization has

been taken up most vigorously by Dr. Kellogg for the Bureau and by the new Director, Dr. Strohl, a most competent and efficient man, trained by Dr. Field and afterwards professor in the University. Much of the accumulation of copy for printing and of unfiled cards in the cumulated catalog have been cleared away, and the huge stock arranged and analyzed, the considerable arrears have still to be made up and a new staff both bibliographical and clerical, is still to be secured and trained. It is financed for five years and will get down to business on the old lines at once. Beginning next July it will add two or three new lines. A good many of its cards are out of print and will have to be reprinted before full sets of the cards can be furnished. Experiments have been made, with very admirable results, with the Laupen methods (Manul and a new method claimed to be far better still) reducing cost of reprint two-thirds. A very significant feature of this office is the complete cumulated catalog and a very interesting possibility the hope that if these reprint methods prove as inexpensive as they promise, that we may get these cumulated catalogs in book form.

Altogether these going enterprises in bibliography, all with their attention more or less focussed on the problem of getting the bibliography of natural science well done, should be able to get results. No field is riper for some Committee on "Intellectual Co-operation" to secure substantial results by getting the various enterprises together to divide up the field and avoid wasteful duplication of effort. The size of the problem is indicated by the fact that the International Catalog figures an amount of £15,000 a year for printing. One cannot help wondering whether they and the bibliographical world in general will not be forced to use less expensive means, printing directly from typewritten cards by photographic methods. In the case of science cards, however, where the demand ought to reach a thousand copies, printing may be the best in any event.

Among American Librarians who registered at the American Library in Paris during the summer months are: Beatrice C. Wilcox, New York. Mary S. Saxe, Westmount, Canada, Edith Guerrier, Boston, Corabel Bien, University of Oregon, Metta Loomis, Illinois College of Medicine, Chicago, Mary Melcher and Eliza Lamb, University of Chicago, Theodore W. Koch, Northwestern University. Grace Berger, Kansas City, (Mrs.) Frances B. Linn, Santa Barbara, (Mrs.) Caroline Engstfeld, Birmingham, Miss Jordan of Minneapolis, Edith Eastman, East Cleveland, and Ernest C. Richardson, Princeton University.

David Copperfield's Library*

WHEN in Florence last March, I heard from New York that there was to be a meeting of English librarians in London, on April 26, when a gift

of books from the French Republic would be formally presented by its ambassador to David Copperfield's Library at 13 Johnson Street, Somers Town.

More than two years ago, the Rev. J. Brett Langstaff, a Harvard and Oxford graduate, of Scottish parentage but American-born, was working in a settlement at Magdalen College House in London. In his walks he discovered a house where Charles Dickens had lived in his boyhood, and formed the idea of establishing a children's library there, "a happy book world for boys and girls." to "make up for the miserable times Dickens had when as a lad of thirteen he lodged there. because his

EUSTACE, "THE CHILD WHO, HAVING READ EVERY VOLUME IN DAVID COPPERFIELD'S LIBRARY, ASKS FOR MORE." DRAWN BY H. M. BATEMAN FOR "NOT SO BAD AS WE SEEM," THE SOUVENIR PROGRAM OF THE PERFORMANCE GIVEN ON BEHALF OF THE CHILDREN'S LIBRARY

father. . . . was most of the time in a debtor's prison."

A circular printed a few months later was endorsed by his son, Henry Fielding Dickens, Barrie, Galsworthy, Kenneth Grahame and others. Money was raised by the gift from actors of a Dickens birthday matinee, arranged by Ben Greet. the house was given and its reconstruction begun. Bulwer-Lytton's comedy, "Not So Bad as We Seem," which had been acted seventy years before by Charles Dickens and his friends, including Douglas Jerrold, John Forster, Mark Lemon, Westland Marston, R. H. Horne, Charles Knight, Wilkie Collins and John

Tenniel was acted in November, 1920, by an equally distinguished cast, some of whom were Henry Fielding Dickens, W. L. George, Pett Ridge, Sir Gilbert Parker, Justin McCarthy, Compton Mackenzie, Major Beith ("Ian Hay"), E. Temple Thurston, Miss Rebecca West and Mrs. Asquith. The program was in a book edited by Owen Seaman, with an attractive paper cover in three colors, and short articles and poems by most of the authors mentioned above, besides Stephen Leacock, Hugh Walpole and others, with sketches of Dickens characters by well-known artists, and extracts from letters by John Sargent, Kate Douglas Wiggin, Louis N. Parker, Bernard Shaw, Lady Astor, Laurence Binyon, G. K. Chesterton, Lord Dunsany, John Galsworthy, and Rudyard Kipling, wishing success or enclosing money, or both.

The house was put in repair and the library opened with a gift of children's books from American publishers, and six drawings in color by Leslie Brooke, from the staff of the New York Public Library, chosen by Miss Marie Shedlock. Since then, Mr. Langstaff has given his services as librarian, but comes back to this country in November.

On April 26, I had the happiness of seeing David Copperfield's Library. I had the address, 13 Johnson Street, Somers Town, but had not an idea where it was. The taxi-driver, however, went straight to it, passing Madame Tussaud's, St. Pancras Church, and the Euston Station, and turning into a street of small houses, with those near and opposite Number 13 as brave in flags as Mrs. Cratchit and Belinda were in ribbons on Christmas Day. On the house is a modest plate with the information that Charles Dickens lived there when a boy. The door is level with the sidewalk, and an iron railing on each side protects the windows. I rang, was admitted and introduced myself to Mr. Langstaff, who was so busy, pounding away at a typewriter, that after I had seen the pleasant library room, with Leslie Brooke's pictures on the light yellow walls, I told him that I would take a walk and be at the Town Hall at three. The room has tables and chairs of the right height for growing boys and girls, a fire place, and a friendly and homelike look. A full set of Dickens is on a shelf by itself, a little higher than the low bookcases around the walls, where new, fresh books are ranged in excellent order. They were at that time for room use only, but Mr. Langstaff's intention has always been to have them circulated as soon as a trained librarian can be employed.

* The David Copperfield was formally presented to the Borough of St. Pancras toward the end of October.

At three o'clock, I went to the Town Hall, where His Worship the Mayor of St. Pancras and the corporation hold their meetings. Only a few men and women were there at first, but others came in, till the hall was more than half filled. We waited for the exercises of the afternoon to begin, but nothing happened for half an hour, when the French ambassador appeared, escorted by the Mayor in a business suit with a chain of great gold medallions, each as large as a twenty-dollar gold piece. He spoke a few well chosen words of greeting, and introduced the Ambassador, le Comte de Saint-Aulaire, who spoke at first in English, and ended in French so clear and distinct that anyone near him could follow every word. The French Government had sent four hundred francs' worth of books, which Mr. Langstaff invited us to see in the Library after the meeting. A member of the Library Assistants' Association spoke. Pett Ridge, the novelist, who sat next to me had introduced himself and his neighbor on the other side, Alfred Noyes. Both were among the speakers of the afternoon, Mr. Ridge telling of Somers Town from the days of the French Revolution when families of émigrés lived there, down to the present time, when "there has come an air of prosperity which was once absent." Alfred Noyes read a poem that he had written as an Epilogue to "Not so Bad as We Seem," of a boy creeping to a garret, finding "a book of magic, and the wizard name, Defoe," and

sitting there, "A small boy, reading in a garret, A great king, seated on a throne," Long afterward, going from his grave in the Abbey to the house, the boy saw thru the window a harbor of ships, every one manned with a crew of urchins in search of adventure, with "skippers new and old," the Pathfinder, Mark Twain, "a lean Samoan Scot, named Robert Louis," "Defoe, still dreaming of his island" and "wings of the Never-never land." He wondered who the harbor-master could be, whose bright lights were shining as they never shone for him, climbed to the little room, groped for him and "saw him, stiller than a stone, A small boy, reading in a garret, A great king, seated on a throne."

After "Bob Sawyer's Party" had been recited, the meeting adjourned for tea, and then everyone went to the Library, filling the small rooms. Mr. Langstaff's only assistants have been neighborhood boys, the Warder of the Keys, the Warder of the Door, and the Warder of the Dungeon, which is a bright and pleasant room on the ground-floor, with colored pictures on the walls. The Warder's business is to entertain little children while their older brothers and sisters read comfortably upstairs. The older boys—possibly the girls—wear in library hours blue smocks like artists' over their clothes, Mr. Langstaff preferring clean-covered children to covered books.

The French books, illustrated Jules Verne's and others, were lying on the library tables waiting to be looked at and admired. They are a noble gift to the Library.

Most of the guests went up the narrow stairs to the bare little attic where Charles Dickens read. The house was full to overflowing, and the happy spirit of the Library was reflected in all the faces. It is not hard to fancy shadow forms sitting at the tables after the house is closed for the night, Tiny Tim, Little Nell, the Four Kenwigses, Jenny Wren, Tilly Slowboy, Peepy Jellyby, Pip, Oliver Twist, Mary Ann, the Marchioness and the Nubbles children, with the Fat boy and Young Bailey looking on in an indulgent and grown-up manner.

The London *Times* of September 13th says: "The presentation of what is called 'David Copperfield's Library' to the Borough of St. Pancras will soon be made. The ceremony will be held at the Mansion House under the presidency of the Lord Mayor. The library is to be kept at 13 Johnson Street, Somers Town, which is the only one remaining of the several houses in which Charles Dickens spent his boyhood. It is to be a free library for children, a type that is popular in America. A sum of £20,000 is required to equip and endow the library." CAROLINE M. HEWINS.

NO. 13 JOHNSON STREET, SOMERS TOWN, THE BOYHOOD HOME OF CHARLES DICKENS. THE CHILDREN'S LIBRARY IS ON THE SECOND STORY.

Librarians' Pensions in New York

THE 1921 report to the Trustees Section of the A. L. A. on the subject of retirement systems pointed out that in a number of states, including New York, the state librarians come under pension laws as employees of the state. Altho this applied to all librarians in the state service it was at that time limited to state employees. This year (as already reported in the LIBRARY JOURNAL) the New York law was so amended as to extend the system to all county and city employees. It forbids the creation of any other new retirement system by any county or city. It is still a state system managed by the State Comptroller and under supervision of the State Insurance Department. It is a form of insurance based in part on contributions by the beneficiaries and supported and stimulated by substantial subsidies from the state, counties and cities. It is carefully worked out and pronounced actuarially sound by experts. It is among the most liberal, if not the most liberal system, ever established by any state.

Before it becomes effective in a county the county supervisors must approve it. In the case of a city it must be approved by the common council and the board of estimate. A number of counties and cities have already adopted it and many employees from different departments have become members.

Each member is required to contribute a certain percentage of his salary, which is deducted on the monthly payroll and forwarded to the State Comptroller. This percentage varies according to age and occupation from three to eight per cent, usually about six. These contributions together with those made by the city, the county and the state constitute the retirement fund.

The system provides for regular service retirement, disability retirement and discontinued service retirement. Service retirement is optional at sixty and compulsory at seventy. The allowance under service retirement consists of a pension and annuity which together provide a total of one-seventieth of the final average salary (average for the last five years) multiplied by the number of years of service rendered as a member of the system. This amounts to one-half of the final salary for the employee who serves thirty-five years.

Disability retirement is provided for employees mentally or physically incapacitated for duty after fifteen years of service. The allowance under these conditions is somewhat smaller but not less than twenty-five per cent of the final salary.

The discontinued service provision is for those whose position is abolished or who are otherwise thrown out of service thru no fault of their own after twenty years of service. They may receive an allowance equal to the then present value of a retirement allowance beginning at age sixty.

An important feature is the return of contributions when an employee withdraws from service before attaining retirement conditions. His accumulated contributions with four per cent compound interest are payable on demand. Provision is also made for his return to service.

On retirement employees have various options with regard to the manner in which their pension shall be paid, whether to themselves, to their heirs or to their assignees.

Membership in the system is optional with all employees in the service June 30, 1922. With all later appointees it is compulsory.

Prior service allowance is one of the most liberal features of the law. This gives credit to present employees for past service to June 30, 1922, provided they join before June 30, 1923. No contribution is required of present employees in order to receive credit for this past service.

The time limit thus set for joining makes it very important that the system should be adopted before the middle of next year. It therefore behooves employees to exert themselves to secure its adoption by the local authorities. Delay until after that date will mean tremendous loss to present employees, possibly amounting even in individual cases to many thousands of dollars. This possible loss makes responsibility for the delay a serious one first for local officials who fail to register as soon as the officials have adopted the system.

It has been approved (October 17) by the following counties: Essex, Hamilton, Monroe, Onondaga, Rockland, Saratoga, Schenectady, Steuben, Washington; and by the following cities: Newburgh, New Rochelle, Rochester, Schenectady, Watervliet, Yonkers.

Here is an illustration of what the loss by delay may mean to a librarian. Suppose she is fifty years old and has had twenty years' service. If she joins now and retires in fifteen years at sixty-five, when her salary is \$2800, her retirement allowance will be 35-70 or one-half of \$2800, which is \$1400. If she loses the twenty years prior service allowance, her pension will be 15-70 of \$2800, or \$600, a loss of \$800 a year, for the rest of her life.

Full information can be found in two pam-

phlets, which may be obtained of the State Comptroller at Albany. One gives the text of the law, the other a brief outline of the system together with numerous questions and answers in regard to it.

WILLIAM F. YUST, *Librarian,*
Rochester (N. Y.) Public Library.

Bargains

WHY pass a bargain by, especially when you must leap your own doorstep to do so?

There are still some librarians reported as paying thirty shillings plus postage or commission, that is, well over seven dollars at present, for *Blackwood's Magazine*, or *The Edinburgh Review*, or *The Quarterly Review*, tho each can be had from New York delivered for five dollars any two for nine dollars and fifty cents, or all three for thirteen dollars and fifty cents.

Similarly, *The Nineteenth Century*, forty-eight shillings each, in England, can be gotten here for seven dollars apiece, thirteen dollars and fifty cents for two, or twenty dollars for the three.

There is no snake in the grass either. It is the genuine English originals, not reprints. that are furnished, and an American firm old at the business maintains the service. The trick is this: The text is imported in sheets and the covers then attached carry American advertising. A bit of enterprise for which the Leonard

Scott Publication Company merits all praise. May its tribe increase.

And here is a good place to point out the marked contrast between the University of Chicago Press' handling of thirteen Cambridge University Press Journals and The Macmillan Company's handling of Cambridge University Press books. The former lists at twenty to twenty-five cents a shilling; the latter, at nearly forty. These journals are, *Annals of Applied Biology*, *Annals of Bolus Herbarium*, *Biochemical Journal*, *Biometrika*, *British Journal of Psychology*, *Journal of Agricultural Science*, *Journal of Anatomy*, *Journal of Ecology*, *Journal of Genetics*, *Journal of Hygiene*, *Journal of Physiology*, *Modern Language Review*, and *Parasitology*. It is generally not unprofitable to order Cambridge periodicals from Chicago. It is not known ever to fail of being unprofitable to buy Cambridge books from Macmillan shelves in this country. And vet agents are always asserting that there is no money in periodicals.

All which keeps a white light beating on the copyright question.

PURD B. WRIGHT

A. L. A. Committee on Book Buying.

* Mr. Cannon, tho a member of this Committee, wishes to be recorded as not in full approval with everything in this Bulletin.

Special Pictures for Colored Children

AT the Negro Public Library, Nashville (Tenn.), we find our children always interested in looking at negro pictures and especially pictures of negro children—almost an unknown quantity in their text books. Accordingly we have had snapshots taken of our story hour and of groups in the children's room and have made of these Children's Book Week postals. We have also gathered larger pictures of all races of children, pasted them upon cardboard with appropriate lettering, and used them as a supplement to the official Children's Book Week poster on the bulletin board. In recognizing familiar faces the children see the possibilities of their group. Duplicates of the average kodak picture costing about five cents have had appropriate slogans printed by hand upon the mounts and these make very effective and

inexpensive postals. Some of the posters placed in business houses have proved to have strong appeal to parents.

MARIA M. HADLEY, *Librarian,*

IN THE CHILDREN'S ROOM, NASHVILLE NEGRO LIBRARY

Noblesse Oblige in 1923

CALL upon the nobility of the library associations, the president and past-presidents of the A. L. A. and of the S. L. A., of the state, law and the college associations and groups one and all, beginning now, to think steadfastly of the next conference, and determine each, as his own responsibility, to help to make it a model for all conferences; that the librarians in fellowship may lead in the art of coming together for the good of all concerned.

The Detroit Conference meant much to me; and it was a very good sign when Miss Rankin, the new President of the Special Libraries Association began its last session on the program to make preparations for 1923 and to emphasize the need of having the Association work thru-out the year, so that the annual meeting will summarize and clinch what has been going on for many months.

By way of suggesting one definite subject to consider, let me say that three of the A. L. A. and one of the S. L. A. delegates informed me that they lacked introduction and felt, as it were, not in the game (and am I not safe in asserting that there were hundreds of others that felt the same way). Such failure to feel one's self a part of the conference was not peculiar to Detroit, but characteristic of all the larger conferences I have attended (upwards of fifteen) in the past twenty years. The difficulty lies, I believe, in so little attention on the part of the management to what may be called the amenities of the meeting. Such omission results, of course, from the management feeling so much the responsibilities for the obviously important features, that it assumes the less obvious features are being attended to by others. Others there are in plenty who would attend to these details, if properly instructed; and I believe that to get them instructed and to get the necessary number of volunteers, is merely a matter of taking time by the forelock and giving due attention to these lesser matters before the rush is on.

It seems to me there is an unconscious inner circle of the A. L. A. and a somewhat conscious inner circle of the S. L. A., in which latter circle I include myself. If we would democratize the conference and do away with such almost inevitable cliques we need to spread responsibilities among the many and to begin on this well before the first of the year. We don't want any inner circle, but we can hardly escape it without serious effort, without what I would call "prayer and fasting."

A second matter for consideration and the

subject of complaint year in and year out—as probably with many other conferences also—is the change of time and place of meetings, without due notification. This confronted the Information Committee at Detroit and, on inquiry, I find it was a very great trouble for the Information Committee of the National Educational Association, which met the first week of July in Boston, when the registration was about 10,000. It seems simple enough to tell the Information Committee of changes in time and place and have these posted on the bulletin board to which the Committee can direct attention. It ought to be simple enough to get the delegates into the habit of inquiring of this Information Committee, and simple also to put in prominent letters on the general program the advice to keep in touch with the Information Headquarters; but apparently it is not easy to think seriously of these things long enough before the conference to have them remembered at the critical moment.

As a step that should make conservative librarians take note, I venture to suggest that for 1923 the title be

"FEDERATED LIBRARY CONVENTION"

Being:

The Forty-fifth Annual Conference of the American Library Association,
The Twenty-sixth of the National Association of State Libraries,
The Eighteenth of the American Association of Law Libraries,
The Fourteenth of the Special Libraries Association,
The Fourth of the Library Workers Association.

Under such title, if the sessions are listed without mention of association or group name, then the delegates will not say "We don't belong here."

The Secretary and the Central Office can, of course, do very much in seeing this betterment thru, provided the initiation and the morale are furnished by the nobility.

GEORGE WINTHROP LEE.

Some Children's Book Lists

THIS list makes no attempt at completeness and does not include recognized bibliographies of children's books such as the H. W. Wilson Standard Catalog and the Pittsburgh Library Catalogue of Children's Books. The aim of the compiler is to bring out shorter lists of children's books on a variety of subjects and

representing libraries, schools, book-shops and other agencies working in the interests of children.

Illustrated Editions of Children's Books, a selected list. 1915. Carnegie Library of Pittsburgh.

Favorite Books of Well-known People when they were Boys and Girls. 1918. Carnegie Library of Pittsburgh.

Twenty-Five Books for a Country School, selected by vote of the American Library Association and National Educational Association. 1922. H. R. Hunting Co., Inc., Springfield, Mass.

Books for Boys and Girls, a selected list, compiled by Carolue H. Hewins. 1916. American Library Association.

Graded List of Books for Children, prepared by the Elementary School Library Committee of the National Education Association. 1922. American Library Association.

Books to grow on, an experimental intermediate list selected from the Open Shelf Room. 1916. Buffalo Public Library.

English Reading Lists, compiled by the Department of English, Haaran High School. 1921. Hubert and Collister St., New York City.

The Hartford Reading Lists, prepared under the direction of Katherine S. Hazeltine of the English Department, Hartford Public High School, William E. Buckley of the English and History Departments, and Anna L. Bates, the School Librarian. 1922. Henry Holt & Co.

Two Lists of Books for Children—Some First Books: Some Later Books In Roads to Childhood by Annie Carroll Moore. 1920. G. H. Doran.

Books for Vacation Reading, compiled by the Lincoln School of Teachers' College. Practically all these books have been selected and most of them annotated by the pupils in the seventh, eighth, ninth and tenth grades. 1919. The Lincoln School of Teachers' College. New York City.

Science of Technology, books for the High School Library, compiled by Edith Erskine. 1919. Chicago Public Library.

Heroism, a reading list for boys and girls. 1914. The New York Public Library.

Out-of-Door Books, a list of specially readable books for young people in high school or college, compiled by Marion Horton. 1918. Bookshop for Boys and Girls. 264 Boylston St., Boston.

Reference Reading for Girl Scouts. In *Scouting for Girls*, Official Handbook of the Girl Scouts. 1920. Girl Scouts, Inc. 189 Lexington Ave., N. Y. C.

The Book Shelf for Boys and Girls, selected and annotated by Clara W. Hunt, Franklin K. Mathews and Ruth G. Hopkins. 1922. R. R. Bowker Co. 62 West 45th St., New York City.

A List of Books for Boys and Girls suggested for Purchase, offered by Marian Cutter of the Children's Book Shop, compiled by Jacqueline Overton. 1921. 5 West 47th St., New York City.

Books for Boys and Girls, a suggestive Purchase List, compiled by B. E. Mahoney. Revised 1917. The Bookshop for Boys and Girls. 264 Boylston St., Boston.

Stories to Tell to Children, a selected list with stories and poems for holiday programs. 1918. Carnegie Library of Pittsburgh.

A Graded List of Stories and Poems for Reading Aloud, compiled by Harriet E. Hassler. 1915. New York Public Library.

Favorite Stories of Library Reading Clubs. 1915. New York Public Library.

An Historical Reading List, compiled by Leonore St. John Power for "The Story of Mankind" by Hendrik Willem van Loon. 1921. American Library Association.

Lists of Stories and Programs for Story Hours, edited by Effie L. Power. 1915. H. W. Wilson Co. New York City.

Plays for Children, an annotated index by Alice I. Hazeltine. 1921. American Library Association.

Plays for Children, a selected list compiled by Kate Oglebay for the New York Drama League and the Inter-Theatre Arts, Inc. 1922. H. W. Wilson Co., New York City.

Suggestions for a Christmas Program, prepared by the Drama Department. Community Service Inc. 315 Fourth Ave., N. Y. C. 1920. 25 cents.

A Graded List of Pantomime for all amateur production, with an historical article on the pantomime by Elizabeth Hanley, prepared by the Drama Department, Community Service Inc. 1920.

A List of Pageants, Masques and Festivals, prepared by the Drama Department, Community Service Inc. 1920.

LEONORE ST. JOHN POWER, *Librarian*.
Central Children's Room,
New York Public Library.

A Guide to the Use of Libraries

Hutchins, Margaret, Alice Sarah Johnson and Margaret Stuart Williams. Guide to the use of libraries; a manual for college and university students. 2d ed. H. W. Wilson Co., 1922.

AS the preface states, this book is a development of a course in reference work for freshmen and sophomores at the University of Illinois. All three of its authors are or have been in charge of sections of successive classes taking this course. The present edition is an enlarged and generalized treatment of the first edition. This in turn was frankly a class manual based on the organization of the University of Illinois Library.

The material of both editions has been tested by years of classroom use. Its statements are accurate. It is well balanced and the distinction between important principles and non-essentials is well drawn. The illustrative examples are well selected and the student who successfully completes a course based on this book as a text should feel at home in the reference department of any good college, university or public library.

In a recent review Brander Matthew says "At a luncheon attended by half a dozen men of letters, I propounded the theory that the first writer who uses a situation deserves credit as its inventor; the second is a plagiarist; the third is merely lacking in originality and the fourth is only drawing from a common stock."

The field of reference work as treated in library schools, library training classes and library periodicals has been well-defined so long that any treatise on the subject is practically forced to get into the fourth class and to draw

from a more or less common stock. Experienced teachers of library methods and reference librarians will find little that is novel in this work. They will find a great quantity of well-known facts and principles well arranged and interestingly presented. The novice will find much that is new to him but little that should not be a part of his intellectual stock in trade.

The book is so free from non-essentials that it is at times a little hard to use without an instructor to enlarge upon the text and to furnish additional illustrative examples. A good example of this is found in the admirably condensed chapter on the general characteristics of reference books. The notes on the individual books given as examples in the various chapters almost always successfully avoid a brevity that is misleading and a fullness that makes actual examination superfluous for the indolent but quick-witted student. Even here an instructor will sometimes be needed for adequate understanding. For instance, the note on Day's "Collocan" (par. 251) does not mention two major weaknesses of that plethoric collection: failure to give definite sources of quotations and the fact that the work is out of print and hard to obtain. In the note on Roget's "Thesaurus," attention might be called to the wide use of this work in newspaper offices and to the fact that it is obtainable in several editions. In general the books selected for annotation are those no respectable library wants to be without so that the student really should get a good general background for work nearly anywhere in the United States where libraries flourish. The excellent collection of the University of Illinois (tho often subconsciously in the background) is not over-emphasized in the selection.

The general note on Geography (par. 143) does not mention the excellent maps in most general encyclopedias and directories, altho they are casually mentioned in the chapter on encyclopedias. I recall my own delight some years ago in discovering that Ayer's Newspaper Annual is a very serviceable office atlas and gazetteer. This is one of the few places in which the various sections are not well correlated and in which the interrelations of varied types of reference books are not indicated. The student is repeatedly advised to use the general shelves of the library for books giving full treatment of the subjects under consideration. At times there is a dash of humor. The statement is made that "Who's Who gives very concise biographical information about prominent living Englishmen," while Who's Who in America includes "brief biographical facts concerning noteworthy living people of the United States." Those who have watched the rapidly increasing

corpulence of the latter volume will appreciate the fine distinction in synonyms.

The chapters on general library organization are very good. Sometimes (as in the very detailed chapters on the card catalog) hardly enough mention is made of the many important departures from the arrangement here outlined. In many very good college and university libraries as well as in many public libraries a student would find it hard to reconcile the precept of the text and the practice of the library. In the chapter on classification it would be profitable to include a few more of the general subjects in the outlines on the three classifications (e.g. Psychology in the E. C.). It is a little questionable whether the statement, that the use of the Library of Congress system "is much less general than that of the classifications mentioned" gives quite the right impression of its actual influence on the classification of the large libraries of the country.

The book has a distinct purpose and a definite scope. It carries out its purpose as a class manual consistently and confines itself closely to its scope. It is based on wide knowledge of university reference work and of the abilities and limitations of college students. It can be used to advantage, with slight modifications, in any institution of collegiate rank with even a respectable working library. The course on which it is based is one of the oldest of its kind still in successful operation and this course has very appreciably increased the intelligent use of the University of Illinois Library. Its use elsewhere should mean more intelligent self-service by students and a decided saving of time to the library staff who must otherwise perforce help students in ways in which they ought to help themselves. The authors have done a real service to college and university libraries in general and, thru them, to the institutions they serve.

FRANK K. WALTER, *Librarian,*
University of Minnesota, Minneapolis.

Public Open Shelf Library for Paris

A baraque, similar to those established in devastated regions by the Committee for Devastated France under the direction of Miss Jessie Carson, formerly of the New York Public Library, was opened on October 15th in the Belleville section of Paris. The book stock of the Municipal Library of that arrondissement has been transferred to the baraque, which will be run on the principle of an American open shelf library, under the direction of Mlle. Lydie Duproix, who received her training at the Library School of the New York Public Library last year.

The A. L. A. Hospital Library Exhibit at Atlantic City

A HOSPITAL library service exhibit was a successful feature of the recent convention of the American Hospital Association at Atlantic City. This exhibit was assembled originally under Dr. Bostwick's supervision for the American Medical Association's meeting last spring in St. Louis. At Atlantic City members of the staff of the Free Library (at Miss Askew's request) set up and were in daily attendance at the exhibit. The poster exhibit sent by the A. L. A. was extremely interesting. The Atlantic City Public Library sent up a collection of books, representative of the type of books to be used in hospitals. As the book wagon was lost in transportation, a tea wagon was used, and altho not the regulation means of delivery aroused enthusiasm by its possibilities.

The exhibit was well attended. Doctors showed exceeding interest in it. Everyone spoke in the highest terms of the therapeutic value of the service.

Numerous questions were asked of which the following are typical: What system of

THE A. L. A. HOSPITAL LIBRARY EXHIBIT, SHOWING THE REGULATION BOOK TRUCK

charging could be used? Will the public cooperate? In case of contagion, what is done with the books? Are technical books necessary? Should current fiction be supplied? Is a trained librarian necessary?

The questions were answered as fully as possible, and many persons especially interested were referred to Secretary Milam for further information.

The A. L. A. at the Prison Association and American Legion Meeting

THE American Library Association was represented at the American Prison Association meeting in Detroit on October 13 and 14 by Secretary Carl H. Milam. He spoke at the meeting of the prison chaplains. Rev. W. S. Bassett of the New Hampshire State Prison also spoke on prison libraries. Dr. Hastings H. Hart, president of the American Prison Association, had for distribution a list of books on prison management and the Detroit Public Library distributed an attractively printed list on "Prison Reform." Much discussion followed the two talks on prison libraries. The questions raised had to do with such subjects as the elimination of undesirable books received as gifts, the necessity of a regular appropriation, how to bring newly acquired books to the attention of the inmates, the selection of books for the prison library.

The chaplains expressed the hope that the chairman of the A. L. A. Institutional Libraries Committee might be present next year and might make an exhibit of books found most useful in prison libraries.

The Association was represented at the American Legion Auxiliary meeting in New Orleans, October 16-20, by Sarah C. N. Bogle, Assistant Secretary. Miss Bogle briefly addressed the first general session of the Auxiliary, and also met with the organization committee and discussed the opportunity open to the Auxiliary to further library service to the disabled men, the development and extension library facilities for all ex-service men, and what could be done by chapters and individual members of the Auxiliary in the way of promoting library progress.

THE LIBRARY JOURNAL

TWICE-A-MONTH

NOVEMBER 1, 1922

ALTHO Uncle Sam has not joined the great family of fifty-one nations, known as the League, that is no reason why the United States should not participate in the lesser international organizations, many of them existing before the war, and others the direct outcome of the war, or established by the League itself. Most of these, prior to the war, had their seat at Brussels or Berne, and formed a network of international comity, which it was fondly hoped would help to prevent war. Those who went from the library and bibliographical conferences at Brussels in 1910, to the field of Waterloo, were pleased at the thought that French and Belgians, enemies in 1815, were planning to celebrate in 1915 the hundred years of peace. That this proved an iridescent dream should not discourage the revival of old and the formation of new links in world brotherhood, which of all things the world of today needs. Professor Richardson elsewhere gives an interesting summary of several of these international movements, in which the library profession should be interested, and it is to be hoped that the A. L. A. and its members will lend heart and hand to the efforts for world reconstruction and advance which these typify.

★ ★ ★ ★ ★ ★ ★

“HUMANIZING the A. L. A.” as Mr. Ferguson puts it in his bright review of the Detroit Conference quoted on another page, is an ideal which matches up with the larger problem of humanizing the world. Just what the phrase means it is indeed difficult to say, but it points towards a desirable end, that of making the conference attractive to all members, and making the Association of vital importance to every member. Mr. Ferguson comes to the conclusion that this is largely a question of more adequate salaries, which will keep in or attract to the profession, the men and women who otherwise are tempted from it to more remunerative callings, tho these may not have the motives of social welfare that the library profession emphasizes. This is a truism, but it requires effort to make truisms come true, and the counsel that librarians should not be afraid to emphasize the importance of their work is altogether wise. As to the conferences, it is difficult to make them appeal to everybody every time, but it should be possible to make the

general sessions more inviting to all by limiting their number and making sure that speakers not only have something to say, but can say it so that it shall be heard. The Association is big, the conferences are increasingly big, and the very element of bigness makes it the more necessary that there shall be a careful selection of topics and speakers, and that what may be called “group questions” shall be relegated to “group meetings,” for which a limitation of the general sessions should make room.

★ ★ ★ ★ ★ ★ ★

STANDARDIZATION is another feature which harks back to more adequate pay as a basic necessity. The subject is to have careful discussion at the mid-winter meeting of the Council, and those who have comments, criticisms or suggestions, should not fail to respond to Mr. Walter’s plea for such, that the discussion may be usefully shaped as to standardization and certification. There are two sides, as there are to most questions, and to adapt Mr. Ferguson’s phrase, they should not go to the point of dehumanizing the profession by repelling from it the born librarian, who has not the advantage of library school technical education. New York State has become a sort of proving ground in respect to standardization, but, as has been pointed out, the scheme has never been fairly tried because of the lack of appropriations to carry it forward and present adequate stimulus of state aid for standardized libraries. California has made definite progress in this direction, and one good feature of our federal system is that experimentation in this State or that, benefits the whole country by affording results for comparison.

★ ★ ★ ★ ★ ★ ★

THE question of restrictions on questionable books discussed in Mr. Feipel’s second paper, is one that concerns all libraries, great or small. Every library contains some books which would be objectionable for some readers, juvenile or other, and the moment that these are advertised even by adverse criticism, they become active temptations for the salacious. One of the most objectionable of books was a cheap, paper covered volume issued a score of years ago, which flaunted on its cover, the information that the extracts which it contained.

were all from books found on the shelves of the Chicago Public Library. The board of a smaller library had before it the problem that a high class art magazine had an extraordinary circulation among the boys and girls of adolescent age, who embellished the nude figures of the illustrations and passed them along boy to girl and girl to boy, so that even

this innocent periodical had to be restricted in use. These two instances illustrate the real difficulty of the question, and suggest that no general line of policy can be recommended to all libraries. After all, common sense and careful attention to the habits of readers must remain the best guide—and this is not very specific counsel!

LIBRARY ORGANIZATIONS

SPECIAL LIBRARIES ASSOCIATION OF BOSTON

THE October meeting of the Special Libraries Association of Boston was held in the Treadwell Library at the Massachusetts General Hospital, preceded by a supper at the Green Shutters. Notwithstanding the rain both gatherings were well attended, thirty-nine people coming early to the supper, and sixty-five to the meeting afterward.

The subject discussed was "Hospital Libraries," by eight speakers admirably fitted to cover the field. Annis L. Kinsman, librarian of the Chelsea Naval Hospital, discussed "Army and Navy Hospital Libraries: Requirement and Equipment." She read the civil service requirements for the librarian, which were high, and then spoke of the equipment, which is that turned over by the A. L. A. The navy is a good trustee, but the army has practically given up hospital libraries in the Boston district. The Bureau of Navigation supplies the Chelsea Naval Hospital with 100 books a year—a general list of fiction and non-fiction, twelve periodicals and twelve or fourteen papers. Recently the U. S. Veterans Bureau turned over to Miss Kinsman, "for value received," \$450, part of which was spent for more periodicals.

Ida M. Cannon, chief of the Social Service Department of the Massachusetts General Hospital, spoke next on "Hospital Ethics of the Librarian." She spoke of the numerous varieties of workers already participating in the activity of a hospital, and said that many people new to this work mistook the etiquette of the hospital for the ethics. She read the "Hippocratic Oath," and then mentioned as some of the salient features of the ethical code discretion, loyalty to the hospital, ability to see the other person's point of view, and hearty co-operation. Carrie L. Williams, librarian of the U. S. Veterans Hospital at Parker Hill, spoke on "Ward Work in a Hospital Library." She said the librarian had to be an essentially social being with much tact, whose object should be to get the patients interested in books. She

must realize that each patient is a special problem in himself. Marjorie Martin, librarian of the U. S. Veterans Hospital in West Roxbury, told of "Book Selection for the Mental Hospital." She said the library had the scope of a small public library, tho fiction, travel and biography were most popular. Books of adventure and detective stories are the greatest favorites, and great care must be taken to avoid admitting stories to the library with a harmful psychic influence, such as those dealing with the supernatural, with many bloody scenes, or with the insidious workings of poison. Books on physiology, psychology, and law are tabooed, and great care is taken to keep the medical books, which are of necessity kept in the library, away from the patients.

Lydia H. Jewett, librarian of the Warren Library of the Massachusetts General Hospital, founded in 1841, told of "Library Work in a General Hospital." The library serves everyone in the hospital from the superintendent to the orderlies, but is primarily for the patients. The books are arranged on the shelves for people with broken arms; there are five subjects. There is a shelf of thin, light books for people with broken arms; there are five cases of foreign books; and a collection for children. Some surgical patients stay a long time in the hospital, and there is an admirable opportunity, fully embraced by the librarian, for Americanization and education. The book truck, which carries books to the wards, was designed a few years ago, and served for a model for those in the army libraries.

Elisabeth W. Reed, librarian in the Boston City Hospital, spoke of "Library Work with Children." The library is new, and is part of the Social Service Department, financed privately. The books are primarily for entertainment, altho there are some educational ones. Each child in the library is visited once a week, and there is a self-appointed ward librarian among the children, who collects and distributes books. Some of the activities of the librarian are story-telling, distributing flowers,

lending toys to children who are too young to read, making and distributing picture puzzles, and co-operating with the hospital school-teacher. Before the beginning of the hospital library the children, especially the surgical patients, quickly became hospitalised, and their active interest was directed toward the condition of other patients. Now, however, the children have no more morbid curiosity when they leave than when they entered the hospital.

Grace W. Myers, librarian of the Treadwell Library in the Massachusetts General Hospital, spoke on the "Medical Library in a General Hospital." It is a staff library, and has an excellent collection of books on medicine and its allied subjects. The oldest medical library in the United States is in the Pennsylvania Hospital, founded in 1763, and the largest and most important is that of Johns Hopkins, but the Treadwell Library, tho founded as recently as 1859, and only half as large as Johns Hopkins, stands next to it in importance. Its first librarian was a doctor, who laid an excellent foundation. There are now 10,067 volumes and 96 periodicals, and tho financially limited, the library receives many gifts.

E. Kathleen Jones, of the Massachusetts Library Commission, was the last speaker on the program. Her subject was "Group Work in Hospitals," and she discussed the advantage of group work over "Unit Work" for hospitals which cannot afford to pay a full-time librarian. Unit work is the case where there is one librarian who gives all her time to one institution. In group work several hospitals, or other public institutions, share one librarian. In case of city hospitals the librarian will be provided by the public library, while in case of state hospitals the State Library Commission will have supervision. Public libraries all over the country have taken over the Sioux City plan where six large hospitals combined and asked the Public Library for the loan of one librarian for all of them, and, when their request was granted, they inaugurated a drive for books. The Iowa State Library Commission started a library organizer for State Institution Libraries, and Minnesota and Vermont followed Iowa, but Massachusetts is showing no progressiveness in this matter.

RHODE ISLAND LIBRARY ASSOCIATION

FIFTY-FOUR were present when the Rhode Island Library Association held its fall meeting at Westerly on Monday, October 9. Francis K. W. Drury, the chairman of the Committee on Recruiting as well as of the A. L. A. Committee on Recruiting, stated in his report that a campaign of education must be carried on, keeping the library situation

before people, arousing their interest, and enlisting their co-operation.

The act passed by the Rhode Island General Assembly in April, 1921, designed to furnish state aid to libraries, is not in accord with similar laws which the State Board of Education is expected to enforce, is difficult to administer, and does not serve the greatest need of the smaller libraries of the state. A resolution was passed by the association reviewing these facts and requesting the State Board of Education to ask the General Assembly at the session to be held in January, 1923, to amend the present law to conform with the spirit of House Bill 562, which was presented to the 1921 session of the Assembly after being endorsed by the Association, the Rhode Island Institute of Instruction, and other organizations.

Dr. Walter E. Ranger, Commissioner of Education for Rhode Island, pointed out that altho library service is educational and as indispensable for the well being of a people as the school, and if rightly conducted contributes to an intelligent citizenship, in Rhode Island the library as an educational factor is not getting its proper share of the money appropriated for such purposes. A sense of public responsibility must be developed and cultivated so that the State will see to it that every man, woman and child may secure the loan of a book.

Newcomers to the State gave short addresses. Mary V. Crenshaw, librarian of the People's Library, Newport, in discussing "From Book Chains to Automobiles," said that some library methods of the present are as binding as the book chains of the past. Reader's cards, closed shelves, and any red tape which limits readers, making it difficult to get the right book to the right person at the right time, are modern chains which must be cut. A bookwagon is not only a vision of the future but a thoroly practical adjunct of to-day. Irene Earll, librarian of the Rhode Island College of Education, in her address on the librarian as a social force, declared that librarians have in their hands every weapon for good in the community. There should be perfect co-operation between all elements in the State. Library associations must stand back of the libraries so that they may reach out to every individual until he becomes interested and a borrower from some library.

"The Modern Public Librarian, Bibliophile or Clerk?" was the subject of an address by Clarence E. Sherman, assistant librarian of the Providence Public Library. In the past the librarian's work was a simple one, with inter-

est centered in the local community, while to-day it is vastly more complex. Intensive study must be given up for extensive interests. In order that librarians may be properly equipped for their tasks, there should be frequent discussions of books in staff meetings, and library time should be allowed for reading. The librarian of to-day has developed into a semi-business type of person. The librarian of the future should combine the friendly virtues of the literary type with the business-like type.

KENTUCKY LIBRARY ASSOCIATION

BEREA was the meeting place of the Kentucky Library Association for its annual convention held from October 12 to 14. Professor James Watt Paine, of Berea College, made the address of welcome, Mrs. A. S. Gardner, of Horse Cave, responding. The president of the Association, Euphemia K. Corwin, librarian of Berea College, spoke on the adaptation of library resources to rural life. In the evening John Franklin Smith, professor of rural social science at the College, spoke on "The Librarian and the Country Child." It is in the power of the librarian to better economic conditions and to improve health conditions, he said. Among the books circulated in rural communities should be plenty of stories of real people who have "done things," and books that will teach children to love and enjoy nature. Mary Eileen Ahern, editor of *Public Libraries*, chose for her topic "Frigates of the Mind" as symbolical of books—books the purveyors of information. She spoke of the necessity of the librarian's having a broad outlook upon life, knowledge of the contents of books of varying professions, as law and medicine, and knowledge of the people of the community and the relation of books to the people.

"Impress of Libraries on Kentucky Rural Life" was the topic of the next day's sessions. Fannie C. Rawson outlined what the State Library Commission has accomplished. Traveling libraries in Jefferson County were described by Jennie O. Cochran of Louisville, and Mrs. H. C. Henderson of Georgetown discussed traveling libraries in Scott county. In a talk on the clubwoman in library work, Mrs. W. H. Coffman instanced the fine work of Georgetown clubwomen had done in organizing the Scott county library. "County and School Contests" was the subject of a talk by Everett Lee Dix, supervisor of social service training at Berea College. He spoke of the importance of co-ordination so that the work of one may fit in with the work of others, and explained the

method of holding contests in ten counties in eastern Kentucky.

Florence Dillard was the leader at the round table discussion of the large public, school and college libraries. Discussion on methods and results of advertising the library was led by Cora Beatty and George T. Settle of Louisville; dealers' discounts and the high cost of books, by Margaret King, University of Kentucky, Lexington; satisfactory book binding and binders, by Anne M. Spear, of Covington; National Book Week, by Miss Waller, University of Kentucky; and "Sifting the Wheat from the Chaff in Current Fiction," by Jennie M. Flexner of Louisville. Miss Rawson was the leader at the round table for small libraries, which discussed primarily circulation problems.

On Saturday morning Mrs. F. H. Ridgway, assistant librarian of Berea College, told of her work with the book wagon which takes books to the people in their mountain homes. Having very limited funds for book purchase she has used many pamphlets, bulletins, and inexpensive books. Mounted pictures are circulated and afford much pleasure in many pictureless homes. She spoke of the importance of having books that reveal beauty and that make farm life attractive.

The association had the pleasure of a trip along the Dixie Highway into the beautiful hills surrounding Berea including many spots of historic interest. Dr. Hutchins, president of Berea College also entertained at his home. An interesting motion picture illustrated the life of a typical mountain boy and girl and showed what Berea College means to the mountain people.

Officers were elected for the coming year are: President, Mrs. A. S. Gardner, Scottsville; first vice-president, Margaret I. King, University of Kentucky, Lexington; second vice-president, Elizabeth Tunis, Danville; secretary-treasurer, Mary Robert Loyd, Winchester.

HARRIET BOSWELL, *Secretary*.

WISCONSIN LIBRARY ASSOCIATION

REPORTS of progress and conditions in Wisconsin county libraries, discussion of the policy of school library management in the relations of schools and libraries, and reviews of notable new books were important features of the thirty-first annual meeting of the Wisconsin Library Association held at the Milwaukee Public Library October 9 and 10, with President Matthew S. Dudgeon, librarian, in the chair.

COUNTY LIBRARY PROGRESS

The round table on county library progress was conducted by Clarence B. Lester and Harriet Long, Rusk, Marathon, Langlade, and Milwaukee Counties are now appropriating money

for library service. Mr. Lester's recommendations may be summarized: (1) The demand for county library service should come from the rural section of the county. (2) Plans for the service should be made according to local situation. (3) The idea may be developed with small groups first. These will carry the idea to others. Miss Long stressed the idea of reading rooms with magazines and reference books as part of the county plan, each community to assume responsibility for such room, which can later be taken over by the county.

Winnebago County, said Miss Van Eman, has a population of 63,000, and three cities, Oshkosh, Neenah, Menasha. A population of 16,300 has no city service. It is trying to establish traveling libraries in existing branches. The enterprise was begun in 1902. There are three thousand five hundred books in fifty-four collections. Fifty cents per capita is the minimum appropriation asked. Racine County, said Miss Hannum, has a population outside Racine of 20,000. Nearly nine hundred county borrowers receive free service. A book wagon is used. A reading room will be part of the county system. Wausau is the only city in Marathon County, said Miss Lansing. It has always given free service to the county. Appropriations have ranged from \$200 to \$500. Federated clubs and teachers are handling collections of books. The population of Portage County outside Stevens Point is 19,000, said Miss Anderson. City and county board are willing to establish county service. An appropriation of \$7,500 is expected this fall. Brown County expects an appropriation equal to one-sixth that of Green Bay and De Pere, Miss Martin reported. The county wants representation on the library board. Green Bay has three-fifths of the county population. Langlade County, Miss Rechygl said, has an appropriation of \$1,500. There are no fixed collections. Books are sent by parcel post. Stations are in postoffices and school buildings. Miss Andrews said that Marinette County has been trying for the past four years to get a book wagon. Each of two hundred schools is to give an entertainment, the proceeds of which will go to the fund. The county will then assume the care of the book wagon. Fond du Lac, said Miss Janes, has been giving free service to the county since 1915. There are seven hundred borrowers. The Milwaukee plan was considered there and shelved, but it will be taken up again.

LIBRARIES AND SCHOOLS

The discussion on the policy of school library management in the relations of schools and libraries was opened by Miss Aldrich, who

said that the situation has been handled usually by one of the following methods: (1) The establishment of a school library entirely under the control of the local public library. (2) A school library under the joint control of school board and public library. (3) A school library entirely under the control of the school management. As to which method is adopted the source of funds is usually the determining factor. The school library system of Detroit was cited as approaching the ideal as fast as possible. A school library is being installed in every school building, with a teacher librarian in charge, who is a normal graduate with at least a short course in library science. This is maintained by the school board. In addition, the public librarian maintains a school department sending out loan collections to the school.

Miss Benst, of La Crosse, discussed the administration of the school library entirely under school management. She believed that efficiency would be promoted by separate maintenance. This system would save the library the cost of furnishing books to teachers not making the best use of them, avoid the danger of depleting the central collection, and obviate the friction resulting from the entrance of one institution into the territory of another. Miss Janes, of Fond du Lac, discussed the school library under control of the local public library. As the high school library is mainly a reference library, other books can be requisitioned from the public library, and duplication can be avoided. As school hours and school year are shorter than those of the public library, the school librarian can put in her spare time at the public library, which broadens her field of vision. All orders, bills, book-keeping for the school library can be attended to at the public library. Supplies needed in a hurry can be borrowed from the main library if necessary.

During the discussion Miss Heath stated that each teacher should know the bibliography of her subject well enough to choose her books, but that the school librarian should be able to balance the demands from each department so as to form a well proportioned library. Her opinion was that the librarian was not a study room teacher, and pupils should be allowed to use library for study only when the use of reference books was necessary. Superintendent Longenecker, of Racine, told of the three junior high schools in that city with school libraries, their plans for a new senior high school with fully equipped library, all open to the public. The school board furnishes the rooms, equipment, janitor service, heat and light; the public

library, the books and a full time librarian. The plan has been successful so far.

BOOKS AND BOOK SELECTION

On Tuesday morning a roll call of libraries brought answers to the question: "What five non-fiction books have most appealed to your patrons this year?" The result of a compilation of these lists will appear in the *Bulletin*.

Mary Katharine Reely, in charge of book selection for the Wisconsin Free Library Commission, presented "Books of Distinction in the Non-Fiction of the Year." The carefully selected list of books for discussion and the skilful handling of the difficult task of evaluation and criticism under severe limitations of time combined to make this a most valuable contribution to the program. Margaret McIntosh, head of the book selection and order department of the Milwaukee Public Library, followed with an illuminating discussion of "Outstanding Fiction of the Year."

The professional program of the morning closed with a symposium on the question, "Can book selection aids be improved?" Miss Martin appealed for more promptly distributed aids to libraries in the work of selection. She believed the reviews should be more discriminating and evaluative. Samuel Ranck, Grand Rapids, stated it to be the publishers' practice to advertise and merchandise their books regionally, so that reviews in Eastern papers appear before books are on sale in Western markets. Mr. Dudgeon suggested the possibility of a weekly mimeographed list to be sent out by the Commission. The Association approved the idea of such a list, to be paid for by the libraries at the rate of five cents per week. It also expressed its feeling that the *Booklist*, the *Wisconsin Library Bulletin*, and other publications or organizations undertaking to furnish aid to libraries in the selection of books, should receive from the publishers advance review copies at the earliest possible date, and to request the Wisconsin Library Commission to investigate the matter of the supply of such copies.

Edna Ferber and Zona Gale were both present at the meeting to read from their works. Miss Ferber prefaced her readings of two short stories, "The Gay Old Dog," and "The Homely Heroine," with witty and characteristic comment.

Carl H. Milam, secretary of the A. L. A., addressed the Association on "Reaching the Public." Springfield, Ill., reaches forty per cent, Indianapolis twenty-seven per cent, and Milwaukee twenty per cent of its public. The U. S. Commissioner of Education says that sixty per cent of the American people are be-

yond reach of adequate library service. Since seventy-five per cent of those in reach do not use the libraries it follows that of over 110,000,000 people 99,000,000 are not registered borrowers. Mr. Milam suggests the study of selected typical blocks of our cities with the view of visualizing actual and potential service to each individual in the locality studied.

Samuel H. Ranck spoke on "Making the Public Conscious of the Library."* Ernest Bruncken, of Milwaukee, discussed "Reaching the Library Thru Literary Anniversaries." Senator William N. Hatton, of New London, stressed the need of education, the interpretation of our modern life in terms of the spirit, and the library's responsibility.

J. H. Puelicher, of Milwaukee, president of the American Bankers' Association, spoke on the theme, "Can the Banker Help the Librarian?" General discussion was ably led by Jessie Sprague, of Brodhead.

Affiliation with the A. L. A. was voted.

Officers for the ensuing year follow: President, Edith K. Van Eman, Oshkosh; vice-president, Gertrude Schwab, Superior; secretary, Leila Janes, Fond du Lac; treasurer, Laura Olsen, Eau Claire.

MINNESOTA LIBRARY ASSOCIATION

THE thirtieth annual meeting of the Minnesota Library Association was held in Duluth, October 2-4, with an attendance of one hundred and twenty-four members. President Alice M. Dunlap welcomed the visitors and outlined the plans for the meeting.

A roll call of libraries was responded to with the most striking features of the work during the year. The report of the Education Committee, of which Elizabeth Robinson is chairman, read by Miss Wood, told of the outline prepared for the use of those speaking on librarianship as a profession. In May and June talks were given in a number of schools and colleges and in each case, the director or principal expressed interest in having the matter presented.

School libraries are progressing, the one crying need now being lack of funds. The increasing number of calls for school librarians thruout the state is both encouraging and embarrassing, on account of the few opportunities for training librarians. The University class in library training and the various institutes held during October will serve as a beginning in this work. The two state lists recently issued for the elementary schools and the high schools, and also the new state course of study in English, will be a great aid to librarians in

* Mr. Ranck's paper will be given in a later number.

enabling them to buy from and direct their work along the lines of a standard list. The work of the Minneapolis Public Library with the schools in connection with the special instruction which is to be given is to be commended.

Meetings of school librarians have been held at the midwinter session of the A. L. A. in Chicago and at the conference in Detroit. At this last conference, the A. L. A. Council endorsed the report of the A. L. A. Committee on Education, and it has been suggested that the Minnesota Library Association also support the recommendations of this report. The striking features of the Detroit conference were discussed by those who had attended, and it was the consensus of opinion that the A. L. A. meetings would be of much greater benefit if not held in the larger cities.

The paper, "What Corporation Training Has to Teach Us," was read by Frank K. Walter. It advocated business methods in library publicity, urging the corporation methods of advertising.

Tuesday's session opened with a breakfast picnic served by the members of the Duluth library staff at the Lester Park camping grounds. The program was resumed with a report of the Standardization and Certification committee, by Miss Baldwin, chairman, who urged a better business system in library management and the establishing of standard methods thruout the state. A heated discussion followed, Miss Ahern and Mr. Walter both urging librarians to consider the circulation statistics of less importance than other things.

Miss Hickman led the round table of work with foreign born, which was participated in by Miss Campbell, who told of the treatment of foreigners in St. Paul; Miss Corteau, of St. Paul library, who spoke of the cataloging and sources of foreign books; Miss Tawney, who told of the methods of selection in the foreign book department of Minneapolis of which Miss Nielson is chief, and Miss Martin, who read the paper prepared by Miss McLean of Minneapolis, telling of her visits to the Naturalization Court where the new citizen is welcomed to the library.

Miss Hurlburt led the round table on administration and after various opinions and laws were read, a discussion followed of methods of detecting and punishing mutilations and theft. The report of the Library Legislation committee, Gratia Countryman, chairman, recommended revision of the county law; state aid for libraries; certification of librarians; and library instruction in the University.

The round table on "Recent Developments

in County Library Work," was led by Miss Countryman. Miss Field told of the work just started in Hennepin County. Miss Clark, of Hibbing, described her visits to the libraries of the United Kingdom in the British Isles, and compared the work of those libraries with the county libraries of America.

