Libraries and museums; V. The museum idea at Pinnacle	<i>Louise Connolly</i>	23-24
Teaching cataloging	<i>Marion Horton</i>	24-25
Specifications for conventions	<i>George W. Lee</i>	25-26
Library exhibit at the Texas State Fair	<i>Mary Vick Burney</i>	29
A co-operation in the interests of music	<i>Amy Meyer</i>	55-59
Education and the tariff measure	<i>M. Llewellyn Raney</i>	59-62
The Polish immigrant and the library	<i>Eleanor E. Ledbetter</i>	67-70
The Ruskin collection at the Wellesley College library	<i>Ethel Dane Roberts</i>	75-76
Co-operative binding of advertisements	<i>F. K. W. Drury</i>	76
The function of a public library in a democracy	<i>John J. Tigert</i>	107-111
Salary reclassification legislation	<i>George F. Bowerman</i>	112
Copyright legislation	<i>M. Llewellyn Raney</i>	113-115
Some features of the copyright bill	<i>Frederic G. Melcher</i>	115-116
Copyright!	<i>A. L. A. Committee on Book Buying</i>	118
Books by twentieth century American poets	<i>Poetry Society of America</i>	119
The semi-centenary of the Grand Rapids Public Library	<i>Samuel H. Ranck</i>	120
Co-operative printing of analyticals	<i>J. C. M. Hanson</i>	121-122
School and library co-operation in Minnesota	<i>J. M. McConnell</i>	153-155
Economy in binding	<i>C. W. Carroll</i>	156
Library work with the Japanese	<i>Marion Horton</i>	157-160
The University of Washington Library School	<i>W. E. Henry</i>	161-162
Libraries and museums. VI. Mr. Frisky and what he proves	<i>Louise Connolly</i>	163-164
Branch libraries in schools in Washington	<i>George F. Bowerman</i>	165-166
Branch libraries in school buildings	<i>Antoinette Douglas</i>	201-208
French literature in 1921	<i>Albert Schinz</i>	209-212
The New York Public Library School	<i>Ernest J. Reece</i>	215-217
Economy in moving a library	<i>Earl M. Wilbur</i>	217
County libraries in Hawaii	<i>Laura Robson</i>	219
The contribution of librarians to agricultural history and research	<i>Eunice R. Oberly</i>	249-254
Addition to the Riverside library	<i>Lillian Dickson</i>	263
Gifts and bequests to public libraries in 1921	<i>American Library Association</i>	265-271
Art in the public library	<i>Richard F. Bach</i>	297-299
What the library can do for the student	<i>Frank Weitenkamp</i>	299
Missouri Book Week's success	<i>Charles H. Compton</i>	300
Pictures in business	<i>Ethel Cleland</i>	301-302
Western Reserve Library School	<i>Alice S. Tyler</i>	303-304
South America and library progress	<i>Forrest B. Spaulding</i>	345-348
The John Crerar Library	<i>Clement W. Andrews</i>	348-352
The Russian public library	<i>Avrahm Yarmolinsky</i>	352
Simmons College School of Library Science	<i>June R. Donnelly</i>	355-358
The passionate reference librarian to his love	<i>Jackson E. Towne</i>	362
Some more children's librarians	<i>Jeannette M. Drake</i>	393-397
The boys' and girls' library at Pasadena	<i>Josephine Gratiaa</i>	397-398
Roumanians in the United States and their relations to public libraries	<i>Harriet E. Howe</i>	400-404
Cataloging rules	<i>Ernest Cushing Richardson</i>	407-408
University library co-operation and business engineering	<i>Charles R. Green</i>	443-449
An adventure in community service	<i>Charles R. Green</i>	450-452
The functions of the American Library Institute	<i>Clement W. Andrews</i>	453
The Chautauqua School for Librarians	<i>Mary E. Downey</i>	455-457
What to read on coal	<i>Bureau of Industrial Research</i>	458-459
Preparation for school librarianship	<i>Marion Horton</i>	461-462
Naval libraries	<i>Charles H. Brown</i>	463-464
The Polish immigrant and the library	<i>Eleanor E. Ledbetter</i>	496-498
The technique of library exhibits	<i>Eunice Wead</i>	499-501
Notes on some New Zealand libraries	<i>Carolyn P. Green</i>	539-541
Advanced study for the library assistant	<i>Ivander MacIver</i>	541-542
Inferior binding: The librarian's protest	<i>Mary E. Wheelock</i>	545
The publisher's reply	<i>National Association of Book Publishers</i>	546

Library week in Pittsburgh schools	<i>Grace E. Windsor</i>	547
Conferences on children's reading at Grand Rapids	<i>Samuel E. Ranck</i>	548
Next steps in library co-operation	<i>Azariah S. Root</i>	587-590
The future of the N. A. S. L.	<i>Demarchus C. Brown</i>	591-592
Problems before the A. A. L. L.	<i>Gilson G. Glasier</i>	593-595
The economic value of library service	<i>Dorsey W. Hyde, Jr.</i>	595-596
The librarian's duty to his profession	<i>Carl B. Roden</i>	597-598
Copyright and the publishers—a review of thirty years	<i>M. Llewellyn Raney</i>	599-603
Memorandum on copyright	<i>R. R. Bowker</i>	603-604
Correlation of library school and training class instruction	<i>Ethel R. Sawyer</i>	641-644
Selecting religious books for a public library	<i>Frank Grant Lewis</i>	645-646
A union index of private libraries	<i>Amy Winslow</i>	647
Books and book-making in the United States	<i>Helen E. Haines</i>	699-704
Libraries and museums. VII. Pictures in place of objects	<i>John Cotton Dana</i>	705-708
Charted seas	<i>Mary E. S. Root</i>	709-712
The project method: a selected list	<i>Annina DeAngelis</i>	713
Counting a library	<i>Howard L. Stebbins</i>	715
The Letchworth Book Club	<i>Dugald Macjadden</i>	716
Psychological tests in library examinations	<i>Charles W. Reeder</i>	717-718
The Huntington Library	<i>George Watson Cole</i>	745-751
Sources of material for library extension service	<i>LeNoir Dimmitt</i>	751-756
The Detroit county library exhibit	<i>Loleta I. Dawson</i>	757-760
Book advertising—wise and otherwise	<i>Sarah Virginia Lewis</i>	764
New roads in library work with children	<i>Jasmine Britton</i>	807-809
Direct-by-phone advertising to children	<i>Herman O. Parkinson</i>	810
Giant-killing in the children's department	<i>Edith L. Smith</i>	811-812
Recent fiction for boys	<i>Marion F. Schwab</i>	813-814
Recent fiction for girls	<i>Annie I. M. Jackson</i>	814-815
A Children's Book Week program for women's clubs	<i>Isabelle B. Hurlbutt</i>	815
The doll tableaux at the Forbes Library	<i>Myra L. Boynton</i>	819-820
Questionable books in public libraries	<i>Louis N. Feipel</i>	857-861; 907-911
The Greek immigrant and the library	<i>Margery Quigley</i>	863-865
Selection and purchase of modern Greek books	<i>Alison B. Alessios</i>	866
Serious books and their readers	<i>Grace E. Windsor</i>	870
The students' exhibit at Princeton	<i>Annette Reynaud</i>	870

EVERY LIBRARY NEEDS THESE BOOKS!

A Course in Mechanical Drawing

By *Louis S. Rouillion*

This book, written from Mr. Rouillion's rich experience in the leading industrial schools of the country, is by far the most practical ever published, and is specially adopted for school use and self-instruction. It is a practical treatise explaining the Art of Making Working Drawings, Lettering, and Dimensioning. Fifteenth edition revised and enlarged. Fully illustrated. Oblong. Price, \$1.50

Oxy-Acetylene Welding and Cutting with a Treatise on Acetylene and Oxygen

By *P. F. Willis*

The 6th revised and much enlarged edition of this book is just off the press. It is a very complete work, written in simple language, fully illustrated with engravings showing how to prepare the work, as well as the actual welding of it. Special chapters treating on Acetylene Oxygen Welding and Cutting, Torch Apparatus and Installation, Preparing for Welding, Welding of Different Metals, Welding of Sheet Metal and Pipe, Welding of Boilers, Welding of Various Pieces, Electric Welding, Automobile and miscellaneous welding are contained, as well as other valuable data. 250 Pages. Fully illustrated. Price, \$1.50

Model Making

By *Raymond Francis Yates*

A new book for the mechanic and model maker. This is the first book of its kind to be published in this country, and all those interested in model engineering should have a copy. The first eight chapters are devoted to such subjects as Silver Soldering, Heat Treatment of Steel, Lathe Work, Pattern Making, Grinding, etc. The remaining twenty-four chapters describe the construction of various models such as rapid fire naval guns, speed boats, model steam engines, turbines, etc. 400 pages. 301 illustrations. Price, \$3.00

PAGE'S AUTOMOBILE BOOKS

The Modern Gasoline Automobile, Its Design, Construction, Operation

This is the most complete, practical, and up-to-date treatise on gasoline automobiles and their component parts ever published. 1032 Pages. 1000 Illus. Price, \$4.00

Automobile Repairing Made Easy

A thoroughly practical book containing complete directions for making repairs to all parts of the motor car mechanism. 1056 Pages. 1000 Illus. Price, \$4.00

Questions and Answers Relating to Modern Automobile Construction, Driving and Repair

A self-educator on automobiling without an equal. This practical treatise consists of a series of thirty-seven lessons, covering with over 2000 questions and their answers—the automobile. 701 Pages. 387 Illus. Price, \$2.50

The Model T Ford Car, Its Construction, Operation and Repair, Including the Fordson Farm Tractor, F. A. Lighting and Starting Systems, Ford Motor Truck

This is the most complete and practical instruction book ever published on the Ford car and Fordson tractor. 1921 Revised Edition. 410 Pages. 153 Illus. Price, \$2.00

Starting, Lighting and Ignition Systems

Over 200 wiring diagrams are shown, in both technical and non-technical forms. Complete data is given for locating troubles in all systems, the various steps being considered in a logical way for those without expert electrical knowledge. Over 815 pages, 492 specially made engravings. 1921 Edition. Revised and Enlarged. Price, \$3.00

New 1922 Catalogue just off the Press. Send for a Copy

Fourth Revised Edition

Books For The Young

If interested in good books for children or in the purchase of Juvenile literature for the young, send for this 180 page complete catalog. It is valuable for the following reasons:

- 1 The Books are classified (Dewey Decimal System)
- 2 The grade or grades for which each book is best suited are given
- 3 Annotations (without laudation) intended to be descriptive of their scope and usefulness, are given
- 4 The Publisher's list price and the wholesale price to libraries are indicated
- 5 Only books of tested merit, interest and literary purity find a place in this list

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.

911-913 Atlantic Avenue

Brooklyn, N. Y.

SNEAD STANDARD STACK

This view shows a portable ledge shelf which can be attached to any one of the adjustable shelves to provide a convenient place for consulting books.

It also shows a book support for the "Open Bar" shelf. A downward projecting \perp shaped key, fitting between any two bars forms a lock when books are pressed against the top of the support.

The SNEAD STANDARD STACK equipment has been worked out in its smallest details to give satisfaction and is the preferred equipment for both large and small libraries.

Detailed illustrations of construction and plans of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific construction.

Some Reference Books of 1921

By ISADORE GILBERT MUDGE
Reference Librarian of Columbia University

THE aim of this present article, like that of similar surveys of reference-books of earlier years, is not to present a complete list of the new reference books of 1921, but rather to indicate, from the point of view of the general library, some of the more important, useful, or interesting of the new publications. While most of the works referred to have been published during 1921, mention is made also of some books of earlier date, principally foreign publications which were not received in this country in time for mention in the earlier surveys. It has been necessary to omit some foreign reference books which probably should be recorded here, because copies have not yet been received in the various libraries to which the writer has access. As a general thing no mention is made of new volumes of established reference annuals unless some irregularity of publication or change of name, form, or scope seems to call for comment.

The classification of titles in the following record follows, in the main, the grouping in the new edition of A. B. Kroeger's "Guide to the Study and Use of Reference Books" (Chicago, A. L. A. Publishing Board, 1917), to which this present article forms an informal supplement.

PERIODICALS AND ACADEMIES

Tho there is no long list of new indexes to be recorded this year there are several welcome publications in this field. The unfinished fourth series of the Royal Society's great "Catalogue of Scientific Literature" has moved on thru four more letters of the alphabet by the issue of volume 17, which covers the letters Marc-P, for the years 1884-1900, and lists 57,474 articles by 10,662 authors. Since January, 1921, the revived "Bibliographie de Belgique" has been issuing as its "Seconde Partie" a monthly index to selected important articles in Belgian periodicals. This has the same D. C. classed arrangement, with author index, as the semi-annual "Sommaire des Periodiques," which was interrupted in 1914 by the outbreak of the war, and is obtainable in two forms, either in a regular issue, or on thin paper printed on only one side

for clipping and mounting. A new Scandinavian index is the "Norsk Tidsskriftidex," the first volume of which indexed the contents of 184 Norwegian periodicals of the year 1918.

An important new bibliography of periodicals is the "Tercentenary Handlist of English and Welsh Newspapers, Magazines and Reviews," published by the London *Times*. This attempts to make as nearly complete a list as possible (excluding annuals and yearbooks, periodicals classed under the heading Academies by the British Museum, local church magazines and official periodicals printed during the war), and while admittedly incomplete for the 18th century, claims to be nearly complete for the other centuries. The list is in two sections, London and suburban, and Provincial, each section is arranged chronologically, with its own alphabetical title index, and the information given for each periodical includes title, date of first issue, or, if that is not accessible, of the earliest issue that has been examined, date of last issue if publication has ceased, or statement "in progress" if publication still continues. In general the work is based on the collections of the British Museum, including the Burney and Thomason collections, but there are references also to other libraries, such as the Bodleian.

Another new work of quite a different type is the catalog of Czechoslovak periodicals, published by the Czechoslovak Bibliographical Institute. This is an alphabetical title list of 2,423 periodicals, principally those, in various languages, published within Czechoslovakia, but including also Czechoslovak titles published in other countries. Information given includes title, editor, publisher, place and price, and an index of proper names and a topographical list are included. For American periodicals there is a new edition, revised and greatly enlarged, of a standard list, Severance's "Guide to Current Periodicals" which lists some 12,000 titles, an increase of about twenty-five per cent over the third edition (1914). In general the plan of the previous edition is followed, but a new fea-

ture is the comprehensive list of trade journals and house organs given under that head in the subject list.

A new work which contains much information about French periodicals and French learned societies and institutions for promoting or aiding research, is "Les Ressources du Travail Intellectuel en France" by Edme Tassy and Pierre Leris. This is an attempt to present information about all types of organizations for aiding research or furnishing information: academies, societies, periodicals, libraries, government bureaus and offices, museums, exchange bureaus, etc.

Bibliografický katalog casopisectva Republiky Československé, 1920. Praha, 1921. 243 p.

Tassy, Edme and Leris, Pierre. Les ressources du travail intellectuel en France. Paris: Gauthier-Villars, 1921. 50 fr. 711 p.

DICTIONARIES

An important dictionary which has just been completed after many years by the issue of the third and last part of its supplement is the Bosworth-Toller "Anglo-Saxon Dictionary." The part just published covers the letters Geolwin-Ypong and completes the supplement which has been in progress since 1908. "An Etymological Dictionary of Modern English" by Ernest Weekley is a new work of a popular rather than a basic type, which is more likely to interest the general reader for whom the New English Dictionary is a little too heavy or detailed, than to appeal to the research worker who needs fundamental information. A useful new dictionary of English synonyms is "Allen's Synonyms and Antonyms," which follows somewhat the same plan as the smaller work by Flemming, but presents the information with more detail, and with a differentiation of synonyms as "archaic," "colloquial," etc.

Allen, Frederic Sturges. Allen's synonyms and antonyms. New York: Harper, 1921. 481 p. \$3.

Bosworth, Joseph. Anglo-Saxon dictionary: Supplement, by T. N. Toller, pt. 3. Oxford: University Press, 1921. 31s. 6d., suppl. complete 50s.

Weekley, Ernest. An etymological dictionary of modern English. London: Murray, 1921. 1659 p. 42s. New York: Dutton, \$15.

ENCYCLOPEDIAS

The various Larousse dictionaries have been so useful in their different ways that the publication of a new encyclopedia by this firm is always a matter of interest. The "Larousse Universel" which is now being issued in parts is an up-to-date encyclopedia to be completed in two large volumes, and so intermediate in size between the popular "Petit Larousse" and the larger eight volume "Nouveau Larousse Illustré." The special features are the profuse illustrations the conciseness of the articles, and the biographical material, the latter including a good many contemporary names not contained in the "Nouveau Larousse." The biographical sketches, which include living names, are very brief and in the case of writers do not usually give lists of works, but in the absence of an up-to-date French Who's Who even very brief sketches are useful. Parts so far issued carry the alphabet nearly thru the letter F.

Larousse universel, v. 1 —. Paris: Larousse, 1921 —. price of complete work, 165 fr.

RELIGION

Most of the large reference sets which are in process of publication in this field show some additional volumes or parts since last year's summary, but space does not permit of a detailed checking up of their progress. An entirely new work is the "Dictionary of Religion and Ethics," edited by Shailer Mathews and Gerald Birney Smith. This is a compact, one-volume work which covers in a general way the same field as that treated in Hastings' large encyclopedia, but aims to serve the general reader who needs concise information and the smaller library which either cannot afford or does not need the larger works. The topics covered are those in the fields of history of religions, psychology of religion, present status of religious life, missions, Christian belief and practice, and social and individual ethics. The longer articles are signed, there are some bibliographical references, principally, however, in the selected classified bibliography given at the end of the work. Biographical articles are limited to the more important names, and no living persons are included. For the reader needing only concise information this new dictionary promises to be very useful. A new denominational yearbook is the "Lutheran World Almanac and Annual Encyclopedia for 1921" which aims to furnish a "survey of the Lutheran church in every synod and every land," and includes a large amount of statistical and general information which would be more easily accessible if the general index had not been omitted in this issue. A new Catholic handbook which might be recorded either here or under the heading Education is the "Directory of Catholic

Colleges and Schools," compiled by the Rev. J. H. Ryan.

Directory of Catholic colleges and schools, comp. by the Rev. James H. Ryan. Washington: National Catholic Welfare Council, 1921. 980 p. \$3.50.

Lutheran world almanac and annual encyclopedia for 1921, comp. and ed. by the Statistical and yearbook committee of the National Lutheran council. New York: Lutheran Bureau, c 1921. 966 p.

Mathews, Shailer. A dictionary of religion and ethics, ed. by Shailer Mathews and Gerald Birney Smith. New York: Macmillan, 1921. \$8.

SOCIOLOGY

A new directory of social service organizations which should be useful to either the student or the practical worker is the American Red Cross "Handbook of Social Resources of the United States," compiled by Genevieve Poyneer Hendricks. As this includes only organizations which are national in scope, the various local charity directories must be used for information about local organizations. A working list of the publications by various social agencies is "Social Workers' Guide to the Serial Publications of Representative Social Agencies," compiled by Elsie M. Rushmore. To the growing collection of small reference books on various aspects of labor and labor problems, the Harvard University Bureau of Business Research contributes a new dictionary of an interesting type entitled "Labor Terminology." This defines various labor terms as used by labor union members.

In the subject of education an ambitious work is the new "Encyclopedia and Dictionary of Education," edited by Professor Foster Watson, which is being issued in parts and is about half completed. While the work is general in scope, the greatest emphasis has been laid upon the British subjects and the articles are uneven, some, on questions of British practice or history, being very detailed, while others are distinctly popular in treatment with bibliographies which are unsatisfactory, especially in their frequent omission of dates. "A New Encyclopedia of Freemasonry" by Arthur Edward Waite, should perhaps be mentioned as a recent publication in its field. In the business library, or large general library interested in business subjects, the very comprehensive "Bibliography of Accounting" prepared by the American Institute of Accountants should be useful, and in the same types of libraries the "Survey of Current Business" now being published by the government as a monthly supplement to the "Commerce Reports" is important. "Commercial Commodities" by Frank Mathews is a small reference handbook which contains a good deal of useful information.

The published results of various recent censuses are beginning to be available now in their permanent reference form. Of first importance

in American libraries are the reports of the Fourteenth Census of the United States (1920), of which the first volume has already been issued. The publication of several volumes of the 1918 Census of the Philippine Islands should also be noted here. A useful new yearbook of statistical and general descriptive information, in English, on the various Spanish American countries, is the "Anglo-South American Handbook," edited by W. H. Koebel and published by the Federation of British Industries. To the library or investigator interested in up-to-date descriptive and statistical matter about French West Africa the latest "Annuaire du Gouvernement Général de l'Afrique Occidentale Française" will furnish a large amount of important information. This covers the years 1917-21 and is the first published since the issue of 1915-16.

SCIENCE AND TECHNOLOGY

A recent trade catalog which is a really valuable tool for the order department, reference worker or student of the history of science is issued by H. E. Sotheran and Co. under the title "Bibliotheca Chemica-mathematica: Catalogue of Works in Many Tongues on Exact and

Applied Science." The two large volumes list a collection of over 17,000 titles, with bibliographic details, some biographical data, annotations, many illustrations, and notes of current prices. There is a full index of ninety-six pages which refers both to this "Bibliotheca" and to two later lists. For definitions of scientific terms, including some so recent that they are not in the general dictionaries, a useful new dictionary is "A Dictionary of Scientific Terms" by J. F. and M. A. Henderson. This gives brief definitions of some 10,000 terms and indicates the science to which each appertains. In physics a useful small reference dictionary for the student who can use German is Auerbach's "Wörterbuch der Physik." The "Dictionary of British Scientific Instruments," prepared by the British Optical Instrument Manufacturers' Association, is an interesting compilation in an unusual field, but judging from the list of inaccuracies pointed out in the review in the *Geographical Journal* (September, 1921, p. 238), should be used with some caution. An important reference bibliography for the science and art of aeronautics is the "Bibliography of Aeronautics" issued by the Advisory Committee for aeronautics. This, which is the work of Mr. Paul Brockett, covers the years 1909-16 and supplements his previous bibliography published by the Smithsonian in 1910. Artschwager's "Dictionary of Botanical Equivalents; French-English, German-English," contains two bi-lingual lists of by no means equal length, the French list being much briefer than the German.

The many developments in chemistry have shown the need for new reference books in this subject and several new titles of importance are to be recorded this year. Of most general interest is the new revised edition of Thorpe's "Dictionary of Applied Chemistry," of which volumes 1-2, A — Explosion, have already appeared. Smaller dictionaries of importance are a second enlarged edition of Comey's "Dictionary of Chemical Solubilities" and Couch's "Dictionary of Chemical Terms." A new book which should be of use to the cataloger as well as the user of chemical books, is A. M. Patterson's "French-English Dictionary for Chemists," a companion volume to his excellent "German-English Dictionary," published several years ago. Ullmann's large "Enzyklopädie der Technischen Chemie" is slowly nearing completion, as volume 9, published in 1921, carries the alphabet to Santyl.

The question of medical reference books suitable for the general library is often so difficult that it is a satisfaction to notice one as excellent for this purpose as F. H. Garrison's "Introduction to the History of Medicine," of which a third edition has just been published. This edition is

larger than the second (1917) by nearly forty pages and includes new material in the subjects of ancient and mediaeval medicine, Chinese medicine, recent Japanese, Spanish and Latin American medicine, medical departments of armies in the European war, etc. It contains many bibliographical notes and suggestions for further reading on the subject treated, a medical chronology, selected bibliography, many biographies, excellent portraits and other historical illustrations and while planned especially as a guide for the medical student or busy practitioner serves the general reference librarian also as a mine of information on questions of medical history, biography and bibliography. The new biennial edition of Dorland's "American Illustrated Medical Dictionary" is revised to include new terms coined since 1919. A new dictionary which should be of use both to the user and cataloger of French medical works is the "French-English Medical Dictionary" by Alfred Gordon.

Artschwager, Ernst Friedrich and Smiley, Edwina M. Dictionary of botanical equivalents; French-English, German-English. Baltimore: Williams and Wilkins Co. 1921. 137 p. \$2.

Ullmann, Fritz. *Enzyklopädie der technischen chemie*. v. 9 Paracodin-Santyl. Berlin: Urban, 1921. m. 180.

FINE ARTS

An important dictionary of art biography has been completed during the year by the publication of the fourth volume, N-Z, of Lami's *Dictionnaire des Sculpteurs de l'École Française au 19e Siècle*. A new reference work for questions in the chronology of painting is the "Répertoire des Peintures Datées" by Isabelle Errera. This presents a long list of paintings arranged by date from 1085 to 1875 in which, in addition to the date, there is given for each painting the artist's name and native country, subject of the painting, its latest location if known, and the source of this information. An index of names of artists included gives the possibility of more than a chronological approach to the main list. Several new handbooks or dictionaries answer questions about art prices. Among these may be mentioned Lucien Monod's "Le Prix des Estampes Anciennes et Modernes," which is a dictionary of artists and their works with the primary object of supplying information as to the prices realized, altho a small amount of biographical and bibliographical information is given when necessary for identification.

In the field of music a matter of general interest is the American supplement to "Grove's Dictionary of Music and Musicians" which forms volume six of the complete work. The supplementary material is presented in two parts, (1) a compact historical introduction and chronological register, the latter containing brief biographical notices of some seventeen hundred persons, and (2) the main dictionary arrangement in which about seven hundred of these names are given fuller treatment and other articles are included. The term American is used of the United States and Canada together, and some South American names have been included. Some important articles on non-American subjects have been continued from the main work. Other recent publications include new editions of two standard opera handbooks: a revised edition of Melitz' "Opera Goers' Complete Guide" which contains a second supplement giving outlines of twenty-nine more operas, and a third edition of McSpadden's "Opera Synopses," rearranged, by composers instead of titles, and including arguments of 65 additional operas.

Errera, Mme. Isabelle. *Répertoire des peintures datées*. Bruxelles: G. van Oest, 1920-21. v. 1-2. fr. 84.50.

Grove, Sir George. *Grove's dictionary of music and musicians*. American supplement, being the sixth volume of the complete work, Waldo Selden Pratt, editor, Charles N. Boyd, associate editor. New York: Macmillan. 1920. 412 p. \$6.

Lami, Stanislas. *Dictionnaire des sculpteurs de l'école française au 19e siècle*. Paris: Champion, 1921. v. 4, 30 fr.

McSpadden, Joseph Walker. *Opera synopses; a guide to the plots and characters of the standard operas*. 3d ed. rev. and enl. New York: Crowell, 1921. 340 p. \$3.

Melitz, Leo Leopold. *Opera goers' complete guide*, comprising 268 opera plots with musical numbers and casts, tr. by Richard Salinger, rev. and brought to date . . . by Louis Wallace Hackney. N. Y.: Dodd, 1921. 556 p. \$2.50.

Monod, Lucien. *Le prix des estampes anciennes et modernes*. . . . Paris: éditions Albert Morance, 1920-21, v. 1-2.

(To be concluded.)

The American Foundation for the Blind

LIBRARIES will be interested in the organization of the American Foundation for the Blind, the initial meeting of whose Board of Trustees took place in New York on November 28.

Among those qualified for membership in the Foundation, as specified in the Articles of Incorporation, are "Librarians and others officially engaged in libraries for the blind and departments for the blind in libraries for the seeing." This group is also specified in the By-laws as one of five groups which are to be especially represented on the Board of Trustees, and the library representative on the first board is Dr. Arthur E. Bostwick, of the St. Louis Public Library, who attended the initial or organization meeting of the Board, held as above stated.

The work of the foundation, whose establishment is the first attempt to unite and co-ordinate all existing agencies for instruction, welfare and betterment of the blind, is to be done largely thru three bureaus, having in charge respectively (1) information and publicity, (2) research, and (3) education.

Among the duties of the bureau of information are to assemble, systematize and disseminate all available data relating to styles and varieties of embossed type and either to issue an ink-print and an embossed magazine devoted to work for the blind or to avail itself of the services of such periodicals already in existence.

The bureau of research, among other things, is to ascertain, develop and standardize the best methods of embossing and printing and of increasing the number of the reading blind, also the best kinds of books and appliances for the use of the partially blind and the best methods of obtaining them.

Among the activities of the bureau of education are to be the financing of the work of the Commission on Uniform Type for the Blind and co-operating with embossing plants and libraries in their efforts to improve the quality and increase the quantity of embossed literature,—also to assist in the production of clear-type books and otherwise co-operate with societies for prevention of blindness and conservation of vision.

It will be seen that all the items mentioned are closely related to the work of libraries, and that library activities and those of the Foundation will be mutually helpful.

The work is likely to require an expenditure of \$50,000 a year at the outset, which may be increased in the course of years to as large an amount as \$200,000. This must be financed by contributions from the large Foundations or Funds and by individual subscriptions.

Librarians are likely to be asked in the near future about the character and aims of the Foundation for the Blind and about its connection with library work, and should obtain the pamphlet of information issued in connection with the initial meeting, which may be had from the Director-General of the Foundation, Mr. H. Randolph Latimer, Pennsylvania Association for the Blind, Pittsburgh.

The meeting of the Trustees on the afternoon of the 28th was preceded in the morning by an informal conference with some of the best known workers with the blind. The library interests were represented at this conference by Dr. Bostwick, by Lucille Goldthwaite, head of the Department for the Blind in the New York Public Library, and by Mrs. Ryder, in charge of the same department in the Library of Congress at Washington.

A. E. B.

Federal Educational and Public Health Bills

"THE CAPITOL EYE" is the pertinent name of a new publication issued in Washington, D. C., by the Capitol Eye Publishing Co. To quote from a statement by the editors, A. Gram and V. Hitchcock, "This publication will present a monthly digest of federal bills dealing with public health and education. It will follow their progress. It will record their history. It will assemble relative arguments and *pro* and *con*. Such a policy will afford the reader an opportunity to study a bill from every angle and judge its merits. Congress will be able to speak thru these columns directly to the people, and organized bodies will be furnished a forum where all can exchange reasons for opposing or endorsing these public interest measures." It is also stated that "*The Capitol Eye* is not an official organ, not controlled by, or under the influence of any particular interest, class, or sect."

The November number which is no. 2 of volume 1, contains a Health Section and an Educational Section, under these headings the Campbell-Willis Beer Bill and the Foss-Kenyon Public Welfare Department Bill are treated, giving

first the history and outline of the bill, second, the *pro* and *con* views by two Senators and two Representatives, third: "The Lobby" with the opinions of various organizations and individuals on the bills. At the end is a glossary of legislative terms, which is indeed a boon to readers and students. The Towner-Sterling Bill to establish a Department of Education, and the Foss-Capper Bill for the promotion of physical education are the features for number 3. Librarians have noted with interest the helpful combination of popular names and the clear, simple explanations which make this new review a splendid help for debate material for schools, and for legislative committees of woman's clubs.

The publication begins its life (which all who have examined the paper hope will be a long one) at a most opportune time for librarians, who have been struggling with the insatiable thirst of school boys and girls for debate material on current bills, or the rapidly increasing demands of current events classes of woman's clubs. The price of five dollars seems a little high, but its usable and attractive make up and the saving in time and labor which it makes possible make it well worth that sum.

JESSIE M. WOODFORD,

In Charge of Documents.

Chicago Public Library.

Library Service to the Army Assured

Dear Mr. Bowker;

Replying to your letter of December 12, 1921, relative to lack of funds for library purposes in the War Department budget for 1923, it gives me pleasure to say that beside the sum of \$20,000 which had been set aside from the estimate for military post exchanges, for the provision of newspapers, periodicals, etc., I have directed that an additional estimate of \$60,000 be made a supplementary item in the budget. This amount seems as large as the requirements of Governmental economics would warrant at this time. As it is intended that it shall be used for "the conduct and maintenance of libraries," it would accordingly be available for the payment of salaries of librarians as well as the purchase of books and equipment.

I am very appreciative of the interest which you have in the conduction of the Army libraries along efficient lines, and assure you that the War Department desires their continuance under the general principles of operation in effect at the time they were so generously turned over to the Government.

JOHN W. WEEKS,

Secretary of War.

Contributions of College Librarians to General Literature

By EDWARD F. STEVENS, Director of Pratt Institute Free Library.

WHEN Mr. Hicks invited me to compose a paper on what college librarians had produced as men of letters, my first thought was that as librarians traditionally were not supposed to have time to *read*, there was far less reason to expect them to *write*. Then it occurred to me that I had been asked to consider a select and favored class, the college and university librarians, whose lot in their highly intellectual environment was conducive to mental expansion and literary expression. I remembered, too, how a librarian not long ago, who had been invited to an important post with an educational institution of renown, explained to me that he had accepted the librarianship in order that he might have leisure to pursue his studies for the production of literature in his chosen specialization; and I recalled how another college librarian, still more recently, asserted that he did not intend that his librarianship should stand in the way of certain economic pursuits which were his first interest to the end that he might publish a book of his researches. A favored class, I say, into whose ranks I am admitted only by exceptional courtesy as a librarian of a free library which is at the same time connected with a school, more practical than intellectual in its attainments withal.

It has been a pleasurable pursuit, this inquiring into the literary achievements of college librarians. It has permitted me to make contact with many associates in the profession with whom I had never had the occasion for intercourse. My inquiries have shown that the literary contributions from college librarians, past and present, (many only some-time or part-time librarians to be sure) were indeed very considerable, so much so that a comprehensive bibliography of college librarians might prove a valuable document in the archives of this association. In fact the chairman of this conference almost took alarm, when he learned of the extent of my inquiry, and warned me against attempting to present a formidable array of bibliographical data at this meeting, lest I stampede the gathering.

I have appealed to many librarians of the northern and eastern institutions, as no doubt you may all have had reason to suspect. Many replied, many did not, in spite of an urgent reminder. But I gained, from the large number who were interested to answer, most illuminat-

ing revelations of the part played by the men and women who at one time or another had supervision of the book collections of their schools of learning.

It would seem that in many colleges in the earlier days the library was considered quite a minor matter, and retired clergymen were assigned to librarianships as benefices for somnolent old age. So I learn from certain quarters that only old sermons were credited to their librarians as nearest approaching literary contributions. Others tell me that as the library had in the past figured as only a "side-show" of subordinate and uncertain relation to the main circus, no literary freaks had been in the exhibit. In more than one case I am told the librarians have been "very busy teachers," and the library has only been an "incidental issue" in that college.

Notwithstanding the minor consequence of the library in the collegiate scheme of education in years past, men of high literary attainment have begun, finished, or spent their career in the college library.

I have made a hurried geographical survey of what may be considered the northeastern United States, and will venture to touch upon the elements of interest that have revealed themselves to me, not limiting myself altogether to the prominent names and conspicuous publications, but making mention of less notable author-librarians who have given of their talent beyond the confines of their professional activities and considerations.

Beginning farthest "down east" at Colby College, my own alma mater. Justin R. Loomis, as the first librarian, published recognized textbooks on geology and physiology in the fifties after the period of his librarianship. Martin Brewer Anderson, the great first president of Rochester, was next librarian at Colby whose published contributions were chiefly addresses of power appearing as pamphlets only. Edward Winslow Hall, librarian for nearly forty years, until 1910, wrote a History of Higher Education in Maine, and Charles Phillips Chipman, the present librarian, is credited with several acceptable story books for boys.

Bowdoin College presents a galaxy of names of whom in the early 19th century Calvin Ellis Stowe and Henry Boynton Smith were members of the American Commission for the revision of the English Bible. Their publications were properly theological works. Serving as librarian of Bowdoin in an interval of six years between

* Paper read before the meeting of Eastern College Librarians at Columbia University, November 26, 1920.

these two theologians came Henry Wadsworth Longfellow whose imperishable glory in English literature reflects luster on librarianship from which he emerged such a brilliant figure. Among my own books I prize two contemporary volumes of Longfellow's earliest poems published in 1841. In one volume, grouped as *Earlier Poems*, is a collection of verse written during his college life, as explained in his own introductory note, all of them before the age of nineteen. In the early eighties Henry Johnson, librarian, was a poet not unworthy of his great predecessor; and his culminating translation of Dante's *Divine Comedy* was a literary triumph deserving and receiving renewed recognition in this Dante year.

Dartmouth library makes no pretensions to literary distinction. Nathaniel L. Goodrich, now librarian there, sends me a modest brochure of his own on the *Attractions and Rewards of Trail-making*—a reprint to be sure from *Appalachia*, but a bit of true writing; an artistic description of trail-blazing thru a White Mountain wilderness to the timber line. Dartmouth library is fertile, if not yet prolific.

A long line of librarians in the University of Vermont have been writers, mainly in the way of papers of more or less local historic interest. One of them—Joseph Torrey, a man of great erudition who became president, published a *Theory of Fine Art* in 1874, and translated Neander's extensive *General History of the Christian Religion* in five volumes. Matthew Henry Buckham, librarian 1863-1869, also afterwards president, published a collection of addresses in 1913 entitled *The Very Elect*. John Ellsworth Goodrich, 1873-86, compiled the Vermont rolls of the soldiers in the Revolution, a work of large dimensions and historic consequence. Lorenzo Sears, coming later, is known for his *History of Oratory, the Principles and Methods of Literary Criticism* and other literary and biographical productions.

It seems that in Vermont librarians tended to become presidents of the University, which is something for all of us to contemplate in wonder and in hope.

In Massachusetts the Institute of Technology was once favored by the librarianship of Clement W. Andrews, now of the John Crerar Library, and a contributor to chemical journals in line with his specialties which seem to have been sugar and paraffin; and Robert P. Bigelow of today has contributed often to zoological and biological science in journals, cyclopedias, and pamphlets. Not strictly general literature in either case, but surely writings removed from their librarianship.

Harvard University boasts a great procession

of librarians, sixty of them giving way to one another at frequent intervals during the first two hundred years of the college's history. Only five of these took the profession at all seriously. The second librarian of Harvard, Samuel Sewall, 1674, has been called the Pepys of New England from the minute record of his daily life throwing light on old colony days. This record found permanency when published by the Massachusetts Historical Society. Two centuries later John Langdon Sibley was a notable librarian, and his monumental work—*Biographical Sketches of the Graduates of Harvard University* is of inestimable historic value to the university, leaving, however, all the graduates since 1689 yet to be accounted for, a heritage he left by will to the Massachusetts Historical Society. Sibley was followed by Justin Winsor, whose distinguished contributions to professional, bibliographical and historical literature are every library's possession. His most important works—the editorship of the *Memorial History of Boston, 1880-1881*, largely the work of other contributors; the *Narrative and Critical History of America* made up of chapters by many historical scholars with numerous important chapters of his own; and his four volumes of *American History in Its Geographical Relations*, establish Justin Winsor as the outstanding literary figure of the long line of Harvard librarians. But it must not be forgotten that a historian of still wider acceptance, and a philosopher of eminence, John Fiske, was assistant librarian at Harvard from 1872-79. His historical works are known and read of all men, and his essays in philosophy and religion have made these speculative subjects attractive and understandable. In volume 10 of his *Miscellaneous Writings*, and in his volume on Darwinism are delightful essays reverting to his librarianship days. It was he who was congratulated (in the same vein as my opening felicitations) on being connected with the Harvard College Library on the ground that "being virtually a sinecure office, it must leave so much leisure for private study and work of a literary sort." His essay on "A Librarian's Work" is devoted to refuting the insinuation.

At Boston University, E. Charlton Black has done considerable editing of English literature, including notably the school and library editions of the *New Hudson Shakespeare*. Thomas Bond Lindsay was a classical scholar with productions of repute; and Dallas Lore Sharp, assistant librarian at Boston for three years, 1899-1902, beginning in his library days, for twenty years thereafter, has been productive of literature of great charm for the lover of nature, wherein all libraries rejoice.

Louis N. Wilson, Clark University's only libra-

rian, has made frequent contributions to print, mainly articles on bibliographical subjects.

Amherst modestly disclaims general literary attainments, but it would be impossible before librarians not to mention Melvil Dewey and William I. Fletcher, whose son, Robert S. Fletcher, now Amherst's librarian, naturally regrets that my paper must try to keep outside the bibliographical and library field.

Williams College deploras the incidental inconsequence of librarianship there in earlier years, when instructors and clergymen kept a chance lookout on the book collection. Latterly Truman H. Safford made a reputation for astronomical calculations, and John Adams Lowe, assistant librarian, 1911-1915, now my neighbor in Brooklyn, manfully has stuck to his bibliographical last.

At Mount Holyoke Miss Blakely, present librarian, makes mention of her sole predecessor, Mary O. Nutting, who under the pen name "Mary Barrett" wrote pleasing books for young people dealing with the history and heroes of the Netherlands; and at Wellesley, besides bibliographical matter in the past, Miss Lilla Weed, associate librarian, has composed poems for children accepted for periodical publication, and a member of the staff, Mrs. Ethel Ambler Hunter, has written interesting stories for young people for the *Youth's Companion*.

Brown University presents Horace Mann, librarian 1821-23, with a bewildering list of educational books and papers drawn from his subsequent distinguished career as an educator. Later Reuben Aldridge Guild, who was connected with Brown's library for more than fifty years from 1847-1899 was the author of important biographical and historical works relating mainly to his immediate environment. Following Dr. Guild, Harry Lyman Koopman continues at Brown, a true poet with half a dozen books of finished poetry to his credit and honor, a true bookman, also, as evidenced in his recent volume on *The Booklover and His Books*. George Parker Winship for ten years at the John Carter Brown, now of the Widener Collection, has produced in print, "privately" and otherwise, a number of valuable contributions, including a *History of the John Carter Brown Library*. He has been editor also of numerous scholarly works culminating in the *Census of the 15th Century Books in America*, in 1919, bibliographical essentially, but perhaps I may be allowed to enrich my paper by its mention.

Yale University reports in generous detail on the extensive literary productions of its librarians, omitting "bibliothecal and bibliographical matters" as Mr. Keogh put it. That is to say, it won't do to mention that during his sophomore

year at Yale, William Frederick Poole was made assistant librarian of the Society of Brothers in Unity and there launched his famed Index. Besides an infinite number of scholarly articles in literary, historical, philological, theological and scientific journals Yale's librarians have given much to literature in books and encyclopedic matter. James Luce Kingsley, 1805-24, wrote a life of Ezra Stiles, president of Yale College. Josiah Willard Gibbs, 1824-1843, was a prolific contributor to learned journals and the compiler of two Hebrew and English lexicons. Daniel Coit Gilman was librarian at Yale for seven years before beginning his great career at Johns Hopkins, and of his many productions it is possible to allude only to his biographies of James Monroe and James Dwight Dana, the Launching of a University, and his editorship of the *New International Encyclopedia*. Addison Van Name, who first inducted me into librarianship, contributed to encyclopedias on the Arabic and Chinese languages. Franklin Bowditch Dexter, long assistant librarian, wrote extensively on historical subjects with local emphasis. His *Biographical Sketches of the Graduates of Yale College* appearing at intervals from 1885 to 1912, is his literary monument. John Christopher Schwab, Mr. Keogh's predecessor, was the author of a history of the Confederate States of the South During the War, in the *Cambridge Modern History*, and the article on the Confederate States in the eleventh edition of the *Encyclopedia Britannica*.

At Wesleyan, the figure of Professor Caleb T. Winchester stands out in high prominence, whose delightful literary essays made him widely sought as a lecturer on English literature, who won also great esteem as a professor in the college by his gifts and lovable character. Professor Winchester was the author of many articles in denominational and literary journals, and among his books *Some Principles of Literary Criticism*, 1899; *Life of John Wesley*, 1906; a group of *English Essays of the Early 19th Century*, 1910, and *William Wordsworth: How to Know Him*, 1916, merit particular mention.

Trinity points with satisfaction to Samuel Hart who is associated intimately with the *Book of Common Prayer*, and to William N. C. Carlton, later of Newberry, Chicago, and recently of the *American Library in Paris*. Mr. Carlton has published publicly and privately a biographical memoir and studies on the *Poems and Letters of Byron* and on the *Icelandic Sagas*.

The Hartford Theological Seminary rightfully has a claim upon Ernest Cushing Richardson for his librarianship there from 1884-90. But he belongs to Princeton in a much larger measure. Charles Snow Thayer, at present at Hart-

ford, has been assistant editor of Zahn's comprehensive Introduction to the New Testament.

Cornell University, whose library this fall has been the object of pilgrimage of the New York Library Association, brings to notice Willard Fiske, the first librarian, whose publications reveal his penchant for the game of chess and Icelandic literature. It was he who presented to Cornell its rich Dante Collection, cataloged by Theodore W. Koch. George W. Harris was the author of the history of the Cornell Library in its first quarter century, and a monograph on Willard Fiske, his predecessor; and Professor Willard Austen, the present librarian, has written on the Fraternities at Cornell, on Bookworms, and an important article on the Educational Value of Bibliographical Training, which is noted here as belonging also to education.

Wharton Miller at Union College points to Jonathan Pearson, Union's first librarian, who served from 1845-1887. Pearson compiled four historical and genealogical works relating to the environment of Schenectady and Albany. Asa Don Dickinson was librarian there, 1906-07, but Mr. Miller generously grants to the University of Pennsylvania the possession of Mr. Dickinson as a writer.

At Vassar Frances A. Wood, librarian, 1883-1910, wrote of her personal recollections of the earliest years at Vassar, and Amy Louise Reed, lately librarian, wrote in her library days, *The Background of Gray's Elegy* which the Columbia University Press is expected to publish before next February.

Princeton has an extensive list of published contributions, a photostat copy of which Dr. Richardson kindly sent me which I will turn over into the archives of this Association. The enormous catalog of sermons and theological studies which appeared in print as the literary production of early librarians at Princeton, as elsewhere, evidence, it would seem, a change in type of college librarians in the last half-century. John Maclean, Jr., librarian at Princeton, 1824-50, afterwards president, besides many sermons, published in 1877 a history of the first century of the College of New Jersey. V. Lansing Collins, recently reference librarian, in addition to papers of local interest published in 1914 Princeton in the American College and University Series. Henry B. Van Hoesen, assistant librarian, has printed philological, paleographic and calligraphic papers of value. Ernest Cushing Richardson, coming from Hartford, Princeton's honored librarian since 1890, and also honorary since 1920, in addition to many scholarly bibliographical publications, is the author of such well-known and enjoyable books

as *Beginnings of Libraries*, *Biblical Libraries*; *Some Old Egyptian Librarians*, which, tho bibliothecal, should be classed equally as literature.

Dr. Morris Jastrow, Jr., late librarian at the University of Pennsylvania, has recently produced three notable biblical works; in 1919, on the Book of Ecclesiastes, called *A Gentle Cynic*: a year ago *The Book of Job*; and lastly *The Song of Songs*, barely finished at the time of his death and just published. Important archeological studies on the Assyrians and Babylonians, and his *War and the Bagdad Railway*; *The War and the Coming Peace*: Zionism and the Future of Palestine combine to place Dr. Jastrow's name at the forefront of librarians who have produced general literature. Asa Don Dickinson, Pennsylvania's new librarian, has edited a number of volumes of collected stories for children, which, albeit a distinct departure from his predecessors' inclinations, have received their due acclaim.

Three of the librarians at the Pennsylvania College of Gettysburg have been writers—John A. Himes has published his own poems, and studies of Milton and Shakespeare: John O. Evjen wrote a history of Scandinavian Immigration in New York, 1630-74, and contributed to the Schaff-Herzog Encyclopedia and to Hauck's *Protestantische Realencyclopaedie*; Karl J. Grimm, at present librarian, published in Leipzig a work on the Liturgical Appendixes in the Old Testament, and has written articles on orientalia, language and religion. At Gettysburg librarianship continues to be a scholar's pursuit without question.

I evoked a very pleasant response from John Russell Hayes, librarian at Swarthmore College, who proves to be an artist in letters. His *Old Quaker Meeting Houses*, *Brandywine Days*, and volume of *Collected Poems* are the more poetic that they are far removed from modern cubist verse. Mr. Hayes has graciously inscribed one of his volumes to me as the "beneficent friend of submerged authors." Submerged perhaps inasmuch as it is deep beneath the surface where we are told lie obscured "full many a gem."

At Haverford College, another Quaker foundation, Allen C. Thomas, librarian, 1878-1914, was an accomplished historian, composing elementary histories of the United States, a history of the Society of Friends in America, jointly with R. H. Thomas, and brief histories of Pennsylvania and of England. Albert J. Edmunds, assistant librarian at Haverford, 1887-89, as a student of comparative religion, has issued anthologies translated from the Pali of sacred verse and prose derived from the scriptures and lore of Buddhism.

Dr. Raney attributes to Johns Hopkins' second librarian, William Hand Browne, chief honors in literature for the University library. Dr. Browne published the Clarendon Dictionary; George Calvert and Cecelius Calvert, Barons of Baltimore; Maryland, the History of a Palatinate; and jointly with Richard Malcolm Johnston, a history of English literature and a Life of Alexander H. Stephens. In addition he edited literary and historical works of importance, including the *Maryland Historical Magazine* for six years. Dr. Raney himself has given freely to library literature; printed a recondite doctor's dissertation, of course, and with a taste for ornithology contributed an official Bulletin on Maryland's Stock of Wild Life.

W. O. Sypherd, acting librarian at Delaware College, has written a Handbook of English for beginners, and his edition of the English Bible consisting of extracts from the important narratives and literatures is reported just off the press.

Making a short excursion westward we meet in Ohio, the land of colleges, the President of the American Library Association at Oberlin. Dr. Root states modestly that he has published nothing, but his predecessor, Rev. Henry Matson, was the author of three books, one of which—References for Literary Workers with Topics and Questions for Debate—had an extensive sale in its day.

Marietta College points to Henry Smith and Martin Dewey Follet, early librarians, as writers, the latter contributing to penology; and in more recent years Rodney Metcalf Stimson, 1881-1913, made compilations of Washingtoniana, Lincolniana and valuable collections of history of the Northwest Territory.

Ohio Wesleyan names T. G. Duvall, L. C. Marshall, as author-librarians who have given variously to educational, psychological and economic subjects; and Russell B. Miller, now librarian there, has contributed largely to the International Biblical Encyclopedia.

At Lake Forest College Hiram Miner Stanley, 1857-1903, published a Psychology for beginners, and other psychological studies and literary essays. The present librarian, Miss Mable Powell, regretfully professes that she has "added nothing to the knowledge or pleasure of the world," neither contention to be allowed for a moment if she be just a librarian.