As a result of the discussion of publicity methods by Ruth Rosholt, a Publicity Committee of the state association will be appointed. Miss Rosholt agreed that the fundamental essential is the public spirit of the librarian. Efficient library service requires knowledge of the community and its needs, knowledge of the library's resources, publicity which makes these resources known in the proper quarter, and organization which puts all these into effect.

At the evening session Mayor Snively welcomed the visitors with a short talk. Mary E. Ahern, editor of *Public Libraries*, was the speaker of the evening. Her advice to librarians was for more personal reading of the higher type. Margaret C. Banning, author of several books of fiction, was present and urged less attention to the opinions of the group of younger critics and more to the opinions of one's readers.

The report of the Committee on Courses in Library Science, by Mrs. Jennie T. Jennings, chairman, was read by Mr. Wheelock on Wednesday. The suggestion of a library school at the University of Minnesota with a degree of bachelor of library science was unanimously endorsed by the association, and a resolution will be submitted to the state legislature during the coming session and to the board of regents of the University. The book symposium conducted by Miss Powell included books on religion and ethics, by Miss Hutchinson; technical books, by Miss Thornton and Miss Dutcher; history and biography, by Mrs. Blanchard and Miss Glennon; children's books, by Miss McCubrey and Miss Raines; fiction, by Miss Martin and Miss Lamb.

The afternoon session was conducted at the Morgan Park club house, following a ride to the steel plant and Jay Cooke Park. A committee was appointed to make a check list of books in foreign languages available in various libraries of the state. The meeting was turned over to the School Libraries Round Table, which was presided over by Miss Wood. Miss Fink told of training given the High School pupils in Faribault and the credit they receive for the work. Miss Gemmel described the work in Duluth of home reading and discussed the list issued by the state for the purpose. Morris Stevens told of the efforts in Hibbing to get

the rural children to do home reading, and Miss Walker, of Hibbing, of the reference work with the High School pupils in her city.

Resolutions were passed heartily approving the efforts of the League of Women Voters to secure the establishment of a Woman's Department in the Extension Division of the State University; and endorsing the resolution of the A. L. A. on school supervision in school libraries and its position on standardization.

Officers elected are: President, Frank K. Walter, University of Minnesota Library; first vice-president, Julia Fink, Faribault Public Library; second vice-president, Blanch Spooner, School and Public Library, Montevideo; secretary and treasurer, Sophia Lammers, Mankato Public Library. The next meeting will be held at Faribault.

NORTH DAKOTA LIBRARY ASSOCIATION

THE North Dakota Library Association held its seventeenth annual meeting at Devil's Lake, October 2 to 5. The meeting was held at the same time as the State Federation of Women's Clubs so that the members of that organization might attend the library meetings. As most of the North Dakota libraries were started by women's clubs, and in many cases are entirely supported by them, there is close connection between the two organizations and there was a large attendance at all the meetings.

Library publicity was the main subject discussed. The county library law comes before the legislature at the next session, and it is hoped that such an interest in the library will be aroused in the state that there will be no question in regard to the passing of the law.

The address of welcome was made by Allen V. Haig, chairman of the Devil's Lake City Commission, and the response by Clara A. Richards, president of the Association. Mrs. Lyman N. Cary brought greetings from the North Dakota Federation of Clubs, of which she is president. Mary F. Downey, secretary and director, reported on the work of the State Library Commission. The "afternoon with books" was led by Bessie Baldwin of Williston; Jessie Budge, of Grand Forks, discussed fiction; Mrs. M. A. Hildreth, of Fargo, history; and Lilian Mirick, of Wahpeton, poetry. Children's books were discussed by Gertrude M. Edwards, of Jamestown.

School library problems were the topic of the evening meeting. Superintendent Nelson Sauvain, president of the North Dakota Teachers' Association, presented the program of the N. E. A. Hazel McKay, superintendent of Ramsey County schools, discussed "Rural School Needs," and Mrs. W. L. Stockwell, of

Fargo, the presentation of a book exhibit suited to the existing law. Minnie Nelson, state Superintendent of Public Instruction, spoke on traveling libraries and the rural school, and the evening concluded with an address on "The School Curriculum and the Reading Habit," by Mary E. Downey.

Library publicity was considered on Tuesday morning, first by Inga Rynning, of Fargo, next in a talk on the newspapers and the library by Ethel M. Fleming, also of Fargo. Governor R. A. Nestos read the proclamation of North Dakota Library Week. Marie O'Brien, of Devil's Lake, spoke on the approaching Children's Book Week. Conferences on numerous topics of general library interest were held each afternoon at four o'clock.

It was decided to hold the 1923 meeting in the spring rather than in the fall, as being more convenient for the majority of the librarians present. Fargo was chosen for the next meeting place. Officers elected are: President, Mary E. Downey, secretary of the State Commission; vice-president, Bessie Baldwin, Williston Public Library; secretary-treasurer, Inga Rynning, Fargo Public Library.

GERTRUDE M. EDWARDS, *Secretary*.

MONTANA LIBRARY ASSOCIATION

FOURTEEN were present at the annual meeting of the Montana State Library Association, held October fifth to seventh at Miles City. The county library figured largely in the program, the association feeling that this is the solution of the question of library service for a rural state such as Montana. Miss Worden and Miss Kamps gave reports of great importance of their county work.

Three years of drought during the war era of high food prices resulted in a scarcity of funds for Montana, an agricultural state, which has blocked the Association's efforts to obtain the establishment of a library commission and library school. The University of Montana, at Missoula, is doing considerable work in distributing material to rural districts, and the Association voted to petition the next legislature to appropriate sufficient funds to pay the salary of an executive secretary to be located there to perform the equivalent of commission work until the state can support a full-fledged commission. The state board of education continues to plead lack of funds to the Association's request for a library school at the University. Some library instruction is now being given.

Affiliation with the A. L. A. was voted, as was the A. L. A.'s recommendation of a dollar per capita library tax, altho this standard is not now feasible for Montana. The A. L. A. was also asked to contribute to the expense of

Are These Books On Your Shelves?

THE TECHNIQUE OF THOMAS HARDY

By Joseph W. Beach

A new study of Hardy's novels for all lovers of English literature. A critical volume on novel-writing which will give the reader a greater appreciation of good books. \$2.60 postpaid.

EDUCATION FOR BUSINESS

By Leverett S. Lyon

For the man who wants to know how business courses are taught today, considered in the light of the results that should be attained through proper division of work. \$3.60 postpaid.

THE COMMUNITY CHURCH

By Albert C. Zumbrunnen

A new volume for those interested in the practical part the community church is able to play in the religious life of today. Full of suggestions and illustrated examples of what is being done in this field. \$1.50 net.

THE RURAL MIND AND SOCIAL WELFARE.

By Ernest R. Groves

The movement of population from country districts to the cities and the new economic and social problems of the rural peoples makes this study of the psychology of the country dweller especially important. \$2.10 postpaid.

New York

the bulletin on subscription books prepared by a committee of the Pacific Northwest Library Association. A plan to co-operate in the printing of lists of books was subscribed to by several of the librarians present. A committee was appointed to compile statistics of county libraries.

An interesting discussion on salaries led to the formulation of the following minimum scale, which was approved: Substitutes after six months' experience, thirty-five cents per hour; forty cents after a year's experience. Full time untrained assistant, \$100; if an accredited library school graduate, \$1,200 to \$1,800. A librarian of training and experience should receive not less than \$1,800. It was decided that at least fifty per cent of income should go for salaries, and that seventy-five per cent was permissible.

Officers elected are: President, Laura Zook, Miles City; vice-president, Louise Fernald, Great Falls; secretary, Clara Main, Lewiston; treasurer, Florence Lewis, Livingston. The next meeting will be held at Bozeman the last week of November, 1923.

ELIZABETH FORREST, *Secretary*.

COLORADO LIBRARY ASSOCIATION

TWO physical factors make the choice of the meeting place of the Colorado Library Association an arbitrary one. The mountain range that bisects the state makes it almost impossible for the librarians on the western slope to join the forces on the east, but as Denver is the largest library center in the state and has more representatives of the Association in its various libraries than in all the other libraries in the state combined, the meeting place must not be far from that city, and is always chosen on the eastern slope of the range. At the thirty-second annual meeting held at Fort Collins from September 27 to 29 inclusive the sole representative from the western slope was Mrs. McKinny of the Craig Public Library, who was also the first visitant from that section in the annals of the Association. Fort Collins is but forty miles from the Wyoming state line, and sixty miles from Denver. There were present twenty-four public librarians, twelve university librarians, the librarian of the State Museum, and five trustees, as well as five librarians from Wyoming.

College and reference libraries were the subject of the first session, public libraries of the second, and trustees of the last. Discussing the co-operation of librarians with their trustees, Miss Weaver of the Rocky Ford Public Library brought forward some unusually interesting ideas. A paper on "The Psychology of Lending Books" by June Linn, extension librarian of the

Denver Public Library, showed how sympathy with humanity relieves library work of drudgery. A reception at the unique Woman's Building on the campus of the State Agricultural College was one of the most pleasant of the social features of the meeting.

The Association put itself on record as favoring a county library law, and endorsing the principles established by the A. L. A. for the use of books and library supervision in the schools, as well as for its standards for a proper library income. It pledged its members to foster the work of the Colorado Child Welfare Bureau by placing in their libraries books and pamphlets on children's reading and children's hygiene.

Lucretia Vaile of the Denver Public Library was elected president for 1922-23. The other officers are: Vice-President, Julia Douglas, Evergreen Public Library; secretary-treasurer, Mary Weaver, Rocky Ford Public Library.

LENA R. FENTON, *Secretary*.

UTAH LIBRARY ASSOCIATION

SALT Lake City was the scene of the ninth annual meeting of the Utah Library Association, with headquarters at the Public Library. Vice-President Julia T. Lynch presided. Levi Edgar Young, head of the department of western history at the University of Utah, in his address expressed the hope that the journals of Orson Pratt, William Clayton, Erastus Snow, Wilford Woodroff and others of Utah's first colonists will soon be properly edited and published, as they are among the most precious documents of western history. C. N. Jensen, superintendent of state schools, advocated the extension of the work of the county libraries and an increase in traveling libraries.

Grace W. Harris, librarian of the Ogden Carnegie Library, depicted the various types of library patrons in a paper on "Meeting the Public." Evelyn Bean, librarian of the Provo Public Library, reviewed some new books for the small library. Following luncheon the various libraries of the city were visited.

The following resolutions were passed:

Resolved: That the Utah Library Association feels very keenly the urgent need of a library organized for the state and that it pledges to the State Superintendent of Public Instruction its hearty co-operation in any steps he may take to secure the services of such an organizer.

The new officers are: President, Julia Lynch, assistant librarian, Salt Lake City Public Library; first vice-president, Clara Farnsworth of St. George; second vice-president, Miss Wright of Logan; secretary-treasurer, Minnie Margetts of the L. D. S. High School, Salt Lake City.

JULIA T. LYNCH, *President*.

Business Letter Practice

By JOHN B. OPDYCKE

First Assistant, Department of English, Theodore Roosevelt High School, New York City

The Last Word on Business English in General and on Business Letter Writing in Particular

With an Introductory Symposium by Four Prominent Captains of Commerce

WHAT THEY SAY

"Business Letter Practice I believe to be a distinct contribution to better letter writing, and I am very glad indeed to have had this opportunity to add my little bit to the thousands of other business men who are clamoring for more help and more light on how to write better business letters."—*Roger W. Babson, President, Babson's Statistical Organization, Wellesley Hills, Mass.*

"Theory and practice have been so arranged in the volume of nearly 600 pages that students learn by actual doing. There is a wealth of good letters presented for study and for dictation purposes, and many problems are presented which will stimulate the composition of business letters. There are articles by commercial and industrial leaders and a business letter lexicon. The book is also a ready reference work on credits, collections, sales, claims, etc., and it is all interestingly presented."—*The Boston Globe, Boston, Mass.*

"The instruction given is sound in psychology and might well be studied by writers of a more literary purpose."—*New York World.*

560 pages, cloth, gilt. Price \$2.50

ABINGDON

Gift Books of Permanent Interest

A BOOK of merit cannot wear out its appeal. Rather it improves with closer acquaintance and frequent delving into the treasures of its pages. Choose those books for Christmas gifts that will invest with appreciation and permanency the remembrance of the donor.

Abingdon Books live longer than the few days of the holiday season. The truths they voice, the artistry of their silent discourse, place them among the favored volumes of every true lover of good books. They are an enduring compliment to the finer sensibilities of the reader and a reflection of the giver of gifts.

Make your selections from the volumes bearing the mark of The Abingdon Press.

ROOSEVELT'S RELIGION

By *Christian F. Reisner*

Many books have been published relating to various phases of the life, character and services of the late President Roosevelt, but this is probably the only book that devotes itself exclusively to his religion, which was such a definite element in his life.

Illustrated. Net, \$2.50, postpaid.

SHADOWS ON THE WALL

By *F. W. Borcham*

In his brief introductory note to this volume of his delightful essays the author remarks, by way of explanation of its title and characterization of its contents: "The figures that float across these pages are like shadows dancing on the wall. They show that life is crowded with realities and flooded with radiance, for without substance and sunshine there can be no shadows."

Net, \$1.75, postpaid.

THE VALIDITY OF AMERICAN IDEALS

By *Shailer Mathews*

In this discussion of the history and significance of America, Dean Mathews attempts "to help the generation that bore the brunt of the war to take up the course of development interrupted by that great tragedy."

Net, \$1.25, postpaid.

THE CHRISTMAS CANTICLES

By *George Elliott*

This book is the fruitage of "nearly fifty years' meditation at Christmas time on the Canticles of the Incarnation," and has a distinct message as an interpretation of the divine purpose in the sending forth of the Divine Son into the world.

Frontispiece. Net, \$1.00, postpaid.

BEYOND SHANGHAI

By *Harold Speakman*

"One rarely comes upon so delightful a volume of travel writing as Harold Speakman's *Beyond Shanghai*. His purpose was not to visit and attempt to re-describe the famous places of that country, but to live in intimate touch with the people, taking part in their day-by-day life and observing them at close range. As a result, he succeeded in collecting numerous unusual impressions which he recounts with whimsical humor."—*Travel Magazine.*

Eight reproductions in color of paintings made by the author in China.

Net, \$2.50, postpaid.

BARNES, Cornelia, 1905-06 S. spec., who has specialized in library work in the Bureaus of the Government, has now resigned her position in the Bureau of Markets, Washington, to devote most of her time to special bibliographic and library research for firms and individuals. She is also instructing in the School for Business Librarians under Miss Hasse's direction.

BAUMLER, Jane, 1913-15 S., children's librarian of the Utica (N. Y.) Public Library, has been promoted to have supervision of the main circulating department.

BREWER, Margaret, 1918 S., has been appointed librarian of the Silver Bay School for Boys, Silver-Bay-on-the-Hudson, N. Y.

BUDLONG, Minna Clark, was ordained and installed as minister of the People's Church (of Unitarian and other religious liberals) at Kalamazoo, Mich., on October 11th. Mrs. Budlong was formerly librarian of the East Avenue Branch of the Kalamazoo Public Library.

CAREY, Alice V., formerly branch librarian of the Westwood Branch, has been appointed to have charge of story telling at the Public Library of Cincinnati.

CONE, Jessica G., 1895 N. Y. S., and Helen Y. Hough, 1921 S., are assistant librarians at the Goodwin Institute Library, Memphis, Tenn. The appointment of Olive Mayes, 1913 P., as librarian, has already been announced.

CRANE, Helen M., 1905 Ill., has resigned the librarianship of the State Teachers College library, Valley City, N. D., to join the staff of the Detroit Public Library.

COOKE, Edith, formerly librarian of Buena Vista College library, has joined the staff of the Burlington (Ia.) Public Library.

DALEY, (Mrs.) Edith, vice-president of the San José League of American Pen Women, has been appointed librarian to succeed Charles F. Woods, who resigned in the summer to take charge of the Riverside (Calif.) Public Library.

DORRANCE, Frances, 1918 N. Y. S., has been obliged for family reasons to resign her position as head of circulation in the Osterhout Free Library, Wilkes-Barré, Pa.

ETHELL, Emily G., 1920 S., has accepted the position of librarian of the Northern Arizona Normal School, at Flagstaff, Ariz.

EASBY, Harriet M., first librarian of the Queens Borough Public Library, died suddenly on October 9th, aged 63. Miss Easby was a charter member of the Twentieth Century Club which was instrumental in establishing the first library in Queens Borough at Richmond Hill. She took up her work in February, 1899, and the library was opened on April 8th of that year. In 1901 it was ceded to the Queens Borough Public Library.

ESTEY, Helen G., 1905 D., of Gardner, appointed librarian of the Athol (Mass.) Public Library in succession to Pearl Mason, who is now librarian of the State Normal School at Bloomsburg, Pa.

FULLER, (Mrs.) Marion Cobb, of the Rockland (Me.) Public Library, has been appointed reference librarian at the State Library in succession to Bernadena Morrison.

FURST, (Mrs.) Elizabeth H., librarian of the Parlin Memorial Library, Everett, Mass., succeeds Mabel L. Moore as librarian of the Adams (Mass.) Public Library. Miss Moore has joined the staff of the Newark Public Library.

GILPIN, Margaret, formerly librarian of Nashwauk, Minn., appointed librarian of Mt. Iron, Minn.

HINCHEY, Madeline V., formerly of the Cataloging Department of the Yale University Library, appointed assistant librarian of the Randolph-Macon Woman's College, Lynchburg, Va.

HOXIE, Louise, 1915 S., appointed assistant librarian at Marshall College, Huntington, W. Va.

JOHNSON, Agnes, 1913 Wash., librarian of the Hoquiam (Wash.) Public Library since 1917, is now children's librarian at Hibbing, Minn. She is succeeded by Helen Corbitt, 1918 Wash.

JONES, (Rev.) O. B., appointed law librarian of the Mahoning County Library Association, Youngstown, Ohio.

CURRENT LITERATURE AND BIBLIOGRAPHY

The September and October numbers of *Special Libraries* are Detroit numbers, the former giving the proceedings of the thirteenth annual convention and the latter the papers contributed.

"Fundamentals of Reference Service" is a new edition of a pamphlet issued especially for Wisconsin libraries by the Wisconsin Library School. The A. L. A. has taken over an edition in order to make it available to all libraries.

"A Shelf of Books for a One-room School," is an illustrated, annotated list of the twenty-five books chosen by votes of librarians and teachers as the best twenty-five books for any one-room school, price, 100 copies \$1; 1,000 copies \$5.

A new edition of Lutie Stearns' "Essentials in Library Administration" has been prepared by Ethel Farquhar McCollough, of the Evansville Public Library, and is published by the A. L. A. in the Library Handbook series. This edition has been thoroly revised and enlarged to include the record of progress made during the ten years which have elapsed since the publication of the second edition, and "no process or method has been described that has not been tested out in actual experience."

"Children's Books for Christmas Presents" is an A. L. A. list intended as an aid in purchasing books for children. All the books in it are reported in print (August, 1922). Titles are arranged in three general groups: picture books and other books for little children, books for young children, and books for older boys and girls. Brief notes are given to guide the purchaser in determining which books are best adapted to the particular child and notes from many library lists have been used without indicating the source.

At the request of the Library Commission of the Boy Scouts of America the Children's Librarians Section of the A. L. A. will prepare for publication in 1923 a recommended list of children's books for the home library. A preliminary selection of eighty-five titles has been made by a committee representing the children's librarians under the direction of Elva S. Smith, of Pittsburgh, chairman of the Section, and this briefer list is issued specially for use during Children's Book Week, November 12th to 18th. The title is "Gifts for Children's Bookshelves," and the price \$2 for 100; \$4 for 250; \$7 for 500; \$12 for 1,000.

In "Biblioteksstudier i U. S. A., jamte Riktlinjer för ett Svenskt Teknist Centralbibliotek,"

Hilda S. Lindstedt, librarian of the Royal Technical University at Stockholm gives some impressions of her last year's visit to the United States for the purpose of studying the American library system, especially as used in the scientific and engineering world, together with an outline for a central technical library for Sweden. The 50-page booklet is published by A. B. Gunnar Tisells Tekniska Forlag, and forms Meddelande N:R. 18, 1922, of the Ingeniörs Vetenskaps Akademien.

A. L. A. publications announced for early distribution are:

A. L. A. Handbook. Probably ready in December. Free to members who have paid four dollar dues in 1922; 75 cents to others.

Books and Thrift, by Ruth G. Nichols of the Federal Reserve Bank of Chicago. A new edition will be ready about December 1, probably in the form of an 8-page leaflet. Prepared for distribution by libraries especially during Thrift Week in January.

Papers and Proceedings of the Detroit Conference. A much fuller report of the conference than was printed in 1920 or 1921. Ready in November. Free to members who have paid four dollars for membership dues in 1922. \$1.25 to those who have paid two dollar dues. \$2.00 to others.

New Guide to Reference Books, by Isadore G. Mudge. This might have been called the fourth edition of Kroeger's Guide, but the new title page has been prepared with a view to giving full credit to the present as well as to the original compiler. It has been thoroly revised. Ready in November. Cloth \$3.

U. S. Government Documents, by James I. Wyer. A thoro revision of the A. L. A. manual chapter and the Handbook on Government Documents now combined in one pamphlet, and issued as A. L. A. Manual, chapter 23. Ready in November. One copy 25 cents; 25 or more copies 10 cents each.

Reading Course on Business, by Ethel Cleland, librarian of the Business Branch of the Indianapolis Public Library. This is the third item in the series of reading courses issued for free distribution by librarians to serious readers. It prescribes approximately forty books. The subjects and the titles were chosen largely on the recommendations of the commercial departments of the leading universities. The titles are printed as marginal notes, an arrangement which gives due prominence to the books and at the same time permits the presentation of the text in readable form. Ready in November.

FIGURE CONSTRUCTION

By ALON BEMENT

A new idea applied to the art of figure drawing. Emphasis is placed on life and motion rather than upon anatomy.

The illustrations are beautiful in line, alive and full of action. For students of commercial illustration or costume design, the book is indispensable.

Has highest educational endorsement.

ATLANTIS GREEK BOOK COMPANY, Inc.

203-205 West 25th Street

NEW YORK, N. Y.

ESTABLISHED IN 1894

NINETY-TWO years of
 wholesale bookselling
 result in unexampled efficiency
 in filling miscellaneous orders
 for the books of all publishers.

*A "Free Upon Request"
 for Librarians*

An attractive book of biographical sketches
 of popular authors from the George H.
 Doran Co. list, which the publisher wishes
 us to distribute.

The title of the book is "When Winter
 Comes to Main Street"—the author, Grant
 Overton. It will be useful in preparing
 copy for your local library news column.
 Write for one.

Lansing, Mich.

THE NATIONAL LIBRARY BINDERY COMPANY

1965 East 66th Street,

CLEVELAND, OHIO

We have established with our Cleveland bindery a "Department of Service" conducted by our technical representative, Miss Gertrude Stiles, formerly supervisor of binding in the Cleveland Public Library.

For information in regard to this department write directly to Miss Stiles.

Our other binderies are located in

Springfield, Mass.
728 Myrick Bldg.

Atlanta, Georgia
127 W. Peachtree St.

The Keyless Lock Binder

All we ask is the opportunity to prove the merit and quality of these Library Magazine Binders. Strongly and firmly built they withstand the wear of long and continued usage.

But more than that: Finished in Holliston Library Buckram they reflect the taste and beauty of the well-appointed Library.

Made in all sizes and styles of Binding.

MJ *The Amherst Books* **MJ**

GERMANY IN TRAVAIL

BY OTTO MANTHEY-ZORN

"Do they repent?" No other question was so incessantly put to me on my return from five months' travel in Germany." With these words the author begins to record his impressions of post-war conditions in Germany. He presents a thorough-going analysis of the state of mind in which Germany is facing the problems resulting from defeat and revolution. This is a book for the internationally-minded—for those who give thought to Germany's future place in the family of nations.

Price, \$2.50

MASTER BUILDERS

THE ENCYCLOPEDIA AMERICANA is an up-to-date restatement of world knowledge. That such restatement is scholarly and authoritative is best evidenced by the following *partial* list of its master builders or contributors:

JAMES ROWLAND ANGELL, Litt.D., LL.D.,
President, Yale University.
JOHN GRIER HIBBEN, Ph.D., L.H.D., LL.D.,
President, Princeton University.
HARRY PRATT JUDSON, LL.D.,
President, University of Chicago.
ELMER ELLSWORTH BROWN, Ph.D., LL.D.,
Chancellor, New York University.
ALBERT BUSHNELL HART, Ph.D., Litt.D., LL.D.,
Professor of Government, Harvard University.
WILLIAM A. NEILSON, Ph.D. LL.D.,
President, Smith College.
DAVID STARR JORDAN, Ph.D., LL.D.,
Chancellor Emeritus, Leland Stanford Jr.
University.
VICTOR EMANUELE ORLANDO,
Former Premier of Italy.
STEPHEN BUTLER LEACOCK, F.R.S.C., Litt.D.,
LL.D.,
Head, Department of Political Economy, McGill
University.
MARY EMMA WOOLLEY, Litt.D., L.H.D., LL.D.,
President, Mount Holyoke College.
HENRY VAN DYKE, D.D., LL.D., D.C.L.,
Professor of English Literature, Princeton
University.
ELIHU THOMSON, Ph.D., Sc.D.,
Director, Thomson Laboratory, General Electric
Company.
CHARLES P. STEINMETZ, Ph.D.,
Consulting Engineer, General Electric Company.
CHARLES F. THWING, LL.D., Litt.D.,
President Emeritus, Western Reserve University.
VERNON L. KELLOGG, M.S., LL.D.,
Formerly Professor of Entomology, Leland
Stanford Jr. University.
FLORIAN CAJORI, Ph.D., LL.D., Sc.D.,
Professor, History of Mathematics, University
of California.
CLIFFORD H. MOORE, Ph.D., Litt.D.,
Professor of Latin, Harvard University.
EUGENE DAVENPORT, M.S., LL.D.,
Dean, College of Agriculture, University of
Illinois.
SIR WILLIAM MITCHELL ACWORTH, M.A.,
Author, "Railways of England."
LUCIO MARIANI,
Professor of Archaeology and Ancient Art,
University of Rome.
FREDERICK H. NEWELL, M.E.,
Consulting Engineer, United States Reclamation
Service.
FRANK A. VANDERLIP, A.M., LL.D.,
Former President, National City Bank of
New York.
HERMAN V. AMES, A.M., Ph.D.,
Dean, Graduate School, University of Pennsylv-
ania.
HARRY ELMER BARNES, Ph.D.,
Professor, History of Thought and Culture,
Clark University.
LEE DE FOREST, Ph.D., Sc.D.,
Vice-President, De Forest Radio Telephone &
Telegraph Co., Inc.
SIR ANDREW MACPIAIL, M.D., M.R.C.S.
(Eng.), F.R.S. (Canada),
Professor, History of Medicine, McGill University.

BARON M. SAITO,
Admiral, Imperial Japanese Navy.
ALESSANDRO CHIAPPELLI,
Senator of the Reign of Italy; Professor Emeritus
of Philosophy, Royal University of Naples.
FRANK W. CLARKE, D.Sc., LL.D.,
Chief Chemist, United States Geological Survey.
HON. JOHN GREELEY JENKINS,
Former Premier, South Australia.
HON. SIR JOHN QUICK, K.B., LL.D.,
Former Postmaster-General, Australian Common-
wealth.
VISCOUNT KENTARO KANEKO,
Privy Councillor, Tokio, Japan.
LANE COOPER, Ph.D., Litt.D.,
Professor, English Language and Literature,
Cornell University.
WILLIAM ELLIOTT GRIFFIS, D.D., L.H.D.,
Author, "China's Story in Myth, Legend, Art
and Anceals."
IRA O. BAKER, C.E., D. Eng.,
Professor, Civil Engineering, University of
Illinois.
REV. JOHN A. RYAN, D.D., LL.D.,
Professor, Moral Theology and Industrial Ethics,
The Catholic University of America.
ABBÉ FELIX KLEIN,
Honorary Professor, Catholic University of Paris.
LUTHER BURBANK, Sc.D.,
Naturalist, Santa Rosa, Calif.
EDWIN R. A. SELIGMAN, Ph.D., LL.D.,
McVickar Professor of Political Economy and
Finance, Columbia University.
WESTEL W. WILLOUGHBY, Ph.D.,
Professor, Political Science, Johns Hopkins
University.
J. ST. LOE STRACHEY,
Editor and Proprietor, London "Spectator."
CHARLES H. PARKHURST, D.D., LL.D.,
Pastor, Madison Square Presbyterian Church,
New York City.
EDWARD ELLIS ALLEN,
Director, Perkins Institution and Massachusetts
School for the Blind.
DAVIS RICH DEWEY, Ph.D., LL.D.,
Professor, Economics and Statistics, Massachu-
setts Institute of Technology.
THOMAS E. FINEGAN, Ph.D., Litt.D., LL.D.,
Superintendent of Public Instruction, State of
Pennsylvania.
FRANCOIS V. A. AULARD,
Professor, Revolutionary History, University of
Paris.
SIR WILLIAM J. SOWDEN, J.P.,
Editor, South Australian Register, The Observer
and Evening Journal.
TOKIYOSHI YOKOI,
Professor of Agriculture, Imperial University,
Tokio, Japan.
KAZUTAMI UKITA,
Professor, History and Political Science, Washeda
University, Tokio, Japan.
NAOMASA YAMASAKI,
Professor of Geography, Imperial University,
Tokio, Japan.
IRA M. PRICE, Ph.D., LL.D.,
Professor, Semitic Languages and Literatures,
University of Chicago.

WILLIAM AMASA SCOTT, Ph.D., LL.D.,
Professor, Political Economy and Director, School
of Commerce, University of Wisconsin.
ADOLPHUS W. GREELY, Ph.D.,
Major-General, U. S. Army (Retired).
GRANT SHOWERMAN, Ph.D.,
Annual Professor of Classics, American Academy,
Rome, Italy.
WALDO H. DUNN, M.A., Litt.D.,
Head, Department of English, College of Wooster.
CHARLES H. C. WRIGHT, A.M.,
Professor, French Language and Literature,
Harvard University.
THEODORE S. WOOLSEY, A.M., LL.D.,
Formerly Professor of International Law, Yale
University.
JOHN URI LLOYD, Ph.D., M.D., Sc.D., LL.D.,
Professor of Chemistry, Cincinnati College of
Chemistry.
REV. ARTHUR W. H. EATON, A.M., D.C.L.,
Author, "The Church of England in Nova Scotia."
WALTER CLARK, A.M., LL.D.,
Chief Justice, Supreme Court of North Carolina.
WALTER L. FLEMING, Ph.D.,
Professor of History, Vanderbilt University.
SIR JOHN A. COCKBURN, M.D., K.C.M.G.,
Former Premier of South Australia.
JAMES M. CALLAHAN, Ph.D.,
Dean, College of Arts and Sciences, West
Virginia University.
EWALD EISERHARDT, Ph.D.,
Professor of German, University of Rochester.
GEORGE F. KUNZ, Ph.D., Sc.D.,
Gem Expert, New York City.
THOMAS F. TOUT, M.A., Litt.D.,
Professor of History, University of Manchester,
Manchester, England.
ALBERT SAUVEUR, S.B., Sc.D.,
Professor of Metallurgy, Harvard University.
HANS CARL GÜNTHER VON JAGEMANN, Ph.D.,
Professor of Germanic Philology, Harvard
University.
MAURICE H. ROBINSON, B.L., Ph.D.,
Professor of Economics, University of Illinois.
ELMER S. SAVAGE, B.S., M.S., Ph.D.,
Professor of Animal Husbandry, Cornell
University.
GEORGE RICKER BERRY, Ph.D., D.D.,
Professor, Old Testament Interpretation and
Semitic Languages, Colgate University.
JAMES WILFORD GARNER, Ph.D.,
Professor of Political Science, University of
Illinois.

BOOKS OF COMPELLING INTEREST!

CHURCH STREET

Stories of
American Village Life

Church Street

Stories of American Village Life

By JEAN CARTER COCHRAN

Author of "Bells of the Blue Pagoda"

Cloth, 240 pages, \$1.50 postpaid

Delightful sketches of a New Jersey village. Home life, neighbors, the church, and village characteristics are drawn by a master who knows the secrets of touching the heart as well as compelling smiles and laughter.

"I regard Miss Cochran's charming and refreshing portrayal of the finer side of American village life, which she has done with both sympathy and a fine sense of humor, as an effective antidote for 'Main Street.' Can I say more!"—Lawrence Abbott, the Editor of the *Outlook*.

The Bells of the Blue Pagoda

By JEAN CARTER COCHRAN

Cloth, 282 pages, \$1.75, postpaid

"I think this is the best story of life in China that has been put out thus far. A million copies of it should be read by the young people of America. It is true to life—to every phase of life you touch. Nothing is overdrawn. All the characters are true to what has happened in recent years; all the incidents are true to life."—Isaac Taylor Headland, author of "Chinese Mother Goose Rhymes," "Chinese Boy and Girl," "Court Life in Peking"; lecturer on China.

"If anyone puts down this volume with a doubt as to the delightful, sterling qualities of the average Chinese man or woman, this book has failed to reflect the author's real feeling and purpose."—From the Foreword of the Book.

Church and Sunday School Publicity

By HERBERT H. SMITH

Cloth, 176 pages, \$1.25, postpaid

"There is no phase of church publicity that has not been touched upon, but in no case has thoroughness erred on the side of verbosity. Not only are church bulletins and papers given attention, but chapters are devoted to oral announcements, posters, letters, the use of newspapers and the writing of advertisements. The mechanics of advertising are explained and the correct use of technical terms. The book is splendidly illustrated."—*Continent*.

Education for Successful Living

By JAMES E. CLARKE, D.D.

Cloth, 152 pages, \$1.00, postpaid
Paper, 75 cents, postpaid

"The writer opens up the thought that there is a culture to be obtained that is better than merely making a living. Above all he impresses the desirability of the religious element in education, without which an education is devoid of all its best life and intention. The book is worthy of attention from young people themselves, and from instructors and parents. The foundation truth is that the fear of the Lord is the beginning of knowledge."—*Herald and Presbyter*.

Our Reasonable Faith

By PARK HAYS MILLER

Cloth, 224 Pages, \$1.25, postpaid

"Mr. Miller has made a fine contribution to the literature necessary for this day in presenting the claims of the Christian religion to young people, and a pastor or teacher wishing to place in the hands of his young people a book to stimulate thought and secure appreciation could find no better means for it than by the use of this book."—*Rev. R. H. Gage, D.D., Wrentham, N. J.*

The Home God Meant

By GEORGE N. LUCCOCK, D. D.

Cloth, 205 pages, \$1.25 postpaid

"In this day and age of revolutionized home life, lack of family discipline, jazz marriage and easy divorce, it is truly refreshing to read the sound, sane, and safe words of the author who himself, with his partner in life, has made the very kind of a home he so ably and attractively describes and who for this reason is more entitled to be heard on the home. As for substance the book is unsurpassed, if indeed equalled, by any other on the same or similar themes."—*The Christian Statesman*.

Every Child Would Enjoy This Book

Verses for Children

By CECIL TROUT BLANCKE

A fascinating collection of verses, jingles and rebuses, delightfully illustrated by the author. It will set the little brains to work and delight the lucky children repeatedly.

Jacket and Frontispiece in colors Attractively Lined with Artistically Designed Paper

Cloth, 80 pages, \$1.50, postpaid

FURTHER ADVENTURES OF LAD*Albert Payson Terhune*

"Lad has already acquired more than a million friendly readers who will welcome this continuation."—*New York Post*. Author of "Lad: A Dog," "Buff: A Collie," etc. \$2.00

Fiction**THE BREAKING POINT***Mary Roberts Rinehart*

"The finest novel yet by one of the best story-tellers now writing for any public."—*Philadelphia Ledger*. \$2.00

THE CATHEDRAL*Hugh Walpole*

"Superb and deeply significant."—*New York Times*. "A Powerful story."—*New York World*. "One lays it down with the feeling of having taken part in some vast play."—*New York Herald*. \$2.00

LILIAN*Arnold Bennett*

The business of a pretty girl is to charm, not to typewrite says Mr. Bennett, and proves it in a novel as delightful as "Mr. Prohack." \$2.00

THE THREE LOVERS*Frank Swinnerton*

"A highly entertaining as well as thoughtful story."—*Chicago News*. "Author of 'Nocturne' and 'Coquette' writes another masterpiece."—*Cleveland Plain Dealer*. \$2.00

THE JUDGE*Rebecca West*

"Sheer imprisoned beauty. The most charming, most amusing, loveliest love story that anyone ever read."—*Chicago Tribune*. \$2.50

ONE THING IS CERTAIN*Sophie Kerr*

"Her appreciation of beauty, glints of humor and always that sense of abounding vitality."—*Boston Transcript*. \$1.90

SPELLBINDERS*Margaret Culkin Banning*

"Those who have read 'This Freedom' should not fail to read 'Spellbinders.'"—*New York World*. \$2.00

THE JUST STEWARD*Richard Dehan*

"Richard Dehan is a writer of uncommon power."—*New York Herald*. "Further proof of Richard Dehan's broad vision and dramatic genius."—*Boston Herald*. \$2.00

BALLOONS*Princess Bibesco*

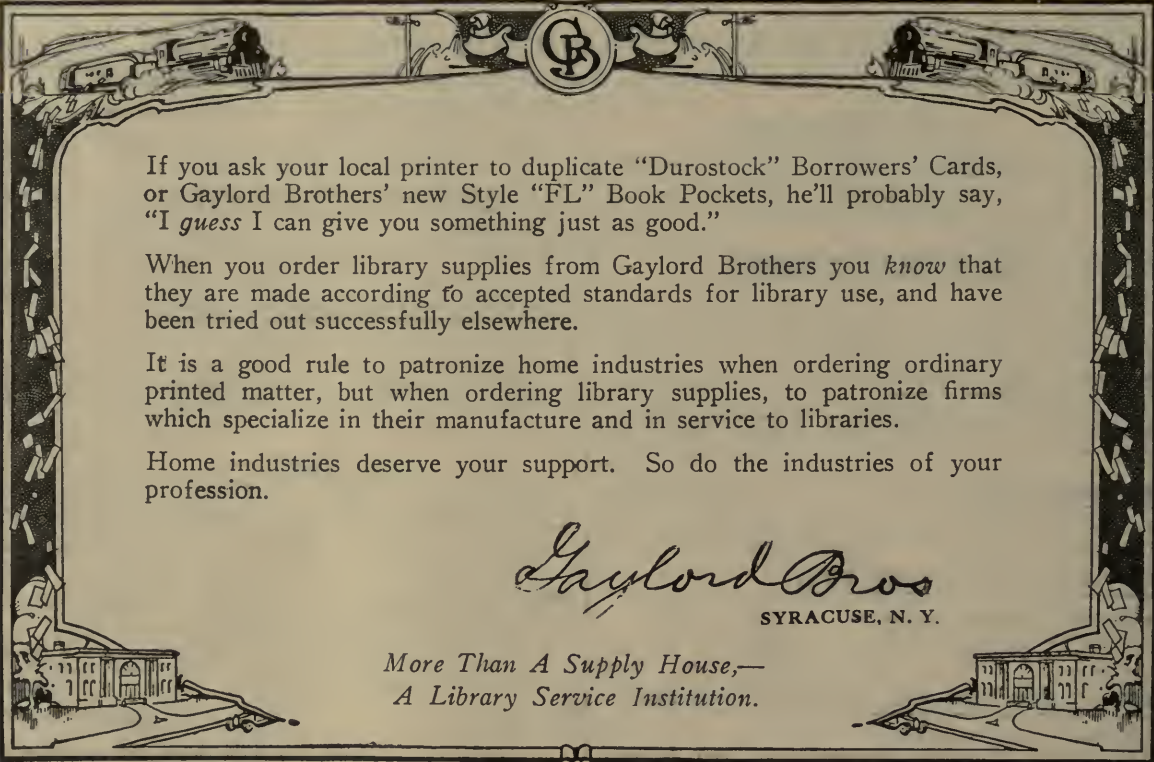

Short stories as vividly sensational as those in "I Have Only Myself to Blame." \$2.00

THE ALTAR STEPS*Compton Mackenzie*

"Curiously interesting. The result justifies the author's daring."—*New York Herald*. \$2.00

DECEMBER LOVE*Robert Hichens*

"An admirably done portrait, one of the best its author has painted, unusual, remarkable."—*New York Times*. "It is the Hichens of 'Bella Donna' working even more subtly."—*New York Herald*. \$2.00

If you ask your local printer to duplicate "Durostock" Borrowers' Cards, or Gaylord Brothers' new Style "FL" Book Pockets, he'll probably say, "I guess I can give you something just as good."

When you order library supplies from Gaylord Brothers you *know* that they are made according to accepted standards for library use, and have been tried out successfully elsewhere.

It is a good rule to patronize home industries when ordering ordinary printed matter, but when ordering library supplies, to patronize firms which specialize in their manufacture and in service to libraries.

Home industries deserve your support. So do the industries of your profession.

Gaylord Bros

SYRACUSE, N. Y.

*More Than A Supply House,—
A Library Service Institution.*

McClurg's —

specialize in library service. Librarians can leave all details of their orders to our care. This is made possible by our long years' of experience in handling the book business of Public Libraries, Schools, Colleges and Universities, together with our comprehensive stock of books of all American publishing houses.

**REDUCED PRICE FOR CHIVERS' BINDINGS,
IN NIGER LEATHER and BUCKRAM**

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

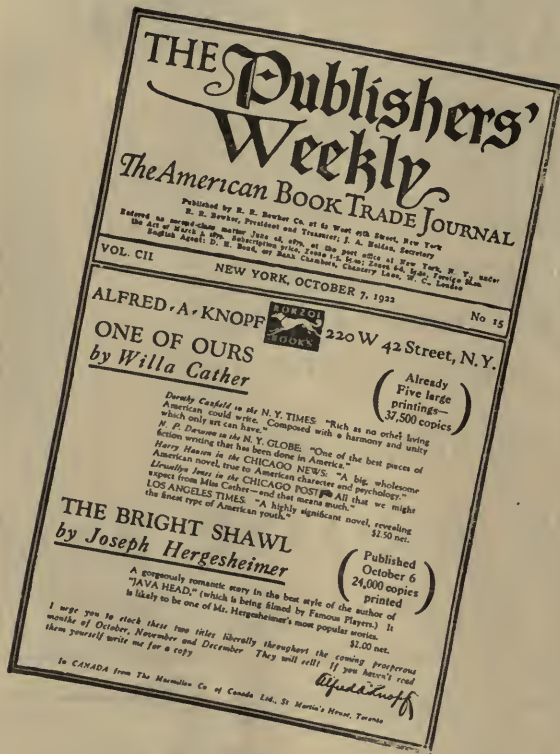

High-priced and desirable books sewed in Chivers' patented hand-sewing.

The Periodical of Books in Motion

Offering to the librarian weekly and continuous contact with and information about the books of all publishers as they are coming from the presses. Presenting timely and successful ideas for increasing the use and distribution of books. Discussing regularly those national affairs that affect the production and movement of books. Announcing regularly the important publications before their actual production. The comprehensive weekly record of new books is a valuable short cut to book buying.

Librarians will find that *The Publishers' Weekly* is the best single medium serving their need for "unpadded" book information—an invaluable tool in their own work and worthy a place on reading tables in the interest of the great bookreading public.

Special Library Subscription Rates

ONE YEAR (regularly) (Zones 6-8, 50c extra postage)	\$5.00	Librarians having annual income of \$3,000 or less (yearly)	\$3.00
ONE HALF YEAR (Zones 6-8, 50c extra postage)	\$2.50	Librarians having yearly salary of \$1,500 or less (yearly)	\$3.00
(Sample Copy On Request)		Duplicate copies to subscribing libraries (yearly)	\$3.00
		Staff Member subscription where library has regular subscription (add 50c postage. Zones 6-8)	\$3.00

Sure protection for your card-catalog guides

The weakest spot in catalog guides is the tab—the projection which carries the printed heading. With ordinary guides this tab soon becomes pulpy, dog-eared and illegible under the strain of constant fingering.

Library Bureau has produced a guide unsurpassed for durability, cleanliness and ease of handling by doubly reinforcing the tab projection with celluloid. The life of these celluloid guides is practically unlimited. They are guides—*plus!*

L. B. Celluloided catalog guides are carried in stock for immediate delivery. These printed sets cover author, title and subject headings.

Dictionary card-catalog guides, European War guides, school library catalog guides, children's catalog guides, state guides, month guides, etc., etc. are available. Send to our nearest branch for catalog No. 812 "Library Supplies." It contains full descriptions.

Better Public Documents Service to Libraries¹

REPORT OF THE YEAR'S DEVELOPMENT, BY MARY A. HARTWELL, OFFICE OF THE SUPERINTENDENT OF PUBLIC DOCUMENTS

IT is safe to assume that librarians who choose to come to this Public Documents Round Table meeting² are interested in and familiar with United States Government publications; hence many of you may already know the year's happenings in the Office of the Superintendent of Public Documents, as the latest printing bill calls our office. However, I hope you may hear something of interest, and I think I may promise you at least one or two real surprises.

In preparing this report of the year's progress, I have followed the lines suggested by last year's Round Table resolutions and by an official report of July 29, 1921³ which after my return to Washington I submitted to the Public Printer, Mr. George H. Carter. First of all, let me speak of the

CHECKLIST SUPPLEMENT AND INDEX

Copies of last year's Round Table resolution, urging the importance of bringing the Document Catalogues up to date and of issuing at an early date a supplement to the Checklist and an index to both the original Checklist and the supplement were immediately forwarded by the Public Printer and by the secretary to the Joint Committee on Printing (Mr. Ansel Wold) to the Superintendent of Documents for his consideration and report thereon. To the Public Printer, and thru him to the Joint Committee on Printing, Mr. Alton P. Tisdell, the Superintendent of Documents, in August of last year submitted a carefully considered report which, however, is too long to incorporate in this paper.

The essential feature of Mr. Tisdell's reply was to the effect that the paramount question is to bring up to date the *Document Catalogue* required by law, and that to do this and at the same time to lay the foundations for the Checklist supplement and index would require a re-

organized and enlarged cataloging force sufficient to cope with the situation. This means the immediate necessity of increased appropriations for catalogers in our office, as urged in your resolution of last year, which was sent to the Appropriations Committees of both houses of Congress, but which so far has proved unavailing. Neither your resolution of last June nor urgent appeals made last fall by Mr. Carter and Mr. Tisdell in personal hearings before the House Appropriations Committee and by Mr. Carter in his 1921 annual report to Congress (p. 38) have resulted in the increases asked for, or in the reorganized and reclassified force absolutely necessary to keep our present trained force intact and to attract new and experienced catalogers to our office.

In lieu of the increased budget asked for, Congress voted appropriations for three additional catalogers, but made no provision for increases of salaries to hold our present trained force. We lost many catalogers during the war and resignations still continue. We cannot keep our quota full. If only one of the reclassification bills now before Congress might become law there would be hopes of catching up arrears in Document Catalogues and after that of undertaking the enlarged program of Checklist work.

You will doubtless be amazed, as were we ourselves, to learn that the number of publications in the Public Documents Library (not including maps, which were not entered in the Checklist) has increased from 100,000 in 1909, when the printed Checklist closed, to approximately 300,000 in 1922; that is, an increase of two hundred per cent. In other words, the Federal Government has in the last thirteen years issued twice as many publications as it did during the first one hundred and twenty-one years of its existence between 1789 and 1909; hence a supplement to the Checklist would of necessity include twice as many publications as did the original Checklist. The supplement, therefore,

¹Paper read at the A. L. A. Public Documents Round Table, Detroit, June 27, 1922.

²Not printed.

would be a stupendous undertaking and an index to both the Checklist and the supplement would be an even greater task. When the time arrives for resuming Checklist work, the Superintendent of Documents will want a definite statement from the librarians as to which they want first—an index to the present Checklist or a supplement.

It has been suggested that as a help to librarians in the meantime, a short office bulletin of approximately sixty or seventy pages might be compiled, giving merely a list of series titles for new classifications assigned in our library since January 1, 1910, with an indication of the scheme of book numbers used in each class. It would be similar to our *Bulletin* 15 which listed new classes assigned to October 31, 1913. But office conditions are such that it does not seem possible at the present time to undertake the compilation of such a classification bulletin.

PROGRESS ON CATALOGS AND INDEXES

Monthly Catalogues and Index thereto. During the past year the *Monthly Catalogue* has been issued more promptly than for many years. It has made its appearance within the month following issuance of the publications it catalogs. This greater speed has meant no added rush on our part, for printers' copy has always been sent to the Government Printing Office very promptly at the close of the month; but the present Public Printer's efficient administration has resulted in far greater speed in the mechanical processes of printing and binding this publication, which gives us the finished product in one month, instead of two. Mr. Carter and his able assistants deserve the credit.

As to the annual Index to the *Monthly Catalogue*: work on this is also strictly up to date. Naturally the index for the year can never be finally edited until after the June *Catalogue* appears in July, but librarians may expect the annual indexes to the *Monthly* as soon as it is humanly possible to finish them and get them printed.

The Document Indexes have also been strictly up to date. Since the Swampscott conference, the sessional index for the 66th Congress, 3d session December 1920-March 1921, has been issued and distributed; and the galley proof has been read on the next Document Index for the last session, the 67th Congress, 1st session, which may therefore be expected within a reasonably short time.³ Meantime, you have the schedule of volumes for that session. The

³The Document Index for the 67th Congress, 1st session, was issued in September, 1922, and copy for the index for the 2d session will go to the printer before the end of November.

Congressional documents and reports of the present session, the 2d of the 67th Congress, are as usual, being indexed as issued.

Document Catalogues. At the beginning of the war, work on this series was practically up to date; but owing to war conditions the Document Catalogues necessarily suffered while our crippled force struggled hard to keep the more current publications going. Under pressure from within and without, our small, but loyal force under the most efficient direction of Miss Helen C. Silliman, has accomplished this past year, in addition to our other regular duties, an amazing amount of work on the belated Document Catalogue No. 13 for the 64th Congress 1915-17. I am delighted to report that the catalog is set up in galley form and that more than half of it, that is, the entries from A-LUMBER, had already been made up into 1311 pages' before I left Washington. Our estimate as to the total number of pages is approximately 2500, double column, large octavo, which is several hundred more pages than the preceding catalog had. We expect that the finished 64th Document Catalogue will be ready for distribution early this fall.

WEEKLY NOTES OF INTEREST

Last fall, as noted by Miss Guerrier⁵ and by Mr. Carter in his 1921 report (p. 37), arrangements were agreed upon for inaugurating a special library information service in the Office of the Superintendent of Documents, which would take over Miss Guerrier's *News Notes on Government Publications*.

You ask what has happened? I will tell you. Plans for a new periodical giving information of interest concerning Government publications were immediately formulated by our office and were submitted in September of last year to Mr. Carter for his approval. Just about that time, as you will remember, Congress officially put the ban on the issuance of certain periodicals, many of them of long standing and of great interest and importance to the general public. On account of existing explicit provisions of law, therefore, Mr. Carter and Mr. Tisdell were forced to wait.

Now the ban is lifted; for Congress has since passed a Senate Joint Resolution (No. 132) "to authorize the printing of journals, magazines, periodicals, and similar publications, and for other purposes," which became a law on the

⁴On November 13, 1922, final proof has been read on the entire catalog, A-Z, 2409 p. The Government Author List will add a few pages more. The catalog is therefore about ready for printing and binding.

⁵*Public Libraries*, October, 1921, p. 471.

11th of May as Public Resolution 57, 67th Congress.

Under this resolution the head of any Executive Department, independent office, etc., is authorized, with the approval of the Director of the Bureau of the Budget, to use from appropriations available for printing and binding such sums as may be necessary for the printing of whatever material of this nature the head of the Department may certify in writing as necessary in the transaction of the public business.

Some of the interrupted periodicals will doubtless be resumed under the authority of this resolution; and under its provisions Mr. Carter and Mr. Tisdell hope to launch our new periodical, providing the Bureau of the Budget approves our request for publication. We are now (June 22) waiting for authority to print and we hope that the publication may start soon after that authority is secured.

The publication as planned by us should prove of great interest to librarians and the public generally. It is to be issued weekly and will contain pertinent information concerning some of the most popular and interesting of Government publications. It will not have more than four pages a week, octavo size. In addition to the bibliographical descriptions and annotations it will show our library classifications and whether the publications are for sale or free distribution, where they may be obtained, the price, whether or not they go to depository libraries, and other general information of interest.

ADDITIONAL COPIES OF PUBLICATIONS FOR SALE BY THE SUPERINTENDENT OF DOCUMENTS

The second proviso to Public Resolution 57, 67th Congress, approved May 11, 1922, mentioned above, is very far-reaching in its effect. It provides "that the Public Printer shall print such additional copies . . . of any other Government publication, not confidential in character, as may be required for sale to the public by the Superintendent of Documents at the cost of printing and binding, plus ten per centum, without limit as to the number of copies to any one applicant who agrees not to resell or distribute the same for profit . . ."

Our office, therefore, may hereafter sell more than one copy of a Government publication to a single individual.

The proviso is of still greater importance to libraries, because under its authority additional copies of bills, resolutions and hearings, heretofore inaccessible to librarians, and also any other publications not confidential in character, may hereafter be printed for sale by the Superintendent of Documents. The Superintendent of Docu-

ments cannot distribute such hearings, etc., free—even to depositories—but from previous urgent requests for such publications, we assume that librarians of depository and non-depository libraries may all be glad to pay a reasonable price for them. Of course I cannot foretell what effect this new provision may have on future printing legislation.

CHANGES IN DISTRIBUTION TO DEPOSITORY LIBRARIES

Selective plan. By this time every depository knows that the selective plan is to be put into effect under the act making appropriations for the Office of the Superintendent of Documents (Public Act 171, 67th Congress, approved March 20, 1922). The Act carries a provision that "no part of this sum shall be used to supply to depository libraries any documents, books, or other printed matter not requested by such libraries." Only a few words, but they effect a wholesale change in depository distribution.

A selective list entitled "Classified List of United States Public Documents for Selection by Depository Libraries, July 1, 1922," is available for distribution. Depository libraries may on application receive an extra copy of this list; but the list is not for the non-depositories.

In order to receive shipments under the new plan a depository must return the list checked with series of publications wanted. Shipments will be made as usual under the old plan until sufficient time has been given librarians to return the checked list. The checking should, however, be done promptly. Of course those who desire to receive everything may continue to do so by giving satisfactory proof of their ability and willingness to make such Government publications available for public use. No more storing of public documents in the basement or attic or other inaccessible place.

Paragraph 2 of one of the Public Documents Round Table resolutions passed last June, in asking for selection of public documents, indicated your desires that State libraries "shall receive everything published." Present legislation grants to State libraries, as well as to other depositories, the full power of selection. It is, however, devoutly to be hoped that all State libraries, or State University libraries, will elect to receive everything; for there should be in every State at least one library which continues to receive a complete set of Federal publications.

Daily distribution to depositories. It may not be generally known that another radical change becomes effective when the selective plan goes

into operation. Shipments to all depository libraries will hereafter be made as the publications are issued. No longer will they be held up until a sizable package accumulates, or until the end of the month.

During the past year this daily service has been given to six depository libraries that had made formal application to the Superintendent of Documents. The experiment worked so well in these cases that the Superintendent of Documents was just on the point of extending this daily service to all depositories when he learned that Congressional action was then being taken toward putting the selective plan into effect at the beginning of the new fiscal year. It was deemed wise to inaugurate both changes at the same time.

The depository invoices will be sent as usual at the end of the month.

DEPOSIT ACCOUNTS

In response to many requests from libraries, the Superintendent of Documents hopes to develop at an early date a plan for deposit accounts upon which libraries may draw in payment for public documents ordered. Limited appropriations for the clerical force have heretofore prevented us from maintaining a sufficient number of bookkeepers to handle such accounts. Meantime many librarians find convenient our coupons, which are issued in sets of twenty for \$1, each coupon having the face value of five cents.

LAST YEAR'S ROUND TABLE RESOLUTIONS

This paper has already shown what action has followed some of your resolutions. I am forced to add, however, that your resolutions on questions 7 and 10 of Miss Woodford's questionnaire, relating, respectively, to "changes in covers, printing, and decorations of covers" and to "documents needed in popular form" cover matters which are entirely outside of the jurisdiction of the Superintendent of Documents.

In my report last July to the Public Printer I suggested that these two resolutions "relate to matters which might normally be considered by the permanent conference of Government officials in charge of publications," which body functions in connection with the Bureau of the Budget. But so far as my observation goes I have failed to notice any radical changes in the form of publications.

PRINTING LEGISLATION

The new printing bill is still in the hands of the Joint Committee on Printing. It has not yet been introduced in either the Senate or the House of Representatives. Constructive criti-

cisms of the committee print of the bill were submitted a year ago by the Superintendent of Documents to the Joint Committee on Printing. The intervening year has seen radical changes in printing and distribution and the chances are, therefore, that the new bill may largely be redrafted before it is finally presented to Congress.

Advertising Books by Aeroplane

Probably the first use of the aeroplane in book publicity is that made by Librarian Lloyd W. Josselyn of Birmingham, who flew to the Signal Mount conference scattering "Why Not Books" postals as he made what is doubtless the first air journey to a library meeting. The card, in green, red, black and white, bore on the reverse:

READ GOOD BOOKS

This card was printed by the National Association of Book Publishers; and distributed by J. E. Kirkham of the Library Bureau and L. W. Josselyn of the Birmingham Public Library via airplane, Birmingham to Chattanooga, November 1st in the interest of more and better books in the homes.

BUY GOOD BOOKS

The James Jerome Hill Reference Library*

By JOSEPH GILPIN PYLE, Librarian

WITH some hesitation I accepted the invitation to make a brief address to this section of the American Library Association. The James Jerome Hill Reference Library is represented today for the first time at a meeting of your body. The last, if not the least, of its calling, it can barely lay claim to any apostolate. But for that very reason it may not be uninteresting to you to hear its reason for being.

This library, opened to public use December 20, 1921, is the realization of a plan matured many years ago by the late James J. Hill. To carry it out he provided a library building of rare beauty; architecturally a work of genius, and unique in conception and execution. Before it was completed Mr. Hill died. The building was finished and an endowment for its permanent maintenance was provided by the generosity of his family.

It is a familiar fact that Mr. Hill always thought in terms of the future; always visualized it, always worked in harmony with what the prophetic eye revealed to him. He did this in so many apparently unrelated fields of activity, where no one would have expected him to be interested or informed, that it is scarcely surprising to find that he anticipated the development of library work, just as he did that of railroad extension, of agricultural improvement and of banking. He saw needs and provided for them. You will, I am sure, be amazed and interested to see how he grafted on this stock the bud of the most recently accepted theory of library work and growth.

His main thoughts were that reference work especially needed to be provided for and fostered, and that reference work should be expanded and popularized just as has been the work done by the circulating departments of the great public libraries of the country. We are agreed that, within a generation, there has been a revolution in the viewpoint of librarianship. A library is no longer, if it is to be a living thing, a collection of books such as a librarian thinks the people ought to want, and should be made to read if possible. It is for the modern, progressive librarian, a collection of the books that the people actually do want to read, whether their contents appeal to the librarian or not. The successful and useful library follows the lead of the newspaper in discovering what the public wants and giving it. The practice may possibly be carried too far, but the principle is firmly and finally established.

Let us apply that principle to reference work, and try to discover what it is that the user of reference books really needs. It is hardly a question for the great collections which, like the Library of Congress and a few others, aim at absolute inclusiveness. A few of these must exist, for the special purpose of the special student or writer as well as for their larger clientele. Neither is it an important inquiry for the college or university librarian, whose work must be so considerably shaped and directed by the nature and limits of the scholarship which is served by the institution of which his library is a part. But what ought a reference library pure and simple, created for the general public and aiming at the widest use-

* Address given before the College and Reference Section of the A. L. A., Detroit, June 28, 1922.

fulness—at the creation of demand as well as the supply—to be and to do?

Mr. Hill's answer to this question was intensely practical and simple. Desiring to serve the largest public, he determined that his library should include reference works on every subject except medicine and law, which are cared for in professional collections of their own in St. Paul as in most other centers. Then he directed that only a limited number of the latest and most authoritative works on each subject should be included in the collection. All that could pass this test were to be purchased. But wherever a new book really superseded an old, whether by the same author or by another, the new was to go on the shelf and the old was to be thrown away. No place here for first editions, rare bindings, curios of any sort. Mr. Hill did not mean to build a mausoleum for dead books.

To many librarians this substitution of the selective and eclectic idea for the "omnium gatherum" idea will be rather shocking. At least I found it so when I sought early advice from them. They were immensely helpful, but not at all enthusiastic or even convinced. Yet it is certain that this idea is in exact harmony with the most accepted principles of modern librarianship. It is keeping up with the head of the profession. It is just as right as it is that the circulating library should prefer twenty copies of "If Winter Comes" to a first edition of Keats, or "The Conquest of Fear" to the "Anatomy of Melancholy."

I have tried out the value of it practically by a slightly insincere ruse. When people come to the library seeking information I ask them this question: "Would you prefer to see from one to a dozen books containing the meat of your subject, the latest and best that the world knows about it, or shall I turn you loose in an alcove containing from one to three thousand volumes relating to it, and let you gather what you want?" It is not quite fair, because it assumes that our library contains big collections on each minute subdivision of knowledge, which it does not. But it is effective and illuminating.

I have never yet

been caught, because no single inquirer has ever failed to impress on me at once that he wanted to look at what we might call the "special collection." He wanted to have his winnowing done for him. With a specified and very definite thing in his mind, he wanted to get the best contribution upon it in the shortest possible time. If he meant to compile an exhaustive bibliography of a subject by consulting all the books ever written about it, the Hill Library is not the place for him. We turn him into our quite complete bibliographical section and show him where he ought to go, while we are looking after the man who wants to understand about the latest radio developments or the budget system or engineering formulae and achievements.

This consulting of the public demand and the public convenience, the Hill Library aims to carry out thoroly and conscientiously. It was designed by Mr. Hill for the special advantage of advanced students, writers and research workers. He himself was obliged in his youth to give up formal education when his father died. He completed the rare mental equipment which was his by a lifetime of reading. But he found it hard to get the books, and still harder to know which to get in order not to waste precious time and effort. So he intended to make that selection, and gather together that collection, for all who should be similarly circumstanced or possessed of like mental ambitions, without the means of satisfying them. So he created the theory of a library that we are trying to embody in practice.

But we intend that, as he would have wished, no deserving seeker after knowledge shall be turned away. The library responds to every demand for volumes not in its collection if they are at all consistent with its purpose. It loans

books from its shelves to other libraries, and borrows from other libraries for its patrons, it has twelve private study rooms, each fully furnished, heated, and lighted by a window looking out upon a quiet street with the Mississippi beyond. These are always at the service of scholars who are interested in anything in our collection, and may be retained day after day by serious readers.

READING ROOM IN THE HILL LIBRARY

Especially does the library regard as its field the great Northwest, where so many colleges and universities are struggling with narrow resources to give the highest grade of education. For these, so far as its means permit, the Hill Library will procure the books they need and cannot afford, and lend them according to its liberal inter-library loan rules. It hopes to co-ordinate the scholarship of the country, and focus the bright beam upon all the places in its great territory where mind is in the making.

It would be ungenerous not to acknowledge the great debt that the Hill Library owes to scholars and specialists in given subjects throughout the country in making up the lists for its original collection. No man, of course, is qualified to designate the best fifteen hundred or five hundred or fifty volumes in each of all the varied divisions of knowledge. Men whose names are widely known for their eminence in special subjects graciously, and in most cases enthusiastically, consented to revise the purchase lists. The present book collection of the Hill

Library, therefore, tho small, represents the same kind and form of selective authority that is represented by the articles in our great encyclopedias. It is a composite of the exact scholarship of the country, applied to the collection of the learning of the world.

This is the partly realized dream of the mind of the founder of the Hill Library. The library will grow slowly. It is a serious-minded concern. Its field is limited not by exclusion of subjects; for it is as full on philosophy as on physics, and has a collection of the great classics as complete as its works on railroading. But its specialty must always be to the more familiar forms of reference work what the post-graduate course is to the regular curriculum leading to a university degree. It transcends these purely formal limitations by the exercise of the most catholic spirit, which loves nothing so much as a sincerely inquiring mind, and will never let a bit of red tape stand between such a mind and the satisfying of its hunger or the realization of its dreams.

Treasury Decision 39108

THIS decision was rendered by Mr. Ernest W. Camp, Chief, Division of Customs, Treasury Department, after hearing granted representatives of the Typographical and allied unions.

The law requires that imported articles bear a conspicuous and permanent stamp indicating in English the country of origin. Books, of course, fall under this rule. The union officials, however, claim that certain American publishers have been evading the law by affixing the record of foreign manufacture in such a way as to be removed after books had passed the Customs; e. g., on a perforated leaf at the back. The purpose of the evasion was to conceal from the public the fact that they had sent their work abroad to be done. The printers, binders, etc., accordingly, asked for a rule that the required stamping be on title page or cover. T. D. 39108 gives assent to this request; that is to say, only such positions in a book shall be considered to meet the law's requirement for conspicuousness. Since then Mr. Camp has agreed to recognize both sides of the title leaf instead of the recto only.

The Decision is, in our opinion, a perfectly

correct interpretation of the marking law, and the law itself is proper. American work should be done in America and fraud should be branded. We approve heartily of the printers' demand and find no fault with the letter of the Decision.

It has, nevertheless, had a most unfortunate effect on libraries—an effect unnecessary and not contemplated either by the printers or the Treasury. This arises from the interpretation given at the ports to the Decision. They have read in it a requirement that every book, irrespective of its imprint, shall hereafter receive on its title leaf a special mark, "Made in England," etc. Heretofore, during the thirty years that the law has been in force, a foreign imprint (i. e., foreign place, publisher, date) has been accepted as declaratory of country of origin, without further stamping. Now the libraries are being asked to stamp such books again.

Such an interpretation rigidly enforced will bring upon libraries a great hardship, beyond the intent of the law. Thus:

Every library, whether Governmental, institutional or public, will under the new tariff law be subject to a duty of ten per cent on every item arriving unmarked from abroad, whether by post or freight, whether directly or indirectly, and this despite the law's specific exemption of such libraries from duty. The marking, to be

*Text of the argument presented in the hearing at the Treasury Department on T. D. 39108, October 27, at which the A. L. A. was officially represented by Mr. H. H. B. Meyer, a member of the Federal and State Relations Committee, and Dr. Raney, chairman of the Book Buying Committee.

satisfactory, must be on title leaf or cover and contain the name of the country of origin in English, the only exceptions being the three cities, London, Paris and Berlin. Thus, every number of a periodical, every item received by purchase, gift or exchange which arrives unmarked will be subject to the duty. This duty it will in a large percentage of cases prove impossible for the library to avoid, even tho every precaution is taken to have the stamping done before shipment hither; e. g., in receipts by gift or exchange. A library cannot lay prescriptions upon its unknown donors or upon institutions abroad. The Library of Congress, for example, would have little chance of getting foreign governments to prepare special title pages for their legislative proceedings before dispatch to Washington.

Under such an interpretation the Smithsonian Institution would receive a stunning blow, for every item passing thru its channels en route to American libraries would have a duty assessed upon it, which it would have to prepay and then collect from the recipient library. The only way the library would escape a duty upon gifts would be a refusal of the gifts before their release from the Customs or the Post Office.

All this stamping of periodicals by the hundreds of thousands would in the end be futile, since, under normal procedure, the covers bearing the stamps would go into the waste basket at time of binding. Yet in this discarding of covers there would be peril, for the law prescribes that, if there be fraud, that is to say, if the librarian brings in some number unmarked by design, or if a mark be subsequently removed, he shall be subject to a fine up to \$5,000, or to imprisonment up to a year, or both.

Then, after paying the duty for arrival unmarked, the library will not get its publications till it has affixed the desired mark. How shall it determine what the mark is to be? Why, by examining the title page. Well, if you must accept the testimony of the title page in the end, why not at the beginning? Why be required to repeat the declaration? This is the *reductio ad absurdum* which makes certain that the law will not be rigidly enforced, but there will be just enough enforcement to cause constant irritation.

After all the bother and the penalties the library will not have violated the actual intent of the law a single time. It imports only bona fide foreign publications. The American publication which tries to hide its foreign manufacture will be retailed here, not abroad. The fraud will not be found in the libraries' imported box. It is only the publishers' case that needs examination. The ten thousand innocent

items should not be penalized for the sin of the one. Even the trade unions would derive greater advantage from confining second marking to the case of the correction of imprints than from applying such to all imprints, for such second marking could then be advertised as one of shame, from their point of view.

The Decision aims at a fraud, i. e., an American book made abroad but carrying an American imprint after surreptitious withdrawal of the foreign mark. It does not aim at the bona fide book, testifying to its origin in the imprint on the title page. We merely ask for an exposure of the former by addition of stamp on title leaf, and the usual recognition of the latter's character without extra stamping.

The union officials give us their word that they wish us accommodated. The Treasury, in turn, was not aiming at us. An adjustment, therefore, ought to be easy. For this we do not ask a change in either the law or the Decision. We request only that the misapplication at the ports be checked. A simple circular letter would accomplish this without disturbing anybody's equanimity or misconstruing the statute.

The difficulty which Mr. Camp will see is that of setting up one rule for one class of merchandise and another for another. If "Made in Germany" is required for razors, why not for books? The answer is simple. Without the mark in the case of razors it would be a rare customer who would recognize the razor as made abroad. But in a book, the imprint at once forces such a conclusion upon every reader. In a word, a book, unlike other articles, has in its regular make-up a record of its origin. If this record be one of foreign manufacture, accept it. If it be one of domestic manufacture, when actually made abroad, brand it.

This is our request, and we feel that the custom of thirty years need not be uprooted to our great cost and inconvenience, when no charge has ever been made against us, and the instigators of this Decision say they wish no imposition upon us now.

M. L. RANEY.

Bargains

To the Editor of the LIBRARY JOURNAL:

I have read the article in your number of November 1, relative to the position taken by Dr. Raney, chairman of the A. L. A. Committee, concerning the price of English books in this country, and in particular with reference to the price of Cambridge University Press publications, for which we are agents.

We must take exception to the statement that in general our prices for Cambridge University

Press publications are nearly 40c to the shilling. We have had an examination made of the purchases which we have made from the Cambridge University Press during the present calendar year, and it may be of interest to you to see a list of titles together with the English price and the American price. These are all titles, as you will note, on which the American price has been based on a figure of 35c or less to the shilling, and with so considerable a list as this we believe you will agree that a statement that it is our custom to price the Cambridge University Press publications on the basis of nearly 40c to the shilling is erroneous, especially since many of these are priced on the basis of approximately 30c to the shilling. The list is as follows:

	Eng. Price	Amer. Price
Adamson. Short History of Education ..	15/-	\$ 4.40
Arber. Devonian Floras	17/6	6.00
— Herbals: Their Origin and Evolution	21/-	7.00
— Water Plants	31/6	10.50
Archer. Secondary Education in the 19th Century	12/-	4.00
Aristotle. Rhetoric. Trans. by Jebb ...	12/6	4.25
Askwith. A Course of Pure Geometry ..	12/6	4.25
Atkins (Editor). The Owl and the Nightingale	16/-	5.00
Attenborough: The Laws of the Earliest English Kings	15/-	5.00
Baker. Principles of Geometry	12/-	4.00
Bateson. Mendel's Principles of Heredity	17/6	6.00
Bennett. The Pastons and Their England	15/-	5.00
Berry. The Atmosphere Manual	2/6	.90
Bolland. The General Eyre	6/-	2.00
Bosher. Integral Equations	3/-	1.00
Bosanquet. Education of the Young in the Republic of Plato	4/6	1.25
Bourgeois. Modern France, 2 vols. ...	21/-	7.00
Brown. The Andaman Islanders	40/-	12.50
Brown. Experimental Science, Pt. II ..	4/6	1.50
Brown. History of Scotland. 3 Parts. Each	8/-	2.75
Browne. Mental Measurements	21/-	7.00
Burnside. Theory of Groups of Finite Order	17/6	6.00
Bury. Constitution of Later Roman Empire	1/6	.50
Buckland. Textbook of Roman Law from Augustus to Justinian	50/-	15.00
Burbury. Kinetic Theory of Gases	9/-	3.00

[The complete list contains 177 titles, of which the first twenty-five are here given. The aggregate cost of the titles listed is 2,513 shillings and 838.50 dollars. The average rate for the whole list is, therefore about 33.3c. Ed. L. J.]

In this connection, I think it should be emphasized that libraries customarily receive from book stores and jobbers some considerable discount from the American price, whereas it is well known that it is not customary in England to give any discount whatsoever to libraries from the net prices of the books.

When these factors have been taken into consideration it seems to us that it is apparent that with the duty which must be paid, with the transportation expenses, and with the necessity of carrying a stock of books which do not sell rapidly in proportion to the value of the stock carried, the American price as fixed by us is as low as is commercially possible.

A. H. NELSON, *Vice-President*
The Macmillan Company.

CORRECTION

Inadvertently the words: "*The Contemporary Review*, costing forty-two shillings, or *The Fortnightly Review*" were omitted from the last bulletin of the A. L. A. Book Buying Committee. The third paragraph should read:

Similarly, *The Contemporary Review*, costing forty-two shillings, or *The Fortnightly Review* and *The Nineteenth Century*, forty-eight shillings each, in England, can be gotten here for seven dollars apiece, thirteen dollars and fifty cents for two or twenty dollars for the three.

On Completing Files of Foreign Publications

DURING the past summer, when Mr. Gerould, of the Committee, was in Berlin, he had a conference with Dr. Juergens of the Notgemeinschaft fuer Deutsche Wissenschaften in regard to the exchange of services between that organization and American libraries. Dr. Juergens stated that he had been able to secure and to forward to us a considerable number of periodicals represented on the list of desiderata which had been sent to him in the summer of 1921, and that he expected to be able to supply a number of others. He expressed his appreciation for the service already rendered by our Committee to the German libraries and requested that, if possible, we give them still further assistance.

It was determined consequently that Dr. Juergens should send to us a list of such periodicals as he has been able to collect, supplementing those already sent, and that he is to furnish also a revised list of their desiderata. The Committee therefore, recommends the following:

That American libraries which have files of German periodicals from which volumes and single numbers dating within the war period are lacking, should at once compile accurate lists of their desiderata and should forward these lists to Otto Harrassowitz in Leipsic, who agrees to undertake the very difficult task of supplying the missing numbers.

An arrangement has been effected between this firm and the Notgemeinschaft so that any further numbers which that organization is able

to find will be turned over to Harrassowitz and used to fill the orders coming to them from American libraries.

Wherever possible, in cases where a sufficient number of copies of desired numbers cannot be secured, arrangements will be made for re-printing, pro-rating the cost with that of the originals, so that the price will be uniform.

The Committee desires to express its complete assurance that this commission will be handled by the firm of Harrassowitz with efficiency and at the lowest possible cost.

Mr. Gerould's investigation during the summer has convinced him that there exists in the hands of the various dealers a considerable body of German periodicals for the war period, but that as so many of these are unlisted by the dealers holding them, it will not be an easy matter for Harrassowitz to purchase the numbers which we need. We cannot expect him to undertake this task for us without adequate remuneration, but we feel confident that the figure will be kept as low as possible.

A little later an appeal will be made to the members of the Association to assist in supplying to the German libraries the books and periodicals which they need.

It is impossible to stress too strongly the very serious situation which is confronting the German university and scientific libraries. Their resources, reckoned in marks, have increased in only a very small ratio. They have been obliged to cut their expenses at every possible point, and it is with the greatest difficulty that they are able to keep in operation.

The exchange rate on the mark being what it is, the purchase of foreign books with their own funds is absolutely out of the question. The world of scholarship cannot afford to allow these libraries to go without assistance. We ourselves will be the losers if some means is not found of placing at the disposal of German scholarship the results of our own work.

JAMES THAYER GEROULD,

WILLARD AUSTEN,

H. M. LYDENBERG, *Chairman.*

A. L. A. Committee on Completing Files of Foreign Periodicals.

Education Week

THE American Library Association, which has been invited by John J. Tigert, U. S. Commissioner of Education, to have a part in the observance of American Education Week, December 3 to 9, draws the attention of librarians to the opportunity offered to emphasize the educational service of libraries, and offers the following suggestions:

There are separate slogans and topics for each of the seven days, and the library will find it possible to write two or three short newspaper articles each day about the library and its connection with topics for that day. Short lists of books will be appropriate on most of the days, and interviews with prominent people about library service will probably be acceptable in any newspaper office.

Some libraries will doubtless wish to make an exhibit of books, pictures and other library material during the week, or in some instances to have separate exhibits each day. Personal or circular letters to a few of the leaders of the community on each day calling attention to the exhibit of books, to the service which the library renders and its relation to the subject for the day, would probably bring good results in many places.

There will also be an opportunity nearly every day during the week to do some special thing which will show the library's connection with other educational agencies and its own direct educational service.

Letters may well be sent to the ministers and others who are to speak on Sunday, December 3d, asking them to mention in their talks the library as an agency for Americanization, citizenship and education in general.

On Monday, citizenship day, a reception might be held at the library for foreign-born groups. This would also be a good day for distributing a list of books about the United States.

On Tuesday, which is patriotism day, some libraries may find it possible to have an exhibit of national, State and other flags, borrowed from individuals and organizations in the city.

Wednesday is school and teacher day, a very appropriate time for sending a communication to every teacher in the city, emphasizing the importance of training children to use books and libraries. Lists of children's books may well be distributed on this day to the school children and to parents and teachers.

The topic for Friday, equality of opportunities, suggests emphasizing the service of the library in providing the means of adult and continuing education.

Material which will help in the observance of American Education Week may be obtained from the U. S. Bureau of Education, Washington, D. C., and from the National Education Association, 1201 16th Street N. W., Washington, D. C. The American Legion is co-operating in the observance of this week, and it is probable that the officers of the local chapter of that organization as well as the superintendent of schools will be interested in the library's plans.

THE LIBRARY JOURNAL

TWICE-A-MONTH

NOVEMBER 15, 1922

THE A. L. A. conference for 1923 at Arkansas Hot Springs, April 23-28, unless on further investigation hotel accommodations should be disappointing, indicates the mecca toward which the faces of librarians from all parts of the country should be looking forward with the new year. A spring, instead of summer, meeting is, of course, necessary in the South, and in previous instances has not stood in the way of a large attendance, and the date avoids both the Commencement season, which often keeps college librarians away from the conference, and the heat wave usually to be expected toward the Fourth of July. One purpose of the location is, of course, to invite a large attendance from the South, and it is to be hoped that southern librarians will appreciate the opportunity and will reciprocate the endeavors of those who travel far from North and East and West by making the journey to this southern centre. The Arkansas Hot Springs are reached by the Iron Mountain Railroad and are especially convenient to Texas, which is a banner State in library development in the southern region. The Texas libraries at Austin, San Antonio, El Paso, Dallas, Houston, and Galveston, as well as in smaller centres, are well worth visiting, and it is most desirable that a post-conference trip may include as many of these as possible, and a return journey northward thru other southern States which are also making good headway in library progress or which, on the other hand, need the stimulus of such a library visitation.

★ ★ ★ ★ ★ ★ ★

THE southern library movement has, in fact, already taken a new lease of life, especially in regional organization, possibly as one result of the Enlarged Program movement of three years since. The successful meeting at Signal Mountain, near Chattanooga, resulted in the definite formation of a Southeastern Library Association while simultaneously a Southwestern Library Association has been set on foot, which, like our relations with Canada, will give the word "American" in the title of our national organization the broadest sense, since delegates from old Mexico were in attendance and Mexico is to be definitely a participant in the new organization. Incidentally, the Signal Mountain gathering was notable for the introduction

of a new method of library propaganda. The enterprising Mr. Josselyn, who was responsible for the library daily at the Asbury Park conference, added the aeroplane as a library help to the radio, which has already come more or less into use, and flying from Birmingham to Signal Mountain distributed "Why Not Books" cards as he passed over promising fields for such seed sowing. The regional meeting at St. Joseph, Mo., also proved a signal success and fills the gap between the new Southwestern Association and the region in which Minnesota and Wisconsin are notable. Another step in assimilation is shown in the change of name of the Keystone Library Association, hitherto representing northern and western Pennsylvania, to the Pennsylvania Library Association, which is in line with the nomenclature in all other States, and possibly there may work out, with the help of the Pennsylvania Library Club of Philadelphia and vicinity a regional organization which will include Maryland and Delaware officially in the Atlantic City gathering, for which Philadelphia and New Jersey have hitherto been chiefly responsible. Credit should be given to the Pacific Northwest Library Association as a pioneer in regional organization, and this, like the new Southwestern Association, is international in giving to the word "American" its wider meaning.

★ ★ ★ ★ ★ ★ ★

A NEW feature in connection with the Council meetings at Chicago, December 28-30, will be the meeting of chief librarians of the larger public libraries, where bigness presents new problems not faced by the smaller libraries. Dr. Hill, in sending from the Brooklyn Library an inquiry as to whether other public libraries in the larger cities thought such a meeting would be worth while, brought out a surprising unanimity in its favor, and the request for suggestions of topics produced unexpected results in a list of more than sixty subjects, which one or another thought could usefully be discussed in such a gathering. Doubtless many of these subjects are common to smaller as well as larger libraries, and any meetings outside the general conference should be careful to confine debate to questions specifically germane to the respective gatherings. Of course the financial question

will be especially at the front, as the great difficulty before our state and public libraries has been to obtain appropriations in proportion to the increased allotments for non-library purposes, and the growing public demand for library service, which requires new dollars with every added reader.

★ ★ ★ ★ ★ ★ ★

ALTHO the American Library Association has no official connection with American Education Week and the official announcement from the N. E. A. makes no mention of libraries, it is nevertheless greatly to be desired that libraries thruout the country shall do their best to make this week of important value and, incidentally, to emphasize the importance of libraries as part of the educational system, locally as well as nationally. The U. S. Bureau of Education, in its broadside issued in preparation for Education Week, recognizes libraries in this connection and is fresh evidence of the desire of the Bureau under the present Commissioner to continue the relations with libraries established under earlier administrations. The week of December 3-9 should be one of close relation between librarians and teachers and prompt steps should be taken in each locality by librarians to co-operate in every way toward what should be a common goal of both professions, particularly in the rural centers where the connection has not yet been thoroly made.

LIBRARY work in the Navy will suffer a serious loss thru the resignation of Charles H. Brown, to take the position of librarian of the Iowa State College, whose library is to enter upon a new stage of development of state-wide importance. Under Mr. Brown's administration and with the backing of Captain Train and the higher officials of the Navy Department all the way up, library work for the men of that service has not only been of the highest value but has earned such full official recognition that, while forces have been reduced and budgets have been cut, the library appropriation in the budget for 1923 and that already outlined for 1924 remain almost the same. The Navy has kept ahead of the Army in this field, but it is to be hoped that the naval precedent will be followed in the new Army budget. This success has been due largely to Mr. Brown's personal efforts and ability, and it is not because of any dissatisfaction or discouragement that he leaves the Government service, but only because the new field affords for himself and his family an opportunity especially inviting. The Navy Department proposes to keep this important post in the best hands, with fairly adequate salary, and we hope it may find a worthy successor to the man who has done such important service in the initial work of organization after the Government had taken over the work commenced by the A. L. A.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

MID-WINTER MEETING

THE mid-winter meetings will be held in Chicago December 28-30, with headquarters at the Hotel Sherman. Council, Executive Board, Editorial and Education Committees, League of Library Commissions, University, College and Normal School librarians, and librarians of large public libraries are arranging for conferences.

The first session of the Council will receive a report from the Committee on Constitution and By-laws, and will transact miscellaneous business. At the second Dr. Raney for the Book-buying Committee and Dr. Wyer for the Federal and State Relations Committee are asked to report on the copyright situation. This will be followed by a discussion of standardization of library service led by Josephine A. Rathbone, chairman of the Committee on Standardization. The third session will be devoted to discussion of certification and salaries, Frank Keller

Walter, chairman of the Committee on Certification presenting the former, and Charles H. Compton, chairman of the Salaries Committee presenting the latter.

On Thursday afternoon the Executive Board will meet and in the evening the Editorial and Education Committees.

Normal school librarians and librarians of large public libraries will meet on the morning of December 28; and the League of Library Commissions, University Librarians, Librarians of Large Public Libraries and a second meeting of Normal School Librarians will occupy the afternoon of that day. In the evening the "Large Librarians" and the College Librarians will meet. On Friday morning the League and the University Librarians will hold second sessions and there will also be a meeting of the Executive Board. In the afternoon the Council will meet and in the evening the Education Committee. The council will hold two meetings on Saturday morning and afternoon respectively.

A.L.A. REGIONAL MEETING AT ST. JOSEPH

THE first official Regional Meeting of the American Library Association was held at St. Joseph, Missouri, October 17-18, by the Kansas, Missouri and Nebraska Libraries Associations. These associations have been making plans for this conference since the Colorado Springs meeting of the A. L. A., when the idea was first broached. The registration showed an attendance of 247, there being 105 from Missouri, 72 from Kansas, 54 from Nebraska, 12 from Iowa, one each from Illinois, New York, Oklahoma and California.

The opening session on Tuesday morning was presided over by Purd B. Wright of Kansas City. After welcoming the librarians, Rev. C. M. Chilton of the St. Joseph Library Board said that Americans were beginning to understand that the destiny of a democracy was not inevitable. We formerly had the idea that our manifest destiny was ready-made, but the War disillusioned us. Democracy has to be worked out. The dissemination of the right kind of information is absolutely essential. The Public Library can meet this need. It is now one of the great fundamental forces of modern life, but it will not complete its full duty until it raises the intelligence of the last one of the ignorant and the poor. The time will come when the library will be an aggressive and dominant force.

Mr. Wright, in responding, said in part:

It is especially fitting that this first regional meeting of the A. L. A. should be held in St. Joseph, within a few miles of the geographical center of the United States; the great gateway of both Kansas and Nebraska.

For a time, a little to the south of us was that great trade thoroughfare known as the Santa Fe trail, reaching thru Kansas to the Southwest. A short distance west branched the "Great Medicine Road of the Whites," better known as the Oregon trail, out thru Nebraska, along the Platte, to the Northwest, over which the land-hungry poured for homes. And it was this road that tied Oregon to the United States.

In still another way it is fitting that the regional meeting should be held here. In Indian legends from coast to coast you will hear of the "Road to Paradise," the "Pathway to Peace." Whatever it may be named, it means this. The land between the Platte in Missouri and the Missouri River was the holy land of the Indians, a haven of refuge for the oppressed, an asylum for the afflicted. No harm could befall one once in the sacred place. There was no fear of mortals—no dread of departure from life. Were not one's feet on the Pathway to Peace?

Thru this gateway passed Mark Twain on his way to Nevada and endless fame, taking the coach a few blocks south. And from here started, April 23, 1861, the Pony Express, which cut down the time between the Mississippi and California from twenty-five days, over the old route thru the south, to ten days, and in extremity, to seven and one-half days!

THE JOYS OF GETTING LOST

The main address of the morning, Arthur E. Bostwick's paper, "The Joys of Getting Lost," was read by Sula Wagner. A few paragraphs from this may suggest to librarians the joy and desirability of making a new trail for one's self and of not hesitating to break away from accustomed routine.

The joys to which I refer are those experienced in the process of finding oneself again, but as one can not find oneself without first getting lost, I feel that my title is justified. "Getting lost," of course, is a relative term. I can not conceive of any intelligent person's getting lost permanently. Persons die, it is true, when they are lost, but always because of some attendant circumstance. The distance to civilization may be too great for them to traverse; they may be attacked by wild animals; they may starve simply because they do not know which of the fruits and roots around them are edible. Those things are not necessary features of getting lost. When the Indian was asked if he were lost, he replied proudly, "No! Indian not lost; wigwam lost; Indian here."

When a man finds himself confronted by unfamiliar conditions and knows not where to turn to extricate himself, he is as truly lost as if he were in the jungle or in the erstwhile cowpaths of ancient Boston. If he does not know how to get out, he is in for an unpleasant time. What may happen to him may even put an end to his usefulness. This is eminently true in an occupation like librarianship where much of what we do is a matter of routine. We are on a trail, and when something odd or strange or unexpected demands instant decision or action, we find ourselves floundering around in the underbrush. If we were never off the trail before, we are in for an unpleasant time.

Unfortunately our training, like that for most other professions or occupations is a training for routine. We can get along speedily and well on the trail—but off it! We just trust to luck that we shall never get off it—and we trust in vain. For the one certain thing in this life of ours is a good measure of uncertainty. The one thing that we may confidently expect is that something unexpected will happen. But professorships of resourcefulness are not found in our colleges. What training we get in this regard, we shall have to give ourselves. We shall have to practice getting lost, for the satisfaction involved in extrication. Then when the emergency turns up, there is at least a good chance that it will not be an emergency at all. Instead of giving hostages to Fortune, we shall have forced that fickle goddess to give them to us.

In other words, my advice to librarians, as to everyone else is, 'Get off the trail!' at least occasionally.

REPORTS OF PROGRESS

Following, short addresses were given by Willis H. Kerr and Irving H. Bundy, presidents, respectively, of the Kansas and Missouri Library Associations, and Nellie Williams, secretary of the Nebraska Library Commission.

Mr. Kerr, speaking on "As It Is in Kansas," said that there are now ninety-four tax-supported public libraries, forty-five college and institutional libraries and 100 subscription libraries in Kansas—a total of 239. In 1921 sixteen new public libraries were organized. Eleven public libraries have increased their income during the last year; in two towns the

income has been decreased. Kansas has a county library law, but no county library yet established. A number of libraries are giving free service to county residents. Seven public libraries are conducting regular library columns in their newspapers.

Mr. Bundy said that in Missouri "twelve new association or subscription libraries have been established in the past year; five cities are now considering the establishing of public libraries under tax support; two cities, Farmington and Columbia, voted one-half mill tax for the support of their libraries, formerly maintained as subscription libraries. Missouri has a county library law, but as yet no county library. St. Louis County was ready to vote on the proposition last spring, but owing to the fact that the county had already reached its constitutional tax limit, from which library tax must be taken, it was impossible. In order to remedy this it would be necessary to change the Constitution, and the Tax Committee of the Constitutional Convention had agreed to recommend that a municipality or county be allowed to vote a library tax not to exceed two mills, in addition to the general tax. Mr. Bundy stated that it seemed probable that the Constitutional Convention would adopt the recommendation of the Tax Committee. In case of adoption by the people it would be the first State Constitution providing for a library tax separate from the general tax, thus putting the library on the same taxation basis as the public school.

For Nebraska Miss Williams reported twenty-one cities of a population of 3,000 and up, all with tax-supported libraries; twenty-three towns of 2,000-3000 population, twenty-one of which maintain libraries by tax; sixty-five towns of 1,000-2,000, of which forty-eight have taxed libraries and seventeen have not. Of these seventeen towns, thirteen have association libraries, leaving four without any library facilities. There are also forty-four towns under 1,000 population, having libraries—twenty-nine tax supported and fifteen association. Nine library boards have seen fit to lower salaries slightly, in one case where the income has been substantially increased. Seventeen librarians are receiving the same amount that they were two years ago. In eighty-eight cases salaries have been raised and in five of these the librarian is receiving \$1,500 or more. In twenty-four towns the library income has been reduced within the last two years. In thirteen it has been materially increased. The remaining eighty receive approximately the same amount they did two years ago.

HOW MUCH REVENUE DOES A LIBRARY NEED?

The Tuesday afternoon session was presided

over by Mr. Bundy. "The Library Revenue—How Much Does a Library Need—How to Get It" was the subject discussed by three library trustees. G. L. Zwick, of the St. Joseph Board, emphasized the point that the library should have a constant and settled income upon which to depend. The worst possible plan, in his estimation, was for the Library Board to have to appear before the City Council annually asking for the library appropriation. He advocated a stated mill tax provided for by legislative enactment and spoke of the provision proposed for the Missouri Constitution which would provide for a separate library tax. Mr. Zwick is a member of the Constitutional Convention and is much interested in seeing this provision made.

Mr. John E. Heffelfinger of the Arkansas City (Kan.) Public Library Board, spoke in part as follows:

The South Dakota Bulletin (June, 1921) states that it is impossible to run any kind of a library on less than \$1,500; and that up to a population of 2,500, \$1 per capita is necessary.

From our own investigations we conclude that initial expense granted and, therefore, not considered, satisfactory library service in towns of 5,000 to 25,000 can be maintained on a per capita basis of from 65 to 75 cents. We have not studied sufficient circulation data to more than hazard the preliminary statement that in cities of the size already named an amount ranging from 15 cents to 20 cents per book circulated seems sufficient under present conditions. Either plan in most cases studied would raise approximately the same budget.

From studies made in South Dakota and which we have checked over and verified for typical Kansas libraries, we may conclude in general that the revenue when raised will be distributed along the following lines: Salaries, 44 per cent to 54 per cent; books, 12 per cent to 16 per cent; periodicals, 3 per cent; binding, 3 per cent to 4 per cent; fuel and light, 6 per cent to 8 per cent; janitor service, 10 per cent to 13 per cent; insurance, 1 per cent to 2 per cent; supplies and printing, 3 per cent to 4 per cent; equipment and upkeep, 3 per cent to 5 per cent; miscellaneous, 3 per cent. If the minimum percentages are used in each case only 88 per cent of the tentative needed revenue will have been spent; and if the maximum percentages are followed there will be a total of 112 per cent, or a deficit of 12 per cent.

While in Kansas the full power to make the tax levy for library purposes is in the hands of the local Board (with maximums set by the state legislature) yet in the long run no Board will approach this maximum unless popular acclaim approves such a step. And this approval can come only with widespread individual realization of library functions. The more general the use of the library the more general will be the moral support and community willingness to give without question the budget desired by the Board. How to get the budget is primarily a question of popularizing the library and of putting it on the same financial plane with paving, with police and fire protection, with water, light and sanitation, and as a proper adjunct to school facilities and school taxation.

A paper by Bruce McCulloch, of the Omaha Library Board, in his absence, was read by Miss

Tobitt. The following are brief extracts from it:

From my own limited experience . . . I would say that the generally accepted idea (particularly among library people) of an annual appropriation equivalent to \$1 per capita of population served would be about right. It might be too large for a big city like London and too small for a city like Podunk, but in any case such an appropriation, put to library uses, would be money well invested.

In any event, it is up to the library trustees to secure as good an appropriation as possible whether this amount is fixed by statute, by some legislative body or by an executive. A harmonious, competent and willing library staff is the best and strongest argument a trustee can have to secure an appropriation adequate for an honest program of usefulness in the community.

"A Librarian's Vices and Devices" was the subject of a paper by Rebecca D. Kiner, librarian at Hiawatha, Kan. Miss Kiner is one of the pioneers of the profession, having been appointed librarian of this library forty-two years ago and being connected with it ever since, either as librarian or a member of the board. She suggested a number of ways in which the librarian could get free help and make her library a real force in the community. She especially recommended that each librarian seize the opportunity of acquiring an endowment fund for the library by bequests and thru provisions in wills. Her library has already made a start towards such an endowment, several thousand dollars having been collected. Hiawatha is a town of 3,000 population, with an income of \$2,700.

"How We Reach the Community—Summary, Methods and Result" was then discussed. Ward Edwards, president of the Missouri Library Commission, reported for his State. Letters from librarians in the State, received in answer to a questionnaire, led him to the conclusion that librarians considered newspapers the most effective and most universally used means of publicity. Other methods mentioned were exhibits inside and outside the library, floats in parades, open house, signs on library trucks and mailing lists of citizens arranged under subjects of their hobbies.

Ida Day, librarian of the Hutchinson (Kan.) Public Library, spoke especially of a home library installed in a model home during "Better Home Week." She also spoke of co-operation with the local Ad Club. The Vice-president of the Library Board and the Librarian addressed the Ad Club and books of interest to the members were taken to the meeting place and applications were received and books charged. This was supplemented with follow-up letters giving fuller information about the library resources for business men. Nothing done in Hutchinson had brought more appreciation, nor had any-

thing been more of a surprise than that the library could render such help.

Miss Williams, reporting for Nebraska, distributed mimeographed sheets of publicity methods used.

We emphasize the personality of the librarian. We believe her willing service is made effectual by business methods, by fulfilling the law of demand and supply, by outside contact with the community and thru the press. We advocate a board of trustees who will help to sell the library idea to the public by a business-like administration, leavened with a measure of zeal. We believe that these not unreasonable requirements should be supplemented by sufficient support, which will come when our belief in ourselves is transfused into the public mind by the way of the town council. . . . To me it seems like this. Here is the house that Mr. Phil Anthropy built. This is the librarian who inspires the board that harries the council that levies the tax that frenzies the farmer who sells the grain that brings the money that buys the books that reach the community that seeks the house that Mr. Phil Anthropy built.

THE LIBRARY THE MISSING LINK

At the Tuesday evening conference, presided over by Edith Tobitt of Omaha, Milton J. Ferguson of the California State Library gave an address on "The Library, the Missing Link." He showed concretely in the development of county libraries in California what had been so well brought out in Dr. Bostwick's address, namely, the necessity of "cutting across lots despite the traditional sign warnings against crossing the grass." A few extracts from the paper will illustrate this.

May I in particularizing on our efforts to solve the library problem be permitted to mention the accomplishments of a figure no longer active in the work except by tradition. I refer, of course, to my old chief who laid down the burden—no, not burden, the joy of service—five years ago. He was not a librarian, in one sense; he knew little or nothing about paste, pure rag catalog cards, and delinquent borrowers' fines. But in another sense, he was a librarian so big that we have not yet been able to measure his stature. As a business man, who found himself in the work of bringing people and books together, he made no pretense to originality. His greatest fame rests upon his ability to cut across lots despite the traditional signs warning against crossing the grass. Naturally, he had little patience with efforts to run the library economically—that is, on next to nothing. His belief that a thing worth having is worth paying for is still pretty sound philosophy. And above all he recognized as a fact the necessity of placing books within easy reach of every child, every dweller in the state and nation.

Our plan of campaign, then, was simplicity itself. It might not suit your needs, it is true; and I shall therefore not burden you with its details. It is enough to say that fundamentally our unit of service was broadened to cover the county; that funds are raised by county tax; and that adequate means are taken to insure the services of professionally trained and experienced librarians in executive positions. As a unifying influence, keeping the various libraries in touch with each other, supplying their unusual needs in books and advice we have the State Library, in which

is concentrated all the state's interest in this branch of its educational service.

Eleven years ago the real beginning was made. Progress at first was slow. Even today it has not kept pace with our imagination. Then the task was the organization of fifty-seven possible units. Today forty-two of those units are operating with a degree of success permitting us to hope that in time our dream will come true. How nearly our goal has been reached may be determined from the fact that the remaining fifteen counties had in 1920 a population of only 183,099 out of 3,426,536 in the state. The 1921-1922 income amounted to \$1,098,211; the book stocks were in excess of 2,140,940 volumes; branches totaled about 3,889. In these forty-two counties there are about 2,920 elementary and high school districts, of which number about 2,193 have established voluntary service relationship with the county libraries. I especially want you to bear in mind that these figures do not include cities having their own library systems. Furthermore, we hold that there is no particular virtue in the county plan that is denied the city. Some of the traditions of the latter are perhaps hard to down. The question is whether the area, population and assessment roll are sufficient to produce funds and machinery necessary to success.

In the northern part of the state more than a mile high in the heart of the Salmon mountains the adventurous traveler will find a county library sign nailed to a giant of the forest. Near this emblem of the outside world is a TNT powder box securely fastened to a tree trunk, high enough to be out of reach of wild animals and safely covered with the top of an old stove to frustrate the curiosity of chipmunk and squirrel. In it forest rangers, ranchers driving their herds into the mountains for summer feeding, wandering prospectors will find a store of books wherewith to refresh old memories and to learn new facts and new fancies. This box once contained material of the highest explosive quality, capable in war of snuffing out the lives of men and of leveling proud edifices, and in peace of carving roadways around the perilous cliffs of towering mountains. I venture to assert, however, that its original content, powerful as it was, can never equal the blasting force of those modest volumes which now make the box their biding place. The powder at the touch of the electric button did its work, in an instant, and was done; the book may move and energize the mind, the soul, not once, but again and again, working its will generation after generation. It is the true high explosive."

Many took part in the general discussion on county libraries following. Mr. Kerr brought up the question of a public library providing library service without pay to residents in the county. He thought this was a good way to arouse interest if the county residents were made to understand clearly that it was only a temporary arrangement and would be discontinued. Mr. M. Ferguson, however, was of the opinion that to provide such free service was a decided mistake—that the county residents would become accustomed to free service and would be less inclined to vote for a county library on that account. Malcolm G. Wyer spoke of a survey which had recently been made in Nebraska on library conditions and books and reading in the country, carried out by the State Agricultural Experiment Station. It showed, of course, a

general lack of reading matter in farm homes. Mr. Ferguson said that California was convinced that the proper procedure in a county library campaign was for all towns having public libraries to be excluded from voting on the proposition. If after the county library was established a community on its own initiative desired to come in, well and good. California had started with the idea that the towns with public libraries should come into the system unless they objected, but they had found by experience that this did not work out. Mrs. J. R. Dale of the Oklahoma Library Commission asked whether Mr. Ferguson thought that the county library should be located in the county seat. Mr. Ferguson thought that headquarters should be at the county seat, but not necessarily the largest library. Mrs. Dale said that county seats changed so frequently in Oklahoma that it made it difficult. Forrest Spaulding suggested that it might be well to locate the headquarters of the county library in a book-wagon and thus it would be easy to make a transfer when county seats were changed. Following this meeting a reception by the Staff and Board of Directors of the St. Joseph Public Library was held in the Japanese Tea Room of the Robidoux Hotel.

THE LIBRARY OF THE FUTURE

Mr. Wyer, a vice-president of the A. L. A., presided at the Wednesday morning conference. In presenting A. L. A. President Utley, Mr. Wyer made a few remarks concerning the development of the relationship between state library associations and the A. L. A., noting various changes in the A. L. A. Constitution in this regard. This being the first Regional Conference of the A. L. A., Mr. Wyer suggested that it might illustrate the advantages of holding a general conference of the A. L. A. once in two years and of regional conferences like this one on the other year. Mr. Utley, representing the A. L. A. officially at this Regional Meeting, spoke on "The Library of the Future." He said that he was no H. G. Wells and that his talk would not be a comprehensive attempt to predict the future of library development, but there were a few spots worthy of consideration which he would like to bring out. He then contrasted conditions in the United States at the end of the Civil and World wars. Some think that the next period in library history will be one of serious retrenchment. He did not believe such would be the case. Of course we want libraries to be properly economical in their administration. We want to get two dollars value for two dollars' work, but we should not try to get along with one dollar where we formerly had two. He did not believe that library work was going to be affected

seriously by the present stringency and the cry for lower taxes.

Mr. Utley spoke of the splendid special collections being built up in libraries in the United States. He did not think these were being used as they should be. He hoped there would be a time when institutions of learning would send graduate-students, one at a time, to such libraries to do research work. He called special attention to the collection of English literature and Americana in the Henry E. Huntington Library; the collection on European Linguistics in the Newberry Library; the collection on Americana before 1800 in the John Carter Brown Library. He believed that more use should be made of the photostat in getting copies of valuable material in European libraries for American libraries. He suggested a union catalog of such photostatic material—this catalog probably to be maintained in the Library of Congress.

Referring to the question of popular fiction of ephemeral interest Mr. Utley said in his opinion libraries will in years to come concern themselves more with books of permanent worth and interest—books of reference and educational value which appeal to the trades, professions and business fields, as well as the arts and various branches of literature. To-day we need a thousand copies of a popular novel to fill the demand. Tomorrow the same books remain on the shelves uncalled for. There should be other places than the public library where such books may be obtained. The reading public will come to realize this and public libraries will become treasure houses of books which endure.

The last question Mr. Utley raised was what part the A. L. A. would play in the library of the future. He thought that it would play a large part as it has in the past, especially in promoting the professional solidarity of librarians. Twenty years ago the A. L. A. had about eighteen hundred members; now it has over six thousand. He spoke of the fact that already plans are being made for the fiftieth anniversary of the birth of the American Library Association, and committees would soon be appointed for carrying out this celebration in 1926. One of the things which he hoped for the A. L. A. was that it might have a permanent building for its headquarters; other associations were rapidly acquiring buildings for headquarters and such a building would give prestige to the profession and aid library development.

Wednesday afternoon was devoted to group conferences and Thursday morning to round tables. Librarians of cities of 300—3000 population, presided over by Nellie Williams, discussed: Budget system for libraries; how to pres-

ent library needs to the city council; how to interest the commercial club in the library (one suggestion was to ask the commercial club to make suggestions of books to be purchased); Should the librarian attend board meetings? Librarians from cities of 3,000—10,000 population were presided over by Miss Mary C. McQuaid, librarian of Fairbury, Neb., and Grace D. Rose, of Des Moines, presided at the round table of librarians from cities of 10,000—up. One of the topics which aroused the discussion at this meeting was the question of having members of a library staff make out efficiency records for themselves. Another topic of interest was the plan recently adopted by the Grand Rapids Public Library of allowing assistants three to four months time on pay to take special studies or for travel; one per cent of the salary budget being allowed for this purpose. (See L. J. for September 1, p. 714.)

The sentiment of all those who attended the first regional conference of the American Library Association seems to be that it was a success in every respect. This would seem to indicate that such Regional Meetings of the A. L. A. could with great profit be held at intervals in other parts of the country.

CHARLES H. COMPTON, *Secretary.*

MASSACHUSETTS LIBRARY CLUB

A JOINT meeting of the Massachusetts Library Club, Western Massachusetts Library Club and the New England School Library Association was held at Greenfield, October 19 to 21. Headquarters were at the Weldon Hotel. The first evening session was conducted by the Massachusetts Library Club under the chairmanship of President Harold T. Dougherty. A greeting was extended by Edgar P. Smith, Chairman of the Board of Trustees of the Greenfield Public Library.

Professor Raymond G. Gettell, of the Department of Political Science in Amherst College, spoke on the topic "The United States in World Politics." In summarizing the effects of the newer aspects of the foreign policy, Professor Gettell found that there is a growth of the centralizing power of the United States as against the states, an increasing power of the President and governmental gains of power at the expense of the individual.

On the next morning a round table discussion on library problems was conducted by E. Louise Jones who outlined library conditions in some of the towns in Franklin county. In response to the question as to how many libraries keep their children's room open until the regular closing time it was found that the majority do not observe the full time schedule.

In speaking on state documents and those desirable to preserve, Edward H. Redstone, state librarian, emphasized the importance of keeping the General and Special statutes, and Acts and Resolves. The large libraries should keep the various editions of the statutes; the small ones need not. Harold A. Wooster outlined the plan followed in the Westfield Athenaeum for the filing of mounted pictures. A case made of a large number of units on the pigeon hole system, provides for over 100,000 pictures. The cost of the case was \$30.

In response to an inquiry it was found that no library releases for general circulation books already reserved for a group of readers. The question was asked as to whether the establishment of junior high schools makes any difference as to the age when children should use the adult department. Should an age limit be set? The consensus of opinion favored placing books for ninth grade reading lists in the Children's Room, thereby bringing reading forward one year. Holyoke has done this at considerable expense. Somerville requires children to have a permission slip in order to use the adult department. Titles on reading lists are duplicated and made seven-day books.

The Friday afternoon session was in charge of the Western Massachusetts Library Club under the chairmanship of President Harold A. Wooster. Burges Johnson, associate professor of English at Vassar, spoke on "A Layman's Idea of a Librarian." Professor Johnson had in mind especially the ideal librarian. He wanted to see not an automaton but an active person. Provincialism is a mental attribute which the librarian must not have. The librarian must have three dominant loyalties, to himself, to his work and to his community. There should be an intense desire to progress in one's chosen field. This may even be described as ambition if a real advance is achieved. It is not so necessary to have a belief in the library you have as to have a dream of a better one.

An original Book Pageant written by M. Grace Fickett, teacher of English in the Westfield Normal School was presented in the evening. The costumes were full length replicas of the backs of some much used reference books. The books were represented as speaking to people, inviting them to use the volumes and admonishing readers for ill usage. The books with speaking parts were Webster's Dictionary, New International Cyclopedia, *Who's Who*, Warner's Library, Larned's History for Ready Reference, Stedman's Library of American Literature, Bartlett's Familiar Quotations and the World Almanac.

Several of the Club members made pleasant excursions to Deerfield and Northfield.

Z. Marshall Crane, trustee of the Public Library in Dalton, spoke on "The Near East."

A report of the personal Aid Committee submitted by Katharine P. Loring and read by E. Louise Jones reviewed the help already extended thru gifts and loans from the fund in the care of the Committee. President Dougherty announced that the Club scholarship had been awarded to Gertrude L. Harrington, a student at Simmons College, in the class of 1923. The winter meeting of the Club will be held at Providence on January 25 and 26. E. H. Furst made a report on the purpose of the New England School Library Association to develop library work in the schools.

The last session on Saturday forenoon was in charge of the New England School Library Association. The program included remarks by Clarence D. Kingsley, supervisor of Secondary Education in Massachusetts, who spoke on "Planning a High School Library," and an account, by Mabel C. Bragg, assistant superintendent of Schools in Newton, of "Story Telling in Schools."

FRANK H. WHITMORE, *Recorder*.

VERMONT LIBRARY ASSOCIATION

MEEETING at Brattleboro in conference from October 25 to 27, the Vermont Library Association and the Free Public Library Commission heard discussions of work with schools, the desirability of municipal reference bureaus for Vermont towns, and methods for obtaining and arranging free pamphlet material.