My writing to Mr. Bishop at Ann Arbor led the University of Michigan library to investigate its own literary attainments hitherto unexplored. The result shows Theodore Wesley Koch to be the most prolific writer in the Michigan group. His five studies on Dante and Danteiana

appearing from 1896 to 1901 are especially deserving of mention this sixcentennial year. Dr. Koch's removal to Evanston gives Northwestern claim on the many publications which have recently appeared by his authorship. His frequent contributions to the LIBRARY JOURNAL have often been separately printed, and his descriptions of the Library War Work, while properly classed as professional, belong also to the history of the World War.

At the University of Chicago Ernest DeWitt Burton has been director of libraries from the beginning. As a prominent theologian and professor of New Testament Interpretation in the University he has published a dozen or more religious works of distinction, the latest being the Commentary on Paul's Epistle to the Galatians in the International Critical Commentary.

While Knox College at Galesburg offers no library-literary bibliography, Miss Nelson of the Knox library makes interesting mention of John H. Finley, who was a library assistant while a student at Knox, and first cataloged the Library. His subsequent career and his writings belong to librarianship only by this tenuous and distant claim which we venture to put forth.

We have made a sufficiently wide excursion perhaps to compass the ambitions of this paper, and now we must hasten back to our own homeland, the tight little Hylan Kingdom of which we are unworthy subjects.

From University Heights New York University speaks of the days of Washington Square when reference is made to the librarianship of Henry Martyn Baird, whose History of the Rise of the Huguenots of France; the Huguenots and Henry of Navarre; the Huguenots and the Revocation of the Edict of Nantes, compassing six volumes, prove the erudition and talent of a librarian whose literary work was, as well, the product of his investigations as professor in the University. Dr. Baird's successor, Leslie Jay Tompkins, was an able writer on questions of law.

For many years until 1915 College of the City of New York enjoyed in its library the scholarly services of Charles George Herbermann. Professor Herbermann was perhaps the best-known scholar among Catholic laymen in America. He achieved special distinction as editor-in-chief of the monumental Catholic Encyclopedia.

Our near neighbor the Union Theological Seminary presents a phalanx of eminent librarians all of whom have published books, chiefly, of course, of theological interest. It may be enough to mention such authorities as Edward Robinson, author of books on the Holy Land; H. Boynton Smith, once of Bowdoin, editor of

religious periodicals; Charles Augustus Briggs, whose leadership in Biblical criticism shook the religious world; Charles Ripley Gillett, authority on the antiquities of the Levant; William Adams Brown, who varied his religious writing with a biography of Morris K. Jessup and a study of musical instruments; and today Henry Preserved Smith, maintaining the library's reputation with a succession of learned productions. His newest work, *Essays on Biblical Interpretation*, has just been published as one of the Amherst centennial volumes.

And lastly, how can I attempt to pay proper respect to what Columbia Library has achieved in literary distinction during the centuries! I am not so fortunate as to have before me a list of Columbia's librarians since the beginning of history. Many of them have been professors primarily. It would be itself a theme worthy of separate consideration for Columbia's annals to catalog their attainments in letters.

I might refer again in passing to Melvil Dewey as coming here from Amherst. James H. Canfield was a notable figure in this library for his personality as well as for his writings. William H. Carpenter, Provost of the University, and now acting librarian, besides editing an extensive series of Germanic studies, has received special acknowledgment for his important share in the *Century Cyclopaedia of Names*, especially from German and Scandinavian literature. Dr. Carpenter wrote largely also for Johnson's *Universal Cyclopaedia*, the *International Cyclopaedia* and Warner's *Library of the World's Best Literature*.

Our Chairman and genial host, Frederick C. Hicks, is coming to the fore in authorship, especially with *The New World Order: International Organization; International Law, International Co-operation*—published 1920, and *Men and Books Famous in the Law* which all librarians have ordered from the first announcement. A book about men who were not "mere lawyers" as he himself is not. I cannot neglect to name Isadore G. Mudge, Columbia's reference librarian, for what she has done for bibliography, and specifically, for her joint editorship of the *Thackeray Dictionary* published in London in 1910.

This has been a most cursory review of a subject calling for bibliographical research and construction. I have not been able to attempt the study it deserves. I have failed even to approach consistency in the inclusions I have made. But the many records which have come to me in the course of my inquiring are at the disposal of this body for such preservation, editing or compiling as their bibliographic or historic value may invite.

November's Favorite Books

BOOKS most in demand at the public libraries in November, according to the January *Bookman*, were:

GENERAL LITERATURE

The Outline of History. H. G. Wells. Macmillan
Queen Victoria. Lytton Strachey. Harcourt
The Mirrors of Washington. Anonymous. Putnam
The Mirrors of Downing Street. Anonymous. Putnam
The Americanization of Edward Bok. Edward Bok. Scribner's
Margot Asquith: An Autobiography. Margot Asquith. Doran

FICTION

Main Street. Sinclair Lewis. Harcourt
Helen of the Old House. Harold Bell Wright. Appleton
Her Father's Daughter. Gene Stratton-Porter. Doubleday
The Brimming Cup. Dorothy Canfield. Harcourt
If Winter Comes. A. S. M. Hutchinson. Little, Brown
The Pride of Palomar. Peter B. Kyne. Cosmopolitan

Best sellers during the same months, as reported by 47 booksellers in 42 cities for the January *Books of the Month* were:

GENERAL LITERATURE

Mirrors of Washington. Anonymous. Putnam
Outline of History. H. G. Wells. Macmillan
Mirrors of Downing St. Anonymous. Putnam
Queen Victoria. Lytton Strachey. Harcourt
The Cruise of the Kawa. Walter E. Traprock. Putnam
Americanization of Edward Bok. Edward Bok. Scribner's

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown
The Pride of Palomar. Peter B. Kyne. Cosmopolitan
Her Father's Daughter. Gene Stratton Porter. Doubleday
The Sheik. Edith M. Hull. Small Maynard
Helen of the Old House. Harold Bell Wright. Appleton
Main Street. Sinclair Lewis. Harcourt

Books on Making Alcohol

To the Editor of the LIBRARY JOURNAL:

A friend of mine tells me that in one of the principal libraries in a neighboring State he has been unable to get anything on the subject of distillation, including the process of making industrial alcohol. I should like to know what action has been taken by the public libraries since the passage of the National Prohibition Act, to remove from the shelves all books which relate to the manufacture of alcoholic beverages, etc.

HUGH F. FOX.

S. Reinach, in reviewing T. W. Koch's "Books in the War" and "Les Livres à la Guerre" in the *Revue Critique* for November 15, 1921, sums up his estimate of Library War Service as "a vast and noble enterprise which has found a good historian." "The philanthropic work, conducted on sound principles and with abundant means," says he, "became primarily a work of education, the influence of which will long be felt in the United States."

Neglected Aspects of Public Libraries*

By GEORGE BERNARD SHAW

THE importance of public libraries can hardly be exaggerated; yet it is seldom apparent to that most influential but most disastrous of public councillors, the practical man of business. He is revolted by the spectacle of a pretentious building, and a huge and costly collection of books, with seating accommodation for from fifty to two hundred people, and one solitary reader who is not even fashionably dressed. What wicked waste it seems! And yet to anyone who knows, that solitary man is a far more satisfactory spectacle than a crowd of young persons devouring the latest Tarzan. A crowded public library is an absurdity, like a crowded laboratory or observatory. The people who clamor for it are clamoring for something very different: to wit, a crowded popular reading-room. I have nothing to say against reading-rooms any more than against sleeping rooms (most reading-rooms contrive the double debt to pay); but I must insist that a reading-room is not in the classic sense a library. A library is a place in which makers of books work: a reading-room is a space in which ordinary men and women pass the time by reading books, just as they do in railway carriages. The purpose of the reading-room is to enable people of moderate means to share books as they share a towel on a rolling pin, and thus to read fifty novels at the cost of one. The purpose of a library is to enable poor scholars and men of letters, whose traditional lot is "toil, envy, want, the patron and the gaol" to consult books which are store-houses of learning, books which they can no more afford to buy than a chemist can afford to buy a pound of radium. Such men form a very small percentage, or even permillage, of the population; but the quality of the books in the reading-room, which means the quality of the taste of the readers, depends finally on the library and on the unfashionably dressed man who may often be its sole occupant. The debt of British literature, and indeed of every department of British culture, to the British Museum Library is incalculable. I myself worked in its reading-room daily for about eight years at the beginning of my literary career; and oh (if I may quote Wordsworth) the difference to me! And that difference was a difference to all the readers of my books and of my contributions to journalism as well as to all the spectators of my plays: say, to be excessively cautious, not less than a million people.

It is not necessary to go into the question whether the effect on all these people has been for good or evil. It may be that it would have been better for myself and them if I had never been born. But that is neither here nor there for the present point, which is, that the work done in the world by the library cannot be measured by the number of people visibly seated in it. I will go so far as to say that if a public library did not attract even one reader from the outside, its existence would be justified by the presence of its librarian and his official staff. And it never comes quite to that. There are always two or three readers to keep the place in countenance. And if (to take actual cases) one of them is a Carlyle and another a Karl Marx, the results may range from the extension of the English Factory Code thruout the whole modern world, to a European war and a half a dozen revolutions. This may seem a questionable recommendation; but as long as people are impressed only by sensational events like wars and revolutions, and take unmixed benefactions thanklessly as a matter of course, it would be useless to cite the many library workers on whose influence there is no stain of blood. From Plato and Pythagoras to Descartes and Einstein there have been single men who would have justified all that the British Museum costs by spending one week of their lives in it; but the public knows them only as unhappy wretches who never knew the joy of jazzing with ladies of the beauty chorus every night and the daring adventure of buying cocaine for them every day.

The moral is clear: let us have the libraries whether they are empty or full. And do not confuse their high function with that of the reading divan which polices our cities for us by enabling people to read about crimes and vices instead of going out into the streets and practising them. Do not forget, either, that tho this is a very desirable substitution, it is the reverse of desirable in the case of good deeds and virtues. Just as reading about crimes does not make us criminals, but rather causes any propensities we may have in that direction to waste themselves harmlessly thru the imagination, so reading about high virtues does not make us heroes and heroines; it wastes our heroic impulses in precisely the same manner. Therefore it is very questionable whether reading rooms should contain any good books. Rather should they be stocked with the Newgate Calendar, detective stories, lives of Cartouche, Laccenaire Charles Peace, Moll Flanders and all the

* Reprinted by permission from the *New Republic* for December 21.

most infamous characters in fact or fiction. And when the readers, in the disgust and satiety produced by a debauch of such literature, go to the reading-room librarian and say "For heaven's sake give me a book about a saint or a hero: I am sick to death of those stupid malefactors," it should be the duty of that librarian to say, "No my son (or my daughter, as the case

may be): the proper sphere or virtue is the living world. Go out and do good until you feel wicked again. Then come back to me; and I will discharge all your evil impulses for you without hurting anyone by a batch of thoroly bad books." Moral: do not listen to the people who wish to purify public bookshelves: they are sitters on safety valves.

"Home Brew" Binding to Cut Costs

BOOKBINDING costs from 1916 to 1920 more than doubled, and they have not come down appreciably. Volumes of the 80-cent size rose to \$2.10; the \$1.40 size to \$3.55; the \$1.75 and \$2 size to \$4 and even \$6.

To offset this High Cost of Binding, Mr. Fison devised his inexpensive style of magazine binding, as told in the *LIBRARY JOURNAL* for 1 May, 1921, p. 401.

At Brown we examined his method and found it good, but felt it to be desirable to have stiffer sides in order to make the volume stand up more "on its own." This led us to try the Gaylord Multibinder. At about the same time Professor Kenerson of our College of Engineering had suggested ways of doing a similar job for his engineering periodicals, and submitted a sample stapled with wire. But we find that sewing with twine is working all right.

From these varied sources we have worked out a binding which seems to satisfy us as well as the departments, and we are now sorting our binding into two classes: regular binding as in the past for the volumes most used; and our own "Brown University Binding" or "Home Brew" for the others.

Our process is as follows: After removing the advertising matter (except for the month in which we bind—February) and collating and arranging title-page and index and any fly leaves if necessary, we put the volume in a letter-press with the back edge projecting about an inch, resting it on a bottom board to keep the projection flat while drilling.

We then mark the holes thru the eyelets in the cover, setting them in from a quarter to half an inch and having the bottom of the volume flush with the cover, and bore holes thru to the board with a one-eighth-inch drill. We next remove from the press and sew the numbers together and tie. All this is the same as in Mr. Fison's plan.

Next we prepare the back, cutting it to size and allowing about a half inch beyond the holes, and we type on it the title and the volume number, etc. For the back we are using

binders' cloth or library buckram. This costs at present fifty cents a yard and makes this item run to between three and eight cents per volume—instead of one or two cents, as would be the case, if Kraft paper were used—but it is neater and more durable.

Then we fit on the back and a pair of Gaylord Multibinders of pressboard of the nearest size, trimming if necessary in a photo-cutter. We lace on with the same cord used in the sewing. We like best the cord supplied by Gaylord with the binders: Nile brand braided lisle thread No. C. The Belfast twine No. 533 recommended by Mr. Fison is good but we find that it cuts itself readily if pulled too hard.

For height sizes of the Multibinders we used the schedule worked out by the Binding Committee of the Massachusetts Library Club, given in their *Bulletin*, v. 11, no. 3, March-June, 1921. The heights which we have found very adaptable are: *9½"; *10"; 11"; *12"; 13"; 14"; and 17"; the starred ones being those most used. The widths we used for these were 6½"; 7"; 8"; 9"; 9½"; 10"; and 12", respectively.

Our costs have been about the same as the schedule given by Mr. Fison, except that there must be added the pair of Multibinders which average twenty cents. This makes a cost of sixty cents a volume. Our initial costs were higher, as a new worker and much experimenting slowed up the work, but for the first two months the cost per volume was only seventy-four cents, and this has now been reduced close to the estimated figure.

Of course if we make a wrong estimate and a volume receives more usage than this binding will stand, there is nothing to prevent it from being bound in the regular way. But we expect to place on the shelves enough volumes of magazines in the B. U. Bindings in the course of the year to save over one thousand dollars on our annual binding bill, and these volumes will be as readily accessible for occasional reference as if they were sewn and bound in the usual way at a cost of two dollars or more a volume.

F. K. W. DRURY.

*Based on a talk before the Conference of Eastern College Librarians, 26 November, 1921.

The Library of Congress in 1920-1921

THE effects of the present administration's program of economy are evident in the reduced size of the report of the Librarian of Congress for the year ending June 30, 1921, which is limited, in Dr. Putnam's words, to a minimum résumé of the mere facts of operation and status, precluding general reflections or considerations merely theoretic. The four pressing needs described in the reports of 1919 and 1920 also remain unmet,—readjustment of the salary schedule, a few additional positions, certain additional equipment, and a bookstack in the Northeast Courtyard.

Embarrassing resignations of skilled assistants have continued, especially in the Reading Room, Catalog, and Classification services. In the Catalog Division the number of resignations was two and a half times greater than last year, and included five catalogers and revisers who were in the service from ten to twenty-one years, one six years, one four, one three, and four who had between two and three years' training. The Classification Division suffered fifteen resignations in a staff of nineteen people, losing thereby some of its best classifiers and nearly all its expert shelflisters. The Reading Room force lost twenty assistants. The inadequacy of the stack force is illustrated by the fact that for the care and service of half a million items shelved on eight decks or levels in the South East stack, there are no more than two stack assistants on each of the two shifts of a thirteen-hour daily schedule.

The Library, inclusive of the Law Library, contained 2,918,256 books at the end of the fiscal year, a gain of 86,932. Maps and charts (pieces) totaled 170,005, a gain of 3,557; music (volumes and pieces), 919,041, as against 884,227 in 1920; prints (pieces), 424,783, a gain of 5,807. Books purchased numbered 35,515, and 9,245 were received by gift, 3,301 by transfer from government libraries, 15,545 by copyright, and 15,460 from foreign governments by international exchange.

Purchases, tho not so great as in 1920, were considerably above the pre-war average. The Library acquired its first block book in the "Opera Noua Contemplatiua" of Giovanni Andrea Vavassore, and added six incunabula, the earliest being the first printed edition of the "Philobiblon" of Richard de Bury, Cologne, 1473, by the printer of Augustinus "De Fide." It also had the good fortune to obtain six rare issues of English colonial treaties with the American Indians.

The Manuscript Division had several acces-

sions of great value and interest. Mrs. John Boyd Thacher sent in as an indefinite deposit Mr. Thacher's French Revolution autographs, a collection of about 1,600 letters, documents, maps, and badges, beginning with an autograph letter and a portrait of Montesquieu dated 1740 and ending with a similar signed letter from Napoleon to Josephine, dated May, 1804. At the instance of Dr. Gaillard Hunt, formerly chief of the Division, and now editor for the Department of State and in charge of its Library and Archives, and upon recommendation of the Secretary of State, the President directed the transfer to the Library of Congress of the originals of the Declaration of Independence and of the Constitution of the United States. Mrs. Frederick Dent Grant and her son, Major U. S. Grant, 3d, gave the original manuscript of the Personal Memoirs of President Grant. Mr. Justice Holmes of the Supreme Court of the United States presented five hundred letters of his father, Oliver Wendell Holmes, with seven volumes of manuscripts of his writings, including "The Poet at the Breakfast Table." Photostats of Washington papers were received from J. Pierpont Morgan and the New York Public Library. Historians at work in the division during the year included John Bach McMaster, Edward Channing, John Spencer Bassett, and James Truslow Adams.

Current periodicals received (separate titles) numbered 7,283 (7,423 in 1920; 7,260 in 1919). The whole number of periodicals (separate items) received was 130,586 (143,949 last year). Files of Mexican newspapers covering the revolutionary period, 1911-1920, were acquired. The 149 separate titles represent papers of practically all parties and the personal organs of the various revolutionary leaders.

The most considerable acquisition made available to the Print Division for exhibition purposes is the collection of Whistleriana given to the Library in 1917 by Joseph and Elizabeth Pennell.

The Semitic Division devoted its attention to the new Hebrew collection which the Library acquired by purchase from Ephraim Deinard, described in last year's report. Accessions of Semitic and Judaic books from other sources amounted to about 500 volumes.

The Slavic division added about 800 publications, including a noteworthy collection of Lettish publications, 478 in number.

As was the case last year, the Chinese exceeded in number and value all other Far Eastern accessions. These totaled 306 works in 4,871

volumes; the Japanese accessions, about 42 works in 112 volumes; Korean, four works in 26 volumes; Annamite, two works in 15 volumes; and the Manchu, three works in 36 volumes. A small number of official gazetteers was added to the library's unrivalled collection. Thirty-seven new *ts'ung shu* or Chinese collea-teana were added. About 275 of the 310 *ts'ung shu* have been fully indexed and about half of the remainder partly classified. In the Room for the Blind the collection was augmented by 1,147 volumes, and now comprises 8,354 volumes. One-tenth more readers borrowed books, and the annual circulation increased forty per cent.

With an appropriation cut from \$45,000 for the year ending June 30, 1920, to \$25,000, it was necessary to reduce the staff of the Legislative Reference Service to its lowest terms, while preserving the three sections of the service: Foreign Law, American Law, and Economics. There was, however, a relative increase in interest and use of nearly forty per cent on the part of members of Congress.

The number of volumes cataloged was 89,479; new accessions, 73,055, recataloged 16,424 (1919-20, 82,192 volumes, accessions 64,280, recataloged 17,912). Work on the more difficult material was postponed to push work within the capacity of the new assistants being trained by the experienced catalogers, and formidable arrears have accumulated. It is feared that if this condition continues for any length of time that the impairment of the catalog service will be quickly felt in other libraries which depend upon

service of the Library of Congress catalog cards, as well as in the Reading Room and other divisions of the Library itself. The number of subscribers to the printed cards increased from 2,877 to 2,948 (2,693 in 1919). The cash sale of cards, including subscriptions to the proof sheets amounted to \$88,565, an increase over the receipts of 1919-1920 of about fifteen per cent. Cards for about 29,300 different titles were added to the stock during the year, including about 2,250 cards printed for libraries in the District of Columbia and about 1,700 printed for other co-operating libraries. The whole number of different titles represented in the stock on June 20, 1920, was approximately 845,800, or about 63,625,000 cards. Volumes classified and prepared for the shelves numbered 82,256 (83,731 last year) of which 69,696 were new accessions and 12,560 reclassified. The reclassification of classical literature has been finished and the schedules typewritten, but very little has been done in the reclassification of material on religion. About 1,939,000 volumes have now been reclassified. Thirteen more libraries have adopted the classification, including the Grosvenor Library in Buffalo, and Cornell and Princeton Universities, in part.

Expenditures of the Library and Copyright Office for salaries, and contingent expenses and for building and grounds totaled \$711,436 out of an appropriation of \$730,366, as compared with expenditures of \$722,654 in 1920 (\$701,014 in 1919). The appropriation for 1922 is \$711,120, including \$474,355 for Library and Copyright Office salaries, and the usual \$90,000 for the purchase of books.

Libraries and Museums

V. The Museum Idea at Pinnacle

By LOUISE CONNOLLY.

The Educational Adviser of the Newark Library and the Newark Museum. Miss Louise Connolly, wrote the sketch which follows in October last, just before she left for a lecture tour thru North Carolina. It was not written with the intent to make it a part of this series; but it expresses so well, in a rather dramatic and striking way, the general theory of the Utility of Museums, which I am trying to set forth, that I obtained her consent to let me include it as No. V.
J. C. D.

THE Committee met to decide on what sort of memorial should be erected by the little town of Pinnacle to the soldiers who had made the supreme sacrifice in the Great War. The subject had been so well canvassed thru the press and in social meetings that it was easily decided. They would have a playground, where young people would gain just that kind of physical vigor and civic consciousness which had been exhibited by the soldier boys.

When the features of the playground were discussed, the usual suggestions were made. They would have a baseball field, tennis courts, football and basketball grounds, picnic grove, wading pool, swimming tank, small gymnasium, running track, swings, see-saws, and all the paraphernalia needed to meet the requirements of boys and girls from six to twenty years of age.

The young daughter of the house in which the Committee met was present. She restrained herself for a while, but finally offered her unwarranted contribution. "I suppose you will have a museum," said she, "and a branch of the public library."

A long pause ensued. "It seems to me," said the Chairman, "that that library business is a good idea. You would catch all the people who were tired and all the people who were waiting for somebody and so you could get across a little good literature and even a little information. Why not?"

"We could make the city pay for the running of it, and the books," said another.

"And for the building, too," said a third. "We would be generous in offering them the land."

"What about the museum?" asked the unwarranted young daughter.

"I never heard," said the Chairman, "of a museum in a playground. What sort of a museum had you in your mind, dear?"

"I suppose," said she, "that I was thinking that when parties went out walking, they might bring home bugs and plants; and I suppose I was thinking that when boys wanted to be quiet, they might take their stamps and coins out of their pockets; and I guess I was thinking that if this is really to be for children, they might

find it a place where nobody would scold them if they cluttered up."

"Then it was a natural history museum you were thinking of," said the Chairman.

The Chairman's wife also was an outsider. She had "come along." "There is an art museum for children in Boston," said she. "Why wouldn't a little annex to that library or a little unpretentious, but beautiful building, built beautifully in proportion I mean, containing a few plaster casts and some simple reproductions of the world's best artists be a very lovely place for people to rest in who have no particular craving for tearing plants to pieces or for identifying bugs and no particular craving for getting information out of books. A quite profound philosopher, who was also a good observer of life as it is, once said, 'The kind of lassitude that is produced by physical exertion puts one in a very receptive mood for aesthetic impressions.'"

"What would we put into this museum?" asked the Chairman.

At that everybody spoke at once. "I have, as you all well know," said Mrs. Smith, "a group of alabaster statuary too big for my house and entirely unsuited for my furniture. I will gladly contribute it to stand in the center of the art museum."

"There is," said Mr. Snooks, "decaying in my attic and scolded about at least once every year by my wife, what I think to be a most interesting collection made in my youth of the hymenoptera of my father's orchard."

"We have," said Mrs. Brown, "a most awful set of foreign coins, representing, my husband tells me, untold values. If anybody will take charge of it and get it out of my library, I shall be deeply grateful."

The two remaining members of the Committee shouted simultaneously: "Stamps, we have stamps!"

And the Chairman added, in a tremulous tone, "My Burt—he will never come back—was a great mineral collector. I will be glad to see his collections shown in such an institution."

"It will be a very lop-sided museum," said the Chairman's wife. "It seems to me that to be of

any real value, this place ought not to be merely a place of deposit for collections which have lost their owners or the interest of their owners. It ought to be a place which would give a synopsis of those things which our nature study and science teachers deal in. It seems to me that the fundamentals of the classification of botany and mineralogy and biology and some diagrams at least, if not models in astronomy—"

"You have been visiting Chicago and Philadelphia," said the Chairman smiling. "I have," answered his wife, "and Newark."

"Couldn't you trade?" said the host's little daughter?

"My child," said her father, "you are inducting this Committee into the necessity of paying somebody a salary, to trade."

"We will shove it onto the school board," said the Chairman. "I mean the salary."

The town of Pinnacle expects to put in a definite place in its new playground, a building, one wing of which is to be devoted to a small branch library and the other to a small museum, which shall be apparently a museum of art, but really a museum of science and industry. It expects to get the price of the building out of the town council, the salary of the librarian-director out of the school board, the books from the Main Library and the objects exhibited out of the whole world by a system of trade and barter. This is the first of some hundred thousand small museums which are going to blossom all over the surface of the United States in the course of the next ten years, like dandelions in a meadow.

Teaching Cataloging

MISS MANN'S paper on the teaching of cataloging in the LIBRARY JOURNAL of November 15 has given new emphasis to the real purpose of library school teaching—a knowledge of books and their use in daily life. Any division of the subjects taught is a matter of convenience rather than of exactitude, for all instruction rests on the single base, with the students majoring not in library hand, or even in reference or school libraries or work with children, but in books. Thoroughness and detail must be stressed, but always with a larger aim beyond.

For this reason it is good to have Miss Mann remind us that the basis of cataloging is books, not rules, and the suggestions she gives for subordinating technique, using Library of Congress cards and giving the class practice in revision and executive work, are thoroly practical.

The relation of library school courses in Los Angeles is something like Miss Mann's suggested study of subjects. It does not always follow that book selection, reference, classification, and subject heading courses are concerned with the same subject during each week, but it is often possible to plan such a correlation so that in book selection the types of books in a certain class will be discussed, actual reference questions will be answered from these books, and classification numbers and subject headings will be assigned to books in this class. The cataloging lesson in anonymous classics becomes an illuminating commentary on the lecture on children's books, and the series note on the catalog card is a bit of embroidery on the study of series in book selection.

I want to protest, however, against using the same books in each course except as an occasional review lesson. Then there is a little spice

in using copies of very new books borrowed from the cataloging room for the purpose, in sufficient quantity to give one to each student who will classify, assign Cutter number and subject heading, catalog, shelf list, and accession the book. But for daily work it is much more interesting to have a variety of books, each with a personality of its own and piquing curiosity.

I want to suggest also the monotony of using the same books year after year to illustrate each point, this time for the sake of the instructor. The class, to be sure, is new and not familiar with the books, some of which should be emphasized again and again. It is easy for the teaching to become monotonous unless most of the books change as they do in real life. We may think there can be no example of "by the author of" as perfect as "Miss Toosey's Mission," but "Patricia Brent, Spinster," and "The Rain Girl" are much more likely to be in the average library today and form an excellent text for discussions of the taste of the modern generation. *The Publishers' Weekly* is full of suggestions for name entry, and there is another opportunity for correlation when the checking is discussed in book selection, and pseudonyms, compound names, married women and noblemen are recognized. We all know that the permanent satisfaction in a cataloger's day is the acquaintance with the tide of new books. "Everything interesting in the world of books passes over my desk," the cataloger says, and when the cataloging teacher shares this, with her own enthusiasm, the class work never becomes a mere matter of rules and indention, punctuation and spacing.

When cataloging classes are asked about the reasons for the scarcity of catalogers, I have always found a few born catalogers who cannot

imagine why anyone calls the work a matter of routine or irksome detail. The others, unless they are hopelessly illogical or poor spellers, honestly agree with one who said "I do not need to think about the drudgery of cataloging when the books themselves are so fascinating."

Complaints against library school graduates can usually be grouped into two classes: graduates' lack of knowledge of books or their failure to adjust themselves to new conditions. Students in any school, from the kindergarten to the professional school, as all teachers can testify, have little sense of proportion and relationships. In library school it rarely occurs to them that anything ever mentioned in one course can apply in another. It must be pointed out to them that the principles of entry in bibliography and cataloging are the same; that books are arranged in the decimal classification in groups similar to those discussed in book selection; that subject bibliography is equally a part of reference and of book selection, and that documents are noth-

ing more fearsome than reference or circulating books.

Sonnenschein, to be sure, has a way of popping up in every course, but it is an amazing thought to most students that the method of analysis here has some bearing on each different course. More than one student has admitted that his only knowledge of the L. C. depository catalog in library school was the prohibition of its use in book trade bibliography, while it should have been, as it is in daily life, a constant tool in the study of periodicals, book selection, cataloging, and reference.

After all, bibliography in its old wide meaning of the study of books is the basis of library school training, and the inspired teacher will indicate relationships between different subjects by making the most matter of fact study a little window into eternity. At the same time the student will keep details subordinate in mastering technique until he can see life steadily and see it whole and at the same time measure it in centimeter spaces.

MARION HORTON.

Specifications for Conventions

REVISION OF TENTATIVE LIST BASED UPON COMMENTS OF ABOUT A DOZEN PAST PRESIDENTS IN THE AMERICAN LIBRARY ASSOCIATION AND AN EQUAL NUMBER OF OTHER PERSONS.

1. For large associations there should be a special "Conventions Committee," with membership holding over for two or three seasons.

2. In every "convention city" a local committee on conventions should supply the routine of details (e. g., transportation, "housing," etc.), so that committees specially appointed for the occasion will not have to consider such matters as can be cared for regularly by experts.

3. Committees on information and on hospitality should be adequately prepared in anticipation of requests that are likely to be made of them; it being a function of the Association's "Conventions Committee" to see that such committees work in co-ordination and with the local committee on conventions, and have a constructive program to further the interests of all delegates.

4. All committees that have regular office hours should arrange to be represented as far as practicable during their closed hours; and should see that information regarding changes of hours and of meeting places is conspicuously posted and not left to be given over the counter.

5. The general information committee should (thru the local committee on conventions) be amply equipped with maps, timetables, reference books, etc., and should carefully note the experiences of each convention with a view to perfecting the equipment of subsequent ones.

There should be a frame for displaying maps made in compact form; there should be a large map or plan of the convention locality so that locations can be indicated at once. (This would serve for all conventions coming to the particular place. Information of this kind should result from association of convention committees, and such conveniences should be standardized.)

6. The committee that gives general information should have at least one representative in attendance during the entire period of the convention, except possibly between 1:00 a. m. and 6:00 a. m., when a hotel night clerk or other night official should cover the service. (It has been found that many questions are submitted towards midnight, or after the closing of late sessions or festivities, when people are more at leisure than during the earlier rush hours of the evening.)

7. Special festivities, etc., should not be injected into a program that has been published; but if injected, they should be conspicuously posted or announced, not only for the benefit of those immediately interested in the events, but for those who would be inconvenienced by the change. While this is especially a matter for the Program Committee, that committee can hardly be expected to have a sense of proportion between hospitality and technical procedure. It is, therefore, a matter for the "Conventions Com-

mittee" to study and for the executive to act upon with expert advice.

8. Detailed and timely registration should be secured and classified lists of delegates published, so as to afford a clearing house of "Who's Who" and where each delegate comes from. A card catalog should be made previous to the convention, with registration of name, state, position, special work, facilities, etc. In fact, there should be a membership census kept up to date regardless of conventions, so that the data may be taken therefrom for convention and other purposes at a minimum of effort.

9. Conventions should be primarily in the interests of their constituents and but secondarily in the interests of those who happen to be present. Junketing, or the social side, is to a large extent important, but should be co-ordinated with the technical program. "Junketeering" has too often been condoned on the ground of unwieldiness because of numbers. The problem of unwieldiness, however, should be squarely met by the convention management.

10. Programs should not be so full as to crowd out discussion, and the majority of papers presented or addresses made should readily result in motions so that in so far as they contain methods that can be recommended by those who present them, these may be discussed and acted upon accordingly. (It is well recognized that conventions are not, as a rule, for statutory matter, but only for recommended practice, and that resolutions should be passed with this in mind. The chairman of the session should thus see that motions are duly made, so that matters needing to be considered and to have continuity of thought should not be overlooked.)

11. Papers and addresses should make for progress, and it should be one of the important duties of the "Conventions Committee" to control the program committee in this respect. (Sessions for the uninitiated might to advantage be distinguished from those for the experienced: the former calling for subjects that would be redundant for the latter.)

12. Conventions should be democratic, each delegate being made to feel that he is a contributor, finding opportunity distinctly before him to help to make the convention of value. While often the management needs to be in the hands of a few, this few should take pains to avoid the impression of being a clique (often a difficult matter as their power and responsibility frequently results from neglect on the part of the many).

GEORGE WINTHROP LEE.

Librarian, Stone and Webster.

147 Milk Street,
Boston, Mass.

"A Bibliophilosopher"

"A man of the world among men of letters and a man of letters among men of the world" is Thomas Lynch Montgomery, recently appointed librarian of the Historical Society of Pennsylvania. Of truly bibliographic attainments, his name is associated with the custody and collection of literary, scientific or historical works thruout the State. 'In science, read the newest works,' he quotes, 'in literature, the oldest.'—*Philadelphia Public Ledger*.

" . . . The libraries are often so uncomfortable that many people would rather be anywhere than in one of them. Even the Biblioteca Nacional at Madrid is not free from reproach. Some parts of it, such as the section on fine arts, are comfortable and hospitable enough; but the reading room is dirty and cold and the roof leaks; the process of getting out a book is long and cumbersome. . . . At Seville University Library the arrangements are not much better. I asked . . . if I might see the catalogue. 'See the catalogue!' said in a horror-struck voice: 'see the catalogue!' He was as surprised and pained as if I had asked him to show me the Mystery of the Stigmata or to give a demonstration of the Seven Deadly Sins. The library at the Residencia is on a different principle. You can go and look at the books as well as the catalogue. You can sit and read them comfortably or you can borrow them and take them away. . . . I am bound to say that on subsequent visits to Seville no one could have been more obliging than the officials of the University Library. . . ." "A Picture of Modern Spain," by J. B. Trend (Houghton).

ENTRANCE TO THE JAMES JEROME HILL REFERENCE LIBRARY

THIS LIBRARY WHICH IS PART OF THE BUILDING WHICH ALSO HOUSES THE ST. PAUL PUBLIC LIBRARY WAS OPENED TO THE PUBLIC ON DECEMBER 20. OWING TO THE VERY RECENT DEATH OF MRS. HILL THERE WERE NO CEREMONIES. AN ARTICLE WITH PLANS ILLUSTRATING THE RELATIONSHIP BETWEEN THE TWO BUILDINGS WILL BE GIVEN IN AN EARLY NUMBER

American War Libraries

W. N. C. CARLTON writes on American collections on the Great War in a recent number of the *Literary Review of the New York Evening Post*.

The chief American libraries possessing collections of large size and research character are the Library of Congress, New York Public Library and the libraries of Harvard, Yale and Leland Stanford Universities. Moderate sized collections, restricted in scope, but offering adequate material for intensive study within certain special fields are at Princeton University, Clark University at Worcester, Mass., and the Watkinson Reference Library in Hartford, Conn.

The Library of Congress collection numbers probably not less than 75,000 printed books, pamphlets, etc. The collection of prints and posters represents every warring country; the music collection is reported as well nigh overwhelming; and especially rich in official and documentary material, including a large number of semi-confidential publications of the allied governments. The Library is also strong in files of European newspapers, including a collection made by the National Board for Historical Service, which also prepared a file of 20,000 typewritten cards containing summaries and translations of articles published in newspapers and periodicals of enemy countries. Other important acquisitions were the working library of the American Commission to Negotiate Peace and an extensive collection of literature relating to the activities of the Peace Conference.

Leland Stanford University was offered \$50,000 in 1919 by Herbert Hoover for a war collection, and provision has also been made for adding to this collection for the next twenty-five years. Professor E. D. Adams, who undertook the work, has issued a report of the Hoover war collection. This collection will be the depository of the archives of the Commission for the Relief of Belgium and will also aim to procure all Belgian publications about Belgium and its relation to the war. Already it has over 27,000 official documents of twenty-five of the countries involved, thousands of posters, proclamations, newspapers, "trench papers," and the entire library of the Russian scholar and statesman, Miliukov, gathered by him for the study of Russian history and institutions.

The Yale war collection, conducted under the direction of the history faculty, has placed special emphasis on the acquisition of source material, and is rich in war posters and in

French official war proclamations and decrees.

The Harvard University Library ". . . aims at utility and service rather than at show or the pictorial quality of its material." The collection is already rich and is growing.

The New York Public Library possesses the best collection in any American municipal library. Its primary aim has been to secure "what past experience has shown will be the kind of material scholars and investigators may reasonably expect to find." Careful selection has been the rule. The card catalog contains under the general heading "European War 1914-1918" about 20,000 titles. Under related headings there are 2,000 more, and 8,000 entries appear under naval history, aeroplanes, diplomatic history, international law.

The making of a national survey of all existing archive and library resources on the Great War and a descriptive guide or index might well be sponsored, Dr. Carlton suggests, by the Carnegie Institution, the United States Bureau of Education, the American Historical Association, or the American Library Association.

No complete bibliography of the war can be expected, and Dr. Carlton does not "anticipate a long life for the 'International Bibliography of the War,' which is said to have been initiated somewhere in Europe and to which cards are to be added at the rate of 1,000 a week for a period of time impossible to estimate."

Boston Special Libraries Registration Service

The Special Libraries Association in Boston has appointed a committee on registration consisting of Bertha D. Hartzell, 18 Somerset Street, and Daniel N. Handy, to meet the need of some means by which members who desire change of position may be informed of vacancies in the special library field, and second, the need among many industries and business firms for the kind of service which a business librarian could give them. The committee does not intend to run an employment agency and shrinks from the responsibility of recommending people about whom it knows comparatively little to firms whose requirements it knows even less. It plans to act merely as a clearing house, leaving the actual selection to the applicant. The committee will work in co-operation with the placement service of the Simmons College Library School, the registration department of the Massachusetts Library Commission, the Y. W. C. A. and the appointment bureau of the Woman's Educational and Industrial Union.

Library Exhibit at the Texas State Fair

THE Dallas Public Library's recent exhibit at the State Fair of Texas attracted thousands of visitors not only from Texas and the other states of the Union, but also from Canada and Mexico.

Following the lead of the A. L. A. at its Swampscott meeting, Dallas selected the county library as the phase of the work on which to put the greatest emphasis, altho advertising the local library and the extension of its lending privileges to the entire county was by no means a minor purpose.

Books naturally form the basis of any library exhibit, therefore one hundred and seventy-five books and a few magazines as varied in subject as Peter Rabbit, live-stock judging, and the plays of William Butler Yeats were selected, those of direct interest to the rural home being in predominance. These books were arranged in roughly classified groups on a four-shelved bookcase on the wide molding capping the wainscot, and on tables—one table being devoted to books for the children.

Among the outstanding features of the exhibit were the county library panels prepared by the A. L. A. and loaned by the Texas State Library, a large map of Texas indicating the four counties having county libraries, and a group of pictures of the Cooke County Free Library and its various branches. The map bore the suggestive legend: Cooke, Dallam, Harris, and Potter counties have libraries, Why not your county? The Gainesville Commercial Club, at the suggestion of Librarian Lillian Gunter, made itself financially responsible for the panel advertising the Gainesville Public Library.

Of the local features the most striking were the graph with the Dallas library as a center showing the different classes of people who use the library, and photographs of the Oak Cliff Branch Library. A small card catalog file added a characteristic touch to the exhibit, and numerous posters carried their subtle suggestions to the passing crowds.

By no means all the crowd, however, could be called "passing" for many stopped at the registration desk, just inside the railing, to make application for membership in the Dallas Public Library or to examine the exhibit more closely. As opportunity presented itself, the assistant in charge explained the advantages of taking books directly to the rural community, and the Texas laws governing the establishment of libraries with the county as the unit. Thru the co-operation of Elizabeth H. West, state

librarian, literature was at hand for distribution to those interested in the library welfare of their own counties, as well as a leaflet describing the work of the State Department of Traveling Libraries.

Those instrumental in furthering this effort to spread the gospel of the county library are much gratified by the results so far shown. Registration statistics will give tangible proof that it has been worth while; but the memory of little children poring over the books while their mothers visited other features of the fair, of eager school teachers making note of helpful books on their profession, of home-makers coming in—not once but many times—to consult books of house plans, and of those who left us prepared to take home with them the message of the county library and its possibilities, would have been a sufficient reward.

MARY VICK BURNEY.

News from Home in Kansas City

NEWS FROM HOME

Daily Newspapers at
The Public Library, 9th and Locust.

At the recent convention of the American Legion in Kansas City, the Public Library, in co-operation with publishers of many daily newspapers from all over the country, tried to provide "news from home." The service was very much appreciated. Library made bulletins were placed at the various meeting places and hotels. Two daily newspapers printed reproductions. At the close of the session, all papers were sent to the convention, where they were distributed to be read on the way home.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JANUARY 1, 1922

THE library year 1921 was not one of salient features or remarkable progress, except that the Swampscott Conference reached a banner registration of 1900, lacking one, who ran around so fast that she could not be counted. At this meeting the revised Constitution was finally adopted, but with further revision immediately in sight. There was an increasing number of other library meetings over the length and breadth of the land, and the year closed with the Council sessions and associated meetings at Chicago at which, happily, there was time for the Council to consider several of the most important questions before the library profession, as revenue, certification, tariff and copyright provisions affecting libraries. There has been a serious tendency, especially notable in New York, to curtail library appropriations, particularly book funds, which must result in crippling the facilities of public libraries in face of the constantly increasing public demand. The saddest example was the omission from the new federal budget of appropriations for continuing welfare work, including library service, for the army in peace times, which has been partly remedied thru the effort of Secretary Weeks to secure an appropriation of \$60,000 for books and service. The new budget carried satisfactory appropriations for the navy, and the merchant marine will be cared for by a chartered organization which will have the benefit of the quarter million volumes of the A. L. A. collection. The library interest, in common with others, is thus seriously affected all along the line by the aftermath of war.

★ ★ ★ ★ ★ ★

ON the other hand, while A. L. A. work abroad, except thru the American Library in Paris, has technically ceased, the needs of the boys on the Rhine were met by a special appropriation from the A. L. A. balance, and much work has been done thru American channels in the further development of libraries, especially for children in the devastated regions of France. Meantime, the Carnegie Endowment for International Peace has taken up library work in foreign countries, the Carnegie Corporation being limited to those in English-speaking countries, and has

supplied \$200,000 for erecting and equipping a library building in Rheims, France, and \$100,000 also for books for Belgrade University and has added to the libraries on American history, civics and economics in several capitals, similar collections for Strassburg and other places. The A. L. A. is also doing survey work in several foreign fields thru its Committee on Co-operation with other Countries, especially with relation to the Far East and Latin America, and one of its plans is being partially carried out in the offer from some of the library schools to give scholarships for would-be librarians in foreign countries desiring American training.

★ ★ ★ ★ ★ ★

AS to library buildings, the opening of the magnificent Detroit Public Library edifice and of the new quarters of the John Crerar, in the office building which it has specially constructed for library needs, marked the year nevertheless as notable. Philadelphia has laid the foundations of its great public library, Wilmington has broken ground for an important edifice, Cleveland and Los Angeles have secured their bond issues, but Brooklyn is still at a standstill. New branches have been opened in several library systems, notably two more of Cleveland's "reading factories," two additional branches for Newark, and negro branches at Atlanta and Norfolk. College libraries have made noteworthy progress: Williams with an imposing building well advanced, Boston College, the Catholic institution at Chestnut Hill, with a \$400,000 building under weigh, Luther College, Decorah (Ia.) with a library building just completed, McGill University at Montreal with an important extension, while the University of Minnesota is still marking time. Yale is still considering site as well as plans for a building which will rival the splendid edifice at Harvard. The James J. Hill Reference Library building, which adjoins and supplements the fine St. Paul Public Library, completes the central library system in that city, the Henry E. Huntington Library at Pasadena is in partial operation in its superb new building, and the Grosvenor Reference Library at Buffalo has broken ground for a new building.

THERE was more library legislation than usual in 1921, as most of the states held their biennial legislative sessions in this year. These were fully summarized in Chairman Yust's excellent reports printed in the LIBRARY JOURNAL for September 1st, p. 687-696, and October 15th, p. 845-846, and need not be repeated here. There remains a gap in the record for the intervening year 1920, which Mr. Yust hopes to fill by an early report thru the LIBRARY JOURNAL. Of library gifts there has been little of importance to record, especially as the Carnegie Corporation, after providing for more than twenty-five hundred buildings, maintains the suspension of new library grants upon which it decided at the commencement of the war and is devoting itself in the library field chiefly to rounding up work provided for earlier.

★ ★ ★ ★ ★ ★ ★

OF important changes the most noticeable were W. N. C. Carlton's retirement from the American Library in Paris for work in America, temporarily at Hamilton (Canada), the resignation of W. Dawson Johnston of St. Paul to become his successor at Paris, and that of Thomas L. Montgomery, as State librarian at Harrisburg, to join his Philadelphia friends as librarian of the Pennsylvania State Historical Society, his successor at Harrisburg being the Rev. George P. Donehoo. Mrs. Eva May Fowler, State librarian at Illinois, was legislated from office under the law which makes the Secretary of State the *ex officio* holder of that post. There has been an unusual number of changes in university and college libraries, Frank K. Walter going to the University of Minnesota, William A. Alexander to Indiana State University, Earl N. Manchester to Kansas State University. David F. Estes, who had retired from Colgate University after twenty-three years of service, was succeeded by Charles W. Spencer, and Prof. Homer C. Newton became definitely librarian of the College of the City of New York, a post which had been for some time in suspense. Miss Linda A. Clatworthy went to the University of Denver, while Mrs. J. B. Hyder succeeded her chief, Miss Alice L. Rathborne, at the University of Colorado. Charles A. Green left Massachusetts "Aggie" to become librarian of the richly endowed Jones Memorial Library at Amherst, being succeeded by Henry S. Green, and Harold L. Wheeler left the Missouri School of Mines to re-organize the Hackley Memorial Library at Muskegon, Michigan. In the field of library schools, Miss Elizabeth G. Thorne retains her directorship of the Syracuse School while becoming librarian of the University, and at Atlanta Miss Susie Lee Crumley takes charge of the School under the directorship of Atlanta's librarian, Miss Tommie Dora Barker. Two posts made vacant by death in 1920 were

filled in 1921 by the succession of Miss Marion F. Dutcher at Poughkeepsie, and the appointment of Elmar T. Boyd at Bangor, Maine.

★ ★ ★ ★ ★ ★ ★

DEATH was busy during 1921 among the leaders of the profession, and also removed from us several of the most promising of the later generation. The small company of the participants in the 1876 Conference was reduced to nine by the death of Dr. Edward J. Nolan in Philadelphia after his service of fifty-seven years for the Philadelphia Academy of Natural Sciences—a man living in a quiet nook, but intimate with many of the leading men and women of his time, and the passing of Miss Rule after nearly as long service at Lynn. Mrs. Milton Fairchild, known to the elders as Salome Cutler, died at the end of the year after long retirement from her long service—especially notable in her leadership of the New York State Library School—and Miss May Seymour, another valued early associate of Mr. Dewey, also passed over the great divide. Two men of middle age and of great promise to the library future were lost in Joseph F. Daniels, the leader so much beloved in Riverside, and John G. Moulton of Haverhill, who had done great service for the Massachusetts Library Club at home as well as important war service at the great Le Mans center in France. Two men within the library field, perhaps better known for their literary work, were Dr. Morris Jastrow, resigned after distinguished service in the University of Pennsylvania which closed two years ago, and Lindsay Swift, who had long been editor of publications for the Boston Public Library. One of the brightest of the younger women was Miss Eunice R. Oberly, who, after graduation from Vassar in 1900, went directly to the Department of Agriculture in Washington and became a notable specialist in the very special library of the Bureau of Plant Industry. Mrs. Annie F. McDonell is entitled to mention for her services not only at Bay City, but as a leader in the Michigan Library Association. Canada lost its Parliamentary librarian for the House of Commons in the death of Martin U. Griffin. On the other hand, the library profession may be considered noteworthy for the longevity and long service of many of its members, Dr. James K. Hosmer having celebrated his eighty-seventh birthday early in the year, while the law librarians at Swampscott sent salutations to J. Himes Arnold, eighty-two years of age, librarian of Harvard Law School for over forty years. Miss Medora Simpson at Chelsea, Miss Carrie M. Worthen at Melrose and Mrs. Margaret McBain at Owosso had completed each a half century of service before retirement.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

THE new Sherman House which the LIBRARY JOURNAL on mistaken information moved across the river to the north side remains on its old site at Randolph and Clark Streets rebuilt after its half century's repute as a hostelry, and this week it houses for the first time the mid-winter library meetings. For these gatherings of the A. L. A. Council and the half score meetings of other organizations and groups, a goodly company, numbering one hundred and eighty or more came together, of whom nearly fifty are members of the Council in attendance at the two executive sessions and one public session scheduled on the general program.

The first subject for discussion on the order of business for the opening Council meeting Thursday morning was the report of the Committee on Library Revenues, presented by Mr. S. H. Ranck, which proposed the following memorandum:

The American Library Association declares that \$1 per capita of the population of the community served is a reasonable minimum annual revenue for the library in communities desiring to maintain a good modern public library with trained librarians. This sum should cover a main library with reading room facilities, branch libraries and reading rooms within easy reach of all the people in the larger communities, a registration of card holders equal to thirty per cent of the population, and a considerable collection of the more expensive books of reference, with a home use of about five volumes per capita. Communities desiring their libraries to supply these needs extensively, will need to provide support beyond the minimum of \$1 per capita, and for the highest grade of service \$2 per capita would be a reasonable sum. This would include extension work sufficient to bring home to the children, the foreign speaking people, business men, artisans, advanced students, public officials, and in general all classes of the people, the opportunities that such a library is not only ready but is able to afford, with a service that is administered by trained librarians having special knowledge in their particular departments. Such a service should lead to a registration of card holders equal to fifty per cent of the population and a reading room attendance equal to or greater than the number of books issued for home use.