Talks were given at the opening session by Florence Wellman, superintendent of the local schools, on "What the Library Can Do for the Schools," and by Alice Blanchard of Montpelier on library work with schools in California, particularly in Los Angeles. Kate W. Barney of the Forest Park Branch of the Springfield (Mass.) Public Library considered the obtaining of free material and use of vertical files. A sight seeing trip into Massachusetts and New Hampshire, arranged by the business men of Brattleboro, occupied the early hours of the afternoon. Members of the Chamber of Commerce also were the hosts at the "get-together" supper arranged for the visitors the previous evening at All Souls parish house.

Town government in the United States is a failure as compared with that in England and Canada said K. R. B. Flint, professor of political science at Norwich University, Northfield, for the reason that the people in many of our towns are either ignorant or indifferent so far as matters of local government are concerned. Education is needed, and municipal reference bureaus will supply it. Co-operation with schools is desirable to render children familiar

with local affairs, so that as adults they can deal with them intelligently. About twelve Vermont towns are now planning to start such bureaus. The State reference bureau at Norwich University has worked out exceptionally well.

An informal discussion of books followed Prof. Flint's talk, members bringing forward books which had enjoyed popularity in the previous year. In the evening readings of modern poetry were given by Leo Leonard Twinem, formerly of the department of public speaking of the University of Vermont. The attendance was composed of about 150 auditors.

The increasing popularity of the State book wagon was the theme of the talk by Helen M. Richards of the traveling library department at the final session. Lucy D. Cheney, librarian of the public library at Rutland, spoke on Vermont fiction, taking up novels with settings in Vermont or in which Vermont was mentioned, as well as writers who had lived in the State. Charles Tuttle of the Rutland publishing firm of that name talked informally on valuable source material in Vermont libraries, ending with some of his own experiences in obtaining rare items. Gaylord Brothers, the Library Bureau and the H. R. Hunting Company exhibited library supplies and new and re sewn books.

The executive committee is to decide whether the next meeting is to be held at Vergennes or jointly with the New York Library Association at Lake George. Elizabeth McCarthy of Springfield and Florence H. Moses of Bennington were re-elected president and vice-president, respectively, and Iva M. Young was chosen for the post of secretary-treasurer.

NEW YORK LIBRARY CLUB

A SYMPOSIUM for the discussion and analysis of weekly news periodicals constituted the program of the first fall meeting of the New York Library Club held October 19 at the Central Branch of the Y. W. C. A. The attendance more than filled the auditorium. President Theresa Hitchler presided.

Margaret Jackson, librarian of the Hempstead (L. I.) Public Library and instructor in the Library School of the New York Public Library sketched in brief the history, policy, and personnel of several periodicals. Questions concerning the list of periodicals distributed to the members were answered by Caroline Ulrich, Alice Appo and George Bergquist of the New York Public Library.

Carl Van Doren, literary editor of the *Century Magazine* and the speaker of the afternoon, confined his remarks largely to the liberal week-

lies. He attributed their increased circulation during the war to the belief of their readers that they were printing news which newspapers were not willing or did not dare to print. The bolder tone adopted by the newspapers since peace returned has made inroads into this class of readers with a consequent curtailment of the subscription list of the weeklies. He spoke of the advantage enjoyed by British weeklies in being able to editorialize soon after the event and to get their issues into the hands of their readers in a much more restricted territory than is the case in the United States. Here the weeklies must date their issues sufficiently in advance to give an appearance at least of timeliness when they reach the newsstands of the Middle West and of California. Another advantage of the British weekly, he said, is that it is possible to maintain a very small permanent staff and instead to solicit contributions from various authorities on the subjects on which they are asked to write. This is the policy of Massingham of the *Nation and Athenaeum*.

NEW YORK SPECIAL LIBRARIES ASSOCIATION

THE first meeting of the year, a dinner meeting, was held on Wednesday, October 25, 1922, at the Fairfax Tea Room, 80 Nassau Street, New York City. About 150 were present. Dorsey W. Hyde, formerly president of the National S. L. A. and D. N. Handy, of the Boston S. L. A. spoke very generally on the Detroit Conference. Mr. Hyde described how past conferences had been planned, with what objects in view, and the splendid results he thought had been accomplished therefrom. He also talked briefly on the progress that has been made in Washington, in bringing before the general public the value and importance of special libraries. Publicity, according to Mr. Hyde, should be more and more used to help further the work and emphasize the importance of all phases of library work. Helen E. Hemphill, Isabella Brokaw and Alma C. Mitchell described briefly the meetings they attended at the Conference, and Marguerite Burnett, librarian of the Federal Reserve Bank of New York, gave an interesting account of the luncheon given by the First National Bank of Detroit to the bank librarians. Rebecca B. Rankin, president of the National S. L. A. spoke of her plans for the coming year. She hopes, by putting thru several schemes now in process of formation, a closer affiliation may prevail between the National S. L. A. and the various local special libraries associations throught the country.

MARGARET C. WELLS, *Secretary*.

A "GET-IT-DONE MEETING" of the D. C. L. A.

A "GET-It-Done Meeting" of the D. C. L. A., held October 20th at the Grace Dodge Hotel, inaugurated the winter meetings of the District of Columbia Library Association. The object of the meeting was to stress the need for effective action in carrying out the program of work which had been adopted by the members of the Association. More than one hundred Washington librarians were present and heard interesting addresses by Miss Rebecca B. Rankin, President of the national Special Libraries Association, and Dr. Frank W. Ballou, Superintendent of Washington Public Schools, who were introduced by Mr. Dorsey W. Hyde, Jr., President of the District Association.

Miss Rankin discussed the need for teamwork among librarians to the end that library service may be "sold" to the public. "The American library as a service-giving institution has set an admirable standard of performance," she said, "but this service has not been fully exploited or utilized. With the birth of a new conception of co-operation and professional unity, library service today bids fair to attain a position of even greater importance and prestige in the community." "If Washington is to be called the nation's research and information center," Miss Rankin said, "then Washington librarians should receive much of the credit for this appellation."

Dr. Ballou explained the present policy in Washington of establishing branches of the public library in the public schools to the end that the facilities of the public library be made more generally available for school children and also for the adult population in different parts of the city. Dr. Ballou said: "Only by actual contact with books on science, art and literature, as made available in school and public libraries, can the public school student gain a vital appreciation of the subjects that he studies. The public schools of Washington have not been slow to participate in the movement to extend library facilities to their pupils. We have now a series of high school libraries which rank with those of any other city in the country, and provision is being made for the further extension of such facilities."

A short business meeting followed. Secretary Mary F. Carpenter read a communication from the A. L. A. transmitting two resolutions—on school libraries and library revenues—which were held over until the next meeting for action. Copies of the Association's new news bulletin, *D. C. L. A. Doings*, were then exhibited to the members and it was voted that the publication be approved and that it be published henceforth as the organ of the Association.

A unique aspect of this meeting of the Asso-

ciation was the interest displayed by Washington newspapers. Two papers ran advance notices of the meeting; four printed stories on the day after the meeting and one paper commented editorially on it in its Sunday issue. Altogether Washington newspapers devoted 34 column-inches of space to the "Get-It-Done Meeting."

PENNSYLVANIA LIBRARY ASSOCIATION

ON October 24th Anna A. McDonald, president, opened the twenty-second annual meeting of the Keystone State Library Association, this year held in Altoona at the Penn-Alto Hotel. One hundred and thirty-two registered at this meeting and an unusually large number were present at the opening session. The president spoke of the increased incomes for libraries in the State, growth of favorable public sentiment and the near dawn of the county library movement in Pennsylvania.

Dr. George P. Donehoo, Pennsylvania state librarian, emphasized this note of optimism. He spoke of the critical age of transition in which we are now living, in which we have drifted away from ancient tradition. In this transition period of danger to our democracy the value of the library as an educational institution and a force in nation and state was well brought out.

The first business session opened Wednesday morning, when Miss Rockwell, chairman of the membership committee, read the committee's report. The membership in October was 438, nearly double the membership of the previous year. There are 313 individual members, 74 libraries and 51 trustees. In Port Marion, Ellwood City and Hazleton every member of staff and all the trustees are members of the association.

The proposed amendments to the constitution of the Keystone State Library Association were then acted upon. One amendment changes the name of the association from Keystone State Library Association to Pennsylvania Library Association. Another provides that groups of members, such as trustees and directors of libraries, and librarians of and persons engaged professionally in school, college, university and special libraries may form themselves into "departments" or "sections" of the Association, such departments or sections to elect their own officers and arrange for and conduct their own meetings in conjunction with the regular meetings of the Association. They shall also undertake such special work as they deem wise to advance the interests of the libraries represented by their several groups, subject to the approval of the executive committee of the Association. Only such members of the Association as are professionally engaged in libraries of the type

represented by any department or section shall be eligible to membership in such department or section or entitled to a vote at its meetings.

The Committee on Affiliation with the A. L. A. reported against affiliation at this time. The committee is, however, by no means opposed to affiliation provided it can be done under conditions satisfactory to both organizations, and was continued at its own request with instructions to take up the matter with the A. L. A. with a view to obtaining the elimination or modification of certain unsatisfactory provisions in the By-Laws of the A. L. A. Constitution. Assistant Secretary Sarah C. N. Bogle felt sure that a committee with such an object could do much to help the A. L. A. to bring about a workable constitution.

At the second business session a committee was appointed to report at the next meeting a plan for State certification. The program was devoted to the need of a definite income for libraries and methods for obtaining it. After Miss Sherman's brief but pithy paper, Miss Crandle of DuBois, Miss Krouse of the Scottvale Public Library, Miss Sterling of New Castle, and Mrs. Charles of Ellwood City narrated the struggles of each of these libraries to obtain an adequate income. When the cities had put library taxation to the vote of the people the outcome had been unanimously successful.

An effort was made to get the special libraries to form a section. There were not enough present, as the constitution requires ten members for forming any new section; but it was decided to hold a round-table and appoint Adeline Macrum, librarian of the Tuberculosis League Pittsburgh, as leader for the coming year. There is a growing number of scattered special libraries thruout the State. Philadelphia has its council and Pittsburgh is forming one, and it is hoped that a connecting link between these councils to include the isolated special librarian may be formed.

Anne Wallace Howland, director of the Drexel Institute School of Library Science, the first speaker on the Wednesday morning program, told of hopes and plans for the "new-old library school." She gave just a word to the old school, which needs no introduction, and to the professional standing of many of its graduates which is unquestioned. She then briefly outlined the plans for the new school, taking in turn each requirement for professional standing and the aims of the school not only to meet these but to "go them one better."

Sarah C. N. Bogle spoke of the need for picked people in school work, best equipped libraries and co-operation between school and

library. She took up the various methods of co-operation as worked out in Illinois, Wisconsin, Minnesota, Pennsylvania and Oregon. While all these organizations differ, fortunately all feel the inter-dependence of school and library, and all are agreed that every student from the elementary school should learn to use and appreciate books and libraries. The A. L. A. therefore recommends as a minimum standard that there be at least one full time school librarian for an enrollment of one thousand elementary and high school pupils. "We are living in an age of demonstration, in the midst of project methods," Miss Bogle stated, and she mentioned Schenley High School Library, Pittsburgh, and the splendid Cleveland School Libraries, which are fast demonstrating the need for more.

During discussion Miss Root told of their plan for rural delivery in Huntington County, and Miss True of the pride of the citizens of Erie in the Library "Ford-Arrow" truck. Miss Steele of Bradford reported a novel way of raising money for books by means of a memorial fund. Over a hundred dollars was given during the past year by school children in memory of two loved teachers. Mr. Carol spoke in behalf of the Universal Publishing Syndicate and their efforts to work out standards for library book binding. Of the 2,400,000 volumes of text books rebound last year, eight per cent were library books.

Mrs. Elsie Singmaster Lewars read two of her Pennsylvania stories, "A Great Day," a story of Gettysburg, and the humorous Millerstown story of "The Man Who Was Nice and Common," at a banquet in the evening. A paper on the "Public Library, a Community Necessity" was read by Dr. John M. Thomas, president of Pennsylvania State College.

In an enthusiastic paper Lieutenant David Perry of Altoona told that evening what the books and libraries had meant to the men in war service. A paper prepared by Colonel Henry W. Shoemaker on "The Importance of Compiling Indian Stories and Traditions" emphasized the importance of collecting this material while yet there is time to get it by word of mouth. Dr. W. O. Allen of Lafayette College discussed "What Publicity Really Means." He said that there was only one measure of a modern public library—the quality and quantity of the circulation. Librarians have ceased to be custodians of books, and have become book agents.

The business meeting on Friday morning was immediately followed by a joint session of children's and school librarians, presided over by Nina C. Brotherton, principal of the Carnegie

Library School, Pittsburgh, and Frances H. Kelly, head of department of work with schools. Marion K. Wallace visualized the modern children's room in her paper, "The Children's Corner." Cornelia E. Stroh told of the best of all hours in the children's room—the story hour. "Story-Telling by Wireless," by Eugenia Brunot, was a live subject handled in a live way, and "Library Day in the Schools" an able paper by Miss Boli of Pittsburgh contained many helpful suggestions. Notable among the papers of the convention was Elva S. Smith's valuable contribution on some noteworthy recent books for children, which may be used to supplement the traditional tales and the classics and standard literature which should form the nucleus of every library collection for children.

ILLINOIS LIBRARY ASSOCIATION

MANY factors tended toward making the twenty-sixth annual session of the Illinois Library Association, held at the Chicago Beach Hotel, October 19 to 21, a meeting of unusual excellence. The Chicago Library Club and Chicago libraries were ideal hosts; the President and other A. L. A. officers were present, the weather was ideal; and this is an anniversary year in Chicago, a cause for congratulation.

Mary E. Ahern gave the story of "Fifty Years of Progress." The passage of a law providing for tax-supported libraries in Illinois was largely due to the late E. S. Willcox, so long librarian of Peoria, who drafted the law. Chicago joined forces in urging the passage of the bill which became a law March 7, 1872. Chicago and Rockford were the first cities to take advantage of the library law; other towns followed slowly. The second milestone was 1893, when a wonderful exhibition of material in library service was shown at the World's Fair. Formal library training began in 1894, when a library school was opened at Armour Institute, under the leadership of Katherine L. Sharp. In 1897, the school was moved to the University of Illinois at Urbana, where later it became a regular part of the University course. Library extension work began thru the Farmers' Institutes, which sent out traveling libraries. The Illinois Library Association was founded in 1896. *Public Libraries* was also founded in 1896 and in its second year became the official organ of the I. L. A. Two endowed libraries in Illinois worthy of special mention are the Newberry Library and the John Crerar Library in Chicago. Illinois was among the first in the development of libraries in business organizations.

Librarian Carl B. Roden then spoke on the double anniversary of the Chicago Public Library, which within the year celebrates the fiftieth year of its life and the twenty-fifth of

residence in its present building. Mr. Roden told the story of the founding of the library after the great fire of 1871 (See *LIBRARY JOURNAL for December 15, 1921*), sketched briefly the development, dwelling chiefly upon the solid foundation laid by Frederick Poole, librarian from 1873 to 1887; and the great expansion under his own predecessor, Henry E. Legler, librarian from 1909 to 1917. Today the system has an appropriation of \$1,250,000, and employs 644 people in circulating its 800,000 volumes to 2000 schools and thru 200 different branches or deposit stations.

Anna May Price, secretary of the Library Extension Division, in a backward glance over the eight years of its existence reported seventy-eight new free public libraries established; better and more useful libraries; less useless red tape; better district conferences; better salaries; an increase in the library tax rate; and the passage of a county library law. An increased appropriation for the Commission had resulted in the purchase of many new books, and the addition of a field worker to the staff. Many new buildings have been erected and bond issues have been and are being issued for buildings to be erected in the near future.

George B. Utley, president of the A. L. A., was to speak on "A Near Anniversary," the fiftieth anniversary of the A. L. A., which comes in 1926, but lack of time confined his talk to a few words of welcome, and an invitation to the Association to visit the Newberry Library, where a very interesting collection of early illustrated manuscripts was on exhibition.

THE SCHOOL LIBRARY

The President explained that as Illinois is behind her sister states in the matter of school libraries it had seemed needful to devote one of the general sessions to a discussion of that subject. E. G. Edwards, superintendent of schools at Marshall, said that the immediate problem is with school officials. A library consciousness must be aroused. Some time ago, a survey of Illinois high school libraries showed that high schools enrolling from 880 to 2600 pupils received an appropriation of from 10 to 28 cents per pupil. Each school had a librarian, all but 50 per cent of whom had had some professional training; books were carefully and systematically selected. High schools enrolling from 880 to 240 pupils were supplied with libraries. Appropriations ranged from 35 to 58 cents per pupil; sixty-five per cent had librarians, very few of whom had any professional training. Selection of books was in the hands of teachers and principals. In high schools with an enrollment of 110 to 240 pupils, about two-thirds of the number made an appropriation for

books of from 31 to 79 cents per pupil; only about half of the libraries had a librarian, and chaotic conditions prevailed in the method of selecting books. In the high schools enrolling 110 pupils fewer, only about one-half made a library appropriation ranging from 61 cents to \$1.14 per pupil; there was no systematic method of selecting books, and no librarian with training, yet numerically three-fourths of all the high schools of the state are in this class.

There should be, as in many other states, a standard list, prepared by an authority recognized by the state department of education, from which selections are to be made. Suggestions as to a minimum number of volumes was 1000 volumes for a school of 300 or fewer, for high schools larger, 2000 with an increase of 3 books each for each pupil over 300. As to appropriations: for schools of 100 or less, \$1 per pupil; from 100 to 250, 50 cents per pupil; from 250 to 1000, 30 cents; and for schools of 1000 pupils or over 20 cents per pupil. A standard acceptable to the A. L. A. should be adopted for high school librarians, possibly eight weeks' training in a library school, or one year's experience in a well-organized library of recognized standing. Educational requirements should be the same as those of a high school teacher in a North Central High School. There should be a library course, either as part of the English course, or a separate course, in which pupils are taught the use of books.

"The Minnesota Plan" was described by Harriet A. Wood, supervisor of School Libraries, St. Paul. Minnesota has a rural population. There are twelve counties in the state where there are no libraries, but all of the people understand the schools. State grants have been made for schools, and are now being made thru the department of education for libraries. At present any rural school that expends \$40 for books, receives at the end of the year a rebate of \$20; a two room building or one that is larger, which spends \$80 receives at the end of the year \$40. In case that the amount is smaller the same per cent is returned. All books are selected from a list prepared by the State. The plan in Minnesota has been carried on entirely out of politics. The Commissioner of Education serves for a longer period than any Governor. The Board of Education is thoroly acquainted with educational policies and school requirements. An institute is offered to each county for one week in each year, in which a teacher may be trained in the use and administration of the library. Interest is chiefly in the elementary schools; the high schools have their libraries. Martha Wilson reported on the work done by the Committee appointed at the request of the A. L. A. to in-

vestigate the work of school libraries in Illinois. The policy adopted asks for the appointment of a supervisor of school libraries who shall have had library training and experience; to be appointed by the superintendent of Public Instruction and to be a member of his department.

SECTION MEETINGS

Tuesday afternoon was given over to section meetings. For the Public Libraries section Harriet Turner considered "The Librarian With a Duster." Such a vision did not especially appeal to Miss Turner, who felt that while dusters should be kept in the background, nevertheless a librarian must "play many parts," even that of janitor. The most serious problem is dust, most of which is tracked in from the street. Keeping approaches well swept and scrubbed and providing rubber matting for the length of half a dozen steps inside the door was advised, as dust adheres most readily to it. From properly oiled or varnished floors practically no dust will fly. Vacuum cleaners may be rented if not purchased. A study of the library supply catalogs of the Library Bureau, Gaylord Brothers, Democrat Printing Company, the *Stationery Herald* of the Marshall Jackson Company and the catalog of the Harder Stores of Chicago will suggest many helps to system and order, as will "Personal Efficiency in Business," published by the A. W. Shaw Company, of Chicago.

Tile was recommended for halls and places where noise need not be considered, in Miss Forestahl's talk on floor coverings. For rooms where quiet is necessary linoleum may be bought at prices ranging from \$1.15 to \$1.80 per yard; battleship linoleum, a heavier material than linoleum, at \$1.80 to \$2.50 per yard; cork carpet which is more elastic and more like a carpet, for \$1.30 to \$2.10 per yard. Linotile is similar to battleship, but is obtainable in smaller sheets. All material is obtainable in several different colors.

The majority of Illinois libraries shorten hours in summer, said Florence D. Love, and usually in July and August, altho in some instances service is cut down in June and occasionally continued thru September. Eight o'clock is a common closing hour. Some libraries in towns where stores and offices have a half-holiday have closed the same afternoons. Diverse opinions on the subject exist among librarians. No regular rule can be laid down, but if a lessening of hours results in loss of patronage, it seems a poor policy.

The service of the Art Institute to libraries of the State was presented by Lydia E. Kohn. The Art Institute and the Ryerson Library loan

photographs and lantern slides, free for educational purposes in Chicago and Cook County. There are in the collection 30,000 slides, 20,000 photographs, 20,000 post cards and 3,000 prints, children's classics told in slides, manuscript lectures on architecture painting and sculpture illustrated. These are used by women's clubs all over the United States. A weekly letter is issued on art in general and concerning the exhibits in the Institute. Nellie Bredehoft described the art collection of the State Library.

"Creating an Interest in Non-Fiction" was another topic fully developed. Mrs. Lucy Fitch Perkins talked on "Citizenship and Americanism." The object of her own writings she said, is to increase friendliness and respect for all peoples, working thru the children.

At the Trustees' Section, at which M. F. Gallagher, president of the Evanston Library Board, presided, H. G. Wilson, secretary of the Chicago Library Board spoke on library revenue as the one thing for which library boards are held chiefly and exclusively responsible. Complaint about high taxes is general, altho taxes in Illinois are lower than in her sister States, and much lower than in the East. Illinois' present minimum library tax rate, passed in 1921, is subject to change in three years, and another campaign of education will be necessary. A report on Warren County Library, whose success owes much to L. E. Robinson of Monmouth, showed twelve libraries established in the county, each presided over by a local librarian, and a county appropriation of \$16,000.

Two topics that called forth considerable discussion were certification and pensions. Phineas L. Windsor spoke in favor of certification as a means of raising the standard of librarianship, an aid to trustees who have to consider applicants and as an official roster, providing a pension law was passed. It was understood that certification would be considered in reference to incoming librarians and not carried out in very small communities. Miss Ahern felt that certification is not needed. Pensions were objected to as smacking of paternalism and advocated upon the theory (as well as fact) that the great majority of librarians are unmarried women who have no one to look to for support after the years of active usefulness have closed.

Carl H. Milam made an address on "Function of Libraries in Directing Reading in the Community," asking more generous support of public libraries as the most important educational institutions in America for those who have left the classroom. The section endorsed the A. L. A.'s recommendation for an appropriation of one dollar per capita for library purposes.

Carl B. Roden read a paper on the library as a censor of books. (See LIBRARY JOURNAL for October 15, p. 857.)

The School Section was presided over by Clara J. Hadley. Ruth Sankee traced "The Evolution of a School Library." Mildred Warren, high school librarian, Mt. Vernon, in discussing the librarian's contribution to educational standards, recommended following the example of Newark (N. J.) in developing the pupil's interest in the government of his own locality. Vocational guidance and courses in the choice and use of books are also desirable. Margaret Davenport of Freeport considered "High School Libraries and School Societies." Clara Sullivan thought the school library "a reinforcement of the school." It is a meeting place for all students, opens up new avenues of interest and is a quiet place for reading and study. Caroline Mott of Pullman advised against investing too heavily in duplicate copies, as her experience had been that a change of faculty or a change of subject often led to but slight use of the books purchased.

May E. Jordan of St. Charles spoke on desirable features of encyclopedias for school use, giving the preference to the New International encyclopedia as the most evenly balanced and best for a school able to afford but one. She warned against the mistake of relying on an encyclopedia to the exclusion of other material.

It means much to a high school library to have a well-stocked general library near at hand, and students are urged to "join the library" at once, said Rachel Baldwin of Highland Park. Libraries are notified of any especially heavy reference work that may be expected, and are asked to supply only one copy, to be held on reserve.

At the College and Reference Section Ada M. Nelson of Knox College spoke on the use and protection of reserve books, saying that students should aid by requesting books clearly by author and title; professors by making sure that volumes assigned are in the library and by turning in lists of assignments to the librarian; librarians by seeing that books are quickly returned to the shelves. Mary J. Booth of Eastern Illinois Teachers' College said that a questionnaire sent out in 1921 showed that teaching the use of the library is less common in grade schools and high schools than it is in colleges. In teachers' colleges the course should be required; it may be elective in larger colleges and universities.

Robert J. Usher of the John Crerar Library described some new reference books, chiefly in applied science and sociology. Theodore W.

Koch of Northwestern University reported on European book markets. He said the chief difficulty was in finding stocks for purchase. The country differences that arose during the war were found to be gradually disappearing. Reparation from Germany for the destruction of the Louvain Library is receiving the attention of foreign countries. Holland book prices are high, but quantities of German books were bought up there not to be found elsewhere. In Italy, especially in Florence and Rome, the book trade is flourishing. Stocks are low because of the high business tax. Dealers do not buy unless there are definite orders in sight. Now is unquestionably the time to buy in Germany, and fair treatment is certain. Dr. Koch was elected chairman of the section for 1923.

At the closing session the Association heard an address by Lorado Taft on community consciousness. The last number on the program was a book symposium from Henry James to Sherwood Anderson conducted by Mrs. Carl B. Roden who sketched the changes in the literary world from 1900, when Queen Victoria was still on the throne until today. Following, Alice Farquhar, Margaret Ely and Nellie E. Parham took up several novels of the day.

Social features occupied Friday. In the afternoon a complimentary drive was given to the Association with tea at the Legler Branch. The Chicago Library Club entertained the visiting members at dinner at the Chicago Beach Hotel, at which Miss Bogle, President of the Chicago Library Club, presided. A number of Chicago's distinguished writers were present, among them Clara Louise Burnham, Lucy Fitch Perkins, Harriet Monroe and Edna Ferber, and to Miss Ahern, was accorded the honor of the closing word to the guests.

Officers elected for the coming year are: Ida F. Wright, Evanston, president; Edwin Wiley, Peoria, vice president; Lois Shortess, St. Charles, treasurer; Nellie E. Parham, Bloomington, secretary.

PACIFIC NORTHWEST LIBRARY ASSOCIATION

THE thirteenth annual meeting of the Pacific Northwest Library Association was held in Olympia, Washington's capital city, August 30 to September 1, 1922. The registered attendants, 140 in all, included members from British Columbia, Washington, Oregon, Montana, Idaho and Utah, and visiting librarians from California and Ontario. A cordial welcome was extended to the Association by A. W. Tyler, chairman of the board of trustees of the Olympia Public Library. The response was made by Herbert Killam, of the Public Library Commission of British Columbia, Victoria.

COMMITTEE REPORTS

Charles W. Smith, of the University of Washington Library, chairman of the Committee on Northwest Bibliography, under whose auspices the checklist of Pacific Northwest Americana was prepared for publication last year, called attention to a growing activity in the collection of local history material and consequent increased prices which make it wise for librarians to purchase soon the items needed. He requested the libraries that participated in the preparation of the checklist to forward to him from time to time titles of important acquisitions. Attention was also called to the department of Pacific Northwest Americana conducted in the *Washington Historical Quarterly*. In this are given items of notes and news intended to be of interest to librarians and collectors. Ruth Rockwood, of the Portland Library Association, has prepared an annotated list of 275 titles of books relating to the Pacific Northwest that are recommended for purchase by the smaller libraries. Publication of this list for the Association will soon be arranged, as sufficient orders to the amount of \$200 were received before the meeting closed.

Miss Rockwood, chairman of the Subscription Book Committee, reported that thru the generosity of J. M. Hitt and the Washington state library it had been possible this year to bring out its Bulletins in printed form. Four numbers were issued and distributed to the libraries of the Northwest, as well as to others that had asked for them. It is the plan to continue the publication another year. Fanny Reynolds, of the Seattle Public Library, chairman of the Committee on Books for the Blind, reported the completion and publication of the union list of embossed books for the blind to be found in eleven of the libraries of the Pacific Northwest. Copies are now ready for distribution. Cornelia Marvin, Oregon State Librarian, reporting for the Committee on Libraries in Alaska, told of some correspondence with Governor Scott C. Bone and of his interest in library development in Alaska.

The report of the Committee on School Libraries was read by Mary Lytle of Seattle. The report gave detailed statistics secured from replies to questionnaires returned by eighty-six schools having libraries varying in size from 100 volumes to 7,084. Of the eighty-six, all but thirteen are housed in a separate room and only fourteen are uncatalogued. Only three seem to have no annual appropriation for books. The majority of the libraries are in charge of teachers, assisted by students. A few of the teachers have had some library experience or training at normal school or university. There are three

teacher-librarians and sixteen librarians, eight of whom are graduates of library schools.

John Ridington, librarian of the University of British Columbia, chairman of the committee on Joint Meeting with California, recommended that arrangements be made with the California Library Association for a joint meeting to be held at a convenient point in northern California in 1923.

THE LIBRARY SITUATION IN THE COAST STATES

At the evening session, three speakers, representing respectively the states of Washington, Oregon and California, presented the library situation as it is in the Pacific coast states. "The Library's Part in the State's Educational Scheme" was the title of the paper read by Mrs. Joseph Corliss Preston, state superintendent of Public Instruction for Washington. Cornelia Marvin, Oregon State Librarian, told of "Library Progress in Oregon." The state educational institutions of higher learning and the supreme court have well organized libraries; just one-third of Oregon's counties have county libraries; every town in the state capable of supporting a library has one. The school libraries are not as strong as they should be; they should be more definitely connected with local and state public library systems. The selection of books by libraries has improved. The trustees are the weakest point; they do not take as deep interest in their libraries as they might.

Cornelia D. Provines, of the Sacramento County Free Library, told of the appointment and functioning of a certification committee of the California Library Association and described the workings of the California county library system. In the certification plan California does not feel that it has settled the matter, but it has reached what promises a working basis. From July 1 to August 15 the Committee received 150 applications for certification. Notable provisions of the California county library law are: (1) The county library shall be established by the Board of Supervisors of a county who shall be directly responsible for its proper conduct and appoint its librarian. This brings the library under the direct supervision of the tax raising body of the county. (2) It provides for a state board of library examiners who pass upon the qualifications of those desiring to become county librarians and who issue certificates to them. This safeguards against political appointments and assures the selection of well qualified librarians. (3) The law provides that the county libraries shall be under the general supervision of the State Librarian, who becomes president of the County Library Association, calls an annual convention for the discussion of

matters pertaining to the county libraries, and who renders advice and assistance as needed.

NEW IDEAS IN LIBRARY PRACTICE

"New Ideas in Library Practice" was the general topic for the Thursday morning session. Anne M. Mulheron, Portland's librarian discussed "Book Drives," in Indiana and Missouri, and more particularly the book drive carried on in Portland. An advertising company effectively conducted a publicity campaign at a cost to the library of \$400. It included newspaper advertising, bill board displays, a moving picture scenario, and street car cards. The sort of books wanted was emphasized. Over 3,000 volumes were received of which 2,000 have already been accessioned as desirable additions. In reply to the question raised as to whether the tax levying bodies would not think they could lower the levy of libraries securing many books by gift, instances were cited to show that a campaign for books had sometimes emphasized the needs of the library in a way that brought increased support.

In her paper entitled, "Remission of Overdue Fines," Mary A. Batterson of the Tacoma Public Library discussed the scheme that a number of libraries have been trying out, under such designations as "homecoming week at the public library," "bargain week at the public library" and "back to the library movement." The plan is to suspend for the period of a week the collection of fines for overdue books and to urge all patrons to return overdue books which are charged to them and also any in their possession that have been taken without being charged, assurance being given that no questions will be asked. Covered barrels or other receptacles are placed at convenient places in which books may be dropped without embarrassment to those returning them. Minneapolis, Sedalia, Duluth, Cedar Rapids, Stockton and Sacramento have tried the plan with varying degrees of success. Most librarians who have tried the plan seem to approve of it, but they are agreed that it should not be undertaken too often, for the reason that patrons expecting it to be an annual affair might wait for it to come around before bringing back their books. There was some discussion of the ethical principles involved, some feeling that it is unfortunate to emphasize the "bargain" feature of the week or to treat lightly the theft of library property.

"Library Reports" were discussed by Ralph Munn, reference librarian of the Seattle Public Library. The library's annual report has two chief functions, as a document of record, giving a comprehensive view of the library's development during the year, and as a medium of publicity to gain the interest and support of the

general public. Most library reports fulfill the first function well enough, but fail utterly to arouse the interest of the average citizen. It is practically impossible to have the same report accomplish both purposes; so there should be two separate reports. One, a detailed report, should give full statistics of circulation, registration, accessions, the complete financial report, etc. The number of people interested in this report is relatively small and it need not be printed; it may be mimeographed. Second, there should be a small, well written, and attractively printed pamphlet, preferably illustrated, containing a concise narrative of the high points of the year's work and featuring those things most likely to attract the general public. This should be printed in large numbers and widely distributed.

Ellen Garfield Smith, of Walla Walla, discussed "Advertising the Small Library." The small library cannot spend much on its advertising, issue a monthly bulletin, or distribute advertising thru the mail. Newspaper publicity is the cheapest, most widespread and effective in results of all forms of advertising for a small library. Library expansion is a good theme to use, because it indicates that the library is active. Statistics should be used with judgment and not worded in library jargon. Articles written by the newspaper reporter are invariably better advertising than those carefully and painfully composed by the librarian. The Walla Walla library maintains five bulletin boards down town and during the school year has one in each school building. The posters are changed weekly. Girl Reserves are depended upon to make the changes in the schools and a dependable boy changes the down town bulletins. The Commercial Club's multigraph is used for printing lists. A Library League was organized a year and a half ago and members were solicited at \$1 each to help meet the critical needs of the library. The direct benefits were \$1500 for books and an increase in the tax levy for the following year.

"One Method of Handling Delinquent Borrowers" was the title of a paper read by Sarah Virginia Lewis of Seattle. The Seattle library sends its first notice when a book is from three to seven days overdue. If the book is not returned within fourteen days, some attempt is made to reach the borrower, some member of his family, or his employer by telephone. If the two notices failed to bring results the former practice was to turn the case over to a collector. More recently, however, the library has been making use of the registry department of the post office. The third notice is now sent by registered mail. On this notice are printed sections from the city ordinance with regard

to the legal penalties for failure to return books when sent for. If the book is not back within thirty days after this notice is sent the case is turned over to the corporation counsel (city attorney) for prosecution. During the first year of operation under this plan registered notices were sent concerning 2868 books. Of these, 2575 were returned, a gain of nearly 28 per cent in the proportion of books recovered over the previous year's record. There was a saving of nearly 85 per cent in the cost of collecting.

Thursday afternoon Professor Edmund S. Meany, of the University of Washington, gave a most interesting talk on the "History of Olympia and Vicinity." Members of the Association, as guests of the citizens of Olympia, enjoyed an automobile ride, during the course of which some of the places of historic interest mentioned by Dr. Meany were visited. After the drive the librarians visited the State Library and later were received at the executive mansion.

The evening session was opened by a vocal solo by Mrs. Walter L. Whiting, of Olympia. A Book Forum was interestingly conducted by Ethel R. Sawyer, Portland. As a prelude to the reviews, Miss Sawyer presented the allegory of a book traveler, who because of the knowledge gained by books was able to escape dangers and difficulties which others suffered.

"Artist or Artisan-Which?" an address by Dr. John Ridington followed. Dr. Ridington reminded those library workers whose tasks are largely mechanical of the dignity of their labor. All necessary work is worthy work and should not be slighted because it is the repetition of a mechanical routine.

LIBRARY PERSONNEL

The general topic for the Friday morning session was "Library Personnel." William E. Henry, librarian of the University of Washington and director of the library school, gave an account of the history, organization and aims of the school. (*See L. J.*, 1922, p. 161-162.)

The discussion of this paper was led by John B. Kaiser, librarian of the Tacoma public library, who by invitation, presented various suggestions for the improvement of the course of study that had come to him, especially from fifteen graduates of the school whose criticisms had been invited. The need of typewriting as a prerequisite to library work was especially emphasized. Other subjects which several thought should be given more attention were book selection, more consideration being given to modern popular writers; work with children; trade bibliography; government documents; book mending. Since a majority of the graduates of the school go either to the Seattle Public Library

or to the Tacoma Library, it was suggested that more attention be given to the methods used in these libraries. In the discussion it was clearly recognized that increased attention could not be given to various subjects short of a two years' course.

A paper on "Recruiting for Library Service" was read by Kate M. Firman of Seattle. Professions which offer an adequate return for services rendered do not need to recruit. The army and navy which offer low wages, must constantly do so; so must libraries. There are too few library schools in the country and these are located in eight different states. Forty states have no full-fledged library schools of approved standing. To secure training in one of the best schools, students from many of these forty states have to go far at great expense. The number of librarians in the country is between 15,000 and 20,000. The annual output of the twelve schools is about 225—not much more than one per cent of the total number of librarians. The A. L. A. recruiting committee has supplied librarians and vocational directors with literature on library work. The most effective recruiting, however, is done by individual librarians in conference with promising candidates. Local recruiting committees have been appointed by various state associations. It might be well for the P. N. L. A. to follow their example.

"Certification for Library Service" was presented in the form of a debate, with two speakers on each side. Mabel Ashley, of the Everett Public Library, in a paper read by Miss Hall, and M. Belle Sweet, librarian of the University of Idaho, supported the affirmative, while Gladys Smith, of the Spokane Public Library, in a paper read by Mr. Fuller, and Emma Stephenson, of the University of Oregon, upheld the negative. The arguments advanced for certification were that it is preferable to civil service and would probably forestall the enactment of further civil service legislation for libraries. Either certification or civil service seems to be a prerequisite to any system of pensions for librarians in which support is received from public funds. It has benefited other professions—law, medicine, education, dentistry, pharmacy, architecture, etc. It would make for an *esprit de corps* among library workers, by establishing the status of various classes of library workers. It would give librarians better standing in the eyes of the public, furnish trustees authoritative guidance in selecting employees, and protect the public from being imposed upon by the incompetent.

Against certification it was urged that it will diminish the authority of local boards and head librarians who are best fitted to administer authority. It is not wise to establish a complex

system of standards when the standards of individual libraries are best adapted to meeting the local requirements. Requirements of even a minimum standard would work hardships in the smaller libraries and library extension would be checked. It would put librarianship on a civil service basis, helping the mediocre to advance more rapidly and relieving the individual of responsibility. It would not take into consideration personality and natural aptitude, the most necessary qualifications of librarians. It would not carry with it the magic to increase library salaries beyond what library budgets will stand.

BUSINESS

The final session, Friday afternoon, was devoted to business. The Association approved the project for the restoration of the Library of the University of Louvain free gift from America. It voted to send greetings to Governor Scott G. Bone, of Alaska, expressing high appreciation of his interest in the development of library service in his territory and venturing to hope for official representation from Alaska at the 1923 meeting of the P. N. L. A. It voted to appoint a committee to secure co-operation of the Woolworth Company and other chain stores offering books for sale, in presenting the public a high standard of titles in their cheap editions; and also to seek the co-operation of the A. L. A. in this matter.

Officers elected for the ensuing year are: President, Ethel R. Sawyer, Library Association of Portland; vice-presidents, Belle Sweet, librarian, University of Idaho, and Mrs. Overton G. Ellis, trustee, Tacoma Public Library; secretary, Ralph Munn, reference librarian, Seattle Public Library; treasurer, Elena A. Clancey, Tacoma Public Library.

MATTHEW H. DOUGLASS, *Secretary*.

LIBRARY CALENDAR

November 28. At Syracuse Central High School Library. Library section of the New York State Teachers' Association morning and afternoon sessions.

Dec. 2. At Columbia University, New York City. Annual informal conference of eastern college and university librarians. Please notify Frederick C. Hicks of your intention to be present.

Dec. 28-30. At Chicago, Midwinter meeting of A. L. A. Council and other library organizations. See page 972.

Dec. 29. At New Haven, Conn. Bibliographical Society of America.

April 23. At Hot Springs, Arkansas. The 45th annual meeting of the American Library Association.

LIBRARIANS:-

Please record the name of HEFFER of CAMBRIDGE (Eng.) as a Great BOOK Firm.

We specialise on Books (both English and Foreign) for Libraries and Students.

We carry an immense stock.

We have experts in each main department of Literature.

Catalogues are constantly being issued, and will be mailed gratis to any address.

We have a highly organised New Book service for both English and Foreign Books.

Please note the name and address:

**W. HEFFER & SONS
LIMITED,
BOOKSELLERS
CAMBRIDGE, ENGLAND**

Cables: "HEFFER, CAMBRIDGE."

The British Empire and World Peace

By NEWTON W. ROWELL Net \$3.50

Mr. Rowell's thesis is the importance of co-operation for peace both internationally and internally, and he speaks enthusiastically for the League of Nations.

The English Madrigal Composers

By EDMUND HORACE FELLOWES \$6.00

"Dr. Fellowes has given us back the greatest music England has ever produced, he has shown as no one else has, the wonderful variety of expression of things grave and gay contained in it; and he has placed his wide knowledge at the disposal of every student."—*London Times*.

The Climates of the Continents

By W. G. KENDREW \$7.00

The present volume fills a gap in the sources available for the study of the geography of the Earth, as hitherto there has been no adequate description.

Greek Hero Cults and Ideas of Immortality

By LEWIS RICHARD FARNELL \$6.00

Dr. Farnell here describes the Greek Hero Cults, a field not dealt with in his great work on the *Cults of the Greek States*. An indispensable book to those interested in comparative religion.

Books for the Practical Man

Income Tax Procedure—1923

By Robert H. Montgomery

Certified Public Accountant; Attorney-at-Law; Member of the firm of Lybrand, Ross Bros. & Montgomery; Author of "Auditing; Theory and Practice."

For many years Montgomery's manuals have been the standard guide to income tax procedure. Thousands of business men—lawyers, accountants, bankers, corporation executives—use them either in dealing with the accounting and legal problems encountered in filling out the return or in dealing with subsequent corrections, protests, or assessments. This year there have been over 600 new Treasury Department Rulings and a large number of important Court decisions with which every taxpayer should be familiar. An important chapter deals with rulings affecting Excess Profits Tax returns for 1920 and 1921. As Mr. Montgomery's book is the established authority because of its definite and exceedingly practical comment and advice, the new volume for 1923 will be in extensive demand.

Will be ready without fail January 1, 1923

About 1800 pages. Cloth Binding. \$10.00

The Art of Investment

By Morrell W. Gaines

This book is designed to train the reader in combining investment safety with the opportunity of realizing a profit out of the long-term fluctuations to which even the soundest securities are subject. The author, who is connected with one of the most prominent international banking firms, lays down the foundation for orderly reasoning and inquiry concerning particular securities and the general investment situation. His treatment, though on broad lines, is most illuminating and of the greatest practical value. It is a volume which no one interested in investment should fail to read.

About 200 pages. Cloth Binding. \$2.00

ALLEN (Mrs.) Philip L., 1911, N. Y. S., is organizing St. Mary's College Library, Winona, Minn.

AVERY, Jessie R., 1900-01, N. Y. S., librarian of the Lincoln Branch of the Rochester Public Library, resigned in September to become librarian of the Central State Normal School at Lockhaven, Pa.

BAXTER Ethel, L., 1917-'18, N. Y. S., has resigned her position with the American Education Association to become librarian for the Fleischmann Laboratories, New York City.

BROWN, Charles H., library specialist of the United States Navy Department, has resigned to become librarian of the Iowa State College, Ames, Ia. Gladys Mary Rush, 1916 P., acting librarian, resigned in August to marry Cornelius Gouwens of Ames.

CLAFLIN, Helen M., 1915, N. Y. S., resigned her position with the Public Library at Brookline, Mass., to become librarian of the high school at Attleboro, Mass.

DAVIS, Mary Gould, children's librarian of the 135th Street branch, and temporarily in charge of story telling for the New York Public Library has compiled "A Girl's Book of Verse," being a treasury of old and new poems, published by Frederick A. Stokes & Company.

GOSS, Harriet, leaves her position with the Adelbert College Library, Cleveland, on November 15th to become the Librarian of Lake Erie College, Painesville, Ohio.

GRAVES, C. Edward, formerly librarian of the Minnesota Historical Society is realizing his am-

bition as a fruit grower and sends us from Hood River, Oregon (Route 3) a catalog of his tempting Christmas season wares.

KYTE, E. Cockburn, secretary of the Library Association (of the United Kingdom) has joined the firm of John and Edward Bumpus, Ltd., booksellers, 350 Oxford Street, London, W. I., to help "bring into better relations all who are responsible for the production and distribution of books "and, particularly, to organize library book finding and the supply of books, new and second hand and to give advice upon fittings and how to start a technical library for firms contemplating the establishment of one."

MCCULLOUGH, Julia, 1922 A., appointed librarian of the Commercial High School, Atlanta, Ga.

NORRIS, Helen H., 1918-'19, N. Y. S., resigned as organizer for the New York State Library Extension Division to become cataloger at the University of Minnesota Library.

POTTER, (Mrs.) Elizabeth Gray, 1912, N. Y. S. has been given a year's leave of absence from Mills College Library, and has joined the staff of the American Library in Paris.

STEEL, Edwina M., 1916 C. P., has resigned her position in the Cleveland Public Library to become junior high school librarian, Long Beach, Cal.

STEVENSON, Burton E., is the author of another romance, "The King Makers" published by Dodd, Mead and Company.

UNDERHILL, Adelaide, has been appointed librarian of Vassar College to succeed Miss Amy L. Reed. Miss Reed, who was part time professor in the Department of English while librarian, will now devote her entire time to teaching in the Department. This note corrects the wrong information given under Miss Underhill's name in our November 1st "Among Librarians" department.

WALKER, Catherine, 1913 A., appointed librarian for the Marine Barracks, Quantico, Virginia.

WINSLOW, Amy, head of the technical department, and Gretta Smith, head of the publications division of the Indianapolis Public Library, are granted each a year's leave of absence to work for the American Friends' Relief in Vienna. Elizabeth Glendenning will be acting head of the technical department during Miss Winslow's absence.

BEST CHRISTMAS BOOK FOR THE YOUNGSTERS!**RHYMES OF EARLY JUNGLE FOLK**

By MARY E. MARCY

An Outline of Pre-History for the Young Folks

With seventy-one exquisite wood cuts by the distinguished young artist, Wharton H. Esherick.

The book is about the time when our earth was a sun, the formation of the earth, the rising of land and mountains from the sea, the coming of plants and trees from the sea flora and the arrival of animals from the sea.

Here we learn how coal was formed, of the reptilian age, the development of animals into higher forms, and of the advent of man, his progress and customs.

This book is full of popular scientific facts told in fascinating rhymes—of the little eohippus, of how the elephant got his trunk, the first wild dogs, about wolves, lions, sabre-toothed tigers, bears, monkeys, life on the bottom of the ocean, and scores of other interesting phenomena.

A charming book on the evolution of life and higher forms, and on the wonderful world we live in. It will interest the grown-ups and give them popular subjects toward which to direct the youngsters.

Start the young folks right. Here is a real holiday book; just out. We believe *Rhymes of Early Jungle Folk* will be the most beautiful as well as the most scientific and interesting book of the year for the youngsters.

Price \$2.00, by insured mail or at bookstores

SCRIBNER'S LIBRARY DEPARTMENT**Offers to all libraries, large or small,**

Expert and efficient service, the result of years' experience.
The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

ZETTENBERG, Ebba E. 1918 C. P. has joined the staff of the Lakewood (Ohio) Public Library to have charge of the Emerson Junior High School Branch, and Florence I. Wilson, to have charge of the Horace Mann Junior High School Library.

The Portland (Ore.) Public Library has made the following appointments: Constance R. S. Ewing, 1919 P., head of the Order department to succeed Alice Williams, 1915 W. R., who becomes librarian at Jacksonville, Ill.; Eleanor Davis, an Illinois graduate, librarian of Lincoln high school, a branch of the Library, to succeed Pearl Durst, who has accepted a high school librarianship in Indianapolis; Helen Hoagland, 1922 L. A., assistant in the East Portland branch; Phyllis Knowles, 1922, Wis., children's librarian of the Vernon branch; Mary K. Murphy, 1922 S., librarian of the Rose City Park Branch; Lenore Casford, 1922 C. P., has been appointed first assistant in the School department, and Dorothy Watson, 1917 N. Y. P. L., has returned to Portland to be assistant in the Technical department.

Recent changes of the Brooklyn Public Library include the resignation of Nellie B. Fatout for eighteen years librarian of the Carroll Park branch who will live with relatives in Indianapolis. She is succeeded by Lillian J. McMann, librarian of the Red Hook Branch whose place is now filled by Elizabeth L. Henderson, formerly of the Brownsville Branch. Ruth G. Hopkins has resigned the charge of the Children's Department of the Bridgeport (Conn.) Public Library to return to the Department of Work with Children. Evelyn T. Ross, 1916 Wis., 1917 W. R., of Portland (Ore.) is in charge of the children's room at the Pacific Branch. Lillian P. Nichols, 1916 P., is specializing in work with children at DeKalb Branch. Ethel Trudeau 1922 P. is at the Brownsville Children's Branch. Dorothy Mackay is children's librarian of the Macon Branch and (Mrs.) Dorothy C. Wilkey Frey of the East Branch. Helen R. Bull of the Kent (Conn.) Public Library is temporarily assistant librarian at the Williamsburg Branch and Catherine Barksdale 1921 P. of the Madison (N. J.) Public Library is now at the Pacific Branch.

CURRENT LITERATURE AND BIBLIOGRAPHY

"A Descriptive Booklet," telling of the Lincoln School of Teachers' College, New York, devotes a chapter to the library and its relation to the organization of the school.

The New York Library Club has just published a Directory of the Libraries of Greater New York together with a list of its members, constitution and by-laws. The directory was compiled by Isadore G. Mudge, Reference Librarian of Columbia University, assisted by a committee of the club. The information given includes the name and address of the library, the name of the librarian, regulations governing its use and resources. There is an index to special collections. Three hundred and seven libraries are included. A limited number of copies of the Directory may be obtained from Miss Marion F. Schwab, Secretary of the Club, 26 Brevoort Place, Brooklyn, N. Y. The price is \$1 postpaid.

The *Radio Service Bulletin*, issued monthly by the Bureau of Navigation, U. S. Department of Commerce, now prints the lists of references to current radio periodical literature prepared

by the Radio Laboratory of the Bureau of Standards. For about two years these lists have been prepared in mimeographed form, and a very limited number of copies have been available for distribution. The publication of these references will be continued if the readers of the *Radio Service Bulletin* (obtainable from the Superintendent of Documents, Government Printing Office, Washington D. C. for 25 cents a year) find them useful. The Bureau of Navigation will be pleased to receive suggestions from readers as to the desirability of continuing their publication. A complete file of the previous mimeographed lists can be consulted at the Bureau of Standards in Washington. Files of earlier lists can also be consulted at the Library of Congress, the Engineering Societies Library in New York, and the John Crerar Library in Chicago. These references are classified according to a decimal system outlined in a report prepared at the Radio Laboratory of the Bureau of Standards, "An Extension of the Dewey Decimal Classification Applied to Radio." It is expected that this classification will be published later.

Business Letter Practice

By JOHN B. OPDYCKE

First Assistant, Department of English, Theodore Roosevelt High School, New York City

The Last Word on Business English in
General and on Business Letter Writing in
Particular

With an Introductory Symposium by Four Prominent
Captains of Commerce

WHAT THEY SAY

"Business Letter Practice I believe to be a distinct contribution to better letter writing, and I am very glad indeed to have had this opportunity to add my little bit to the thousands of other business men who are clamoring for more help and more light on how to write better business letters."—*Roger W. Babson, President, Babson's Statistical Organization, Wellesley Hills, Mass.*

"Theory and practice have been so arranged in the volume of nearly 600 pages that students learn by actual doing. There is a wealth of good letters presented for study and for dictation purposes, and many problems are presented which will stimulate the composition of business letters. There are articles by commercial and industrial leaders and a business letter lexicon. The book is also a ready reference work on credits, collections, sales, claims, etc., and it is all interestingly presented."—*The Boston Globe, Boston, Mass.*

"The instruction given is sound in psychology and might well be studied by writers of a more literary purpose."—*New York World.*

Service

"I had six honest, serving men;
(They taught me all I knew);
Their names are *WHAT* and *WHY* and *WHEN*,
and *HOW* and *WHERE* and *WHO*."
—(Kipling)

WHAT was the Declaration of London?
WHY does the date for Easter vary?
WHEN was the great pyramid of Cheops built?
HOW can you distinguish a malarial mosquito?
WHERE is Canberra? Zeebrugge?
WHO was the Millboy of the Slashes?
Are these "six men" serving you too? Give them an opportunity by placing

Webster's New International Dictionary IN YOUR LIBRARY

The name *Merriam* on Webster's Dictionaries has a like significance to that of the government's mark on a coin. The *NEW INTERNATIONAL* is the final authority for the Supreme Courts and the Government Printing Office at Washington.

Write for a sample page of the *New Words*, specimen of Regular and India Papers, also booklet "You Are the Jury," prices, etc. To those naming the "Library Journal" we will send *free* a set of Pocket Maps.

SUGGESTION

Its Law and Application, or The Principle
and Practice of Psychotherapeutics

By

Dr. Charles F. Winbigler, Ph.M.

*The most complete book ever written
on the subject*

This work covers exhaustively every phase of the great Law of Suggestion and its application to the problems of our daily life—physical, mental and spiritual. An invaluable book for students and a revelation to the general reader.

It includes a complete treatise on Autosuggestion with full explanations of the workings of the subconscious and conscious minds.

The NAUTILUS MAGAZINE says: "It is a veritable gamut on the subject. It covers the whole field of suggestion."

Descriptive circular on request

Bound in cloth, 472 pages

Price \$2.50

SELF MASTERY THROUGH CONSCIOUS AUTOSUGGESTION

By

EMILE COUÉ

THAT there is no mystery about Dr. Coué's remarkable cures of disease is evident when his methods are analyzed. He says himself that he simply works according to natural laws of mental activity. Coué takes little credit to himself for his discoveries, declaring that he is not "The Miracle Man" that London and Paris would have him appear. He says that *everybody* can use his methods of Autosuggestion to cure disease, preserve health, strengthen character, correct bad habits, eliminate fear and make themselves better in every way—physically, mentally and spiritually. Learn for yourself the potency of his formula, which all America is beginning to repeat:

*"Day by day, in every way, I
am getting better and better."*

LUTHER BURBANK says: "M. Coué merits our joyous admiration, universal love and immortal thanks, for his wonderful emancipation proclamation set forth in his book."

Price \$1.00

(Genuine Leather \$1.75)

MY PILGRIMAGE TO COUÉ

By

ELLA BOYCE KIRK

Patient and Pupil of Coué

The intensely interesting story of the first American woman to be cured by Coué at Nancy. Mrs. Kirk was rapidly losing the power to walk and all previous treatments had failed to help her. Coué's methods restored the use of her limbs and made her an ardent apostle of Autosuggestion.

This book gives a graphic account of the marvelous work of Coué and of the man himself.

Bound in Cloth, Price \$1.25

EDWIN E. SLOSSON
Editor
HOWARD WHEELER
Business

June 22, 1922.

Mr. F. E. Compton, President,
F. E. Compton & Company,
Chicago, Illinois.

Dear Mr. Compton:

I confess I unwrapped Compton's Pictured Encyclopedia with the expectation of being disappointed in it - if you will allow such an illogical form of expression. I thought likely it would turn out on close examination to be merely another of the numerous attempts to pass off an old or foreign work by sticking in a few flashy pictures and some hasty pages on the Great Far and Radio.

So I was surprised as well as delighted to find that it was a newly written and thoroughly modern work on an original plan. You have demonstrated that it is possible, even in a cyclopedia, to be informing without being dry. I have not so far detected any mistakes or out-of-date statements although hunting blunders in encyclopedias is a favorite pursuit of mine.

You are the first encyclopedist to give proper recognition to the important part that engineering and invention plays in modern life. Youngsters of the present find food for their fancy in the daily miracles of science. I am glad that you have included so many classic stories and fairy tales for I am sure your younger readers will find them by comparison the dulllest pages of the book.

C. P. E. will interest not only young people but anyone whose cranial sutures are not altogether ossified. I am using it frequently in my writing for I can find in it many things that are not in any of the other reference books in my library.

Very truly yours,

Edwin E. Slosson

EES-AEW.

EDWIN E. SLOSSON

Science Service is edited by many of our world famous and leading scientists with the purpose of popularizing science.

Doctor Slosson, the editor, was for twelve years Professor of Chemistry in the University of Wyoming, and for seventeen years Literary Editor of The Independent, New York. He has been Associate in the Columbia School of Journalism since its foundation and is the author of "Creative Chemistry," "Easy Lessons in Einstein," "Great American Universities," "Major Prophets of Today," "The American Spirit in Education," and many other scientific and literary publications.

COMPTON'S PICTURED ENCYCLOPEDIA

Compton's Pictured Encyclopedia, entirely new, unprecedented in style, spirit and makeup, must, of course, be judged with broad, new standards. The remarks of Dr. Slosson upon the modernity and originality, the interest and accuracy and the completeness of this 8-volume encyclopedia are typical of endorsements by thousands of educators, parents and librarians. For 100 sample pages free, please address Dept. 3012, F. E. Compton and Co., 58 E. Washington St., Chicago.

GF Allsteel Shelving

Effects economy of floor space and increases book storage capacity. The spacing between shelves can be altered without disturbing adjacent stacks. Lower shelves can be optionally reinforced.

SPIES PUBLIC LIBRARY, MENOMINEE, MICH.

GF Allsteel Shelving

Can be easily fitted to any space with little trouble. Alterations can be made without injury to shelving. A reserve supply of shelving can be ordered and kept on hand for emergencies. Being of steel it greatly reduces fire hazard.

In libraries, where proper storage is of prime consideration, the convenience and adaptibility of GF Allsteel Shelving are features that commend it. It has the advantage of design that permits shelves to be adjusted readily without disturbing other shelves. Where the need arises, the entire installation may be taken down and re-erected with very little effort.

The General Fireproofing Company

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

Chivers Book Binding Company, Inc.,

Hints for the Village Library Building Committee

By JOHN ADAMS LOWE
Assistant Librarian, Brooklyn Public Library

MANIFOLD problems confront the committee charged with the erection of a building in which the public library is to be housed. And, contrary to general opinion, experience convinces one that these problems do not diminish when a small building in a small community is the matter involved. Available funds are so limited that economy must be practiced frequently with Scottish thrift to erect any structure worthy of the name of a public library.

It is to be regretted that there is not available for the building committee a complete up-to-date manual. Mr. William R. Eastman's pamphlet, "The Library Building," published in 1918, Miss Cornelia Marvin's pamphlet, "Small Library Buildings," published in 1908, with an excellent introduction filled with sound advice and suggestion, and Miss Alice G. Chandler's pamphlet dated 1915, "The Country Library versus the Donor and the Architect," are helpful and suggestive. "The small-town library building" an article in *House Beautiful*, January 1920, discusses remodeling dwelling houses for small library buildings.

An unailing source of help is, however, to be found in the State Library Commission. The committee's first step should be to seek its counsel. Most library commissions have at command a collection of blueprints of floor plans of library buildings. They can recommend reputable architects who have designed successful libraries. Indeed two commissions are so fortunate as to receive the services of eminent architects practically as consulting architects. They render invaluable aid to committees who bring their building problems to the commission. If no state library commission is available, send your problems to the Secretary of the American Library Association in Chicago, who will be able to focus the results of the experience of the country on your needs.

The librarian, furthermore, if trained and

experienced, is of inestimable value to the committee. Such a librarian understands administrative detail and appreciates modern library ideals and standards of work and frequently knows something of the latest development of library architecture, furniture and equipment. Frequently library trustees, undertaking a new building, begin their activities by engaging such a librarian in order to advantage by her assistance in planning and administering the building.

Because of the perplexing problems and difficulties to which committees undertaking an important task for the first time always fall heir, it seems not unfitting to set down a few simple hints which have proven practical to men and women who have struggled over the same problems.

The personnel of the committee is usually predetermined before the committee meets for the first time. It may be a small group of the entire board of library trustees constituted by it to act for the Board. Its members may have been named by the donor of the building. The Town officials may have called together several prominent citizens and among them a representative of the library trustees and designated them a building committee, answerable and responsible to the town itself. The spirit in which the committee acts, on the other hand, is not dependent on outside forces. Unity of action as a committee is essential, which demands frequently subordination of one's own personal interest or desire to the common good. The committee is under obligation to the community and must discharge its responsibilities in that spirit.

Committees in a small community are exposed to more personal demands than his city brother, for people in towns live closer together in community and personal affairs than city dwellers. A "one man" committee is doomed never to obtain complete success. Such a committee is deprived of originality, self expression, initia-

tive, broad and concerted action and frequently of intelligent understanding of the problem as a whole.

Organization is absolutely essential to the effectiveness of a library building committee. No matter how small an amount of money is involved, this holds true. The committee, as a unit, not as individuals, is responsible and accountable for the money received and for the results achieved to the body which gave it a warrant to act. Be sure to have in writing this authority, whether it be delegated to the committee by the library trustees or by the civic officials. And make certain, further, that this authority does not bind members separately and individually to execute any contract or meet any deficiency in the event of failure of the contractor or others. In those cases in which the board of library trustees delegates a committee from its own membership to serve it is not an unwise step to have this appointment approved by the proper civic authorities. This, to a certain extent makes these authorities responsible for the acts of the committee.

Even for the smallest undertaking, experience shows the necessity for the election of a chairman, a secretary and a treasurer, with a complete definition of the duties and powers of each. If this matter is attended to at the very outset difficulty may be avoided later. In addition to calling and presiding at meetings, the chairman should sign all slips authorizing expenditure of money, and should approve all vouchers submitted. The treasurer fulfills the functions usually assigned to this office, but it is especially important in this instance for him to keep a complete and accurate record of moneys received and paid out, together with his acknowledgement of receipts and of his authority for expenditure. If ever a complete record of all correspondence of a committee were worth while keeping, it is so in this case. The secretary should keep and file a carbon copy of every letter sent and file letters received. A complete and accurate account of the meetings should be written and it is especially important to record every action taken. These minutes will be referred to constantly and become a source of information and advice as well as a

KENT MEMORIAL LIBRARY, KENT, CONN. HEATHCOTE WOOLSEY, ARCHITECT. ERECTED 1922, COST \$7850. CHARMING DESIGN, PERFECTLY ADAPTED TO LIBRARY PURPOSES. AN AUDITORIUM IS LOCATED UNDER THE ROOF

record and a protection to the committee in cases of need. I have seen many a minute book of committees which recorded little aside from the fact that the committee met at Matilda Jenkins's house, that the minutes of the previous meeting were read, that the chairman presented an important letter which was discussed, and that the meeting adjourned at five o'clock. Better dispense with all minutes than keep such valueless things. Record exact nature of important matters presented and action taken on each. A record of the attendance at meetings often settles without doubt discussion as to whether a certain doubting member ever heard of or voted for a measure. A serious handicap to library building committees in small places is lack of this very organization. The informality with which the members very often have been in the habit of conducting their private and semi-public transactions, frequently makes it impossible for them not to conduct the business before them in the same unbusiness-like manner. I know of one case in which a member of a committee was a friend of a real estate agent who pressed the purchase of an undesirable lot. The committee man pledged the committee to take it without even presenting the matter. All too often misunderstandings, hard feelings and expenditure of money have resulted from individual action without authority from the committee. Acquaintances talk with this committee man and with that and secure promises absolutely without sanction of the others. One committee got into expensive difficulty because

PUBLIC LIBRARY, LEVERETT, MASS. KARL S. PUTNAM, ARCHITECT. ERECTED 1916. COST \$3500. CONTAINS ADULT READING ROOM, CHILDREN'S ROOM AND AN AUDITORIUM UNDER THE ROOF. THE LOT SLOPES AWAY AT THE REAR MAKING POSSIBLE A LIGHT, AIRY BASEMENT. OLD APPLE TREES ARE AN INVALUABLE DECORATIVE ASSET

two members told almost every contractor in the neighborhood and one or two architects to go ahead with some plans which the committee could consider. Several of these plans had to be paid for, altho none of them had been authorized by the committee.

In the course of events the building committee becomes more or less responsible for: choice of site, size and character of library, choice of architect, acceptance of the plans and specifications, including furniture and equipment, award of contract, making of payments to the architect, contractor, insurance agent and others, agreement with the municipality for the use and upkeep of the building.

Much of the use and character of service rendered by the library will depend upon the choice of the location. All too frequently this choice has not been left to a committee but has been predetermined by a gift of a site more or less desirable when carefully considered. Outstanding factors which determine the selection of a location for a library are: accessibility, surroundings and future growth of the town or city, quiet, street "improvements," light, slope, grading and planting, and the general texture of the soil.

The library building should be accessible to the majority of the community. A building which housed a well selected and generous collection of books was erected between two villages four miles apart in the hope that it would

serve both. The towns dwindled rather than grew together as had been expected and the library is isolated and all but abandoned. The surrounding neighborhood should be desirable and give promise of remaining so for some years to come. The railway station yard is not the most feasible spot for the location of a library, altho it does fill the desire of those who wish all passers-by to see it.

Street "improvements," sidewalks, curbs, sewer, water, gas and electricity constitute important considerations when the cost of the lot is being figured. Naturally if the committee is required to make these necessary improvements it will find a considerable additional outlay to the erection of the building itself. If the

improvements are all in, be sure that all assessments against the improvements have been paid by applying to the proper town or village official. I recall one case in which the construction had been started and was halted by an injunction put upon the committee because it had not paid an assessment on a sewer which had been laid nearly thirty years previous. Altho the library building and property were to be exempt from taxation it was held that the sewer assessment must be paid. You may not have to consider gas, sewer and water pipes in your particular community and very likely there are no assessments for curbs or sidewalks. You will in all probability need to provide, however, improvements such as septic sewage system, water supply, and lighting plant. Water must be installed even in the smallest building. It is necessary to the decent performance of the routine work of the staff.

Light is a factor most essential to the success of the building. The lot should therefore be wide enough to permit ample space for windows in the side walls. Corner lots will, of course, give an abundance of wall space. But corner lots bring special problems while they offer special advantages.

A slope in the ground to the rear or at one side is frequently of advantage to the building plan, as it allows space for a light, airy basement. A slope to the front of the lot does not give the same advantage and presents difficulties

with terraces, steps or other problems. Texture of the soil plays a part. If you have to blast out a ledge or if a clay bog has to be filled up the expense is increased.

Do not overlook the item of grading. Consider a high, dry lot before a low, damp one. Avoid a site which is so low as to require ex-

When it comes to a matter of the upkeep of the building a great deal of care must be exercised not to erect a building which cannot be supported properly by the municipality. The annual appropriation for maintenance will in all probability have to be about fifteen per cent of the cost of the building. The Carnegie Corpora-

pensive filling and grading. Dirt hauled to the site may prove costly and increase appreciably the expenditure for the site. If there are trees on the lot consider very carefully the placing of the building before removing them. Trees enhance the beauty of property, public as well as private. In contemplating the cost of the site do not forget to estimate how much may have to be spent in planting shrubs and trees to make an otherwise barren lot attractive.

The factors which determine the size and character as well as the ultimate cost of the building are the town, the number of volumes in the library, the readers to be accommodated and the annual appropriation for maintenance. The character of the population and the possible growth of the neighborhood will determine to a large extent the character of the building.

In estimating the provision for the housing of books it is necessary to consider the growth of the library for twenty years, taking into consideration the possible discarding owing to wear and tear.

A great deal of attention must be given to the question of how many readers are to be accommodated and in what manner. Some communities are so placed geographically that reading rooms are not an essential feature. Others have essentially an "at home" habit to such a degree that patrons do not loiter in the library to read but take the books directly to their homes. It must be determined at the outset whether study rooms and an auditorium and possibly a room for the children's story hour must be provided.

tion has always required a pledge of at least ten per cent of the cost of the building, but this has been found not to be adequate.

The state library commission will be of utmost help to the committee in pointing out the essentials of an up-to-date library building adequate to meet the needs of the community. Furthermore, it will suggest buildings which the committee may visit to study features desirable in a new building, as well as to note objectionable flaws in plan and construction to be avoided.

When the site has been chosen and the size and character of the building have been determined the committee is ready to make a selection of its architect. And there must be an architect, be the building small and the problem apparently simple. Do not try to make-shift with the plans of the local carpenter and contractor, giving yourself the unsound excuse that you are saving architect's fees. I have so often seen the agonies of committees which have tried to get on without an architect, and have so repeatedly been asked how the building they had erected with such dissatisfaction may be saved from its wretchedness that I urge unhesitatingly an architect. For your construction, the execution of the plans, choose a good contractor, the best you can find. Contractors, even if they have been building for their boasted "thirty years," and are proven wise in construction frequently are not designers. They have not had the right kind of training to fit them for designers. They claim to be

more practical than architects whom they scorn as "artists."

On the other hand, architects, especially trained, usually produce not only more beautiful buildings, but also buildings actually more practical. Builder's plans may call for buildings sturdy and strong, but often they show a waste of space. The contractor, who is not an architect, tries to get architectural effects by tacking things on, features expensive and unnecessary, whereas an experienced designer produces his

committee pays its architect fees. You should not be surprised if the architect asks you to pay ten per cent of the total cost of the building for his architectural services. The American Institute of Architects now recommends this as a just and proper fee for its members to charge for plans, specifications, and supervision of a building costing less than \$10,000. As a matter of fact, architects do not charge the same fees, and the price varies from five to ten per cent. Architects usually charge from two and one-half

architectural effects by the skillful arrangement of walls, windows and roof, making needless the application of unnecessary ornamental features. One fact, however, is to be remembered about all architects. To be entirely satisfactory plans devised by skilled architects, should be subjected to criticism and revision by skilled librarians. Some of the best architects are often ignorant of library axioms and usage, and a final revision of plans by trained and experienced librarians will often avoid what might otherwise prove to be a library which was ill adapted to library purposes, expensive to administer and to maintain.

An architect can save the committee a good percentage on the cost of his work. This has been proved over and over again. The average committee man knows little or nothing of the value of materials, or labor, or how to let a contract to advantage, or how to carry on the superintendence of the work in order to save both time and money. The architect does this. Moreover, the value he will give you cannot be reckoned in dollars and cents. He will achieve for you a building which you and your contractors together never could have built, work as you may.

Tho it may appear strange to some, small library designing is most difficult. Every inch of space must be utilized. Every architectural feature must be obtained at lowest cost. It requires brains and skill. It is for these that the

to seven per cent for plans and specifications when they do not supervise construction in addition.

It is not advisable to choose an architect by competition, except for buildings costing over \$50,000. For such competitions, the American Institute of Architects has laid down clearly defined rules of procedure, and these should be consulted and followed. Confer with the state library commission. Study the work actually done by recommended architects, select one who has been successful from the library point of view and who has business stability and equipment enough to execute his plans, and stay by him, working over plans, changing and developing them with him until the most satisfactory plan is evolved. Avoid as you would the plague, him who brings you a pretty water color drawing without specifications or floor plans and tells you his building can be built for a certain figure. Avoid him who shows you plans of buildings he has designed but which have never been erected. Avoid him who is not recognized as a member of his craft by the American Institute of Architects. Many an unscrupulous schemer has secured a commission on a perfectly impossible drawing or by big promises. Investigate. You will find that some of the small libraries in the country have been designed by some of the most eminent American architects, men who have been willing for the

sake of their great profession to bring their wealth of training and experience to the problem with the same enthusiasm and evident pleasure with which they have done their largest work.

It is most essential that the architect shall work out complete plans and specifications, not only for the construction but also for the furniture and equipment. Committees have started to build without complete plans and specifications, trusting to luck and the architect, and have had to cease operations until more money was available.

After you have given to the architect all the ideas which the committee would like to see worked into the building, he will in all probability prepare a set of "sketches." Sketches are drawings on white paper of the floor plans and one or two exterior views embodying the combined ideas of the committee and the architect. Frequently sketches result from rough drawings made by the committee itself.

After the architect submits his sketches the committee should examine them thoroly, criticize them in detail, feature by feature. Perhaps the layout and the design do not prove entirely satisfactory the first time. The committee should then confer with the architect and have the sketches drawn and re-drawn until the entire plan and the design are satisfactory. It is essential to give time and thought to the sketches in order to avoid the necessity of changes later when the plans have become more or less fixed.

When the sketches are satisfactory the committee should approve them formally, and give authorization to the architect to proceed with working drawings and specifications.

"Working drawings" are usually made in black ink on "tracing cloth," a sort of waxed, transparent linen. After working drawings are completed the committee looks them over again carefully before the several sets of blue prints are struck off. Working drawings are duplicates of the approved preliminary sketches, except that they are drawn more in detail, all dimensions being plainly marked and many notes added for instructing workmen. An ordinary set of working drawings includes: a basement plan, a first floor plan and the layout of other floors if there are any, and exterior view of each of the sides of the building, and possibly a cross section showing interior details. Frequently one or more sheets of details are included, showing windows and door frames, cornices, pilasters, and similar features. These sheets endeavor to show a drawing covering every portion of the building which the contractor must know about before he can intelligently estimate the cost. Later, after contracts

are let, more details of construction and finish are usually added by the architect for the assistance of the workmen in building.

"Specifications" is merely a detailed set of directions and instructions to the contractor, explaining to him just what kind of building the committee and architect have in mind, and explaining to him just how the building is to be erected. Specifications tell all about the masonry of the building, the carpenter work, the plumbing and heating, painting and glazing, plastering, lighting, furniture, and all other details. The specifications, together with the plans are supposed to cover the entire building so that the contractor can, in the first place, tell in advance precisely what it will cost, and afterwards accurately build it as indicated in the plans and specifications. Study the plans and specifications carefully before any construction is undertaken. In every good set of plans and specifications every item in the building is so clearly indicated that the committee can know just what the result is going to be. Incidentally, the cost of the building can be kept down when plans and specifications are complete and accurate, because a contractor can work out his estimates much more closely.

When the plans, working drawings and specifications have been completed, the committee once again approves them, and files a copy, for future record. The committee then authorizes the architect to advertise for bids and to receive them. The architect may select a number of contractors to whom he furnishes blue prints of the working drawings and a set of the specifications. Each contractor figures on the blue prints and returns them with his bid. On the day and at the hour set the bids are opened and usually the contract awarded to the lowest bidder.

It is a good plan to have all the contractors present, if possible, when the bids are opened, and to read the bid aloud in their hearing. This will save the committee any criticism of secrecy and of unfairness.

Sometimes the contract is not given to the lowest bidder. One contractor may be a little higher and he may be known by reputation to be a more desirable contractor than he who submitted the lowest bid, and in that case the committee may decide to employ the higher bidder. This seems to be fair provided the specifications contain a clause to the effect that "the committee reserves the right to reject any or all bids."

When the contract is awarded, the contractor as well as the architect and the chairman of the committee sign their names on a copy of the working plans and on a copy of the speci-

fications. By virtue of these signatures a contract is legally operative. These pages become valuable documents and should be carefully preserved. This contract is the contractor's promise to do certain work for which the committee agree to pay a specified price. Contracts are usually printed forms, with blank spaces for filling in with typewriting. If you have an architect he will attend to the preparation of such papers. Committees which get on without an architect usually have a lawyer draw up the contract. The American Institute of Architects has determined on a standard form of agreement or contract and other useful forms. You can purchase these and fill in your own specific needs, if necessary.

Briefly, the contract states that the contractor agrees to perform certain labor and furnish certain materials for the library building to be erected, according to the plans and specifications furnished by the architect, and under his supervision. The committee agrees to pay certain sums for said work, provided all labor and material are as set forth in the plans and specifications. The time when payments are due is stated, and further items concerning insurance, progress of the work, quality of workmanship and other similar details.

Look out for extras. It is a good plan to have written into the contract somewhere "no extras honored by the committee unless ordered in writing and signed by the architect." It is easy for a committee man to say to a contractor as the building proceeds: "Make this window larger," "Take out this door and turn the stairs around." The contractor follows instructions and submits his bill for an "extra" when the contract is finished. The ideal way is to have no extras. Get everything into the plans before the building begins. Examine the plans and specifications and make sure that they are just what is wanted. Once the contract is given, make no changes. If changes must be made,

however, make as few as possible and consider the importance of each before it is done. Above all things have any changes ordered taken care of by typewritten letters with the amount of cost entered beyond all dispute. Keep a note book and in it put down the contract price, and then enter every written order for a change or an extra as fast as it is issued, together with the cost if it is known, and the date. Architects usually keep such records, and the committee's building account should check up with the architect's.

These, then, are suggestions which every library building committee ought to consider. Perfect the organization of the committee, determine the needs of the town as far as a library building is concerned, visit and study recently erected buildings which would meet those needs, choose an architect who has a good reputation for library work done, study and work over the plans and specifications until complete, accurate and entirely satisfactory, let the contract to a reputable builder taking into consideration local talent available, and follow up all construction to be sure that it is done in accordance with the plans and specifications. And above all keep in touch with the state library commission, first, last and always. It can help you with the choice of the architect and with the library needs, with plans. For your own ultimate comfort and satisfaction submit all plans and specifications to the commission before any construction is undertaken.

The reading-room of the Harvard (Mass.) Public Library is open to the public all day and every day, with no one in attendance except during library hours, which are from 2 to 6 or 8 five days in the week, and the librarian reports that "tho we have rather an unusual number and variety of periodicals almost never has one been taken." Bulletin.

The Librarian's Reading*

THE reading habit. What is it? What do we mean by the reading habit? The Librarian's reading habit. Surely it does not mean the habit of reading only what we like—fiction, and perhaps travel or essays—it means having an open mind and a willingness to read anything that is put into print. I suppose we may say that the reading habit is a definite and fixed mode of reading. If, however, this definite and fixed mode excludes anything which our public may wish to know about, we are not having the right reading habit for a librarian.

But how may a right reading habit be acquired? It cannot be given to us by others. Miss Plummer tried hard to instill in some of us the desire to read beyond mere inclination, but it was a difficult task, and yet I believe we will agree that Miss Plummer had a greater influence than almost any librarian in the Association. I believe many library employees wait to be prompted by someone higher up—wait for someone to inspire them to read. Yet we know that all habits, and in this instance the reading habit, are the result of action and growth and are consequently the result of our own effort not the effort of others. Others may help, but if we haven't it in us to read, others can do but little for us. We know how little we really help the public; they help themselves. It is just so with others helping us. By-the-way, I often wonder why we are so anxious that others shall read and yet read so little ourselves. We can attain the reading habit only by reading and reading, anything and everything that comes our way. This is not study—I am not talking about study.

Some people say "I read everything." We all know this is false. We know this is often a remark made by those who read only the latest "forbidden" book, damp from the press, or the best seller. What we can do is to read enough *about* what is being published today to be intelligent on the subject, and read *seriously* those books of to-day which keep us alive to present-day conditions, and also read well some of the great literature of former periods. In spite of what I have said regarding our lack of influence on the reading public, I believe the *use* of the great literature is dependent upon the librarian's knowledge of this literature. And, desirable as it is for us to know the new books, let us not neglect the great literature of former times.

Are we becoming limited in our reading interests? Are we willing to read anything and everything? Do we look upon American and English literature as alone fit to read, just because of

tradition? And upon the great Continental literature as unfit, or as a means of coming closer to peoples in strange lands?

I listened to an eastern artist of great experience speak to a group, mostly beginners, a few days ago. He spoke particularly of the artist's background and recommended, with American and English authors, several Continental writers, stating that each book recommended gave the best picture of life in the country concerned. Some of these are books which, because of conditions, we do not put on our shelves, but there is no reason why the librarian should not read books which are not purchased for the library. We may have to limit our purchases, but let us not limit our interest in any and all literature.

For our pleasure we enjoy lingering over the sentences and perhaps re-reading, but if our object is to read much (and that must be our object much of the time) we must master the mechanics of reading. The dislike for the process of reading and of the labor involved, has a reactionary influence. There is no reason why we cannot learn to read with great rapidity. There are other difficulties to be overcome in connection with rapid reading, such as lack of power of concentration, but natural curiosity and love of adventure should make it possible for us to set aside all handicaps to rapid reading.

A talk on a librarian's reading might be endless—it might ever give advice on what to read; but librarians know not only that they should read, but also *what* they should read. Certainly we cannot advise the public if we are unable to select well for ourselves. It is well to make quite sure what is our attitude toward the work we have agreed to do; decide whether we are honest with ourselves, with our board, and with our public; whether we have a proper conception of our jobs, or are more interested in the small details of administration; more concerned about having a place on many city programs, than we are in making our libraries real educational institutions, whether we are to be classed as triflers, or as having a serious attitude toward our work and doing that work in a creditable manner? Our reading will show what we are. But few of us can stand before an audience of the community and prove by our knowledge of the printed material in our charge that we are giving back to the public what we really believe we should give.

Our duty is to read, it is our obligation, and some of us hope that if some form of efficiency rating is introduced into the library world, that ability to read, to read effectively and well, will be the outstanding qualification for librarianship.

EDITH TOBITT, *Librarian.*

Omaha Public Library.

*Talk given at the St. Joseph Regional Meeting of the A. L. A. Abridged.

Following up Serial Publications*

TO the Boston Special Libraries Association:

The following subject was assigned the Committee:

To make a study of methods of checking and keeping track, or "following-up" serial publications: that is, yearbooks, directories, annual or other reports of federal, state and city departments, associations, commissions, etc.

The Committee investigated personally or by letter somewhat over one hundred libraries. These included state, public, college, engineering, financial, society and association, labor, medical, chemical, manufacturing, statistical, publishing and advertising libraries.

The Committee was unable to discover the existence of anything in the nature of an index or time-table to indicate beforehand when reports are to be issued, or of a complete and up-to-date check-list for all, or for any one class of serial publications. Check-lists of state reports

Many librarians reported that they use no "follow-up" methods, simply writing for reports as wanted; others find that they need no special system, since, being members of various associations, they automatically receive by exchange all reports needed. Most librarians check the different periodical indexes, magazine notes, publishers' notices, accessions lists from other libraries, etc., for serial publication notices.

The card follow-up system is in most common use, and is recommended by the library schools. The card form varies in different libraries; it may contain author, title, number of volumes in library, when and how received, price, where noted, name of secretary of association or department publishing report, etc. The Library Bureau has a new card for continuations (L. C. catalog no. 1107, p. 27 of the 1921 edition of Library Supplies) which is

LIBRARY BUREAU DOCUMENT RECORD CARDS FOR ENTRY BY YEAR AND BY NUMBER. SIZE 3" x 5"

order card when the report is received; if the date of publication is changed, the tickler is then changed to correspond.

Four methods of filing cards were noted:

1. Alphabetically by author of report.
2. By date when report was last received.
3. One file alphabetically by author, and a second file by date received.
4. Alphabetically by author, with steel flags or signals to indicate month when report should be received.

The last-named method is most commonly and most successfully used. Samples of the different follow-up methods in use, and of forms for request cards are attached.

The committee found a few other follow-up systems in use. The Stone and Webster Library has recently established a loose leaf record in which the publications are listed in a column with annotations under various headings as will be seen by the following sample of one of the entries.

No.	Title	Latest on file	Rec'd or acc. No.	Look out for	Order of	Next vol. ordered	Remarks
093	Ayer's News-Ay 2 paper ann.	1921	Mr. 25 '21 19665	1 Jan	N. W. Ayer & Sons		Chg. to J O 1012

For U. S. Government Annual Reports, etc., the heading is a little different, as follows:

No.	Department	Latest on file	Date rec'd	Write to	Date request-ed	Remarks
-----	------------	----------------	------------	----------	-----------------	---------

For Public Utility and Railroad Commissions, the heading is still different, as follows:

Recommendation	State	Latest on file	Rec'd & Acc. No.	Write to	Latest vol. re-quested	Remarks
----------------	-------	----------------	------------------	----------	------------------------	---------

RUSSELL SAGE FOUNDATION LIBRARY
130 EAST 22D STREET
NEW YORK, N. Y.

RUSSELL SAGE FOUNDATION LIBRARY
130 EAST 22D STREET
NEW YORK, N. Y.

DEAR SIR:
The following publication would be of great service to this library. May we expect it as a donation from you?

Sir:
We have not yet received Vol. _____, No. _____, current volume,
of _____
Kindly supply at your earliest convenience.
Very truly yours,
F. W. JEROME, Librarian

We should appreciate it if you would add the name of this library to your mailing list to receive regularly such reports and bulletins as are for free distribution. Your cooperation is earnestly requested.

Yours Respectfully,
F. W. JEROME, Librarian

Subscription _____ Vol. _____ No. _____
Date _____"

In case there is necessity for remarks of some length, it is the plan to make record on a sheet following the special list, an asterisk indicating that there is such a note. Record is kept in pencil so that changes may readily be made when new volume comes.

The follow-up method used by The Insurance Library Association consists first, of a loose-leaf form on which all periodical or occasional publications that they desire to secure promptly are entered. These are filed according to a classification scheme as follows:

Annuals, Yearbooks, etc.; Directories; Fire Marshal Reports; Fire Patrol Reports; Foreign Organizations; Insurance Department Reports; Insurance Institutes and Educational Organizations; State Fire Prevention Associations; State Laws; Underwriters Associations; and Miscellaneous.

Tabs at the right-hand side of the sheet indicate the classification. Tabs at the top of the sheet indicate the month when the publication is expected to be issued.

The blank itself provides for the name, address, frequency of publications, date of publication, date to be written for; and underneath in columnar form for year of issue, date stamped showing when written for; date stamped showing when received; and for remarks, where further follow-up has been necessary.

About ninety per cent of the periodical matter is taken care of in this way. About ten per cent requires more specific attention.

When the regular monthly examination of the follow-up as described above, shows a publication not to have been received it is taken up for special consideration, which means letters to the publisher or if they have already been advised that the edition is exhausted, then to every likely source. A considerable percentage of these "hang-overs" are secured in this way. This is a matter of personal attention. No method has been found for positively guaranteeing that occasionally something will not escape. Experience, however, shows that the more diligent personal attention is given to the follow-up of this percentage of difficult cases the more likelihood is there of getting every

The Syracuse University Library School

By ELISABETH G. THORNE, Director

"HAPPY are the people whose annals are blank," says Carlyle. As to whether or not happiness is contingent upon other factors than annals the dour Thomas may be an unsafe guide. Certain it is, however, in the matter of records that those of the Syracuse University Library School during the early years of its history are fragmentary and practically non-existent. To assign to it a date of origin back to the appointment of the then librarian, Henry O. Sibley, as Instructor of Library Economy, is hardly just to the school, the university or the young people under his training, since these were not embryo librarians but students preparing for the ministry or teaching, who received training to catalog their own libraries or to acquire methods of literary research. As these students never recruited the library profession or indeed entered the field, they can only be looked upon as precursors and possibly the inspiration of the later Library School. After the death of Dr. Sibley, his wife, who had been associated with him in the library, carried on the school for some years. The first class for which records are on file at the office of the school was that of 1908, tho there were several classes antedating. This date marked the first class graduating after the occupancy of the new and commodious Carnegie library building, where better quarters were available and a Library School faculty organized, the members of which were graduates of accredited library schools.

In 1908 the Board of Trustees of the University authorized two new full courses in the school, one of two years for college graduates only, leading to the degree of Bachelor of Library Science, and one of four years, a combined academic and technical course leading to the degree of Bachelor of Library Economy, these being in addition to the two year technical certificate course which had been in operation for several years. Because of general low library salaries incident to inadequate financial support the two-year college graduates course could not be made sufficiently attractive to students to induce them to spend six collegiate years in preparation at the salaries at that time obtainable, and this was later abandoned in favor of a one-year college graduates' course. This in turn was dropped at the suggestion and request of the Association of American Library Schools. It was felt that training to fit even a college graduate to enter formally the library field with degree should not be attempted in one year.

In many respects the Syracuse Library School has an ideal location as part of a teaching institution, with easy accessibility to the public, special and school libraries of the city of Syracuse. Students have come from east, west, north and south as to the University at large. The distribution of graduates has been as far as to the Philippine Islands on the west, the coast of Labrador on the north and east, and the Panama Canal Zone on the south.

The trained teachers of the early years of the school were Miss Julia Knowlton of the Albany school, who carried the reference and bibliographical courses; Miss Caroline Wandell of the University of Illinois school, who taught cataloging and classification; and Miss Margaret Emerson, who had been a successful teacher before entering upon library work. Miss Knowlton and Miss Emerson were not long with the school, tho they left a definite impress upon it. They were followed by Miss Elizabeth Smith of the University of Illinois school and Miss Elisabeth G. Thorne of the Albany school. In 1914 Mrs. Sibley severed her connection with the school and Professor Earl E. Sperry of the History Department of the University was made Librarian and Director of the school. In 1920 Miss Thorne was made Assistant Librarian and Acting Director of the school, and in 1922 Librarian and Director.

During the past two years the personnel of the faculty was almost completely changed. Miss Elisabeth G. Thorne was made Director and Miss Stella Tabor Doane of the Drexel Institute and Pittsburgh Carnegie schools and Miss Edna Stowe Stewart of the Drexel school instructors. To these was added later Miss Claribel Calkins, a graduate of Oberlin and the Syracuse school, who has charge of the bibliographical courses. Recently the school lost the valued service of Miss Doane. It is a pleasure to record that Miss Mary E. Robbins of the Albany school, widely known as library school administrator and with a varied and notably successful experience both in the library and library school field, is a notable addition to the faculty.

So much for the history of the school, which has been marked by vitality in that it has survived and developed during a quarter-century. It has sent into the library field each year a small body of earnest young women, eager for service and for the most part under the stern necessity of being rewarded with a livelihood.

Experience has shown us that the average high school graduate needs the degree course. Insufficient foundation for library work can only be a disappointment to the school, to the libraries to which they go and to the students themselves, who have not the educational qualifications to progress, and who are disappointed at their inability to do so. Many, recognizing this, have pursued studies for the degree course in later years. With high standards clearly in view and the desirability of insistence upon them definitely marked, with greater demand for our graduates and improved pecuniary rewards for their service, with a faculty representing wide contacts with other schools and libraries of various types thruout the country, we have confidence that we are emerging from the most difficult days of the school. We attempt to place emphasis on the fundamental things and while these, like the eternal verities, remain for the most part unchanged, there are modifications from year to year, due to the development of library work and the closer co-ordination of the curriculum.

The schedule of outside lectures is made up to balance and vitalize the courses and in some instances to draw the attention of students to interesting phases of library work for which there is no place in an already crowded curriculum. These lectures, as in other schools, are a source of fresh inspiration as well as opening new channels of interest.

In placing students we make a very real effort to keep in mind the needs of the library and of the type of position to be filled as well as the interests of the student, and while we attempt to place our graduates to as good advantage as possible we believe it an injustice to them as well as to the libraries involved, to make recommendations which are of doubtful suitability.

Perhaps the most marked characteristic of the school thru all these years has been the faith that has always pushed forward a program of larger accomplishment. In an institution whose foundations were laid by God-fearing people it may not be amiss in closing this sketch reverently to add "Now faith is the substance of things hoped for, the evidence of things not seen." Thru changing administrations and the lean years during and after the war there have been financial struggles of which endowed institutions and state-granted institutions know little. Chancellor Day in the up-building of a great university watered to the limit of his financial ability, where optimistic directors planted and God gave the increase. Chancellor Charles W. Flint succeeds Chancellor Day this fall as the executive head of Syracuse University. What a new, incoming administration will mean in

advancement and support of the Library School, only the future can determine, but meantime, "Forgetting the things that are behind, we press forward to the high calling of" librarianship, our aim being no less than that formulated by Lord Bacon: "I hold every man a debtor to his profession; from the which as men of course do seek to receive countenance and profit, so ought they of duty to endeavor themselves by way of amends to be a help and ornament thereunto."

Tentative Rules for Cataloging Incunabula

PROPOSED BY THE A. L. A. COMMITTEE ON CATALOGING*

1. Entries for incunabula which have already been adequately described in a catalog or bibliography are to contain the following items:

1) Statement, consisting of author's name, conventional title, and imprint.

2) Collation, consisting of pagination, signatures, folding symbol and size in centimeters.

3) Additional authors, editor, translator.

4) Notes on scope, contents, etc.

5) References to bibliographies giving full description.

6) Notes on copy: former owners, binding, marginal ms. notes, rubrication, details about incompleteness, etc.

NOTES

1) *Statement*: If a book is known by a conventional title, altho this title is not used exactly in the edition in hand, the conventional title is to be used in the heading; in the imprint, use the form of the name of the place as in the book; give as a rule the name of the printer (publisher) in the form adopted by the British Museum, and the date in Arabic numerals; if a book is not dated, give a conjectural date, as near as possible, and always month and day, if known or conjectured; explain all conjectures in a note; use brackets in the statement only for enclosing information as to imprint supplied from sources other than the book.

2) *Collation*: If a book is unpagel, give the foliation rather than the pagination, mentioning incompleteness, viz.: 320 leaves (leaf wanting); when many leaves are wanting give exact number of leaves; 320 leaves (incomplete); in the latter case mention in note (no. 6) the missing leaves.

3) Give *additional authors*, if not in contents note.

* These rules are tentative and the committee invites correspondence with reference to them. Communications should be addressed to the chairman, William W. Bishop, University of Michigan Library, Ann Arbor, Mich.

4) *Note on scope, contents, etc.*: Efforts should be made, by use of reference works, to state the full and real scope of the book in hand; contents should be given in preference to a note.

5) *References to bibliographies*: These should be given in the following order: The one giving the best and fullest description, then Hain (with Copinger and Reichling), British Museum others.

In 4 the special typographical forms used should be reproduced. If any part quoted be in capital letters, use small capitals for contractions, etc., not lower case.

6) Significant variations from copies described to be noted.

EXAMPLES*

PETRUS HISPANUS, *d.* 1277.

Thesaurus pauperum. [Florence, Bartolommeo di Libri, 1495?]

[94] leaves. a-z⁴, &². 4°. Type 92 Qu]. No catchwords. 16½cm.

1a Qui in comincia illibro chiamata thesoro de poueri || compilato et facto per maestro piero spano. [Woodcut.]

93a ends: Finis.

94b ends: alla quartana capitolo lxii a carte lxxx. Woodcut on 1a shows a surgeon's shop. Table of contents 93b.94b.

Perrins (Pollard) p. 93; Hain 8714; Reichling v, p. 144; Proctor 6257.

Modern vellum.

Fol. e¹ and e⁴ are bound between e² and e³.

PLINIUS SECUNDUS, CAIUS, 28-79

Historia naturalis. Venice, Nicolaus Jensen, 1472.

[356] leaves. (leaf [20] blank, wanting.) 2°. Type 113Qu]. Neither signatures nor catchwords. 39½cm.

1a CAVIS PLYNIUS MARCO SVO SALVTEM.

3a CAII PLYNII SECUNDI NATVRALIS HISTORIAE LIBER

.I. || CAVIS PLYNIUS SECVNDVS NOVOCOMENSIS DOMITIANO || SVO SALVTEM. PRAEFATIO.

21a CAII PLYNII SECUNDI NATVRALIS HISTORIAE LIBER

.II. || AN FINITVS sit mundus: & an vnus. ca. i.

355a *Colophon*: CAII PLYNII SECUNDI NATVRALIS HISTORIAE LIBER TRI- II CESIMI-SEPTEMI ET VLTIMI FINIS IMPRESSI VENETIIS || PER NICOLAVM IENSON CALLICVM .M. CCCC. LXXII. || NICOLAO TRONO INCLYTO VENETIARVM DVCE.

Iohannis andreae episcopi aleriansis ad pontificem || summum Paulum secundum uenetum epistola.

356a ends: Instauratu aliquatulu sub romano potifice maximo Paulo secudo ueneto.

The dedication of Johannes Andres [Bussi], bishop of Aleria, to Pope Paul II is copied from the edition of Sweynheym and Pannartz, Rome, 1470.

Contents—Cosmology. Geography. Anthropology. Zoology. Botany. Pharmacology and medicine. Mineralogy.

Morgan, II, 297; Hain-Copinger *13089; Proctor 4087; Yale 11. Full leather from 17th or 18th century.

Leaves 159, 170-209, 3321-328. wanting, replaced by photographic negatives.

The Committee recommends that headings, etc. be quoted (as in the examples) in small capitals in place of upper case.

* Examples from the John Crerar Library's cards.

Library Bindings and the Book Publishers

THE plan of the A. L. A. Committee on Book-binding for presenting to publishers the needs of the libraries regarding physical make-up of books, which was outlined in the LIBRARY JOURNAL for last June, has resulted in the preparation of critical notes on more than two hundred books which are lacking in one way or another in the qualifications necessary for reasonable library service, and representing about forty-five publishers.

The first thing to be accomplished, as indicated in a letter from Frederic G. Melcher, secretary of the National Association of Book Publishers, is to get these comments "into the right place in the publisher's machinery, so that at the time of the next issue of any of these titles or when books of similar character or in similar series are planned, this comment will be there to influence the decisions in the book's make-up."

In pursuance of this purpose, two copies of the critical notes for each of the more than two hundred titles have been sent to Mr. Melcher, who forwards one copy to the publisher interested, if a member of the Association, and files the second copy in his office. A third copy is kept on file by the chairman of the Bookbinding Committee. Notes on other books are in preparation, and will be sent in to Mr. Melcher each month for distribution to the publishers concerned.

Letters requesting publicity of the purpose and progress of the committee's plan were sent to the presidents of a dozen or more State library associations meeting during October and November. Several responses have been received indicating a lively interest in the appeal to the publishers for better book making.

Librarians are asked to co-operate in this work by contributing comments relating to weak points or faulty make-up in any books coming under their observation.

MARY E. WHELOCK,
Chairman A. L. A. Committee on Bookbinding.

Registry for Research Librarians

THE National Research Council, Washington, has established as one of its major departments a general clearing-house for information about the natural sciences and their applications in industry, engineering and education.

Librarians are cordially invited to avail themselves of the aid of this clearing-house in connection with scientific or technical inquiries which they cannot satisfactorily answer with the resources at hand, and of the Information Service which maintains a file of the names of scientifically trained persons with library or

bibliographic experience, or for the names of librarians with training for research in one or another branch of science or technology. Requests received so far have usually pertained to openings for librarians in scientific or industrial establishments or to need for the compilation of bibliographies in scientific and technological subjects.

At present the records of persons qualified for such work are few and incomplete, and readers of the *LIBRARY JOURNAL* who meet the scientific requirements for entry in the personnel file of Research Information Service are invited to supply their records. The Research Information Service does not maintain an employment bureau but it does furnish on request lists of persons seemingly qualified for specific tasks or appointments. There is no charge for registration in the file. Service is rendered solely for the promotion of research and its industrial applications.

Librarians desiring more explicit information concerning Research Information Service or reply to specific requests should address Information Service, National Research Council, Washington, D. C.

New Fiction in Libraries

IN a discussion at the Newark Free Public Library of the *pros* and *cons* of new fiction service in public libraries, a suggestion was made that it would be interesting to watch the result of a process by which the present purchases of new fiction in large quantities for Seven Day and Duplicate Collection circulation should be slowly discontinued until the novels on hand should be reduced to perhaps six hundred and fifty standard titles, freely duplicated in good make up, with yearly accretions of not more than five to ten titles bought only after six or twelve months' testing. The questions were raised as to whether any other library or libraries had yet done this and if so what had been the experience.

If any reader of the *LIBRARY JOURNAL* knows of such a library, the Newark Free Public Library (John Cotton Dana, librarian), would be glad to hear of it. The question, it should be remembered, does not concern libraries that have never bought, or libraries that have always bought, fiction fresh from the press, but refers to an institution which has stopped such purchasing in full flood and gradually reduced its material to standards only.

Trustees of the American Library in Paris, Inc., have been appointed as follows: Walter V. R. Berry, Charles Cestre, L. V. Benet, Charles L. Seeger, William Morton Follerton.

Annual Reports

THEIR WHY AND WHAT

OTHER libraries than the New York libraries for which they are intended may find the "why" and "what" of library reports clarified by the list of reasons for these reports in *New York Libraries* for August.

Every corporation created by the State for a specific purpose is required by law to make such reports, showing that its operations are in the sphere of its constituted powers and rights. Then again, libraries are given many special privileges and advantages by the State not granted to other corporations. Next, the legislature of a state needs the fullest data possible as to library conditions and library needs of the state, to enable it to take intelligent action in making new laws, modifying old ones, and in making appropriations for carrying out its various policies. And this information is as much the right and due of the people of the State as of the legislature which represents them. Finally, it is to promote good business methods and efficiency in the libraries themselves that the annual reports are designed. "A public library is a corporation demanding every day that the public invest its money in it. . . . It is simple impertinence for a library to ask money for its support, either from an individual, a community or the State, without being able to show that the money it has had has yielded proper results."

What should be included in these reports? ". . . Every item by which a library's success or efficiency is to be measured or every item whereby comparison can be made with proper standards established by the State or the general profession."

—AND HOW

SOME REFLECTIONS, PERTINENT AND IMPERTINENT, FOLLOWING THE READING OF SOME LIBRARY REPORTS

Annual reports should be like Ginger Ale—

GOOD TO LOOK UPON

CLEAR as AMBER

Have a little FROTH

A goodly amount of SPARKLE

A lot of hidden SNAP

Be—

REFRESHING

Read with ANTICIPATION

Leave with the reader a feeling of—

SATISFACTION

PLEASANT MEMORIES

A tingling sense of ABILITY to ACHIEVE

N. B. The long suffering or indifferent public would appreciate this kind, and the investment pay dividends.

JESSIE M. WOODFORD.

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 1, 1922

CZECHOSLOVAKIA has made good in surprising degree within the past two years on the ambitious and comprehensive plans of library progress recorded then in the LIBRARY JOURNAL. The Library School has had more than a score of students each of its first two years and enters on its third year with bright prospects of usefulness. The historic libraries earlier existing have been complemented by smaller libraries in every division corresponding to our counties and towns, a provision the more remarkable because, as a bi-lingual country, the new republic has had to provide libraries for the German minority as well as for the dominant race. Altogether, more than 3000 libraries are now recorded, reaching close to an aggregate of 2,000,000 volumes—an average of over 600 volumes each. The smaller Czech libraries are probably developments of the Sokol (eagle) patriotic organizations, somewhat like the German Turnverein which kept the Czech classics alive during the Austrian domination. The Bibliographical Institute has been publishing monthly bulletins, and great progress has been made in Czechoslovak bibliography, while library conferences have been held which cover pretty nearly the whole field of library administration. Czechoslovakia has benefited by the American spirit which President Masaryk and his associates have infused into it, and is certainly leading all the other new states produced by the war in this important field of education.

★ ★ ★ ★ ★ ★ ★

THE new senator from Michigan, ex-Governor Ferris, schoolmaster by profession, tho not a librarian, is noteworthy as a library exhibit. Mentally starved as a boy thru poor schooling up "York State," he chanced upon Franklin's "Autobiography," and this moral tonic inspired him to the lifework which has built up the Ferris Institute at Big Rapids, Mich.—one of the most remarkable of educational institutions—and now makes him a prominent figure in national politics. His education has been kept up to date by his actual realization for years past of the present slogan "Read a Book a Week" and his private library is said to be one of the best working libraries to be found in his state. His career illustrates the power of the book—of one book—at the critical period of

a youth's career, and offers encouragement to librarians who should make sure that the youths of the community have such inspirational books made part of their equipment for life.

★ ★ ★ ★ ★ ★ ★

ANOTHER and supreme illustration of the power of the book is set forth by H. G. Wells in his new "Short History of the World" in the remarkable chapters on the early history of the Jews. "Their importance to the world," he writes, "is due to the fact that they produced a written literature . . . which became at last what Christians know as the Old Testament, the Hebrew Bible. . . . It is not so much the Jews who made the Bible as the Bible which made the Jews. Running thru this Bible were certain ideas, different from the ideas of the people about them, very stimulating and astounding ideas, to which they were destined to cling thru five and twenty centuries of hardship, adventure and oppression." It is interesting to compare this great generalization with the library experience of today of the devotion of the Jews to written literature, that is, to reading. No class of people show more active and intelligent use of library facilities than our Jewish citizens of today, as is illustrated by the fact that in the Jewish quarter of Brooklyn, for instance, it has been necessary to provide two Carnegie libraries, one for adults and one for children, both of which are crowded to capacity, while the libraries on the east side of New York find the great body of their clientele among the people of the race which alone has for these twenty-five centuries kept its distinctive life as an abiding people.

★ ★ ★ ★ ★ ★ ★

SHOULD the librarian be a member of his board of trustees? No. Should he be present at board meetings? Yes. These are the evident answers to questions which are often put by younger librarians to those of more experience at library conferences. The librarian is at the service of the trustees in carrying out policies which they, as finally responsible, determine. They should, however, have his professional experience and advice at their constant command, and he should in turn be fully acquainted with their views and the processes by which they reach results. Moreover, it should be up to the librarian to make the minutes or records of the board for its secre-

tary, if the librarian himself is not secretary of the board, as may properly be the case. Of course, there are questions, particularly those respecting the librarian himself, which the board may wish to consider apart from his presence, but this can always be managed by polite adjournment to executive session, which is also politic where the board admits newspaper reporters in attendance at its sessions. This latter is the natural and proper course in library

boards of a public character, altho it has the chronic disadvantage that, in the endeavor to "feature" strikingly, the reporter will throw aside perspective and make more of a difference in the board than of important decisions of policy. For this reason differences of opinion should usually be thrashed out in executive session, except on a subject where the pros and cons are matters of public interest.

LIBRARY ORGANIZATIONS

BAY PATH LIBRARY CLUB

THE autumn meeting of the Bay Path Library Club was held at the Leicester (Mass.) Public Library on Thursday, October 26. An attendance of seventy heard addresses on "Library Work in Japan" by Hano Kato, now associated with the Quincy Library, and on "World Events" by Rev. Robert MacDonald of Plymouth Church, Worcester. E. Louise Jones of the Division of Public Libraries, State Department of Education, conducted a round table on topics of general interest. The club's officers are: President, Emily M. Haynes, Worcester Polytechnic Institute; vice-presidents, Ella C. Miersch, Jacob Edwards Library, Southbridge, and Albert W. Hinds, West Boylston; and secretary, Helen P. Shackley, Merriam Public Library, West Brookfield.

NEW YORK LIBRARY CLUB

THE November meeting of the New York Library Club was again held at the Central Y. W. C. A., on Thursday, November 16th. Dr. Merle St. Croix Wright, writer and lecturer, described in detail his methods for extracting the essentials from the books he uses in gathering material for his lectures. He has found colored and graduated slips and a simple system of shorthand useful in these researches. Dr. Wright paid tribute to the public library as a refuge for the general reader in an era of high prices.

The Club was diverted by an amusing chapter from Edmund Lester Pearson's forthcoming book about books, to be entitled "Books in Black or Red," which was read by the author. Mr. Pearson limited the subject of his topic, "The Search for Curious Books," to books that are curious in the general sense, not "Curious," a term which has come to signify pornography when found in booksellers' catalogs. After a few remarks on the psychology of the peculiar folk who will not carry a book on

the street unless it is wrapped, he read passages describing and commenting on slang dictionaries, Victorian Keepsakes and books of etiquette, the Chinese Biographical Dictionary, and the diverse sports of Englishmen as recorded in *Who's Who*.

PENNSYLVANIA LIBRARY CLUB

THE first meeting of the Pennsylvania Library Club for the season of 1922-1923 was held at the Drexel Institute, Philadelphia, November 14. The Club met at the invitation of Mrs. Anne Wallace Howland, Director of the School of Library Science of Drexel Institute. The members of the Library school class assisted Mrs. Howland in receiving the guests.

Mrs. Howland gave an address on "The Reorganization and Purpose of the School of Library Science." Mrs. Howland gave a brief outline of the history of the former library school under Alice B. Kroeger, June R. Donnelly and Corinne Bacon, under whose administrations the school enjoyed a deserved reputation for efficiency and technical integrity, and the discontinuance of the school in June, 1914, was a great loss to the library profession. By an act of the Board of Trustees of Drexel Institute last June, President Matheson was authorized to announce the reorganization of the Library school as a department of Drexel Institute, and the school was reopened on September 25 with a class of 16. During the period of inactivity of the Drexel Library School, Mrs. Howland said, the graduates have steadily risen in importance in the profession. Many have contributed to literature and bibliography. They have held reunions and have kept alive the spirit of the former school. It was these graduates who convinced Dr. Matheson that there was a demand for a new library school in Philadelphia. The new school is being organized according to the standards of the Associa-

tion of American Library Schools, and the entrance and graduating requirements are similar to those of other accredited schools. The library will be developed along the needs of the four departments of Drexel Institute and will be brought up to modern college requirements as a laboratory for the library school and for reference work. Now that educational requirements for entrance into library work have become higher the day is not far distant when applications for entrance to the accredited schools from college graduates will be in sufficient numbers to allow of that natural selection of personal fitness, which is after all, the greatest contribution the library schools have rendered the library profession.

Thomas Lynch Montgomery, librarian of the Pennsylvania Historical Society, said that with Mrs. Howland as director, the new school was being inaugurated under splendid auspices, and that he wanted to assure Mrs. Howland of his enthusiastic support. John Ashhurst, librarian of the Free Library of Philadelphia, then said that no institution in Philadelphia was more indebted to the Drexel Library School than was the Free Library, and that he was delighted personally and officially to see the Drexel Library School reopened. Frank P. Hill, librarian of the Brooklyn Public Library, said that the school was to be congratulated in having its rejuvenation under the able administration of Mrs. Howland, and that the work accomplished between June and the opening of the school in September was a marvelous record.

One hundred and twenty-five were present at the school's house-warming.

MARTHA LEE COPLIN, *Secretary*.