The Committee recommends that further study be given to the whole subject of adequate support for high school and grade school libraries,

and for college and university libraries, to be based on a knowledge of the existing situation with reference to such libraries.

This led to an interesting and useful debate, in which Miss Julia Robinson secretary of the Iowa State Library Commission, urged that small towns need more than a dollar per capita to support adequate libraries, while Mr. Andrews of the John Crerar Library said that large cities needed less than the dollar suggested as a standard. Mr. Henry N. Sanborn of Bridgeport considered that small town libraries are better off on a valuation basis than by an appropriation per capita. Mr. Wheeler suggested that the best plea for libraries would be made by paralleling their needs and work with those of other civic enterprises. The discussion brought out the fact that many favored what might be called a sliding scale rather than a fixed standard, and the subject was referred back to the Committee for further consideration and report at a later opportunity.

The subject of copyright legislation, originally scheduled along with certification for the open session on Friday, had been transferred to the Thursday morning session, and Dr. Raney, in presenting the proposed resolutions printed in the last issue of the LIBRARY JOURNAL, p. 1033, spoke vigorously for over an hour in defense of the proposed action.

The discussion went over to the afternoon session, when Mr. F. G. Melcher presented the view of the publishers, and some sharp questioning followed on the part of Mr. Andrews, Mr. E. H. Anderson of the New York Public Library and others. A letter from Mr. Bowker, as a member of the Council, was read by the Secretary, urging less uncompromising action, lest the proposed resolution should lead to such opposition as would endanger the passage of the measure and bringing America into the International Copyright Union. Dr. Raney assured the Council that on the contrary the United States would enter the Berne Union with strong backing in Congress.

Mr. W. W. Bishop of Ann Arbor favored moderate action, but the current set strongly in favor of vigorous protest, and the resolutions presented by Dr. Raney were carried by thirty-five votes in the affirmative without negative votes, several of those present not voting.

The third subject, also discussed Thursday afternoon, was the report of the Committee on Committees, presented by Mr. Carl B. Roden of the Chicago Public Library, its Chairman. The resolutions as printed in the last issue of the Li-

BRARY JOURNAL, p. 1033, were passed without dissent after a motion had prevailed, striking out at the end of the second resolution the words "and as to membership to persons who are members of the Council."

The subject of certification was the first order of business for the Friday morning session, and the report was presented by Dr. C. C. Williamson, Chairman of the A. L. A. Committee on National Certification and Training, concluding with the resolutions and recommendations printed in the last issue of the LIBRARY JOURNAL (page 1035-6). After considerable discussion it was voted to recommit the resolution to the existing committee with direction that it formulate standards of certification and provisions which are to be recommended for incorporation into the state laws and to suggest methods by which the Association can co-operate in securing proper legislation.

The subject of library revenues was again taken up on the modification of the report by the Committee, headed by Mr. Ranck, and it was unanimously adopted after it was modified in the latter portion to read as follows:

" . . . of about five volumes per capita. This allowance of per capita revenue may need modification in the case of the very small or very large communities, or which are otherwise exceptional. Small communities may often obtain increased library service for the same money per capita by enlarging the area of administration. The situation in large communities is often modified by the presence of good endowed libraries free for public use. Communities desiring their libraries to supply these needs extensively and with the highest grade of trained service, will find it necessary to provide a support much larger than the minimum of \$1 per capita. This should cover extension work sufficient to bring home to the children, the foreign speaking people, business men, artisans, advanced students, public officials, and in general all classes of the people, the opportunities that such a library is not only ready but is able to afford, with a service that is administered by trained librarians having special knowledge in their particular departments.

"The Committee recommends that further study be given to the whole subject of adequate support for high school and grade school libraries, and for college and university libraries, to be based on a knowledge of the existing situation with reference to such libraries."

It is impracticable to report in time for this issue the meetings held simultaneously by other groups, but it may be said that the ardour and interest of the several meetings were not even tempered by the cold wave.

GERMAN LIBRARIANS IN CONFERENCE

A RECENT number of *Zentralblatt für Bibliothekswesen* is devoted chiefly to an account of the annual meeting of the German Librarians for 1921, held at Wernigerode. At this meeting Dr. Christoph Weber of Berlin furnished an important contribution to the subject of library co-operation, restricting himself, however, quite closely to the problems confronting German libraries.

What strikes an outsider on reading Dr. Weber's paper, is the fact that in the midst of conditions resulting from the war, the German Universities are still able to continue, on the one hand, their general university libraries, on the other, their so-called *Institutsbibliotheken*. In fact, Dr. Weber emphasizes particularly the importance of continuing the latter with as little interference as possible from the general University Library. True, he favors co-operation between the two to the extent that the general University Library be given notice of periodicals and other serials received at the *Institutsbibliothek*; also of other important works added and which are not in the University Library. Books rejected by the *Institutsbibliothek*, he believes should be offered to the University Library. Finally, he expresses the opinion that the use of books in the *Institutsbibliothek*, but not in the University Library, might well be extended to students and professors not immediately connected with the particular department served by the *Institutsbibliothek*.

One is tempted to look with some skepticism on the outcome of any co-operation established on so loose a basis as this seems to be. With the *Institutsbibliotheken* administered largely by amateur librarians, or with no administration at all, it would seem difficult to secure anything like effective and intelligent co-operation. Judging by experience on this side of the Atlantic, those in charge of *Institutsbibliotheken* are often averse to co-operation, sometimes a little suspicious of offers from the general University Library. A change of attitude usually comes when the University Library has organized its catalog and classification on modern lines, has filled up the more serious gaps, established a strong reference collection, organized a capable and well trained force, while the *Institutsbibliothek* (the departmental library) on the other hand, has grown to a size when the absence of adequate catalogs and classification and also experienced attendants, gradually tends to make its use and administration difficult and cumbersome. Unfortunately, when this stage has been reached, effective co-operation is only possible thru drastic reorganization, and reorganization as Dr. Leyh pointed out about ten

years ago in *Zentralblatt für Bibliothekswesen*, usually costs about three times as much as the organization of a new library. Much closer co-operation than that indicated by Dr. Weber and more centralization of the technical work in the general library would seem advisable.

Of great interest to American librarians is the possible transfer of the printing of cards for German publications to the Deutsche Bücherei at Leipzig. Whether the transfer is actually made, or the enterprise continued by the Staatsbibliothek at Berlin, may be immaterial to us, so long as it is continued and along lines which will make the cards of service also outside of Germany. It is to be hoped that in the printing of these cards, duplication on a large scale of what the Library of Congress has already in stock will be avoided. It would be a pity, for instance, to have all the entries in the many German series of monographs, for which the Library of Congress already has titles for sale, duplicated in Germany. If German colleagues will examine the Library of Congress printed entries for monographs in such series as Schmoller's *Staats- und Socialwissenschaftliche Forschungen*, *Münchener Volkswirtschaftliche Studien*, *Sammlung Chemisch- und Chemisch-technischer Vorträge*, or the many thousands of other series now covered by the Library of Congress stock, they will see at a glance that these entries can be adapted to the card catalogs in German libraries with just as little difficulty as the printed cards received from Germany are now added to so many catalogs in this country. The writer has examined many catalogs in university and reference libraries and has been pleasantly surprised to see how few changes have been required in order to make the Berlin cards fit into the American system.

The slogan "No centralized cataloging without absolute unity of rules and system" has been heard in Germany, as it was here twenty years ago. I believe that our experience has shown conclusively that while absolute unity of rules is desirable, we need not look upon it as a *sine qua non*.

The chief English speaking countries agreed fourteen years ago on one hundred and seventy-four rules, minor disagreements as to practice arising only with respect to five or six of them. Certainly, the differences which to-day exist between the Prussian and Bavarian codes of cataloging cannot be so vital as to prove any serious hindrance to co-operative cataloging in which both North and South German libraries may participate to the mutual advantage of both sections.

The old and cumbrous method of printing on one side of a thin strip of paper and then cutting the titles and pasting it on the card

seems still to find favor with a considerable number of German librarians. As they become more familiar with the printed card, this practice will gradually fall into disfavor. I do not recall a single library to-day which, while subscribing to both the Library of Congress proof strips and its printed cards, prefers to cut the proof strips and mount titles on cards for its public catalog. They all favor the printed card, the greater cost of which is more than offset by the labor of cutting and pasting, and the awkward and cumbersome card resulting therefrom.

Government documents form the subject of a paper by Georg Schwiedetzki of Leipzig. His opening sentence refers to Government documents as the step-children of libraries, a class of publications whose importance has seemed to appeal more to American librarians than to those of Europe. Speaking of the method of entry for official publications, he asks: "Shall we continue to treat these publications as anonymous and thus scatter them all over the catalog, or shall Government Offices and Bureaus be regarded as authors and their publications thus collected under their names, as required by the American rules, which are constantly gaining in favor? The latter is not only correct and logical, but it is the method which will prove most advantageous both to public and librarian."

Let us hope that Mr. Schwiedetzki's brave assertion will prove the entering wedge that will result in greater agreement on entry of publications issued by corporate bodies as between the Anglo-American school of cataloging on the one side and the Germanic on the other. This has been the rock which has so far wrecked all efforts to establish harmony between the two schools.

Over one hundred and twenty-six librarians were in attendance at the meeting, a fact which would seem to indicate that German libraries are returning to normal quite as rapidly as are those of other European countries directly affected by the war.

J. C. M. HANSON, *Associate Director*,
University of Chicago Libraries.

SPECIAL LIBRARIES COUNCIL OF PHILADELPHIA

THE meeting of the Special Libraries Council of Philadelphia and Vicinity on November 25, was devoted to a round table on the care and use of periodicals. A full outline of the problem had been prepared by M. Stella Heim, E. F. Houghton & Company, and all present, about twenty in number, contributed to the discussion. The outstanding points in the re-

The STEREOGRAPH puts one into that same intimate touch with the interesting places and peoples of the world as does actual travel; in other words, "What the telephone does for the ear the stereograph does for the eye."

Very attractive hand-painted sets on Wild Flowers, Birds and Costumes have recently been added to our material especially adapted for library use.

A busy, happy corner in the Public Library, Ft. Wayne, Indiana.

Scenes similar to this take place daily in libraries throughout the country.

KEYSTONE VIEW COMPANY, Inc.

NEW BOOKS FOR OLD

One expensive picture book will do the work of two or three if worn-out copies are rehabilitated in our Children's Scrapbooks. Price 17c up. Write us or see catalog No. 24 for particulars.

GAYLORD BROS., Syracuse, N. Y.

porter's mind can be briefly summarized as follows:

The use of periodicals in special libraries differs greatly; but study and comparison might make possible several types of recommended practices.

Subscription agencies were generally recommended.

Unanimous approval was given to the practices of having all subscriptions expire at one time and of having the library handle subscriptions of magazines sent to individuals in the organization and all memberships in societies issuing publications.

Lack of space and the expense of binding play a considerable part in deciding policies. A few librarians advocated the clipping or disposal of all magazines at the end of six months.

Considerable variation exists in the methods of recording the receipt of magazines. The Library of the Hercules Powder Company, Wilmington, is trying out a loose leaf book which will combine a check card and routing card in one.

Librarians are apparently too busy or too subject to interruptions to engage in time studies. On several occasions an estimate of time required for certain pieces of work was desired, and only one or two could respond with an answer.

JOSEPH F. KWAPIL, *Chairman,*
Publicity Committee.

LIBRARY SECTION OF THE N. Y. S. TEACHERS' ASSOCIATION

THE Library Section of the New York State Teachers' Association held its annual meeting at the Buffalo Public Library on Tuesday, No-

vember 22nd, Mary C. Richardson, Librarian of the State Normal School at Geneseo, presided.

Sabra W. Vought, inspector of school libraries in New York State, conducted an informal conference for all school librarians. Topics discussed were: Library instruction for grades, for high schools, and for teachers; The relation of the school library to other departments of the school, the public library, and the State library; Student government in libraries; School library organizations.

C. C. Certain, head of the English Department of the Cass Technical High School, Detroit, spoke on "Present Needs in School Library Work." He commended the strides which the library profession has made in school work and warned against the danger of allowing school administrators to accept booklists instead of librarians.

Edith M. Parker, story-teller for the Buffalo schools, discussed the part of story-telling in promoting appreciation of better literature, and delighted her audience with a story from Howard Pyle's "Story of King Arthur" and two stories from Kipling. Anna G. Hall, of the H. R. Hunting Company, Springfield, Mass., spoke on children's books and exhibited various editions for library and private use. A symposium of Inspirational Books for Young People was conducted by Bessie Eldridge, librarian of the State Normal School at Oswego, at which reviews were given by Marguerite Robinson, Cortland; Celestine Loney, Chautauqua, and Grace Viele, Buffalo.

Officers elected for the ensuing year are: President, Ella Green, Librarian of the Jamestown High School; Secretary, Grace Viele, Librarian of Buffalo Normal School.

BESSIE L. ELDRIDGE, *Secretary.*

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS WANTED

Young woman with library school training and varied experience wants position with State library commission as organizer. The West preferred. H. H. 1.

Cataloger, library school graduate with two years' college work and six years' experience in

public, college and special libraries, wants position in New York City. C. H. 1.

Librarian, college and library school graduate, with ten years' experience chiefly, administrative, wants responsible position in public or special library, preferably in the East. E. G. 1.

A reference librarian, normal school and college graduate, with one year's library school training, experience in teaching and general library work, wants position in New England as librarian, reference or assistant librarian, or instructor in library school. L. L.

Authority at the Government Printing Office

*From Office of the Public Printer,
Washington, D. C.*

Dear Sir:

Replying to your inquiry of April 11, I am pleased to advise you that Webster's New International Dictionary is the standard authority in the Government Printing Office for spelling, compounding and dividing words, and that it is my present intention to continue the use of this dictionary for such purposes.

Very truly yours,
(signed) GEORGE H. CARTER
Public Printer.

IN THE LIBRARY WORLD

NEW YORK

New York City. Appropriations for 1922 for the city's libraries have been made as follows:

New York Public Library: Total appropriation \$1,032,328 (\$1,120,037 for 1921) of which \$819,757 is for personal service (\$820,227 in 1921); \$60,000 for books and periodicals (as compared with \$100,000 last year), and \$60,000 for binding.

Brooklyn Public Library: Total \$674,184 (\$709,679 last year); including \$483,143 for personal service (\$491,041 last year); \$70,000 (\$85,000 in 1921) for books and periodicals, and \$30,000 for binding.

Queens: Total \$236,830 (\$252,806 in 1921) including \$163,747 for personal service (\$164,737 last year), \$27,000 (\$36,500) for books and periodicals, and \$6,500 for binding.

New York City. Teachers College is to have a new building costing \$3,000,000 and including a library. The General Education Board has given \$1,000,000 and the Trustees of the college a like amount. The alumni are active in raising part of the other million dollars.

Ogdensburg. The fire which destroyed the recently remodeled public library causing the loss estimated at about \$100,000, did not affect the book collection as the books had been removed to a temporary library across the street during the remodeling operations.

OHIO

Toledo. Two years ago an experiment in co-operation of library and school authorities was begun in Toledo, when a class to train people for service in the Toledo Public Library was started under the auspices of the Board of Education. This is a fifth year course and is open only to those who have a high school education or its equivalent. The entrance requirements are the same for the Teacher Training and Library courses. The latter, however, is a one-year course while two years is required for the training of teachers. Each course has its own director but there is an exchange of lectures. The Board of Education in addition to employing the Director of the Library Course, furnishing supplies, etc., provides instructors from the high school staff for courses in contemporary literature and general history, planned to enrich the background of those who have entered the library course immediately after finishing high school. College graduates who have had courses covering this ground are excused from these particular courses.

The Public Library gives the opportunity for practical work and co-operates in the instruction. Not only do members of the staff give individual lectures but the Catalog Librarian and Director of Children's Work give semester courses in cataloging and work with children and children's literature respectively. The office of the Director of the Library Training Course, thru the courtesy of the library authorities, is in the Public Library, a block from Woodward High School where the class meets for recitation.

The course of study is in the process of being worked out and is subject to change. The ruling consideration, however, is the fact that this is a class being prepared for the Toledo Public Library, therefore the content of particular courses, i.e., reference and fiction, is based upon what is actually in the library. The work in library routine is that which is followed in the system. Classification is given from the viewpoint of what the library has in various classes. After each display of new books these are discussed. In cataloging the emphasis is placed on how to use the public and official records of the library rather than on how to do independent cataloging. In a series known as the Library and Community, the history of Toledo, its industries and institutions are studied. Speakers representing various organizations appear before the class and trips are made to such institutions as the special schools for crippled children, the Detention Home, the Newsboys Building, the Art Museum, etc., where the work of each is explained and demonstrated. General current events are discussed as well as the history and extension of the work of libraries and library literature. A reading program of a book a week is outlined. Annotations of these titles are required, thus giving a check upon the reading done and also giving practice in the writing of annotations.

Trips to the various libraries in Toledo are made as well as to nearby towns and a trip to inspect the library system of a neighboring city is a part of the course.

Of the eighteen members of the first two classes five are college graduates. Two colleges are represented in the present class of fourteen members and each class has had others among its numbers, who have had some college work. All of those who have satisfactorily completed the course are or have been employed in the Toledo Public Library.

SPECIAL LIBRARY SERVICE

This firm offers unrivaled facilities to Public Libraries, Schools and Colleges when seeking out-of-print material. Want lists mailed to us are checked over by our six large second-hand stores in Cleveland, Chicago, and Los Angeles. Condition of all books supplied by us guaranteed satisfactory. *Correspondence solicited.*

ADAMS, Leta E., 1909 N. Y. S., who has been consulting librarian for Gaylord Brothers, is to succeed Mrs. Watterson (Anna G. Hubbard) when the latter gives up her work in the order department of the Cleveland Public Library.

AIKEN, Gertrude E., 1913 Wis., was elected librarian of the Crawfordsville (Ind.) Public Library, on October 1.

ALLEN, Harriet L., 1907 Wis., has resigned the librarianship of the Houghton (Mich.) Public Library to join the Portland (Ore.) Library Association, and is succeeded by Isabel D. Farand, 1920 Wis.

ALLISON, Evie, 1919 A., formerly assistant in the Public Library of Raleigh, N. C., is librarian of Converse College, Spartanburg, S. C.

BARNES, Clara M., 1919 Wis., elected assistant in charge of work with schools, Council Bluffs (Iowa) Public Library.

BARTH, Gertrude E., 1918 W. R., has been appointed a branch librarian, Public Library, Ft. Wayne, Ind.

BREWITT, Mrs. Theodore R., 1908 Wis., has resigned the librarianship of the Alhambra (Cal.) Public Library, to become assistant librarian of the Long Beach (Cal.) Public Library.

BROWN, Charles H., library specialist attached to the Bureau of Navigation, has been detailed to the Pacific Coast for about three months to aid in increasing the efficiency of the libraries of the Pacific Fleet and of the shore stations of the 11th, 12th and 13th Naval Districts. Mr. Brown left Washington on December 1st.

BUTTON, Mrs. Frances Hogg, 1916 Wis., elected librarian of the Neillsville (Wis.) Public Library.

CRAWFORD, Clara, 1918 A., for several years librarian of the Public Library, Burlington, N. C., has resigned to become assistant librarian of the Public Library, Durham, N. C.

CROWELL, Edith, 1911-1913 N. Y. P. L., appointed librarian of the Perth Amboy (N. J.) Public Library.

CUTLER, Mary Salome Fairchild, died on December 20 in Washington. Born in 1855, she graduated from the Mount Holyoke Seminary in 1875, became cataloger at Columbia College Library in 1884, continuing this work and teaching at the pioneer Columbia College Library School until the removal of the School to Albany in 1889, when she became first vice-director of the New York State Library School, a post which she held until 1895. She married the Rev. E. Milton Fairchild in 1897, at which time she retired from regular library work, retaining her interest, however, as shown by her lectures and writings on library matters and her membership of the A. L. A. of which she was a vice-president in 1900-1901.

DAVIS, Mildred E., 1910 P., assistant librarian of the Utica (N. Y.) Public Library, was married on December 22nd to Everett Skillings, professor of English at Middlebury College, Middlebury, Vermont.

DAWSON, Annie Maud, 1918 A., is temporarily high school librarian on the staff of the Birmingham (Ala.) Public Library.

FAISON, Georgie H., 1920 P., formerly at Yale University Library, appointed librarian of the Randolph-Macon Woman's College, Lynchburg.

GILPIN, Margaret, 1917 Wis., has been appointed librarian at Stout Institute, Menomone, Wis., resigning as librarian of the Nashauk (Minn.) Public Library.

GRAHAM, Bessie, author of the Bookman's Manual, is now librarian of the Apprentices' Library Company of Philadelphia.

HEINS, Dorothea C., 1912 Wis., became chief of the Traveling Library Department, Iowa Library Commission on October 1.

Myrick Bldg., Springfield, Mass

Russian Festivals and Costumes for Pageant and Dance

CHALIF'S new book, will be a welcome addition to the art shelves of every library. The art student, the pageant builder, the costume designer—if his subject be Russian—will find his needs all met within its covers.

A Wealth of Pictures

On 130 of its pages, beautiful examples of Russian peasant art in costume, embroideries, furnishings and architecture are displayed.

Descriptions

In well condensed text are clear descriptions of the picturesque religious and secular festivals of old Russia. The long-drawn-out wedding celebrations are minutely pictured, and the tenderly quaint Christmas feast which awaits the rising of the "Star."

AGENTS WANTED

INGRAM, Lottie N. 1914 Wis., is librarian for the Abbott Laboratories, 4753 Ravenswood Ave., Chicago.

JAMISON, Alma, 1915 A., formerly on the staff of the Carnegie Library of Atlanta, is now librarian of Oglethorpe University, Atlanta, Ga.

KELLER, Helen Rex. 1901 N. Y. S., who recently returned from a year's service in the Library of the League of Nations at Geneva, is now research librarian for the National Industrial Conference Board, New York City.

KEMP, Emily, 1913 A., who for several years has not been in library work, is now holding the position of high school librarian in El Paso, Texas.

LEDBETTER, Eleanor E., librarian of the Broadway Branch of the Cleveland Public Library, is English editor of *The Serbian Independent Herald* and in the December 1st number writes the leading article on Saint Sava.

MCINERNEY, Marie, 1917 C. P. Dip., who for the last two years has been doing psychiatric work for the Red Cross in Philadelphia, has been appointed assistant in charge of the Soho Reading Room, Pittsburgh, Pa.

MACKENZIE, Vivien C., 1911 W. R., is assistant librarian, U. S. Public Health Service Hospital, Fort Bayard, N. M.

MAYES, Olive, 1913 P., librarian of the United States Public Health Service Hospital in Philadelphia, appointed librarian of Goodwyn Institute, Memphis, Tenn.

OBERHEIM, Grace M., 1920 Wis., has been appointed librarian of the Frances Shimer School, Mt. Carroll, Ill.

PAULSON, Thelma, 1920 Wis., appointed librarian of the U. S. Forests Products Laboratory, Madison.

PEEK, Zona, 1916 A., has left the University of Texas Library to become librarian of the Sul Ross State Normal School, Alpine, Texas.

PROWSE, S. Patterson, librarian of the Peoria (Ill.) Public Library, died suddenly on December 14th, at the age of 64. Mr. Prowse was born in Scotland and graduated from the University of Glasgow. Thirty years ago he went to Peoria and became a newspaper contributor and later telegraph editor of the *Peoria Star*. In its early days he left the *Star* to become deputy collector of customs. He was for many years a keenly interested member of the library board, and was named librarian in May, 1915, in succession to the late E. Wilcox.

RECHCYGL, Edith A., 1918 Wis., has resigned the librarianship of the Stanley (Wis.) Public Library, to become librarian of the Antigo (Wis.) Public Library.

ROBBINS, Pamela, 1907-08 S., is organizing the Harrison (Me.) Public Library.

ROCKWELL, Anna G., 1890-91 N. Y. S., who resigned the librarianship of the New Britain (Conn.) Institute Library, in September, is now on the staff of the Free Public Library of Newark, N. J.

SIAS, Louise A., 1916 Wis., is librarian of the Medical Library at the Henry Ford hospital, Detroit.

SOLHEIM, Olea M., 1919 Wis., librarian of the Wisconsin Rapids (Wis.) Public Library, has resigned to join the Detroit (Mich.) Public Library, and is succeeded by Adelheid R. Rutzen, 1920 Wis.

SABIN, Lilian, 1918 P., librarian of the Lincoln County Library, Libby, Mont., appointed field organizer of the Minneapolis Public Library.

SKAAR, Martha O., 1918 Wis., returned to the La Crosse (Wis.) Normal School Library as assistant librarian at the beginning of the summer session.

SPAULDING, Forrest B., 1912-14 N. Y. P. L. director of school libraries and museums for the Peruvian government has returned to this country. The proposed library extension has been postponed owing to the acute financial depression in that country.

TAYLOR, Jean K., 1920 N. Y. S., head of the technology department of the Silas Bronson Library, Waterbury, Conn., has resigned to become reference librarian of the Hackley Public Library, Muskegon, Mich.

TASHJIAN, Nouvart, 1908 W. R., appointed to the editorial staff of *Modern Priscilla*.

TOBEY, Mary, 1918 S., is assistant librarian at the Waterville (Me.) Public Library.

TOBEY, Ruth H., 1917 Wis., appointed assistant in the Indiana State Normal School, Terre Haute. She is to be directly in charge of teaching the use of the library to students, and organizing a course for training public school librarians.

WILKINSON, Mary S., 1918 C. P. Cert., gave up her work as children's librarian of the Henry E. Legler Library of Chicago in November, to become supervisor of work with children and with schools at the Hackley Public Library, Muskegon, Mich.

A Co-operation in the Interests of Music

By AMY MEYER

Chief of the Music and Drama Department of the Detroit Public Library

DESPITE the undoubted love for music which almost every American professes, the cause of good music in this prosperous land generally wears a precarious air. Like a mountain climber it clings passionately to each foothold, and one has the feeling that a step backward is certain death. What kind of music does the American love? The ordinary man in the pursuit of "pleasure"—eating, dancing, going to the theater—thrills to the magnetism of the blithe lilt of ragtime. Young ladies in the suburbs play with tenacious devotion "The Rosary" and the "Melody in F." Camping parties sing "Love's Old Sweet Song" and college songs. These are all very well in their place; but every symphony orchestra in the country west of New York are attended only by hardy souls with convictions of their own and a healthy curiosity in the search for beauty. This is a situation which is improving, but it needs the interest of every public and educational agency.

Good music, by which I mean music which does not wear itself out in a few months' time and is not merely the jargon of the day, ought not to be the heritage of the few. If it is really the "universal language of mankind," it should become more universally understood than it is now. A music-lover is not necessarily the musically educated man, versed in the technicalities of the art, but the man to whom music brings a sense of satisfaction and companionship. Poor music is like a weed and like a weed can only be entirely eradicated by planting something stronger in its place. To combat the love of poor music we must make the best music easily accessible. A symphony can never be fully appreciated at first hearing. We must render it common enough so that ordinary people will love its inherent truth and beauty, thru hearing it many times, and cheap enough so that we can all hear it as often as we desire without sacrifice. The city with its own orchestra and choral organizations is fortunate, but these cannot ful-

fill their functions unless they are backed by municipal co-operation thru all its channels—the clubs, the schools, the Board of Commerce, the churches, the factories, the business organizations and the library.

The small library in a small town can be as vibrant a part of any community's musical life as can the large city library. Every collection of books for public use may contain its proportion of scores. An established connection between the library, church choirs, music teachers, clubs and Victrola enthusiasts will make work—but work that gives a sense of satisfaction. It does not even require a musically educated librarian, but it does require intelligence and interest. Even Charles Lamb, whose gentle soul and delicate intuitions made him a lover of beauty, admitted, perhaps he even mildly boasted, that "tho I am sentimentally disposed toward harmony, I am organically incapable of a tune."

The project of connecting the library and the musical interests of a community has been effected in Detroit during the last season largely thru the Symphony Orchestra. The library backed the orchestra, the orchestra backed the library. The library distributed prospectuses of the year's concerts thru all its branches, posted the program of the week and gathered together material of interest to concert-goers. The orchestra offered pages in its program to the library, after the program notes, for a section on books about music and the allied arts.

The library tried to obtain readers for these notes, not only the musician, but also the man or woman who goes to all the good concerts who does not understand the technical whys and wherefors of the art, and is ordinarily known as an "unmusical" person. Its ambition was to provide this person with free, readable material which would convert him from the average puzzled outsider to an intelligent friend of good music.

The section varied from six to eleven pages of notes about books or musical subjects. To

musicians and students, it attempted to suggest possibilities of further research in correlation with the particular program of the week, or offered information about the resources of the library's musical collection not generally understood. A special use was made of attractive quotations from books designed to give the flavor of the book and to entice the reader into wishing to read further. To shun the didactic, to avoid the technical, and to taboo the supercilious and aloof air of the musical snob has been the intention of the section, as embodied in the following quotation which headed the notes:

"The power of enjoying and loving the best music is not a rare and special privilege, but the natural inheritance of every one who has ear enough to distinguish one tune from another, and wit enough to prefer order to incoherence."

To popularize musical essays which are not crabbed or dull, the first program notes included the following:

"Carl Van Vechten who writes lively essays on a variety of subjects is always whole-hearted and progressive; his appreciations are invariably fresh and warm. And for all who enjoy discussions which are not academic, a light artistic touch and a scholarship which is truly musicianly, his books will prove an unending delight.

"In the Garret' is his latest group of essays. 'Music and Bad Manners,' 'The Merry-go-round,' 'Interpreters and Interpretations,' and the 'Music of Spain' have been amazingly popular, and all may be obtained at the Public Library.

"Defending modern music in 'Music and Bad Manners,' Mr. Van Vechten relates how 'Strawinsky played some measures of his ballet, 'The Firebird,' on the piano to his master Rimsky-Korsakow, until the composer of Scheherazade interposed, 'Stop playing that horrid thing; otherwise I might begin to enjoy it.'" And even the usually open-minded James Huneker says in his essay on Arnold Schoenberg "If such music making is ever to become accepted then I long for Death the Releaser. More shocking still would be the suspicion that in time I might be persuaded to like this music, to embrace it, after abhorring it." These phrases of Huneker's remind me of a personal incident. My father has subscribed for the *Atlantic Monthly* since the first issue and one of the earliest memories of my childhood is connected with the inevitable copy . . . on the library table. On one occasion contemplating it I burst into tears. . . . My explanation, between sobs, was, "Some day I'll grow up and like a magazine without pictures! I can't bear to think of it." Well, there is many a man who weeps because some day he may grow up to like music without melody. Music has changed. Of that there can be no

doubt. Don't go to a concert and expect to hear what you might have heard fifty years ago; don't expect anything and don't hate yourself if you happen to like what you hear."

When Mabel Garrison sang an aria from "Le Coq d'Or" the library notes ran:

"The music of Rimsky-Korsakow, according to Paul Rosenfeld in 'Musical Portraits,' is like 'one of the books full of gay pictures which are given to children: and in "Le Coq d'Or" we seem to have before us one of the pictures beloved by the Russian folk—a picture with bright and joyous dabs of color, with clumsy but gleeful depictions of battles and cavalcades and festivities and banqueting tables loaded with fruits, meats and flagons."

"In order to overcome difficulties in producing the opera, 'Le Coq d'Or,' Michael Fokine of the Ballet Russe converted the score into an operatic pantomime. 'The singing was divorced from the actual performers and confined to an immovable chorus placed on two flights of steps on both sides of the stage. Acting, on the other hand, was entrusted to dancers, who illustrated, in plastic forms, the words and music of their singing counterparts.' (The Path of the Modern Russian Stage, Bakshy.) Altho the family of Rimsky-Korsakow objected to this method of production, it was successfully achieved in both Europe and America with indisputable quaintness and poignancy of effect. The song of the Princess which fills nearly the whole of the second act is an example of modern Russian *bel canto*.

"The library contains a monograph on Rimsky-Korsakow by M. Montagu-Nathan, who has written extensively on modern Russian music during the last few years."

To introduce books for the listener, this quotation from Schauffler's "The Musical Amateur" served:

"The ordinary person regrets few things more in life than his inability to play or sing. Or, if he does play or sing, he regrets all the more wistfully his inability to play or sing well. He calls music 'the universal language' and, unless he can talk it loud and clear, he looks as pathetically shamed as the after-dinner orator who, after mute agonies, sinks back into the poignant silence without having been able to utter a syllable. . . .

"Tho the player first makes audible the poetry of the universal language, his recitation will not be effective without the co-operation of the creative listener. The two are absolute correlatives. The beautiful thing is that the more such a listener receives, the more he gives. Mundane music would soon come to be a fitting overture to the music of the spheres if our audiences were composed wholly of listeners . . . like the man

I once read of in the *Hibbert Journal*: 'a most pitiable cripple, ship-wrecked in all save the noble intelligence, who hobbled away from the hearing of a Beethoven symphony exclaiming, 'I have heard that music for the fiftieth time; you see what I am; yet with this in my soul I go down Regent Street a god!'

"There are books for plain simple people who like music but are a little bewildered by its complexity and by the pace at which it passes across their attention. Ask for them at the Public Library.

The Education of a Music Lover, by Edward Dickinson.

Listening Lessons in Music, by A. M. Fryberger.

What is Good Music, by W. J. Henderson.

How to Listen to Music, by H. E. Krehbiel.

On Listening to Music, by E. Markham Lee.

Listening to Music, by P. A. Scholes."

The following note about orchestral instruments ended the first program:

"Many people who are genuinely fond of music know as little about orchestral instruments as the poet John Drinkwater, who, according to Ernest Newman in 'A Musical Motley,' 'gives us a delightful little picture of Anthony and his piccolo, on which 'he played of a night to himself and Sue.' When I next see Mr. Drinkwater I am going to urge on him the desirability of studying a book on orchestration . . . When he had worked thru the wood-wind section he would know that had Anthony played the piccolo every evening he would never have lived to be eighty-two. Susan would have poisoned him the first year of their married life."

"The following books which are available at the Public Library will assist the concert-goer in recognizing the various instruments both by sight and hearing, and stimulate his perception of the thousand and one beauties of orchestral coloring.

Orchestral Instruments, by Arthur Elson.

Orchestral Instruments, by D. G. Mason.

Instruments of the Modern Orchestra, by Kathleen Schlesinger.

The Orchestra and Its Instruments, by Esther Singleton."

Interesting bits about the instruments, culled from books in the library were inserted in each program. Who would not be more friendly to the bassoon after reading this amusing story related by Mr. Elson in his book on orchestral instruments?

"The bassoon once enabled Von Bülow to get rid of an unwelcome audience. It was at a rehearsal, and some insistent ladies had forced an entrance, in hopes of being allowed to stay for the music. Seeing that they did not go, Von

Bülow, who was conducting, turned to his orchestra and said, 'Gentlemen, we will take the bassoon part first.' He gravely conducted thru thirty-two measures of rests, when a couple of grunts announced two notes for the instrument. Then came sixty-four more measures of rests. Finally the leader looked around, and found to his satisfaction that the uninvited auditors had taken the hint and fled."

Or the following:

"Of all the instruments in the orchestra, the oboe and the bassoon are for the amateur the hardest to distinguish and the least understood. Samuel Butler in his Notebook pleased the faithful Jones by saying that 'the oboe was a clarinet with a cold in its head, and the bassoon the same with a cold in its chest.' The oboe and the clarinet look much alike from the audience except at the mouthpiece. Both are reed instruments, that is, have a small detachable reed or piece of thin wood in the mouthpiece, which produces the actual sound, modified and controlled by the tube and keys, the difference being that the clarinet has a single reed and the oboe a double reed."

"Endicott and I," Frances Warner's book of essays, contains a lively account of a family orchestra, and an excerpt from it amused everyone who had ever engaged in that "indoor sport." Likewise, an element of literary charm can be infused into a Wagner program by reprinting Romain Rolland's inimitable account of his first Wagner concert, thus bringing into prominence that delightful book "Musicians of Today."

When Godowsky played Chopin, there was Huneker's tale—in "Steeplejack"—about the first time he entertained de Pachmann in his Dream Barn, when de Pachmann played nothing but Godowsky until the elevator boy listening on the stairway succumbed to sleep. "Madame Sand," Moeller's play, added interest to notes on Chopin biography.

Mention of new books and unusual articles in the magazines, such as one on musical snobishness in *Arts and Decoration*, and one on color music in *Vanity Fair* supplied up-to-the-minute color.

In connection with Mr. Kinkeldey's article on "Musical Impressionism" which was reprinted from the New York Symphony Society *Bulletin*, the library wandered further afield and suggested a group of books on impressionism in art and poetry for the man whose interest might be engaged.

In an effort to prevent the notes from becoming too prosaic, poetry which had especial charm was inserted here and there; and for the fiction reader who enjoys a bit of gossip with his music

a list of musical novels supplied entertainment.

Perfect books about music, according to James Huneker, are those which expound the musical gospel but do not preach. There are many such for the person who chooses to use them.

The effect on the library from the season's work with the orchestra was very noticeable. Long after the concerts had ceased people came to the library with their programs to look for

the books, and many of them seemed to be newcomers and the orchestra testified that the library notes made the program more readable, and gave it a permanent value which was a potent argument in selling the advertising space so that from all points of view it seemed worth repeating the experiment. From a material as well as a cultural standpoint the experiment seemed worth repeating another year.

Education and the Tariff Measure*

BY M. LLEWELLYN RANEY

IN its Book sections (Art. 1529-1532) the pending Tariff Bill (H. R. 7456) makes five removals from the existing Free List, and changes the rate to 20 per cent from 15 per cent (Art. 1310), as shown in detail below.

Organized Education, Art, Science and Scholarship condemn all six of these changes. Upon many other measures they disagree, as, for example, the taxing of scientific apparatus imported, or the proposals of the Sterling-Towner Bill. But upon the nation's proper treatment of foreign art and printed matter, they are absolutely unanimous.

Specifically, the following bodies endorse without dissenting vote the position here outlined in the name of the American Council on Education and the American Library Association: American Association for the Advancement of Science, American Association of University Professors, American Chemical Society, American Economic Association, American Historical Association, American Philological Association, American Physical Society, American Political Science Association, Association of American Colleges, Association of Urban Universities, College Art Association of America, Conference of Eastern College Librarians, Conference of Western University and College Librarians, Geological Society of America, Modern Language Association of America, National Education Association.

Of the two proponents of this brief, the American Library Association is well enough identified by a reference to its service as one of the Seven Welfare Organizations of the war period. It has five thousand members.

The American Council on Education, formed in 1918, is a confederation of associations and institutions for discussion and joint action on major matters of educational policy. In its membership are thirteen national organizations (including ten not named above), one hundred and thirty-one colleges and universities, besides twelve other associated bodies.

So much for the petitioners. Now, their petition.

Analysis of the Bill

The five items removed from the Free to the Dutiable List are these:

1. English books more than twenty years old. (Free since 1870.)
2. Foreign language books. (Those more

than twenty years old free since 1870; others free since 1890.)

3. Excess of two copies imported by an educational institution. (Free since 1816. No limit, except as to number in a single invoice [fixed at two since the Act of 1872]).

4. Textbooks used in schools and other educational institutions. (Free since 1913.)

5. An immigrant's books if valued at more than \$250, together with his necessary household effects. (All free since 1790.)

As to the *ad valorem* rate, our history has been as follows: 1789-1860, 5 per cent to 10 per cent (except 1841-46, 20 per cent); 1861, 15 per cent; 1862, 20 per cent; 1864-1913, 25 per cent; 1913-, 15 per cent.

The Background, American and International

In exposition, note two important facts at the outset:

1. In the book sections, our Tariff Acts have since 1789 shown steady progress in liberalism. Practically no tariff maker in half a century has failed to do himself honor in this respect. This is especially true from 1890 on, regardless of party. McKinley freed the rest of foreign language books and those for the blind; W. L. Wilson added hydrographic charts, learned society publications to subscribers, government documents, issues in gratis private circulation, and even works 'devoted to original scientific research'; Dingley included 'exchanges by scientific and literary associations or academies'; while Underwood expanded the free blind schedule, added textbooks, and lowered the rate.

The present measure reverses this praiseworthy tendency, taking six steps backward, and none ahead.

2. With all our progress, we are behind other nations in recognizing the wisdom of allowing knowledge to spread freely. The Fordney measure would put us humiliatingly far behind.

Thus, the United Kingdom, France and Germany admit all (decent) publications without duty.

Italy admits foreign language books free and lays a duty of twenty lire per one hundred kilograms (less than two cents a pound, when exchange is normal) on bound Italian books, or, if unbound, the duty on the paper only.

Switzerland, with the franc near par, bordered by three kindred nations possessed of badly depreciated currency, nevertheless fixes in the face of competition as low a duty as five francs the 100 kilograms, or less than one-half cent a pound, and that only on large shipments.

*Brief presented at the Senate Committee's hearing on the Fordney Tariff Bill, Washington, December 21, 1921.

Canada, which has just reversed her former refusal of our proffered reciprocity, already lays a duty of but 10 per cent (except fiction, 25 per cent), while admitting free, among others, the following which the Fordney Bill would make dutiable for us:

1. Books on the application of science to industry.
2. Books for the instruction of the deaf and dumb.
3. Textbooks used in any university, college or school.
4. Books printed and manufactured more than twelve years.

Thus the Old World is virtually of one opinion on this business, and the New had taken all but the last step to reach the same conclusion when the Fordney Bill brought a halt.

Why Such Unanimity?

Just because civilized nations realize that the one which impedes the spread of knowledge is but bleeding itself, for Knowledge is Power and no people has a monopoly of it.

Why do we exempt school and church property from taxation? Why do we freely admit works of art, Bibles, magazines, newspapers, hydrographic charts, learned society publications, books for the blind, for the Government, and for educational establishments? Because we have come to think that a gain in information and inspiration is greater than one in money.

But the authors of the present bill do not follow this thought to its conclusion. Shall we let the wealthy connoisseur have his object of art, but deny those equally appreciative but less fortunate the only approach to such possession possible to them, *viz.* the picture and description of it found in a book? Regardless of station we had better let brains browse where they will, with assurance that if they find satisfaction the public will be the beneficiary. Wireless telegraphy was not the sudden flowering of Marconi's imagination. The idea was of slow growth, with one of its progenitors a stiff bit of mathematical analysis published as long ago as 1853 by William Thomson in the *Philosophical Magazine*. We had better not limit the food of thinkers.

If the public library can render a larger service by importing more than two copies of a useful book, let us not balk its worthy design. It will be only a live one that will harbor such a desire. We can well save our kicks for the dead ones.

We must remember, too, that our population is composite. We are the gainers if they bring with them a love of their native literature. It is easier to transmute such appreciation into an understanding of Americanism, than to create

this out of whole cloth. To bar against the enjoyment of worthy books, while others have free access to journals not so worthy, is a foolish policy and but awakens resentment.

Finally, who could have expected any American statesman to assert the advisability of discouraging the immigration of a family found to own a library worth more than \$250? Yet that is what Art. 1532 by implication does. Oddly enough the first exemption from the book duty ever granted by Congress was to the immigrant. This occurred in our second Tariff Act, August 10, 1790, and thus actually antedated by more than a quarter of a century the same exemption accorded learned societies and educational institutions. We shall surely not wish to advertise to the world our repudiation of this course.

The Rate

Historically, as seen above, the proposed rate rests on two legs—the Acts of 1842 and 1864. The former was conceived in haste and passion, lasted but four years, and constitutes in its book sections the most bizarre of all our tariff enactments. Books were thrown into thirteen categories, and for the duty; some were counted, some weighed, others valued. The *ad valorem* rate was the twenty per cent of the present measure.

The Act of 1864 was, it is needless to say, passed in time of unexampled emergency and dire financial need. Yet the phenomenally high war rate of twenty-five per cent stuck to books till 1913. It is not too much to say that serious readers everywhere, rejoicing that after a half century the account with the Civil War had been closed, earnestly hoped that we should shortly complete the reduction to our own antebellum, and the world's, level.

In fact, as might be surmised, the present petitioners feel that any rate on printed matter is a mistake. It is only expediency, therefore, and not conviction that restrains them from urging the removal of the existing duty on English books under twenty years of age. The American Chemical Society, for example, stresses the importance of a closer accord with English chemists in order to break down the old tradition of German super-excellence in this field. The time must inevitably come when we shall yield to that sensible plea. The least that we can do now is not to lengthen the handicap, tho by every consideration of the national welfare, we ought to shorten it.

Effect on Libraries

Despite the continuance of their duty-free privilege, libraries are adversely affected by the Bill in the following particulars:

1. Since virtually all foreign books are made dutiable (instead of recent English books only,

as heretofore), libraries will have to make affidavit on all shipments from abroad. For important libraries this means a great increase in clerical work added to the already heavy burden of library administration.

2. Restriction to two copies as a maximum (without even the allegation of any past abuse) means Federal taxation of Municipal, State, and educational foundations, when a greater number are to be bought.

3. American dealers will be discouraged from buying up European stocks from which we might select, at a time of special opportunity. In fact, it is difficult to see how the importing bookseller, already beset with well-nigh insuperable difficulties of competition on account of the depreciation of foreign money, could survive such a measure, coupled with a rejection of the invoice in favor of an arbitrary valuation as the basis of the duty. He could not calculate his course. He can now not live on his discount. This would be highly unfortunate just now, for there exists, in European demoralization, an unexampled opportunity of securing (to their benefit, as to ours) the fundamental literature of history, art, science and scholarship, as important for America, the child of Europe, as for Europe herself. Such a chance, let us hope, devastating War may never offer again. We must not let this one pass.

4. The duty (especially one on an American estimate) would be the reason or excuse for a sharp advance in the prices on all foreign publications. When the Government sets the example, others with less reason follow. The ultimate consumer supports the pyramid. This has happened in the case of English books. While there are many American houses that sell at fair rates the English stocks under their control, others of great importance are unfortunately to be found which list such books at from sixty per cent to one hundred sixty-five per cent increase over London prices. The same thing, if this Bill passes, may be feared for all foreign books, with trade agreements fixing the terms.

The Defenders of the Bill

There are four classes seeking to change the existing law in the sections here discussed. These are the Typothetae, the Bookbinders, the Lithographers, and the Toybook makers. Educators, librarians, scientists have no real quarrel with any one of these four. Their goal is worthy, but the way chosen by the first three to reach it is devious and indefensible. The manufacturers of children's playbooks are right in asking that their product be classified as toys instead of books.

The printers and their allies, in asking a fifty

per cent duty, have not the remotest interest in increasing the price of foreign books to American buyers. What they seek by this provision is to prevent American publishers from sending their copy abroad for typesetting, or lithography, or binding. They ought to succeed, but there is no possible excuse for knocking down the whole line of innocent importers in order to get at their man on the end. Let them strike direct. It should be easy. A moderate duty on imported books of American origin should turn the trick.

Upon this subject, their fears are probably overdrawn. I had occasion this year to examine critically a proposal to have one of the Johns Hopkins University journals transferred to a German publisher. This was not done, because, entirely aside from reasons of sentiment, it was seen to be uneconomical. To aid decision, we compared two contracts of a German publisher for the same piece of work in 1914 and 1921, and both with the corresponding charges of our Baltimore printers. The result was that in 1914 a signature of sixteen octavo pages would have cost us fifty per cent more if done in Leipzig than at home; in 1921 the German's offer was in marks 21.4 times as high as in 1914; and with the mark at only, .0066 cents he tied our home printer's offer. This, of course, takes into account the duty on both sides, and especially the German Government's requirement that the foreign book buyer be charged more than the domestic—one hundred per cent more in the case of the United States. So that a scoffer might be tempted to say in this instance that if the American competitor claims he is unable to meet his foe, he needs, not a larger tariff allowance, but an emetic.

Amendments

To effect the desired ends, the following changes in the text of the Bill are accordingly requested:

1. In Par. 1310, lines 9 and 15 change "20 per centum ad valorem" to "15 per centum ad valorem."

2. To Par. 1529 prefix the following: "Books, maps, music, engravings, photographs, etchings, lithographic prints, bound or unbound, and charts, which shall have been printed more than twenty years at the date of importation, and all."

3. To Par. 1530 prefix the following: "Books and pamphlets printed wholly or chiefly in languages other than English, and all textbooks used in schools and other educational institutions; also"

4. In Par. 1531, line 9 insert "in any one invoice" after the word "exceed."

5. In Par. 1532, line 17 strike out the words "and not exceeding \$250 in value."

Summary

I. The Bill alters present and past practice as follows:

1. Makes dutiable virtually all books of foreign origin. [Books twenty years old free since 1870; rest, except English, free since 1890.]

2. Institutions limited to two duty-free copies. [All free since 1816.]

3. Textbooks removed from Free List. [Freed in 1913.]

4. Immigrant's books made subject to duty when exceeding \$250 in value. [His books and household effects free since 1790.]

5. Duty raised to twenty per cent from fifteen per cent. [Duty from five per cent to ten per cent before the Civil War (except 1841-46, twenty per cent); twenty-five per cent thence to 1913; fifteen per cent, 1913—]

II. Organized Education, Art, Science and Scholarship oppose these changes because,

1. It reverses our own tariff tendency, regardless of party, the duty resting historically on two emergency rates, which do not fit present conditions.

2. It violates foreign practice, since

(a) The United Kingdom, France and Germany admit all free.

(b) Italy and Switzerland fix nominal duties, if at all—two cents and a half a cent per pound, respectively.

(c) Canada has ten per cent (except twenty-five per cent on fiction), frees much that we do not, and now has voted for reciprocity.

3. The revenue gained would be out of all proportion to the harm done in checking the spread of knowledge.

4. Our foreign population will resent the bar against their literature.

5. Cost of foreign language books would rise, as have those in English.

6. Libraries would be handicapped by red tape, be taxed for multiple copies, suffer from international trade agreements between publishers and lose an unequalled opportunity to stock with European fundamentals, because of crippling the booksellers.

7. These importing firms, already handicapped by exchange, would be afraid to import on a problematical duty.

8. Taxing textbooks violates the spirit of educational exemption. It is upon ambitious students that the blow would fall.

III. The Typothetae, Lithographers and Bookbinders who espouse the change have a worthy aim but a mistaken notion of the way to

attain it. They do not object to the free entry of *bona fide* foreign books. They seek only to prevent American publishers from sending American work abroad to be done. They can attain their end without felling the whole line of innocent importers. (It should, however, be added that their need is overstated, as shown by a concrete example.) It is a happy discovery, therefore, that the desires of the users and the makers of books are in reality not at variance.

German Periodicals of the War Period

THE Committee on Completing the Files of German Periodicals has received from the Notgemeinschaft der Deutschen Wissenschaft acknowledgment of the receipt of the lists of desiderata in German periodicals for the war period sent to them last September.

The Committee has received also from the Notgemeinschaft a list of American periodicals for the war period needed by German libraries. The New York Public Library is now engaged in examining this list to see which items can be supplied from its duplicates. As soon as this examination has been completed the list will be forwarded to other libraries, following the order set forth in the statement in the LIBRARY JOURNAL for October 15th, 1921, page 837. A duplicate copy of the list has been sent to the Library of Congress to see what can be done thru government collections in Washington.

Shipments made as a result of this list should be sent to the Smithsonian Institution, International Exchange Service, Washington, D. C. It will be necessary to see that (1) the shipments are securely wrapped; (2) plainly marked to show their destination, namely the Notgemeinschaft der Deutschen Wissenschaft, Berlin C, Schloss Portal 3, Germany; (3) bear the address of the shipping institution to show their source; (4) and—most important—have all transportation charges in this country fully prepaid. They must be delivered, free of expense, to the Smithsonian Institution, which will in its turn undertake the burden of forwarding them from Washington to Germany.

H. M. LYDENBERG, *Chairman.*

WILLARD AUSTEN

“Now the frank recognition of books and not the lecture as the substantial basis of instruction opens up a large and interesting range of possibilities. It releases the process of learning from its old servitude to place and to time.”—H. G. Wells in “The Outline of History” (Macmillan).

Some Reference Books of 1921

By ISADORE GILBERT MUDGE
Reference Librarian of Columbia University
II

LITERATURE

THE "Cambridge History of American Literature," which has been in progress since 1917, has been completed by the publication of volumes 3-4. While the whole work is of first importance as a reference book in its subject, special attention should be called to the extensive bibliographies included in the last volume. For modern English writers a compact reference handbook is "Contemporary British Literature, Bibliographies and Study Outlines," by J. M. Manly and Edith Rickert, which should prove useful in work with either the undergraduate student, general reader, or study club.

In the field of drama several titles should be noted. Perhaps the most important of these, for the large reference library, is "La Comédie-Française de 1860 à 1920, Tableau de Représentations, par Auteurs et par Pièces," by A. Joannidès. This is a final part of the author's reference work on the Comédie Française and complements the main volume published in 1901, "La Comédie-Française de 1680 à 1900: Dictionnaire des Pièces et des Auteurs," by supplying, in its author list, summarized statistics of performances of each play, not available in that form in the main volume. A complete set of this reference work on French drama should consist of the main volume of 1901, this new complementary volume and the nineteen annuals published 1901-19. A useful reference list of material about a dramatist and his work is Miss Firkins' "Ibsen Bibliography."

In the field of Spanish and Spanish-American literature several new publications are of reference value. The most important of these, Fouché-Delbec's "Manuel de l'Hispanisant," is described more fully in the section on bibliography, as is also the new British Museum list of Spanish books. A title which should be noted here, however, is Miss Lutrell's "Mexican Writers, a Catalogue of Books in the Library of the University of Arizona," which furnishes useful biographical notes about modern Mexican writers.

Arizona University. Library. Mexican writers, a catalogue of books . . . with synopses and biographical notes, prepared by Estelle Lutrell. Tucson: The University, 1920. 83 p.

Cambridge History of American Literature, v. 3-4. New York: Putnam, 1921. 2 v.

Firkins, Ina Ten Eyck. Henrik Ibsen, a bibliography of criticism and biography, with an index to characters. New York: H. W. Wilson Co., 1921. 80 p. 75 cts.

Joannidès, A. La Comédie-Française de 1680 à 1920. Tableau des représentations par auteurs et par pièces. Paris: Plon-Nourrit, 1921. 138 p. fr. 80.

Manly, John Matthews and Edith Rickert. Con-

temporary British literature, bibliographies and study outlines. New York: Harcourt, Brace, 1921. 196 p. \$1.25.

BIOGRAPHY

A rather unusual number of recent publications is to be noted in this subject, including new works or new volumes in the three fields of contemporary, national and classed biography. Two volumes which have been added to the "National Cyclopaedia of American Biography" are volume 17, which contains biographies of persons not included in earlier volumes, and a revised edition of volume 2 which shows changes and the inclusion of new material. These changes are incorporated in the index to this particular volume, and reference workers in libraries which substitute the new edition for the old will have to remember to use this volume index in addition to the general index.

One of the older Canadian works, Rose's "Cyclopaedia of Canadian Biography," of which two volumes were published in 1886-88, has been continued by Charlesworth's "Cyclopaedia of Canadian Biography" which forms a third volume in the series. As in the earlier volumes, the arrangement of articles is not alphabetical but there is an alphabetical index. Many of the names included are of men known in business or political life and the biographies are popular in type. A Canadian work of quite a different type which has recently been completed is Allaire's "Dictionnaire Biographique du Clergé Canadien-Français." The last part of this complicated publication consists of a monthly periodical entitled "Le Clergé Canadien-Français," issued January, 1919—December, 1920, after which the monthly ceased publication. This is linked to the rest of the set by a general index which refers in one alphabet to the two main volumes of the dictionary, the six supplements and all the monthly numbers. The "Diccionario Historico y Biographico de la República Argentina" by Julio A. Muzzio supplies a new work of a popular type.

That very useful English work, Boase's "Modern English Biography," which was nearing completion at the time of its compiler's death a few years ago, has been finished by the publication of volume 6, which completes the supplementary alphabet and shows the same type of concise articles and useful subject index as those of the earlier volumes. Other works on British biography useful from certain special points of view are: The Eton College Register, 1753-90, edited with biographical notes by R. A. Austen-Leigh, and "Burke's Handbook of the Most Excellent Order of the British Empire,"

edited by A. W. Thorpe, which gives brief biographical data about the many men and women non-combatant war workers) who have been made members of that Order. A new edition of that standard biographical and genealogical work, Burke's "Landed Gentry of Great Britain," has been announced.

In the field of continental European biography new parts of two important works should be mentioned. The new volume of the Belgian "Biographie Nationale" is noteworthy, both for its own excellence and as a welcome indication that publication of this important set, necessarily interrupted by the war, has begun again. The new Swedish dictionary of national biography which began publication in parts in 1917, has now completed its second volume, carrying the alphabet thru the name Becker. This shows long signed articles, good bibliographies and some portraits and is an important addition to its class. Three new titles in the National "Who's Who" section are: "Who's Who in China," a compilation of popular biographical sketches which appeared in *Millard's Review*, 1918-1920; the "Schweizerisches Zeitgenossenlexikon" which gives brief articles in French, German or Italian and claims to be the first general dictionary of Swiss biography since the 18th century work of Leu; and a Finnish work entitled "Aikalaiskirja," which gives compact biographies of the regular "Who's Who" type.

In the field of biographical dictionaries of special classes several new titles should be noted. The completion of Lami's *Dictionnaire des Sculpteurs de l'Ecole Française au 19e Siècle* has already been mentioned under the heading Arts. The "Biographical Dictionary of Modern Rationalists" by Joseph McCabe will be of interest primarily to the reader who wants the subject grouping, as most of the names are included in more general lists. Of greater importance are two dictionaries of scientists. The third edition of "American Men of Science," work on which was delayed by the war, is much enlarged from the earlier editions, showing 9500 biographies as against 4000 in the first edition and 5500 in the second. The Italian work of Mieli, "Gli Scienziati Italiani," is an ambitious work which should be of great value if it can be carried to completion on the scale on which it has been started. The articles are long and signed, there are bibliographies of each scientist's works giving full information about editions and translations, notes about the manuscripts and the libraries in which they may be found, further bibliographies about the writer, and good portraits and other illustrations. The arrangement of material is not alphabetical, but there is an alphabetical index.

Aikalaiskirja, henkilötietoja nykypolven suomalaisista. Helsinki: Tietosanakirja-Osakeyhtiö, 1920. 531 p. 2.50 kr.

Allaire, Jean Baptiste Arthur. *Dictionnaire biographique du clergé canadien-français*, vol. 4, La revue. Jan. 1919-Dec. 1920, and *Table général des quatre volumes*. Montreal: L'Ecole Catholique des Sourds muets, 1920. \$5.

Who's who in China, containing the pictures and biographies of some of China's political, financial, business and professional leaders. 2d ed. Shanghai: Millard's Review (1920). 314 p. illus.

HISTORY AND GEOGRAPHY

As might be expected several of the new works which fall within this class have to do either directly or indirectly with the European War. The "Chronology of the War," prepared under the auspices of the British Ministry of Information, has been completed by the publication of a third volume. Another chronology, of a different sort, is included in the useful "Times

Diary and Index of the War," which has a chronological list, a detailed alphabetical index and various statistical tables. A very complete and well executed regional encyclopedia is Schnee's "Deutsches Kolonial Lexikon," which covers the history, organization, geography, biography, fauna, flora, etc., of the former German colonies.

Great Britain. Ministry of Information. Chronology of the War, v. 3. London: Constable, 1921. 7s. 6d.

Schnee, Heinrich. Deutsches kolonial Lexikon. Leipzig: Quelle und Meyer, 1920. 3 v. illus., maps. M. 360.
Times, London. Times diary and index of the war, 1914-1918. London: Hodder, 1920. 342 p. £2 2s.

ATLASES

Practically all the standard general atlases have been undergoing revision as a result of the War and the past year has seen the publication, at least in part, of several of these. The "Times Survey Atlas," mentioned in last year's survey of reference books, has been completed as far as the maps are concerned, but the index has not yet been published. The following list gives a selection of the principal revised editions, together with a few titles of new works. A new work which should be mentioned especially is the Far Eastern Geographical Establishment's "Atlas of the Straits Settlements." This includes in addition to its maps a good deal of gazetteer information, and data about rubber establishments, tin mines, etc.

Andree, Karl Theodor. Andrees Allgemeiner Handatlas in 222 Hauptund 192 Nebenkarten. Mit vollständigem alphabetischem Namenverzeichnis in besonderem Bande. Siebente, neubearbeitete und vermehrte Auflage. Herausgegeben von Dr. Ernst Ambrosius. Bielefeld und Leipzig: Velhagen und Klasing, 1921. 224 p. 2 v. M. 350.

Daily Telegraph victory atlas of the world; a series of 100 plates containing over 450 maps and diagrams. Prepared under the direction of Alexander Gross. London: Daily Telegraph, 1920. 16 p., 286 double-page maps. 145s. half mor. 175s.

Far Eastern Geographical Establishment. New atlas and commercial gazetteer of the Straits Settlements and Federated Malay States; a work devoted to its geography, history, resources, and economic and commercial development. Singapore: Kelly and Walsh, selling agents, 1917.

Philip, George. Philip's mercantile marine atlas: a series of 35 plates containing over 200 charts and plans with tables of 12,000 distances between ports, supplemented by a new and original diagrammatic chart for calculating speed, time and distance; national and commercial flags, cable, oiling stations and wireless telegraphy charts with list of wireless stations, and complete index of over 20,000 ports, etc. Specially designed for merchant shippers, exporters and ocean travellers and for general use. 8th ed. London: Philip, 1920. £5, 15s. 6d.

Rand, McNally and Co. Rand McNally commercial atlas of foreign countries. A companion volume to the Commercial Atlas of America, containing maps showing all recent boundary changes of all the countries and principal political divisions of the world outside of the United States of America, and detail maps of important islands, cities and ports with an alphabetical index of more than 150,000 place names. . . 2d ed. Chicago: Rand, McNally, 1921. 349 p. 53 cm. \$35.

U. S. Geological Survey. World atlas of commercial geology: pt. 1. Distribution of mineral production. Washington: Geological Survey, 1921.

Vivien de St. Martin et Schrader, Fr. Atlas universel de géographie dressé sous la direction de F. Schrader, comprenant 80 cartes, avec un index alphabétique des noms contenus dans l'atlas. Nouv. éd., conforme aux traités de paix de 1919-21. Ouvr. publ. sous les Auspices du Ministère de la Guerre. Paris: Hachette, 1921. Livr. 1-16. compl. work 240 fr.

GEOGRAPHIC NAMES

So many questions of the form and spelling of geographic names have arisen in the last few years that new reference books on this subject are especially needed now. The fifth report of the United States Geographic Board supplies a timely list, enlarged by more than one hundred and fifty pages over the fourth report (1916) and arranged in three alphabets, *viz.*, a general list, Hawaiian names, and Philippine names. The Permanent Committee on geographical names for British official use, which is working on the problem in England, has published two pamphlets this year, one on European names and one on Asiatic, and promises later lists. The two lists so far issued give the approved spelling and pronunciation, mention forms used in other languages and point out some popular mis-spellings and mis-pronunciations. These lists are published for the Permanent Committee by the Royal Geographical Society and distributed with the *Geographical Journal*.

Permanent Committee on Geographical Names. First general list of Asiatic names. London: Royal Geog. Soc., 1921. 8 p. 6d.

—First general list of European names. London: Royal Geog. Soc., 1921. 12 p. 6d.

U. S. Geographic Board. Fifth report of the United States Geographic Board 1890 to 1920. Prepared by Charles S. Sloane, secretary. Washington: Govt. Prtg. Off., 1921. 492 p.

PUBLIC DOCUMENTS

Miss Hassé's "Index to United States documents relating to foreign affairs, 1828-1861," has been completed by the publication of the third part covering the section R-Z. Two new agricultural lists which call for mention are the "Check List of Publications Issued by the Bureau of Plant Industry, 1901-20, and by the Divisions and Offices which Combined to Form this Bureau, 1862-1901," and "Statistical Data Compiled and Published by the Bureau of Crop Estimates, 1863-1920." Of these, the former is primarily a tool for the catalog and order departments, while the latter has been prepared with a view to the needs of the research worker and includes, in addition to the list of publications, an alphabetical subject index to statistical matter included in these, in the "Monthly Crop Reporter" and in various bureau files and tables. A subject list which includes a good deal of minute analysis and should be very useful to the research worker in a special field is "An Analytical Subject Bib-

liography of the Publications of the Bureau of Fisheries, 1871-1920."

Hasse, Adelaide Rosalie. Index to United States documents relating to foreign affairs, 1828-1861. Pt. 3, R-Z. Washington: Carnegie Inst., 1921. \$6.

MacDonald, Rose Mortimer Ellzey. An analytical subject bibliography of the publications of the Bureau of Fisheries, 1871-1920. Washington: Govt. Prtg. Off., 1921. 306 p. (U. S. Bureau of Fisheries. Doc. 899.)

U. S. Bureau of crop estimates. Statistical data compiled and published by the Bureau of crop estimates, 1863-1920. . . . Washington: Govt. Prtg. Off., 1921. 64 p. (U. S. Dept. of Agriculture. Dept. circular 150.)

U. S. Bureau of plant industry. Check list of publications issued by the Bureau of Plant Industry, 1901-20, and by the divisions and offices which combined to form this bureau, 1862-1901. Washington: Govt. Prtg. Off., 1921.

BIBLIOGRAPHY

Several new issues of standard national and trade bibliographies are to be recorded. For American publications the most important new volume of this sort is the new cumulation of the "United States Catalog" which covers the three and one-half year period from January, 1918, to June, 1921, and forms the third permanent volume in the set which starts with the basic volume of books in print in 1912. An important new volume in a standard bibliography is volume 10 of the "English Catalogue" which lists more than 45,000 books for the period 1916-1920. English trade bibliography is represented by the 1920 edition of the "Reference Catalogue of Current Literature," the first revision of this important work since 1913. For Danish national bibliography, a new volume of Ehrencron-Muller's "Dansk-bog-fortegnelse" covering the period 1915-1919, has been issued.

For Spanish bibliography there have been two new works which are distinctly noteworthy. The first of these is the British Museum's "Short-title Catalogue of Books Printed in Spain and of Spanish Books Printed Elsewhere in Europe Before 1601." While full bibliographical description is omitted and the principal purpose of the list is to furnish the student of Spanish literature with a quick means of finding what books of this period the Museum possesses, the catalog will be useful to many others than those actually using the Museum's collection. The second work, the "Manuel de l'Hispanisant," tome 1, by Raymond Foulché-Delbosc, is a bibliographical manual of first importance for either the investigator in the field of Hispanic studies or the librarian who is building up a bibliographical reference collection in this field. The works listed include biographical and bibliographical dictionaries, catalogs and other lists of libraries, archives, museums, etc., in short the collection of all types of published lists upon which one might base the eventual preparation of (1) a dictionary of Spanish biography,

(2) a bibliography of books published in the Peninsula or published elsewhere by Peninsular authors, and (3) a general inventory of all historical documents preserved in the Peninsula and of all Spanish historical documents in foreign collections. A bibliography of bibliography on these lines is of course of great value to the student, reference worker or expert cataloger.

Among French bibliographical publications which should be noted are the index volume of Vicaire's "Manuel," a new volume, series 12 of Baudrier's monumental "Bibliographie Lyonnaise," and an annual of French auction prices of books, "Annuaire des Ventes de Livres," by L. Delteil. Libraries purchasing out of print French publications have long felt the need of such a list and it is to be hoped that this volume may be the first of a long series.

Annuaire des ventes de livres. année 1, Oct. 1918-juillet 1920. Paris, 1920. \$6.

Baudrier, Henri Louis. Bibliographie lyonnaise. 12 série. Lyon, 1921. 507 p.

British Museum. Dept. of Printed Books. Short-title catalog of books printed in Spain and of Spanish books printed elsewhere in Europe. London, 1921. 101 p.

Dansk-bog-fortegnelse, 1915-1919. for aarene 1915-1919, udarbejdet af H. Ehrencron-Müller. Kobenhavn, Gad, 1921. 598 p. 2 kr. per hft.

English Catalogue of books. v. 10, January 1916 to December 1920. London: The Publishers' Circular, 1921. 1328 p. £10. 10s.

Foulché-Delbosc, Raymond. . . . Manuel de l'hispanisant . . . v. 1. New York: Putnam, 1920. \$2.50.

United States catalog, Supplement, Jan. 1918-June 1921. New York: Wilson, 1921. 2185 p. Service basis.

Vicaire, Georges. Manuel de l'amateur de livres du 19e siècle: Tome 8, Table des ouvrages cités. Paris: Libraire Rouquette, 1920. 646 col. fr. 25.

Books and Thrift

Books and Thrift by Ruth G. Nichols, Librarian of the Federal Reserve Bank of Chicago, lists thirty-one books and pamphlets under the headings: Thrift, Household Thrift, Teaching Thrift, and Special Topics (such as home building, wills and life insurance). It is an attractive eight-page leaflet, suitable for distribution to employees and customers of banks, school teachers and others interested.

Prices: 6 copies, 25c (in stamps); 30 copies, \$1.00; 100 copies, \$3.00; 250 copies, \$7.00; 500 copies, \$12.00; 1000 copies, \$20.00. Postage extra.

Your own imprint one dollar extra on quantities of 100 or more.

American Library Association, 78 East Washington Street, Chicago.

The Polish Immigrant and the Library

By ELEANOR E. LEDBETTER*

Part I

TO Americans the Poles are the best known of the Slavic group. Their independent history is most recent. All students know the crime of the partition of Poland. Kosciuszko, Pulaski and Sobieski, fighting with us and for us in our Revolution established for their nation a permanent claim upon our interest and sympathy. Every American has a mental picture of how "Freedom shrieked when Kosciuszko fell" altho he mispronounces the hero's name. The information of the average American stops right here, but the person who wishes really to make friends with the Polish people must know much more. The librarian who would contribute to their culture and education thru the medium of the public library, must have a fairly detailed understanding of their past, of their national character, and of the conditions of the European situation which preceded their emigration.

A foundation for this understanding may be secured thru the librarian's own medium, the printed page. "Poland, the Knight among Nations," by Van Norman, is the best single book, and gives a certain amount of both history and interpretation. "A Brief History of Poland," by Julia Swift Orvis, is very readable, and "Poland," by Phillips in the Home University Library, is a good brief volume, especially strong on modern conditions. "The Litany of the Polish Pilgrim," by Mickiewicz, greatest of Polish poets, concentrates into a few words the essence of Polish history, religion, and national feeling, and its petitions now seem to have been prophetic. This splendid bit of literature is conveniently found in Monica M. Gardner's "Life of Adam Mickiewicz." The Polish Information Committee of London has published a number of pamphlets on such topics as "Landmarks of Polish History," "The National Music of Poland," etc. which give excellent information in brief and convenient form.

A background of knowledge thus secured, one should become absorbed in the national feeling thru the medium of the great Trilogy of Sienkiewicz, "With Fire and Sword," "The Deluge," and "Pan Michael." One whose spirit has kindled with Kmita's in his prodigious deeds of valor during the Swedish siege of the shrine of

Czenstohowa, will see in every American Polish church a reflection of Czenstohowa, and in every Polish priest a suggestion of the indomitable prior Kordecki.

The mentality of the peasant is interpreted in some of the short stories of Sienkiewicz; "Sielanka" is a beautiful picture of country life; "Bartek the Victor" a painful true delineation of the bewilderment of the peasant under a foreign military dominance; and "Without Bread" portrays the sufferings of some early immigrants to America. These three stories may be found in various collections of the minor writings of Sienkiewicz.

Then in order to balance the picture by a realization that the Pole's self-interpretation is not the interpretation of his neighbors, one should read Gogol's great work "Taras Bulba," and try to realize that the Ukrainian nationalist in America hates the Polish nation just as Bulba did, although, unlike Bulba, he may be friendly to individual Poles. "The Oppression Psychosis and the Immigrant," by Herbert Adolphus Miller, in the *Annals of the American Academy*, January, 1921, must not be omitted, since it gives the key to mental attitudes otherwise difficult to understand. Finally one must know that the Poles of America are politically divided into parties between whom no bridge exists; and that the acquaintance of each party must be sought as separately as that of Ulsterites and Sinn Fein. One party is identified with the Polish National Alliance and the Polish Roman Catholic Union, the other with the National Defense Committee (known by the Polish initials K. O. N.); both are working for the development and upbuilding of the new Poland, but without co-operation. The K. O. N. party are accused of being anti-clerical and socialistic, and some of its leaders are outspoken foes of the parochial school; while the National Alliance members are in general conservative and conformists. Policy and good feeling suggest also the wisdom of at least an elementary acquaintance with Polish phonetics. The correct pronunciation of a foreign name is a sort of high sign proving that one belongs to the initiate. It is true that Polish names do look formidable, the preponderance of z's being especially staggering. But the formidableness is in appearance only; sz is just as good a combination of letters as sh, cz as ch, when one knows that they represent the same sound. Every letter always has the same sound and is always sounded. One has only to start at the beginning of a name and keep going, accenting the penult when he gets to it. The few necessary simple

*This is the second of a series of articles on library work with the foreign born, furnished by the A. L. A. Committee on Work with the Foreign Born; "The Library and the Oriental," by Marion Horton of Los Angeles, will be the subject of the next article, which will be followed by the second part of "The Polish Immigrant and the Library."

ELEANOR E. LEDBETTER, *Chairman.*

rules may be found in many places, such as the appendix to "With Fire and Sword," the preface to "The Deluge," the appendix to Van Norman's "Poland," etc.; while the librarian who wishes a little technical knowledge of the language may secure it through Baluta's "Practical Handbook of the Polish Language," published by the Polish Book Importing Company in New York.

Acquaintance must be initiated along lines of natural contact. The librarian should absorb all she can from every Pole whom she meets, asking questions like an interested friend, not as a professional investigator. A walk thru the district is always illuminating to a good observer, and one can drop into a corner grocery to inquire one's way, and linger to converse a while, extending an invitation to the library as a return courtesy. Such informal excursions are absolutely essential to a visualization of neighborhood conditions as related to the possible use of books and the library, and they should form a part of the librarian's regular routine.

"The quiet work of air and moisture" was a chapter heading in an old geology. The gist of its theme was that the quiet work of air and moisture, going on unremittingly day in and day out, summer and winter, has wrought far greater changes in the earth's surface than all the earthquakes, all the avalanches, all the tidal waves, and all the volcanic eruptions that have ever taken place. So in any work with immigrant people, the quiet work of personal interest and friendly assistance will accomplish more than all the brass bands and all the mass meetings ever staged—alho the brass band and the mass meeting have their mission too.

And the librarian, working as unremittingly as do the air and moisture in the quiet work of personal contacts, will also seek for mass movements thru the formal agencies of the church, the press, and the school.

Almost all Poles are faithful Roman Catholics, giving as a rule unquestioned obedience to the advice of their pastors. The librarian must therefore put no limit to her efforts to win for the library the active approval and recommendation of the local priest. The method must always be individual, depending on the idiosyncracies of the local situation, and on the personality of the priest and of the librarian. There is no advantage in trying to make the acquaintance on the ground of a common faith. A Roman Catholic is more easily turned down by an unfriendly priest than is a Protestant, who, not recognizing authority in him, feels no inhibition to keep her from persistence. The foreign born Polish clergy who have not already had acquaintance with a public library are apt to have very erroneous ideas re-

garding its character and functions, imagining that its books are all either frivolous or materialistic. The best way to convert him is of course to get him to the library and to show him its contents and methods; if that cannot be done, then books or booklists must be taken to him, choosing themes with which he is familiar, so that he can personally weigh their value. Here again the quiet work of sincere friendly interest is bound to produce an ultimate response, which will probably come in the opportunity to do him a personal favor. When that time comes the favor should be done, regardless of time or trouble.

Tact and diplomacy are sometimes needed also where the parish considers itself provided for by a library of its own. The public library must then be demonstrated as supplementing the parish collection with greater resources and wider range of themes. As the parish collection is expensive to maintain and troublesome to administer, there is always a possibility that after a while it may be turned over to the public library. During the war some such collections were sent to the Polish army, because their owners, using the public library, no longer needed them.

Next to the church is the parochial school, which most Polish children attend. Courtesy requires the priest's permission before visiting the school, where the Sister Superior must first be sought. The principal orders teaching in Polish parochial schools are: The Sisters of the Holy Family of Nazareth; the Felician Sisters; the Franciscan Sisters of St. Kungunda; the Sisters of the Resurrection; and the Polish Sisters of St. Joseph. These Sisters have under their care considerably more than one hundred thousand children. The Sisters of St. Joseph, alho a comparatively small order, teach 21,660 pupils.

All these orders are made up of women of Polish parentage, most of whom have themselves been educated in parochial schools in this country. A large proportion entered the convent directly from the grammar grades, completing their education in the academy of the order during their novitiate. Thus very few of them had any acquaintance with public libraries before beginning their teaching, and the librarian must win her way in the school by first making the library valuable to the teachers. The cloistered life is literally and actually a life shut away from the world and without knowledge of the world, therefore all the advances must come from the library side. The Sister cannot ask for aids of which she has never heard: the librarian must offer her wares and demonstrate their usefulness.

A golden opportunity for service is at hand in the fact that many sisters in these orders are now studying diligently and systematically through summer schools, correspondence courses, and extension classes toward a goal of recognized standard credentials. The librarian can render an inestimable service to the cause of education and a friendly service great in personal reward by connecting these teachers with local educational advantages, the availability of which they do not know. Nowhere will she find gratitude more touching, friendship more complete than that which follows such a service. A religious community is a big family and service to one part of the family influences the whole group. Good library service in Menasha, Wisconsin, produces results in Cleveland, Ohio, and the news of what libraries can do spreads, not only from sister to sister, but from order to order. Among my personal rewards, I count my visit in last June to the Mother House of the Sisters of St. Joseph, where I was invited to address the order on what the library can do to help the sisters in their teaching. The audience was the most responsive I have ever addressed. The door of opportunity is wide open.

Acquaintance with school and teachers brings invitations to school entertainments in the parish hall, where one may meet parents and friends. This leads naturally to attendance at the musical and dramatic entertainments given by the various parish organizations. Public friendly attention by the priest gives standing and inspires confidence and an invitation to sit upon the platform must be regarded as official recognition of one's work.

In the average Polish settlement, most social activities are in connection with the church, just as they are in American villages; but in large city colonies there are also independent societies, such as chapters of the Veterans of the Polish Army and musical and dramatic organizations, whose friendship is worth cultivating.

The church, the school and the press are the three universal agencies to be enlisted in work with the foreign born. The Polish press, like every other press, has two fundamental intentions: first, to give its readers what they are interested in; and second, to give them what the editor wants them to be interested in. The amount of space which the library may expect depends upon its balance between these two considerations. Before planning newspaper publicity the librarian should examine her intended mediums as to their arrangement and division of space: how much is foreign news, how much official society business, and how much local news, and the relative appearance

and prominence of each. Even though she does not know Polish she can observe with sufficient intelligence for this purpose, and can thus know how to gauge the publicity she may receive. The long essaylike article giving a general account of the whole library has no place in the foreign language press. An article of not more than one hundred and fifty words developing simply and clearly a single idea is the one which will produce the best results. A whole column is the tribute which a newspaper may give once to a fine monument; a succession of short items is news of a live institution. These items may be prepared in English and offered to the editor as suggestions merely. He will then, according to his mood, either translate them literally or use them as texts for themes of his own composition. This co-operation may be confidently expected, but the librarian must be prepared also for the fact that every Polish editor is victim to some degree of the oppression psychosis and is likely to break out in the most unexpected place. For instance a Polish paper commented scathingly on the absence of Polish assistants in its local library, and at the same time the editor admitted privately that he did not know a single qualified person available for recommendation. One has to learn not to take these things too seriously. After all, criticism indicates interest; to be ignored is worse.

The average Polish immigrant is timid and shy. In the Old World he occupied an inferior position and was always made to feel his inferiority; he never traveled and he knew little except his immediate surroundings. The enormous wrench of coming to America temporarily exhausts his initiative and demands the relaxation of settling down in the Polish colony where he seeks to have things as much like home as possible. From this relaxation he emerges slowly to an acquaintance with American institutions. Shyness and humility are qualities which have in them elements of loveliness; masked by a protective covering of apparent indifference or hostility they fail of their true appraisal. The librarian must see through the mask and provide ease for the shyness, equality for the humility.

To do this it is essential that the library atmosphere be one of friendly hospitality and sympathetic interest. An easy informality of entrance should be provided for even in the architectural design, and must be supplemented by a socially-minded staff trained to gracious manners, quick observation, and keen analysis. Such a staff intuitively recognizes Timid Stranger's first visit as soon as he enters the door, and invites him in if his courage threatens

to fail him in the vestibule. The necessary registration questions, prefaced by a "Good morning" or "Good evening," will be carefully phrased; never a blunt "How do you spell it?" because Poles are not accustomed to spelling by letter, rather, "Will you write it, please?" And if he says "Good-bye" on leaving he will be answered as though that courtesy were our own custom.

Such a policy consistently carried on will eventuate in some visitor's saying, in a burst of

unrestraint, "The Polish people like very much the way they are treated at the library," and the speaker will never know that in those words the librarian feels the laurel crown upon her brow. Scarcely twice in a lifetime can one hope for such a tribute as came from an educated foreign social worker who spoke with tears in his eyes of a group of librarians, saying, "I thought to myself, these are American *intelligentsia*, and they are *intelligentsia*, not only of the mind, but of the soul."

Decision in Favor of Independent Administration in Brooklyn

THE trustees of the Brooklyn Public Library in defence of the independent administration of City appropriations in accordance with the Carnegie contracts have been engaged in court proceedings to obtain a mandamus to that effect, and the following decision may be of use in similar relations elsewhere than in Brooklyn:

SUPREME COURT, KINGS COUNTY

In the matter of the application of The Brooklyn Public Library for peremptory writ of mandamus directed to Charles L. Craig, as Comptroller of the City of New York.

For the Brooklyn Public Library, Meier Steinbrink and Frank E. Johnson; for Comptroller of the City of New York, Charles L. Craig, in person. Opinion of Mr. Justice Charles H. Kelby.

Application for a mandamus directing the Comptroller of the City of New York forthwith to audit and approve the payroll of the employees of the Brooklyn Public Library for the month of January, 1921, in the form and amount heretofore submitted to him, showing the monies needed to pay the administrative expenses of said library for said month, and to prepare the necessary warrant for the amount thereof, and do all other acts necessary to pay the petitioner the said sum out of the monies appropriated for its maintenance for the year 1921 by the Board of Estimate and Apportionment.

The question presented is the concrete test of a controversy between the Comptroller and the library board of directors as to whether the annual appropriation for the year 1921 is disbursable only in equal monthly divisions of the various items which entered into its fixation, or whether it is an appropriation in gross disbursable in accordance with the judgment of the library board of directors. Entire good faith in a fair difference of opinion on a question of law is on both sides assumed and admitted.

The library is not a branch of the city government, but it is a distinct and separate corpora-

tion, receiving budgetary contribution from the city, like other educational agencies, such as the various museums of art, and of natural history, and the College of the City of New York. See Peo. *ex rel* College of the City of New York v. Hylan, *New York Law Journal*, p. 1508, August 18th, 1921. Without detailing the process of its evolution the relator is the successor of the old Brooklyn Library, which was a private corporation, owning an effective subscription library; and also of the Brooklyn Public Library, which was a more or less inchoate public project for a free public library system. These were consolidated into the present Brooklyn Public Library for the purpose of participating in the benefits of the offer of Andrew Carnegie to give \$5,200,000 for the erection of free public library buildings, provided the city would supply the sites and agree to furnish the maintenance. To that end the city and the library entered into a formal contract in June, 1903.

Regarding for brevity the contract as including various auxiliary and enabling statutes, the city recognized and accepted the separate corporate identity and existence of the Brooklyn Public Library, and envisaged the survival or devolution into it of the powers of self control possessed by the merged organizations, including the right to appoint the library staff and to fix the compensation thereof. The city agreed to appropriate, in its annual budget, such sums as might be requisite for the maintenance and administration of the library, with the single expressed restriction that no salaries or compensations were to be paid to the board of directors, or others than the direct library personnel.

The particular part of the contract in question in this proceeding provides that it was "agreed and understood . . . that the *entire* amount of the *annual* appropriation . . . shall be disbursed and paid *from time to time* by the Comp-

troller, upon submission to him of proper vouchers, *in form to be approved by him* The italics are added to accentuate the textual bases of the opposing contentions. The Comptroller's contention requires a holding that there was intended an equal monthly division, or allocation, of the amount of the appropriation, importing and requiring a corresponding incidence in disbursement. This is not supported by the terms used in the contract, but is opposed thereby. No such prescription appears in the phrase that the *entire* amount of the *annual* appropriation shall be disbursed *from time to time*, with the *form* only of the vouchers to be subject to the comptroller's approval. The comptroller invokes what he terms "a fundamental principle of audit," whereby, as it is argued, no municipal appropriation is to be considered as an appropriation in gross, or by entirety, but as an appropriation limited by the *items* stated in the estimate furnished to the board of estimate and apportionment, and revised in the budget making process. To establish this principle of audit reference is made to the mandate of the State constitution (Article III, Section 21) that all laws making appropriations shall specify sum and object, and it is also said that the State legislative appropriation laws always speak by item, and express no totals. This may be by prudent practice rather than by fundamental principle, but assuming that there is in state finance this principle of audit, it is noticeable that the city's practice differs from the state's, for in the city budget all appropriations, including that to the library, do express totals. This appears to follow the sections of the charter dealing with the budget making process. Thus section 226 of the Charter speaks of that process as embracing consideration of "the aggregate sum and the items thereof allowed to each department," but its concluding words state as the final end and effect of that process that "the several sums shall be appropriated."

Other portions of the same section also indicate that the measure inheres not in the items, but in the total. Thus the section directs that annually "in order to enable said board to make such budget" each department head shall furnish "an estimate . . . called a departmental estimate, of the amount of expenditure, specifying in detail the objects thereof . . . including a statement of each of the salaries to officers, employees and subordinates." This statement of details or items of salaries, is thus explicitly informative in character. It is necessarily subjected to constant tentative revision, by addition and subtraction, in the reconciliation of the many pressing needs, which is the purpose of all budget building.

Section 149 of the Charter contains the direction that the comptroller shall furnish to the head of each department monthly, a statement of the unexpended balances of his appropriation. This direction surely does not imply the hypothesis of an annual appropriation which automatically divides itself into equal monthly payments in accord with the final form of the revised items entering into the budget. And Section 1542 of the Charter plainly looks to yearly limitation, and furnishes the rule of audit, which is not, as to the library limited by whatever may be the usual or uniform practice between the city and its various departments, for convenience and control.

The board of estimate having made its annual appropriation that sum cannot be questioned, in the absence of bad faith, as being adequate provision for the year 1921, but it seems clear that under the various statutes delegating powers to various libraries and the contract made with the city of New York that the board of trustees of the library is the body charged with the duty of distributing the fund already appropriated by the board of estimate. The board of trustees were intended, both by the Statutes and the contract, to have discretionary powers so long as they were exercised in good faith to fix the various salaries of its employees and carry out generally its administrative duties.

The case of *Matter of Flaherty v. Craig* (226 N. Y. 176) does not conflict with this holding. In the Flaherty case the budget had already been made up. The sum asked for was an increase and not an already existing salary provided for in the budget. The projected increase in the salary had not been one of the items submitted to the budget making power which would be needed for the next financial year. In the case at bar all the facts to guide the budget making power were present before the appropriation of a gross sum, and there was no complaint made that the library has not fully complied with all the procedural requirements mentioned in the Flaherty case.

For the foregoing reasons the motion is granted, with \$10 costs. Submit order on or before the 29th day of December, 1921.

J. S. C.

BACK NUMBERS WANTED

We will pay 50 cents each for seven or eight copies of LIBRARY JOURNAL for January 1st, 1921; and 25 cents each for three copies of February 1st, 1921.

R. R. BOWKER Co.

Library Opening on Holidays

THE question of the opening of public libraries on holidays, and especially on Armistice Day, is discussed by James Cunningham Moffat and by Librarian George P. Settle in the Louisville (Ky.) *Civic Journal* for November 26th and December 10th. Mr. Moffat sent a questionnaire to librarians of thirty-six representative city libraries. Of these eighteen opened while eighteen closed on that day. Those which opened were: New York City, Chicago, Baltimore, Detroit, Buffalo, Cleveland, Indianapolis, Newark, St. Louis, Minneapolis, Grand Rapids, Jersey City, Memphis, Atlanta, Los Angeles, Seattle, Portland (Ore), and St. Joseph, while the following closed: Boston, Philadelphia, Pittsburgh, Washington, Cincinnati, Providence, Toledo, Allegheny, Evansville (Ind.), Covington, Milwaukee, Kansas City, St. Paul, Omaha, Denver, San Francisco, New Orleans and Louisville.

Expense is given as the reason for closing by many of the librarians addressed. "Keeping them open costs so much money," writes John Cotton Dana. Librarian George Bowerman, if he "were a rich man, would gladly meet the expenses out of his own pocket." Mr. Settle, of Louisville, says public libraries "should not be closed on holidays. . . . I favor an every day public library, full library hours for circulation. . . . and reference work, and would make such recommendation to the library board if we had sufficient funds available to take care of the necessary additional expense."

The other main reason for closing given was the very special nature of that particular holiday. In Baltimore the library was kept open "to impress upon our citizens the lessons to be learned from the great war, and to obtain guidance as to the proper position to take in connection with the Washington conference." In Boston "it was thought best as a matter of respect not to open on this special, unique holiday." In Philadelphia the library was closed "in pursuance of a joint resolution of Congress having declared November 11, 1921 a holiday and the Governor of Pennsylvania having issued a proclamation calling on all citizens of Philadelphia to lay aside all non-essential business activities on Armistice Day."

S. L. A. Employment Registry

THE Special Libraries Association announces that its Employment Committee is ready to keep a registration file of all persons experienced and trained in special library work seeking positions. It is also ready and willing to co-

operate with any library, business house, agency or other institution requiring special librarians. The Employment Committee acts only as an intermediary, and its services are free. It is willing to do everything possible to bring the right persons to the right job. Librarians and executives are requested to communicate with the Chairman, Estelle L. Liebmann, c/o Ronald Press Company, 20 Vesey Street, New York City.

Library Affairs in Congress

LIBRARIANS will wish to lend support to proposals for increases in library appropriations now before Congress.

The budget (p. 15 ff.) and the alternative budget (p. 14 ff.) carry proposals for the increase of practically every salary in the Library of Congress, including the catalog division. The House sub-committee to which the Library of Congress (considered a part of the legislative establishment) falls for consideration is composed of Representatives Cannon, Anderson, Vare, Gallivan and Ben Johnson.

Definite announcement has been made by Representative Madden, chairman of the House Committee on Appropriations, that all increases must come thru reclassification.

The Lehlbach Reclassification Bill (H. R. 8928) was strongly supported and passed the House with only sixty-five votes against it. It is now before the Senate and it would be well if home librarians and trustees would interest their Senators in getting this Bill reported out.

The Senate Committee on Civil Service consists of Senators Sterling (South Dakota) chairman, Cummings (Iowa), Colt (Rhode Island), Ball (Delaware), Nicholson (Colorado), Stanfield (Oregon), Bursom (New Mexico), McKeller (Tennessee), Ransdall (Louisiana), Hefflin (Alabama) and Watson (Georgia).

Open Courses at the Library School of the New York Public Library

THE Library School of the New York Public Library is offering again this winter several series of lectures which are open to auditors.

The course on "Special Library Methods" will be given on Wednesday afternoon, at 5:30 in Room 68 in the Central Building except when a visit to some special library is scheduled instead of a lecture.

The "Literature of Economics" course will be given on Monday afternoons in Room 68, Central Building, at 5.30.

The fee for each course is \$5, payable in advance. Applications should reach the Principal, Ernest J. Reece, 476 Fifth Avenue, not later than January 31st.

Duplicate Titles of Novels

IN order to place on record for future reference by author, publisher and public, novels with the same title by different authors, Archibald Sparke, chief librarian of the Bolton (Lancs.) Public Libraries, prepared the following list for *The Publishers' Circular*:

"In recommending novels to each other," says the *Circular* "people very often remember the title only, so one may read and dislike a story which is not the one recommended—and the author suffers undeserved neglect in future." The list might be extended indefinitely but it is unnecessary to hunt up titles of forgotten novels.

- Aftermath. James Lane Allen; Hilaire Belloc; Henry B. M. Watson.
- Afterwards. Ian Maclaren; Kathlyn Rhodes.
- Angel. (Mrs.) B. M. Croker; C. A. E. Ranger-Gull.
- Autobiography of a Thief. Mrs. H. Hapgood; Charles Reade.
- Average Man. Robert Hugh Benson; Arthur C. Fox-Davies.
- Beacon Fires. H. Hill; M. Gerard.
- Betrothed. Alessandro Manzoni; Sir Walter Scott.
- Better Man. Cyrus T. Brady; Robert W. Chambers.
- Between the Dark and the Daylight. William Dean Howells; Richard Marsh.
- Beyond. Frank T. Bullen; John Galsworthy.
- Builders. Joseph S. Fletcher; Ellen Glasgow.
- Cabin. Vicente Blasco Ibanez; Stewart E. White.
- Christmas Books. Charles Dickens; William Makepeace Thackeray.
- Cleopatra. George Moritz Ebers; Sir H. Rider Haggard.
- Conflict. M. E. Braddon; David Graham Phillips.
- Conspirators. Alexandre Dumas; E. Phillips Oppenheim.
- Contraband. Randall Parrish; George J. W. Melville.
- Cost, The. David Graham Phillips; L. G. Moberley.
- County Family. Joseph S. Clouston; James Payn.
- Day of Wrath. Maurus Jokai; Louis Tracy.
- Debtor. M. A. Dickens; Mary E. Wilkins Freeman.
- Deliverance. Allan Monkhouse; Mark Rutherford.
- Double Marriage. L. Cleeve; Charles Reade.
- Dupe. Gerald Biss; C. Mansfield.
- Eve. Sabine Baring-Gould; M. Maartens.
- Faith and Unfaith. J. Blyth; Margaret Wolfe Hungerford.
- Family, The. Evelyn Everett Green; Elinor Mordaunt.
- Fancy Free. C. Gibbon; Eden Phillpotts.
- First Love. I. S. Turgenev; Marie Van Vorst.
- Fortune. Douglas Goldring; J. C. Snaith.
- Fugitive. Ezra Selig Brudno; Robert Bridges.
- God of Clay. Henry Christopher Bailey; B. Waugh.
- Graven Image. Mrs. Coulson Kernahan; D. Lyall.
- Grip of Fear. S. H. Burchell; Maurice Level.
- Happiness. Maud Stepney Rawson; J. Travers.
- Harvest. E. Close; Mrs. Humphry Ward.
- Harvest Moon. Joseph S. Fletcher; Justus Miles Forman.
- Head of the Family. Dinah Maria (Craik) Mulock; Mrs. Henry Ernest Dudeney.
- High Stakes. Reginald Wright Kauffman; Laurence L. Lynch.
- His Father's Wife. Ernest Daudet; John Edward Patterson.
- Husband, The. E. H. Anstruther; Julia Magruder.
- Individualist. (Sir) Philip Gibbs; William H. Mallock.
- Innocent. Marie Corelli; Mrs. M. Oliphant.
- In the Wilderness. Robert Smythe Hichens; E. F. A. Sergeant.
- Intriguers. T. Cobb; William Le Queux.
- Invaders. Leo Tolstoi; Margaret Louisa Woods.
- Island, The. Elinor Mordaunt; Richard Whiteing.
- Jew. D. Heller; I. S. Turgenev.
- Joyce. Mrs. M. Oliphant; Curtis Yorke, pseud.
- King's Highway. George P. R. James; Henry B. M. Watson.
- Kit. James Payn; Katharine Tynan Hinkson.
- Leila. Antonio Fogazzaro; Bulwer-Lytton.
- Long Live the King. Guy Boothby; Mary Roberts Rinehart.
- Lovers. Elizabeth Robins Pennell; Mrs. Humphry Ward.
- Message. Alec John Dawson; Louis Tracy.
- Messenger. F. Frankfort Moore; E. Robins.
- Miss Gascoigne. (Mrs.) J. H. Riddell; Katharine Tynan Hinkson.
- Missing. F. E. Penny. Mrs. Humphry Ward.
- Money. M. C. Leighton; Emile Zola.
- Nancy. Rhoda Broughton; Silas K. Hocking.
- Nightshade. P. Gwynne; Roy Horniman.
- No Man's Land. "Sapper;" Louis J. Vance.

No Other Way. Sir Walter Besant; Louis Tracy.
 Old Dominion. George P. R. James; M. Johnston.
 Open Sesame. Berman Paul Neuman; Mrs. Baillie Reynolds.
 Outlaw. David Hennessey; Maurice Hewlett.
 Path of Glory. Joseph Hocking; Georges Ohnet.
 Pauline. William E. Norris; (Mrs.) L. B. Walford.
 Perpetua. Sabine Baring-Gould; D. Clayton Calthrop.
 Pirate. Frederick Marryat; Sir Walter Scott.
 Prime Minister. Orme Agnus, pseud; Anthony Trollope.
 Proof of the Pudding. Meredith Nicholson; Edwin W. Pugh.
 Quicksands. (Mrs.) B. M. Croker; John Alexander Steuart.
 Rachel. Jane Helen Findlater; L. Turner.
 Red Stain. Achmed Abdullah; Sir William Magray.
 Rose of Life. M. E. Braddon; E. A. Rowlands.
 Scar. Ruby Mildred Ayres; F. W. Dawson.
 Silent Battle. George Gibbs; Mrs. A. M. Williamson.
 Sisters. A. Cambridge; Kathleen Norris.
 Sixth Sense. Stephen McKenna; E. F. A. Sergeant.
 Sentence of the Court. H. Hill; Fred M. White.
 Shadow of Evil. W. C. Dawe; Joyce Emerson Preston Muddock.
 Tainted Gold, P. Trent; Hugh Noel Williams.
 Test, The. Jane Adams; S. Spottiswoode.
 There and Back. George Macdonald; F. Richardson.
 Tree of Heaven. Robert W. Chambers; May Sinclair.
 Turmoil. Booth Tarkington; P. Urquhart.
 Uncanny Tales. Marion Crawford; Mrs. Mary Louisa Milesworth.
 Unguarded Hour. Arthur Williams Marchmont; Lady Troubridge.
 Ursula. K. D. King; E. M. Sewell.
 Vengeance is Mine. A. Balfour; Marie Connor Leighton.
 Victory. Joseph Conrad; L. T. Meade.
 Virginia. Ellen Glasgow; L. T. Meade.
 Vision Splendid. F. K. Bright; Robert Machray.
 Vision Splendid. D. K. Broster; G. W. Taylor.
 Wanderers. Mary Johnston; Sidney Pickering.
 Way of a Man. Thomas Dixon; M. Roberts.
 White Magic. Matthias McDonnell Bodkin; Stewart Edward White.
 White Shield. Bertram Mitford; Myrtle Reed.

Who Goes There? Blackwood Ketchum Benson; Robert W. Chambers.
 Wilderness. Thomas Bailey Clegg; Joseph Hocking.
 Wisdom of Folly. Ellen Thorneycroft Fowler; Cosmo Hamilton.
 Wolves and the Lamb. Joseph S. Fletcher; William Makepeace Thackeray.
 Woman Hater. Ruby Mildred Ayres; Charles Reade.
 Woman's Way. George Brown Burgin; Charles Garvice.

For Exchange—French War Material

To the Editor of the LIBRARY JOURNAL:

I have been asked by M. Camille Bloch, Inspecteur Général des Bibliothèques and Directeur de la Bibliothèque et Musée de la Guerre, to assist him in the collection of American books relating to the European War, and America's part in it. If librarians will send me lists of their duplicates on this subject, and especially titles of local publications, I shall be very glad to transmit them to him. It is his desire to make his collections the most complete in Europe, if not in the world. He will be glad to send in exchange French books or posters of interest to Americans.