SPECIAL LIBRARIES COUNCIL OF PHILADELPHIA AND VICINITY

THE regular meeting of the Council was postponed a week in order that the Chairman and Secretary might attend the meeting of the Pennsylvania Library Association at Altoona. A report of the round table of special librarians attending that meeting was given to the Council.

The rest of the evening was devoted to a consideration of the proposal of the President of the Special Libraries Association that the local associations be affiliated more closely with the national association.

It was the consensus of opinion that the matter could not be satisfactorily considered until the new constitution of the S. L. A., giving the exact terms of affiliation, was submitted. In a general way, however, the meeting expressed the desirability of co-operating with the S. L. A., and strengthening its work, but felt the terms should be arranged in such a way that the local associations did not lose the ability to fit

their work and requirements to local conditions. It was felt that to cripple local associations in doing necessary work, or meeting a peculiar situation, would hurt the local body, and thru it, the national association. The meeting expressed the wish to know the character of the clearing house which the S. L. A. hopes to conduct, and the manner in which it hopes to carry on the technical work of the Association.

Since the meeting Friday night, the Periodical Committee has reported that the cards for the Union Catalog are beginning to come in.

HELEN M. RANKIN, *Secretary*.

OHIO LIBRARY ASSOCIATION

THE Ohio Library Association met at Van Wert October 24 to 27. In view of the new county library law recently passed, it was particularly appropriate to have the meeting in the town which boasts of having organized one of the first county libraries in the United States.

For the County Library section at the last afternoon session, when Mary R. Cochran of Cleveland told of "Efforts to Secure a County Library in Cuyahoga County" and Corinne Metz talked on "Organizing a County Library." In a series of eight-minute talks Victoria Bronson, Maumee, outlined county library work in Lucas County; Dorothy Keefe of Sandusky that of Erie County; Marianne Yager, Paulding County; N. D. C. Hodges, Hamilton County; and Mary Hardy, Van Wert County. At the open session Leleta I. Dawson, Wayne County librarian, Detroit, gave an address on "Experiences of a County Librarian." At the same session Emma M. Boyer told "What the Library Has That the Business Man Needs." Mary H. Clark, librarian of the Cleveland Municipal Reference Library considered "Public Library Service for Local Officials" at the meeting of the City and Industrial section, over which Linda A. Eastman presided.

Discussion on work with schools began at the first afternoon session, when Vernon M. Riegel, State superintendent of public instruction and chairman of the State Library Commission, gave an address on "School and Library in Ohio." The Library and School Section, of which Ethel Wright of Toledo was chairman, listened to five-minute talks by State Librarian Herbert S. Hirshberg, Annie S. Cutter of Cleveland and Margaret Dunbar of the Kent State Normal School. Relations between school and library in various Ohio communities were described by Howard Sohn of Canton, Miss Sheffield of Napoleon, Miss Lord of Toledo, Miss Tarr of Youngstown, and Miss Schaub of Columbus. Miss Wood told of the Cincinnati plan of school stations and classroom libraries. "Plans of Work" was the subject of an address by

Catherine Nichol, state children's librarian, at one of the open sessions. "Effective High School Work With Simple Equipment" in the small library was outlined by Ella Swartout of Masillon at the meeting of the Small Libraries section. At this section Alice S. Tyler, director of Western Reserve Library School, took up the question, "Can Small Libraries Be Departmentalized?" Periodicals for the small college were discussed by Jessie J. Smith, librarian of Hiram College, at the meeting of the College and Reference Section of which R. E. Stauffer of Alliance was chairman.

George B. Utley, president of the A. L. A., was present to address the association at the opening session. Among other addresses of general interest were a talk on "Impressions of Foreign Libraries" by the librarian of Adelbert College, George F. Strong; "The Merit of a Book," by Jessie Van Cleve, publications assistant on the *Booklist*; and "The Job Ahead," by State Librarian Hirshberg. The Association passed a resolution of confidence in Mr. Hirshberg. Another resolution urged Congress to make adequate appropriations for the Library of Congress.

Van Wert is the home of the retiring president, Ernest I. Antrim who personally welcomed the visitors. A musical program Wednesday evening at the Y. M. C. A. was a pleasant feature, interspersed with talks by Azariah S. Root, Lucy Keeler of Fremont and Mrs. Antrim. At the Strand Theater on the last evening Dr. Nevin O. Winter, author-lecturer, made an address, "Seeing Yellow," following which a pageant "And a Little Child Shall Lead Them" was produced under the direction of the author, May K. Cowles, director of week-day religious instruction in the Van Wert public schools.

At the meeting of the Trustees' Section Carl Vitz, Toledo, described "The Ideal Librarian," and J. M. Ormond, trustee of the Lucas County Library Maumee, rejoined with "The Ideal Trustee."

The officers elected for the next year are: President, Elizabeth S. Lorain; vice-presidents, Edna M. Wales, Masillon, R. E. Stauffer, Alliance, Miss Shuler, Miamisburg; secretary, Lillie Wulfekoetter, Cincinnati; and treasurer, G. O. Ward, Cleveland.

NORTHWEST OHIO TEACHERS' ASSOCIATION LIBRARY ROUND TABLE

THE first library round table in connection with the Northwest Ohio Teachers' Association meeting was held in Toledo on October 27. A joint session of librarians and English Teachers followed a luncheon and reception at the City Building of the Women's Club. At the invitation of the English Teachers' Round Table,

Martha Pritchard of Detroit presented the subject "Why have a school library," and Herbert Hirshberg told of the service the State Library could extend to schools.

A small but enthusiastic group of those particularly interested in school library problems then visited the library of Scott High School of which Ada Ritchie is librarian. Here Mrs. Linton, of Cass Technical High School Library spoke on instruction in the use of books and libraries. The group next visited Waite High School Library where questions were answered by Mrs. Linton, Miss King of Central High School of Jackson, Mich., and the Toledo High School librarians and where Miss Brown, librarian, acted as hostess at a tea given for those interested in school library problems.

MARIE AMNA NEWBERRY, *Chairman.*

MICHIGAN LIBRARY ASSOCIATION

THE register showed an enrollment of one hundred and sixty-nine members present at the thirty-second annual meeting of the Michigan Library Association, held in Flint Oct. 24th and 25th. There were three important matters introduced for consideration at the opening session Tuesday afternoon, namely, school and county libraries and the penal fines, certification of librarians, and the report of the committee on legislation.

As provided in the constitution, school libraries and those public libraries which function as school libraries receive the penal fines as part of their appropriation for books. During a general discussion the fact was brought out that neither their distribution nor expenditure was satisfactory. According to the present system, fines collected in a given county remain in that county; consequently, those wherein large cities are located receive large sums, while the sparsely settled districts receive only very small amounts. In many instances it has been found that the funds were being misappropriated or spent unwisely, not thru dishonesty but thru ignorance. It was suggested that librarians inform themselves of existing conditions in their respective counties and try to correct if possible any errors found.

Certification for Michigan librarians was introduced by Katheryne G. Sleneau of MacGregor, who outlined the Wisconsin certification law, and the tentative plan suggested by the Committee on National Certification and Training of the A. L. A. It may be several years before national certification is well launched, but it is a goal toward which to work. Since some States have already adopted the plan and others are about to do so, it was the sentiment of those present that Michigan librarians should give the matter careful considera-

tion, and the president appointed a committee of three to make further investigation and report at the next meeting.

The Committee on Legislation, of which Mr. Ranck is chairman, recommended three bills for presentation at the next legislature, namely, the librarian's retirement fund bill, another for the promotion of county library service, and a third providing for the acceptance of properly certified copies of manuscripts, books, etc., in libraries as evidence in the courts of the State. In regard to some provision for carrying on the library promotion work formerly done by the State Library Commission, which was abolished at the last legislature, the committee recommended this work be placed for the present under the supervision of the State Library, and every effort be made to secure legislation for its adequate financial support.

The outstanding feature of the evening session was a talk on "The State's Opportunities for Service Thru Libraries," by Mr. M. L. Dudgeon of the Milwaukee Public Library, whose central thought was expressed in his statement that libraries are educational institutions and as such should receive State support and supervision. Large sums of money are appropriated every year for schools, colleges and universities, which benefit not more than one-fourth the population. Libraries are more universal in their appeal, more democratic in their tendencies, and are, therefore, entitled to State aid as well as schools and universities. Mr. John T. Frederick of the University of Pittsburgh and editor of the *Midland*, gave a delightful talk on the "Literary Progress of the Middle West," after which an informal reception was held.

Wednesday's session opened with a talk on "Tricks of the Trade," by Mr. Wheeler of Muskegon, who enumerated various methods of displaying books for the purpose of increasing their circulation. Miss Ronan, in a brief talk on "Red Tape vs. Human Vagaries," defined red tape as the routine process which stands between the librarian and the patron, and emphasized that the librarian's first consideration should be service with the least possible friction. Miss Beglinger, who spoke briefly on "The Education of the Foreigner," earnestly requested the co-operation of the Michigan Library Association in this phase of educational work. Miss Walton conducted a book experience meeting which was both interesting and practical. Ralf P. Emerson of Jackson spoke on "World History, Wells, Van Loon and Robinson"; Frances Frederick of Detroit on "Van Loon, Who Reads Him and Why"; Mr. Brown of Highland Park High School on "Delight vs. Requirement";

Constance Bement of Port Huron on "Best Sellers and Books Most in Demand"; Anne Wiggins of Flint on "A Teacher's Viewpoint"; Miss Falkingham of Benton Harbor on "Recent Books in My Library"; and Margaret Smith of Michigan University Library on "Reading of College Students."

During a short business session the Association endorsed three resolutions adopted by the A. L. A.; one, the dollar per capita revenue; another the supervision of school libraries, and the third the project for the restoration of the library of the University of Louvain. The Association also passed a resolution endorsing any bill, now before or likely to come before Congress, which may improve the situation with respect to salaries at the National Library, and permit that institution to continue the important service which it is rendering in the co-operative cataloging movement of this country.

Officers elected are: President, Constance Bement, Port Huron; vice-presidents, Harold L. Wheeler of Muskegon and Edith Thomas of Ann Arbor; secretary, Charlotte M. Jackson, State Library, Lansing; treasurer, Helena LeFevre, Spies Public Library, Menominee.

CHARLOTTE M. JACKSON, *Secretary*.

IOWA LIBRARY ASSOCIATION

THE thirty-second annual meeting of the Iowa Library Association was held at Cedar Rapids October 23rd to 25th.

To the address of welcome given by Luther A. Brewer, president of the Cedar Rapids Library Board, response was by Mary E. McCoy of Indianola. After the reports of the officers and of the Secretary of the Iowa Library Commission, Mrs. Cora Wilson Stewart of Kentucky spoke on campaigning against illiteracy. The figures which she gave concerning illiteracy in the United States and in Iowa and her account of the work that was being done in teaching adult illiterates to read and write inspired all present with a desire to assist in this work.

The evening program consisted of an address and readings on recent poetry by Professor Edwin Ford Piper of the State University of Iowa. Mr. Piper spoke of the different messages of the various poets, one attempting to interpret beauty, another present day conditions, and another mid-West life, etc. He read from a number of poets writing on the latter subject, among them his own poems. The address was followed by a social hour, the librarians of Cedar Rapids being hostesses.

On Tuesday morning the business meeting was held, the principal subject of discussion being a change in the membership dues to a sliding scale for library membership in cities

of different sizes, with a flat rate for individuals. As some doubt was expressed as to the legality of a library board using its tax funds for this purpose the subject was referred back to the committee for investigation.

The president's address, omitted at the opening session, was given here, followed by an address on county libraries by J. G. Mitchell, attorney for the Iowa Farm Bureau, who made no attempt to cover the mechanics of the subject, devoting his time to the spiritual side, so to speak, and the difficulties which the librarians will meet in the present unrest, the movies, etc.

The afternoon was devoted to round tables at which the problems of the different groups were discussed. These were followed by an address by Dr. Herbert Martin of Drake University, Des Moines, on "The Child Mind." In the evening three one-act plays presented by the Coe College Players, were not only entertaining but showed the librarians what might be done in the way of "little theater" entertainments.

At the closing session on Wednesday morning Irving B. Richman of Muscatine spoke inspiringly on "The Newer Treatment of History," naming as examples "The Outline of History" by H. G. Wells, Van Loon's "Story of Mankind" and "The Chronicles of America." Book talks followed, fiction being treated by Mary Egan of Clinton and Lydia Barrette of Mason City, and Juveniles by Linn Jones of Des Moines. Under Travel and Biography Edna Giesler of Des Moines spoke briefly of "The Dingbat of Arcady," Grace Murphy of Davenport on "Tramping With a Poet in the Rockies," Mae C. Anders of Des Moines on the "Chronicles of Chicora Wood" by Pringle, and Grace D. Rose on "Here, There and Everywhere" by Hamilton. Lists covering the different groups of books were circulated.

In order to promote sociability, Julia A. Robinson proposed a slogan for the meeting in the game "Who'll Speak First," offering a prize to the person who should speak to the largest number of strangers. Much curiosity was expressed as to how this was to be determined, but all present felt that the award of a beautiful bouquet to Miss Hagey and the staff of the Cedar Rapids Library was well made.

Wednesday afternoon was devoted to an automobile ride, a visit to the Quaker Oats establishment and the Masonic Library and a tea given by the staff of the Cedar Rapids Library.

The attendance was not as large as at some meetings, due primarily to the location of the meeting place.

The officers for the coming year are: President, Grace Shellenberger of Davenport; vice-presidents, Mrs. H. W. Spaulding of Grinnell

and E. Joanna Hagey of Cedar Rapids; secretary, Ruth Gibbons of Cherokee, and treasurer, Mae C. Anders of Des Moines.

SOUTH DAKOTA LIBRARY ASSOCIATION

THE sixteenth annual meeting of the South Dakota Library Association was opened by the president, Alberta Caille, of the Sioux Falls Public Library, October 12, at the Yankton City Library. Thirty-four librarians and several visitors were present.

Leora Lewis, of the State Library Commission, reported for the Booklist Committee. The \$15 voted by the Association had been supplemented by \$15 from the Commission, and 31,000 booklists were printed and distributed. The new list covers sixteen books. The booklist for next year will be issued early in the fall.

Ella Laurson of the Mitchell Public Library, chairman of the Board of Certification, reported that since the last meeting a life certificate has been granted to Sarah Lawson of Madison. The Board has had printed application blanks and certificates of the several grades, and all South Dakota librarians are urged to apply for certificates. The board recommended the following changes in rules for certification, which the Association approved: (1) That an executive committee consisting of the president and secretary of the certification board and one other member (the one most easily available) be provided for, such committee being empowered to transact all necessary business during the interim between regular board meetings. Whenever possible the board should transact its business at the regular meeting. (2) That to section 3 of the provision for the granting of a life certificate the following be added: In the case of librarians who have had one year in library school, but who cannot meet the college requirement, thesis only shall be required.

Two certificates for five and three years, respectively, were granted at a meeting of the Certification Board at this conference.

Reporting on the work of the first library institute, Miss Lewis said that there were sixteen librarians in attendance, fourteen from outside of Yankton, and not a single member had missed a lecture. Students at the institute who were present spoke words of hearty appreciation of the value of the work done in the institute and wished it might be arranged to last more than three days. Doane Robinson suggested that a longer term for the institute might be possible if enough librarians desired it, and it was voted that the institute be continued next year.

The evening meeting in the rooms of the Chamber of Commerce was opened by President

H. K. Warren of Yankton College, who voiced the welcome of the community. Della M. Haft of the State School of Mines at Rapid City gave the response. The president then introduced the speaker of the evening, Willis H. Kerr, librarian of the State Normal School at Emporia, Kan., who gave an inspiring address on "Our Library Heritage,"—the time, the people, the books, and library ideals.

Kathryn Evans, who was to have told about library work in Tripp County on Friday morning, was unable to be present, but had sent her notes to Miss Lewis, who used them and added her own comment about the very successful work done in this new county library. The Association then divided into two groups, librarians of public libraries and librarians of school and college libraries, to discuss informally the special problems of each group. There were ten in the school and college group. Esther Wendell of the N. M. I. S. started the discussion on interesting students in general literature. Among the points brought out were: Notes in the school paper each week, getting the teachers to recommend books in their class work, a mimeographed list of new books each week sent to faculty members and posted, and arranging the books on the shelves to look as if they were used—with gaps in the line.

The topic of library and school events was led by Ella McIntire of Huron College, and was followed by a general discussion of plans for securing and the use and loaning of debating material. Frances Warner of Dakota Wesleyan College led the talk on instruction to students in the use of the library. Most of the school librarians give lectures on the library to freshmen. Sometimes the freshmen write themes after these lectures, which the English teachers or the librarian mark. Some give "Seeing the Library" excursions at the beginning of the year.

At the same time the public librarians discussed the following topics: Children's Book Week, led by Marjorie Smith of Rapid City; short cuts in library routine, led by Ethel E. Else of Watertown; standard library equipment, led by Abigail Lyon of Brookings; and reserves, with Mrs. E. Jacobson of Pierre as leader.

At the close of a luncheon served at the high school by girls of the Domestic Science class, cars sent by the Commercial Club were ready to take the visitors for a trip about the city and its environs. At each place of special interest Joseph Mills Hanson, novelist and historian, described the historical facts in relation thereto. This travelog took the place of the address expected from Mr. Hanson. The rest of the afternoon program consisted of an illustrated talk on story telling by Grace Miner Hammond.

Upon invitation of the faculty of Yankton College members of the Association were entertained at dinner at the college, followed by a charming program given by college students. A visit was later made to the old Bartlett Tripp mansion, now owned by the college, and used partly for the housing of the art collection.

The new officers are: President, Ethel C. Jacobsen, Pierre Public Library; vice-president, Marjorie Smith, Rapid City Public Library; secretary-treasurer, Maud R. Carter, Spearfish Normal School; member of board of certification for three years, Ethel E. Else, Watertown Public Library.

MAUD R. CARTER, *Secretary*.

NEBRASKA LIBRARY ASSOCIATION

THE Nebraska Library Association held its twenty-eighth annual meeting October 17-19, in St. Joseph, Mo., in connection with the Missouri Valley Regional conference of the American Library Association. Nebraska was well represented by fifty-three librarians. At the business meeting recruiting for librarianship was discussed and referred to the incoming president for action; as were also the topics; "What is a Reasonable Income for Your Library" and "Is Your Library Organized for Education?" Invitations were extended to the Association, by Beatrice, and Omaha for next years meeting.

The officers elected were: President, Lulu Horne, Lincoln; vice-president, Mary C. McQuaid, Fairbury; Secretary Ethel Langdon, University Place.

EDNA J. WOLFF, *Secretary*.

TEXAS LIBRARY ASSOCIATION AND SOUTHWESTERN LIBRARY ASSOCIATION

THE eighteenth annual meeting of the Texas Library Association was held in Austin, October 25, 26, 27, in the capitol building, with Miss Dorothy Amann, librarian of the Southern Methodist University, Dallas presiding. According to the eighty or more librarians present, it was the most worthwhile meeting of many years.

It was a departure from the usual custom to have the meeting last three days instead of two, but the important matters handled and the thoroughness with which the program was planned and carried out proved the change warranted.

The formation of the Southwestern Library Association "to promote library service in the Southwestern States and Old Mexico" was probably the most notable accomplishment. Representatives were present from the various Southwestern States and Mexico, and on Thursday afternoon, October 26, the Southwestern Library Association was formed, with Texas, Oklahoma, Arkansas, Louisiana, and Old Mexico as members.

Officers elected were: President, Elizabeth West, State Librarian, Austin; Dorothy Amann, librarian, Southern Methodist University, Dallas, vice-president for Texas; Mrs. Cora Case Porter, librarian, Carnegie Library, Enid, vice-president for Oklahoma; Mrs. Ethel B. Kellar, public library, Fort Smith, vice-president for Arkansas; Virginia Fairfax, Standard School of Filing, New Orleans, vice-president for Louisiana; Senor Torres Bodet, Chief of the Department of Libraries, City of Mexico, vice-president for Mexico; E. W. Winkler, reference librarian, University of Texas, Austin, secretary; Lillian Gunter, librarian, Cooke County Library, Gainesville, Texas, treasurer. The States of New Mexico and Arizona did not have representatives present.

As the constitution and by-laws of the Southwestern Library Association provided for biennial meetings, alternating with the meetings of this group of State associations, the constitution and by-laws of the Texas Library Association were revised to meet this condition, and biennial meetings were provided for. The time and meeting place for 1923 was left to the executive board to be arranged, the Texas Library Association proposing to meet, if possible, in the same city as the Southwestern—either immediately following or immediately preceding that meeting.

Three standing committees were created—Legislative, Publicity and Membership.

The Texas Library Association went on record as endorsing the movement of the National Federation of Musical Clubs to procure for the music section of libraries a proper proportion of the library budget. The Association also endorsed the American Library Association's resolutions on the dollar per capita tax, and those on standards for school libraries.

The conditions in high school and junior college libraries in Texas having been investigated by a committee, and their standards, needs and handicaps having been discussed in the Schools Library Section, the Texas Library Association adopted a resolution recommending to the legislative committee that libraries be inspected by a librarian, and not by a teacher.

A report of library conditions in the penal and eleemosynary institutions of Texas also showed the need for action. The president was authorized to conduct investigation of conditions in other States and proceed to procure legislation to better conditions.

The first meeting, Wednesday morning, was divided between business and the program, but aside from that there were three meetings devoted entirely to the reading of papers and the discussion of library problems. "Contemporary Worthwhile Books" was the subject Wednesday

morning; "How Can Different Libraries Existing in the Same Community Supplement the Work of the Other," Wednesday afternoon; "Special Libraries," Thursday morning, and section meetings of the Public Libraries and Schools Libraries on Friday morning.

The program on special libraries proved very interesting to a large number to whom the library of the newspaper, the theological seminary, the bank, the State penal and eleemosynary institutions, the medical school, and the civic federation were little known.

For the first time in the history of the Association section meetings were held. All the school librarians met together to discuss the standards for high schools and junior colleges, as to books, equipment of library, librarian, etc., and their inspection by a qualified librarian; the student assistant problem; the relation that should exist between faculty and librarian, and the work of the reference librarian. In the Public Libraries Section meeting lively discussion was aroused on keeping the library out of politics, raising the appropriation, theft of books, budget, etc. Louise Franklin of the Houston Public Library read an especially interesting paper on "The Problem of the Foreign Born, Negro, Etc."

At the first evening meeting, which was held in the Driskill Hotel ballroom, October 25, the Association had the pleasure of hearing two good addresses. Professor John H. McGinnis of the English department of Southern Methodist University, Dallas, spoke on the "Library as an Educational Force," emphasizing the opportunity of the library in the educational scheme. Dr. W. M. W. Splawn of the Economic department of Texas University, emphasized more especially the sociological phase. Music for the evening was furnished by the members of the music faculty of the University of Texas.

On Thursday evening the members of the Association were the guests of the local librarians at a Rosa Ponselle concert, and on Friday afternoon for an automobile drive around the city.

An Illinois Library School dinner was an especial feature. Fourteen former students were present, and Wednesday evening they got together at a dinner in the Driskill Hotel. Miss Dorothy Amann, president, was the honor guest.

Officers for the coming year are: President, Elva L. Bascom, University of Texas School of Library Science, Austin; vice-presidents, Ethel Simmons, librarian, Waco Public Library, and Mrs. Edward S. Carter, Gates Memorial Library, Port Arthur; secretary, LeNoir Dimmitt, Extension Librarian, University of Texas, Austin; treasurer, W. N. Daniells.

ERMINE STONE, *Secretary pro tem.*

IN THE LIBRARY WORLD

MASSACHUSETTS

Boston. Two courses of lectures on the history of American literature are offered to library assistants by the Division of University Extension of the Massachusetts Department of Education. The lectures will be given, as last year, by Professor Robert E. Rogers, of the Department of English and History in the Massachusetts Institute of Technology. The first course, consisting of twenty lectures, will cover American Literature from its beginnings thru the Civil War; and will begin on November 17, with an examination on April 6. The enrollment charge is \$1. A supplementary course of ten lectures, on American Literature since 1870, will start on April 13. It is expected that library assistants who are relieved from duty for the purpose of attending these lectures will take the course seriously, to the end of making their library work more effective and will take the examination at its end.

Chestnut Hill. Ground has been broken for the erection of the new \$400,000 library building at Boston College, which is to be a handsome Gothic structure provided for shelving about 700,000 volumes.

CONNECTICUT

Hartford. By far the greatest increase in circulation since the Hartford Public Library opened its doors as a free public library thirty years ago was realized at the close of the year in June, when 421,009 volumes, 48,351 more than the previous year, had been issued. March was the month of the largest circulation, as it has been every previous year with one exception. The city responded to the board of directors' appeal for more funds last year, with the result that \$40,000 was received from taxation in 1921-1922. The entire receipts were \$52,601; expenditures for salaries \$28,236, and for books, periodicals and binding \$18,314. The Dwight branch in the Parkville section is in need of repair and extension. Near a school, the branch loaned approximately 10,000 juvenile books of its circulation of 26,822.

NEW YORK

Brooklyn. The total registration for the Brooklyn Public Library's three courses in library training which began October 1st was fifty-four. Of this number thirty-five registered in the advanced course in library training, ten in the course for children's librarians and nine

in the elementary course. In the advanced course eight students are college graduates and in the training course for children's librarians all are. The students come from the following states: New York, Massachusetts, Maine, Connecticut and New Jersey. One comes from Stellarton (Nova Scotia) and another from Owen Sound (Ontario).

The qualification for admission to the advanced courses is a college degree, without examination, or at least a year of college work or its equivalent, with examination. At the end of these nine months' courses a certificate is granted to graduates. Pass cards are given to staff members for each course taken and successfully completed and persons passing these courses are placed in the Second Grade of the library service. The qualification for admission to the elementary course is a high school diploma. The course is six months in length and persons satisfactorily passing are appointed in the lowest grade of the library service.

DELAWARE

Newark. Plans are being formed by a joint committee of the Board of Trustees and the Alumni Association of the University of Delaware for a campaign for a fund of over a quarter of a million dollars for a new library.

DISTRICT OF COLUMBIA

Washington. Last year the United States Department of Agriculture inaugurated a graduate school for Department workers. Courses in subjects pertaining to the work of the Department were given by specialists from the Department and other institutions. The success of the initial venture last year, in which more than two hundred department workers availed themselves of the opportunity offered to continue their education and training in scientific agriculture, encouraged those in charge to repeat the work this year. The work will be given in two sixteen week terms, commencing October 16th and closing June 2nd, allowing one week vacation between semesters.

The graduate school is an unofficial system and is self-supporting thru the fees collected from the students. Only work is given in which adequate instruction cannot otherwise be had in Washington. Classes are held in some department office at 4:30 o'clock, each class meeting twice a week.

The work this year will be of three grades, a

small amount of which will be of undergraduate character, available for clerical forces and younger members of the department. A second grade will be in the nature of a review for those who have had training but who have not kept up with recent advancement in the subject. A third grade, which will be the greater part of the work, will be of an advanced graduate character and it is expected that a large number of those taking the work will, after obtaining a sufficient number of credits, take leave of absence from the department and complete the course for an advanced degree at some recognized institution. A number of institutions of recognized standing have accepted the credits given in the graduate school last year.

Among the new courses to be given this year will be one in library science under the auspices of the Library of the Department. Since the war the Department of Agriculture has found it difficult to obtain a sufficient number of assistants with library training at the salaries that it has been able to offer. It was therefore necessary to make appointments from other than the library registers. Those appointed have for the most part been college graduates who have had an interest in library work. The main purpose in inaugurating the library course in the Department is to give these assistants an opportunity to take up systematically the study of two or three fundamental library subjects, such as cataloging, classification and bibliography in order to help them in their work. The first term will be devoted to cataloging and classification and the second term to bibliography and reference work. The Library of Congress catalog rules will be followed and in the bibliography course special attention will be given to bibliographies of agriculture and related science. The courses in both terms will be taught by Ellen Hedrick, who, previous to coming to the Department of Agriculture Library as reference librarian, was chief classifier in the University of California Library. For the past two summers she has also taught at the Chautauqua Summer Library School.

TENNESSEE

Chattanooga. At the end of the library year on September 30 the Chattanooga Public Library had circulated 176,621 volumes from its collection of 62,286 thru the central library, two branches, and 52 other agencies, to 20,571 borrowers, about one-sixth the population of the city, of whom 4,889 registered for the first time this year.

FLORIDA

West Palm Beach. Erection of a library building as a memorial to soldiers and sailors from Palm Beach County who died in the World

War is under way. The building is situated in the City Park and since the \$30,000 expenditure permitted by the Board of County Commissioners is less than the sum desired to carry out the memorial, an effort is being made to raise the rest of the money by gifts.

IOWA

Des Moines. The fortieth report of the Des Moines Public Library covers the first full year under the increased appropriation voted in 1920. The city tax levy brought in \$103,162 of total receipts of \$108,405. A third branch, the Capitol Hill, was opened November, 1921, with a fourth to follow in April. Library service was inaugurated in three of the city hospitals and a deposit station opened in a new community house. Classroom libraries were placed in ten more grade schools and improved service was given the high schools.

At the end of the library year on March 31 thirty-eight per cent more books had been circulated than in the previous year, or 494,131 in all. Children borrowed more than half of these. Cards in force, adult and juvenile, were 35,101, a decrease of several thousand due to the cancellation of the cards once used by service men from Camp Dodge. Under the direction of Mary E. Wheelock, who joined the staff in May, 1921, more than 6,000 books were rebound. Binding represented \$7,932 of the expenditures of \$107,352; staff and janitor salaries \$44,368; books and periodicals, \$28,024.

ENGLAND

Semi-centennials in the public libraries of Bradford (England) and its neighbor, Leeds, have been the occasion of the publication of illustrated booklets setting forth, in the words of Thomas W. Hand of the Central Library of Leeds, "some account of the early efforts of the pioneers of the movement in the City; the humble beginnings of the present system in small buildings; the struggles against financial adversity; and the growth and development of the institutions to their present position in the educational and recreative life of the Community."

The Bradford Jubilee Survey, 1872 to 1922, by Butler Wood, chief librarian, shows the chief landmarks in the history of the libraries as beginning with a public meeting, necessary to the adoption of the Libraries Act, held on the 15th of March, 1871. In spite of fearful pictures painted by opponents of the proposal of the people being driven beyond the borders of the town, to escape the payment of the library rate, and in spite of the raising of the "fiction bogey," the feeling of the meeting was overwhelmingly in favor of the establishment.

of a library. A reference library was opened in Tyrrel street June 15th, 1872, and a lending library and newsroom the following February. The removal to the present building took place January 1, 1878. By arrangement with the Science and Art Department of the Council of Education at South Kensington a museum was opened on the top floor of the new building May 28, 1879. Museum and library hindered each other's development, and the general reconstruction of the departments in 1905 whereby the art gallery and museum exhibits were transferred to the Cartwright Memorial Hall was welcomed. After twenty years of existence eight branch libraries with an annual circulation of 260,000 had been established, and other branches have since been consistently provided in the localities most in need of them. A Commercial Library and Intelligence Bureau was opened in 1918. A collection of 4,400 volumes supplies the eleven traveling library stations. At the present time the whole of the stock in the Central and branch libraries numbers 200,000 volumes, and the issue of books to the public in the year 1920-1921 amounted to 1,094,206 volumes.

The first half-century of the Leeds Public Libraries came to an end in 1920. Two branch libraries, Hunslet and New Wortley, were taken over from the institutions previously operating them and James Yates of the Bolton Public Libraries appointed librarian before a central library was opened. This was the Reference Library, opened with a stock of 14,151 books on the fourth of October, 1871. The Central Lending Library inaugurated the circulation of books April 8, 1872, with a stock of 8,000 volumes, circulating ten times that number in its first six months. From 1874 to 1878 eighteen branch libraries were opened. At the time of the removal to the Municipal Buildings in 1884 the library system consisted of a Central Reference, Central Lending and twenty-three branch libraries. Work with the schools was inaugurated in April, 1883, until eventually thirty-seven juvenile libraries were brought into existence.

In 1898 the present librarian, Thomas W. Hand, came from his post as chief librarian and curator of the Oldham Public Library and Art Gallery to succeed Mr. Yates. The books of the Reference Department were reclassified on the Dewey Decimal system in 1898, and the classed catalog commenced in 1896 was superseded by a card catalog. In the same year women were employed for the first time. By 1904 six new branch buildings had been erected at a cost of £56,000, and it was necessary to call a halt. It was resolved to approach Andrew

Carnegie for assistance, but the City Council negatived the proposal when it came before them in October, and opposition was continued until May, 1913. In April, 1916, the trustees of the Carnegie Trust offered to make grants for the building of new libraries at Bramley, Burley, New Wortley and Harehills, but up to the time of the anniversary report no action had been taken, owing to the cost of labor and materials. The Libraries in 1920 contained 352,647 books. The Reference Library, with the Commercial and Technical Library opened in 1918, had 121,942 volumes, while the Central and Branch libraries had 175,618. In 1919-1920 the entire circulation reached 1,472,944.

CZECHOSLOVAKIA

The report of library progress in Czechoslovakia for 1920 recently published by the State Board of Statistics shows a remarkable increase in library stocks and book use. At the end of the year the 276 larger Czech libraries (in towns of 2,000 or more inhabitants) and the 2,609 smaller (in towns of less than 2,000) owned 714,683 and 647,620 volumes respectively, representing increases of 15% and 34%; and the German libraries 197,967 and 84,288 volumes respectively, being 24% and 30% increases respectively. In the two classes of Czech libraries there were 129,624 and 112,177 borrowers' cards in use, and 1,651,878 and 860,100 books issued, and in the German 53,970 and 15,109 cards and 583,409 and 85,122 books issued respectively.

The total income (in Czech crowns) was 2,720,641 for the Czech and 437,448 for the German libraries, public appropriations amounting to 2,051,038 and 263,728 crowns respectively, and the remainder being subscribed by societies, banks, etc., or received from borrowers' fees, sale of catalogs, etc. Expenditures in Czech and German libraries respectively were: books, periodicals and music, 386,945 and 187,815 crowns; binding and repairing, 355,871 and 40,425; light, heat and supplies, 520,990 and 79,016; librarians' salaries 230,019 and 40,084; professional assistants' salaries 413,573 and 113,562.

The Czechoslovak State School for Librarianship ended its second year in June, 1922. Of the 27 students and three externals who matriculated the previous October, twelve passed with merit, nine with first class certificates and one with second; the others will take the examination later. Five scholarships of 1000 Czech crowns each were offered. The new school year, 1922-23, opened in October with twenty-three students, for the most part college graduates.

LADISLAV J. ZIVNY.

BALL (Mrs.) Mabel, 1899 P., has been made assistant librarian of the American Academy of Arts and Sciences, Boston, Mass.

BIRDSALL (Mrs.) Grace H., 1895 P., has become Hospital Librarian in the Lakeside Hospital, Cleveland, Ohio.

BISBEE, Joyce G., 1918 W. R., formerly assistant librarian, succeeds Clarence E. Sherman as librarian of the Lynn (Mass.) Public Library.

EGGERT, Elisabeth, 1905 D., appointed head of the Catalog Department of the Bridgeport (Conn.) Public Library.

FROST, Virginia, 1920 S., appointed librarian of the Bloomingdale Hospital, White Plains, N. Y.

FRICK, Eleanor H., 1895 P., received a notable tribute from officers and staff of the American Society of Civil Engineers on November 11, on which day she completed twenty-five years of service with the society. Thirty-two guests gathered at a luncheon in her honor in the old home of F. Hopkinson Smith. Charles Warren Hunt, Secretary Emeritus, presided and read an original poem in her honor. The Secretary of the Society, Prof. John H. Dunlap, followed with an address and Miss Frick responded in an eloquent speech which moved her friends deeply.

FULLERTON, Margaret, 1910 P., is now first assistant in the College for Women Library, Cleveland, Ohio.

HENDEE, Cora, W. R., 1913-14, resigned from her position as librarian of the Public Library, Council Bluffs, Iowa, and for the present is at her home near Arkport, New York. Grace Switzer, formerly librarian of the Miles Park Branch in Cleveland succeeds her.

HORSFALL, Alice E., 1921 W. R., appointed librarian of the Mankato (Minn.) High School.

LAMPE, Lilli, 1911 P., formerly of the staff of the public library in Bergen, Norway, has been made head of the cataloging department of the library of the Bureau International du Travail, Geneva, Switzerland.

LIEBMANN, Estelle L., 1916 P., has given up the librarianship of the Ronald Press and has opened an office for index and library service at 280 Broadway, New York.

LUDINGTON, Flora Belle, 1920 Wash., 1922 N. Y. S., is reference librarian of Wells College Library, Calif.

LYNCH, Nell, 1918 W. R., appointed school librarian of the Public Library, Cleveland Heights, Ohio.

MASSE, May, editor of the A. L. A. *Booklist*, has resigned to accept a position with Doubleday, Page and Company as director of Children's Book Publishing.

MERCER, Beatrice, 1916 Wash., is now librarian of the Roosevelt High School, Seattle, Wash.

MOTZ, Ruth N., 1921 W. R., appointed assistant librarian of the Whipple Barracks Hospital, Prescott, Ariz.

OLSON, Nelle A., 1914 P., formerly librarian of the public library at International Falls, Minn., is now librarian of the public library at Buhl, Minn.

ROBERTS, Jane E., 1906 W. R., appointed chief of the order and cataloging department of the Ohio State Library, Columbus.

ROSE, Alice L., librarian of the National City Financial Library resigned November 1st and is succeeded by Mary Hayes who has been for four years head of the reference department. Lalia May Damon who has been for the last two years head of the cataloging department has been appointed assistant librarian and is succeeded by Florence A. Grant, formerly assistant cataloger. May L. Milligan is now head of the reference department.

RYERSON, Agnes, 1921 W. R., appointed reference librarian of the Gilbert M. Simmons Library, Kenosha, Wis.

SILL, Nellie G., 1915 W. R., is now librarian of the Cleveland Museum of Art.

SMITH, Elva S., is bibliographer of children's books at the Carnegie Library of Pittsburgh and instructor in book selection at the Carnegie School; but not, as given in our last number,

WHY PAY MORE?

The Nineteenth Century and After, The Fortnightly Review, The Contemporary Review, Blackwood's Magazine, Edinburgh Review, Quarterly Review.

Published and supplied by The Leonard Scott Publication Company are the Original English Editions. They are not "Just as good," or "The same"; they are the Original English Editions. Yet the saving in cost is nearly 50 per cent on the entire list.

Librarians and others interested in keeping down their expenses should specify Leonard Scott Editions for all these periodicals, and effect a substantial saving in money.

"Sticks Like A Brother"

"Sticks Like A Brother"

director of work with children, which post is held by Grace Endicott.

SMITH, Nathalie D., 1914 P., has been appointed secretary of the firm of Ames, Emerich & Co., 111 Broadway, New York.

STICKNEY, Minnie T., 1916 P., has been made classifier at the public library of Bridgeport, Conn.

STIMSON, Florence, 1902 N. Y. S., appointed librarian of the Mines Library of Columbia University.

TAWNEY, Mary A., 1915-'16 N. Y. S., who has been in charge of the Franklin Avenue Branch of the Minneapolis Public Library since May, 1917, has been made supervisor of library instruction in the grade schools. Ethel I. Berry, 1911-'12 succeeds her.

UNGER, Nell, 1918 Wash., librarian of the Lincoln High School, Seattle, who has resigned

to become assistant library organizer for the State of New York, is succeeded by Jessie Eastman, 1916 Wash.

VONHOLD, Mrs. Gladys Schummers, 1915 P., formerly head of the circulation department of the Binghamton Public Library, is now children's librarian at the public library of Endicott, N. Y.

WILEY, Betsy T., for fourteen years engaged in library work in Dallas, Texas, and since 1916 librarian of the Public Library resigned in October to marry Mr. E. H. Lingo. Cleora Clanton is acting as librarian until the office is permanently filled.

Appointments of the Riverside Library Service School class of 1922 include: Minnie J. White, assistant, Fresno County Library, Fresno, Calif.; Bertha Hole, assistant in the Corona (Calif.) Public Library; Beryl Lewis, assistant in the Pomona (Calif.) Public Library.

CURRENT LITERATURE AND BIBLIOGRAPHY

The Page, the organ of the New York Public Library Staff Association began its second volume last month as a printed sheet instead of a mimeographed one. *The Page* has the satisfaction of offering to members of the Association "all the news you ought to read."

Svetozor, a leading Bohemian periodical published in Prague, issued as no. 23 of year 22 (August 3), a number which will be of wide interest. It is devoted to the scenery of the Moravian Karst country, with over fifty excellent illustrations of the famous cave Macocha, and the surrounding country. The descriptive text is in four languages—Czech, French, German and English—and it will therefore be a useful addition to the books on travel in Central Europe.

E. E. L.

One of the most interesting parts of the second part of the "Catalogue du Livre Français" (Office pour la Propagation du Livre Français, 1922. 140 p.) is the list of American books translated into French which are still in print. This should be of use to librarians who are selecting books for Franco-American readers.

W. D. J.

The Subject Index to Periodicals, 1917-19, part K, covering science and technology was issued in September by the Library Association, Stapley House, Bloomsbury Square, London, W. C. 1. This list contains some 15,000 entries obtained from the examination of 400 periodicals. The Index for 1920, part A, covering theology, philosophy and folk-lore, issued in Oc-

tober, contains some 2100 entries, made from examination of 270 periodicals.

At the suggestions of several American Librarians the American Library in Paris will this winter devote some attention to building up collections in American libraries relating to French architecture and art. It will not attempt to serve as a book agent; in other words, it will not undertake to fill orders for individual books selected from publishers or booksellers' catalogs, nor will it undertake to find individual books with a view to submitting quotations. In short, it will not act as a collector of books. But it will try to advise librarians in regard to the selection of periodicals and books relating to specific subjects, especially books notable for their illustrations, and books relating to any branch of French art or architecture, the work of any individual artist, or any architectural monument upon which no books in English are available.

Librarians desiring the assistance of the Library in this direction are requested to indicate the specific subject or subjects in which they are interested, the amount of money they are willing to spend upon each subject, and also whether they desire to limit the amount to be spent upon any individual item. Books which are selected by us will be forwarded either thru the purchasing library's Paris agents, or thru the *Maison du Livre*, with a duplicate shipping bill from this library, if desired.

W. D. J.

ABINGDON

Gift Books of Permanent Interest

A BOOK of merit cannot wear out its appeal. Rather it improves with closer acquaintance and frequent delving into the treasures of its pages. Choose those books for Christmas gifts that will invest with appreciation and permanency the remembrance of the donor.

Make your selection from the volumes bearing the mark of The Abingdon Press.

THE POT OF GOLD By George Clarke Peck

In the quaint, half-quizzical fashion which gives his books their charm, this gifted author suggests a few of the paths to the fabled treasure at the foot of the rainbow. But he never takes you there direct. He offers space and time to enjoy the scenery, *en route*. And he always suggests more than he says. If you enjoyed his earlier volumes, you will want this. If this is your first acquaintance with him, we predict you will wish to know him better. For, *The Pot of Gold* is more than an itinerary to the place where the treasure lies. It is in itself a pot of gold for the reader of these essays.

Net, \$1.25, postpaid.

BEYOND SHANGHAI By Harold Speakman

"One rarely comes upon so delightful a volume of travel writing as Harold Speakman's *Beyond Shanghai*. His purpose was not to visit and attempt to redescribe the famous places of that country, but to live in intimate touch with the people, taking part in their day-by-day life and observing them at close range."—*Travel Magazine*.

Eight reproductions in color of paintings made by the author in China.

Net, \$2.50, postpaid.

THE CHRISTMAS CANTICLES By George Elliott

This book is the fruitage of "nearly fifty years' meditation at Christmas time on the Canticles of the Incarnation," and has a distinct message as an interpretation of the divine purpose in the sending forth of the Divine Son into the world.

Frontispiece. Net, \$1.00, postpaid.

THE SPREAD OF CHRISTIANITY By Paul Hutchinson

This text in church history is prepared with pupils in the eleventh grade of the American School in view. In writing for this group (which is generally found in the sophomore or junior years of high school) no effort has been made to mention all the facts, or even all the names, that must be included in any complete record of the Christian enterprise. The attempt has been made to throw into bold relief the significant developments in Christian history since the days of Constantine.

Illustrated. Net, \$1.50; by mail, \$1.65.

JAMES W. BASHFORD Pastor, Educator, Bishop By George Richmond Grose

The story of Bishop Bashford's life should be an inspiration, for it is an uninterrupted record of worthy serving according to ability and opportunity, as pastor and college president in America, and as bishop in China, in which land he invested the most fruitful years of his consecrated life.

Illustrated. Net, \$2.00, postpaid.

First Principles of Advertising

By Wilbur D. Nesbit, Vice-President,
The Wm. H. Rankin Company, Chicago and
New York.

The forcefulness of the book is its simplicity. It is not ridden with psychology or involved with technical terms. The author writes not as a theorist but as an expert performer. His complete mastery of the subject through experience is revealed by his simple unostentatious presentation of principles of great professional value in everyday language that the layman can understand.

Dealing with fundamental principles, full of the "what" and the "how" to do, the book might well be called a "manual" yet each idea is fully developed. Its brevity will be a source of great satisfaction and economy to the busy man.

Handsome fabrikoid binding. Illustrations in color. 111 pages. List price, \$1.50.

ALL FRENCH BOOKS, NEW AND OLD, OF ALL PUBLISHERS

The only concern in America which has under the same management its own Paris House (19 BOULEVARD HAUSSMANN)

Not only do we keep in stock, in our New York branch, a very large, varied assortment of all the Standard French Books, but we have at our disposition, in addition, the entire classified stock of our Paris store, where we have on hand over 400,000 French books on every conceivable subject. *We specialize in old and out-of-print books.*

Any French book not in stock in our New York store can be imported without extra cost within about three weeks time.

Being established in New York and in Paris (for a lifetime) we are in a position to give the best of service and to quote on any French book or books, and to procure them quickly and cheaper than anyone else.

All French books for *library customers* can be bound to order abroad, in our Paris bindery, in any style, and at moderate cost.

A SUGGESTION: SOME USEFUL BOOKS FOR LIBRARIANS, OF WHICH WE HAVE SECURED THE PUBLISHERS' REMAINDERS —

LEON GAUTIER, *Les Epées françaises. Etude sur les Origines et l'Histoire de la Littérature nationale.* 1878-97. 5 thick vols. large 8vo, paper bound. Giving analysis of all "Chansons de Geste." Complete with vol. V: "Bibliographie des Chansons de Geste." \$12

W. MEYER-LUBKE, *Grammaire des Langues Romanes.* 1890-1906, 4 thick vols. large 8vo, paper bound. \$20

P. VERRIER, *Essai sur les Principes de la Métrique anglaise.* 1900-1910, 3 vols. 8vo, paper bound. \$5

J. G. Tr. GRAESSE, *Trésor des Livres Rares ou Précieux ou Nouveau Dictionnaire bibliographique contenant plus de 100,000 articles de livres rares, etc.* 1859-69 (Welter's reprint) 8 quarto vols. \$25

DESCHAMPS & BRUNET, *Supplément au Manuel du Libraire et de l'Amateur de Livres.* 1878-80 (Our anastatic reprint) 2 vols. large 8vo. *These supplementary volumes are missing in most sets contained in American Libraries.* \$5

HENRY HARRISSE, *Excerpta Colombiana.* Bibliographie de 400 pièces gothiques. Thick vol. 8vo. \$5

MARAIS & DUFRESNE DE ST. LEON, *Catalogue des Incunables de la Bibliothèque Mazarin.* 1856-68, 2 vols. 8vo. \$3.50

ALFRED FRANKLIN, *Dictionnaire historique des Arts, Métiers et Professions exercés dans Paris depuis le XIIIe siècle.* 1903, 4to, paper bound. \$3

C. MOREL, *Les plus anciennes traductions françaises de la Divine Comédie de Dante, publiées d'après les Manuscrits.* 1895-97, 2 vols. with an Album of 21 plates. \$3

LEON BAKST, *L'Oeuvre pour "La Belle au Bois dormant" (The Sleeping Beauty).* Folio, with 57 colored plates, interesting for costumes. \$33

GEORGES VOIGT, *Pétrarque, Boccace et les Débuts de l'Humanisme en Italie.* 1894, 8vo. \$1.50

P. M. PERRET, *Histoire des relations de la France avec Venise du XIIIe siècle à l'Avènement de Charles VIII.* 1896, 2 vols. 8vo. \$2.50

LOUIS LAMBERT, *Chants et Chansons populaires du Languedoc.* 1906, 2 vols. 8vo, with music. \$3.00

Under Press:

A CATALOGUE OF OUT-OF-PRINT FRENCH BOOKS. (Art, Costumes, Bibliography, Reference, Illustrated books, etc. . . .) which will be mailed free on application.

BOOKS ABOUT BOOKS

The published *Proceedings of the Bibliographical Society of America* are now offered for sale as a complete set in 32 parts, with special index for the entire series. These volumes represent the contributions of many leading American bibliographers during the last twenty-four years, and offer in collected form a significant study of all literatures. Only twenty-seven complete sets can be offered for sale. Orders for these at \$60 complete, domestic postage prepaid, will be filled in order of receipt and delivered on completion of the index and Volume XVI, now in press.

REDUCED PRICE FOR CHIVERS' BINDINGS, IN NIGER LEATHER and BUCKRAM

Publishers' bindings cost so little chiefly because they are done in very long numbers.

We seek the same advantage with our work, that is, to bind long numbers in the same manner, to reduce costs.

Chivers' standard binding for ordinary fiction; oversewed with our special end-papers, real Niger Native-Tanned Leather Back, will prove to be the cheapest possible.

This standard binding costs 75 cents for the ordinary crown size. Books bound in Buckram 10 cents less.

Leather alone helps to bind the book. All other materials only cover it.

High-priced and desirable books sewed in Chivers' patented hand-sewing.

L

26 years of satisfaction

Each year adds its tribute to the quality of L. B. Library Standard cards. Almost no amount of punishment—certainly no normal amount of constant fingering can break down the remarkable intrinsic quality of this Library Bureau product.

Each added year proves the economy of L. B. Library Standard cards. This 100% rag-stock card saves the expense of many a set of new cards and their transcriptions; saves the time of busy librarians because the cards are made on special machinery—

the first card like the millionth one to almost microscopic detail.

Each added year more librarians the country over turn to L. B. Library Standard cards and find not only economy in everyday use but also that L. B.'s enormous quantity production enables them to acquire Library Standard catalog cards at a surprisingly low price.

Investigate L. B. Library Standard cards. Send to our nearest branch for sample test cards and catalog No. 812 "Library supplies."

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 15, 1922

The Library of the League of Nations'

By FLORENCE WILSON, Librarian

I AM constantly being asked why the League of Nations has a library. This always surprises me as I think of the library as the very foundation of the League idea—as an absolute necessity and a great opportunity. The League aims to secure mutual understanding between nations thru mutual knowledge, and this requires a library that will express the culture and civilization of its various members. It has also been agreed that justice based on facts and not on political expediency shall be the determining factor in future international disputes. It is then the duty of the Library of the League of Nations to collect these facts and to make them available. This ideal was at work during the World War. Each warring nation organized a research section to aid its statesmen who would be called upon to draft a peace treaty. In England there was the Historical Section of the Foreign Office, in France there was the Comité d'Etudes of the Sorbonne, in America Colonel House's Inquiry. It always seemed as if the League must pool the efforts thus made by the various countries and continue the work.

The object then of the Library of the League of Nations should be first, a working library for the League so that decisions may be based on facts, and second a library that will so express the civilization and culture of the various countries that the peoples of the world will better understand each other and, thru understanding, will be at peace.

It will be necessary to describe briefly the League as it is now organized so as to explain what kind of a working library is required. First, the Council and the Assembly may be compared to the Upper and Lower Houses of a National Parliament. These meetings bring to Geneva the leading statesmen of the world who require a library such as each nation provides for its national parliament. The various permanent

commissions in Health, Transit, Economic and financial questions, Opiums, etc., etc., bring to Geneva at stated intervals specialists in these various subjects who require a comprehensive reference library in their special fields. Then there are conferences from time to time on special questions as for example that called to draft the Convention on Upper Silesia, a conference which was in session for about six months. If you study the Convention which has more articles than the Treaty of Versailles you can readily understand that many demands were made on the Library. All of these meetings are attended by leading journalists and distinguished visitors. Students of international relations frequently visit the Secretariat for source material on international affairs. But by far the greatest demands on the Library are made by the Permanent Secretariat, numbering over 310, who are constantly at work at Geneva. The Secretariat might better be named an International Civil Service. All the preparatory and "follow up" work of the Council, Assembly, Commissions and Conferences is done by the Secretariat. Too much cannot be said of the importance of this body of workers. It is the great co-ordinating centre for all international activities. It must be ready to arrange immediately for a world's conference to settle an urgent dispute and it must do the "follow up" work essential if an international conference is to be a success. This is of such vast importance that it does not seem inopportune to digress for a minute. I should like to give an example first of the importance of being able to convene immediately an international conference and then the importance of having a permanent organization for "follow up" work. Before the Permanent Secretariat was organized it required from six to nine months to convene a conference for international affairs. Recently there was trouble in the Balkans of a serious nature. Albania's boundary had not been decided and the Jugoslavs were invading Albania. Albania appealed to the League.

* Paper read at the meeting of Eastern College Librarians at Columbia University, December 2, 1922.

Within a week the Yugoslavs and the Albanians were discussing their differences before the Council of the League of Nations and trouble was avoided. If machinery such as this had been available in 1914 it is safe to assume that there might not have been a World War. Then one example of the "follow up" work. In 1910 there was a convention drafted for the prevention of traffic in women and children. In 1921 when the League called a conference on this subject only thirteen states had signed the 1910 Convention. This new Conference made the 1910 Convention more drastic and within a short time there were thirty-one signatures to it.

The Secretariat is the busiest organization with which I have ever been connected. The work is always urgent and of the utmost importance. It is working constantly under pressure and at times the general services must be divided into two or three shifts and work all night. It is divided into sections as follows, which might be compared to the departments of an university: Economics and Finance, Legal, Administrative Commissions, Transit, Disarmament, Military, Naval and Air questions, Health, Political, Social, Mandates, Information, International Bureaus, Publications, Translating and central services, such as Registry and Distribution Departments. The Economic and Finance Section issues a *Monthly Bulletin of Statistics*, is constantly making special inquiries and special reports in connection with the Economic and Finance Committee, as for example an inquiry into conditions of Austria and Russia, a plan for the reconstruction of Austria, various reports on public finance, bills of exchange, etc., etc. In preparation for the various conferences such as the Brussels conference numerous investigations are made and reports written. The Legal Section must be ready to advise at each conference and on each question. The Administrative Commission Section is making inquiries into minority questions which require ethnographic, historical and statistical studies. The administration of the Saar Basin and Danzig are under the general direction of this section. The Transit Section makes investigations and prepares studies in international transit problems; the preparation for the Transit Conference at Barcelona, for example, required considerable research work. For disarmament various investigations and studies are being made, such as one on the public wealth of nations; another report was based on budgets and budgetary studies. The Section on Military, Naval and Air questions is busy on a comparative study of these problems. The Health Section has a current publication called *Epidemiological Intelligence*. has made investigations and reports on special

subjects and is constantly engaged with the preparatory and "follow up" work for the Health Committee and conferences such as that of Warsaw. All political questions, such as the question of Upper Silesia, the Auland Islands, Albania, the Polish-Lithuanian disputes, etc., are referred to the Political Section. The Social Section is investigating the traffic in drugs and opium, etc. The studies are based on production and consumption. It is engaged also upon the question of the traffic in women and children. The preparatory and "follow up" work for the international conferences on these questions is most important. The Mandate Section is engaged in a study of conditions in the mandated territories and in the work of the Mandate Commission. The Information Section prepares outside information for the League and League information for the public. They prepare a review of the press for the use of the Secretariat and a *Monthly Summary* of League activities for the public. There is a special provision made in the Covenant for international organizations which requires the collection and dissemination of information relating to them. This work is under the supervision of one of the Under Secretary Generals. The Committee on Intellectual Co-operation is also in his charge. This committee is engaged in a study of co-operation in university work, bibliography, condition of the intellectual workers, and other aspects of intellectual co-operation.