The nucleus of this great library was the collection of Mr. Henri Le Blanc, presented to the nation in 1917. A catalog of this collection de luxe was published in eight volumes between 1916 and 1920.

The Bibliothèque de la Guerre is the headquarters of the Société de l'Histoire de la Guerre. Under its auspices is published a monthly entitled *Les archives de la grande guerre: revue internationale*. It is proposed to publish an edition of this in English if enough subscribers are secured.

W. DAWSON JOHNSTON,

Librarian American Library in Paris.

10 rue de l'Elysée,

PARIS 8^e

Herbert Haviland Field, founder and director of the Concilium Bibliographicum of Zurich, died in April last at the age of fifty-three. Death came to Dr. Field just at the moment when he was undertaking work on the scientific literature issued during the war period. During the war he had placed his extensive knowledge of European affairs at the disposal of the American government. At the time of the revolutionary movement in Munich, when Kurt Eisner was assassinated, he was in that city presumably as an official delegate of President Wilson.

J. B. C.

The Ruskin Collection at the Wellesley College Library

THE generous gift to the Wellesley College Library of the Ruskin Collection of Mr. Charles E. Goodspeed, the well-known bookseller and bibliophile of Boston, adds another notable collection in the field of English literature to those already owned by the Library, the Browning and Tennyson Collections, gifts of Professor George Herbert Palmer, being most noteworthy. The latter consist of first and rare editions of these writers, complete in the case of Tennyson, and in the case of both Robert and Elizabeth Browning with the one exception of the first edition of Pauline. Both include manuscripts of great value; in the one case, the still unpublished love letters of Arthur Hallam to Emily Tennyson, in the other the original manuscript of Aurora Leigh, crossed and recrossed and annotated so as to be almost undecipherable.

The Ruskin Collection, which is the fruit of many years' painstaking search on the part of one in an especially favorable position to pick up rare items, contains all the authorized editions of "Modern Painters," "Stones of Venice" and the "Seven Lamps of Architecture," besides early American editions of these works. The India proofs of the "Examples of the Architecture of Venice," lithographs and engravings from drawings made to illustrate the "Stones of Venice," as well as the first prints issued by Smith Elder in 1851; the India proofs of the re-issue by George Allen in 1887 are included and the collection also contains Ruskin's collected works in the authorized English and American editions, including the "Works" series published by George Allen, bound in the beautiful dark blue calf known to the trade as the Ruskin calf. Ruskin's earliest work which appeared in periodicals and literary annuals is especially well represented by a set of *Friendship's Offering*, 1835-43, *Heath's Book of Beauty*, *Loudon's Magazine of Natural History*, *Loudon's Architectural Magazine*, etc.

The "Poetry of Architecture," the early work which foreshadowed the principles of art criticism later to be developed in "Stones of Venice" and the "Seven Lamps of Architecture," was published first in *Loudon's Architectural Magazine*, 1837-8, and not reprinted in England until 1893 when the only authorized edition was issued by George Allen with chromo-lithographic frontispiece and fourteen plates in photogravure besides new woodcuts taking the place

of the cruder illustrations in the magazine. An edition of three hundred copies on Arnold hand-made paper, bound in half parchment, and a cloth-bound edition of 1,000 copies were issued, both of which are represented in this collection, also the unauthorized American edition issued by Wiley in 1873.

Ruskin tried three times for the Oxford prize and won it in 1839 with his poem "Salsette and Elephanta." A copy of the original edition in paper wrappers as issued, and a copy of Allen's edition are in the collection. The collected poems privately printed by Ruskin's father in 1850, a very rare item, is represented by a copy in the original binding.

The collection besides including the original issues of such of Ruskin's important works as were issued in parts, "Fors Clavigera," "Praeterita," "Ariadne Florentina," "Proserpina," "Deucalion," etc., is remarkably rich in rare pamphlet material. Owing to Ruskin's activity as a lecturer, pamphleteer and letter writer, a tremendous amount of such material was issued during his life time and copies of many such pamphlets are extremely scarce. There also arose innumerable controversies concerning his pronouncements on art, religion, etc., which led to the issue of pamphlets by his opponents or supporters and these are well represented. Of his famous pamphlet on Pre-Raphaelitism of 1851, the London and New York editions of that year and the London edition of 1862 are in the collection while of the "Notes on the Construction of Sheepfolds" which, issued the same year, produced as much controversy in the domain of religion as the former pamphlet in the domain of art there are three editions including the first, and also the letters exchanged between Ruskin and F. D. Maurice on the subject. The pamphlet reprint of the "Nature of Gothic" from the "Stones of Venice," London, 1854, stands on the shelf beside the beautiful edition from the Kelmscott Press, 1892, and near this is the very rare pamphlet on the "Nature of Miracle," a lecture before the Metaphysical Society, 1873, of which only a few copies were printed.

A full set of the Academy Notes, 1855-59 and 1875, the Turner Catalogues and Letters to the *Times* bring echoes of the Pre-Raphaelite controversy, while a set of George Allen's catalogues, 1874-98, recall the fact that Ruskin was the originator of the net book system. The spuri-

ous reprints of Ruskin's early work are of much bibliographical interest. The reprint in 1868 of *Leoni*, a legend of Italy, which first appeared in *Friendship's Annual* for 1837, is very rare and the introduced by a letter signed J. R. is not considered authentic. A copy of "The Scythian Guest," reprinted for the author from the *Annual* in 1849, sold in 1892 for £65 (sixty-five pounds). "Queen's Gardens," dated 1864, a reprint which came to light in 1892 and shows use of the 1871 edition of "Sesame and Lilies," is also not authentic.

A human interest attaches to the autographed copies in the collection; a volume of "Modern Painters," which is a presentation copy to the Rev. C. H. Spurgeon from the author, the 1863 edition of the *King of the Golden River*, given to "Mary Nina Firth with John Ruskin's love, 1864," and an autographed letter, signed and dated September 1st, 1877, in the pamphlet "Yewdale and its Streamlets," a lecture delivered October 1st, 1877, asking his correspondent to send him any books or maps which would give an account of that part of the country as he possessed none—from which one might infer that Ruskin prepared his lectures as hastily as many another busy man.

Besides works edited by him and selections from his works, the collection includes early reports issued by the Ruskin Societies of Manchester, London and Glasgow, a set of *St. George*, the journal published by the Birmingham Society, the *Masters Reports* of *St. George's* Guild, and much other collateral material.

The collection as a whole is the most extensive in this country and probably not surpassed by any in England with the possible exception of that belonging to Sir Alexander Wedderburn.

ETHEL DANE ROBERTS,
Librarian.

Co-operative Binding of Advertisements

TO assure the preservation of advertisements throught the year, a dozen New England libraries have now agreed to co-operate in binding in advertising pages.

Many a magazine seems to be "a small body of literature entirely surrounded by advertisements." What shall be done with all these advertising pages? Of course, when they are paged in, it becomes rather necessary to bind

them in the volume, especially when a river of reading runs thru banks of advertising. But shall all advertising pages be summarily discarded when they are separately paged? Advertisements in trade and professional journals are of value for reference and study, and the student of advertising, of economics, even of illustration, will wish to turn to them and will expect to find them in our libraries. But the very thickness of some of the engineering magazines makes this almost a physical impossibility.

Many libraries are trying to solve this problem by binding in the advertisements of one issue in each year. This will serve as a sample at least of the advertisements of that period. As a further development, it is now arranged by these twelve libraries in New England, that, so far as each will bind in separately-paged advertisements, a different month will be saved. This is better than to have all twelve bind in those for the same month, as all might select the last number in a volume, or December.

It does not prevent any library from binding in other months, or whatever else it may choose, but in this certain area the earnest student may hereafter find a series of months if he needs them. It is rather expected that this agreement will cover the entire list of periodicals and that the advertising pages when separate will be bound in at the end of the volume.

For purposes of record and for general library information the following list of months is published. It will be noted that where two libraries are in the same city, they are placed six months apart; and that the first half of the year includes college libraries only, and the second half, public libraries.

MONTHS ASSIGNED TO LIBRARIES IN NEW ENGLAND FOR BINDING IN ADVERTISEMENTS

January	Yale University Library
February	Brown University Library
March	Amherst College Library
April	Trinity College Library
May	Dartmouth College Library
June	Harvard University Library
July	New Haven Free Public Library
August	Providence Public Library
September	Springfield City Library Association
October	Hartford Public Library
November	Worcester Free Public Library
December	Boston Public Library

F. K. W. DRURY, *Assistant Librarian.*
Brown University Library,
Providence, R. I.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JANUARY 15, 1922

THE Council at the Chicago meeting gave adequate consideration for the first time in years to the important professional questions which it is its function, especially under the new constitution, to consider. It adopted with modifications the estimate of Mr. Ranck's Committee that one dollar per capita of population is a fair revenue for most libraries, altho a sensible amendment pointed out that in some cities this would be more than could be asked and in some places less than should be expected for adequate library service thruout the community. This is not a head tax as mistakenly construed in the press; but an estimate for inclusion in the ordinary tax levied on property values. Under the amendatory copyright act to bring this country into the International Copyright Union, the vote solidly supported Dr. Raney in advocating entrance into the Union, but insisting on continuing unrestricted importation by libraries in contradistinction to the publishers' view. On the important matter of certification, the Council marked time in the belief that further consultation is necessary before a definite policy is defined. The report of Mr. Roden's Committee on Committees met with approval and it should lead to better demarcation between committees and more effective work on the part of each. The meeting brought together a considerable proportion of the members of the Council, which justified its existence as has not before been the case for many years. The decision of the Executive Board to hold the 1922 Conference in Detroit is dependent on accommodation, and that of the New York State Library Association in choosing Brooklyn for "Library Week" proves impracticable for lack of suitable accommodation.

★ ★ ★ ★ ★ ★ ★

THE Brooklyn decision, which stoutly defends the right of the Brooklyn Public Library under the Carnegie contract with the city to administer the library affairs under the city appropriation, without dictation or insistence

by the city authorities on its own methods, may prove of service to many libraries as a precedent fitting their own circumstances. The Brooklyn Public Library has administered its affairs according to the best library methods, distributing the total city appropriation according to the needs of the Library and the services of its staff, with a system of Civil Service examinations for entrance and promotion more specially apt for the conditions than the general scheme of the municipal Civil Service Commission. The city authorities required that salaries should be paid according to schedules adopted by the city for its several departments, and was disposed also to insist that the municipal Civil Service Board should control examinations. The court decision is based largely on the fact of the Carnegie tri-partite contract, but is likely to have a broader effect in giving libraries which have not Carnegie contracts moral support in standing up for themselves. Civil Service examinations for entrance should be the rule for all libraries with staff of any size, and where a library has not a system of its own, it can scarcely object to the jurisdiction of a state or municipal Civil Service Board, but when a library has developed a special and admirably apt system of its own, as in New York, Brooklyn and other centres, it is not wise for the more comprehensive bodies to interfere and libraries do well under such circumstances to make protest.

★ ★ ★ ★ ★ ★ ★

IN the field of library economy and administration the most notable event last year was the long-awaited publication of the third edition of the Abridged Decimal Classifications. A much enlarged edition of John Cotton Dana's "Library Primer" reflects the extent of library progress during the last twelve years. J. H. Friedel's "Training for Librarianship: Library Work as a Career," in Lippincott's Training Series, is a contribution to the growing literature of recruiting. In work with schools there were the "Library Service for Schools," prepared by Martha

C. Prichard and others for the Massachusetts Department of Education and the second editions of Martha Wilson's "School Library Management," and Superintendent O. S. Rice's "Lessons on the Use of Books and Libraries." Louise B. Krause's "Business Library," and Dorsey W. Hyde's "Workshop for Assembling Business Facts" will be used without as well as within the special library. New periodicals are the Lynn Public Library's quarterly *Book List* and its monthly *Library Service*, the latter of which replaces the bimonthly *Bulletin*, and *Library Life*, the Boston Public Library's lively monthly to which *News Notes of Government Publications* is now issued as a supplement. The *Branch Library News* of the New York Public Library has suspended publication owing to lack of funds. Wellesley College published a fine handbook of its library and new editions of handbooks were issued by the New York and Boston public libraries, the latter on the occasion of the Swampscott Conference which also prompted perhaps the "Harvard Library and the Harry Elkins Widener Memorial Library Building" reprinted from the office guide to Harvard University. The District of Columbia Public Library combined its annual report with a handbook of the library.

★ ★ ★ ★ ★ ★

FOREMOST among the year's bibliographies stands the third cumulation of the "United States Catalog," covering the period from January 1918 to June 1921 and edited by Eleanor E. Hawkins and Estella Painter. "The Bookman's Manual" prepared by Bessie Graham for students of book salesmanship and published serially in the *Publishers' Weekly* has been much used in libraries also. "The Accountant's Index" is a sixteen hundred page list on the literature of accountancy to the end of 1920, compiled by Louise S. Miltimore. The concluding part of Adelaide R. Hasse's "Index to United States Documents Relating to Foreign Affairs," 1828-1881, was published by Carnegie Institution of Washington, as was also the second part of her "Index to Economic Material in Documents of Pennsylvania." "Modern Social Movements," an up-to-date summary with bibliographies by Savel Zimand, is well supplemented by Elsie M. Rushmore's "Guide to the Serial Publications of Representative Social Agencies." James T. Gerould's "Sources of English History of the 17th Century in the University of Minnesota Library" is the first volume in the bibliographical series planned by that University. In literature there were Harold L. Wheeler's "Contemporary Novels and Novelists" and Amelia E. Brooks' "Browningiana in Baylor University"; and in science a second edition of Marion E. Sparks'

"Chemical Literature and Its Use" and a "List of Technical and Scientific Serials in the Libraries of Providence," edited by F. K. W. Drury. Other union lists were the Boston Special Libraries Association's List of Periodicals and Annuals in Eleven Special Libraries in Boston; the List of Magazines Chiefly of a Scientific Character in the Libraries of Certain Government Offices in Ottawa, compiled by the Carnegie Library of Ottawa, and the Pacific Northwest Americana, edited by Charles W. Smith with the co-operation of fifteen libraries of the Northwest. To Americana also belongs chiefly the Catalog of the John Carter Brown Library, the second part of which lists material down to 1599. In children's lists the year was unusually prolific. A third supplement to the Children's Section of the Standard Catalog was prepared by Corinne Bacon and Mertice James and published by the H. W. Wilson Company, which also issued Effie L. Power's Lists of Stories and Programs for Story Hours, first published in the *Monthly Bulletin* of the St. Louis Public Library. To this *Bulletin* belongs also the credit for the first edition of Alice I. Hazeltine's annotated index to Plays for Children, the second edition of which is now published by the A.L.A. The Annotated Catalogue of the Eau Claire (Wis.) Bookshop was compiled from various authoritative library lists and the catalog prepared for Marian Cutter of the Children's Bookshop of New York, was the work of Jacqueline Overton. "The Bookshelf for Boys and Girls" was again under the direction of Clara W. Hunt and Franklin K. Mathews, the third editor being Ruth G. Hopkins.

★ ★ ★ ★ ★ ★

UNDER the title "The Library and Society," Arthur E. Bostwich has collected some sixty essays and papers to form a volume in the Classics of American Librarianship series. Morris Jastrow's "Song of Songs," a companion volume to his Book of Job" was barely finished at the time of his sudden death. Bernard C. Steiner has added another title to his biographies, a "Life of Chief Justice Roger B. Taney" being in the press. Henry Preserved Smith's "Essays in Biblical Interpretation" were published as one of the Amherst Centenary books; and his neighbor Frederick C. Hicks has given us "Men and Books Famous in the Law." Harry M. Lydenberg's History of the New York Public Library, the publication of which in the Library's *Bulletin* was long interrupted, has been concluded. From this Library come also Anna C. Tyler's Twenty-four Unusual Stories, published by Harcourt, Brace and Company, and a third revised edition of Frank Weitenkamp's "How to Appreciate Prints" by Scribner's.

LIBRARY ORGANIZATIONS

NEW YORK SPECIAL LIBRARIES ASSOCIATION

THE New York Special Libraries Association held its second monthly meeting on Tuesday, Dec. 6th, at the Fairfax Restaurant, 80 Nassau St. when 170 people sat down to an excellent dinner. The members of each group, as Legal, Insurance, Financial, etc., were seated together so that they might become better acquainted.

Carl Snyder, manager of the Statistical Department of the Federal Reserve Bank of New York, gave a comprehensive view of the development of a modern business, how each individual contributes his share to this important organization and how even a seemingly small bit of information secured by the Statistical Department or the Library may be the important fact on which hinges a great invention in modern industry or business.

Prof. David Friday, the well-known economist, gave an inspiring, humorous and practical talk. He prophesied in what direction of business the demands would come within the next six months, year or two years, and made suggestions concerning ways in which the special librarian can be of real value to her executive. R. B. R.

PENNSYLVANIA LIBRARY CLUB

A MEETING of the Club was held on Monday evening, January 9th, 1922, at the Philadelphia Commercial Museum.

The annual meeting will be held at Atlantic City, with headquarters at the Hotel Chelsea, on April 28th and 29th.

Officers for the current year are: President, Asa Don Dickinson, University of Pennsylvania; vice-presidents, A. S. W. Rosenbach, 1320 Walnut Street, and Elizabeth V. Kelly, librarian of the Apprentices Free Library, Philadelphia; Treasurer, Bertha Wetzell, Library Company of Philadelphia; secretary, Martha Lee Coplin, chief of the Documents Department, Philadelphia Free Library.

MARITIME LIBRARY ASSOCIATION

THE fall meeting of the Maritime Library Association proposed has been postponed until Easter, owing to the impossibility of many of the most prominent members attending a fall meeting.

The Association was organized in April 1918, at the Library of Acadia University. President George B. Cutten of Acadia University, who had conceived the idea that library interest might be aroused in these provinces thru the efforts of an organized association of library workers, invited all the librarians of the Maritime Provinces to a conference. Fourteen re-

sponded, nine of whom were from public libraries and four from colleges and universities. The conference, after lively discussion, organized itself into a permanent body, to be known as the Maritime Library Association, in which all librarians in the Maritime Provinces should have the right of membership. E. J. Lay of Amherst (N. S.) Public Library, was appointed president, and Mrs. Mary Kinley Ingraham of Acadia University Library, secretary-treasurer. Before another meeting could be arranged President Lay died, and the Secretary was for one year laid aside from active work because of illness.

Some work, however, has been accomplished. New libraries have been established, the working conditions of old ones improved, and steps are being taken at Acadia University Library to get ready a separate collection of books to be circulated by mail thruout the Provinces. This will be known as the Acadia Mail Library. Moreover, tho we failed to have our meeting this fall, the letters received show that interest in the movement is again active and promising. The libraries in these provinces are far apart from one another, the public is as yet apathetic, and many of the librarians are without special training. The enthusiasm of those who sustain the work, however, is marvellous considering the difficulties. When we have our meeting in the spring we shall doubtless find that organized effort will give new inspiration to the different librarians in our Association, and unity to our work as a whole.

MARY KINLEY INGRAHAM, *Secretary.*
Acadia University, Wolfville, Nova Scotia.

CHICAGO LIBRARY CLUB

THE first meeting of the Chicago Library Club for the year 1921-1922, was held at the Art Institute, where Professor J. W. Roberts gave an illustrated travelog, describing his visits to the homes of British authors.

At the November meeting, held at the Newberry Library, Theodore Wesley Koch lectured on "Dante, the Man and His Works." The lecture was supplemented by a most attractive exhibit of books, prints and manuscripts relating to Dante.

As usual, the December meeting took the form of round table. The new John Crerar Library afforded excellent space for this type of meeting. A general assembly was held in the main reading room. After the assembly, groups scattered to various floors and rooms for the individual sections. The programs of the sections were:

1. The Library's Relations with Other Organizations and Institutions and with Non-Library Patrons. Chairman: Carl H. Milam, secretary

of the A. L. A. Questions presented were: 1. Meetings in the library; 2. Service to other agencies; 3. Talks to other organizations; 4. Reaching non-patrons generally.

2. Medical Libraries. Chairman: J. Christian Bay, John Crerar Library. The medical librarians discussed the following problems and expressed the hope of continuing their meetings as a formal organization. 1. Availability of new volumes of periodicals; 2. Relations between medical school faculties and centers of literary medical research; 3. Problems of classification of new subjects; 4. Student readers; 5. Losses and the means of their prevention; 6. Preparation of a new edition of the Crerar Library's List of Current Medical Periodicals.

3. Reference. Chairman: Wm. Stetson Merrill, Newberry Library. Mr. Usher brought up the question of making more generally known among the libraries of Chicago and vicinity, the location of special works of reference. Mr. Merrill mentioned the fact that the Newberry Library is the recipient of all official publications for distribution by the general and provincial governments of India. The need for a new union list of serials was also discussed. The following resolution was passed, and the Chairman was asked to transmit it to the Executive Committee of the Club: That the Handbook of the Chicago Library Club be brought up to date and be made more detailed and concrete by mention of some special works as well as of valuable collections to be found at different libraries.

4. Financial Periodicals. Chairman: Sue M. Wuchter, librarian, Continental and Commercial Bank. About twelve were present at this section. The topics were: Better indexing of financial periodicals; Location of bound volumes of financial periodicals in Chicago.

5. Cataloging. Chairman: A. G. S. Josephson, John Crerar Library. Practical questions as to cataloguing difficulties were presented and discussed, especially economies in reprinting, arrangement of compound names and words, what catalogers can do to help reference librarians, and how an author's nationality can be determined.

6. Popularizing Documents. Chairman: Jessie M. Woodford, Chicago Public Library. The aim of this section was to invite discussion as to what librarians are doing to encourage the use of documents, and what documents mean to the community. Mr. Tweedell, Miss Leeson, Miss Sheffield, Miss Bemis, Mr. Lapp, and Mr. Rex presented their opinions as to best methods and results obtained from the intelligent use of documents.

7. Training for Librarianship. Chairman: Sarah C. N. Bogle, assistant secretary of the A.

L. A. The keynote of this meeting was the need for upholding high standards in the choice of library workers. The general expression of opinion was that college education and one or two years of professional training are essential to the library worker, if librarianship as a profession is to progress.

TEXAS LIBRARY ASSOCIATION

THE meeting of the Texas Library Association held in Dallas, November 22-23, had as its main topic the county library. The discussion of this topic was led by Lillian Gunter, librarian of the Cooke County Free Library, and consisted mainly of an "experience meeting" in which the history and problems of the libraries of Cooke, Harris, Dallam, and Potter Counties were recounted by their librarians either in person or by proxy, and plans for the library service recently provided for by the Commissioners' Court of Tarrant County were noted.

The Association went on record as favoring a uniform county library sign thruout the United States, and recommended some modification of the A. L. A. open book symbol for this purpose.

The question of providing effectively for the distribution of suitable public documents to libraries too small to be designated as depositories was discussed, and a committee was appointed to work out a plan to be reported at the next annual meeting.

It was definitely decided to undertake the compilation of a co-operative union catalog of printed material relating to Texas history to be found in Texas libraries, and a committee was appointed to work out the plan and to assign to each co-operating library its part in the general scheme.

Another topic of discussion was the business and special libraries of Texas, which brought out the fact that Texas has entered upon this phase of library development.

An informal discussion of Children's Book Week as observed in Texas Libraries was led by Jessie Van Cleve, children's librarian of the Rosenberg Library, Galveston, who also presented the topic of recruiting for librarianship. Elva L. Bascom, head of the University of Texas Library School, spoke on the work of the School.

Following a talk in which Julia Ideson, librarian, Houston Public Library, set forth the advantages of individual and institutional membership in the A. L. A., the Association voted to become a chapter of the A. L. A., and appointed a committee to request affiliation. Betsy T. Wiley, librarian, Dallas Public Library, was elected delegate.

A new feature of this meeting was the Texas Authors and Musicians' program given in the

City Hall Auditorium. The authors appearing on the program were Grace Noll Crowell, Clyde Walton Hill, Hilton Ross Greer, and Karle Wilson Baker. The musicians participating were David W. Guion, George A. Brewster, and Mrs. Albert Smith. The music was especially interesting in view of the suggestion which several of the compositions made as to the artistic possibility of folk music, especially of cowboy music.

It is hoped at succeeding meetings to feature Texas work, drawing so far as possible upon the talent of the town in which the meeting is held. The Association will thus be able to co-operate with such groups as the recently organized Texas Poetry Society in quickening interest in original artistic endeavor.

Officers elected were: President, Dorothy Amann, Southern Methodist University's librarian; vice presidents, Mrs. W. C. Houston of Corsicana and Mrs. John Humphrey of San Antonio; secretary, Mary Hill, West Texas State Normal College, Canyon.

PASADENA LIBRARY CLUB

THE Pasadena Library Club held its November meeting on November 13 with an attendance of seventy-five. George Watson Cole and L. Bendikson of the Huntington Library spoke interestingly of the place the photostat is now taking in all lines of business and the special use made of it by bibliographers. Dr. Cole spoke especially of the small cost of the photostat reproductions, and Dr. Bendikson of the special work with the photostat in the Henry E. Huntington Library. Susan C. Ott, reference librarian of the Los Angeles Public Library, spoke on photographic reproduction of illustrations for reference use.

FRANCES H. SPINING, *Secretary*.

LIBRARY ASSOCIATION

THE forty-fourth annual meeting of the British Library Association took place at Manchester during the week September 12 to 17, 1921.

The retiring president, Rt. Hon. J. Herbert Lewis, expressed his thanks for his election the previous year, acknowledging that his share in carrying thru the Libraries Act had some bearing on that election. He said that the Act had done two great things in freeing the libraries from the fetters and shackles imposed upon them by the limitation of the penny rate, and in enabling rural communities to have good libraries with small outlay.

The address of the new president, Alderman T. C. Abbott, emphasized the need of a general expansion of library activities to keep pace with the general demand for education. Reta Oldham, president of the Headmistresses' Association,

spoke upon "Libraries and Education," appealing for a more intimate and active association between libraries and schools. The junior department in British public libraries has recently made great progress, but school libraries, except when under the care of trained librarians, are not all that they should be.

Dr. A. E. Cowley, Bodley's Librarian, read a paper on "The Recent History of the Bodleian Library," which was followed by a contribution from Sir Charles Oman on "The Present Hindrance to Research caused by the Enhanced Price of Printing."

STANDARDIZING OF LIBRARY FITTINGS

At the second morning session John Ballinger of the National Library of Wales discussed the standardization of library fittings and appliances. He argued that standardization of bookcases and shelves was a logical step from the already accepted standardization of catalog cards and the cabinets to contain them. Many library buildings are planned without any regard to the bookcases, with the result that the fittings have to conform to the eccentricities of walling, windows, heating pipes and other accessories. Agreement should be arrived at with regard to a unit of length, width and thickness for a shelf, the height of the bookcase, etc., to the end that any shelf may fit any bookcase in any standardized library, subject only to the variation in width. Other appliances, such as reading tables, newspaper stands, and chairs could be considered with advantage.

In the discussion that followed Mr. Ballinger's paper and his resolution that a committee be appointed to draw up a scheme for standardization, objections were raised that there is no finality in regard to library fittings, and that such a scheme would exclude individual ideas, and thus endanger real progress. On the other hand, if the Association were able to put forward standardized data for fittings, the architect and furniture designer would consult the librarian before proceeding and an old-standing quarrel would be abolished.

THE I. I. B.

W. Berwick Sayers of Croydon read a paper on "The Institut International de Bibliographie: Its Work, and Possibilities of Co-operation," describing its quarters in the Palais Mondial at Brussels, and outlining its plan of producing a catalog of all books and literary pieces, of all ages and of all times, covering the forty millions of books in existence or known to exist before the great outpouring of books which marked the last half of the nineteenth century and the time subsequent. The repertory embodies the whole British Museum catalog, on which it is based, the catalogs of the Bibliothèque National and other

great libraries, and places its information at the disposal of all countries for a subscription little in excess of the pre-war fee of ten francs per annum. Entries from the bibliography either in subject or author form are sent to inquirers everywhere for approximately one cent per card. The Institute aims to perfect and to standardize every method in connection with the book production and circulation, and especially desires to produce a revised, expanded edition of the already much-expanded *Classification Décimale* (Expanded Dewey Classification) to be published in French and English in one volume. The International Encyclopaedia takes the form of a vast vertical file in which are arranged holders containing minutely classified cuttings, pamphlets and periodical articles. It is intended to furnish a representative collection for the twentieth century of every country.

Discussion of the paper brought out the fact that the bibliography has been made at second hand without actual examination of the books, and since classification from titles is attended with large possibilities of error it would be well for cards relating to British publications to be corrected by British librarians. The organization also suffers from lack of good library facilities in Geneva and Brussels, it was stated. L. Stanley Jast, chief librarian of Manchester, was of the opinion that the proper place for an international bibliography is in Washington, because "the Americans are a great nation of bibliographers; they are willing to spend money on it."

CITY MOTOR VAN BOOK EXCHANGES

G. F. Staley of the Manchester Public Libraries discussed "The Motor Van Exchange in Manchester," which by a daily service makes available at any point in the city a collection of 250,000 volumes housed in the twenty-three district libraries, and including the Music and Foreign Libraries and the Northern branch of the National Library for the Blind. For the purposes of this Exchange the libraries are designated Lending Libraries, those which issue books applied for, and Source Libraries, those which stock and supply the books. Deliveries are made over a thirty-four mile route by a four-cylinder, twenty-horse-power Ford, with a carrying capacity of seven and one-half hundredweight.

S. A. Pitt, city librarian of Glasgow, described the motor exchange service of books carried on in that city, in operation since 1904. The library had the advantage of studying the experience of other libraries, and was able in establishing branches to concentrate in each locality the books most likely to be used there.

INTERNATIONAL LABOUR OFFICE LIBRARY

At the third morning session Hilda A. Lake,

librarian of the International Labour Office of Geneva, set up by Part XIII of the Treaty of Peace with Germany, outlined the history of the library, which is designed to collect material relating to the conditions of labor in the various countries of the world and to make it as fully as possible available for the use of the Office.

When more general information is required it can be obtained thru the interchange system arranged between the four libraries of Geneva, that is, the libraries of the League of Nations, the League of Red Cross Societies, the University of Geneva, and the International Labour Office. The current weekly growth of the library now amounts to seven hundred books and pamphlets and nearly nine hundred periodicals, with nearly two thousand newspapers. Material is received in twenty-four different languages, and the Office itself publishes material in five different languages. The library staff of 12 members consists of representatives of five nationalities all of whom know several languages.

BUSINESS LIBRARIES

Three papers upon Works Libraries were read by J. G. Pearce of the Metropolitan-Vickers Electrical Co. Ltd.; H. Vincent Garrett, librarian to Messrs. Rowntree, York; and E. A. Clarke, librarian of the Dunlop Rubber Company. All showed that large industrial corporations are becoming alive to the fact that "the task of collecting, indexing, abstracting, cataloging information has a technique of its own, which is more effectively carried out by a small specially trained staff at a lower cost than is entailed by each expert searching for his own facts and maintaining private records."

L. Acland Taylor, city librarian, Bristol, also described "Twelve Months' Work in a Library of Commerce." A department, now independently administered, contains books on the whole system of economic procedure as applied to production and distribution, separated from the Reference Library's general collection, and made thoroly available by bold descriptive labels and intensive cataloging.

POETRY IN PUBLIC LIBRARIES

"Modern Poetry in Public Libraries" was the title of an interesting paper by J. H. Swann of the Administration Department, Manchester Public Libraries, who advocated the formation of poetry-reading circles in libraries and a generous representation of contemporary poetry, or at least of anthologies. Among American poets the following at least should be represented in British libraries, he said:—Robert Frost, Vachel Lindsay, Amy Lowell, Edgar Lee Masters, Ezra Pound, Edwin Arlington Robinson, Carl Sandburg and Sara Teasdale.

LIBRARIES IN DEVASTATED FRANCE

At the last morning session Jessie Carson, director of the Library Department of the American Committee for Devastated France, spoke upon American public library work in that country and showed a film of the first American library opened at Soissons, and of other library work in that area. There are now five completely equipped library reading-rooms with open shelves and standard library furniture for both children and adults. On the shelves of these reading rooms and in the foyers or schools of fifty villages where there are traveling libraries there are more than 13,000 books for all ages, carefully selected as to subject matter, edition and binding.

The fifth and largest library, at Soissons, was opened in March, 1921. The library at Soissons is open every day, the other four two or three times a week, while the traveling libraries vary. At the time of Miss Carson's talk each of the five Centre libraries had been open about sixty-five days of seven hours each, and all five had circulated 37,778 books to 2769 registered readers, with 20,177 circulated thru the schools and foyers. About 25,000 francs has been expended on the library "barracks." The book collection, special library furniture, magazine subscriptions, printed supplies, salaries, etc. cost under 175,000 francs, making a grand total expenditure of less than 200,000 francs, or perhaps about \$17,000.

 AMONG LIBRARIANS

The following abbreviations are used:

- A. Library School of the Carnegie Library of Atlanta.
- C. California State Library School.
- C.P. Carnegie Library School of Pittsburgh.
- D. Drexel Library School.
- I. University of Illinois Library School.
- L.A. Library School of the Los Angeles Public Library.
- N.Y.P.L. Library School of the New York Public Library.
- N.Y.S. New York State Library School.
- P. Pratt Institute School of Library Science.
- R. Riverside Library School.
- S. Simmons College School of Library Science.
- S.L. St. Louis Library School.
- Syr. Syracuse University Library School.
- U.C. University of California Course in Library Science.
- Wis. Wisconsin University Library School.
- W.R. Western Reserve Library School.
- Wash. University of Washington Library School.

ARMS, Jessie L., 1911 I., head of the catalog department of the University of Iowa library, has been appointed chief classifier of the University of Minnesota Library.

BROWNING, Earl W., 1918 N. Y. S. for the last three years librarian of the Jackson City (Mich.) Public Library appointed librarian of the Hamilton (Ont.) Public Library.

DOHERTY, Katharyn, formerly with the National Bank of Commerce, is librarian of the Silk Association of America, New York.

ETHIER, Eleanor, is the new librarian of the Citizens' Union, New York.

FINK, Julia M., 1918 Wis., appointed librarian of the Faribault (Minn.) Public Library.

JOHNSTONE, Helen M., formerly with Haskins and Sells, accountants, is now with the Library

of the New York University School of Commerce, Wall Street Division.

KAMPS, Patience M., 1919 Wis., is librarian of the Chinook (Mont.) Public Library.

LEWIS, Winifred, 1919 Wis., has assumed charge of the Chisholm (Minn.) High School Library.

MACPHAIL, Edith, has accepted a position with the Westinghouse Air Spring Company at New Haven, Conn.

MAGILL, H. N., for ten years librarian of Pleasant Valley (N. Y.), succeeded Ruth Parker as librarian of the Port Jefferson (N. Y.) Public Library, January 1.

PLUMB, Ruth W., 1921 Syr., who recently organized the Hepburn Library at Norfolk, New York, appointed assistant in the Hackley Public Library, Muskegon, Mich.

SAWYER, Ellen M., for many years assistant librarian of the Massachusetts State Library, died on January 4th. Miss Sawyer was one of the pioneer librarians, having begun her library service in 1866. She did splendid work in compiling the catalog of the Massachusetts State Library in 1880, and the Catalog of Foreign Laws in 1911. In the following year she retired from library work.

TAPPERT, Katherine, 1910 P., formerly librarian of the New York *Evening Post*, is now in charge of the Pratt Institute Free Library Reading Room.

WHITE, Mrs. Flora H., 1918 Wis., is cataloger in the Vancouver (B. C.) Public Library.

IN THE LIBRARY WORLD

MAINE

The Maine State Library exhibited at the annual convention of the Maine Teachers' Association in Portland in October. The high school building with its crowded corridors, gymnasium and class rooms, looked like an indoor fair. The library exhibit was on the main floor in a class room with two entrances. Colored posters on the doors and a huge sign on the corridor wall attracted passers (there were 4,700 registered at the convention) and many who stopped to look remained to ask questions. Books were arranged in loosely classified groups on the pupils' desks and an opportunity thus given for individual examination.

Altho there was plenty of material for the teaching profession, no attempt was made to emphasize that type. Rather was it the intention to indicate in a general way the resources of the library on all subjects. Traveling libraries were shown in the same cases in which the books actually travel. There were "general" ones for community use, and "specials" for teachers, rural schools and high schools.

At Augusta, early in November, the assessors from the various municipalities held their fifth annual convention. Each state department was requested to exhibit some of its work. The library was assigned one side of the Senate chamber and there displayed groups of books and posters in much the same manner as at Portland. A small table was covered with taxation literature as being of particular interest to the assessors.

A local man photographed the Augusta exhibit and a print has been carefully preserved. A small leaflet distributed in both cities described the work of the library and served as a reminder after the visitor had reached home.

Books were lent at both these exhibits and orders taken for many more. The numerous reference questions asked have kept the staff busy for two weeks and every mail brings its evidence that the publicity leaven is still at work.

NEW YORK

Buffalo. The Grosvenor Library started work on its new building December 12th. It consists of an addition built between the present main building erected in 1897 and the medical department opened in 1919. It will provide stack room for 96,000 books, new offices, a reading room which can be used for an auditorium seating 400, and a room for the music collection. The cost will be about \$100,000.

DISTRICT OF COLUMBIA

Washington. The Public Library of the District of Columbia, heretofore operating only one full-size branch in a city of 437,571 population, is assured of two more during the coming year, one in a building of its own. Congress appropriated \$10,000 in June for the purchase of a site for a branch library for Southeast Washington, and authorized the acceptance from the Carnegie Corporation of not less than \$50,000 for the erection of the building. An admirable site for the new branch has been bought at the intersection of Seventh and D Streets and South Carolina Avenue SE., just off Pennsylvania Avenue, one square west of the navy yard transfer point. The second branch will occupy a suitable room assigned for library uses in the new Eastern High School Building, now under construction, which is expected to be ready for occupancy in September when the branch will be opened.

With these additions in prospect the need of a larger staff and more appropriations becomes acute, and the Board of Trustees recommends to the Commissioners of the District the addition of ten new positions and increased salaries throughout the staff. The salaries as estimated conform to the classifications under the Smoot-Wood bill, and the allocations of employees to positions are approved by a representative of the Bureau of Efficiency.

Various makeshifts have been necessary during the year ending June 30 to cope with the increased circulation. The number of books loaned, 985,309, shows a gain of ten per cent over that for the preceding year, in spite of the dismissal from the public service of thousands of war workers and Government clerks, from which a decided decrease in library use was anticipated. The fourteen stations and eleven high schools and colleges circulated 88,415 volumes, an increase of 11,355. The circulation of 47,742 volumes from the Takoma Park branch showed an increase of 3,576 over the previous year and represented an average of fifteen books for each card holder. The salaries of seven extra assistants were paid from the desk fund, usually reserved for the purchase of books, and the central library has closed every Wednesday at 3 p. m. and every Saturday in summer at 1 p. m.

The children of Washington borrowed nearly half a million volumes during the year, of which 212,540 were taken from the collections in the schools, but the children's department has had to refuse a long list of requests, placing it in

"the embarrassing position of denying the book privileges which the best modern thought has long since agreed should be the right of tax-paying communities." There was a turnover of 150 per cent of assistants and pages in the department. The turnover in the entire staff of ninety-nine was forty per cent, an improvement, however, over the forty-nine per cent of 1920 and ninety-eight per cent of 1919.

During the year 15,132 books were purchased at an expenditure of \$17,670, an increase in expenditure over last year of \$511 and a decrease of 2,067 in the number of volumes purchased. The library had 232,921 volumes at the end of the year. The number of registered borrowers was 60,638. Total receipts were \$157,550 and expenditures \$156,919, of which \$108,075 went for salaries.

INDIANA

The statistical tables accompanying the report of the Public Library Commission of Indiana for the year ending September 30, 1921, show 207 cities and towns having tax-supported libraries and 14 other towns having association libraries. The first 207 libraries serve a town population of 1,602,009, and a rural population of 394,851. The association libraries serve a population of 9,306. The number of residents of Indiana having local library service is therefore 2,066,266, as compared with a population for the state of 2,930,390. Statistics of service, drawn from figures submitted by tax-supported public libraries, as the association reports were fragmentary, show 582,591 registered borrowers; 1,960,929 volumes on the shelves of public libraries, with about 732,156 volumes in 82 institution and college libraries; a circulation of 8,028,120 volumes; a total income of \$1,172,946; a book expenditure of \$195,828 and salary expenditure, exclusive of janitor service of \$477,636. Circulation and income figures do not include East Chicago or Michigan City, where figures could not be obtained.

Of the 207 tax-supported libraries, 77 are in towns of 3,000 population or over. Four such towns, Bicknell, Huntingburg, Jasonville, and West Terre Haute have no libraries. Nineteen more libraries are in towns between 2,000 and 3,000, and five more towns of this size are without libraries. One hundred and eleven towns with a population under 2,000 are supporting public libraries, usually in co-operation with the township government, and 55 of these libraries are in towns of less than 1,000 population. About 300 townships in the state co-operate in local library service. The 924,000 residents of the state without library service live in the other 700 townships. This is less than one-third of the actual state population, but more than two-thirds

of the rural population. Crawford, Dubois, and Pike counties have no public libraries within their borders.

Five new Carnegie library buildings were dedicated during the year, at Laporte, Lowell, Scottsburg, Syracuse, and New Carlisle. The libraries of Hebron, North Judson and Linden have buildings in course of erection. These are the last of the before-the-war donations. Three new tax-supported and four association libraries were reported. No new county libraries are recorded.

The Elkhart Library has installed for township service a library book wagon, and Rochester has ordered one for county work. Fort Wayne likewise has ordered a runabout for county station service. The book wagons now in operation are at Plainfield (1915), Gas City (1917), Logansport (1919), Noblesville (1920), and Elkhart (1921).

The public libraries of the state as a whole have recovered much of the ground lost because of curtailed appropriations two years ago when the State Tax Board trimmed all tax rates as authorized by the new tax law of 1919. There is still serious difficulty in some cases in obtaining adequate appropriations from township advisory boards, who cling to the low rate fixed by the 1919 slashes and refuse to raise it the penny or two which would make possible real extension service.

The 1921 session of the general assembly reamended the 1919 act already once amended by a 1920 special session. Under the law as it now stands, rates fixed by town and city library boards are to stand unless formally protested by ten taxpayers. In case of such protest filed with the county auditor, the State Board of Tax Commissioners holds a hearing on the rate as levied and decides whether it shall stand or be reduced. Of the 206 tax-supported libraries, only four had their levies protested and of these the East Chicago library had its original rate upheld. In Evansville, where the rate was cut 13 per cent last year, it was again cut 25 per cent this fall. As Evansville acts as a central library for all the communities of southwestern Indiana and is constantly called on for help by individuals and club groups from towns where the library service is weak, the effect of the cut is widely felt. The Logansport-Cass County library, seriously crippled by the rate-slashing of two years ago, levied eight cents in town and four in the county last year to make up its deficiency, and in consequence had a margin which the board planned to spend for new stacks and more assistance, levying for the coming year only six cents in town and three cents in county. A faction antagonistic to the school board, of which

the Logansport library is in charge, protested all school levies, and a compromise was effected whereby the rates were reduced to 4½ cents in town and 2½ cents in the county. The North Manchester library suffered most severely, with its rate of eight cents flatly cut in two, leaving \$2,300 with which to provide 2,700 people with service for two years, altho Chester Township will pay the library about \$1,100 each year in addition for rural service.

The Commission did its work on an appropriation of \$12,500, unchanged since 1913, till the 1920 special session of the legislature gave it a supplementary \$1,000. After it was demonstrated to the Legislative Investigating Committee and Governor McCray that this was still far from adequate, a supplemental appropriation of \$5,000 was allowed for the fiscal year just closed and \$21,250 for each of the two ensuing years, enabling the Commission to strengthen its staff and to undertake for the new year the work with High School libraries which its means had not permitted before. The Staff made 284 visits during the fiscal year to 185 public libraries. The Traveling Library Department circulated 30,235 volumes. For books and periodicals \$3,410 was expended, and \$9,373 for salaries.

MISSOURI

St. Louis. The \$642,000 given in our November 1st issue as the income of the St. Louis Public Library includes an unexpended balance of \$244,280. This balance does not indicate that the library is not spending its income. It simply means that the taxes all come in during the last month or two of the year and that a great part of the income must be held for use during the year.

WASHINGTON

Seattle. The close of the third decade in the history of the Seattle Public Library furnishes Librarian Judson T. Jennings an appropriate occasion for the ten-year survey undertaken in the report of the library for 1920.

In that period the population of Seattle increased from 237,194 to 315,652; the number of volumes in the library from 128,309 to 335,509; the number of borrowers from 41,963 to 80,481, and the annual circulation of books from 649,611 to 1,828,496. The circulation per capita is now 5.79. The library has nine branches as opposed to six in 1910, all of them housed in buildings belonging to the city.

Departments and features of work organized or greatly developed in the last decade include the municipal reference division, technology division, schools division, work with foreign born, and high school libraries. The reference

department has grown to the point where six telephones are needed to meet demands.

In 1910 the receipts from the city were \$146,538, in 1920 \$277,676, while salaries increased from \$62,275 to \$192,740, an increase of 209 per cent. The average salary was \$662 in 1910 and \$1219 in 1920, an increase of 84 per cent. The staff, numbering 94 in 1910, included 158 people in 1920, of whom 75 full and part-time assistants are engaged in operating the nine branches and thirty-nine deposit stations. The total juvenile circulation for the year was 691,996, an increase of 92,374 over the previous year. In 64 schools 468 lessons in the use of the library have been given to 6,455 children.

The Youngstown plan of home reading for school credit has been adopted in nineteen schools representing different sections of the city. Pupils who read eight books from the class room library during the school year, and report upon these books to their grade teachers, receive school credit for their reading and a "School Reading Certificate" presented by the Public Library.

The total foreign circulation of the library system was 15,781, and reports from main library and branches show that of the foreign collections French was the most read. German was second, Dano-Norwegian third, and Swedish fourth, with Russian, Italian, Spanish and Finnish following. The library's directory of leaders among foreign groups has grown during 1920 to 552 names, representing 24 nationalities.

The extra-mural activities of the library included service to rural districts, to merchant vessels, and public health hospitals. In the early spring the Library Board approved a plan for a parcel post service to non-resident borrowers, who pay the non-resident fee of one dollar. It is evident to the library from the numbers and kinds of requests received that if the question of county library service could be submitted to the rural districts there would be but one decision. In response to 116 requests 214 titles were sent from the beginning of the service in March until the end of the year. Acting as the Seattle representative for the A. L. A. the library placed small libraries totaling 10,520 books and 4,654 magazines aboard 134 ships plying out of Seattle. Practical books dealing with the sailor's work aboard ship or with the requirements of the special position towards which he is working are furnished, as well as fiction and general literature. Books have been placed on the U. S. Revenue Cutters and Coast and Geodetic Survey vessels going to Alaska, with the request that they be turned over to the people in isolated places. The Public Health hospitals at Port Townsend and Tacoma were also equipped with libraries for the use of the men.

THE 1922 EDITION of the
**AMERICAN
NEWSPAPER ANNUAL
AND DIRECTORY**

Is Ready for Delivery

The present volume contains all the old features and some new ones. There are 97 specially engraved Maps and 332 lists of different classes of publications. Gazetteer information has been recently revised. Populations are from the recent Census.

A Feature of
Special Interest to Librarians

is an Alphabetical Index to about 6000 Class and Trade publications, Magazines, Reviews, etc.

The price is \$15.00, carriage paid in the United States and Canada. An early order gives longest service of the book. Because of the resulting saving in accounting and correspondence we thank the patrons who enclose check with their order.

PHILADELPHIA PENNSYLVANIA

CURRENT LIBRARY LITERATURE

The Bibliographical Institute of Czechoslovakia has issued a bibliographical catalog of periodical publications received during 1920.

Elizabeth Kemper Adams in her book "Woman Professional Workers," Macmillan, 1921, \$2.50, has a chapter on Library and Museum Services.

In the December *Wisconsin Library Bulletin* Mary E. Hazeltine presents "Some Material to Use in Recruiting." This is not merely a list but an annotated summary of recent literature on this subject in books and periodicals.

The second part of Adelaide R. Hasse's "Index of Economic Material in Documents of the States of the United States: Pennsylvania 1790-1904," is now ready. This part covers F-Railroads and is publication No. 85 (Pennsylvania) of the Carnegie Institution of Washington.

Up to date information on geographical subjects is rare, the best sources are government reports from the councils. There have recently been published by the Department of Overseas Trade of the English Government reports on the Canary Islands, dated March, 1921, and illustrated by a clear sketch map of the Canary Archipelago. The price is about 25 cents. It is purchasable thru H. M.'s Stationery Office, London.

Joseph Pennell, in his latest volume, "The Graphic Arts," a stenographic report of his Scammon Lectures at the Art Institute of Chicago, gives *inter alia* the substance of the interesting talk on "Illustrators, past and present," which he delivered several years ago before the District of Columbia Library Association and also at the Atlantic City meeting of 1919. Many of the slides which he used on those occasions are represented among the illustrations in the volume which has been published by the University of Chicago Press.

The Czechoslovak Bibliographical Institute is about to start a weekly bibliographical list of books, pamphlets, music and maps appearing in the Republic. The first number will be issued in January, 1922, and will be sent in exchange to all bibliographical and library periodicals wishing to have it. The glossary of terms used in the catalog and the other items needed for the use of entries will be explained in both Czech and French. The yearly subscription price for America will be about \$2.50.

In order to facilitate the filing and binding of the *Weekly News Release*, the Polish Bureau of Information will, at the end of each month, beginning January, 1922, reprint fully, in the same order and under the same dates, the material appearing in the weekly issues. These reprints will be in the form of pamphlets, copies of which will be sent to libraries now receiving the *Release* and to other organizations or individuals requesting them.

In the *Scientific American* for November, Howard F. Leach, reference librarian of Princeton University, explains the title-a-line slugs used for keeping the catalog up to date in that library. Each book in the library has one linotype slug containing space for one hundred letters which permit of an entry for the author with his initials, short title, place, date and library call number. Using this title-a-line slug minimizes the danger of misprints thru loss of portions of the entry. After the classified list has been printed the slugs are rearranged for the author catalog.

The 'Liste de nouvelles acquisitions, 1921' published by the Bibliothèques municipales de Paris contains an introduction by M. Coyecque, inspector of libraries of the city of Paris, entitled 'L'oeuvre Américaine de la lecture publique en France.' It is a description of the library service of the American Committee for devastated France, and of the inauguration of the library at Soissons. It includes the address delivered on that occasion by Dr. Carlton, at that time director of the American Library in Paris, together with a report of the work of the American Committee, prepared by Miss Jessie Carson.

The catalog of the Musée Céramique de Sèvres published by Henri Laurans, Paris, France, is inexpensive and may be of service to many librarians. This well known collection of pottery contains specimens of almost all the known porcelains to which this catalog is an excellent guide. Over and above the list of specimens arranged by the places of origin there are given tables of the marks used by the potters of Delft, a history of the Sèvres Pottery, a chronological list of the marks used at Sèvres, an alphabetical list giving the monograms of the artists who work there, also classified catalog of the library marks of foreign potters, a good index and a series of twenty-four plates showing the most valuable specimens in the museum.

Library Demand for Technical Books

From the Toledo Blade:

"The striking demand at the public library is for books on trade, business, technology and all informational subjects rather than for literature, and it comes from the men who do the work."

Miss Marion F. Dutcher, Librarian,
Poughkeepsie:

"There has been a great and widespread awakening of interest in technical and scientific books. I do not know just what has caused this, unless it be that the public is realizing that in order to keep pace with the developments in the fields of science and industry one must read text books along these lines."

Franklin F. Hopper, in N. Y. Evening
Post:

"The result of the war work of the American Library Association is very apparent to-day. Men who had never before cared to do much reading found a decided solace in the books supplied by the A. L. A. When the men returned home they kept up the habit. Books on technical subjects, especially engineering, are in great demand by ex-service men. The need for taking their places again in the industrial world, and the realization that men scientifically trained have the best chance has caused the demand.

"Unemployment has also been a strong factor in the increased circulation of books. Men and women out of work find more time on their hands for reading. Many of them read technical books in the hope that new avenues of employment will be opened to them. The persons who are employed part of the time give their spare time to reading."

You Will Have Calls for These Timely Books

AMERICA and the BALANCE SHEET of EUROPE

By *John F. Bass*, for 25 years a representative of the American press in all parts of the world, and *Harold G. Moulton*, Associate Professor of Political Economy, University of Chicago.

A vital message to every man and woman concerned with the prosperity of America—a bold and unbiased statement of the *truth* of the present world situation and the radical measures that must be taken to protect the world's economic structure—a work that will be talked of for months to come.

Not A Dry Economic Treatise—But Clear and Startling Answers to Such Questions as:

Must War Debts be Cancelled?

Why is the Prosperity of Every Section of the United States dependent upon the Prosperity of Europe?

Are England and France Working at Cross Purposes?

This remarkable volume is being widely reviewed, advertised, and discussed. Just published, 361 pages, cloth binding, \$3.00.

AMERICA vs. EUROPE in INDUSTRY

By *Dwight T. Farnham*, Vice-President, C. E. Knoepfel Company.

A vivid comparison of American and European manufacturing methods developed during and since the war, showing how England, France, Italy and Germany are preparing to give us a stiff fight for the world's trade. Every manufacturer and business man is vitally interested in the fact brought out in this work that Europe is now adopting our policy of mass production, which, with her cheap labor, will put her on an advantageous competitive basis. Copiously illustrated with photographs and diagrams. Just published, 492 pages, cloth binding, \$4.00.

Send for these books. If within thirty days you feel that they will not be of value to your library they may be returned without obligation. Regular library discount applies.

Russian Festivals and Costumes for Pageant and Dance

CHALIF'S new book, will be a welcome addition to the art shelves of every library. The art student, the pageant builder, the costume designer—if his subject be Russian—will find his needs all met within its covers.

A Wealth of Pictures

On 130 of its pages, beautiful examples of Russian peasant art in costume, embroideries, furnishings and architecture are displayed.

Descriptions

In well condensed text are clear descriptions of the picturesque religious and secular festivals of old Russia. The long-drawn-out wedding celebrations are minutely pictured, and the tenderly quaint Christmas feast which awaits the rising of the "Star."

A Suggestion and an Invitation

HOW MAY WE REACH THE PEOPLE who are really interested in publications which have to do with social betterment? Do you realize what a problem it is to get such information over and will you help?

THE PUBLICATIONS OF THE FOUNDATION represent original research and an unbiased interpretation of conditions of life, labor, and education in the United States, and the utmost care is given to their preparation and publication. Some of them have been reprinted several times. Social Diagnosis is now in its seventh printing (thirteenth thousand), Goldmark's *Fatigue and Efficiency* in its sixth printing, and Gulick and Ayres' *Medical Inspection of Schools* in its fifth printing.

THESE ARE BOOKS WHICH SHOULD MAKE IT POSSIBLE for people everywhere to do their work better and more efficiently, and yet relatively few who would be helped by such publications ever hear of them. Will you help in extending their field of usefulness?

REMEMBER THAT THESE BOOKS ARE NOT ISSUED FOR PROFIT,—few if any even pay for the cost of publication,—but are part of an educational program. We are merely anxious to get the information which they contain before a larger number of people.

OVER 600 INDIVIDUALS AND LIBRARIES have directed the Foundation to send one copy of all books and pamphlets as issued, an arrangement which is called the standing order. The average cost for this service is about \$8 a year, payable in small amounts as the publications are sent, or, as many prefer, once in six months, when a semi-annual statement is mailed to all. We want to double that number. Why not let us add the name of your library?

WE HAVE BEEN TRYING TO THINK OF SOME WAY to make this invitation mean more to you, and the suggestion has come to us from an old subscriber that we make it easier for those who want to buy the earlier publications. Several, in entering their requests for standing orders, have asked that all these earlier publications be sent, a complete set of the Russell Sage Foundation books being in itself a good working library in applied sociology. At present this means forty-seven books, the value of which amounts to \$75.50.

TO ALL ORDERING THE COMPLETE SET in connection with their standing order we will supply the full forty-seven volumes for \$50 (list price, \$75.50). This is an unusual opportunity, for libraries especially, to get a full set of Russell Sage Foundation books at a price which will never be made again. Send for complete catalogue of publications.

Books of Beauty

Volumes of Real Worth Appealing Both to the Artist and to the Layman

INTERIORS and FURNITURE

16th Century fireplace by Rovezzano

OF THE ITALIAN RENAISSANCE

By Frieda Schottmuller

This exquisite volume, so entirely suited to gift purposes with its 588 beautiful half-tone illustrations, delightfully portrays the interiors and furniture of the Italian Renaissance.

A book sure to be permanently prized by artist, interior decorator, collector, and all who are seeking to achieve atmosphere in the home or who merely love beauty for beauty's sake. A unique book, unsurpassed in its class. Quarto. \$10.00

THE ARCHITECTURE AND INDUSTRIAL ARTS OF SPAIN

By August L. Mayer

A complete discussion accompanied by 310 most unusual illustrations. There is explanatory text with each picture besides the scholarly foreword and introduction by the author. \$7.50

DOCUMENTS OF ART

This truly marvelous series of superlatively beautiful volumes accurately reproduces the priceless treasures of the Louvre Museum of Industrial Art. The volumes now on hand are:
French Furniture, Louis XIV and XV . . . \$6.75
French Furniture, Louis XVI . . . \$6.75
Chairs by the Jacobs Brothers . . . \$6.75

(Directory and Consulate Periods)

Beauvais Tapestries . . . \$11.25
Alhambra of Granada (Outside the Series) \$6.00

PICTURESQUE SPAIN

Over 300 beautiful photographs in rotogravure with adequate explanatory text. An unusually fine architectural document.

Quarto. \$4.50

MEXICAN ART

by Walter Lehmann

A complete discussion with ample illustrations accompanying the text. \$1.25

VISION AND DESIGN

by Roger Fry

The first collection of Mr. Fry's writings on art to be published. With many beautiful full page plates. Octavo. \$7.50

CLASSICS IN ART

New editions of this justly famous series with many additional illustrations.

The volumes contain from 200 to 500 illustrations from the work of the artist in question. Incomparable in beauty and worth.

- Correggio \$5.00
- Donatello 6.00
- Fra Angelico 6.00
- Murillo 6.00
- Raffael 6.00
- Titian 6.00
- Holbein 6.00
- Velasquez 6.00
- Durer 9.00
- Rembrandt 10.00
- Michelangelo 5.00
- Rubens 10.00

THE KINGDOM OF THE PEARL

Illustrated in full color by Edmund Dulac

A sumptuous volume dealing with the pearl from every conceivable point of view; nature, origin, history, treatment, and disposal. Illustrated with color inserts worthy of framing. Limited art edition. \$10.00

Old French Nursery Songs Old English Nursery Songs

Two delightful volumes including all the best old songs set to appropriate music. Each \$2.50

Fifty Figure and Character Dances for Schools

by E. T. Bell

Indispensable for all teachers of rhythmic dancing. Diagrams and music for every dance. 2 volumes. \$8.00

to Librarians and
Library Purchasing
Committees*

Fourth Revised Edition

Books For The Young

WHAT OTHERS SAY—

"It is a fine piece of work and very cleverly gotten up."

"I have looked over your new catalog very carefully and find it to be a most excellent one."

"I shall find it very helpful in suggesting books to the various grades for reading."

"It is a real tool for librarians and teachers."

"I believe that its new features, the use of the Dewey Decimal classification, and the complete annotation, are very useful additions."

"You are to be complimented on having issued a carefully classified and properly graded list which should be extremely helpful to educators, librarians and parents in making selections for young readers."

"It is surely the most convenient and comprehensive one of its kind that I have ever seen."

"This strikes me as being the best of its kind that I have ever seen."

"Your booklet is attractive and it has interested me. It is a mighty good piece of catalog making."

"I want to congratulate you on making the most comprehensive, attractive and useful list of books for younger readers classified under the various headings that I know of."

"We like the appearance and make-up of your catalog very much."

"Very complete descriptive catalogue, gotten up in very good shape."

NEW BOOKS FOR OLD

One expensive picture book will do the work of two or three if worn-out copies are rehabilitated in our Children's Scrapbooks. Price 17c up. Write us or see catalog No. 24 for particulars.

GAYLORD BROS., Syracuse, N. Y.

HAVE YOU THESE BOOKS

A SHORT HISTORY OF JAPAN. By Ernest W. Clement.

Because of the intense interest in the present political situation in the Far East this short readable history makes a wide appeal to readers and travelers. \$1.50, postpaid \$1.60.

LINGUISTIC CHANGE: An introduction to the Historical Study of Language. By Edgar H. Sturtevant.

Sufficiently free from technical terms and symbols to appeal to all educated people. Most examples are taken from English, while Latin, French, and German are cited more frequently than any other foreign languages. \$1.00, postpaid \$1.10.

UNPOPULAR GOVERNMENT IN THE UNITED STATES. By Albert M. Kales.

An illuminating study of our state and municipal governments, their clumsy complexity, and the opportunity they offer to unprincipled "politocrats." The author makes a plea for reforms, especially for the short ballot. Every library should have this book. \$1.50, postpaid \$1.65.

GENERAL PSYCHOLOGY. By Walter S. Hunter.

A survey of psychology with the emphasis upon the concrete experimental facts. Much attention is given to the description of experimental methods and results. \$2.00, postpaid \$2.15.

FOOD POISONING. By Edwin Oakes Jordan.

An interesting and authoritative presentation of the results of a thorough investigation into the extent of food poisoning, articles of food most commonly connected with food poisoning, and the prevention of food poisoning. \$1.25, postpaid \$1.35.

Purchase direct or from your dealer.

THE UNIVERSITY OF CHICAGO PRESS
5866 ELLIS AVENUE CHICAGO, ILLINOIS

The STEREOGRAPH puts one into that same intimate touch with the interesting places and peoples of the world as does actual travel; in other words, "What the telephone does for the ear the stereograph does for the eye."

Very attractive hand-painted sets on Wild Flowers, Birds and Costumes have recently been added to our material especially adapted for library use.

A busy, happy corner in the Public Library, Ft. Wayne, Indiana.

Scenes similar to this take place daily in libraries throughout the country.

SNEAD STANDARD STACK

This view shows a portable ledge shelf which can be attached to any one of the adjustable shelves to provide a convenient place for consulting books.

It also shows a book support for the "Open Bar" shelf. A downward projecting \perp shaped key, fitting between any two bars forms a lock when books are pressed against the top of the support.

The SNEAD STANDARD STACK equipment has been worked out in its smallest details to give satisfaction and is the preferred equipment for both large and small libraries.

Detailed illustrations of construction and plans of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific construction.

The Function of the Public Library in a Democracy*

By JOHN J. TIGERT,
U. S. Commissioner of Education

IT is meet that at the outset of my address I should offer my hearty congratulations to this community upon the semi-centennial celebration of the opening of your public library which has enjoyed such remarkable growth in size and service during these fifty years. I must hasten likewise to acknowledge the privileged pleasure and unusual honor which have come to me with the invitation to speak on this significant occasion. Nevertheless, I feel that the responsibility, commensurate with the honor and the task which I have, is by no means a light one. You have gathered together after fifty years of constantly increasing service from your great library not alone to contemplate the splendid achievement of the past but to catch an inspiration and a vision of the wider usefulness that this very useful public institution is destined to render in the years that are to come.

It occurs to me that some one might have been selected who could have discharged this duty more satisfactorily than I. And yet, when I contemplate the close relation that exists between the public school and the public library in the American republic, I must confess that you have a right to expect deep concern from me for a gathering of this kind. Would that my ability to meet the exigencies of this hour were equal to my interest and the importance which I attach to the occasion and to all that pertains to the cause of libraries generally.

When one considers education in its broad and proper connotation, in its effort to produce intelligent, right-minded and right-acting citizens, one cannot fail to see that the library is as truly educational as the school and to recognize in the library which is free and public an agency which aids, supplements, and extends the work of the public schools.

* Address at Fiftieth Anniversary Celebration of the Grand Rapids (Mich.) Public Library.

No greater evidence or argument could be offered for the kinship of the school and the library in our educational program than the active participation of all my illustrious predecessors, the Federal Commissioners of Education, in library work, conferences, and movements.

Henry Barnard, the first of my six predecessors, was no more a school man than a library man, and was one of the first men in America to appreciate the place of the library in a country whose government was entrusted to its people. He saw that in a country like ours the library, the public library if you please, was just as fundamental to the success of our representative government as our great system of free schools. Steiner in his life of Barnard says:

“Barnard thoroly appreciated the importance of public libraries. The earliest library connected with a common school in Connecticut, selected in reference to teachers and pupils as well as to the graduates of the school, was founded by him. The first legislation suggested on the subject was that proposed in his report for 1839 and embodied in the bill he then introduced, in which a tax for library purposes was provided. He offered to give a certain number of books for a library in any district which should build a schoolhouse of which he approved. In an elevated strain he asked:

“Who can estimate the healthful stimulus which would be communicated to the youthful mind of the State, the discoveries which genius would make of its own wondrous powers, the vicious habits reclaimed or guarded against, the light which would be thrown over the various pursuits of society, the blessings and advantages which would be carried to the fireside and the workshops, the business and the bosoms of men, by the establishment of well-selected libraries, adapted not only to the older children in schools, but to the adults of both sexes, and embracing works on agriculture, manufactures, and the various employments of life?

“In 1841, Barnard praised New York’s school library system. He regretted that Connecticut had none, and recommended that a traveling library be placed in each school society, the books being contained in as many cases as there were school districts, and each case being allowed to remain six months in every district in turn; ‘at least they are the cooperators with parents, in

this work of educating the rising generation to take the place of that which is passing off the stage."

In 1853, Barnard attended the first convention of librarians in the United States which assembled at New York City. At that time, fourteen years before he became United States Commissioner of Education, he was superintendent of common schools of Connecticut. From this convention no permanent organization of librarians developed but it was the seed from which grew another conference at Philadelphia in 1876 which resulted in the organization of the American Library Association. Henry Barnard was one of those who took part in this conference. It is true, therefore, and quite appropriate that the first titular head of the American public school system was at the same time a father of library organization and development in America. Dr. Barnard at the advanced age of eighty-two was still active in the library cause for at that age he attended the meeting of the A. L. A. which was held during the World's Fair at Chicago in 1893. He made an address at this meeting and became an honorary member of the Association. This was fifty-four years after his agitation for a tax to support libraries in Connecticut and forty years after the first national convention he attended in New York.

General John Eaton, the second Commissioner of Education, endorsed the call for the Philadelphia library conference in 1876 and vigorously supported the enterprise, especially by the publication and distribution of his epoch-making report on "Public Libraries in the United States of America; their History, Condition and Management." Eaton was one of the original associate editors of the LIBRARY JOURNAL established in 1876, the year of the Philadelphia Convention.

Colonel N. H. R. Dawson, the third Commissioner of Education, showed great appreciation of the value of the vast collection of educational volumes contained in the Bureau of Education library and was keenly alert to the service of libraries throuth the country and in particular, public libraries.

Doctor W. T. Harris, the fourth Commissioner of Education, whose learning and scholarship added prestige to the office in the Nation and in Europe, was naturally a steadfast lover of books and libraries. Like his predecessor, he was one of the original associate editors of the LIBRARY JOURNAL and devised a system of classification for library books which was based upon Bacon's classification of knowledge. The system is said to have worked well in the St. Louis Public Library in which city Doctor Harris was superintendent of schools. Doctor Harris addressed the A. L. A. at its meeting in 1890 at the Fabyan

House in the White Mountains, New Hampshire, on the subject "The Function of the Library and the School in Education."

Doctors E. E. Brown and P. P. Claxton, my immediate predecessors, both of whom are still active in educational work at the head of great universities, were deeply interested in libraries. Dr. Brown in the preface of his book "The Making of Our Middle Schools," says: "At twenty libraries, east and west, I have received numberless courtesies, which have aroused in me the highest admiration for the New American Librarian—both type and individual." Dr. Brown called a trained man from the Library of Congress to reorganize the library of the Bureau of Education, delivered an address before the District of Columbia Library Association in 1910 and otherwise manifested strong interest in library work. Doctor Claxton was particularly interested in the extension of reading facilities to rural communities especially by means of the county library system. He made frequent addresses to library associations including a great address to the American Library Association, in Washington in 1914, on the subject "Libraries for Rural Communities."

I have sketched at considerable length the activities of my predecessors in behalf of libraries because I feel it is a most convincing proof of the correlation of school and library in the common task of educating our citizenship which must participate intelligently in the affairs of a representative republic. Should the present Commissioner of Education fail to see, as all of his predecessors have seen so clearly, that the library and the school are vitally and essentially connected in effective public education, he would misinterpret, confuse, and dishonor the office to which he has been called and would become an ignoble apostate from the succession of great men who have preceded him.

The school and the library, the teacher and the librarian, have come to occupy in these latter days a closer association of effort than was the case in the past. To-morrow, they will be still more closely drawn together. In the past, the teacher depended relatively more upon the influence of the home for co-operation than upon any of the community organizations. And while teachers of to-day still look largely to the assistance of the home and we have our parent-teacher associations, which are quite helpful, yet community organizations, of which the library is one of the most important, are playing a relatively larger part all the while in education. There was a time when families gathered frequently around the fireside or on the porch in summer to spend long evenings, in discussion, in reading, and intercourse. This was the rule even in my

boy-hood days but I know few families where this is practiced today. I can remember when all teachers insisted upon much study at home and evenings were consumed in preparing lessons for the next day. In these days many teachers request that there be no studying at home. With the coming of the motion picture, the automobile, and many other allurements of a progressive age, the old family circle which formerly gathered so regularly has been effectively broken and the young and even the old, tho less frequently, now wander by night away from the ancient domestic moorings. Consequently, the theater, the club, the library, the community center or other community organizations are relatively more and more influencing the growth, character and education of our young people and are usurping to a larger degree influence formerly exerted in the home. Some who have noted this tendency, are inclined to think that with this apparent disintegration of the home influences our American ideal of life is likely to be shattered and that our civilization, nation, and society are doomed to premature decay. While I regret the passing of the old American home yet I doubt if the old times will ever come again. The present tendency is an inevitable result of changing conditions in the world. The world is shrinking continuously all the while. It took Andrew Jackson thirty days to reach Washington from his home in Nashville, Tennessee. Today, he could reach Australia in that time by boat and in much less time by airplane. The world cannot stand still and times must change. My friend, Dr. A. E. Winship, of Boston, pointing to the fact that all wooden clocks are always just twenty minutes past eight deplores the fact that there are people who never change and who obstruct all progress. Their fathers were twenty minutes past eight, they are twenty minutes past eight, and they expect their children to be twenty minutes past eight.

We cannot stay the hands of progress and we must move with the times. Therefore, it seems to me that we cannot stop the drift of influence from the home to the community, but we must realize that the shrinking of the world makes the community as small as the home once was and the duty of all who are interested in making good citizens for our country is to unite in making the community as safe, as inspiring, and as instructive as was the old American home.

In the community of the future, the library will have a far greater part in this broad educational program than it has played in the past. In the short time that libraries have existed in America, they have come to exercise a totally different function from the libraries of the old world. Just as institutions of learning are dedi-

cated both to the discovery of new knowledge and the dissemination of things already well known, so libraries are useful both to those who are already learned in some field of knowledge and who are searching for more light in some special investigation and likewise are equally useful for the information of those who may know little or nothing about any subject. The library of the old world is a place for research and is frequented by the scholar, the scientist and the special investigator. The library of America is a place for popular enlightenment, entertainment, and improvement and is used by all classes of citizens.

Hugo Münsterberg, the late Professor of Psychology of Harvard University, but a native of Germany, in his book on "The Americans" makes the distinction between European and American libraries quite clear. Says he: "The American's fondness for reading finds clearest expression in the growth of libraries, and in few matters of civilization is America so well fitted to teach the Old World a lesson. Europe has many large and ancient collections of books, and Germany more than all the rest; but they serve only one single purpose, that of scientific investigation; they are the laboratories of research."

After pointing out that a type of library quite similar to the European exists in America, chiefly in connection with our universities, he passes on to remark: "The great difference between Europe and America begins with the libraries which are not learned, but which are designed to serve popular education. The American public library which is not for science, but for education, is to the European counterpart as the Pullman express train to the village post-chaise."

When we consider that these sentiments emanate from one who was as much European as American—some considered him even more so—then we can feel that it is not simply a vain-glorious boast of an ever proud American but a careful and true estimate of the relative value and service of our libraries as compared to those of the old country. Let it not be supposed that we have discovered the great value of books and libraries in the American Republic for the first time in history. Far from it. Collections of written characters have been our chief medium for the transmission and preservation of knowledge for more than two thousand years, in fact, such collections are as old as civilization itself. The great library of the Assyrian monarch Assurbanipal, the Greek Sardanapulus, discovered at Ninevah in 1850, consisting of cuneiform characters preserved upon tablets of clay, made it possible for us to know the literature and the learning of the ancient East better than we know the history of Greece in the time of Pericles.

Greek writings were placed upon more perishable materials. The vast library collected by Aristotle, after various vicissitudes, among which was burial to escape the cupidity of the Kings of Pergamum, was finally carried by Sulla, the Roman conqueror, to Rome and there dissipated. Likewise, the great libraries of Alexandria after preserving to the world for centuries the glory of science, literature and knowledge which abounded under the Ptolemies disappeared amid frequent invasions of ancient Egypt. Like the Greek collections they were preserved upon papyrus which finally yielded to the destruction of fire and man. Julius Cæsar is supposed to have been responsible for the loss of the greatest of the Alexandrian libraries.

Of course, the invention of printing by Gutenberg or some one else in modern times—Mr. Edison seems to have created some doubt about the inventor during a recent interrogatory mood—marked the most significant step in the enlargement of the value of books. With that day, which is as memorable as any in the world's history, a dissemination of knowledge became possible which was hitherto undreamed.

Before the invention of printing in the modern sense, it is doubtful if a democracy such as England, France, or the United States could have existed even tho statesmen had been wise enough to establish one because of the inability to disseminate a sufficient amount of knowledge among such large masses of people as would enable them to participate intelligently in their own public affairs.

Incomparably, the library will perform the greatest service it has yet rendered to civilization in the democracies of the future. It is already rendering a greater service in America today than has ever been the case elsewhere, but there is abundant room for a larger scope of usefulness in the future. It is commonly supposed that our public school system is reaching out and giving equal opportunity for education to all, but any school man knows how wide of the truth is this supposition. Likewise, many suppose that practically all Americans have equal opportunities for access to free books. This of course is as ridiculous as the other supposition. The latest enumeration of public libraries made by the Bureau of Education in 1915, including the Library of Congress but excluding university libraries, gave a total of 89,763,884 volumes. Making liberal allowance for the university libraries and growth of public libraries in the last six years, we are safe in saying that there is less than one book in our public and cognate libraries per capita for our entire population. Likewise, there are many counties in many States where there are no public libraries and

millions of our citizens have no access to free books. There were actually adult citizens in the United States who did not know that there was a World War until it was over. As long as such conditions exist, democracy cannot be safe in the United States.

Some of my audience may be thinking that these conditions are not relevant to the improvement and expansion of your library in Grand Rapids. I am aware that Grand Rapids is possessed of an exceptionally fine library even for a city of much greater size. Authorities such as Dr. Putnam of the Library of Congress, and Mr. Bowker, editor of the LIBRARY JOURNAL, and others have spoken to me in the highest terms of the ability of your librarian.

A survey of the public schools of Grand Rapids, made by the School of Education of the University of Chicago, in 1916, emphasizes how effectively the public library of the city serves the schools thru its system of branches in school buildings which I understand are open also to the public generally. You have had here for many years an excellent system of placing deposit and branch libraries in all of the school buildings except certain very small buildings which have the privilege of the traveling libraries.

Doubtless many of you remember an exhibit poster of the Grand Rapids Better Homes Exposition, held in December 1917.

"The Grand Rapids Public Library is the Property of All The People of the City.

"Over 325,000 books and pamphlets.

"Over 1,000 current magazines are kept for the special use of the 1,200,000 people (over ten times the population of the city) who enter its doors every year for profitable study and recreation. Thru its many branches the library enters more homes than any other public institution except the water works."

I am deeply interested in the problem of Americanizing the unassimilated elements in our heterogeneous population. We have two great tasks at this point, first somehow to enable our native-born citizens to appreciate the contributions which have been made by our foreign-born and those of foreign-lineage to our literature, our art, our science and our industry; secondly, to make it possible for those of alien extraction to understand American government, laws, and ideals. Such a program is almost imperative in a large industrial center such as Grand Rapids. Your library has performed well this task and has exerted a wholesome influence in both directions. I understand that your library possesses an unusually large number of books and periodicals in foreign languages. I hope that this important phase of library service will re-

ceive even greater support and encouragement in the times that are ahead of you.

The school, even when free thru high school and practically free to the completion of the college course, cannot reach the majority of our citizens. It is the great office of the public library to reach the minds of all who can read and infuse into these minds uplifting and informing material. I spoke of the encroachment of the institutions of the community upon the influence of the home.

The library along with the church and the school, is the only institution in the community which cannot be abused or made nocuous to community welfare. The theatre, the club, and other institutions may sometimes be put to uses which are harmful. Not so with the library.

Tho the library cannot easily be a liability to the community, yet it requires the utmost skill to make it highly helpful. That is why we hear so much of the profession of the modern librarian. The present-day librarian cannot be content to minister only to those who come voluntarily but must devise methods to reach the whole community and interest all classes of people in the joy, companionship and love of books. He must make all men realize the truth of Dr. Johnson's aphorism on books "They help us to enjoy life or teach us to endure it." This is the reason that library publicity and advertising methods have become a well developed art in recent years. The modern public library is thus an active and not merely a passive educational agency. The great problem of modern librarianship is to reach those folks who are not now using the books. Few library plants are used up to their full capacity. Another great problem is to induce the readers to read the books that they are not reading. By the proper selection of books for the schools and the proper selection—to a limited extent and by consummate skill—of the books for his readers, the modern librarian exercises a censorship and a direction of taste in reading which makes him a teacher in the truest sense of the term.

I remember when I was a boy in the adolescent age, I devoured the works of G. A. Henty as fast as they came out, which was about the speed of blocks coming out of a mill, "The Tiger of Mysore," "With Lee in Virginia," "With Clive in India," etc., etc. They were the delight of many a boy in my day and were only procurable on a long waiting list at the library. I remember that a man for whom I have great respect suggested that after reading certain numbers of these historical novels I would do well to turn to the perusal of a real history. This I did. The first history I read, Parkman's "Montcalm and Wolfe" was a great labor and I went

back with avidity to read my pro rata of Henty. I continued to read the histories at intervals. Today no reading is so refreshing or enjoyable to me as history and I scarcely ever turn to a novel. The man who influenced me to begin reading history when I was lost in fleeting books of the hour had an effect upon my education as far-reaching as any of my teachers. The librarian's task is perplexing, difficult and baffling but it gives at the same time abundant opportunity for developing citizenship, shaping character and forming habits. I need not take up the large place that the library is now occupying in activities not connected with books and reading, such as lectures, musicales and exhibits of various kinds.

These are purely American tendencies and I am told are frowned upon by English and European librarians. They are but an earnest of the greater role which the American public library is destined to play in the life of the Republic.

The John Newbery Medal

AT the next A. L. A. conference the Children's Librarians' Section will make the first award of the John Newbery medal, which is to be given annually to the author, who, during the previous calendar year, has produced the most distinguished book for children.

This award is the result of a plan which was outlined to the Section at the Swampscott meeting last year by Frederic G. Melcher in an address on Children's Book Week.

Much stimulus to literature and appropriate recognition of good work is accomplished in various literary fields thru annual rewards, yet no group or institution has yet planned for any proper recognition of the writer for children; and it was Mr. Melcher's thought that no group could so appropriately make such an award as the Children's Librarians' Section. He offered to see that a medal for annual presentation should be provided and to turn this over to the Section to award by such method as was deemed best.

In suggesting that this be called the "John Newbery Medal," Mr. Melcher pointed out that John Newbery, that famous old London bookseller and publisher of the eighteenth century, was perhaps the first to recognize that children have special reading interests of their own, and he it was who arranged for Oliver Goldsmith to write "Goody Two Shoes."

The Children's Librarians' Section accepted the offer at the Swampscott meeting, and authorized its officers to work out a plan for determining the book whose author was to be honored. In accordance with the plan of the Com-

mittee all librarians interested are invited to send nominations to cover the calendar year of 1921 to the Chairman of the Children's Librarians' Section, Clara W. Hunt, superintendent of the Children's Department of the Brooklyn Public Library.

In sending nominations, librarians should bear in mind the following conditions: the book must be written by an author who is a citizen or resident of the United States. It must be first published in book form between January 1st and December 31st, 1921. Reprints and compilations are not eligible.

All nominations must be in not later than March 1st, 1922. No announcements of the result will be made until the time of the conference next June.

Salary Reclassification Legislation

IT was hoped and expected that salary reclassification legislation would be enacted at the special session of Congress. That was not accomplished. Just before the Christmas holidays, however, the House passed the Lehlbach reclassification bill (H.R.8928). The circumstances of its passage have given those to be affected by it hope that this or some modification of it will be passed by the Senate. Against the determined opposition of a non-partisan minority which materialized in only sixty-five votes in the negative, Representative Lehlbach, ably supported by Representative Black of Texas piloted the bill thru the House in such fashion as to secure high praise from the older Congressional leaders. Nearly all of the strongest men of both parties supported the bill and proclaimed that the legislation was long over due.

In its passage through the House the bill was only slightly modified. Unfortunately, however, the salary schedule was scaled down about 10 per cent from the bill as introduced. The following figures give a comparison of the bill as introduced and as it passed.

Grades	Original	As-Passed
Sub Professional		
2	1080-1320	1080-1260
3	1440-1800	1320-1680
Professional		
1 (Jun. prof.)	1800-2160	1620-1980
2 (Asst. ")	2390-2880	2100-2640
3 (Assoc. ")	3120-3840	2820-3540
4 (Full ")	4140-5040	3720-4620
5 (Senior ")	5400-6000	4860-5460
6 (Chief ")	6000-7200	5400-6600

Although the professional men and women of the government service deplore this cutting down of salaries yet they welcome the forward step of the bill toward passage, hoping that when it finally becomes law, and times become

somewhat more normal the salary schedules can be brought up to the basis previously agreed upon as fair and reasonable.

The House bill is now before the Senate Committee on Civil Service, which also has the Sterling bill (S.13), which differs slightly in administrative features from the Lehlbach bill, and the salary features of which have not yet been given out. It is expected that the Senate Committee will soon report out a bill. Its chairman, Senator Sterling, is a strong man; witness his success two years ago in securing the passage of the civil retirement bill, another piece of constructive legislation long needed. With the thought that the successful passage of this legislation, which will improve library salaries in the federal and District of Columbia libraries in Washington will suggest improvement in library salaries elsewhere, librarians with votes and their trustees are urged to write in support of reclassification legislation to their own Senators and also to Honorable Thomas Sterling, Chairman of the Senate Committee on Civil Service and to his colleagues on that committee: Senators Cummins (Iowa), Colt (R. I.), Ball (Del.), Nicholson (Colo.), Stanfield (Oreg.), Bursum (N. Mex.), McKellar (Tenn.), Ransdell (La.), Heflin (Ala.) and Watson (Ga.)

Librarians interested in this matter are referred to my previous articles on this subject in the LIBRARY JOURNAL, the last of which appeared in the number of May 15, 1921, and also especially to Dr. W. Dawson Johnston's article on "Standardization of the Federal Library Service" in the LIBRARY JOURNAL for November 1, 1921. Dr. Johnston discusses all of the various pending reclassification bills.

G. F. BOWERMAN.

Free to the First Four Applicants

The Denver Public Library has four complete duplicate sets of the Western History of Hubert Howe Bancroft, which will be given to the first four libraries applying. These books are in good condition and bear no library marks. Libraries wishing the gift must pay expenses of transportation and minimum packing charges.

CHALMERS HADLEY, *Librarian*,

Charles Cestre, professor at the University of Paris and one of the directors of the American Library in Paris, is soon to come to this country to give the George Slocum Bennett lectures at Wesleyan University and a course at the University of Wisconsin.

Copyright Legislation*

By M. LLEWELLYN RANEY

IN America copyright legislation is older than the Republic. It is specifically authorized in the federal Constitution of 1787, as follows:

"ART. I, SEC. 8—The Congress shall have power: To promote the progress of science and useful arts, by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries."

Before that, each of the thirteen original States, except Delaware, had enacted a copyright law, between 1783 and 1786. Since then there has been a steady stream of bills and acts, from the First Congress down. Their scope has ever broadened, and the author been more and more fortified in his right.

Yet there remains a question, and a grave one, for it involves the nation's good name. We have protected our own writers, but have been slow to recognize the foreigner. For a century, he could not secure United States copyright at all, unless he came here to reside. Even now there are such barriers that it is rarely sought.

Under this stigma, high-minded men, in and out of Congress, have always smarted, and from Henry Clay to Grover Cleveland diligently sought its effacement. More than a half century, however, had to pass before the scoring of even partial success.

It was always the printers who blocked the way.

In length in 1891, a so-called International Copyright Act did pass, but, while ostensibly removing the restrictions against foreigners, it provided that the typesetting and lithography must be done in the United States. And in the revision of 1909 the same manufacturing clause, with binding added, was retained, except that books in languages other than English were exempted.

This discrimination bars us from the International Copyright Union, founded at Berne in 1886. Its basic principle is that a single grant of copyright has validity, without further formality, thruout the Union.

But a new situation has now arisen. Since less than one per cent of the English books published are also copyrighted in the United States, the Typothetae have announced their consent to the repeal of the obnoxious clause (tho at the same time they demand a higher tariff.)

The Authors' League of America set at once about preparing the necessary amendments for clearing the way to Berne. But at the moment of consummation the publishers passed official resolutions that their approval would be given only on condition,

"That during the existence of the American copyright in any book, work of art, or musical composition, the importation into the United States shall be prohibited, unless such importation is made with the consent of the proprietor of the American copyright."

Since then their position has been somewhat modified, according to Mr. R. R. Bowker, who reports now their willingness to have institutions and individuals import, for use and not for sale, single copies of

"any book as published in the country of origin with the authorization of the author, or copyright proprietor . . . provided the publisher of the American edition of such book has (within ten days after written demand) declined or neglected to agree to supply such copy."

The effect of either text would be that the order for such a book must be given to the American publisher. To qualify as American publisher he need not have had the remotest connection with the actual issue of the work. He may merely engage a territory, then register and deposit a copy in Washington. In such instance he is in reality only a jobber, but one with a monopoly, and the libraries must pay his price.

What that price (sans competition) might be, past experience has taught us only too well, since, despite the fair charges of many dealers for their English stocks, certain important international publishers (maugre competition) have been found to list such books of theirs at prices from sixty per cent to one hundred and sixty-five per cent advance over London's.

How many of these contracts between European publishers and American dealers would be struck, one person's guess is as good as another's. So far as the proposed law is concerned, all foreign publications might be so handled. Certainly the books of assured sale would be shining marks for profiteering, because of the depreciation of foreign currency.

This is not the publishers' first attempt. They tried it in 1909. A strenuous campaign, in Congressional hearings and out, was conducted for five years, but they lost. In 1891, they came near taking the libraries in their sleep, and might have succeeded but for the Senate's timely awakening. Senator Sherman sounded the alarm in a speech delivered February 9, and others followed, with the result that when the bill came to conference March 3, it was amended so as to insure to libraries the continuance of unhampered importation.

The publishers' account of this momentous decision is that thereby the United States swerved from its own, and the world's, consistent copyright practice; that Congress, while then granting the right as usual, introduced at the same time such exceptions as to vitiate its value and so to violate its principle.

* Summary of argument presented at the meeting of the A. L. A. Council at Chicago, December 29, 1921.

This calls for an examination of (1) American practice, (2) European practice, (3) the nature of copyright.

AMERICAN PRACTICE

Prior to 1891, our enactments, in the respect here considered, all followed that of 1790. The ultimate bill whence sprang this Act was introduced by a Representative from Connecticut. Connecticut was the first of the original States to legislate on copyright. Here is the way this parent Act of January 1783 defined infringement:

"If any person or persons within the said term of fourteen years as aforesaid, shall presume to print or reprint any such book, pamphlet, map, or chart within this State, or to import or introduce into this State *for sale*, any copies thereof, reprinted beyond the limits of this State, or shall knowingly publish, vend and utter, or distribute the same without the consent of the proprietor thereof in writing, signed in the presence of two credible witnesses, every such person or persons shall forfeit" etc.

The prohibition is against importation *for sale*. Similarly spoke eight more of the twelve colonies legislating.

Of the other three, the Maryland Act of April 21, 1783 is typical:

"If any other person . . . shall print, reprint, import or bring into the State, or cause to be printed, reprinted, imported or brought into the State, any such book . . . without the consent of the proprietor . . . or knowing the same to be so printed, reprinted, imported or brought into the State, without the consent of the proprietors, shall sell, publish, or expose to sale, any such book . . . without . . . consent . . . such offender . . . shall forfeit,' etc.

The first Federal Act, May 31, 1790, follows the second, or more general form. In all cases, it is to be remembered, these pronouncements concern only works by authors resident in the United States.

Now that the Connecticut and Maryland forms were not regarded by Congress as contradictory is clearly indicated in the text of the second Federal Act on copyright, April 29, 1802, supplementary to the first, "and extending the *benefits thereof* to the arts of designing, engraving, and etching historical and other prints," as stated in the title. Now these benefits are secured by calling it an infringement "if any print-seller or other person . . . shall engrave, etch or work . . . or copy or sell, or cause to be engraved, etched, copied or sold . . . or shall print, reprint, or *import for sale*, or cause to be printed, reprinted, or *imported for sale*, any such print . . . without . . . consent," etc.

The founders of American practice forbade the importation of an American author's book, if *for sale*, and freely allowed the importation of a foreign author's works (unless here resident), even going so far as to deny him copyright. By implication, they allowed importa-

tion of any book, if *for use*, but this has never been tested in court.

FOREIGN PRACTICE

Nor abroad does this point appear ever to have been under judicial review, according to the statement of foreign statute law (and commentaries) presented by request at the joint session of the Senate and House Committees on Patents, March 29, 1908, by the Librarian of Congress.

The British law of 1911 provides that "Copyright in a work shall also be deemed to be infringed by any person who . . . (d) *imports for sale or hire* into any part of His Majesty's dominions to which this Act extends, any work which to his knowledge infringes copyright or would infringe copyright if it had been made in His Majesty's dominions."

If it be claimed that this is not specific, we then must fall back upon the Acts of 1842 and 1844. The former prohibited importation for sale or hire of foreign reprints of British works. The latter (not repealing this) prohibited all importation save from country of origin. In both instances, of course, we are here dealing with prints authorized, but imported without consent. These Acts came to court in 1896, and while importation of foreign books *for use* was not in issue, it was remarked upon and apparently by all four judges in the two courts regarded as implicit in both Acts.

Canada allows libraries, etc. to import the English original. The individual must get his thru the Canadian licensee, who, however, must charge at the English price.

Belgium penalizes only the importation of the illicit edition for a commercial purpose, not one for private use.

So Germany, by the law of 1870, tho the present statutes omit the limitation. The best commentators, however, regard the privilege as still existent.

The law of other countries is not explicit, and the authorities are, accordingly, divided, or uncertain.

For us, British practice outweighs all else. As to whether an Englishman can import an American author's book copyrighted on both sides, here is the opinion of the long-time Secretary of the English Authors' League:

"In answer to your questions, there is nothing whatever, so far as I can see, to prevent the importation into England of copies of the American edition, whatever price the American edition may have been published at. . . . The remedy would be, of course, a remedy *under the contract* in the courts, and *not under any statute*."

THE NATURE OF COPYRIGHT

Copyright is not an inherent, but a conferred right. Its terms are fixed by the law. There are other rights, with which it must dovetail. Its boundaries are subject to adjustment from

time to time, from country to country. The Legislature may restrict in any direction. The restriction, if placed, is imposed with the idea of a larger good to be gained. The assign, the publisher, buys the author's product with full knowledge of these restrictions, and barter accordingly.

Copyright, as any other investiture, has a purpose. That purpose, in the words of the Constitution is "to promote the progress of science and useful arts." To such promotion, the restriction on the right may be as potent as the exercise of its residue. Thus, Congress has never allowed American publishers to corner European publications as against educational foundations, tho to the author, whom alone the Constitution would reward, such importation is not a lost sale, and, since for use, it breaks no seller's sealed area. Similarly, when Education returns to port, no duty is laid; at home, her domicile is free of tax. She comes to the author's market and pays his price, but she will not pay a publisher-jobber, no matter what his livery, for admittance at her own gates.

We offer, therefore, the following resolutions:

Whereas, The Authors' League of America proposes national legislation, including repeal of the so-called "manufacturing clause" in the present copyright law, in order to pave the way

for the United States' entry into the International Copyright Union; and

Whereas, The American Publishers' Copyright League (now the Bureau of Copyright of the National Association of Book Publishers) went on official record at its last session as supporting such legislation only on condition that libraries and persons be prohibited by law from importing the foreign (tho authorized) editions of works copyrighted also in the United States, except by permission of the American copyright owners;

Be it resolved, That the Council of the American Library Association records its pleasure at the prospect of authors' securing, without expense or formality, the international protection that is their admitted right;

Resolved, further, That the Council reaffirm, however, the Association's wanted disapproval of any measure that would curtail or cancel the existing privileges of importation, supported, as they are, by American precedent and violative neither of the Federal Constitution nor of foreign practice;

Resolved, That the Committee on Book Buying and that on Federal and State Relations be and are hereby instructed to take every proper and feasible measure toward rendering these resolutions as effective as possible.

Some Features of the Copyright Bill

By FREDERIC G. MELCHER

THE bill to amend the American copyright law, which is to be presented to Congress in January, has the approval of the authors, the printers, the publishers, and independent authorities on copyright. It has not been agreed upon by reason of any "bargain driven," but because these groups and individuals believe in its soundness and justice. It has had the advantage in its drafting of the wisdom and experience of Eric Schuler, secretary of the Authors' League, of R. R. Bowker, the deepest student of copyright in this country, of George Haven Putnam, secretary of the Bureau of Copyright, of Thorvald Solberg, Register of Copyright at Washington.

Except as to one feature, it seems to have the approval of those librarians who have studied it, and, as this feature has already had the approval of Dr. Röthlisberger, Secretary of the Berne Convention, the leading authority in the world on copyright, it may be assumed that it

is not out of accord with good principles of copyright and of abstract justice.

The bill provides that copyright protection in the United States shall be granted to authors of all countries within the Berne Convention from the moment their books are published in their own countries. American books must be deposited and registered at Washington after publication, and books from foreign countries need not be deposited. If any American house arranges to publish in this country a book of foreign origin, it deposits and registers as for an American book. Foreign editions of books by American authors can only be brought into this country with the consent of the American owner of copyright. Books of foreign authorship for which there is an American publisher can only be brought in by a library or by an individual thru the agency of the owner of the American copyright, tho probably ninety per cent of the books of foreign origin are never published in this country and would therefore be ordered direct.

* Remarks made at the A. L. A. Council Meeting at Chicago, December 30th, 1921.

The libraries have not objected to the provision which keeps foreign editions of six or seven thousand American books completely out of this market, but object only to the provision which, while not keeping out the competitive editions of the six or seven hundred English books for which American market has been arranged, makes it necessary to order these thru the American publisher who has contracted for this market. The authors believe that such provision is just, because it is decidedly to their advantage to be able to sell their rights territorially, just as they have the right to sell dramatic, movie and serial rights separately; the printers think it just, because they are giving up a good deal in withdrawing their opposition to the manufacturing clause, and tariff gives them no protection in the case of libraries; the American publishers believe it just, because, having undertaken by contract with the foreign authors to promote their books here, and having invested time and money in this undertaking, they believe they should have the full responsibility for the field, or at least enjoy the courtesy of having their very obvious property rights admitted, by having orders for the foreign edition placed thru their houses. It seems equally probable that the American public will gain by such a policy, as the book of foreign origin, English, Canadian, Continental or what not, which has a real value will get a better hearing in this country backed by an American publisher who has been able to contract for the same full American rights as he would be able to get for a book of American authorship.

Dr. Raney has said that this measure is "a distinctly selfish proposal," that the publisher is trying to reap where he has not sown," and yet the most competent and unbiased of all authorities on copyright, Dr. Röthlisberger, said in November:

"When an American publisher becomes owner of the copyright (under the present American law) he does not in consequence possess an exclusive right to the home market. Importations can be made behind his back and against his wishes of copies of the European edition.

"Now, the American publishers who have been complaining for a long time of these importation privileges have no intention of asking that there be an absolute stop put to them, if anyone prefers to own the overseas editions, but they realize that they should have control of this traffic and that it should pass thru their hands. In this they do not feel they are demanding anything unfair or unreasonable, since the English publishers having the rights to a work are invested with the exclusive right to that publication in their own territory and can also

prevent the entrance into their country of foreign editions of the work, for instance, Tauchnitz continental editions.

"The claim of the American publishers amounts to this: they demand the effective exercise of 'the right of publication territorially shared.' We have suggested the same solution to the Canadian legislature in our comment on the new Canadian law, as the best means of safeguarding the Colonial edition against the importation of competing editions, and what would be just in this case must be conceded equally when it is a matter of the American publishers, namely, the supervision by them of their own market whenever they have obtained from the author the right to publish an edition from overseas."

Text of the Copyright Bill

THE following are the essential features of the amendatory copyright bill:

SEC. 5. "That on and after the date of the President's proclamation foreign authors, not residents of the United States, who are citizens or subjects of any country which is a member of the International Copyright Union, or whose books are first published in and enjoy copyright protection in any country which is a member of the Copyright Union, shall have within the United States the same rights and remedies in regard to their works, thereafter first published, which citizens of the United States possess under the copyright laws of the United States, and the enjoyment and the exercise by such foreign authors, not residents of the United States, of the rights and remedies accorded by the copyright laws of the United States shall not be subject to any formalities, and they shall not be required to comply with the provisions of the copyright laws of the United States as to notice of copyright, or deposit of copies, and registration:

Provided, however, That any rights accorded by the copyright laws of the United States now in force or hereafter enacted shall extend to such foreign authors only when the foreign state or nation of which they are citizens or subjects grants similar rights either by treaty, convention, agreement, or law, to citizens of the United States, and the duration of the protection for such rights in the United States shall not exceed the term of protection granted in the country of which such foreign author is a citizen or subject or in the country within the Union in which such author's book was first published; and no right or remedy given pursuant to this Act shall prejudice lawful acts heretofore done within the United States or rights in copies heretofore

lawfully made in the United States prior to such date."

SEC. 6. That during the existence of the American copyright in any book the importation into the United States of any copies thereof shall be, and is hereby, prohibited, except with the assent of the proprietor of the American copyright subsequent to the registration of American publication and the deposit in the Copyright Office at Washington, District of Columbia, of two copies of any such book:

Provided, however, That, except as regards piratical copies, such prohibition shall not apply:

(a) To any book as published in the country of origin with the authorization of the author or copyright proprietor, when imported, not more than one copy at one time, for individual use and not for sale, or when imported, for use and not for sale, not more than one copy in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary, philosophical, scientific, or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school or seminary of learning, or for any State, school, college, university or free public library in the United States, provided the publisher of the American edition of such book has (within ten days after written demand) declined or neglected to agree to supply the copy demanded;

(b) To books which form parts of libraries or collections purchased *en bloc* for the use of societies, institutions, or libraries designated in the foregoing paragraph, or form parts of the libraries or personal baggage belonging to persons or families arriving from foreign countries and are not intended for sale;

(c) To works in raised characters for the use of the blind;

(d) To works imported by the authority or for the use of the United States;

(e) To the authorized edition of a book in a foreign language or languages of which only a translation into English has been published in this country;

(f) To a foreign newspaper or magazine, altho containing matter copyright in the United States printed or reprinted by authority of the copyright proprietor, unless such newspaper or magazine contains also copyright matter printed or reprinted without such authorization:

Provided, That copies imported as above may not lawfully be used in any way to violate the rights of the proprietor of the American copyright protection secured by this Act, and such unlawful use shall be deemed an infringement of the copyright.