From a close study of the Covenant of the League of Nations and a study of the activities of the League just described the scope of the Library is easily determined. It must contain a complete collection on international law and national statutes, a comprehensive collection in economics, finance, statistics, political science, history, health, sociology, ethnography and geography, maps, and special collections on special subjects, such as minorities, disarmament, opium, colonial studies, etc., etc.

As the League is primarily concerned with current affairs the leading periodicals form an important part of the collection. It is necessary for the members of the Secretariat to know what is in the current journals in reference to the subjects for which they are responsible. As it is impossible for each person carefully to examine each issue the Library prepares a weekly index to journals which appears in two parts, e. g. economics and finance, political and social. These are arranged alphabetically by subjects (the Library of Congress subject headings are used so that this index will supplement the card catalog). It is prepared on cards for permanent reference and on sheets. The sheets

READING ROOM OF THE LEAGUE OF NATIONS LIBRARY

are circulated thruout the Secretariat, checked and returned to the Library. The Library then sends the journals checked to the various members requiring them. This index has been essential as there are many new subjects brought before the League on which information can only be found in periodicals. It is hoped later to extend this work to government publications.

As the Labour Office is three miles away from the Secretariat it has been necessary to have a separate library for its use. All books on labour are secured by the Labour Office and the League of Nations Library excludes labour from its collection. Every effort is made to prevent duplication. There is, however, some overlapping in laws and statistics which may be avoided later when the two offices are closer together. The Swiss Government has given land to the League and a building for the Labour Office will be erected near the Secretariat Offices.

While it was a comparatively simple matter to decide on what the Library should contain and to make a general plan for the work, it was more difficult to carry it out. When I began work in London in December, 1919, I found that a library was needed immediately. It was not possible to lock the door and properly

organize. It was necessary to function at once as a comprehensive research library. To meet the daily demands was our first aim and the books needed for immediate use received our first attention. Every book is a "rush book." It has, therefore, not been possible to keep the collection perfectly balanced. The general works of reference, government documents, law economics and statistics have received our greatest attention. We have been receiving current publications from all governments since January, 1920, and we have secured many of older date necessary for our work. We have secured complete files of all the important international law journals, collections of treaties and diplomatic papers such as the French "Yellow Book," and the collection of statistics is improving daily. We already have a good collection of national statutes and official gazettes. When a new Convention is made it is necessary to know what national laws are in force in reference to it and afterwards it is necessary to watch all future legislation affecting it. We are gradually building up the collections in the other subjects. We have made considerable progress in history, health, transit, geography and maps and certain special collections. There are at present about thirty-five thousand items.

The Library of the League has a great responsibility and a great opportunity. It is its duty to see that the officials of the Secretariat have the necessary facts and knowledge so that the reports made for use of the Council, Assembly, Commissions and to the governments of states which are members of the League are well documented and that those responsible for world affairs shall have full knowledge on all subjects brought to their attention. It has a great opportunity to have at hand a well selected library, containing all important information about each country of the world as an aid to mutual understanding between the various nations.

The Library is well placed in the center of all League activities. There are committee rooms on all sides. The delegates often leave the committee rooms to discuss quietly in the Library or they see an opportunity to snatch a cup of tea between speeches. M. Paderewski frequently walks thru the Library. M. Viviani has been seen seated at the periodical table with a cup of tea and a plate of cakes. Lord Robert Cecil and Dr. Nansen frequently have tea at a Library table, while Lord Balfour and M. Bourgeois find a quiet corner in one of the adjoining library rooms. The reading room is the dining room of the former Hotel National, which now serves admirably as the Offices of the Secretariat. It is a very attractive room, large, light and cheerful. The windows are so large and so numerous that it seems to have glass walls and from three sides you look into splendid trees or have glorious vistas of the Lake. The room is about ninety feet long and very nearly the size and shape of the Guild Hall Library in London. The oriental rugs, which formed part of the furnishings which were bought with the hotel, add greatly to the beauty of the room. The room lends itself to library arrangement. The Library Bureau shelves in art green finish form a series of alcoves on one side of the room, with a reference alcove on the other side.

The shelving has always attracted attention. When the League moved from its headquarters in London to Geneva the Library, then containing several thousand volumes, had to be arranged in a week's time for the first Assembly. It was quite impossible to secure shelving in time. Packing boxes were therefore made so that they could serve temporarily as shelving. This created a sensation. When the Brazilian Ambassador arrived to inspect the new building he looked contemptuously at the shelves and said "We have better shelves than this in Brazil." The next year the new shelving was in place and he was delighted with it and

said, "Splendid; where can I buy it? We must have this kind in Brazil." We have had so many distinguished visitors admire and wish to secure it that I feel that we have served as a splendid advertising agency for the Library Bureau. The Catalog Room and the Librarian's office are adjoining. A half flight of stairs leads to the entresol and to two rooms, one of which serves as a reference room for national laws and the other as a room for the receipt of documents. The room underneath the Reading Room serves as a stack room for government documents. An adjoining room is being arranged as a reference room for documents and statistics. A new stack room is being built on the same floor. There is also a Newspaper Room, where a small number of newspapers are available.

Before I sailed for London in 1919 I prepared a report in which I carefully outlined the scope of the Library, my plan of work and the Library methods to be adopted. This was circulated to the Directors of the various Sections of the Secretariat. I rather expected that the scope might give rise to controversy, but it was the greatest surprise to find the report on my desk with the following marginal note opposite the paragraph on methods: "Miss Wilson is too national in her ideas." I am afraid that they were right; I have a definite national bias when it is a question of library methods. The morning after my arrival a delegation arrived armed to the teeth with books on classification and pointed warningly to criticisms of the classification I had suggested. It was agreed that I should immediately visit the libraries of France, Belgium and Holland to correct my national bias. It seemed most important to start the Library right and to employ the best library technique, for the seat of the League is destined to become a world centre, but it was at the same time necessary to consider the international aspect of the Library. Letters, for example, are not international, while figures are. This was an important consideration in the selection of the classification. A classification with a numbered notation was necessary. It was finally agreed that the Brussels expansion of the Dewey Decimal classification should be adopted. Altho it had originated in America, the fact that it had been expanded in Belgium and translated into French gave it the desired international aspect, also the decimal classification has been adopted in many countries in some form or other. It is in use in the library of the London School of Economics and in libraries on the Continent, and is known in the Far East. In France and Holland I have often found librarians who, when they say that they use it, mean

that they arrange their catalogs by it, not their books. It is in use to some extent in official government offices in Holland. While it is as we all know not ideal, every one seems satisfied with it with the exception of those who consider that it is a fatal error to class a library by subjects at all! No one objected to the other library methods suggested, and we employ those found in a standard American library. There is a dictionary catalog in which Library of Congress cards are in use and Library of Congress subject headings are followed. The shelf list with headings in French and with an alphabetic list of specific subjects in French makes a perfect "Catalogue méthodique" for the French speaking public. The catalog, the open shelves and American methods are of increasing interest to foreign scholars, statesmen and librarians. Several professors have confided to me that they have never been able to consult the shelves in their own university libraries. I have had a number of applications from young women of various countries—Holland, Switzerland, Italy, etc.—for posts in the Library because they wish to learn American library methods and cannot afford the journey to the United States. The Library receives many visiting librarians who have heard that we employ American methods. They all show the greatest interest. The week before I left, the Association of Swiss Librarians visited the Library and examined it all in great detail. I find thruout Europe a new and growing interest in library technic. There is, as you all know, in most countries no standardized method; there is a national tendency and the working out of this national tendency depends on the individuality of each librarian. It has been interesting to hear some of the older librarians who realize that a change is needed discuss plans made in 1830.

The personnel of the Secretariat must be selected from every state which is a member of the League, and every effort is made to keep a balance of nationality. This is especially difficult for the departments such as the Library where technical training is most important. I thought at one time that my difficulties were at an end when I heard that Norway had sent a great many of its citizens to study in the American library schools, but I soon found that the Staff Committee would only consider a limited number of Norwegians and that the balance of nationality would have to be considered in each department as well as in the Secretariat as a whole. It is rather entertaining when you need additional staff to say I am short of Italians, Norwegians, etc. I have asked the library schools to send me a list of graduates other than American, but I have not had many names. It is not possible to add Americans to the staff

until the United States takes its place in the League. Most of the Americans—and there are only five or six of them on the Secretariat—were connected with the Peace Conference and were engaged in 1919 before the Treaty was ratified. There are at present seventeen on the Library staff, five of whom have been in American library schools, the others have university training or scholarly background. Women with university training are more difficult to find in Europe than in America. All members of the staff speak English and French and in many cases know many other languages, German, all the Scandinavian languages, Italian, and the Slav languages. The Library staff is a miniature League of Nations. There are Norwegians, Danes, Swiss, Italians, Poles, French, English, Americans, Canadians and an Anglo-Indian. The difficulties that countries have in understanding each other are emphasized when met at close quarters, but it is not only interesting but encouraging to see how soon they all discover that the things objected to or found different are only surface deep, and that, after all, they are fundamentally the same. The repartee is often entertaining and the efforts of adjusting to new customs interesting. I have just received a letter from Geneva saying that things were running smoothly in my absence except that there was a difference of opinion about the windows. The English like to work in a room without heat and with the windows open; Continentals prefer much heat and no ventilation, and I can perfectly sympathise with both sides. You see, America is needed in international disputes. The language difficulty also causes some misunderstanding. Even if one acquires a practical speaking knowledge of a foreign language, it is very difficult to acquire a polite vocabulary. Complaints have been made that certain members of the staff were rude. In talking it over I always met with regrets and with the explanation that it was difficult enough to speak English without being expected to be polite in it. This all proves that the basic scheme for the League is sound—mutual understanding based on mutual knowledge will bring peace and friendship.

An article in the *Industrial Educational Magazine* for November by Thomas F. McHugh, principal of the Boys' Continuation School, Newark, N. J., tells how the boys raised money to start the school library under their own management and control. They began by collecting nearly \$300. The article is of interest perhaps more as showing what may be done thru the library in developing school spirit rather than in developing the library idea itself.

The Leipzig Fair

AS early as 1156 the Leipzig Fair was in existence, writes Theodore W. Koch. In 1268 it received an important franchise from Margrave Deitrich von Meissen. "Even if we are at war with other countries," declared he, "their merchants shall enjoy the privilege of trade with protection of themselves and their goods." Nevertheless, various wars reduced the prosperity of the Fair until after the Thirty Years' War, when it took on new life, and great activity in building resulted. To this activity Leipzig is indebted for the stately palaces of the eighteenth century in the baroque style. The city was so largely rebuilt that Goethe as a young student praised it as a modern city. In former times goods were for sale at these fairs, but the modern fair exhibits samples only, from which orders are taken. The increased success of the fair dates from the separation of the retail from the exhibition fairs. The active growth of the latter has resulted in the centralization of different departments in special buildings constructed for the purpose. A constantly increasing number of visitors has justified rebuilding older business houses and private homes to gain more floor space. The number of exhibitors has increased from 1377 in 1894 to

4253 in 1914, and 12,586 in 1922. In 1914 there were 20,000 buyers, of whom 4220 were foreigners. In 1922 the late spring fair boasted 155,000 buyers, 32,000 of whom were foreigners.

Describing his visit to the fall book fair in the Book Review Section of the *Detroit Free Press* for October 29, Dr. Koch says that the Bugra, as the fair is popularly called—a word made up of "Buch" and "Graphik"—was held in a four-story building in the Peters-Strasse. In addition to the stalls and rooms occupied by the 165 exhibiting publishers there were also exhibitions from manufacturers of paper, school supplies, colored prints and etchings. The second and third floors were given up chiefly to well-known publishers. Nothing exhibited was for sale, but representatives were present to take orders for one copy or wholesale lots. The American librarian found it best to go from booth to booth with his Leipzig agent or representative who arranged for the placing of the orders for any item selected. A good agent was often able to reduce the Valutazuschlag very considerably by indicating to the publisher's agent that the proposed purchases were for an international library, that they were not for sale, or were for the German-speaking people in the United States. Prices were extremely uncertain, and when put on a dollar basis as occasionally happened made it preferable to forego direct ordering for the possibility of picking up the item later on in the antiquarian trade.

Almost no publishers of scientific books were represented at the fair. University professors and librarians would not find much to interest them outside the field of literature and history, with some philosophy, travel literature and occasional maps and atlases.

Children's Room

SHE was librarian and he that read
Sbent to his book and pushed the pages back
With a flat palm, the five square fingers spread,
Till she could hear the pages rise and crack.
So she stood softly, stooped above his chair.
While he looked up with a far-travelled glance,
And heard as best he might—for all the air
Was black with battle, crash of sword on lance,

Some come to fabled cities and their lore,
Doubtful or timid; some will never laugh!
Here was a knight who thundered at the door.
And hacked his way thru every paragraph:
Who took by storm the tale; slew, ravaged,
burned,
And in his zeal crushed every page he turned!

A SCENE IN THE BUGRA

Librarianship—a Profession or a Business?

By C. SEYMOUR THOMPSON
Librarian, Savannah Public Library

I CANNOT agree with LIBRARY JOURNAL's editorial comment* on Mr. Ferguson's article "Humanizing the A. L. A.," which refers to it as a "bright review of the Detroit Conference." The article commences with a diatribe against the American Library Association continues with an indictment of its individual members as beings of very inferior ability, and concludes with a few notes on "dynamic Detroit." Its brightness was not so scintillating that I was completely dazzled, even by the brilliant verbal cartoon of the librarian sending his voice "trickling down his collar." To me, the article seems a combination of ill-founded, generalization and hypercritical censure of a few specific weaknesses. The tone and tendency of the whole is unnecessarily bitter and unwholesomely destructive.

From the specific criticisms it appears that the distressing failings of librarians are manifested in inability to manage properly a huge convention in a crowded city, in failure to transact business with Fordish efficiency and to wrest from the public adequate financial support, and in inability to speak in a large hall with the dramatic effect of a trained orator. Generalizing, Mr. Ferguson finds the members of the A. L. A. "too unearthly, too sublimated, too far off the ground to be able to accomplish their mission of high importance on this earth." They are "still cloistered, still myopic, still quietly unobtrusive."

Mr. Ferguson's specific criticisms have been made many times before, and they may be allowed to stand, *nem. con.* Yet I believe that in many respects sufficient improvement has been made in recent years to entitle the despised genus of librarian to a few words of encouragement to offset the sarcastic ridicule. Our conferences have been sufficiently well managed, under what Mr. Ferguson admits were heavy handicaps, to exempt the leaders from such severe criticism unless it is accompanied by more constructive suggestions than anything which he offers. Librarians have begun to assert themselves in the matter of salaries, and have already had some success. They have endeavored to secure more adequate appropriations; and, if they have not yet persuaded the people to pay for public libraries with no more unwillingness than they pay for public schools, still I believe that most libraries have had a fair amount of success in the last

few years, when we consider the period of depression and retrenchment thru which we are passing. On the whole, I believe there is some hope for our libraries, and for the A. L. A.

Mr. Ferguson's generalizations are without justification, except by tradition and perhaps by isolated examples here and there. How can anyone attend any library conference without being powerfully impressed by the earnestness, the unselfish enthusiasm, the ardent devotion to their profession, with which the group as a whole, and most of the individual members thereof, are inspired? Mr. Ferguson, however, was not at all impressed by this, altho from this spirit has come the past development of the library movement, and on this spirit depends its future success. On the other hand, who can watch an A. L. A. group turn from work to the recreation and play which form an important part of every conference, and accuse them of being "unearthly, sublimated, too far off the ground?" Who can observe the active interest which most librarians take in their community life, and the recognition which most of them have won as vital parts of that life, and countenance the charge that they are "still cloistered, still myopic, still quietly unobtrusive?" Most of us, indeed, are slightly further removed from the "noise and bustle" of our communities than the political ward-heeler, the newspaper reporter, and the "man in the street" generally. There may even be a few librarians among us who are still in some ways "quietly unobtrusive." But this aloofness, this unobtrusiveness, is not sufficient to justify even the general public in clinging to the old-time conventional portrait of a librarian as an unearthly kind of creature of the type depicted by Mr. Ferguson. It certainly is not sufficient to justify a librarian himself in perpetuating the misconception by such sweeping charges as Mr. Ferguson has made against the A. L. A.

Moreover, such aloofness from public life as may still exist is, in general, an indication not of complete detachment from the community, but of difference in relationship, of difference in viewpoint, between the librarian and the man in the street, the man who is absorbed entirely in the pursuit of material prosperity. For my own part, I believe it is desirable that this difference should continue; that librarians should not be drawn into the very center of the whirlpool of modern life, and be made utterly indistinguishable. But this depends on the view which

* L. J. 1 Nov. 22.

we take of the true purpose of the library and the proper functions of the librarian, and I suspect that my view differs from that of Mr. Ferguson.

What is it that Mr. Ferguson means by being "humanized?" What does he want for the A. L. A.? Vaguely, the A. L. A. "stands in need of being brought more closely in touch with human affairs"; it should become "a cog of first importance in the big world machine"; librarians should obtain "knowledge of new conditions and people, and an interest beyond their field, limited too often to a view from behind the charging desk." Mr. Ferguson seems to be pointing the way out of our sequestered sleep, but he does not give his directions explicitly enough to make them intelligible. Of constructive criticism in his paper, there is none, save as we may infer that the librarian should become the converse of all that he has depicted. Of the method by which this metamorphosis may be brought about, there is no suggestion, save the unsatisfactory hint that, "if strenuously sought," what he considers the "essential qualities and characteristics" might be attained. What these essential qualities and characteristics are, we can only infer from the nature of his criticisms and of the things to which he points as being worthy of emulation.

In the *Nation* of November 1 is an article on "Michigan: The Fordizing of a Pleasant Peninsula." My own knowledge of Michigan is confined to a week in Detroit and one day in Ann Arbor, and I do not know how reliable the writer's statements may be, or how just his criticisms. But the article seems to me to portray well the most pronounced tendency of American life today. It begins with a quotation of the Latin legend on the Michigan state seal, "If you seek a pleasant peninsula, look about you." Continuing, the writer says: "Actually, it is with quite different sentiments that the Michigander looks about him.—Some day some convention of salesmen will agree to a much more appropriate coat-of-arms for the new Michigan. It will picture the lean cheeks and the death's-head smile of Henry Ford, in the halo of a spare tire, flanked by chimneys and flivvers on a ground of soot. Underneath, in place of the stately Latin, will be inscribed the more salesmanlike legend, "Always in the Lead." It seems to me that it must be something like this that Mr. Ferguson wants for the A. L. A. His "essential qualities and characteristics" are capacity for business organization, for aggressive salesmanship, for big profits and financial success. Let us forget our secluded life of other days, the fact that we were once called scholars, that we were book-lovers. Let us be efficient. Let us keep "Always in the

Lead." To be humanized, we must become thoroly Fordized.

This interpretation is justified, I believe, by the entire trend of Mr. Ferguson's remarks. Search his article carefully for a hint of one thing in the Detroit conference, professionally, which he found interesting or valuable. You will find nothing. Apparently the only things in the entire conference which met his approval were the registration fee, which indeed was too small and was inefficiently collected, but still showed that "even the A. L. A." was developing a faint trace of administrative intelligence; and the entertainment features, which he considers "events of first importance in the humanizing of the A. L. A." This, by the way, seems rather illogical, when we remember that delightful entertainment has been a feature of the annual conference for a great many years; yet, according to Mr. Ferguson, we still remain unhumanized. Are we to infer that we have not sufficiently developed this approach to salvation, and should resolve our conferences wholly into pleasure-seeking excursions?

If the conference contained nothing that was good, wherein do we find the cause of failure? We are told that our "various members do not work in co-ordination"; we are individualists, and "do not run well in the pack"; we do not transact our business, either in the Association or in the Council, with "Plan, Method, System, Precision of Action"; our conventions are not organized on a business basis; we should have "a sergeant-at-arms and an efficient corps of assistants" to see that proper order is maintained during the meetings. In general, the functioning of our "large but static order" is contrasted unfavorably with "the functioning of that great dynamic city," Detroit, in which we are shown "a good example of progress." Can there be any other conclusion than that these things exemplify the "essential qualities and characteristics?"

But if the professional side of the conference counted for nothing, and if it was sadly mismanaged on the all important business side, Mr. Ferguson, nevertheless, makes an interesting admission. "There are always, however, interesting features about these annual gatherings." Reading on, breathlessly, to see what these interesting features can possibly be, we learn that they center entirely about the annual opportunity to visit a new city or locality, where we can obtain knowledge of new conditions and people, and can open our myopic eyes to the fact that from behind our charging desks we do not see the entire world. Very good; travel has usually been admitted to have a broadening influence on the mind and vision, and to impart culture.

How was Mr. Ferguson's mind impressed by Detroit? Why, look you: The city doubled its population in ten years, jumping from half a million to a million of dynamic inhabitants. It is "a very popular convention city." "It is full of life and activity." It has cultivated the art of hospitality with surprising efficiency, and made a business of it. Its river is "made picturesque by the dachshund of water commerce, the ore vessels." As an added attraction it offers "the bewildering complexity of the Ford plant."

The bigness of it all, the busyness, the complexity, the organization, the dynamic efficiency! These are the things which impressed Mr. Ferguson at Detroit; these are the things which must be injected into the A. L. A., into our individual libraries, into ourselves as librarians. Then we shall become "a cog of first importance in the big world machine." Then we shall be humanized.

These things which Mr. Ferguson cites were, of course, very impressive. But remember that they were not a side attraction; to him they seem to have been the only things in connection with the conference which were worth while. We are prepared to read his comment concerning the recruiting problem. "As a matter of cold fact," he says, "is the problem of recruiting not merely one of figures? — Yes, just plain money in sufficient quantity will fill the library ranks; and I, for one have no fear as to the quality of the recruits." Now of course success in recruiting depends very largely on ability to offer adequate remuneration, in salaries that are something more than a bare living wage, and are at least comparable with the salaries paid for positions of equal importance in other occupations. But Mr. Ferguson's way of phrasing this fact, taken in its context, seems to imply something more than this. "Plain money, in sufficient quantity, will do anything."

If this is not his idea, it at least is the idea which would follow logically from emulation of the things which he finds so admirable. "Just plain money in sufficient quantity" is all that the business man would tell us that we need; but it would not keep up the standards under which the library profession has hitherto developed. We might be more successful organizers; we might be publicly recognized as on a par with prosperous salesmen and promoters; but the profession of librarianship would degenerate from a profession of service to others into a promising business field of hustling competition and self-serving rivalry. This may, perhaps, seem far-fetched; but once we have accepted the "big business" view that plain money will do anything, we are on our way to the view that plain money is the only thing that is worth while.

In his essay on "Learning" John Jay Chapman says: "We have all heard men bemoan the time they have spent over Latin and Greek on the ground that these studies did not fit them for business,—as if a thing must be worthless if it can be neither eaten nor drunk. It is hard to explain the value of education to men who have forgotten the meaning of education: its symbols convey nothing to them." And, further: "It has thus come about in America that our universities are beginning to be run as business colleges. They advertise, they compete with each other, they pretend to give good value to their customers. They desire to increase their trade, they offer social advantages and business openings to their patrons. — This miscarriage of education has been developed and is being conducted by some of our greatest educators, thru a perfectly unconscious adaptation of their own souls to the spirit of the age. The underlying philosophy of these men might be stated as follows: 'There is nothing in life nobler than for a man to improve his condition and the condition of his children. Learning is a means to this end.' Such is the current American conception of education. How far we have departed from the idea of education as a search for truth, or as the vehicle of spiritual expression, may be seen herein."

There must, of course, be in all of us an "unconscious adaptation of our souls to the spirit of the age." The course of library development must be responsive to the spirit of the age. In so far as this law has been responsible for the modern development of library service along lines of practical utility, commercial, mechanical, sociological, and what not, the attendant changes in the nature of our libraries could be regretted by no one. Nobody would for one moment wish to return to the time when libraries, like other educational institutions, were confined in their scope mainly to the classics, belles-lettres, and cultural education: when the librarian was a scholarly recluse, living only in and for his books, "removed from intimate contact with the noise and bustle of his community." But there is such a thing, I believe, as being too responsive to the spirit of the age; of allowing it to absorb us too completely. Mr. Chapman has shown, fairly and sanely I believe, how our colleges and universities have reacted to the view that money will do anything. Are our libraries to be as seriously revolutionized in the same manner?

I must confess that I, for one, dislike the thought of the older idea of education as something of cultural, non-commercial value, being entirely supplanted. Vocational training, courses in business administration, in applied economics,

and many other recent innovations, are excellent things in themselves, if they are not carried to an extreme. So, too, was the older education an excellent thing, when not carried to an extreme. The library must respond to the spirit of the age. But can it not also hold itself sufficiently aloof to preserve, as it were, the balance of power; to help keep alive the best of the older régime, while helping to further the development of what is best in the new? Can it not render service of practical value, and still combat the idea that the only education that is worth anything is education which will fit people for business, which will help them improve their own, and their children's, material condition?

Many libraries are doing just this. But they will cease to do it if they accept the view that "just plain money in sufficient quantity" will do anything, and is the only desideratum in life. In the last generation we have made considerable advances toward more efficient business administration. In the future we shall make still further advances. But between professional workers and business men there are certain differences which are inevitable and ineradicable; differences of education, of training, of object, of method, of viewpoint. Those differences we should not try to remove, if we want to retain our place among the professions. We cannot copy the achievements of big business without copying its methods. We cannot successfully copy the methods without absorbing the spirit. We cannot absorb the spirit, and remain a body of professional workers, of non-commercial ideals, whose object is "the diffusion of a knowledge of good books."

This is why I believe as I have stated above, that it is well for librarians to stand just a little aloof from the thickest of the modern struggle for life; to view the world with a little detachment. Even tho it may expose us to some derision as unearthly, sublimated, cloistered, and myopic, I, for one, do not care. For I believe that our influence will be better, stronger, and more enduring, than if we succumb entirely to the school of modern dynamics.

The Federated Library Convention

To the Editor of the LIBRARY JOURNAL:

I have read with much interest the discussion by Mr. Ferguson and Mr. Lee in a recent number of the LIBRARY JOURNAL. In my position as secretary of the National Association of State Libraries, I noted the absence of proper provisions for consultation between members having kindred interests.

Leaving aside the social amenities of the conference, in a large city convention it is extremely difficult to locate people and the lack of ade-

quate facilities for group conferences of a large or small nature was evident at the Detroit convention. In spite of inadequate facilities, a series of spontaneous group meetings were organized by librarians representing banks, insurance and art departments and in addition certain industrial librarians conferred with a representative of the Packard Motor Car Company concerning market analysis.

The State Librarians found themselves housed in the same hotel with a convention of Maccabees. The crowded public rooms did not present suitable meeting places and thru various exigencies the meetings of the Association were transferred from one room to another at the whim of the management.

During the conference I suggested to Secretary Milam that another year we should arrange a suitable consultation foyer or concourse where the various groups could be assigned designated spaces and where persons interested in a sub-division, section or department of any one of the various Associations in conference could meet for consultation and for small group meetings. The newcomer at our conference is at a disadvantage. He or she is apt to know few persons and in the confusion of meeting rooms drifts aimlessly and becomes dissatisfied with the entire conference. A consultation concourse located in a convenient portion of the headquarters hotel would be of great benefit to the red ribbon wearers and would enable the various members to focus their interests to a far greater degree than in previous conferences.

Mr. Lee's title, "The Federated Library Convention," would place the various Associations meeting in conference on the same plane and such a suggestion may be worth considering from the point of view of publicity.

I hope that the pungent criticisms of Mr. Lee and Mr. Ferguson will not fall on barren ground, but will have a bearing on future conferences of the A. L. A.

HERBERT O. BRIGHAM,
Rhode Island State Librarian.

In the November *North American Review*, John Cotton Dana writes on "Changes in Reading," discussing in his characteristic way the effect of recent social and economic changes upon reading, and conversely the effect of reading upon these changes. Among the changes discussed are the development of the power press, advertising and the use of print for propaganda purposes, by governments, and institutions. According to Mr. Dana the number of books loaned by public libraries decreased as the movie became popular, a statement which does not coincide with the experiences of many libraries.

A System of Libraries of U. S. Government Publications*

LIBRARIANS, whose experience goes back over a period of twenty-five or thirty years, realize that publications of the United States Government have attained in recent years a much wider usefulness and have come to have a far greater educational value for the general public than was dreamed of a quarter of a century ago.

Without doubt much of this progress is the direct result of study given to the problem by librarians and to the co-operation of the government and the A. L. A. I fancy that as a rule, "Pub. Docs." are no longer relegated to a dark and dusty limbo the seclusion of which is disturbed by a "Gentleman with a Duster," perhaps only once in every two or three years.

But there seems to be a possibility of much further advancement in bringing government publications to the front in popular education and general utility.

In responding to the questionnaire sent out by the Subcommittee on Public Documents last year, I ventured to include in brief outline, a plan I had in mind for libraries to be established by the government and to be distributing centers of U. S. Government publications for all other libraries in the state.

This plan, so far as I know, is original but perhaps because it was sent to the committee too late, or perhaps because it was thought to be too visionary, it was not included in the report based upon the questionnaire and made at the Swampscott meeting. At the request of Mr. Meyer, Chairman of the Committee on Public Documents, my suggestions of last year are now repeated, as follows:

1. There should be established in the capital city of each state, a library of government publications.

2. In each library of government publications there should be collected, as far as possible, every publication of the United States—past and present—also all publications of the state in which the library is situated.

3. The beginnings of these government document libraries could in many cases be made in the present state libraries, where, of course, a large percentage of the Federal Government publications, in some states is already assembled. But as soon as possible each capital city would have its government library building, which should be in close proximity to the state capitol and state library.

4. Each state library should be asked to turn over to the local United States document library all federal government publications in its possession and the state should supply, as far as possible, a complete set of its own legislative documents and other publications.

5. Each library of government publications should have as librarian a highly trained expert in this work. It would be the duty of this librarian to keep in close touch with every public library in his state; to forward, on request, any document required for temporary use in any such library, or to furnish in writing, on request, specific information to be obtained from government publications and not otherwise accessible to such public library. Information obtainable from government publications would also be furnished to any citizen of the state, thru the local public library, should there be one in the town of the citizen making inquiry, otherwise directly to the citizen.

The highly trained librarians of these libraries should be under civil service and not subject to removal at the desire of any politician. Under the direction of a central control, vested perhaps, in the Librarian of Congress, they would do a great amount of indexing, compiling, exposition and publicity work, which would result in making the literature of government publications vastly more serviceable to the country than is possible under the present system.

This system would liberate miles of shelving in costly library buildings, which shelving might then be used for books in every-day use, about six volumes, to one, of *Congressional Record*.

The depository public libraries of the first and second classes would continue to take all the scientific and many other publications of the government, but few, except the largest libraries would give many hundred feet of valuable shelf-room to long sets of *Congressional Globe*, *Congressional Record* and Senate and House documents. The space occupied by these publications and the time consumed in handling them seems, in most libraries, to be out of proportion to the good received from them. Under any such system as I have suggested there would be no excuse for the custom, still followed I believe, by some congressmen of distributing tons of public documents to be sold as waste-paper, by their loyal constituents, and the saving which would result in this and in the reduced number of documents sent to public libraries as well as other economies that might

* Paper read at the Public Documents Round Table at Detroit, June 28, 1922.

be effected would go far towards balancing the cost of the proposed libraries.

There are many volumes of Senate and House documents which would answer fully every purpose of the student of politics, economics or history, if issued in very condensed form, provided the editing were done by competent hands.

From the shelves of our library I take at random a book which proves to be one of five fat volumes containing the stenographic reports of the debate of reciprocity with Canada, which occurred in the Senate in 1911. This I judge to have been a somewhat important and rather interesting incident in the interminable tariff discussion, but I fancy that everything essential to a sufficiently clear and thoro understanding of the whole matter might be condensed, perhaps, into one volume. Of course the full report should be printed but in a much smaller edition than is now customary. The saving would more than pay the cost of the work on the condensed edition which would be wanted in most libraries.

This document is probably only one of very many which might be treated as above suggested, to the advantage of all concerned. The proposed work of editing and condensing might be done, as already noted, in the libraries of United States publications. On the other hand, there are departmental publications which do not admit of condensation and the complete sets of which are far too bulky for small libraries, while at the same time reference to them may occasionally be desired in any small town; the Patent Office *Gazette* and complete files of the *Specifications of Patents* are important examples of this kind of publication.

The libraries of government publications should of course have complete sets of these and the librarian should be competent to handle them even to the point of making searches when required.

Assuming for the moment, the possibility of setting up a system of libraries such as I have suggested, it should be noted that they might be established one by one, or two or three each year, beginning with the more important and populous states. Adjacent states of comparatively small territory might be served by one library: Rhode Island from Boston; Vermont and New Hampshire from Concord, etc.

Possibly a trial of the proposed system might be made in connection with one or two state libraries that are exceptionally well equipped in library staffs and buildings, such for example, as Albany or Hartford.

GEORGE F. WINCHESTER, *Librarian.*

Paterson (N. J.) Public Library.

Sic Transit T. D. 39108

TREASURY DEPARTMENT

Washington, D. C.

November 29, 1922.

Division of Customs.

To Collectors and Other Officers of the Customs:

You are hereby instructed that the Department's regulations with respect to marking to indicate the country of origin of articles imported into the United States are not to be applied to books, catalogs and other printed matter imported by and for the account of public libraries or library associations for their own use and not for sale.

(signed) EDWARD CLIFFORD,

Assistant Secretary.

So ran the Treasury Department's Thanksgiving message to libraries and so ended six months of floundering in the meshes of red tape. It is extraordinary but none the less true that as much time and energy were required to get correction of this mere blunder of honest officials as to win a national tariff fight of unusually menacing character. There was a hearing before the Secretary of the Treasury, and one before an Assistant Secretary, besides six other trips to Washington, and one to Atlantic City for conferences.

The facts were never in dispute. The hardship upon libraries was at once admitted, as well as its folly. Their satisfaction of the law's intent during the thirty years of its existence was not denied. In fact the requirement to mark unquestionably foreign books was a departmental accident, and the higher officials lost no time in expressing their conviction that we should be given the desired relief, without, of course, freeing the masqueraders.

The strict constructionist, however, was also there. Consistency was his god, and six months of pleading failed to move him till the Department's desire was made too manifest to ignore and surrender came an hour after sunset. The trouble was a fear that if foreign imprints were allowed as declaring country of origin, the makers of other merchandise might allege discrimination. But, what else has a title page, and what is a title page for?

Before dismissing this incident, two other statements are necessary to the completeness of the record. The first is that the text of the present order is faulty. The libraries never asked for exemption from the Department's regulations. The order seems to grant that. Our request was for the continued recognition of our accustomed practice as lawful. To this end we

proposed "that if such imprint be on title leaf or cover and exclusively foreign, such publication shall be deemed in compliance with said Sec. 304." The effect of this formula would have been the same as that of the order actually issued, but it is free from the superficial charge of favoritism.

The final stone in the wall is an acknowledgment of our indebtedness to Senator Charles E. Townsend, of Michigan. He early took up the cudgels in our behalf and never lagged till success came. He wrote and conferred, and balked at no demand on his initiative. It is doubtful whether we could have won without his aid.

Another treasury decision is worth here reporting. The Department has overruled the claim made at certain ports that the new tariff act limits to a single copy of a publication the number that a library may import free of duty. If met with such difficulty, address Col. Edward Clifford, Assistant Secretary of the Treasury, and refer to Letter 110,435. Libraries may import at one time as many copies as they like.

M. L. RANEY.

Bargains Again

IN its issue of November 15 the LIBRARY JOURNAL prints an interesting letter from The Macmillan Company. The letter was occasioned by a random sentence in a bulletin issued by the Book Buying Committee of the American Library Association in the LIBRARY JOURNAL of November 1, to the effect that this Company lists the Cambridge University Press books, which it handles, at nearly forty cents a shilling. In rebuttal Vice-President A. H. Nelson sent to the LIBRARY JOURNAL the complete price list of its 177 titles purchased from the Cambridge University Press during the present calendar year. The average rate for the whole list, according to the Editor of the LIBRARY JOURNAL, is about 33.3 cents. Here is a question of fact, which it ought to be easy, tho possibly tedious, to settle.

Our statement, for which I am personally responsible, is a summary reference to a discussion which took place before the American Library Institute at its Atlantic City meeting, April 28, 1922. See the LIBRARY JOURNAL for May 15, 1922, at page 468, where the exact figure is given at 38.3 cents a shilling. This figure was arrived at by a comparison of the first 500 titles in Macmillan's 1921 Catalog of Importations and the corresponding London edition of the Macmillan and Company's catalog. At that time the 1922 edition had not appeared. These 500 titles include not merely the publications of the Macmillan house itself, but those of the Cam-

bridge University Press, Society for the Promotion of Christian Knowledge, Black, and others whose publications they handle in this country. In the list the Cambridge University Press certainly bulks large. A subsequent checking of the 1922 catalog for a couple of pages seemed to show such slight deviation as probably to account for no greater divergence than a fraction of a cent, from the average above given.

So much for the basis of the statement we made. Now for the answer. I have not had the time to check the entire 4000 titles of Macmillan's 1922 list of importations, nor to do this for the 200-page Cambridge University Press catalog of 1922. But I have checked the first 100 titles in the Cambridge Press catalog of 1922 with the corresponding titles in the Macmillan list of the same year and find the average price per shilling to be 38.5 cents. Perchance these titles are not typical, but also perchance the Macmillan Company, under criticism, has changed its policy. If so, all praise. If the 38.3 cents rate applicable till the spring of 1922 has, in its purchases during 1922, dropped to 33.3 cents, the Company and the public are to be congratulated, tho to buy at such rate, even with discount, remains unprofitable, and the new plan if existent is not yet retroactive.

M. L. RANEY.

"What a Farmer Reads When He Reads" is discussed by Ray F. Pollard in the *American Agriculturist* for November, 1922. The article gives the result of a survey in New York State of the reading matter, papers and magazines in 100 farm homes in the most strictly American county in New York State. The writer distributed his investigation over representative farms in nearly 100 school districts, so as to give as great a variety as possible, the leading farmers in each school district rather than every one in a given area. In that respect the result is not typical of the average reading of farmers. The average in these 100 homes was 9.82 papers to each farmer. 132 different newspapers and magazines were taken in these 100 homes. 92 per cent of these farmers took the *Farm Bureau News*, the highest of any one periodical. Of the religious papers the *Christian Advocate*, the *Christian Endeavor World*, and the *Christian Herald* were the leading publications, and the *Ladies Home Journal* was in 20 per cent of the homes. Of the general magazines the *American* was most commonly found. The highest number of papers and magazines taken by any one farmer was 22. S. H. R.

Recruiting for Children's Librarians*

By CLARA WHITEHILL HUNT

Superintendent of the Children's Department, Brooklyn Public Library

IN last April's *Public Libraries* appeared an article by Mr. Stevens called "Library Recruiting from the Library School Standpoint." When I had finished reading Mr. Stevens' paper I knew exactly how the girl felt who exclaimed, "I like Shakespeare. He expresses my sentiments fine!"

From the moment I received the command of my superior officer to speak on "Recruiting for Children's Librarians," I knew that I should not talk about addressing vocational guidance conferences, getting articles into popular magazines, distributing circulars in the colleges and so on. I knew that I must, at the risk of being misunderstood, try to induce librarians to believe that the most essential kind of recruiting would be a recognition of children's librarianship as a profession and a demand that all who enter it meet requirements at least as high as those demanded by other professions with which we fondly consider ourselves equal.

In these times of famine, and when low salaries are considered a large reason for the dearth of children's librarians, it may seem a bit mad to insist that now is the time to raise the requirements for admission to the ranks, and that to do this is more important than to raise salaries. Yet in a calling whose existence depends upon the taxpayers' appreciation of its value, a very high quality of service must be our first argument for increased salaries; and large salaries will not draw the kind of women our work needs if our standards make them feel that the children's librarian is really no more than a nursery governess in a public building.

Those who advocate special training for the worker with children in any field usually find themselves up against the instinctive opposition of reverently loyal sons and daughters of those wonderful "born mothers" who, blissfully ignorant of the jargon of child study, raised fine children. These sons and daughters point scornfully to the dismal failures of parents stuffed to the teeth with book theories; and the case against attempting to teach anyone how to train children is complete. In the library profession the names of our splendid Mrs. Sanders and Miss Hewins are cited to prove that it is the natural gift, not the library school which makes the successful librarian for children.

Now I have never seen a library school circular which announced that candidates with extraordinary natural gifts need not apply, for the school furnished those commodities, along with the text books; and every "born mother" of my acquaintance today is eagerly grasping for the training which earlier generations lacked to their sorrow.

To agree that the child's doctor, nurse, teacher, playground director, shoemaker, dressmaker, and cook, should be trained for their jobs and to think that the person who may make or mar the child's life by the books she puts into his hands does not need special training is surely curious.

"But why imply that the library profession thinks such a thing?" you ask.

For answer I point to the census figures of eighteen million school children in the United States and then to the list of less than seven hundred people in this whole land, who even claim the title children's librarian. I remind you that there are great city library systems after a quarter century of modern library work with children having but one real children's librarian on the staff; that departments formerly filled with trained children's librarians report long-standing vacancies and entrance requirements lowered since 1917. I think of more than one chief librarian who, after searching vainly for a trained and experienced candidate to appoint superintendent of his children's department finally accepted an inexperienced graduate of a one year general library school who had listened to half a dozen lectures on library work with children and gained a tourist's view of a few externals of the work.

If librarians really believed in the children's library as an educational institution would they tolerate appointing as adviser to the children, parents and teachers of a city a girl whom, in progressive states, the newest teacher outstrips in preparation for her field by training both theoretical and practical?

Do I seem to be "knocking" chief librarians and library school directors particularly for conditions? That is far from my thought. The most vigorous sermons are apt to be those in which the preacher hits himself hardest. I reproach myself today for the little I have ever done to help the cause of training. The graduates of our Brooklyn Training Course for Children's Librarians we appropriate for our own

* Paper read at the third general session of the A. L. A. at Detroit, June 28, 1922.

staff, and I can take no credit for having opened that course in 1914. I was pushed into it by my Chief who got tired of hearing me complain of the want of children's librarians while I did nothing to supply the need.

Do I appear unappreciative of those children's librarians by divine gift who never saw college or library school? I should be disloyal to our best leaders if I were.

To any who may think I make a fetish of training I quote Mr. Dewey's "You can polish mahogany but you can't polish a pumpkin," and remark that between the library school pumpkin and the mahogany without school polish I choose the latter unhesitatingly; but I do not call it sound argument to place over against a library school failure, an exceptionally gifted person who knew how to train herself and then conclude that library school training is unnecessary.

There are imperative reasons today which were not evident a few years ago for the children's librarian's being highly trained for her work. The growth by leaps and bounds of the school library idea is going to leave the children's librarian trailing along in the wake of the teaching profession unless she is grounded in her own profession's body of doctrine.

To quote Mr. Stevens again, "The library school is not designed to educate the librarian but rather to equip the librarian to be an educator." What respect will the best teachers have for some of our children's room "educators" when they take more notice of the standards of citizen training shown in some of our public libraries—lawless children, shabby, ill-treated books, shelves of time-wasting story books which contribute nothing, lead to nothing except mental laziness in the child reader, and other unmistakable signs of low grade work.

The publicity which the library profession is now receiving is another and an urgent reason for our offering highly trained service thru the children's room. Without a right understanding of her place in the educational scheme, the zealous children's librarian may become a mere "reed shaken in the wind" of her own eagerness to oblige. Thinking she must "co-operate" at all costs, she is swept along by every local and trivial "drive" until her book money is spent on subjects of passing interest at the sacrifice of the supply standards; her school class visits are conducted according to plans made by the teacher, not thought out by the librarian; a disproportionate amount of her time is given to advertising the children's room by outside speaking and story telling when a careful study to make the goods better worth the advertising is more needed.

Being a children's librarian I have not outgrown my liking for playing games of "make believe." I am going to "make believe" for a minute that everyone in this audience agrees to the need of our training many children's librarians, beginning now, and that each person asks, "How can I help?"

To children's librarians blessed with training and experience I would answer, "Pay your debt to your profession by opening next fall a training course for children's librarians and send the summer planning the course and choosing candidates from your communities. Do not any longer, if you are head of a children's department, depend for your supply on enticing children's librarians away from other libraries, and bemoan the shortage when that supply gives out."

I would urge chief librarians to encourage and help their children's librarians to establish these training courses. I would beg them not to lower standards when vacancies occur by placing in the children's room that member of the staff who hasn't brains enough to do satisfactory work in other departments but who declares she is "just crazy about children." I would ask them to reward high grade work with high salaries; to make effective the abilities of a gifted children's librarian by giving her adequate support, not expecting her to carry out city-wide plans with the help of a staff composed of one part-time school-boy page.

I would implore every director of a general library school to have in the school's curriculum a required course in work with children such as would give to graduates a sense of the educational value of the children's library and a knowledge of the basic principles on which the work should be founded.

To trustees I would say, "Before deciding that you will not pay your children's librarian a cent more than you give your stenographer, study the salary scale of teachers in progressive cities, consider the equipment of your children's librarian in comparison with that of such teachers, then pay a salary that will not cheapen the library profession in the eyes of your community."

To state library commissions my word would be "Go on with your good work of raising the standards of children's book selection in your libraries; aim to add, as soon as possible, an expert children's librarian to your headquarters staff; plan a future when every county shall have a children's librarian to watch over the little libraries which cannot pay individually for expert help; conduct summer courses in library work with children to aid the small town librarians eager for instruction in this work."

And finally, to make this truly a game of "make believe," I would hale into this court that devastating army of young men who persist in using the children's department as a matrimonial bureau and in leading to the altar so many of our promising children's librarians before the ink is dry on their training school diplomas. Relying on their sense of fairness and their glow of gratitude for happy fortune, I should confidently expect to secure from them this promise: That, when years brought the success bound to come to those so able as to achieve the position of husband to a children's librarian, they would, as library trustees, state library commissioners and wealthy philanthropists pay their debt by establishing training schools for children's librarians in every state of the Union.

The Copyright Bill

THE following are the most important clauses of the Copyright Bill as modified since its introduction into Congress.

SEC. 5. That on and after the date of the President's proclamation as provided in section one of this Act foreign authors, not domiciled in the United States, who are citizens or subjects of any country which is a member of the International Copyright Union, or whose works are first published in and enjoy copyright protection in any country which is a member of the Copyright Union, shall have within the United States for the term of copyright prescribed by the said Act of nineteen hundred and nine, including the right of renewal, and beginning upon the date of said proclamation for all of their works for which copyright is subsisting at such date and for all of their works first published thereafter from such date of publication the same rights and remedies in regard to their works which citizens of the United States possess under the copyright laws of the United States, and the enjoyment and the exercise by such foreign authors, not domiciled in the United States, of the rights and remedies accorded by the copyright laws of the United States shall not be subject to any formalities, and they shall not be required to comply with the provisions of the copyright laws of the United States as to notice of copyright, or deposit of copies, and registration: *Provided, however,* That the duration of such rights in the United States shall in no case extend beyond the date at which such works fall into the public domain in such country; and *provided further,* That no right or remedy given pursuant to this Act shall prejudice lawful acts done or rights in copies lawfully made or the continuance of enterprises lawfully undertaken within the United States prior to the date of said proclamation.

SEC. 6. That during the existence of the copyright in any book the importation into the United States of any copies thereof except second-hand copies shall be, and is hereby, prohibited, except with the assent of the proprietor of the United States copyright after deposit of two copies as required in section twelve of the said Act of nineteen hundred and nine, and in the case of a book by a foreign author not domiciled in the United States when such book has been published in this country under an assignment of the United States copyright recorded in the Copyright Office: *Provided, however,* That except as regards piratical copies, such prohibition shall not apply:

(a) to any book published in the country of origin with the authorization of the author or copyright proprietor when imported, not more than one copy at one time, for individual use and not for sale, or when imported for use and not for sale, not more than one copy in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary philosophical, scientific, or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school, or seminary of learning, or for any State, school, college, university, or free public library in the United States, provided the publisher of the American edition of such book has within ten days after written demand declined or neglected to agree to supply the copy demanded;

(b) to books which form parts of libraries or collections purchased en bloc for the use of societies, institutions, or libraries designated in the foregoing paragraph, or form parts of the libraries or personal baggage belonging to persons or families arriving from foreign countries and not intended for sale.

(c) to works in raised characters for the use of the blind;

(d) to works imported by the authority or for the use of the United States;

(e) to the authorized edition of a book in a foreign language or languages;

(f) to a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright proprietor unless such newspaper or magazine contains also copyright matters printed or reprinted without such authorization: *Provided further,* That copies imported as above may not lawfully be used in any way to violate the rights of the proprietor of the American copyright or annul or limit the copyright protection secured by this Act and such unlawful use shall be deemed an infringement of copyright.

New Periodicals

The latest born of library house organs arrives with astonishing promptness. It is the six-page *Library Bulletin* of the Central Missouri State Teachers' College of Warrensburg, Mo. Dated December 15, it reached us a couple of weeks ago. This number explains the working of the Rental Collection and lists the books available thru it.

Another new bulletin is the *Library Notes* published by the North Carolina College for Women Library of which the first number is dated October. Articles on literary subjects, and on school libraries in North Carolina and lists of recent accessions fill the substantial two first numbers.

Syracuse has one more publication, this time mainly for local circulation. It is *The Friend of Reading*, the news leaflet of the Friends of Reading whose organization was recorded recently. A number is to appear in advance of each meeting of the society.

Another association bulletin is *D. C. L. A. Doings*, a sizable mimeographed publication which aims at keeping members of the District of Columbia Library Association informed regarding one another's activities in the library field.

What Constitutes Adequate Library Training?

WHEN I was asked to discuss this subject I replied that the second part of the suggested title topic, "What Constitutes an Adequate Salary," did not appeal to me particularly and I received permission to touch upon it only incidentally. As to adequate education, of course the obvious answer is, "all that one can get and of the broadest description," but as we are confronted with practical questions we had perhaps better define the field. First, a few words about the subjects to be pursued. I think it still is certain that the majority of people think of the library as a repository of literature and of history. We have had surveys of high school libraries which show this; and we see it in tests for admission to library staffs and library schools; if we read the *Publishers' Weekly*, we see that there are more books published in those lines; and if we study circulation statistics it is much the same. So the librarian of a small library, or the general library assistant needs these subjects for an "adequate" preparation. But increasingly technology and science are making their demands, and business, art, and music, are creeping up, so that the coming library assistant must have a broad knowledge. Since one can not be an expert in all these subjects, some carping critics would say that this plan would make us superficial, but it is not a paradox in library work to-day to say that what outsiders call superficiality is with us a necessity, of course saving ourselves by adding that this mass of superficialities is but the foundation for the deeper knowledge we expect to acquire.

That brings us, then, to the amount of education required for this future librarian. Is anything less than high school adequate for any library position? It is so proposed in a certification plan of one of the States and I suppose almost anyone of you could name somebody who worked up to high position who never finished his high school course, but in general a high school course is necessary for a library worker, especially when the majority of adult users of the library is, or is becoming, a high school educated class. A full college education is better if indeed the librarian is to be a leader rather than a follower, and graduate work in a special line is an aid to the specialist. Of course one will say that this is not possible, either for those already in library work or who wish to enter in the next few years, and indeed it is not possible from the library's standpoint, until the general average of education is higher. If this is true, then we admit that the average

librarian is not equivalent in education to the average high school teacher and incidentally, therefore, should not have an equivalent salary.

Again, if it is true, we must face the situation of what to do with this present class of non-college graduates who are library assistants. Is it not possible, say a good many, for the reasonably intelligent and ambitious person to educate himself, and again you can all point with pride to this man or that man who has done that very thing—that is, become an intellectual leader without having a college education because he has made good use of his time and read much and wisely. I know of two men teaching in colleges who never went to college, similarly ministers and librarians and leaders of the bar. But the ordinary person who must be self-educated, if educated at all, does not come in the above class, mainly because he is not systematic and continuous in his studies; therefore, for him advantage must be taken of any available aids to study. Fortunately we have the correspondence course, the evening courses, and the summer schools. Some people take this work and gain the advantage without thought of the credit, but since we have salaries in the backgrounds of our consciousness, we must realize that sometimes libraries think more of credits than they do of culture that is not so tagged. Hence, it would be wise for the high school graduate library assistant to take his courses where credit is given, which is entirely possible, and not to slip up at the last minute and fail to get the credit.

Supposing the library assistant is moved by a desire for knowledge and not by a desire for credit and money; should the library recognize achievement? Off hand I know of four libraries which do, and there must be a larger number. If this could become more general, then librarianship would truly become a field of opportunity in every sense of the word. Now, supposing our library assistant works faithfully and long and after many years, having escaped marriage and other pitfalls, gets a degree. The mercenary person will then say it is time to stop studying, but the rest will say that it is time to go ahead more intensively. What do we mean by this? We mean not in order to get an A. B. or a B. S., one must take certain subjects in different fields so that the degree may indicate a knowledge of methods and what there is to be known, but after one reaches that point one can specialize according to need or desire. By need I mean in that particular person's library there is no one to look after the techno-

logical books and so our middle-aged A. B. decides, despite her yearning for poetry, to throw herself into the breach. She becomes a specialist whom more people consult than any other, and, as a result (alho we hate to mention it), her salary is raised. Or if there is no particular need she studies poetry as she desires, becomes an authority and altho we try to refrain from mentioning money, she gets some of her articles or her addresses published. I know a man who achieved a librarianship because of his great interest in coins. I know of another man who because he specialized, this time on tariff, became President.

Now, of course, much of the above has been written with the large library in mind, but I feel certain it is true that the librarian who is in sole charge of a small library in the country can, with certain conditions changed, achieve the same results. Her trustees will look upon one university course creditably completed with the same degree of monetary interest that the large-system library does upon the bachelor's degree, and as for specialization, one becomes an authority earlier where by force of circumstances intellectual competition is less.