Books Popular in December

BOOKS most in demand at the public libraries in December, according to the February *Bookman*, were:

GENERAL LITERATURE

The Outline of History. H. G. Wells. Macmillan.
Queen Victoria. Lytton Strachey. Harcourt.
The Mirrors of Washington. Anonymous. Putnam.
The Mirrors of Downing Street. Anonymous. Putnam.
The Americanization of Edward Bok. Edward Bok. Scribner.
The Glass of Fashion. Anonymous. Putnam.

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown.
Main Street. Sinclair Lewis. Harcourt.
Her Father's Daughter. Gene Stratton-Porter. Doubleday.
Helen of the Old House. Harold Bell Wright. Appleton.
The Brimming Cup. Dorothy Canfield. Harcourt.
The Pride of Palomar. Peter B. Kyne. Cosmopolitan.

Best sellers during December, according to reports made by fifty-nine booksellers in forty-five cities for the February *Books of the Month*, were:

GENERAL LITERATURE

The Outline of History. H. G. Wells. Macmillan.
The Mirrors of Washington. Anonymous. Putnam.
The Mirrors of Downing Street. Anonymous. Putnam.
Queen Victoria. Lytton Strachey. Harcourt.
The Americanization of Edward Bok. Edward Bok. Scribner.
My Brother Theodore Roosevelt. Corinne Roosevelt Robinson. Scribner.

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown.
Her Father's Daughter. Gene Stratton-Porter. Doubleday.
Helen of the Old House. Harold Bell Wright. Appleton.
The Pride of Palomar. Peter B. Kyne. Cosmopolitan.
The Sheik. Edith M. Hull. Small.
The Flaming Forest. James Oliver Curwood. Cosmopolitan.

The Director of the American Library in Paris reports the recent export of the following French libraries to the United States: that of l'Abbé Thédenat of the Institut relating to epigraphy, and that of Professor Viollet of the Ecole des Chartes relating to law to Harvard; that of Professor Jacques Flach of the Institut relating to Medieval France, and that of Abbé Lejay of the Institut relating to the Greek and Latin classics, to the University of Missouri; the Bord Collection on the French Revolution to Princeton; the Esmein law collection to Yale, that of M. Lantilhac relating to the theatre to Leland Stanford, that of M. Bruel relating to the middle ages to the University of California, and that of M. Struel relating to the 16th Century to Dartmouth.

Copyright

THE copyright question is up again. For the generation arriving in the last decade and a half, here is copyright in a nutshell, so far as it must concern librarians.

On this score, the United States is in an unseemly position before the world. Save Russia, ours is the only nation of first rank that remains outside the International Copyright Union, established in 1886, at Berne. We are barred from this fellowship by the presence of certain clauses in our law which run counter to the basic principles of the Union. Chief of these is the requirement that an English work must be manufactured in the United States if it is to obtain copyright, whereas in the Union a single grant has universal validity, without any further formality.

Ugly as this discrimination against the British looks, the situation was once worse. From 1891 to 1909 the condition of American manufacture was writ against books in any language, while before 1891 the foreigner was denied copyright entirely unless he established residence here.

This condition of things was and is the work of the printers.

That high-minded men in and out of Congress have always smarted under this stigma and sought its effacement might go without saying. From Henry Clay to Grover Cleveland, appeal after appeal broke over the Senate and House, as popular impatience steadily rose. Now it was a petition from British authors like Thomas Moore, Thomas Campbell, Robert Southey, Bulwer-Lytton, Miss Edgeworth, the D'Israelis, Milman, Hallam, Miss Martineau and Thomas Carlyle. Again, the memorials would be headed by Irving, or Bryant, or Cooper, or Longfellow. Dickens' two visits were similarly capitalized, while the colleges and the press kept up a steady bombardment. At length came the concession of 1891, then that of 1909, and now another ripens. The hard bargain driven in those two years has not profited those who drove it, for piracy has fallen into disrepute and less than one per cent of English books secure American copyright under the handicap imposed.

At last the Typothetae offer to surrender the manufacturing clause (tho demanding a 50% tariff on all foreign books, as discussed in an earlier Bulletin). Here begins the second half of the story—which involves the publishers. They, too, the averse to this restriction, had a hand in the Acts of 1891 and 1909, and they intend to have a hand in the one now proposed. They have gone on official record as approving the said repeal, but with a proviso. The proviso is that when a book is copyrighted abroad and

here, it shall be unlawful for a person or a library to import the foreign (even tho the original and authorized) edition, except thru the American copyright holder (upon his terms).

This proviso the Council of the A. L. A. has voted unanimously to condemn, while hailing the prospect of entry into the family of nations. Such has been the Association's consistent position, and its adoption by Congress was no fluke, as a skilled opponent has been forced to admit. (*See L. J. v. 34, p. 94*). The reason is not far to seek. Such a clause tends to give American publishers a monopoly over new European publications to be sold here. When, despite competition, some of them list their English titles at from thirty to fifty cents a shilling, what might be expected with competition outlawed?

But does not copyright preclude competition? Has not the author's assign the right "to be protected under the law in the possession of that which he has purchased"?

Yes, copyright does mean right to all copies, except as limited by the law. It is not a natural, but a conferred right. There are others with which it must dovetail. Its boundaries are subject to adjustment from time to time, from country to country. The Legislature may restrict in any direction. The restriction, if placed, is imposed with the idea of a larger good to be gained. The assign, the publisher, buys the author's product with full knowledge of these restrictions, and barter accordingly.

Copyright, as any other investiture, has a purpose. That purpose, in the words of the Constitution, is "to promote the progress of science and useful arts." To such promotion, the restriction on the right may be as potent as the exercise of its residue. Thus, Congress has never allowed American publishers to corner European publications as against educational foundations, tho to the author, whom alone the Constitution would reward, such importation is not a lost sale, and, since for use, it breaks no seller's sealed area. Then, when Education returns to port, no duty is laid; at home, her domicile is free of tax. She comes to the author's market and pays his price, but she will not pay a publisher-jobber, no matter what his livery, for admittance at her own gates.

The proviso is rejected, impatient as we may be for the Union beyond.

Books by Twentieth Century American Poets

A LIST SELECTED BY THE POETRY SOCIETY OF AMERICA FROM PUBLICATIONS OF THE YEAR 1921.

THIS list continues the series prepared annually since 1914. The list of that year covered the ground from 1900 to 1913.

Aiken, Conrad. *Punch*. Knopf.

Allen, Hervey. *Wampum and old gold*. Yale. (Younger Poets.)

Bliss, Sylvia H. *Quests*. Montpelier, Vt.: The Capital Press.

B. 8266. *Penitentiary*. Tale of a walled town. Introduction by William Stanley Braithwaite. Lippincott.

Benét, Laura. *Fairy bread*. Thomas Seltzer.

Bynner, Witter. *Pins for wings*. Sunwise Turn.

Dalliba, Gerda. *Poems*. Introduction by Edwin Markham. Duffield.

Farrar, John. *Songs for parents*. Yale.

Fletcher, John Gould. *Breakers and granite*. Macmillan.

Gale, Zona. *The secret way*. Macmillan.

Garrison, Theodosia. *As the larks rise*. Putnam.

Gates, Ellen M. H. *The marble house*. Preface by Helen Granville-Barker. Putnam.

Griffith, William. *Candles in the sun*. The Bookfellows, Chicago.

Guiterman, Arthur. *A ballad maker's pack*. Harper.

Hall, Hazel. *Curtains*. Lane.

Hoyt, Henry M. *Dry-points*. Introduction by William Rose Benet. Frank Shay.

Johnson, Burges. *Youngsters*. Dutton.

Kilmer, Aline. *Vigils*. Doran.

Lowell, Amy. *Legends*. Houghton.

Lowell, Amy, and Florence Ayscough. *Fir flower tablets*. Houghton.

Mackaye, Percy. *Dogtown Common*. Macmillan Co.

Marks, Jeannette. *Willow pollen*. Four Seas.

Marquis, John. *Noah an' Jonah, an' Cap'n John Smith*. Appleton.

Masters, Edgar Lee. *The open sea*. Macmillan.

Millay, Edna St. Vincent. *Second April*. Mitchell Kennerley.

Mixer, Florence Kilpatrick. *Out of mist*. Boni and Liveright.

Morley, Christopher. *Chimney smoke*. Doran.

Morton, David. *Ships in harbour*. Putnam.

Norwood, Robert. *Bill Boram*. Doran.

O'Brien, Edward J. *Distant music*. Small, Maynard.

Oppenheim, James. *The mystic warrior*. Knopf.

Rice, Cale Young. *Sea poems*. Century.

Rittenhouse, Jessie. *The lifted cup*. Houghton.

Robinson, Corinne Roosevelt. *Collected poems*. Scribner.

Robinson, Edwin Arlington. *Collected poems*. Macmillan.

—Avon's harvest. Macmillan.

Sentner, David. *Cobblestones*. Winner of Knopf prize for Columbia students. Knopf.

Speyer, Leonora. *A canopic jar*. Dutton.

Taylor, Bert Leston. *A penny whistle*. Knopf.

Underwood, John Curtis. *The trail's end*. New Mexico: Mexican Pub. Corporation.

Untermeyer, Jean Starr. *Dreams out of darkness*. Huebsch.

Valentine, Benjamin B. *Ole marster*. Richmond, Va. Whittet & Shepperson.

Van Rensselaer, Mrs. Schuyler. *Many children*. Atlantic Monthly.

Wagstaff, Blanche Shoemaker. *Quiet waters*. Moffat, Yard.

Weaver, John V. A. *In American*. Knopf.

Widdemer, Margaret. *Cross-currents*. Harcourt.

Williams, Oscar. *Golden darkness*. Yale. (Younger Poets)

Wylie, Elinor. *Nets to catch the wind*. Harcourt.

ANTHOLOGIES

Botsford, Florence Hudson. *Folk songs of many peoples*. To music. Translations by American poets. The Woman's Press.

Braithwaite, William Stanley. *Magazine verse for 1921*. Small, Maynard.

Lomax, John A. *Songs of the cattle trail*. Macmillan.

Metcalf, John Calvin, and James Southall Wilson. *The enchanted years*. Harcourt.

Richards, Gertrude M. *Star-points*. Houghton.

Thorp, N. Howard. *Songs of the cowboys*. Houghton.

Trine, Grace Hyde. *Dreams and voices*. The Womans Press.

Untermeyer, Louis. *Modern American poets*. Revised edition. Harcourt.

Wilkinson, Marguerite. *New voices*. Enlarged edition. Macmillan.

ISABEL FISKE CONANT, *Chairman*.

Committee on Library Lists.

132 East 19th St., New York City.

How Do You Use Library Lists and Book Lists?

THE undersigned would be glad to have suggestions from every source on the use of book lists, whether publishers' lists or A. L. A. lists, or weekly, monthly, or quarterly lists published by various libraries. I do not believe that most of us do justice to these, but hints from various sources as to how they are best used might form the basis for an article that would be appreciated by many librarians.

G. W. LEE, *Librarian*, Stone & Webster, Inc.,

147 Milk Street, Boston, Mass.

Semi-Centenary of the Grand Rapids Public Library

ON January 12 the Grand Rapids Public Library commemorated the 50th anniversary of the opening of the Library to the public. The celebration date did not fall on the exact date of the 50th anniversary, for that fell on December 21. On account of the Christmas holidays and the engagements of Commissioner Tigert, the principal speaker, the celebration was held on the date referred to above.

In preparation of the celebration a small number of invitations were sent to persons formerly connected with the administration of the Library, former members of the Library Board, and of the Library Committee, representatives of the city government, and educational and other institutions.

In addition to this a four-page leaflet was printed calling attention to the anniversary with a brief history of the Library and its work and development.

All of these things attracted public attention and the newspapers gave a great deal of space to the Library and its anniversary. The daily papers all had editorials with reference to the work of a library and its place in a community.

The program was attractively printed in two colors by the pupils of the Printing Department of the Grand Rapids Vocational School.

The last page of the program contained the chronology of the Library:

1835 Organization of the East Side School District, which under the State Constitution received its share of penal fine monies for its Library.

1837-38 Organization of the West Side (Union) School District, which also received penal fine monies for its Library.

1848 Organization of the Clodbrook School District.

1858 Meeting of citizens in Luce's Hall for organizing a citizens' library movement, known as the Grand Rapids Library Association.

1861 Transfer of books of the Grand Rapids Library Association to the East Side School District Library.

1869 Organization of the (Ladies') City Library Association.

1871 (March 15) Passage of act of Legislature (immediately effective) consolidating the three school districts within the city into one district coterminous with the city, thus consolidating their libraries into one library. . . . After the passage of this act, the books belonging to the City Library Association and the Y. M. C. A. were turned over to the Public Library, thus uniting all the library resources of the city, for a short time with joint management and support. The books of the City Library Association were afterwards withdrawn.

1871 (December 21) Opening of the consolidated libraries for public use.

1903 Passage of an act of the Legislature creating the Board of Library Commissioners for the management of the Library, the title to the property remaining, however, with the Board of Education.

1904 Opening of the Ryerson Library Building, the gift to his native city by Martin A. Ryerson, of Chicago.

Two other functions had their place in the day's celebration: the President of the Library Board gave a luncheon in honor of Commissioner Tigert, at which there were present the Mayor, the President of the Board of Education, members of the Library Board, and a number of librarians and library trustees from other cities; and the members of the Staff gave a supper in the Ryerson Library building in honor of the former staff members who were in the city. There were present twenty-seven guests and forty-five staff members. In order that all members of the staff might attend the evening exercises all the branch libraries closed at 7 o'clock and the Ryerson library building at 7.30.

The celebration was very much worth while, for it presented to the community not only the past of the Library, but also some of its present and future problems. No event in the 50 years of its history has received so much public interest, except the dedication of the Ryerson Library building in 1904.

I can recommend most heartily to all libraries the desirability of observing occasions of this kind, for presenting the library and its work to the community. There is no reason why the Library should not celebrate the twenty-fifth, fiftieth, seventy-fifth and hundredth anniversaries as individuals and other institutions do: in other words, bring the past, present, and future of the Library before the community in a constructive way.

SAMUEL H. RANCK, *Librarian.*

Replacement of Worn Pages of Poole's Index

THE New York Public Library has made photostat reproductions of the first 27 pages of the 1891 revision of Poole's Index, and is ready to supply photostat positives of any of these pages at the rate of twenty cents a page, plus postage.

In most libraries these preliminary pages are thumbled to pieces or so begrimed as to be practically illegible. This reproduction affords to libraries an opportunity to replace individual pages or to secure the whole of the preliminary matter in form for binding as a separate pamphlet.

The preface takes up pages i-xii; the list of co-operating libraries is given on page xiii; a list of abbreviations, titles and imprints is given on pages xiv-xix; a chronological conspectus of the serials indexed is on xx-xxvii.

Co-operative Printing of Analyticals*

THE Committee on Printing of Analytical Entries appointed last year, consisting of Dr. Andrews, Mr. Merrill and myself, has held several meetings and carried on considerable correspondence during the year. Dr. Andrews also had an interview with Dr. Putnam in Washington in the latter part of May. The result of this meeting is best shown by a letter from Dr. Putnam to Dr. Andrews, dated June 4th, and two memoranda from Mr. Hastings accompanying same. The gist of Mr. Hastings' memoranda is that the printing of analytical cards covered by other co-operative undertakings, *e.g.*, the H. W. Wilson Company, is not a paying venture. Further, the experience of the Card Division does not seem to warrant the printing and distribution of only a portion of the analyticals representing a given series or serial. Most libraries evidently prefer to order only complete sets. He makes the following proposition with reference to series submitted by our Committee, as follows:

"1. That positive, advance subscriptions to the entire sets at the present L. C. rates (.025 for 1st cards; .013 for second cards) with current cards in continuation, be secured amounting to fifty copies of each card in the case of series that are in the Library of Congress, and amounting to 100 cards in the case of series that are not in the Library of Congress.

"2. That L. C. reserves the right to decline to print in a particular case, if on detailed examination of the set it proves to be impracticable or undesirable to analyze it.

"In regard to the latter condition, I may say that it seems necessary to include it because there are a few series in their list that it seems to me impracticable to analyze, *e.g.*, Arundel Club publications, Palaeographical Society facsimiles, Smithsonian Astrophysical Observatory Annals."

In the second memorandum, he gives further reasons why the Library of Congress has to proceed slowly in extending its analytical entries.

Mr. Hastings submitted with his memoranda, certain lists of series and serials, three copies of which were sent to Dr. Andrews. On the basis of a recent comparison of these lists with that compiled by the Committee, I have noted the following points:

(1) Mr. Hastings' first list, covering series already analyzed by the Library of Congress,

containing about seventy-five titles, naturally does not affect the list compiled by the Committee. I have noticed three duplications, the titles of which have been erased on the list of the Committee. The items contained are of great importance, and I assume that most university and reference librarians are already subscribing for these cards, or will do so in the future.

(2) Mr. Hastings' second list, covering series that will be analyzed by the Library of Congress, containing fourteen titles, duplicates only two of those on the list of the Committee. The publications noted are of importance, and we shall all welcome the entries.

(3) Mr. Hastings' third list, on series in L. C. for which copy may be printed if subscriptions are obtained for fifty cards, contains one hundred and three titles. Here I find thirty-four series recommended by your Committee. This is therefore the list which affects us most immediately. It is for us to secure the majority of the fifty subscriptions asked for. True, there are some entries on the list which are of far greater importance for public than for university and reference libraries, and we must look to the public libraries to support the venture as far as these titles are concerned. I believe that any library which has one of the publications contained on this list should be glad to receive the analyticals, at any rate, in so far as the publications consist of series of monographs.

It is now a little over twenty-two years since the printing of catalog cards by the Library of Congress reached a point where it seemed possible to begin distribution to other libraries. The particular phase of this distribution which interests us today, *viz.*, analytical entries for sets of monographs, appealed to some of us then as a very definite and distinct service, likely to find favor with many libraries. Those of us who had had experience in cataloging could look back at weeks of protracted and continuous effort in writing author and subject cards for the various monographs in such series as the Camden Society publications, the Johns Hopkins University studies, Schmoller's *Staats und Socialwissenschaftliche Forschungen*, etc. The results of this work lay buried in some manuscript catalog, and had to be repeated in each and every institution which owned the set in question. It was therefore with great satisfaction that we saw the records of sets fully or partly analyzed accumulate from year to year. By the end of 1910, this record had reached three thousand items or series,

* Report of the Committee on Printing of Analytical Entries presented at the meeting of University Librarians of the Middle West at Chicago. December 31, 1921.

and I understand that it now numbers considerably over four thousand. Besides, many of the sets not fully analyzed at the outset have now been completed. It is hardly necessary to emphasize here that a set on which, in the 90's it was necessary to spend from two to three weeks, can now be completed in one day, and with better results than under the old system. When, therefore, one reads of Mr. Hastings' memoranda which clearly indicate lack of appreciation and support on the part of some libraries even in America, we wonder why this should be so. Is it possible that some libraries still adhere to the old laborious method of the 90's, or do they merely make a series card for the catalog and omit the author and subject cards for some of the most important books which they have on their shelves? It seems almost incredible that any university, reference or college library of standing should neglect to profit by the liberal offer of the Library of Congress to supply printed entries.

Some of the series or serials listed by the Library of Congress may not be represented in as many as fifty or one hundred American Libraries. In that case we must look to the future, to new libraries to be organized, or small libraries growing into large institutions, or perhaps better, to co-operation by foreign libraries. Card catalogs of standard size have been gaining ground in Scandinavian countries, the new Baltic States, Russia, Czecho-Slovakia and Germany, less rapidly in Great Britain, France, Spain and Italy. It would be a great pity should the work done by the Library of Congress have to be duplicated in all these countries. At any rate, one country—true, only a small one (Norway)—has seen the light. Its Library Association, realizing the importance of international co-operation, has practically adopted the Anglo-American rules and standard-sized cards. It is even considering plans of translating the Library of Congress list of subject headings. The Baltic States are working in the same direction. It may not be for this body to take action, but we can at any rate refer the matter under consideration to the A. L. A. Committee on International Co-operation.

Finally, more definite co-operation between the Library of Congress and the H. W. Wilson Company might be recommended. In 1899, the Library of Congress decided to leave the analytical cataloging of periodicals to the A. L. A. Publishing Board and restricted its own cards to books and monographs in series. It would seem reasonable that the H. W. Wilson Company and the Library of Congress should get together on some similar division of the field. Mr. Hastings complains that the Wilson lists are cutting

the ground from under the card distribution in certain subjects, that in Agriculture, for instance, it has already been necessary for the Card Division to "scrap many thousand cards."

The Committee then submits the following recommendations:

A. That the institutions represented here examine the list submitted with a view: (1) To ascertaining which of the publications are on their shelves, or likely to be in the near future; (2) Whether the publications are of such a character that they would care to have them analyzed; (3) Whether there are any series on the list for which they would be willing to furnish copy to the Library of Congress; (4) Suggest other series to be added to the list; (5) Report their findings to the present Committee or another similar committee to be appointed.

B. That the Committee examine the data thus obtained and formulate a report to the Librarian of Congress. On the basis of this report the Librarian of Congress should be in a position to report back to this body at next year's meeting, or possibly before.

If the librarians here represented will take action along the lines indicated, the Committee feels confident that at any rate some of the more important of the series listed will be added to the list of series for which analytical entries can now be purchased.

I have some copies of the list of series recommended by the Committee which I shall be glad to mail to libraries interested.

J. C. M. HANSON.

New York Special Libraries Association Employment Bureau

THE New York Special Libraries Association has, for several years, assisted its members and others interested in the special library field in securing positions in New York City. The Employment Bureau of the Y. W. C. A. Central Branch, 610 Lexington Avenue, has acted in this capacity for the local Association. Dorothy Wells, the director of the Employment Bureau, is a member of our Association and has taken personal charge of the placing of special librarians.

All employers needing librarians or assistants ought to place their requests with this Bureau, and any librarians desiring positions may register at any time. Membership of the New York Special Libraries Association is not required.

Miss Wells informs me that recently she has not had sufficient applicants to fill the positions open.

REBECCA B. RANKIN, *President*.

A. L. A. Work in 1921

IN 1921 the membership of the A. L. A. reached 5307. New members numbering 1178 joined and 335 were lost by death or by failure to renew membership. The net gain was 843.

The number of library workers in the United States and Canada who are not members is probably well over ten thousand, and less than one per cent of trustees are members.

The Conference of 1921 made a new record for attendance. The 1899 visitors are classified in the *Proceedings*: Trustees 62, commission workers 24, chief librarians 488, heads of departments and branch librarians 307, assistants 684, library school instructors 14, editors 7, commercial agents 78, miscellaneous 210. Of these the New England States sent 1,053, the North Atlantic 444, the South Atlantic 27, North Central 86,, South Central 27, Western 24, Pacific 17, Hawaii, Philippine Islands and Foreign 21.

The Annual Reports printed for the conference required 112 pages as compared with 32 pages for the 1920 Conference.

The *Employment Service* received requests for recommendations for all sorts of positions in great numbers. Children's librarians are still much in demand at salaries slightly higher than those of a year ago. Other demands are chiefly for people with general training, especially for small public libraries, at salaries averaging from \$1,500 to \$1,800. "Live" registrations continue to run from 150 to 250.

In *Recruiting for Librarianship* the work done by A. L. A. Headquarters and the A. L. A. Committee continues, and there are constant requests for the leaflets and placards, and many personal letters of inquiry.

A gratifying interest in the *Erection of Library Buildings* is indicated by the correspondence. An investigation made thru the library commissions shows a rather surprising amount of activity in this field. The Headquarters collection of building plans and pictures is being brought up to date and duplicate copies of some of the best plans are being made.

Inquiries on *Library Establishment* are received every few days. Most frequently these come from states in which there are no library commissions and require the sending of free publications and a careful, detailed letter of advice.

Requests for books from communities in the South and Southwest, and not infrequently from colleges and universities in foreign countries, are received with a frequency that is depressing in view of the fact that nothing can be done to meet the requests. The Headquarters

staff often wonders whether there are not libraries in the country which would perhaps be glad to assume a more or less definite responsibility to send occasional gifts of books which would be collected for the purpose from the library's patrons or drawn from the library's collection of duplicates.

Altho it was hoped to terminate the *Library War Service* on January 1, 1921, this has not yet been found possible. In response to a communication from Ex-President Bishop, indicating a very great need for up-to-date books in Coblenz, \$1,000 was spent on the authority of the Committee on the Transfer of Library War Service Activities. The library equipment and responsibility for service had been transferred to the U. S. Government several months previously.

The books, equipment and responsibility for service to the *Merchant Marine* vessels were formally transferred to the American Merchant Marine Library Association in August.

The constitution and by-laws of the *American Library in Paris, Inc.*, require nomination of the Librarian by the A. L. A. and the appointment of five trustees annually by the A. L. A.; and the A. L. A.'s gift of \$25,000 for endowment was made with the understanding that the appointee to be paid from the income from that fund must be selected with the approval of the Association.

Most of the *Hospital Service* work has been transferred to the Government, altho the A. L. A. is continuing two salaries and still pays a few of the incidental expenses. But some of the men who are not directly under the Public Health Service must be served by the A. L. A. for a time.

An effort is being made to assemble and put into permanent and accessible form the more valuable printed, mimeographed and multigraphed *War Service* lists, circulars, posters, photographs and other miscellaneous material.

Library Publications. During the year 43 publications have been issued. These comprise reading lists, programs, bibliographies, proceedings and pamphlets about various phases of library work for librarians and for the public. A cartoon poster, a book mark, a placard and seventy-eight sets of two rather elaborate exhibits were included in the year's publication and publicity work. Nine publications were reprinted, some of them thoroly revised. Several of the small publications were prepared to meet timely needs. The sales and the frequency with which these publications are used at Headquarters to answer direct inquiries show

that they are serving a useful purpose. The total distribution of these publications is estimated at 275,000.

In spite of an increase of one third in the price of the *Booklist* and the consequent loss of about 500 bulk subscriptions, there was an increase of 127 in paid subscriptions.

Publicity. Some of the publications issued during the year are primarily for distribution to the public. The character of the free distribution has been too varied to give in detail; the following few examples will indicate the extent.

The Library Extension Committee of the General Federation of Women's Clubs has been kept supplied with such things as "A County Library," "Book Wagons," "The New Voter," "The United States" and many others for use in correspondence with club women thruout the United States; and there were sent "A County Library," "Children's Books for Christmas Presents," "Library Work—an Opportunity for College Women," and "Libraries in Education" to the presidents and the library extension committee chairmen of the various state federations.

Of "A County Library" 200 copies were given to the American Red Cross for the use of the Information Service Department; 500 to the Southern Co-operative League; 310 to committees of the American Country Life Association or distributed at the conference; 203 to farm papers with a circular letter; and several hundred were sent to the county superintendents of schools in the states without library commissions.

A picture collection and over one hundred lantern slides have been collected for use wherever they are needed for publicity work; and numerous articles and notes sent to magazines and newspapers have been printed.

Financial Situation. The net gain in receipts from the sale of A. L. A. publications for 1921 over 1920 is \$7,665.42 or 49 per cent. The gain in receipts from membership dues is \$2,638.25 or nearly 23 per cent.

But the needs outrun the income. In spite of the reduction in the size of the *Proceedings* and of other economies, the A. L. A. Headquarters Office is unable to do satisfactorily all that seems expected of it. The employment work, the recruiting for librarianship, the growing activities of the committees, the increased sale of publications all result in increased work. The growing interest in the establishment of libraries, especially county and school libraries, and in the erection of library buildings brings increased requests for information from other associations and from interested individuals who are not members of the A. L. A.

Free to Librarians

THE Library School of the New York Public Library announces a series of eleven lectures and round tables on book selection, which thru the courtesy of the lecturers are open to all librarians without fee. Lectures (marked "L" in schedule below) will be given in Room 213, and round tables ("R") in Room 73, of the Central Building of the New York Public Library on Thursday evenings at eight o'clock.

Feb. 9. The library's esthetic responsibility. (L.) Henry W. Kent, secretary of the Metropolitan Museum.

Feb. 16. Poetry. (L.) John Erskine, professor of English, Columbia University, and author of "The Kinds of Poetry," etc.

Feb. 23. Poetry. (R.) Mary L. Sutliff, instructor in the Library School of the New York Public Library.

Mar. 2. The newspaper. (L.) Rollo Ogden, formerly editor of the *New York Evening Post*, now associate editor of the *New York Times*.

Mar. 9. Periodicals. (R.) Carolyn F. Ulrich, chief of Periodicals Division, New York Public Library.

Mar. 16. Publishing and publishers. (L.) Alfred Harcourt, of Harcourt, Brace & Company, Publishers.

Mar. 23. A plea for rural town gardens (illustrated with lantern slides). (L.) Mrs. Martha Brookes Hutcheson, landscape gardener.

Apr. 6. Garden and nature books. (R.) I. H. Horak, librarian, Rivington Street Branch, New York Public Library.

Apr. 13. The new American novel. (L.) Carl Van Doren, literary editor of *The Nation*, author of "The American Novel."

Apr. 20. Present-day fiction. (R.) Hannah C. Ellis, librarian of the Hamilton Fish Park Branch, New York Public Library.

Apr. 27. Topic to be announced. (L.) Dean Howard Chandler Robbins, The Cathedral of St. John the Divine, New York City.

N. Y. P. L. Trustees Protest Against Proposed Tariff

AT a meeting of the Trustees of the New York Public Library held on January 11th, a resolution was adopted protesting against any diminution of privileges which public libraries now possess with regard to the free importation of books by public libraries and against the encumbering of such importation with onerous formalities, and specifically endorsing the amendments proposed on behalf of the A. L. A. at the Senate committee's hearing in December. (See L. J. for January 15, p. 59).

THE LIBRARY JOURNAL

TWICE-A-MONTH

FEBRUARY 1, 1922

THE present Commissioner of Education, the seventh to hold that honorable post, in his address at the Grand Rapids semi-centenary, which was his initial library utterance, gracefully paid tribute to his predecessors by summarizing briefly their expressed sympathy with library progress and their participation in the library movement. The first of these, Henry Barnard, of whom Dr. Steiner not long since published the biography, was one of the six who were present both at the library convention of 1853 and the formative A. L. A. Conference of 1876. Commissioner Tigert renews the fealty of his department and its head to the library cause, and, indeed, sounds the note which responds to the best library thought of the day. This is that the school and the library are one in purpose and have a single aim in common, and Commissioner Tigert rightly puts emphasis on the importance of making familiarity with the library a feature of teaching thruout the grades and in the higher schools. It is especially gratifying that this address was made at Grand Rapids on the occasion of the fiftieth anniversary of a library which, especially under Samuel H. Ranck's efficient administration, has been foremost in meeting the industrial needs of its community and thus linking industry with education.

* * * * *

THE essential features of the amendatory copyright bill, which is to make possible the entrance of America into the International Copyright Union, are printed on another page. The A. L. A., thru its Council, has expressed its cordial approval of the entrance of our country into the family of nations gathered under the Berlin-Berne Convention, but it has insisted that the privileges won by the libraries in 1909 after a hard fight shall not be curtailed. The publishers have held that publishing rights for an American edition imply the right to prohibit importation, but librarians reply that so long as the purchase of authorized editions from abroad assures the author of his royalties, libraries should not be restricted by commercial consideration from exercising the privilege they have enjoyed for more than a decade, by imposing additional conditions. The Committee on

Book Buying will make its strong protest when the bill has hearings before the Joint Committee on Patents and it is at that time that librarians will have an opportunity to support the Committee by letters to their Senators and Representatives, urging that sub-section A should be passed in its original form, without the added restriction.

* * * * *

OUR national library is to-day paying salaries smaller than those in any important municipal library in the country, and this results in the double disadvantage that it is undermanned and that it is in danger of losing to other libraries the skilled assistants whom it needs, especially in its cataloging department. It would be a national misfortune if, by failure of adequate appropriation or because of inadequate specific salaries, this department should be put out of commission or seriously crippled. The card system which benefits all libraries, and thus the whole nation, depends, of course, on adequate cataloging work, and librarians should unite in any course which can hold up the hands of the Librarian of Congress in maintaining this important division at full efficiency.

* * * * *

SECRETARY Milam's report in the forthcoming *A. L. A. Bulletin* is a remarkable presentation of library progress, thru the work of the Association, during the past year. While the year 1921, as we have said, was not a notable library year, and many have come to have a pessimistic notion that a "library slump" is on, the A. L. A. nevertheless makes proof of the most active year it has ever had in time of peace. The membership passed the five thousand mark and the membership funds were correspondingly increased, altho there is always more work before the Association than funds wherewith to do it. The affiliation of seventeen State associations with the A. L. A. at the recent Council meeting is another evidence of progress. The publications of the Association took an unusually wide range and did much for library publicity, and it is especially worth noting that, despite any present differences on a phase of copyright, the libraries are thoroly on good

terms with their two leading associates in the work of education, the schools and the bookstores. Secretary Milam made a capital little speech at the recent festival of the National Association of Book Publishers, where also Joy

E. Morgan, editor for the National Education Association, in an admirable address emphasized not less strongly the sense of co-operation among the three great educational agencies in making this country foremost in education.

LIBRARY ORGANIZATIONS

THE 1922 CONFERENCE

THE Forty-fourth Annual Conference of the A. L. A. will be held at the Hotel Statler, Detroit, Mich., June 26-July 1.

The tentative plans provide for general sessions on Monday evening, June 26, and on the mornings of Tuesday, Wednesday, Friday and Saturday. Thursday is left free for recreation, for library visiting and for private conferences.

A visit to the University of Michigan, Ann Arbor, is planned for this day, visitors returning to Detroit for supper which will be followed by a boat trip on the Detroit River and Lake Ste Claire. The boat will accommodate two thousand people, and there will be ample room for dancing, one-act plays or other entertainments.

Friday evening is tentatively set aside for the groups wishing to arrange for dinner meetings.

Most of the meetings, general sessions and others, can be held on the mezzanine floor of the hotel, which is given over almost entirely to the ball room, banquet halls and private dining rooms. There is ample room on this floor also for a registration desk and for the official exhibits. Arrangements are being made for commercial exhibits in sample rooms on the thirteenth or fourteenth floors. Commercial exhibitors should write to the manager of the Hotel Statler and make arrangements for desired space. Committees of the A. L. A. or affiliated groups desiring to make official exhibits should communicate with the secretary of the A. L. A. until some member of the local committee has been designated to have charge of the exhibits.

Near the Hotel Statler are many other hotels and it will be possible for persons attending the conference to find the accommodations they want, provided reservations are made well in advance. The hotels are being asked to consider reservations received before February fifteenth as arriving on the fifteenth.

Altho several hundred rooms have been

tentatively set aside for members of the A. L. A., it is important that those expecting to attend this conference make their reservations several weeks or, perhaps, several months in advance.

Reservations of rooms should be made directly with the hotels. If the hotel cannot give you what is asked for, the letter will be referred to the local committee of which Adam Strohm, of the Detroit Public Library is Secretary.

The Hotel Statler, Washington Boulevard and Park, which will be the Conference Headquarters offers (European Plan):

Single room with shower	\$3.00-\$3.50
Single room (outside) with tub and shower..	\$4.00-\$8.00
Double room with shower	\$5.00-\$5.50
Double room (outside) with tub and shower\$6.00-\$10.00
Room for four, two beds	\$10.00-\$14.00

Hotel Wolverine, Elizabeth and Witherell.

Single room	\$2.50-\$6.00
Double room	\$4.50-\$8.00
All rooms with tub bath.	

Hotel Tuller, Park and Adams

Single room	\$2.50-\$5.00
Double room	\$4.50-\$7.00
All rooms with bath.	

Hotel Charlevoix

Single room without bath	\$2.00
Single room with bath	\$2.50-\$3.00
Double room without bath	\$3.00
Double room with bath	\$4.00-\$5.00
2 bedroom combination with bath:	

For 2 persons	\$3.00 each
For 3 persons	\$2.50 each
For 4 persons	\$2.00 each

Hotel Addison, Woodward and Charlotte

Single room without bath	\$2.00 and \$2.50
Single room with bath	\$2.50-\$6.00
Extra \$1.50 per person, two or more in room.	

Hotel Cadillac, Washington Blvd. and Michigan.

Single room without bath	\$2.00-\$2.50
Single room with bath	\$2.50-\$3.50-\$4.00
Double room without bath	\$3.00-\$3.50-\$4.00
Double room with bath	\$4.00-\$5.00-\$6.00

Hotel Fort Shelby, First and LaFayette

Single room without bath	\$2.00
Single room with bath	\$2.50-\$3.00
Double room with bath	\$3.00-\$4.00-\$5.00

Hotel Norton, Griswold and Jefferson

Single room without bath	\$2.00
Single room with bath	\$2.50-\$3.00
Double room without bath	\$3.50-\$4.00
Double room with bath	\$4.50-\$5.00

In the main dining room at the Statler table d'hôte meals are served at the following rates: breakfast 75c; lunch 85c and dinner \$1.50. There are also a grill room, a coffee room and a cafeteria.

In other hotels and restaurants in the vicinity one may find meals at all prices.

COUNCIL MEETINGS

In addition to action reported in our January 1st number the following should be noted:

A committee consisting of Edward D. Tweedell, Carl B. Roden and George B. Utley reported that applications for affiliation had been examined, and recommended for affiliation as state chapters of the A. L. A. the library associations of the following states: Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, as well as the Pacific Northwest Library Association and the Indiana Library Trustees' Association. This was approved.

The following resolution was adopted:

Resolved, that the A. L. A. again urge upon the Postmaster General the imperative need of such modification of the initial pound parcel post rate on books passing between any properly defined public library and its rural population adjacent, as is clearly possible within the limit of a desired self-paying character of the postal service.

A resolution of regret on the death of Mrs. Fairchild was presented by June R. Donnelly and was unanimously adopted by a rising vote.

EXECUTIVE BOARD

Two meetings of the Executive Board were held during the Mid-winter Conference at Chicago.

The Treasurer presented financial reports for all funds for the year ending December 31st. The financial reports and budgets will be printed in an early number of the JOURNAL. A budget covering all funds for 1922 presented by the Secretary and the Chairman of the Finance Committee was approved.

The budget of the War Fund provides \$24,000 for hospital library work in 1922, part of which is to be available for incidental expenses of the hospital libraries of the U. S. Public Health Service, and part for library service in other hospitals where ex-service men are being cared for.

Fifty dollars were appropriated for the work of the National Council of Agencies Engaged

in Rural Social Work of which the A. L. A. is a member, and recommendations for new publications were approved as reported on page 136.

As the result of questions asked by some committee chairmen, the authority of committees to represent the Association when not specifically instructed by the A. L. A. or the Council was discussed, and the Board instructed the Secretary to "inform the chairmen of committees who are in doubt as to what action ought to be taken when confronted by a change of situation, that they should refer matters in question back to the President to be laid before the Executive Board for advice before taking action."

The President was authorized to appoint a committee to continue investigation of the salary question, and to fill vacancies on committees.

UNIVERSITY LIBRARIANS OF THE MIDDLE WEST

THE fifteenth annual session of the informal group of University Librarians of the Middle West that has been conferring together at the time of the mid-winter meeting was preceded by a dinner at the Cliff Dwellers Club. The Saturday morning session was held in conjunction with the College Librarians. William W. Bishop, read a letter from W. Dawson Johnston, offering the co-operation of the American Library in Paris in the matter of exchange of duplicates which might be of interest to French libraries and also in the making up of lists of desiderata. Mr. Bishop then described some of his recent book-buying experiences in Europe. He emphasized the importance of preliminary arrangements for a book-buying trip, and especially the necessity for carefully prepared want lists. Quite as essential are lists of important sets and of holdings in special fields as a protection against duplication. For Mr. Bishop's trip, a census of certain collections was prepared on catalog cards by hand and then reduced in size by photostating. These were bound in a form convenient to carry, and not only saved time and money, but will be valuable for future use. Mr. Bishop found book stocks low except in Edinburgh, which impressed him as one of the best book markets. The Leipzig and Hague markets also proved to be very good.

M. Llewellyn Raney spoke for the book-buying committee of the A. L. A. He emphasized the fact that general statements or complaints in regard to books were of no avail. One librarian wrote to the Committee condemning modern book paper wholesale. Such complaints are useless; it is necessary to mention specific books to be of help to the Committee. Dr. Raney

also said that it is useless to send to representatives at Washington any general communication in regard to the Fordney Tariff bill. Criticisms must be specific and constructive to be of value. The brief to be presented to Senator Smoot was read by Dr. Raney and endorsed by the meeting.

In the matter of copyright law Dr. Raney reported that the typhotetae wish to make changes but want to trade their support for reasonable copyright legislation in compliance with their demand for protection as written into the Fordney Tariff bill.

J. C. M. Hanson spoke for the Committee on Co-operative Cataloging and reported that the items checked on a list submitted would be printed if the Library of Congress secured fifty subscribers for each series of cards, while for others one hundred subscribers would be required. Over 4,000 sets have been completely analyzed. The recommendations of the Committee with regard to series to be analyzed in the future by the Library of Congress were unanimously approved. These are given elsewhere in this number.

The question of a national union list of serials was brought up for discussion, and H. W. Wilson suggested that the scope of the northern central list already projected be broadened. He recommended the appointment of a committee of advice and approval in regard to this list. The following resolution introduced by James T. Gerould was adopted:

Resolved that the project for a union list of periodicals as presented by Mr. Wilson be approved and that the A. L. A. Executive Board be requested to appoint a committee of three which shall have power from time to time to act (1) in co-operation with Mr. Wilson in working out a practicable plan of publication; (2) in an advisory capacity during the course of publication.

Mr. Gerould explained the new forms of university library statistics to be collected by the A. L. A. and told of some of the changes. An attempt will be made to get figures for the institutions as a whole, all out-lying departments such as college, departmental and seminar libraries, to be included. Regular and part-time members of the staff are to be listed separately, and the hours of work per week and vocational allowances will be added.

The afternoon session was in the form of a round table, in charge of Mr. Hanson. Dr. Raney spoke on a modification of the addressograph suitable for use in manifolding catalog entries and told of his experiments at Johns Hopkins University Library with a press made by a local firm. During the war period improvements

were made in the addressograph extending the number of lines available on the thin metal strips from three to seven. Dr. Raney has secured a satisfactory alloy which will give a plate as long as is needed in cataloging and allow for eight lines. Two plates can be printed side by side, so as to fill up the full card surface. The difficulty at present lies in the printing. In the machine now on the market shorter addresses are successfully inked with a pad. The makers, however, assert that neither this nor the ribbon method is available in a plate of the size desired in cataloging. In an endeavor to overcome this difficulty, experiments are being carried on with both the multigraph and a small press made by a Baltimore firm.

There seems good reason to suppose that from one or both of these sources there will be a successful issue, the result of which would be to double the output of the multigraph, since there would be no necessity for distributing the type, and the setting up of copy is done precisely by the same movements of the hands as in the case of the multigraph.

Loose-leaf atlases were discussed, one librarian suggesting that the generic term should be changed to *lose-leaves*. Various devices for taking care of maps, including the Plan file of the Art Metal Company and the Yawman & Erbe vertical file, were described. Both are thought to be more economical of space than the old-style flat drawers. The problem of storage of roller maps was touched upon. Several librarians reported upon economical methods of housing maps.

Phineas L. Windsor presented a statement from the Conference of Eastern College Librarians in regard to the evaluation of Library Science degrees by the Association of American Universities, and introduced a motion urging that the Association of American Library Schools be requested to take up the matter with the proper committee on higher degrees of the Association of American Universities. Carried.

Olive Jones, librarian of the Ohio State University, raised the question of more suitable titles for the professional workers on the staff of a university library—"professional workers," meaning those members of the staff doing work which requires, in addition to general educational qualifications, such professional training as is given in a library school. Miss Jones said that, altho in themselves titles might not mean much, in the minds of members of the faculty they have significance and library workers surely are entitled to such recognition. She deprecated the use of such titles as cataloger, order assistant, and others, which might be used in many

different lines of business, and urged that more distinctive titles be adopted. The title "librarian" should stand for something other than administration. Why should the title "assistant librarian" generally mean an understudy to the chief administrative officer of a library? No one thinks of the title "assistant professor" in that way. It was the sense of the meeting that the A. L. A. Executive Board should be asked to appoint a Committee of University and College Librarians to take up the whole matter of the ranking of not only the librarians but also the library assistants.

Augustus H. Shearer, representing both the American Historical Association and the A. L. A., spoke on the projected survey of resources of the American libraries. He introduced the following motion, which was adopted:

Resolved that the A. L. A. Executive Board be requested to appoint a committee to confer with and to unite the national, historical, scientific and other learned societies in an effort to secure a survey in each field of the available research materials and to base on such surveys a program of collection which may be adopted by libraries.

THEODORE W. KOCH.

LEAGUE OF LIBRARY COMMISSIONS

THE annual conference of the League of Library Commissions was held in Chicago, December 30-31, under the presidency of William R. Watson. Fifteen state commissions were represented by twenty-seven delegates. The paper on the "School and Library Co-operation as Exemplified in Minnesota" given by James M. McConnell, Commissioner of Education for Minnesota, will be given in the LIBRARY JOURNAL for February 15th. The ensuing discussion brought out the following points:

That when the public library does school library work an effort is made to get the school to pay for part of the work and part of the librarian's salary;

That a library course could not be made a required course in normal schools as it is not a required subject for a teacher's certificate;

That additional service is given in the school but that the community receives little attention when a teacher has to serve as librarian;

That in Minnesota the question of the location of the library is worked out as a special problem for each town;

That books purchased with school money by the public library are marked as such, so that they may be turned over to the school when a school library is organized;

That in Pennsylvania branches in the schools are not a success due to the fact that grown

people are unwilling to go to the schools, but that the building up of school libraries is reacting upon the public libraries. It has been found that where the school libraries have been especially successful the branch public libraries become so.

Marie Finney, of the Educational Department of the Victor Talking Machine Company, spoke on the use of phonograph records in educational work. From a questionnaire sent to libraries she found that New York and California make the best use of records. The New York State library has nine libraries with thirteen records each for use in classes of defective children. The teachers make application and pay postage and breakage.

Miss Gray of the New York State Extension Department has issued a manual for the use of the teachers. In California the work organized two years ago by several county libraries was dropped for lack of funds, but when the State Music Supervisor took it up and appealed to club women, as many as 2000 records were gathered for the counties.

Committee reports were received at the second session, held the following morning.

The Committee on publications reported the publishing of the Traveling Library Daily Record Blank, and that a considerable number were in the hands of the Secretary for sale.

The questionnaire for the new Handbook was discussed in detail, and a final form agreed upon. On motion it was decided to print new annual traveling library record blanks to conform with the new daily blanks.

The president spoke of the value of interesting the members of the different commissions in League's meetings, which are usually attended by representatives of the executive staff only—very few commissioners come.

It was decided on motion that a committee be appointed to interest the commissioners in the June meeting at Detroit, and Miss Rawson, Mr. Hamilton, Mr. Kerr, Miss Jones and Miss Templeton were appointed.

The subject of book wagons was discussed. Mr. Hamilton said Indiana's new book wagons cost \$1800 and \$1900; that the new Logansport auto provided space for boxes of books to be delivered as well as book shelves. The New Jersey trucks cost about \$1000 or \$1200. The Rochester new book wagon is built on the Dodge truck and has the books arranged on shelves in the inside.

Miss West spoke on the advantage of having a uniform county library sign, and asked that a committee be appointed. The president asked Miss West, Miss Downey and Miss Robinson to act as such a committee.

Miss Robinson proposed a uniform telephone number for all public libraries the country over, similar to the practice of the Western Union Telephone Company, which has 4321 as a uniform number.

The question of closed meetings was brought up by Miss Downey. The discussion resulted in the decision by motion that the League of Library Commissions go on record as opposed to the policy of closed sessions.

Officers elected are: President, W. R. Watson; vice-presidents, Irving R. Bundy and Elizabeth H. West; secretary-treasurer, Anna May Price.

MIDDLE WEST COLLEGE LIBRARIANS

COLLEGE Librarians of the Middle West held a well attended conference December 30th, 1921, under the presidency of Ada M. Nelson of Knox College.

The building up of a college library outside of the immediate book needs of the instructor was introduced by Miss Fairbanks of Cornell College, who told of the means for such purchases at that college. In the discussion which followed it developed that the portion allotted to cultural purposes varies from one-tenth to one-half. Since the needs of the student and university or college community are much wider than the needs of the instructor, it was felt that generous provision should be made for modern drama, poetry, books of current interest, art, fiction, etc.

In introducing the discussion of how the college library management can help to stimulate research work on the part of the student, Professor Root of Oberlin College said the stimulation of research work is the part of the faculty and not of the librarian. The librarian can only co-operate. He can for example render considerable service by borrowing from other libraries for both students and faculty. In this connection, Dr. Richardson emphasized the need of a joint list of research books up to five million in number, grouped by sections of the country. About 2,000,000 can be found in this country. Two projects already made toward this end are a co-operative list, like the list of European histories, and the list of special collections as now proposed by Mr. J. T. Gerould. A formal letter to the faculty at the beginning of the year, offering service and co-operation, will often bring good results.

A paper on the relation of the college librarian to the college faculty by Grace Perkins of Wilberforce University, read by Fanny E. Lowes of Washington and Jefferson College, led to the discussion of the social and academic relations. Most of the librarians present enjoy social privileges with the faculty, including a

vote at faculty meetings. Academic rank varies. In universities and large college libraries, the librarian ranks as full professor; in the smaller college libraries he is full professor in a few instances but more often associate or assistant professor; and in others, he is an administrative officer. In all cases, it was felt the librarian should have a seat in the faculty and should assume the corresponding duties.

A review of the current use of student help was made by Professor Root. In the libraries represented at the meeting students are employed only in subordinate places—delivery desk, page work, mechanical preparation of books, and occasionally for filing. Student help is, as a rule, not economical. Some librarians find men more reliable than women students. Mr. Henry said that at the University of Chicago Library fewer students are being employed and apprentices are taking their places.

Regarding exchanges of periodicals and magazines, Professor Root pointed out that it does not pay to place prices on duplicates. Duplicates should be regarded as something to pass on to others without too careful consideration of what can be received in return. The preparation of lists is expensive, second-hand dealers give low prices, and the main point is to get the books off the duplicate shelf and into some place where they may be used.