Perhaps I have not been specific enough, especially in mentioning dollars, but not only do I like to think of the library as the place where there is opportunity for the education of the adult after school days are over, but also as the place where there is opportunity for the education of the library worker who is helping to educate the increasing numbers who cannot daily be associated and surrounded with books and book-loving people.

AUGUSTUS H. SHEARER, *Librarian.*

Grosvenor Library, Buffalo, N. Y.

Committee on Public Relations of Motion Picture Producers

A COMMITTEE on Public Relations has been formed as the result of a conference between more than a hundred representatives of national, civic, religious, educational and welfare organizations and of exhibitors, actors and authors, held by invitation of Will H. Hays, president of the Motion Picture Producers and Distributors of America, Inc.

These representatives passed a resolution of confidence in the plans proposed and pledged support of the objects set forth in the articles of association of the Producers and Distributors, namely:

Establishing and maintaining the highest possible moral and artistic standards in motion picture production, and

Developing the educational as well as the entertainment value and general usefulness of motion pictures,

and asked for a permanent organization to realize these objects thru:

a. The establishment of a channel of inter-communication between the agencies instrumental in forming and interpreting public opinion and the motion picture industry;

b. The increased use of motion pictures as a force for citizenship and a factor in social benefit;

c. The development of more intelligent co-operation between the public and the motion picture industry;

d. The aiding of the co-operative movement instituted between the National Education Association and the motion picture producers to direct the making of pedagogic films and their effective employment in the schools;

e. The encouragement of the effort to advance the usefulness of motion pictures as an instrument of international amity, by correctly portraying American life, ideals and opportunities in pictures sent abroad and the proper portrayal of foreign scenes and persons in all productions;

f. The furtherance, in general, of all constructive methods of bringing about a sympathetic interest in attaining and maintaining high standards of art, entertainment, education and morals in motion pictures.

Suggestions concerning motion picture problems will be welcomed by the Executive Secretary of the Committee on Public Relations, Jason S. Joy, 522 Fifth Avenue, New York.

Books to Grow On

"Books to Grow on: Reading for Pleasure and Profit," which is "an experimental intermediate list selected from the open shelf room" of the Buffalo Public Library has reached a second edition. This list, "compiled from the experience of the heads of those departments which deal with young people has been made up because of the need for a bridge over the transition from the more intimate service which the children are used to in the children's rooms and classroom libraries to the less personal service of the circulation departments. . . . "It omits many volumes which the friendly diplomacy of the teacher may introduce successfully to young people. . . . It includes only such books as young people have taken voluntarily from the shelves and of which they have . . . expressed their enjoyment."

LIBRARY CALENDAR

Dec. 28-30. At Chicago, Midwinter meeting of A. L. A. Council and other library organizations. See page 972.

Dec. 29. At New Haven, Conn. Bibliographical Society of America.

April 23. At Hot Springs, Arkansas. The 45th annual meeting of the American Library Association.

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 15, 1922

WITH 1923, the American Library Association will be within three years of completing its half century—a half century of wonderful progress! In the expansion of the library profession and in the multiplicity of organizations, it should not be forgotten that the American Library Association has both organized and symbolized the creative spirit of this library progress. Regional organizations under one form or another now cover most of the country, and the idea of regional libraries supplementing the national library has had effective tho informal development. State library commissions, state libraries of the newer model, supplanting the dusty law libraries of the past, and state associations are to be found in most of the forty-eight states and local clubs abound in library centres. Library schools are many, and there is demand for still more. Co-operating with the American Library Association are the Special Libraries Association, the associations of State and Law Libraries, the League of Library Commissions, and other more or less definite national bodies, besides the less formal conferences and round tables at national, regional or local meetings of specific classes of librarians. The term “librarian” now covers a very wide profession, in contrast with the book-keeper of old days, and includes, especially in business libraries, statisticians, information experts and others. Nevertheless, the work of the business librarian, statistician or information expert centers in a library of books and files, and ranks his special calling in the general field of librarianship. Against the centrifugal tendency of splitting into distinct classes, there should be this saving centripetal force which recognizes that the word “librarian” is one of dignity and comprehensiveness, including today experts in every department which deals with the utilization of books as instruments of private and public education and of industrial and commercial development and social welfare.

★ ★ ★ ★ ★ ★ ★

IN the multiplicity of organizations and of special fields, this centrifugal tendency may be more and more in evidence, but loyalty to the profession should be able to resist it. Whether the American Library Association will ultimately become a federation of several classes of librarians is a question for the future, but

there would be disadvantage as well as possible advantage in such a plan. More careful lines of demarcation, especially in conferences, have probably to be laid down, and as we have often suggested, it may prove necessary to develop the administrative term and hold national conferences in biennial instead of annual periods. Two of the newer regional associations have accepted the plan of biennial meetings, and the now complicated organization of the library calling perhaps needs rearrangement on far-seeing lines. Trustees are apt to become impatient that their librarians should be called too frequently to distant points for the many library meetings, and there is doubtless a good deal of wasted time and effort resulting from lack of intergearing between the different classes of organizations and of meetings. A larger attendance of trustees would go far to prove the value of these meetings to working librarians. As the half century draws toward its close it is worth while to consider plans which will provide for an A. L. A. of ten thousand or more members, representing libraries of diverse kinds, which within the century will easily get beyond this point, and correlate experts in the very specialized fields which the profession covers.

★ ★ ★ ★ ★ ★ ★

IN all the plans for the future it should not be overlooked that the library calling is part of a greater organism concerned with the production, distribution and utilization of the printed word, including authors, publishers, librarians, booksellers, journalists and teachers, each now represented by a thriving national organization. There should be closer and closer *rapprochement* toward a mutual realization of higher ideals. There has come to be more and more interchange among these several callings; many who began as teachers, journalists or booksellers have become librarians, the number of librarians professionally serving our high and normal schools is happily extending, and recently a number of librarians, particularly women, have come into the publishing field as advisers of publishing houses or into the business of bookselling, especially for children. It is a very small, tho sometimes aggressive, minority which clings to Lord Byron's definition that “Barabbas was a publisher,” and tho there may

be division between the book-trade and the library profession on prices and discounts, or on the details of copyright legislation, these should be considered as exceptions to the general thought that these several callings, professional or commercial, have a common aim and a common ideal. The public library and the librarian now reach the citizenry of this great country as no other agency for the distribution of books does or can, but that is no reason why the library profession should not recognize, as partners in a noble enterprise, those who publish as well as write books, and those who sell them as well as make them.

★ ★ ★ ★ ★ ★ ★

ANOTHER calling which, tho it started on a much lower level, is reaching toward this common ideal and common aim is the motion-picture industry, which seeks the co-operation of librarians as well as of other classes concerned with public welfare. Out of the important conference held in New York in June, in which the Authors' League and many welfare organizations were represented, has come the Committee on Public Relations of the Motion Picture Producers and Distributors of America, Inc., which announces as its aim the realization of the three-fold purpose set forth by Will H. Hays, now president of the association, that is, entertainment of a higher sort, instruction thru visualization, and internationalization thru a better knowledge by each nation of others. Two years ago Mr. Hays was known chiefly as a skilful and successful political organizer, whose appointment as Postmaster General was severely criticised. But in the Post Office Department he began immediately to show higher qualities of aim and administration than had been ascribed to him, and it was even hinted that his resignation from the Post Office Department was quite as much prompted by the unwillingness of the political authorities to permit him to handle his department on the higher plane of public service as by the temptation of a large salary in the new field. Since he became a private citizen instead of a public official, Mr. Hays has shown his good faith and high endeavor in many ways, and he and his colleagues are entitled to general and hearty co-operation. In the library field, Dr. Bostwick has given special attention to relations with the movies and has found many useful points of contact, some national, some local. The local library should be in such touch with the local movie managers that it may be kept thoroly informed as to future book-film productions, may obtain notice on the screen that the book which has been filmed can be had at the library—possibly with a picture

of the building and of its interior service—and may have the book itself specially displayed and put at the local service. Also, local library boards should endeavor to exercise their influence in bettering the standard of productions, especially by registering objection on local circuits to films of demoralizing character. A full acceptance of the movies as one of the instruments of education will in itself do much to bring about a higher standard of service.

★ ★ ★ ★ ★ ★ ★

AT the meeting of the Eastern College and University of Librarians on December 2 at Columbia University, Dr. Raney was able to announce that the Treasury authorities had issued directions to Collectors of Customs that books imported by libraries and like institutions are to be free from the application of T. D. 39108, requiring the marking of books as made in the country of origin. This clears the situation entirely as far as libraries are concerned, and is a complete victory for which Dr. Raney himself should have much credit, as he made a "Sheridan's ride" charge upon the Treasury Department the Wednesday preceeding and personally obtained the promulgation of the ruling in time for report at the Saturday meeting. Senator Townsend of Michigan also deserves the thanks of the library profession for his energetic action in the matter. On the vexed question of copyright, progress has been made as the result of the willingness of the publishers' organization to assent to the exception of books in foreign languages and of all second-hand copies from the importation restriction and the suggestion that the law should apply only in cases where the American market has been definitely assigned by the foreign author or proprietor and the assignment recorded in our Copyright Office, which removes another of the minor objections on the part of the library profession. The crux of the matter, however, is the larger objection to any restriction which should put obstacles in the way of direct foreign purchases by libraries, and on this point there is likely to be definite contest between librarians and publishers when the bill comes to a hearing, which is not likely to be until after the holidays. The feeling is very general in the library profession that any such restriction upon libraries is unfounded and unjust in the case of books for which remuneration to the author is assured. The modified Copyright Bill is to be pushed at the present session of Congress, and Sections 5 and 6, as modified by discussion since the introduction of the original bill, are printed on another page, these being the vital sections, the others being simply formal.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION MID-WINTER MEETINGS

THE Mid-Winter Meetings will be held at the Hotel Sherman, Chicago, December 28, 29 and 30.

There will be meetings of the A. L. A. Council, League of Library Commissions, University librarians, College librarians, Normal school librarians, Librarians of large public libraries, the Executive Board, the Editorial Committee, the Committee on Education, and perhaps others.

The Bibliographical Society of America which frequently meets in Chicago at the time of the Mid-Winter meetings will meet this year in New Haven, Conn., on December 29.

Headquarters will be at the Hotel Sherman, corner of Randolph and Clark. Most of the meetings (perhaps all of them) will be held there. Reservations should be made with the hotel as early as possible.

There are many other good hotels within easy walking distance of the Sherman.

RATES

One person, per day, room without bath, \$2.00 to \$2.50; room with private bath, \$3.00 to \$6.00. Two persons, per day, room without bath, \$4.00; room with private bath, \$5.00 to \$10.00; two connecting rooms with bath, per day, two persons, \$6.00 to \$10.00; three persons, \$8.00 to \$12.00; four persons, \$9.00 to \$16.00.

The tentative program is given in the LIBRARY JOURNAL for November 15, p. 972.

THE A. L. A. CONFERENCE OF 1923

THE Forty-fifth Annual Conference of the A. L. A. will be held in Hot Springs, Arkansas, April 23 to 28. The Eastman Hotel will be headquarters, and the meetings will be held in this hotel and in other buildings nearby. General sessions will be held in a theatre which is a short block from the Eastman Hotel.

The Eastman Hotel can accommodate seven or eight hundred. The Arlington, about three blocks away, is under the same management as the Eastman, and will be able to take care of perhaps two or three hundred delegates. Other hotels are available within easy walking distance of the Eastman—several within two or three blocks.

The Eastman, Arlington and most of the other hotels are operated on the European plan. Rates will be attractive, and meals served in the hotel or in restaurants nearby will be at reasonable prices.

No reservations will be accepted by the hotel until February 1.

COMMITTEES 1922-23

The following committees for the year 1922-1923 have been appointed since the publication of the list in the LIBRARY JOURNAL for September 15, p. 770-772. There remains only the membership of the Joint Committee of Seven to be announced.

Hospital Libraries. E. Kathleen Jones, Division of Public Libraries, Massachusetts Department of Education, Boston, Mass., chairman; Miriam E. Carey; Caroline L. Jones; Perrie Jones; Harriet Leitch; Mrs. Grace W. Myers; Elizabeth Pomeroy; Grace Shellenberger.

Institutional Libraries. Miriam E. Carey, Minnesota State Board of Control, St. Paul, Minn., chairman; W. S. Bassett; Florence R. Curtis; E. Kathleen Jones; Lydia E. Kinsley; Mary B. Palmer; Julia A. Robinson; Charlotte Templeton; Nellie Williams.

International Relations. Herbert Putnam, Library of Congress, Washington, D. C., chairman; E. H. Anderson; R. R. Bowker; John Cotton Dana; W. D. Johnston; T. W. Koch; George H. Locke; E. C. Richardson.

Library Service (Committee of Five). Arthur E. Bostwick, Public Library, St. Louis, Mo., chairman; John B. Kaiser; Florence Overton; A. S. Root; Beasie Sargeant Smith.

Membership. Julia Ideson, Carnegie Library, Houston, Texas, chairman; Lila May Chapman; H. T. Dougherty; Howard L. Hughes; Esther Johnston; John Adams Lowe; Sarah E. McCardle; Anne M. Mulheron; Rena Reese; Octavia Rogan; Mrs. J. A. Thompson; Ida F. Wright.

Recruiting for Library Service. F. K. W. Drury, Brown University Library, Providence, R. I., chairman; Gertrude E. Andrus; Elsie L. Baechtold; Irving R. Bundy; Charles H. Compton; Lucy T. Fuller; Mary E. Hazeltine; W. E. Henry; Louise B. Krause; Annie A. Pollard; Ernest J. Reece; Grace D. Rose; Charles H. Stone; Sabra W. Vought; Althea H. Warren.

Standardization of Libraries. (Appointed by Council) Josephine A. Rathbone, School of Library Science, Pratt Institute, Brooklyn, N. Y., chairman; C. H. Compton; Gratia A. Countryman; F. F. Hopper; J. T. Jennings; John Adams Lowe; Florence Overton; Grace D. Rose; Charles E. Rush; William R. Watson; Hiller C. Wellman; Phineas L. Windsor.

Ways and Means Committee. C. W. Andrews, The John Crerar Library, Chicago, chairman; J. Randolph Coolidge, Jr.; Harrison W. Craver; Mrs. Elizabeth Claypool Earl; Judson T. Jennings; E. C. Richardson; Alice S. Tyler.

SPECIAL LIBRARIES ASSOCIATION OF BOSTON

THE third meeting of the Special Libraries Association of Boston came on Monday, November the 27th. A supper at a central place down-town preceding the meeting is becoming a frequent feature of the Special Libraries Association, and this time twenty-five members met together.

The meeting itself was held at the Boston Athenaeum at quarter before eight o'clock, and was attended by 80 members. Mr. Bolton was

a charming host, and opened the meeting by a short talk on the history and purposes of the Athenaeum, and after the meeting was adjourned, showed the members the interesting exhibits, both permanent and temporary, for which the library is famous.

After the necessary business, part of which consisted in the introduction by the membership committee of 31 new members, the rest of the meeting was taken up by Chie Hirano, of the Boston Museum of Fine Arts, and Edith Guerrier, of the Boston Public Library, who, on their trips to Europe last summer visited many libraries. Miss Hirano confined herself to the discussion of Chinese and Japanese collections in the libraries of France and England, and a description of the library in Cairo. Miss Guerrier showed some exhibits from the libraries which she visited, and discussed those of France and Belgium as dispensers of information rather than from the point of view of a student of research.

In the report of the October meeting the following correction should be made in connection with Miss Kinsman's talk. The Bureau of Navigation sends *four* times a year a list containing 75 to 100 titles of many of which there are two or more copies, the total for last year being 1,180; also, of the \$450 sent by the Veterans Bureau about half was spent for magazine subscriptions and the rest for new books, chiefly of travel, biography, etc.

MARGARET WITHINGTON, *Secretary*.

NEW JERSEY LIBRARY ASSOCIATION

THE Fall Meeting of the New Jersey Library Association was held at Glen Ridge on November 21. President James T. Gerould presided.

Mrs. Mabel S. Douglas, dean of the Woman's College of New Jersey told most interestingly of its organization, and of the graduating of its first class of forty-two last June. She spoke of the important part the library played in the life of the college and announced a gift of 5,000 volumes from Theodore Stanton to be known as the Elizabeth Cady Stanton Memorial Collection.

The subject "Do Trustees and Librarians Really Co-operate?" was introduced by Mr. Gerould. Mrs. Samuel Heilner's interesting account of the work accomplished at the Spring Lake Library during the three years of its existence gave evidence of active co-operation. Arthur C. Mack of Edgewater said that the question "do they co-operate?" lead to the question "how should they co-operate?" He defined a trustee as a person appointed to administer the business and activity of a library as a trust from

the community. He stated the obvious duties of a trustee as regular attendance at board meetings, careful expenditure of funds and sympathetic interest in the librarian's problems. He urged that trustees should make a greater effort to attend library conventions.

Professor George Madison Priest of Princeton talked on the social and political condition in Germany today. He spoke with authority as he has recently returned from a fourteen months' stay in Germany.

LYNDA PHILLIPS, *Secretary*.

VIRGINIA LIBRARY ASSOCIATION

THE Virginia Library Association, which has been dormant for several years, was reorganized at a meeting in Richmond on November 28-29. There were thirty-five librarians and educational people present including Mary B. Palmer, secretary of the North Carolina Library Commission, who told of the work of that Commission and Mary L. Titcomb, librarian of the Washington County Library at Hagerstown, Md., who spoke on the county library.

Informal talks and discussion on methods of arousing interest in libraries and of conducting library campaigns and on other problems occupied the rest of the meeting.

The Association will hold an annual meeting at the same time and place as the State Teachers' Association, and a series of small group conferences will also be held. It is thought that the small meeting will prove most effective, as Virginia is a large State, with strongly marked geographical divisions. The first group conference will be held in Norfolk in January.

The Association also voted to become a member of the Southeastern Library Association, and elected J. Maud Campbell, librarian of the Jones Memorial Library in Lynchburg, as its representative in the executive board of that Association.

The following officers were elected for 1923: President, Mary D. Pretlow, librarian, Norfolk Public Library; vice-presidents, Mrs. J. L. Hagan, librarian, Danville Library Association and Dr. J. C. Metcalf, University of Virginia; secretary-treasurer, Margaret V. Jones, organizer, Virginia State Library.

MARGARET V. JONES, *Secretary*.

INDIANA LIBRARY ASSOCIATION

THE Indiana Library Association and the Indiana Library Trustees' Association held a joint meeting in Indianapolis, November 15th to 17th. Almost 400 people registered. Frank S. C. Wicks, a member of the Citizens' Advisory Committee of the Indianapolis Public Library gave a delightful talk on "Literary Rambles in

England," describing vividly spots associated with the names of Dickens, Johnson, Carlyle, and George Eliot.

Ethel McCollough of Evansville read a paper on the value of reading for the librarian and the assistant, protesting against the amount of time that must be spent in reading mediocre and ephemeral literature to pass on its inclusion on the library shelves, at the expense of "pleasure reading" which should be the crowning glory of a day spent in the service of others.

Hugh McK. Landon, of Indianapolis, representing the Riley Memorial Association, suggested that librarians contribute money to be spent in equipping a library room in the hospital. A committee of five with Charles E. Rush as chairman was appointed later to take up such a plan with the Association.

An outstanding feature was the address Wednesday evening by Henry Seidel Canby, editor of the *Literary Review* of the New York *Evening Post*. He believes that critics and librarians can be closely associated in the choice and preservation of books dealing with facts, which are a special case each time, and those dealing with the emotions, the latter being the distinctive problem. In all worth-while literature there is tradition and revolt. A good librarian should take account of tradition and preserve the literature that can be assimilated by our own generation, but at the same time he should consider revolt, which is a natural thing while we have life and youth. Illustrations included "The Death of the Hired Man," by Robert Frost, which has tradition behind it and was also a sane experiment; Edith Wharton, who has tradition perfectly, but will not seem so important thirty or forty years from now, as everything in her work is right for us at this time; and James Joyce's "Ulysses," a piece of "madhouse literature" utterly lacking in tradition, but as an experiment invaluable, for great books will come from it.

Thursday morning was devoted to round table discussions. Mary Pratt of the Extension Division of Indiana University told of the service offered by the Division to the libraries of the state; and Sue Blasingham, principal of the Benjamin Harrison School of Indianapolis of school needs and how the libraries were meeting them. William Hepburn, librarian of Purdue University, Lafayette, talked on new reference and technical books. Marcia Furnas, Indianapolis, spoke of general staff meetings. In conclusion Ella Corwin of Elkhart conducted a question box on loan desk routine.

Topics for discussion at the round table for trustees of large libraries included "Our Ever Present Financial Problems," by the leader, J.

F. Keeler of Hammond, followed by "Salaries and Qualifications" by Mrs. Samuel Clifford, Evansville. Donald Du Shane discussed library extension. At the meeting for trustees of small libraries Helen Thompson of Noblesville led the discussion of library extension, W. C. Goble of Swayzee that of qualifications and salaries, and Gladys H. Brammeman, Columbia City, conducted the question box. At a joint meeting topics for discussion were attending state district meetings, closing libraries all or part time, and delegates' expenses.

Miss McAfee of Evansville was chairman of the afternoon's Children's Round Table, when Effie L. Power, director of Work with Children in the Cleveland Public Library talked on present day writers for children. Youel B. Mirza, author of "When I was a Boy in Persia," talked on travel books for boys. Della Northey discussed the respective merits of "The World Book" and Compton's "Pictured Encyclopedia."

Corinne Metz, of Fort Wayne, chairman of the County Library Round Table introduced Constance Bement, librarian of the County Library of Port Huron, Michigan, who spoke on county library service offered to the large town and small village by the library which she represented. Della Northey pointed out that in this state there are no isolated farms as there are in the West, and that there are consolidated schools instead of one-room schools. She emphasized the importance of the county librarian knowing every one in her community and of establishing stations in every conceivable place. E. B. Weatherow, superintendent of the La Porte Schools, said he believed that every rural school library should be brought under county supervision, but feels that not much can be done with the present township law.

A resolution was passed at the business meeting endorsing any measures which may improve the situation with respect to salaries in all departments at the Library of Congress.

A committee was appointed to co-operate with the state library in the increase of its budget. The Association also went on record as favoring the inclusion in the English course of study of a course of study in the use and appreciation of books.

Two hundred and ninety-two librarians, trustees, and friends of librarians, were present at the banquet held Thursday evening in the Travertine Room of the Hotel Lincoln. At the conclusion of a musical program the Indianapolis Library Club in commemoration of Children's Good Book Week presented "Friends in Bookland," by Winifred Ayers Hope.

At the Friday morning session the results of Indiana Library Week were discussed by E. L.

Craig of Evansville and Margaret Wade of Anderson. Demarchus C. Brown, librarian of the Indiana State Library, presented the report of the Committee on Recruiting for Librarianship, advocating speakers from the A. L. A., the Indiana Library Association and the Indiana Library Trustees' Association be sent to the district meetings of the State. Senator C. Oliver Holmes of Gary gave an outsider's impression of how the library could improve its service.

The following officers were elected: President, Nellie C. Hughes, Terre Haute; vice-president, Gerene Ohr, Indianapolis; secretary, William J. Hamilton, Gary; treasurer, Rachel Ogle, Franklin.

ELIZABETH OHR, *Secretary*.

D. C. L. A. RECLASSIFICATION MEETING

RECOGNITION of the library profession in reclassification legislation was the theme of the District of Columbia Library Association's "Reclassification Meeting," December 1st, at which more than one hundred and twenty Washington librarians gathered. The first address of the evening was delivered by the Honorable Thomas Sterling, United States Senator for South Dakota, who was joint author of the Sterling-Lehlbach bill now pending in Congress.

Senator Sterling, who was introduced by President Dorsey W. Hyde, Jr., took as his subject: "Reclassification: What Good Will It Do Librarians." Admitting that the need for higher salaries is imperative, the Senator however stressed the point that the true need is for definite recognition of the professional character of the work of the trained librarian.

"Almost anyone," said the Senator, "can go thru the motions of being a librarian" and for this reason some people believe "that almost any quiet person of pleasing personality will do for a librarian." This state of mind however is rapidly changing and we are coming to understand that "public libraries, state and municipal, are invaluable servants of the whole people." From the point of view of the library profession the important thing about proposed reclassification legislation is that it provides "that positions in library science, when requiring professional or scientific training equivalent to that represented by graduation from a college or university of recognized standing shall be regarded as in the professional and scientific service." Thus library positions will be "placed on a parity with comparable positions in other professional and scientific callings."

Adele Powell, director of the reference department of the Public Library of the District of Columbia followed with a paper entitled "Life and a City Librarian." In this paper

Miss Powell told in interesting fashion of the many sidelights on human character which are revealed to the librarian who comes in continual contact with the ever-changing types that compose the patrons of the average large city library.

A short business session was held immediately after and brief reports were made by officers and committee chairmen. Resolutions in relation to library support and to school libraries forwarded from A. L. A. headquarters were read and officially endorsed by the Association. Comments upon the Association's new bulletin *D. C. L. A. Doings* by President Utley of the A. L. A. and others were read.

DORSEY W. HYDE, JR.

CONFERENCE OF EASTERN COLLEGE LIBRARIANS

THE tenth annual conference of Eastern College Librarians met at Columbia University on December 2 with an attendance of 125 representing 46 institutions. In the absence of Secretary Frederick C. Hicks, Provost William H. Carpenter and Assistant Librarian Roger Howson presided at the morning session and Professor Joseph T. Ibbotson in the afternoon.

The meeting opened with the report of James T. Gerould, chairman of the Committee on Differentiation of Field among the Larger Libraries. Seven or eight national scientific societies have been approached with the suggestion that each, in its own field, study the resources of libraries in a particular section with the intention of making the study a basis for a concerted program of purchase; a project for a nationwide survey of library resources in the fields of medicine and zoology has been submitted to the National Research Council; and the cooperation of university administrative officers has been sought thru the Association of American Universities and the Association of State Universities.

A letter from Dr. Stephen P. Duggan, director of the Institute of International Education, told of the condition of school libraries in China due to an inadequate supply of books and to the lack of knowledge of library methods, and suggested this as an organizing field for a trained librarian. Ernest C. Richardson mentioned Harry Clemons, librarian of the University of Nanking as one who would be interested and Dr. James Wyer called attention to the number of Chinese students who have received training in this country.

In his report on union lists, Harry M. Lydenberg stated that the plan of the committee for the publication of a general union list of periodicals is practically completed and will shortly

be sent to libraries with a request for co-operation. The project requires the raising by subscription of \$36,000 to be spread over a term of three years. Preliminary lists for checking will be sent to all subscribing libraries and the final publication will be placed on general sale, with reduced rates to subscribers. Mr. Lydenberg also spoke of the efforts which have been made, to complete library files of German periodicals for the war period and of the present plan of action in drawing up a combined list of desiderata to be sent to Harrassowitz. (See LIBRARY JOURNAL for November 15, p. 969). He also called attention to the impoverished condition of German libraries and the impossibility of their buying American books, and said that any aid which could be given from duplicate collections or any other source was greatly needed.

In discussing the union list, Dr. Richardson said that in its value to scholars, in its saving in cataloging and as an aid in reducing duplication in libraries, it will be worth much more than the money expended. H. W. Wilson spoke of the number of communities which are publishing their own union lists and of the economy which will result from a general list.

Dr. Raney, in discussing copyright legislation, told of the position of the United States outside the International Copyright Convention, and of the present opportunity to remedy this situation. He spoke of the dangers to libraries in the present tariff bill, and of the efforts of the A. L. A. to defeat the obnoxious features in the bill now pending.

Miss Mudge's talk on "Reference Books Needed—New, Revived and Revised" will appear in an early number of the LIBRARY JOURNAL. Mr. Keogh moved to have appointed a committee of three consisting of Miss Mudge (chairman), Mr. Briggs of Harvard, and a third to be selected by them, who would formulate a request to the A. L. A. Council that a committee be appointed by them to encourage the publication of such works as Miss Mudge suggested. Before voting it was decided to hear the paper by Anna S. Pratt of Yale on representation of American university libraries in scholarly organizations. Miss Pratt clearly showed the need for closer relations between university libraries and the learned societies of the country. Up to the present, when assistance in bibliographical or other library matters has been required these societies have been forced to seek aid from individual libraries rather than thru some central source. If, however, some permanent organization among libraries were to be formed so as to give systematic co-operation when needed, the libraries

might well have a voice in the matter of how the work was being done. Dr. Richardson suggested that if the A. L. A. were to become a member of the various learned societies it would naturally be asked for aid in these matters.

Followed a paper by Miss Wilson, librarian of the League of Nations on the work of her library, which forms the leading article in this number of the LIBRARY JOURNAL.

The conference unanimously voted in favor of the motion previously made that a committee be appointed to recommend the appointment of a committee by the A. L. A. to encourage the publication of such works such as those mentioned by Miss Mudge and to make plans for co-operation with learned societies and with the League of Nations committee on intellectual co-operation.

Mr. Keogh mentioned the possibility of the League of Nations being able and willing to call and finance an international conference of bibliographers. All previous attempts to hold such a conference have failed for financial reasons. The motion to inform Madame Curie that such a conference of bibliographers would be considered as desirable by the Conference of Eastern College Librarians, was carried.

The announcement by Dr. Raney that the marking law does not apply to catalogs, books, etc., imported for library use and not for sale, was greeted with applause. This is the final outcome of a six months' fight which has been waged in Congress over this law, which was made to apply to libraries up to this time. Donald Gilchrist of Rochester proposed that pending the printing and distribution of this decision by Congress, all librarians asked to pay fines for books imported and not marked should file a protest against the payment of such fines when payment was made, so as to recover later their money. Dr. Wyer moved that an informal expression of gratitude be sent to Senator Townsend for his influence and work on securing this favorable Congressional decision. The motion carried. Coupled with it was a vote of thanks proposed by Mr. Bowker, to Dr. Raney himself "for his cavalry charge into Washington," which so ably assisted in securing this verdict.

The academic degree as the criterion of promotion in the college library was the subject of a paper by Anna Monrad of Yale. It voiced the need of attracting scholars into the profession and the subsequent recognition of scholarly work done by those already in the field of library service.

Methods of duplicating catalog cards were brought up for discussion. Dr. Raney in responding, told of the possibilities of the address-

ograph, by which the output of the multigraph is doubled. The expense of a printing press adapted to the form of the address-ograph is the most serious objection to it. Dr. Raney, however, felt certain that with little adjustment the ordinary flatbed press could be used satisfactorily.

The need of better methods for obtaining the hearings of Congressional Committees was urgently presented to the meeting by Mr. Howson. Such reports as are obtainable from Congressmen or the Committee are far from faithful and the great need seems to lie in a more systematic method of issuance. Were they to be issued in numbered serials and turned over to the public printer for distribution, much of the difficulty should be solved. Even the Library of Congress seems to have difficulty in obtaining complete sets of the hearings and ordinarily these are not subject to inter-library loan.

The practical application of intelligence tests to prospective library assistants was interestingly presented by Dr. Koopman and Mr. Drury, of Brown, who have found that the results of the tests gave "a line on what the persons can do." The Thorndike revised tests are used, and they have proved a valuable check on selecting the staff assistants especially those chosen from the student applicants.

The regular business of the meeting closed with a motion to extend to Dr. Hicks the appreciation of the conference for his work as secretary, both in planning the program and seeing it carried thru. Tea was served following the adjournment.

DORIS M. REED,
ELEANOR M. WITMER,
Secretaries pro tem.

CONFERENCE OF SOUTHEASTERN LIBRARIANS

OVER 200 librarians gathered for the Signal Mountain Conference, November 2-4, which resulted in the formation of the Southeastern Library Association.

A. L. A. President Utley spoke on library extension, emphasizing the need of further development thru county librarians. Book reviews were contributed by Nora Crimmins, C. Seymour Thompson, Charles B. Shaw and others.

The following constitution is proposed:

Sec. 1. The name of this association shall be the Southeastern Library Association.

OBJECT

Sec. 2. The object of the . . . Association shall be to promote library service in the Southeastern states, in cooperation with the American Library Association and the several Southeastern state associations.

MEMBERSHIP

Sec. 3. Any state library association may become a

member of the . . . Association by voting to do so at a regular meeting of its association.

Sec. 4. For the transaction of business at a meeting of the Association any member of a member-state association may vote.

MEETINGS

Sec. 5. There shall be a biennial meeting of the Association at such time and place as may be determined by the executive board.

MANAGEMENT

Sec. 6. The officers of this association shall be a chairman, vice-chairman, and secretary-treasurer, to be elected at its regular meeting, to hold office until the adjournment of the meeting at which their successors are chosen.

Sec. 7. These officers, together with one representative from each member-state association shall constitute an executive board. The representatives from the several state associations shall be elected at the first meeting of their state associations following each biennial meeting of the Southern Library Association, to hold office until their successors are elected.

Sec. 8. There shall be elected at this conference a chairman, vice-chairman, and secretary-treasurer who shall be declared officers of the Southeastern Association, after the acceptance of this constitution by five state associations at their several state meetings.

Sec. 9. The chairman shall appoint such committees as are deemed necessary to carry out the purpose of the organization.

DUES

Sec. 10. There shall be no dues for membership in the association, but a registration fee, the amount to be determined by the executive board, shall be paid by each person in attendance at a conference of the association.

AMENDMENTS

Sec. 11. This constitution may be amended at any regular meeting of the Association by a two-third vote of qualified voters present, notice of the proposed amendment having been given in writing to the president of each member-state association not less than three months before the Southeastern meeting.

ADOPTION AND CONSTITUTION

Sec. 12. This constitution, after its adoption by this conference, shall be referred to the various Southeastern state associations at their regular state association meetings for ratification and shall become effective when five State Associations have so ratified it.

A regional meeting of the League of Library Commissioners and other group meetings for the discussion of special problems were a feature of the conference.

LEAGUE OF LIBRARY COMMISSIONS REGIONAL MEETING

The League of Library Commissions held a sectional regional meeting, Charlotte Templeton, as chairman. Representatives from the Kentucky, North Carolina and Georgia Library Commissions and the extension departments of Virginia, Tennessee and Alabama were present, in addition to the librarians who have been working to establish extension work in South Carolina, Florida and Mississippi.

The topic for discussion was the place of an extension department in the library development of the state. Whitman Davis, librarian of the

A. and M. College of Mississippi, reported on library conditions in Mississippi where the first effort has been rather to develop a school library system. The only extension work which is being done is thru package library service maintained by the State A. and M. College. Joseph Marron, librarian of Jacksonville, Fla., told of the efforts to get a bill thru the legislature creating a state commission. The bill failed but will be presented again at the next session. Louise McMaster, of Darlington, S. C., reported on the work of the State Library Association to have an extension department established. The Federation of Women's Clubs has been interested and will present a bill at the next session of the legislature. Alabama reports plans for a special appropriation for extension work. Such work as has been done heretofore has been done from general department appropriations, which are inadequate for field work.

Margaret Jones, who has just taken up the work of field organizer for the Virginia State Library reported on the plans of Virginia. The first effort will be to organize a state Library association which will be undertaken at Thanksgiving.

Miss Fannie Rawson, and Miss Mary Bell Palmer then told of what the commission has accomplished in the library development of Kentucky and North Carolina, the first states in the South to establish library extension departments.

COUNTY LIBRARIES ROUND TABLE

Under the leadership of Mrs. A. F. Griggs, of Durham, N. C., was held a very profitable round table on extension, especially thru the county library which is being more and more considered as a desirable unit in southern library extension. Mrs. Marie F. Kilburn, of Winston-Salem, Miss Rowe, of Greensboro, and Miss Ream, of Chattanooga, spoke on extension thru the schools; Mr. Josselyn, of Birmingham, on the fact that practically all libraries are paying attention to extension work with negroes; Miss Jones, Virginia's organizer, told of plans for that state, and Mr. Davis of the A. and M. College of Mississippi on extension thru the college library, as instanced in his state where the Service Bureau of the College does the work of a commission.

CHILDREN'S LIBRARIANS ROUND TABLE

The Round Table for Children's Librarians was held Friday morning, November 3. Bernice W. Bell, head of the Children's Department, Louisville Free Public Library, read a letter from Elva S. Smith, chairman of the A. L. A. Children's Section expressing a hope that all members present who were not members of the A. L. A. would join. Miss Bell stressed the

difficulty of convincing a community that it is their duty to provide all the children with the best books, and talked of the interesting growth of work with the schools in Louisville and Jefferson County. Mary E. Foster, head of the Children's Department, Birmingham Public Library, spoke on "Children's Book Week." Mr. Josselyn provided an exhibit of the children's books in the A. L. A. list entitled "Children's Books for Christmas presents." Miss Foster dwelt at length on the increasing interest on the part of the general public in children's books and especially the attractive editions included in their Children's Book Week exhibit.

Anne Pierce, librarian at Charlotte, N. C., spoke on instruction of children in the use of the library. The eighth grade is taught the use of the catalog and the simpler reference books. Martha Parks, Head of the School Department, Cossitt Library, Memphis, Tenn., discussed the subject "What the Public Library Can Do for the Elementary School." Grace O'Baugh, head of the Children's Department of the Lawson McGhee Library, Knoxville, Tennessee, gave a most interesting account of the children's story-hour and of the stereoptican slides in connection with her story-telling.

CATALOGING ROUND TABLE

The cataloging round table was presided over by Caroline P. Engstfeld from the Public Library, Birmingham. Susie Lee Crumley, principal of the Atlanta Carnegie Library School, Atlanta, Ga., made valuable suggestions on the cataloging of public documents.

Mary R. Mullins of the Alabama Department of Archives and History, discussed the cataloging of pamphlets and local history material, showing samples of her work. Arralee Bunn of Lawson-McGee Library, Knoxville, Tenn., speaking on short cuts in cataloging, recommended the checking of the Children's Catalog as a substitute for those who could not afford to make a card catalog. Olive Mayes of Goodwin Institute, Memphis, Tenn., spoke on cutting cataloging costs by discarding the shelf list. The section endorsed the resolutions adopted by the cataloging section of the A. L. A. at Detroit, and Margaret Mann's plan of having a Directory of Catalogers.

CIRCULATION ROUND TABLE

The round table on circulation desk problems was conducted by Joseph F. Marron of Jacksonville, Fla. Upon the question of registration methods it was brought out that most libraries in the southeastern states are using the card system of filing the names of registered borrowers and issuing the usual borrowers cards, except in Savannah and Asheville where the identification card only is issued to the patron. Mr. Settle of the Louisville library reported renewals

successfully made over the telephone on a form which does not require the borrower to come to the library.

It was emphasized that facilities at the circulation desk should be given to new borrowers in explaining methods, giving directions to the location of the open shelf room, the reference room, and the periodical reading room by personally conducting them to such locations in order that they may be properly introduced to the library service and put at ease at the time of their first visit and that a saving of time in the long run would thus be effected. Considerable discussion was given also to the question of reserve books, fines and other details of the service.

The leader opened up the question of staff morale by pointing out that the staff should be encouraged to feel that service in behalf of the library should be the main consideration in their work and that they should work with the head librarian and not merely for him. It was also brought out that he should not lose sight of the effectiveness of the service of the staff since it is their co-operation which makes good service possible and that he is not alone in the conduct of successful work.

Lloyd W. Josselyn of Birmingham pointed out the many ways of bringing the library to the attention of the public.

It was felt that this round table brought out the importance of the work of the circulation desk since it is, from the standpoint of the public, the place from which they receive the greater part of their knowledge of the library.

COLLEGE HIGH SCHOOL AND REFERENCE ROUND TABLE

The College, High School and Reference round table was held on Friday morning under the leadership of Charles B. Shaw, of the North Carolina College for Women, Greensboro, N. C. Charles D. Johnston, librarian of the Cossitt Library, Memphis, led the discussion on inter-library loan policies. It was the consensus of opinion that most of the needs in the South were for periodicals and society proceedings, mainly technical, for special work of college students. Duncan Burnet, of the University of Georgia, suggested that a periodical checklist be compiled for the Southern States, so that future needs of this nature could be met by loans from libraries near at hand, if possible. This was put in form of a motion and passed. The chair appointed Duncan Burnet, L. R. Wilson and Charles H. Stone as a committee to take over the work of compiling this checklist.

The relations of college libraries to public libraries were discussed by Louis R. Wilson, librarian of the University of North Carolina,

who stressed especially the preparation of study outlines and the extension work which the college library could do. Margaret V. Jones, organizer of the Virginia State Library, spoke on developments in the service rendered by state libraries. Other state librarians adding to the discussion were Miss Broughton of the North Carolina State Library and Miss Mullen of the Department of Archives and History of Alabama. R. M. Kennedy, librarian of the University of South Carolina, spoke on the college librarian's opportunities in recruiting. Mr. Kennedy felt that the compensation was too small for the service rendered and that the scarcity of positions, especially in this section of the country, did not warrant the urging of young people to enter library work. Others defended the other side of the question. Mary E. Ahern gave a very helpful talk on librarianship, stressing the urge of the profession and the love of the work as a basis for the choice and not the matter of dollars and cents. George B. Utley suggested that the situation should not be localized but considered in its broad scope.

TENNESSEE LIBRARY ASSOCIATION

THE Tennessee Library Association did not meet in Annual Session in Memphis in the spring of 1922 as planned, but met as a part of the Southern Conference of Librarians at Signal Mt. Hotel.

At a dinner and business meeting thirty were present, representing the Cossitt Library and the Goodwyn Institute Reference Library in Memphis; the Carnegie Library, Vanderbilt University Library, George Peabody College Library, the County Library Extension Work of the State Library, and the Board of Education Library Extension Work, all from Nashville; the Public Library and the University of Chattanooga, from Chattanooga; the Lawson McGhee Library, the University of Tennessee Library, the Division of Agricultural Extension Library, and Knoxville College Library, from Knoxville; and the Free Library of Jackson.

Affiliation with the American Library Association on the new basis was voted and Charles Stone was appointed delegate in the American Library Association Council.

Lucy Fay called attention to the fact that some action should be taken, or legislation enacted whereby the libraries of the State would be assured of receiving the State publications. A motion to that effect was carried and Mr. Stone was appointed Chairman of this Committee, with power to choose his own committeemen.

Officers elected are: President, Nora Crimmins of Chattanooga; vice-president, Alice Drake of Jackson; secretary, Adelaide Rowell of Chattanooga.

IN THE LIBRARY WORLD

PENNSYLVANIA

Philadelphia. A new Reference Room for students of the Wharton School of Finance and Commerce, University of Pennsylvania, was opened November 12. This room at present seats one hundred readers, and its ultimate capacity is about one hundred and fifty. Here are placed on open shelves most of the reference books in commerce, economics, political science and sociology, while at the loan desk are held the books of required reading in these subjects. There are now four reading rooms at the central library which are open to undergraduates. A fifth is needed and is already being planned.

OHIO

Cleveland. The Adelbert College Library, Cleveland, Ohio, has received by bequest from the estate of Prof. Lemuel S. Potwin a fund of \$12,600, the income of which is to be used for the purchase of books. It is expected that this fund, with the help of gifts already made and to be made, will soon be increased to a total of \$15,000.

MICHIGAN

East Lansing. Ground for the new library building at the Michigan Agricultural College has been broken. The library which will have a capacity of a quarter of a million books is expected to be ready by the fall of next year. The cost is estimated at \$150,000.

MINNESOTA

Minneapolis. A library course is being given at the University of Minnesota by Professor Frank K. Walter, librarian, and Associate Professor Ina T. Firkins, reference librarian. The course will cover a general study of reference books and library methods as applied to individual study and research, lectures, examination of reference material and problems in its use. It is open to freshmen and sophomores two hours a week and carries two credits for a quarter.

MISSOURI

St. Louis. The widow of the late Wm. Marion Reedy, editor and proprietor of the *Reedy's Mirror*, has presented to the Public Library between 500 and 600 volumes from Mr. Reedy's private library. This gift, altho not large numerically, is one of the most valuable received by the library in several years. It includes numerous rare and interesting editions, presentation copies, etc., etc. The library intends to place the whole collection on public view at an early date and may possibly print a separate catalog of it.

TEXAS

Waco. Work on the new \$150,000 library building for Baylor University has been begun. The architect is Burch E. Eastwood. The old walls of the former chapel and library will be used. The exterior of the building will remain practically the same as it was except that the dome which was formerly characteristic of the building will be replaced by a flat roof. The entire building will be used exclusively for a library instead of housing library and chapel as heretofore.

COLORADO

Denver. By vote of the Colorado Scientific Society, its collection of four thousand or more scientific books, etc., will henceforth be housed in the Denver Public Library and the Colorado Engineering Council, with one thousand members in Colorado, has voted to purchase \$12,000 worth of technical books and magazines this season, which with the Society's collection and the library's own books will form a technical division of the Library's Reference Department. The Colorado Engineering Council has an annual income of from \$3,000 to \$5,000 and the Council proposes to spend this in adding new material to the technical division. Olive Hensley, of the New York Public Library School, class of 1921 is librarian of this new division.

CALIFORNIA

Berkeley. The one year Library School course given under the auspices of the University of California Library since 1918 has been taken over by a new Department of Library Science, having a separate budget and, to a limited extent, a separate staff. The connection with the Library will, however, still remain very close inasmuch as the Associate Librarian, Sydney B. Mitchell, will be the Chairman of the new Department and the Reference Librarian and certain other members of the Library staff will continue to give instruction.

The courses opened this Fall with an enrollment of thirty students, more than half of them university graduates, the others seniors in the College of Letters and Science, who are devoting practically their whole time to this work. There have been two changes among the instructors. Evelyn Steele has withdrawn on account of her approaching marriage and Mrs. Margaret Carnegie Gauger, sometime instructor in the Pittsburgh Library School, is giving the work on selection of books for children.

CURRENT LITERATURE AND BIBLIOGRAPHY

"Yuletide Suggestions" is an annotated, graded list of books that children enjoy, compiled by Mildred Sandoe, children's librarian of the Savannah Public Library.

A facsimile reprint of the two supplementary volumes by Deschamps and Brunet to the *Manuel du Libraire et de l'Amateur de Livres*, by Brunet (Paris, 1860-65 6v.) has been made by the *Librarie Dorbon-Ainé*, Paris and New York. The price is 60 fr.

The October number of the *Library Messenger* published by the Missouri Library Commission is the Missouri Valley Library conference number, and gives in full papers and proceedings of the first A. L. A. regional meeting.

In the first number of the *Literary Digest International Book Review* (December) the Congressional Library is the subject of a poem by Amy Lowell, and librarians' views on the problem of Sense and Censorship are quoted at length by George MacAdam as reported by Mr. Feipel in recent numbers of the *LIBRARY JOURNAL*.

The monthly publication of the *Library Association Record* which has been edited by E. Cockburn Kyte, is to be discontinued with the December number, when the *Record* becomes a quarterly under the editorship of A. J. K. Esdaile of the British Museum Library. Captain Kyte, as already announced has joined the firm of John and Edward Bumpus, Ltd., booksellers.

"Mr. William Shakespeare: Original and Early Editions of his Quartos and Folios, his Source Books and those Containing Contemporary Notices," by Henrietta C. Bartlett, offers the good excuse for putting one more book about Shakespeare before the public that "it contains in one volume full and accurate descriptions of the first editions of a great many books in early English literature connected with him and gives their present location, and is, in fact, an attempt to bring together in compact form all the more important printed sources before 1640 from which we derive our knowledge of the . . . dramatist. . . ." (Yale).

"American Revolutionary War Pamphlets" is a mimeographed check-list recording the early editions and contemporary reprints of political pamphlets on the Revolution in the Newberry Library. "The collection, numbering at present

574 tracts is about equally proportioned between American and British publications so that considerable material is afforded for the study of . . . both parties concerned in the Revolutionary controversy and also for the study of the origins and development of American political institutions and ideas." The compilation, which is the work of Ruth Lapham does not record reprints which appeared later than 1786.

"Broad-sides, Ballads, &c, printed in Massachusetts 1639-1800" compiled by Worthington Chauncey Ford has just been published by the Massachusetts Historical Society, forming v. 75 of its series of "Collections." The list grew out of Mr. Ford's amusing himself, when in the Boston Public Library, by noting any broad-side issue in Massachusetts between 1774 and 1783 "on a half-formed scheme of utilizing the items in a study of the civil aspects of the War of Independence." It was later added to as occasion offered and the growing interest in broadside material prompted the extension of the scope to include all broadsides issued in Massachusetts from the introduction of printing to the year 1800, resulting in a fine illustrated volume listing 3423 items.

WANTED: MATERIAL ON EDGAR ALLEN POE

I am compiling a bibliography of the writings of Edgar Allen Poe, and am anxious to know the whereabouts of any letters or other mss. by him, now owned by libraries, or collectors who are willing to list them. I am particularly anxious to read any letters in which he refers to his writings, or such parts of letters as may guide me to the identification of his unsigned contributions to periodicals, but in addition wish to list by date and name of recipient those letters of his which survive, and also any letters addressed to Poe. The letters to Poe in Harrison's edition are of course known to me, as are those of Lowell. There are a very few others surviving.

I also wish to locate files or single issues of the following papers: The Philadelphia *Saturday Chronicle*, 1839-1840; The Baltimore *Saturday Visiter*, 1831-1832; 1834-1835; Baltimore *Republican*, June 13, 1835; Alexander's *Messenger*, Philadelphia: *Saturday Museum*, Philadelphia, 1843; Columbia (Pa.) *Spy*, 1841-1846; *New England Weekly Review*, Hartford, 1848. and a New York magazine, *The Aristidean*, 1845.

There are 14 Libraries

which have not received volume three of the Springfield Survey. There were the same number of volume three printed as the previous volumes, but fourteen copies of the latter remain unclaimed. Have you received yours?

The Mirage of Fear

A Twentieth Century Book

By HERBERT L. JILLSON

"A VOICE in the wilderness of materialism pleading for inarticulate millions who grope, in darkness, for the Light; a note of warning to countless other millions who, disregarding danger signals, struggle vainly for supremacy in the fierce maelstrom of human hate; a fervent prayer of affirmation for the living, and those yet to live; for those born and yet unborn, to battle with the many-tentacled octopus—FEAR—until rebirth in the crucible of spiritual regeneration."

Poems of The North Woods

(Log Cabin Philosophy)

By **E. F. HOWARD**

This book contains the rhymed thoughts of a settler in the "cutover" lands of Northern Wisconsin, a region of marvellous attraction to the city dweller because of its numerous lakes, and the woods that have escaped the woodman's axe, or have arisen anew on the ruins of the old forests. To clear the land for tillage and to obtain sustenance from the soil, requires strength, patience, perseverance, and withal love of life in the open. All these qualities are reflected in Mr. Hayward's verses, appealing strongly to men who have struggled and have either won or lost, for his is the philosophy of optimism—a smile no matter how the wind blows.

"Those who are looking for new sensations will find them in Mr. Hayward's Verse. The scintillating turn of phrase is not here; nor bizarre modernism; nor the cynicism born of death of faith through disappointment and disillusionment. It is much the same philosophy that has endured through the ages, derided but not downed in each generation. Back to it the world-sick often turn to acknowledge its truth; to yearn for a return of the old faith they had as children."—*St. Paul Pioneer Press*, Nov. 12th.

LIBRARY EXCHANGE

The Denver Public Library has the following bound magazines on hand to be given away or exchanged:
 American Review, vol. 13, year 1851; Amer. Theological Review, 1, 2, 1859-60; Andover Review, 2-7, 9-19, 1884-7, 1888-93; Annee Psychologique, 1, 1894; Appleton's Journal of Literature and Art, 5, 6, 1871; Architectural record, 13, 1903; Association Review, 2, 1900; Banker's Eclectic, 2, 1887-8; Bibliotheca sacra, 1, 19, 1844, 1862; Chautauquan, 6-9, 1885-9; Child study mo., 4, 1898-9; Chronique, 36, 1892; Church at home and abroad, 1, 1887; Church review, 48, 1886; Colliery engineer & metal miner, 17-19, 1896-8; Engineering (London) 49, 50, 53, 1890, 1892; Engineering magazine, 18-19, 1898-9; Galaxy, 14, 1872; Harvard register, 3, 1881; House painting & decoration, 1-4, 1885-8; International mo., 1-5, 1900-2; International qly., 6-12, 1903-6; Knowledge, 13, 14, 18, 19, 1889-91, 1895-6; Mines & minerals, 19-21, 1899-1901; Nationalist, 2, 1889-90; New ideal, 3, 1890; N. Y. medical journal, 93, 94, 1911; Paedagogium, 13, 14, 1891-2; Plumber, 2, 1879; Princeton rev., 3, 1879; Puritan, 5-9, 1899-1901; Railroad gazette, 22, 1909; Scientific Amer. (Building edition), 10, 1890; Twentieth century, 5-7, 1912-3; Whig review, 14 1851.—CHALMERS HADLEY, Librarian.

JAMES C. MANRY, Western representative of Ewing Christian College, Allahabad, India, and a life member of the A. L. A., is in the United States and will remain here until next summer. He is interested in the development of the libraries of the American mission colleges in India, and will be glad to hear of any libraries which have duplicate publications which they would be willing to give to American colleges in India, the latter to pay the transportation. His address is: P. O. Box 521, Iowa City, Iowa.

STATE PUBLICATIONS.—A few complete sets of the four parts of "State Publications," compiled by R. R. Bowker, are now offered for sale. These copies are newly bound in library buckram; lettered in gold. Price, \$10. Complete copies of this bibliography have not been available for several years until a check-up of binder's sheet stock brought a few sets to light.—THE LIBRARY JOURNAL.

The Library of the University of Delaware has duplicate copies of the *Engineering Index* for 1906, 1907, 1908 and 1913. We lack the volumes for 1917 and 1918. We would like to make arrangements to exchange from our duplicate stock with a library which can let us have the volumes which we lack. If an exchange is not desired we would like to hear of a library which has duplicates of the years we seek available for buying, and the terms.—DOROTHY L. HAWKINS, Librarian.

The Librarians' Own Periodicals

Publications that cover the whole field of book information and form the best unbiased guides to book selection.

The Library Journal

The representative periodical in the field of library work and development. Published twice-a-month. Subscription, \$5 a year; \$5.50 to foreign countries; single numbers, 25 cents.

Special subscription rate for small libraries.

The Publishers' Weekly

The outstanding journal of the American Book Trade offers in its weekly pages a complete record of American publications with prices and description. Contains also announcements of forthcoming books, weekly lists of "books wanted" and "for sale" among rare and second hand dealers. Text presents chiefly all news and ideas pertinent to book production and distribution.

Subscription Rates:

Yearly !\$5.00
 Zones 6-8, postage extra50
 Libraries of \$3000 or less annual appropriation, receive special subscription rate of \$3.00.

The Book Review

A special publication issued only 8 times a year, which presents to book readers and buyers a series of descriptive signed reviews of the books of moment both fiction and non-fiction. Helps buyers estimate for possible purchase. Eight issues only.

Subscription Rate 50c. Yearly

R. R. Bowker Co., 62 W. 45th St. N. Y.