Discussion of the apportionment of the book fund among departments showed that there are two definite schemes in use: for the larger libraries pooling, and for the smaller division by units. Theoretically pooling is the better way but it is sometimes rendered difficult by the smallness of funds. At Oberlin a norm of \$150 is fixed for each department and this is departed from for larger or smaller amounts according to the immediate needs of the departments. In some of the smaller college libraries books are purchased from the laboratory fees.

Miss Mitchell of Milwaukee-Downer College read a paper on first editions from the point of view of the college library.

There was a second session on the following morning, jointly with the University Librarians of the Middle West.

AMERICAN LIBRARY INSTITUTE

THE American Library Institute has elected as its president for the three years, 1922-1924, Clement Walker Andrews of Chicago, and as its secretary-treasurer for the same period, Theodore Wesley Koch.

The following have been re-elected as fellows for a term of ten years: Richard Rogers Bowker, Gratia A. Countryman, Electra C. Doren, Caroline M. Hewins, Theresa Hitchler,

ABINGDON

Books for today

AMERICAN CITIZENS AND THEIR GOVERNMENT

By Kenneth Colegrove

Associate Professor of Political Science, Northwestern University

The needs and interests of the average American citizen and voter have been kept in mind in the preparation of this invaluable textbook in citizenship, which presents a broad survey of the vital factors in our National, State, City and Town government.

Price, net, \$1.75; by mail, \$1.85.

SOCIAL REBUILDERS

By Charles Reynolds Brown
Dean of Yale Divinity School

"A discriminating appraisal of conditions growing out of world-wide confusion and disorder. . . . The book is a vital message of the times. Dean Brown discusses what has long been engaging the minds of the world's greatest thinkers."—*Boston Evening Transcript*.

Price, net, \$1.25, postpaid.

UNITED STATES CITIZENSHIP

By George Preston Mains

"The book gives evidence of protracted study and research. It is well and convincingly written. It is both interesting and educational and is the most complete discussion of present-day American problems from the standpoint of the individual citizen that has appeared in many a day."—*The Patriot, Harrisburg, Pa.*

Price, net, \$2.00, postpaid.

CITIZENSHIP AND MORAL REFORM

By John W. Langdale

"The 'call of citizenship,' with especial reference to moral reform, enforcement of the prohibition amendment, is emphasized. The family, poverty, social hygiene, and industrial relations are among the themes treated in a plain, concise manner."—*Social Progress*.

Price, net, \$1.25, postpaid.

THE UNTRIED CIVILIZATION

By John William Frazer

"This little book of seven chapters is a noble plea for the conversion of society into a Christian civilization. It contains some generalizations about modern civilization, couched in picturesque English and shot from a definite Christian angle."—*The Churchman*.

Price, net, \$1.00, postpaid.

THE CHRISTIAN IN SOCIAL RELATIONSHIPS

By Dorr Frank Diefendorf

The author believes that Christian ideals and principles are to be applied to society in fuller measure; that the Christian religion as a constructive force must work toward the increase of human good, as never before; and that an intelligent, evangelical faith is to inspire and direct the youth of America as the great opportunities and tasks of the new time pass into their hands, for the remaking and the betterment of the world; and in this belief he delivers his message.

ANDREW KEOGH.

MICHIGAN STATE TEACHERS' ASSOCIATION LIBRARY SECTION

THE Library Section of the Michigan State Teachers' Association held its annual meeting at the Scripps Branch Library, Detroit, with Clara Mast as Chairman.

The administration of small school libraries was ably discussed by Nina K. Preston of Ionia. Martha C. Pritchard of Detroit Teachers' College told of the training in the use of books given rural teachers in that college, and of the elementary platoon schools of Detroit where a library room in each building is in charge of a library teacher. Each child above the second grade has two library periods a week. No formal instruction is given, the aim being to have the children acquire a love for reading. A development of library consciousness or a sense of

the need of books was the suggestion of Edith Thomas of Ann Arbor. If the State were to train all teachers in the use of books and create in them a need for books, there would be a demand for libraries for their schools.

The following resolution presented by C. C. Certain of Cass Technical High School, Detroit, was adopted:

Resolved that: A committee be appointed by the Library Section of the M. S. T. A. to make a report at its next meeting recommending to the teacher training institutions of Michigan, a minimum amount of instruction in library use and methods to be required towards the Teacher Certificate.

Mr. Certain and Miss Preston were empowered to act as such committee.

Mr. Ranck of Grand Rapids concluded the program with a very illuminating talk on county libraries which was illustrated with lantern slides.

EDITH A. KING, *Secretary*.

LIBRARY CALENDAR

April 28-29. At the Hotel Chelsea, Atlantic City. Annual meetings of the New Jersey Library Association and Pennsylvania Library Club.

June 26-July 2. In Detroit. Headquarters at the Hotel Statler. Forty-fourth annual conference of the American Library Association.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS WANTED

Librarian with eight years' experience in college library desires position in the South. K. E. A. 3.

Wanted, a children's librarian. Must have a training school certificate. Address Librarian, Public Library, Tulsa, Okla.

Cataloger, thirteen years' experience, three as chief cataloger in a large New England library, would consider a change of position. M. F. B. 3

Young woman would like to hear of position giving good opportunity to learn library work. College graduate and experienced in general office work. M. X. 2.

Wanted temporary position beginning February for three and a half months. College and

library school graduate with experience in reference, bibliography, cataloging. References. Washington, D. C., preferred. C. R. 2.

Wanted position as librarian by college and library school man with seventeen years library experience. At present employed as assistant librarian in a large library. Desires opportunity to assume full charge. P. R. 2.

POSITIONS OFFERED

A two thousand dollar position is vacant in the Medical Department of the Iowa State Library. Address Johnson Brigham, State Librarian, Des Moines, Iowa, stating qualifications and previous experience, and giving references.

There are several vacancies in the Kansas City (Mo.) Public Library staff. Salaries range from \$1400 to \$1800; branch children's librarian, assistant in catalog department, general assistant. Applicants should give education, training and experience.—Purd B. Wright, librarian.

IN EVERY TOWN

Some one is studying Interior Decoration and rely upon the Library for books on the subject. The following are standard text books used in the trade, schools and libraries.

PERIOD FURNISHINGS

An Encyclopedia of Furniture, Furnishings, Decorations. Contains 2,731 illustrations, 266 pages, size 9/4 x 12; 112 fabric illustrations covering all periods; 360 illustrations of chairs alone; 800 of carvings, design details, table tops, chair legs, etc.; 800 design motifs of furniture, walls and ceilings, with 65 interiors. Price, \$6.00 postpaid.

COLOR VALUE

A valuable book treating of color contrasts and harmonies. It will assist the decorator and the manufacturer in the selection of color designs or for decorations generally. Colored plates and diagrams illustrating the fundamental principles of the subject, of inestimable value to either student or artisan. Price, \$1.50 postpaid.

CUTTING AND DRAPING

Making and hanging portiers, lace curtains, shades and draperies generally are described in the most complete and practical manner. Festival decorations and interior furnishings are treated in a way to greatly assist everyone doing this work. Durable cloth covers, 10 x 13 inches, with over 300 diagrams and illustrations. Price \$4.00 postpaid.

FURNITURE UPHOLSTERING

The most authoritative and complete instruction book ever published on the art of upholstering furniture. Over 700 illustrations. Price, \$4.00 postpaid.

THEORY OF SILK WEAVING

A practical guide for manfr. or student on weaving broad and narrow fabrics, over 100 illustrations. Price \$3.50 postpaid.

CLIFFORD & LAWTON

373 Fourth Avenue

NEW YORK

FOR ALL LIBRARIES**PITMAN'S COMMON COMMODITIES AND INDUSTRIES SERIES**

In this series a particular product is treated by an expert writer and practical business man. Beginning with the life history of the plant or other natural product he follows its development until it becomes a commercial commodity and so on through the various phases of its sale in the market and its purchase by the consumer.

In addition to the 52 titles already published the following are now ready:

WINE AND THE WINE TRADE. By Andre L. Simon.

TEXTILE BLEACHING. By A. B. Steven.

SULPHUR AND SULPHUR DERIVATIVES. By

Harold A. Auden.

ALCOHOL. By C. Simmonds.

IRONFOUNDING. By B. Whiteley.

CONCRETE AND REINFORCED CONCRETE. By

W. Noble Twelvetrees.

PLAYER PIANO. By D. Miller Wilson.

Send for Complete List

PITMAN'S TECHNICAL PRIMERS

A new series of Technical Primers is intended to enable the reader to obtain the very necessary foundation of a clear appreciation of first principles and basic facts in any particular branch of technology.

Each 6 x 4 1/4, cloth, about 120 pp., fully illus., 85c.

In addition to the 26 volumes already issued the following are now ready:

INDUSTRIAL AND POWER ALCOHOL. By R. C.

Farmer.

MECHANICAL HANDLING OF GOODS. By C. H.

Woodfield.

RADIOACTIVITY AND RADIOACTIVE SUB-

STANCES. By J. Chadwick.

DIRECTIVE WIRELESS TELEGRAPHY. By L. H.

Walter.

KINEMATOGRAPH STUDIO TECHNIQUE. By L. C.

MacBean.

CONTINUOUS WAVE WIRELESS TELEGRAPHY.

By B. E. G. Mittell, A.M.I.E.E.

ARCHER, Anna L., assistant librarian of the Peoria (Ill.) Public Library is acting librarian pending the appointment of a successor to the late S. Patterson Prowse.

CARSON, Jessie M., 1903 C. P. Cert., has returned to her work in connection with the libraries established by the American Committee for Devastated France.

DAVIS, Mildred, 1916-17 N. Y. S., has resigned as reference librarian of the Library Association of Portland, Ore., to accept a similar position at Leland Stanford University Library in connection with the Hoover collection of war literature.

DUTT, Newton N., who since 1912 has been Baroda State Librarian and reader to his Highness the Maharajah Gaekwad, has been appointed curator of libraries for Baroda State in the place of Janardan S. Kudalkar, deceased. As the Baroda Central Library organizes exhibitions, etc., with a view to furthering the public library movement, Mr. Dutt will be grateful for any bulletins and handbooks which our libraries are willing to send. A handbook of the Baroda Library Department has been prepared and published by Mr. Dutt.

FOWLER, Eva May, whose resignation from the Illinois State Library we wrongly attributed recently to library legislation, gave up her work of her own will to become librarian of the Peru (Ill.) Public Library. The Secretary of State has always been ex-officio State Librarian and the consolidation of the State Library and the Extension Division in no way affected Mrs. Fowler's position. In Secretary Emerson library development in Illinois has a good friend.

HEDRICK, Blanche and Ellen, were wrongly reported in our number of December 15 as connected with the University of Michigan Library. Mr. Jordan is head of the Classification Department and Miss Smith of the Cataloging Department. Miss Blanche Hedrick is now at the University of Missouri Library.

HIRSHBERG, Herbert S., 1905 N. Y. S., librarian of the Toledo Public Library, has been appointed State Librarian of Ohio and will begin his new work in March, with charge, according to the new Ohio Library Law, of the State Library, the traveling libraries, the library organization, and the legislative reference divisions. Mr. Hirshberg began his library work as cataloger in the Boston Public Library; he was assistant in the New York State Library in 1904-1905; in the music division of the Library of Congress in 1905-06, and assistant and branch librarian in the Carnegie Library of Pittsburgh before going to the Cleveland Public Library as reference librarian in 1908, a post which he held until his appointment to Toledo in 1914.

HUBBARD, Mary, 1913 I., who has been working in a temporary position at the University of Illinois library since giving up her instructorship at the Library School of the New York Public Library, has been appointed to take charge of classification and subject heading at the Cleveland Public Library.

INMAN, Grace Elizabeth, for some years assistant librarian at the Olneyville (R. I.) Public Library, died at Providence on December 29th.

PRICE, Christine, acting librarian of the Williams College Library has resigned to reside in California.

ROOT, Elizabeth DeW., 1920 N. Y. S., has been appointed assistant librarian of the Hartford (Conn.) Theological Seminary Library.

STARBUCK, Isabella, 1918 S., has joined the editorial staff of the *Booklist*, in Chicago.

TOWNER, Isabel L., 1907-08 N. Y. S., has been made reference librarian of the library of The Common Service Committee, 370 Seventh Ave., New York City.

VAN SANT, Clara, 1918 N. Y. S., resigned the librarianship of the Public Library of Medford, Ore., in December and is temporarily on the staff of the Oregon State Library.

Here's the Foundation Book

Webster's New International Dictionary

A compact reference library of exact, scholarly information for practical use. This "Supreme Authority" answers all kinds of questions about **words, people, places**, questions of **what, why, how**. Hundreds of thousands of men and women, leaders in all lines of activity, use this storehouse of facts as a means to culture and success.

400,000 Words and Phrases including the new Words, 6000 Illustrations, 2700 Pages. The type matter is equivalent to that of a 15-volume encyclopedia. Regular and India-Paper Editions.

Get The Best.

Write for a specimen page of the new words just added, such as *bolsheviki, camouflage, barrage, etc.*

CURRENT LIBRARY LITERATURE

The manual of the New York Library Club which is being compiled under the editorship of Isadore G. Mudge, Columbia's Reference Librarian, is soon to be published.

Papers and Proceedings of the American Library Institute for 1920 and 1921 have been printed and may be obtained from the headquarters office of the American Library Association, 78 East Washington Street, Chicago. 1920, \$1.00; 1921, \$2.00.

"On Buying and Using Print" is a 60-page booklet of practical suggestions from a librarian to the businessman by John Cotton Dana. It is based on the series of lists of books and journals on business with introductory paragraphs contributed to sixteen numbers *The Nation's Business* between November, 1917, and July, 1919. Since the volume "2400 Business Books and Guide to Business Literature" prepared by Linda H. Morley and Adelaide C. Kight includes these references, the lists are omitted from the present volume. (H. W. Wilson Company.)

The fourth edition of "L. C. Printed Cards: How to Order and Use Them" by Charles H. Hastings, chief of the Card Division of the Library of Congress, has just been issued. As in the case of earlier editions "this pamphlet is designed to meet a demand for a simpler statement of methods of ordering and using L. C. cards than that given in the Handbook Specialists and students of library economy will ordinarily need no more information as to the details of the work than is given in this pamphlet, but those who are in charge of the work of ordering and adapting the cards. . . ." are referred to the fuller statements in the handbook.

The fifth edition of the "Handbook of Card Distribution" contains full explanation of the method of ordering and using the cards, and furnishes specific references to the supplementary information in the bulletins of the card division. It contains also a list of changes recently made in the regulations for ordering the cards.

A new edition of Zaidee Brown's "Directions for the Librarian of a Small Library" has been prepared by Anna G. Hall and published by the H. W. Wilson Company for the League of Library Commissions. "The first edition was printed by the New York State Education Department and reprinted by the Massachusetts Free Public Library Commission in 1911 As many of the aids suggested are now out of

print . . . and as library methods even for very small libraries have changed it has seemed an opportune time for rewriting the entire text The directions are intended primarily for librarians without training who care for village libraries of only a few thousand volumes."

New A. L. A. publications have been provided for by the approval of the following recommendations of the Editorial Committee to the A. L. A. Executive Board at its meeting on December 28th at Chicago.

That the Committee on the A. L. A. Manual of Library Economy be continued until the lists of all chapters are in hand.

That the A. L. A. Catalog be made to cover the years 1912-1921.

That a revised edition of Cannon's Bibliography of Library Economy be published if a sufficient number of advance subscriptions can be obtained to make possible the publication without serious loss.

That the chairman of the Committee be authorized to negotiate in a preliminary way for someone to write a book of biographical sketches of American librarians.

That the Board approve in general plans made by the Secretary and Harriet C. Long for a county library handbook to be written by Miss Long for A. L. A. publication.

That the new edition of the Guide to Reference Books be published, and that Miss Mudge be asked to finish the manuscript by April 1st.

That the proposed pamphlet by E. Kathleen Jones on Hospital Libraries be published.

That Sarah C. N. Bogle and Effie L. Power be asked to prepare a monograph on children's library work.

That the bookbinding committee be authorized to arrange with the Hertzberg Bindery of Des Moines for the reprinting with revisions of the pamphlet "The Care of Books."

That the list of popular books on science published in the *Journal* of the Washington Academy of Sciences, be printed and sold in bulk for distribution.

That the Secretary be authorized to arrange for the publication of an adults' Christmas list to be distributed next autumn.

That a graded list of books for schools compiled by a committee of the Library Department of the N. E. A. be published by the A. L. A.

That a list of books for children proposed by Clara W. Hunt be approved for publication.

A Good Turn for The Library Journal

The advertising section of this magazine is intended to serve a useful purpose in addition to selling services or merchandise. There is no corner of the library field that is profitable for questionable advertising.

In the Library Journal year after year appear the announcements of the business friends of the library profession. Most publishers know and appreciate the library as the outpost of the publishing business, and manufacturers of supplies are keen to have the good will of all librarians.

If you feel disposed to do a good turn for the Library Journal, tell the people with whom you deal that you are glad to see their announcements in the magazine. If you know of others whose work would seem to justify some expenditure for advertising, send us their names and we will try to suggest a plan of campaign that might be helpful.

This is the kind of friendly, practical interest that contributes most directly to the continued growth of the Library Journal.

Two Books Essential in any Industrial Research

ESTABLISHED 1891

HENDRICKS' COMMERCIAL REGISTER of the United States

is a complete and reliable Annual Register of Producers, Manufacturers, Dealers and Consumers in all lines of industry, classified according to products or services, thoroughly indexed and cross-indexed under about 50,000 headings. Trade names are given in a separate section and in a third section all names in the classified section are arranged alphabetically with particulars regarding their main industry and address. The 1922 Edition has been enlarged to over 2300 pages, 80,000 names and 300,000 trade descriptions, revised to date of publication. It gives a bird's-eye view of any industry.

Price, including monthly supplement, \$15.00

KELLY'S DIRECTORY of MERCHANTS, MANUFACTURERS and SHIPPERS of the WORLD

contains lists of Importers, Exporters, Manufacturers, Merchants, Brokers, Consuls, Banks, etc., in every civilized country. Each country has a separate section in the book. Within the countries the lists are subdivided alphabetically by cities and under each city are the various trade headings followed by alphabetical lists of the firms in each trade. Besides these lists there is also included reliable information as to population, topography, finances, transportation facilities, etc. It is thoroughly indexed for ready reference, geographically and by trades.

In two volumes, price \$20.00

The Borden Bookstack Company

WESTPORT, CONN.

Some years ago, Mr. William A. Borden, President of this Company, went on record as saying:

“It is my intention to make a Bookstack as cheaply as good construction will permit, and sell it to my fellow members of the Library Profession at a fair advance over the absolute cost. I do not enter the field to exploit libraries, but to help them.

From its first appearance the Cantilever Stack made a strong appeal to Engineers and Architects, on account of its structural strength, its lightness, and its ease of erection; and to Librarians on account of its quick adjustment and its larger capacity.

The only remaining problem was that of *price*. With the cooperation of the engineering forces of Post & McCord and a large steel concern, fully equipped, we have finally solved that problem.

Will you need Shelving soon?

We will be pleased to send you our catalogue and quote prices on installations---either large or small.

Borden Bookstack Company

School and Library Co-operation, as Exemplified in Minnesota

By J. M. McCONNELL

Commissioner of Education for Minnesota.

MY address will be concerned with a simple statement of what we believe, what we have done and what we aim to do in library administration in Minnesota. It is not intended to be argumentative in any matter whatsoever.

It is the conception in Minnesota that since the school and the library are dual agencies by which public education is to be accomplished, it makes for efficiency and economy that they should work together. The fact is recognized that the job of education is not finished with educating the children, but that it must extend into the lives of adults after their regular school training has been completed, or that it must reach those whose early training may have been lacking. It is clear in the minds of those who direct the policies of both that the school and the library have so largely a common purpose that each is continually dependent on the other, and that therefore they can best operate under the same general direction. This does not presume that either will control the other.

Accordingly, in 1919, in creating a State Board of Education and providing for a reorganization of the educational system, the legislature placed library administration, so far as it is a state function, under the direction of this board. The State Board of Education consists of five members appointed by the Governor for terms of five years. The law provides that they should be representative citizens of the state, but fixes no other qualifications. There is no ex-officio membership. The board elects the Commissioner of Education for a term of six years, who is its secretary and executive. Thus it may be noted that educational administration is well removed from the political arena.

The board is in full charge of the State Department of Education, in which the administration of libraries, formerly carried on by the State Library Commission is placed.

The Library Division is one of the seven divisions into which the Department of Educa-

tion has been organized by the State Board. It is headed by its own director, who was for many years secretary of the State Library Commission, and functions in the organization just as do the other divisions, such as the Rural and High School Divisions. Its employees are elected by the board on the nomination of the commissioner, always with the recommendation of the library director. It shares in the budget and receives the same encouragement and support thru the educational policy of the Department as does all the rest of the educational system. Those who are in charge of the Library Division attend the meetings of the State Board of Education, sit in the conferences of the Department, share in determining the educational policy of the state, and are in every way full communicants.

In Minnesota, the University and Teachers Colleges are administered under separate boards related to the State Board thru the Commissioner of Education, who is an ex-officio member of the Board of University Regents and the State Teachers College Board. Hence, this discussion does not include these institutions, except that it presumes the same obligations on them to train librarians as to train teachers. This responsibility they have not yet been able to meet, but it is part of our educational policy eventually to meet it.

The library field in Minnesota, like Ancient Gaul of tender memory to the classical student, is divided into three parts. They are the public library, the traveling library, and the school library. The first two were inherited by the Department of Education from the estate of the Library Commission. The school library has always been under the administration of the Department of Education.

The Constitution of Minnesota makes it an obligation of the state to maintain a general and uniform system of schools and requires the legislature by taxation or otherwise to provide for their support in every part of the state. Based on this constitutional foundation, a school

*Address made at the meeting of the League of Library Commissions at Chicago, December 30, 1921.

system has been built up with liberal and purposeful state support and competent state direction. No similar constitutional provision lays a foundation for libraries. The public library therefore is mainly a municipal institution, created thru local initiative, supported by local taxation, and maintained according to the standards set by the community itself. Many library buildings have been secured thru the munificence of that fairy godfather of public libraries, Andrew Carnegie.

The public library in Minnesota is administered in any village or city where it may have been established under a library board appointed by the mayor. The law permits county commissioners to establish a county library at the county seat or elsewhere in the county, to levy a tax for its support, and to appoint a library board for its administration. Should a city library, or more than one, exist in the county, then the commissioners are to contract with one or more of them, contributing the tax levied in the county for support, and thus securing library service for the entire county. This may include an arrangement for county traveling libraries.

It is the duty of the State Library Division to give advice and assistance in the formation of new libraries and in the operation of those already organized and to keep statistics relative to public libraries. The state, however, furnishes no funds and exercises no mandatory powers.

The State Library Division is authorized to purchase books to be used as a state circulating library available under rules prescribed by the division to every community in the state. It will be noted that the traveling library is maintained entirely at state expense and under state direction. It renders large service as a reference library and is of special value to communities which have no public libraries.

The school library which has been maintained under the Department of Education since its inception has been stimulated and built up by means of that policy of purposeful state support which is so large a factor in Minnesota's educational system. It has not, however, until recently had the same degree of state direction that has been applied to other phases of education.

By the terms of this policy, as applied to school libraries, the state contributes to every school district which maintains a school library, complying with standards set by the State Department, a certain amount for the purchase of books, provided the district pays at least an equivalent sum. Books to the value of double the state's contribution must be selected from

the list which is prepared by the State Department. While the sum paid per building, altho doubled by the last legislature, is not large, and while the establishment of libraries by schools is not mandatory, the effect has been to put a library into probably every school, large and small, in the state.

Two features of the law seek to co-ordinate library effort, especially in small communities. In villages of less than two thousand inhabitants, when no tax is levied for public libraries, the school board may maintain a public library for use of all residents and provide rooms for the same in the school building. The tendency in small communities is toward making the school building a community center, providing auditorium and gymnasium, whether the library is included in it or not. Again, in any community, regardless of size, the school board may contract with the board of any approved county, city or village library, to become a branch of such public library and to receive books suited to the needs of its pupils and the citizens of the community.

In case of such an arrangement, the state aid for the school library is paid to the library board, with the stipulation that it must be spent for books selected from the state library list for schools; and a librarian must be employed, who meets the standards set by the State Department for school librarians. Such librarians may be jointly employed by the school and library boards, and divide their time between the two lines of service.

It will be noted that while the state administration of libraries is vested in the Department of Education, the local administration, except when the school board establishes a public library, remains in a library board. There is no disposition so far as I am aware, to merge the local library and school administration.

I have thus indicated the basis on which the library work rests, leading to a statement of our purposes and the means by which we seek to accomplish them.

Our problems as we see them are:

1. To make the library both for children and adults as available to every person in the state as are the schools, so that equal educational opportunity may be provided.

2. To co-ordinate county, city and school libraries so as to secure the maximum return without duplication of effort or expense.

3. To bring library service to a higher degree of proficiency by setting up professional standards for librarians to correspond with those set for teachers in the same communities, and to provide for their attainment.

4. To establish a taxing unit large enough

and a basis of income certain enough to insure adequate support.

5. To apply to the public library the same method of purposeful state support and standardization which has been used in building up the public schools.

6. To make the libraries function more perfectly as educational institutions, whether their service is rendered to the children in the school or the adults in the community.

The work of administering the library system of the state and the leadership in carrying forward what we intend shall be a progressive library program are placed with the Director of the Library Division and her assistants. They are supported in their efforts by the State Board of Education and the Commissioner, and enjoy the constant co-operation of those who are in charge of the other divisions. They are thus always in touch with the entire educational field. The fact that all library work, including that of the schools, is placed under one directorate, has greatly simplified the problem of administration.

Progress is being made in securing in graded and high schools the employment of professionally trained school-librarians, who serve to make the library render the maximum of service in the class work of the school and to teach the students the art and habit of library use.

The villages and cities of the state in increasing numbers are being made to realize that best results, at least cost, are obtained by co-ordination of the public and school libraries, according to one or the other of the plans which the statute provides. When such arrangements are made, the State Department requires the employment of professionally qualified librarians, so far as the work relates to the schools.

Thru co-operation between the Library Division and the Rural School Division, on the initiative of the latter, instruction was given during the season just closed in county institutes for rural teachers thruout the state, in organization and use of school libraries in the one-room rural schools. Heretofore, we have had in these rural schools collections of books, often uncared for, and frequently not well used. In the future, by a continuation of this policy, we hope to have libraries which shall serve the children in their classes and teach them the reading habit in their homes. We are committed to the belief that intelligent direction is as important in the use of a library as it is in the operations of the school room.

In order that teachers may be prepared to do the library work that is to be demanded of them, a beginning has been made in library

training in some of the State Teachers Colleges. Also, on the request of the director of high school teacher training departments, the Library Division has outlined a course in library training for the rural teachers who are being trained in these departments.

No distinct county library organizations have been established, but several counties have made contracts with city libraries, so that the rural districts are served. This is accomplished by library branches or stations, by traveling libraries, and in one or two instances by the use of automobiles in charge of librarians.

The effect of the associated movement is to enlarge the field of service and increase the importance of the public library. As the public library grows and functions more widely, not only will the state be better served and the librarian's position become one of greater influence, but the demand on the traveling library will be correspondingly less. This, as we see it, represents progress in the right direction, since it brings service constantly closer to the people.

Some features of the program as we have conceived it can not be accomplished without further legislation. This we shall doubtless get as rapidly as the people of the state come to understand more fully the possibilities of a co-operative school and library policy, with state encouragement. The call of progress does not go long unheeded among the earnest people of the great Northwest.

We hope for an amendment to county library laws to facilitate the establishment of county libraries thruout the state, so that the rural people may enjoy more nearly equal library opportunity. This will be in keeping with the first principle written in our law for state support of schools, which provides that equal educational opportunity should be furnished to all the school children of the state.

It seems that the time cannot be far distant when the public library everywhere, like the public school, will be made a concern of the state.

This would mean some measure of state support and compliance with state standards. It would mean the placing of librarians in the same relation to the state as teachers. Like the school system, it would make ample provision for local autonomy, but would lift the library thru the support of the state to the place of importance and influence which it should occupy.

Any plan to be in harmony with the present policy should provide for continued co-operation between the library and the school as the great co-ordinate agencies in public education.

Economy in Binding

A SUGGESTION FROM A BUSINESS MAN

I HAVE read with interest the articles which have appeared in the LIBRARY JOURNAL, regarding home made bindings, and I cannot agree that these methods really save as much money as the authors of these articles think it does.

Let us take, for example, the cost of the "Home Brew" binding on ten-inch magazines, such as the *National Geographic*, to be between sixty and seventy cents. Only one thing has been accomplished, namely to keep intact the several issues of the magazine.

The binder cannot very well be called a binding. The appearance of this type of binding certainly cannot commend its use.

I know of nothing more disappointing than to enter a fine library building, to find cheap equipment and books printed on poor paper, or bound with the cheapest kind of binding. A cheap looking binding often disgusts a reader, and prevents him from giving the book consideration, even tho the contents may be of an unusually high type.

The ten-inch magazines, which can be bound for \$1.35 in full buckram, in any up-to-date bindery will, I believe, pay in the long run. The expenditure of \$1.35 will give:

A book that opens flat.

Sewing that permits the back of the book to be rounded, as all books should be.

Neat gold lettering which stands out so that there is no eye-strain in looking for the title in dark sections of the library.

A binding which feels like a real book, a binding which gives confidence to the reader.

A book which will stand on its own covers without sagging.

A book that is covered with a vermin-proof cover.

A cover which will not warp with damp weather, and which will not wear or bend at the corners.

A binding which will last as long as the paper and which will be a credit to the expensive building in which it is housed.

Assuming that ten per cent of the magazines that are put into the home-made bindings are later transferred to permanent bindings, I fully believe that there is no economy.

Being a practical book-binder, I realize that my point of view may be one-sided, but in my travels, I have found but four librarians who have adopted this home-made binding. Most of these have used it for only a few months, and have therefore had no opportunity to judge

how long the binding will stand up, or what effect dampness or insects will have on it.

I fully agree with all the writers that a lower cost of binding is necessary, but I believe that the only way it can be solved, is by using permanent bindings, and co-operating with the binder as follows:

First: Adopt a general standardized binding for periodicals by agreeing upon a certain color of buckram and a certain size of type for the title of each, and all libraries from coast to coast adhere to this standard. This would permit the binder to make them up in quantities, and would reduce the cost of manufacturing.

Second: Co-operate with your binder, by sending him work all the year round, and at such intervals and quantities as will permit him to return it promptly. By taking away a large portion of his magazine work during the year, and thus reducing his volume of business and increasing his percentage of overhead charges, you make it necessary for him to charge you more for the material which you cannot put into temporary binding, than he would charge you for them if he had the larger volume of business which your magazine binding would provide.

C. W. CARROLL, *Manager,*
Universal Publishing Syndicate,
1512 North Thirteenth Street, Philadelphia.

Wanted: The Detroit Gazette

THE General Library of the University of Michigan has published a facsimile of the *Detroit Gazette*, the first newspaper published in the State of Michigan. This work is being done for subscribing libraries, reproducing the file owned by the Burton Historical Collection, of the Detroit Public Library.

This file lacks the issues of December 19, 1823 (No. 335) and January 9, 1824 (No. 338). If any library possesses a copy of these two numbers, may we not have information of it in order to secure a negative from which we can make prints for our subscribers?

In reproducing the file of the *Kentucky Gazette* from 1787 to 1800, which has just been completed for the subscribers, we were able to supply several numbers missing from the Lexington Public Library copy. We have had similar good fortune with the *Detroit Gazette*, but have been unable to locate by correspondence these particular numbers.

W. W. BISHOP, *Librarian.*

Library Work with the Japanese*

By MARION HORTON

Principal of the Los Angeles Library School

MOST of us have a mental picture of Japan as a land of lotus and cherry blossoms, paper houses with quaint gardens, happy fathers and mothers leading children, kimona clad and always smiling, thru lacquered torii to ancient temples under still more ancient trees. On the other hand, a sinister picture is often given by those who would have us see only the fifty million people crowded into a small country (190,534 square miles, sixty per cent of which is volcanic rock, unsuitable for cultivation) and the economic pressure of a population which increases at the rate of nearly 700,000 a year.

Both pictures have truth in them. The fragile houses are crowded together in the cities, of what, in proportion to its area, is the most thickly populated country in the world. Seventy per cent of the total population belong to the farming class, who must be supported on farms averaging less than three acres in size. The ancestors of these people, cut off from contact with the outside world, developed a civilization with elements of beauty and strength long before William of Normandy's going to Britain, and the seclusion for centuries is responsible for much of the strength and weakness of the Japanese nation today.

Highly organized as the Japanese were in social standards, in arts, crafts and literature, when Commodore Perry demanded an opening of their port in 1853, they were quick to realize their inferior position and adopted things western with unquestioning approval.

Like a docile pupil the Japanese frankly admitted and recognized the superiority not only of western civilization, but also of the western race. When I was in school in Japan as a small boy, my textbooks taught me that 'the people of the Occident are exceedingly industrious, always rising early in the morning and never taking a noon day nap.' They told me that Westerners were 'our superiors physically, mentally and morally.' It was not only school children but their teachers and parents who believed such sweeping statement. (Kawakami. *Asia at the door.* p. 47.)

Emperor Meiji, at the beginning of his reign in 1868, issued the famous edict: "Knowledge shall be sought for thruout the whole world." With startling rapidity the Japanese form of government, the educational system, means of communication, the army and navy were remodeled after western fashions. In spite of their fervent acceptance of western ways, Japan's treaties

with foreign nations placed her in an inferior position and it was not until 1899 that new treaties granted Japan equal rights and privileges in her international relations. During this period there was a reaction from the superficial and feverish adoption of western methods and customs, and today travellers find a curious medley of old customs and new. In the background linger the traditions of the daimios and samurai, the old respect for nobility, and limitation of opportunities for the lower classes. The smaller towns and rural communities cling to their medieval habits of thought while the cities are rapidly adopting western methods.

The compulsory school system is theoretically western, and even students in the secondary schools are required to read certain English classics in the original.

"It is thru the channels of the English language that Anglo-Saxon ideas exert a tremendous influence intellectually, morally, politically and socially. In this way are the great leaders of English thought made familiar to us, and being constantly quoted, they are perused both in the original and in translation. Several works of Shakespeare can now be read in Japanese; Bacon, Emerson, George Eliot, Poe, Stevenson, Longfellow, Wordsworth, Tennyson are familiar names." (Nitobe, *The Japanese nation.* p. 186.)

The upper classes of the Japanese are well educated and familiar with American ideas, but most of the Japanese immigrants to this country come from the lower classes who have had no opportunity to learn the new ways of thinking and working.

Japanese peasants and coolies began to come to the Pacific coast as early as 1884, but in such small numbers that they attracted little attention. The famous "Gentlemen's agreement" of 1907 has restricted the immigration as the statistics in the Census Bureau summary of 1920 show. Two per cent of the total population of California is Japanese. There are comparatively few Japanese in the United States except in Hawaii and on the Pacific coast.

The Japanese fell keenly the discrimination against them. They are compelled to live in one part of the town and with few exceptions are not received socially. The racial prejudice is less in southern than in northern California, and Oregon and Washington are more tolerant than California. Wild stories in the newspapers tend to increase the mutual misunderstanding. Impartial observers admit that if they formed their opinions only from the newspapers, they would be convinced of the danger of the "Japanese menace."

*This is the third of a series of articles furnished by the A. L. A. Committee on Work with the Foreign Born. ELEANOR E. LEDBETTER, *Chairman.*

Thus we are told that Japan was about to spend \$50,000,000 for propaganda in this country largely thru the purchase of country newspapers. Another traveller solemnly alleged that the Japanese were responsible for the present lamentable famine in China; and so it goes. Now the people, fed on such information, cannot help but absorb it. If you hear a statement often enough, it begins to sound plausible. So a city superintendent of schools assured me that in ninety years California would be occupied by more Japanese than white people: one of my colleagues believed that Japanese immigration was absolutely unrestricted, and that California was being flooded with laborers, and a usually well-informed editor could print without comment a statement that the 'survival' of Japanese births over deaths was twenty-six times as great as that of the whites! (*Atlantic Monthly*, v. 127, p. 544, April, 1921.)

Yet often when the Japanese have gone into a community they have improved it. A pamphlet on California and the oriental published by the California State Board of Control in 1920 gives examples of the change from sheep pasture to rice fields where the Japanese have settled.

Altho the housing conditions in most agricultural districts are deplorable, Japanese, if are given an opportunity, clean up the houses, freshen them with white paint, and even plant flowers in window boxes. Social workers in Los Angeles comment on the improvement. In 1896 the Eighth Ward, popularly known as the "de bloody ate" had a population of 12,000, sixty-five saloons and two churches. Many groups of foreigners passed thru the district; now it is largely filled with the homes and stores of Japanese and is known as "Little Tokio." When they came it was in a dilapidated condition. Soon saloons, pool-rooms, and junk-shops displaying their stock on the streets gave place to up-to-date shops, with American drugs, clothing, books, toys, and groceries for sale. Fortunately the picturesque element is not quite lost. Rice cakes, mushrooms, dried fish and Japanese pottery are for sale, and in March, at the Feast of the Dolls, the fascinating emperor and empress dolls with their retinue and all their belongings—lacquered table service, tray, bowls, cups and pot all complete, lacquered bullock carts drawn by bow-legged black bulls, lacquered palanquins (the conveyance of the nobility in old Japan), tiny brass hibachi with tongs and charcoal baskets, tiny combs and mirrors, everything a doll could need—are worth a long journey to see.

Little Tokio has its associations and clubs for men and women. In Los Angeles there are ten Christian Japanese churches, most of them self-supporting, one Shinto and four Buddhist temples. Thru their own charitable organizations they support homes for women and children. Most of their churches have classes where English is taught, and several have kindergartens where children can learn English before going

to the city schools. The Japanese Y. W. C. A. and other clubs for women, boys and girls and the Mikado Band are all directed by intelligent socially minded Japanese alert to the need for self-expression.

During the war the Japanese organized for Red Cross work, and rented a store-room where the members met three times a week under the direction of the American chapter house. From the head workers they received the highest commendation for their excellent work. Altho citizenship is denied them their patriotic and humanitarian interests found expression in the purchase of Liberty bonds and contributions to the welfare organizations.

Miss Oliver, a teacher in the Hewitt Street school in Los Angeles says:

As a rule the Japanese display good taste in their buying and make good customers. An American who for fourteen years conducted a grocery business on East First Street considered them his best customers. "They buy the best, and pay the price. All a Japanese asks for is courtesy. I can fill my store with Japanese children, leave it and when I return I will find it just as I left it."

That the Japanese make good neighbors is the verdict of a French woman who has lived in that district for many years. "They never borrow; they are quiet, and they mind their own business."

When surprise was expressed to a Mexican woman that she, her sister and her daughter chose a less lighted street occupied by Japanese in going to and from entertainments, she replied, "Oh, we are not afraid of this street. I will say for the Japanese man, they never say anything to us; they are not like some men."

There are many conservative parents among the Japanese people who are unwilling to have their children learn the modern dances; and who are ever on guard lest their boys and girls become "sporty" or too fresh." . . .

"Do the Japanese assimilate American ways and ideals? is a question that is asked many times. Could those who ask the question visit in many of the Japanese homes, attend their recitals and entertainments, hear them play upon the different instruments and sing our songs, they would receive a satisfactory answer. . . .

In our club work the boys and girls are allowed to arrange the programs for entertainments, parties, holiday celebrations and carnivals. They assume the responsibility and work untiringly in their efforts to make these a success, and everything is carried out along American lines. The business meetings of the clubs are conducted with much dignity. . . .

So thoroly American are they in their ways and their interests that one is surprised that the question is ever asked whether the Japanese assimilate American ways. The American Japanese boys and girls are taller, stronger and fairer than those of corresponding age born in Japan. There is gradually coming a change in the expression and features of the American Japanese, due partly to the use of the English language which brings into use muscles of the face that are not used in speaking the Japanese language.

"Will they make good Americans?" is another question frequently asked. I know of no one who has a greater admiration for Washington and Lincoln and the ideals for which these great men stood, than the Japanese people. . . . Last year when the Boy Scouts were planning to celebrate Roosevelt's birthday,

there seemed to be some doubt as to whether the Japanese Boy Scouts would take part in the general celebration. The matter was taken up in the club, and they decided that they would raise the money among themselves, "buy a tree, secure a plate and plant the tree in our yard." . . .

I have had an excellent opportunity to become acquainted with the boys and girls as pupils, on their play-grounds, in club meetings, sewing and cooking classes, parties and entertainments, and have found them interesting and delightful to work with. Their courtesy and thoughtfulness are refreshing, and the hearty co-operation and appreciation of their parents exceedingly gratifying.

A few years ago a lecturer who had visited several California libraries amazed her audiences in the east by declaring that Japanese never went into libraries. Certainly she had not visited the children's rooms of branches near Little Tokio, filled with almond-eyed boys and girls after school and on Saturdays. The children are always clean, careful of their books and more honest about paying fines than are many Americans. They are omnivorous readers, with a preference for serious books. When the classes from cosmopolitan schools come to the children's room for a lesson in the use of the library the Japanese children are quick to learn the arrangement of books and are even more intelligent than other children in playing cataloging and classification games.

Perhaps the sixth grade comes to study the geography lesson, and the children's librarian has ready analytic references to material classified in many places, for the modern teaching of geography refuses to be confined to the 910's and the ordinary subject cards do not bring out the information about oil districts in Russia, the founding of Petrograd, the Nizni-Novgorod fair for the children studying Russia, or on Holland as a dairy country and the growing of bulbs. Here too the teachers comment on the keen minds and close application of the Japanese children and their eagerness to learn.

The older readers prefer serious books: histories, philosophy, economics, standard fiction—George Eliot and Victor Hugo are popular, but lighter fiction, especially love-stories, make no appeal. Motion picture producers say that there is an enormous demand for films in the Orient; the people are eager to learn western ways; but any outward expression of feeling must be eliminated—kisses and embraces are considered bad form. So in translations of English novels into Japanese a row of asterisks often represents what American readers consider the climax of the story.

The Japanese want books about American government but as they can never become citizens they are sensitive about the study of civics. They ask for books in English rather than in Japanese but their own libraries and bookstores

offer a variety of examples of native literature.

Two attractive book stores in Los Angeles are well-stocked with Japanese books and magazines. Most of the books are published abroad, but Los Angeles has three Japanese dailies, and a monthly, *Japanese Women*, published at 238 North San Pedro Street. The Keats number of the *The Rising Generation*, published in San Francisco, is an interesting example of the bilingual periodicals. In addition to selections and explanations of English classics it gives news items from America and Japan, a chapter of a story by Jack London and English versions of the Mikado's new year poems.

The literature of Japan is discussed authoritatively in Aston's "History of Japanese Literature." A recent translation of three "Diaries of Court Ladies of Old Japan" (Houghton 1920) gives a suggestion of the literary art of the country in the eleventh century, when the ability to write verse was not the birthright of a few, but every person of rank was accustomed to receive an exquisite verse written on the spur of the moment and was expected to reply at once in kind.

Japanese poets still write verse on New Year's day on the subject chosen by the Mikado. There have been several translations published, showing the careful workmanship of the Japanese poets. In their delicacy, sure touch, and definite form they resemble French verse.

Fairy tales that have interested generation after generation of children are found in Teresa Pierce Williston's "Japanese Fairy Tales" (Rand, McNally, 1904). Some of the most popular are "Little Peachling," the "Tongue-cut Sparrow," and the "Magic Tea-kettle." As the children grow older they are told stories of heroes, such as Raiko who at the emperors command destroyed ogre-like robbers, General Yoshitsuni and his faithful vassal Benkei, the forty-seven ronins, and Sakura Sogoro the peasant who at the sacrifice of his life and the lives of his wife and children saved his fellow peasants from excessive taxation.

There is no need for American libraries to supply books or magazines in the Japanese language; there is need for courtesy and impartiality in the library's method of approach to the Japanese, who are quick to feel the unfriendly attitude of many Americans and anxious to eradicate every racial peculiarity. The library and the school need only offer them fair treatment and an opportunity to see the better side of American institutions.

One library has established a deposit station in the Japanese fishing village at Terminal Island. Here there are almost a thousand Japanese, who go for long cruises, often for several

months, down to the coast of Mexico, coming back with tuna for the canneries. The Japanese association has a community house, where games and exercises in the gymnasium and plays are given and the Japanese pastor of the little Baptist church has charge of classes in English and the distribution of books.

Another group learns of the library thru the community singing in the Buddhist Temple. Every two weeks in a room hung with Japanese posters a university student leads the audience in lusty singing of American songs, everything from "Li'l Liza Jane" and "Bubbles" to "America." This generation of young people is responding and rapidly learning to enjoy this form of recreation. Americans who have never heard Japanese sing are surprised at their clear sweet voices and tuneful singing. After the songs there is some other entertainment: a Japanese trio of piano, flute and violin plays Mozart, or an American sings. It is a curious commentary on our methods of Americanization that we offer them cheap popular songs, while they choose classical music for themselves. Sometimes perhaps the children's librarian tells heroic stories which appeal to school-boys, whether Japanese or American.

The Japanese Christian Institute and the various denominational missions are glad to work with the library. These organizations have sewing and English classes for the women and arrange for groups to visit the library. Typical of their friendly courtesy was the reception of a library assistant who went to ask what her library might do for the Institute, and came away with gifts of Japanese magazines for the library. She was shown the Institute's excellent Japanese library of 2000 volumes, many of them translations from European works, and the reading-room open to everyone, where fifty Japanese periodicals and newspapers are available in approved library binders. The Institute offered, furthermore to send magazines to the Japanese colony at Terminal Island.

The Japanese do not ask for special privileges. They will be satisfied if equality of opportunity is given to all races. The recent book by Walter B. Pitkin "Must We Fight Japan? (Century 1921) shows the inevitable result of discrimination and repression. He shows the social characteristics of the Japanese, minimising neither their undesirable qualifications nor their position in this country, but emphasizing the dangers of our allowing aliens not part of the nation to live in this country and to become enemies of our own making, and of our being deluded by yellow journalism. His remedy is the subtle but sure one of mutual understanding and in this the library has a large part to play, for

the library as a democratic institution offers sympathy and equality of opportunity to all comers.

Reinforcements for the New Fiction Collection

AIMING to acquire enough new fiction for its readers' demands, the San Diego Public Library has devised a plan which other libraries may find useful. Ever since the war, library patrons have brought magazines to the box in the entrance hall of the building, where a poster announces that weekly distribution is made to camps, hospitals and branch libraries of the city. The *Saturday Evening Post*, *American Magazine*, *Ladies' Home Journal*, and *Delineator* are left here in large numbers. Realizing that military camps do not care for fashions and fancy work, and that issues older than three months are usually not appreciated gifts, Miss Mary Van Wagenen, head of the Business Department, hit upon the plan of extracting serial fiction from discarded magazine material. She staples the installments of the story into one volume and covers it with wrapping paper. She cuts the title out of the magazine and pastes it on the outside of the cover with an appropriate picture. A book card and date slip are put in the inside cover as for circulating magazines and a seven-day label on the outside. Many a popular favorite such as Mary Roberts Rinehart, Grace S. Richmond, or Peter B. Kyne have been worn to tatters before the serial has appeared in book form. The stories, which cost the library almost nothing, circulate from twenty-five to fifty times, and are even on the reserve list.

Effective Publicity in Dallas

THE Dallas Public Library during the last week in January arranged an exhibit in one of the large display windows of the Nieman-Marcus Company, Dallas, with the thought of stimulating greater interest in good books and of enlarging the library's clientele. The exhibit, the work of Librarian Betsy T. Wiley, was attractively arranged with a chart as a background showing the Library as the center of Dallas, with arrows radiating to the various business men, professional men, teachers, and others who find inspiration, entertainment and knowledge in the library. The display featured books on costume and design. An attractive hand-colored card invited the public to make free use of the library facilities, and Miss Wiley already reports increased interest.

The University of Washington Library School

By W. E. HENRY, Director

WHETHER the University of Washington Library School filled a "long felt want" or not, I am not quite sure, but that it did supply a much felt need, I think there is no doubt. Whether or not these paragraphs are significant in the entire history of library schools, the history of this particular school is like "the annals of the poor," it is "short and simple."

When I came to the University Library in 1906 and Mr. Judson T. Jennings came to the Seattle Public Library in 1907, and Mr. Franklin F. Hopper, now of the New York Public Library, took charge of the Tacoma Public Library in 1908, we all found ourselves much hampered in building up our respective staffs for want of well-prepared people.

We found, as all have found in the Pacific Northwest, an excellent supply of keen, intelligent, wide-awake, academically well educated young people, ready in spirit for any kind of service, for the people who have migrated to the westward for a thousand years have been the keen, energetic, venturesome, and progressive. The west Coast has been well supplied with educational institutions of good standards for half a century. It has had few professional schools. Until 1911 the nearest library school was 2,200 miles east of us—the Wisconsin Library School.

Farther east and nearing the Atlantic Coast were several good Library Schools, but none nor all of these solved our problems satisfactorily. Their output was largely absorbed by the East and the so-called Middle West (which would more appropriately be thought of as Middle East). Our libraries, then just getting under way, could not offer financial inducements or professional opportunities that compared favorably with the many libraries east of the Mississippi, especially when we must add to these differences the fact that coming to the West Coast involved an expensive journey of from 2,000 to 3,000 miles.

However, with all these handicaps we did secure a few who were willing to make the sacrifices necessary and, as was to be expected, they were a high-class, well-prepared group of persons, and these, more than any other single influence, made our libraries successful.

We could not secure from the East an adequate supply for our demands, and that this School was established when it was (September 1911) was due chiefly to the urgent requests for such a school oft repeated by Mr. Jennings and Mr. Hopper, seconding my own willingness.

Those of us who had to do with establishing

the School believed then, as I assume we all do yet, that the best location for a library school, all other influences equal, is in connection with and as an integral part of a teaching institution—a college or university—so the University of Washington was selected as the location for the School.

As a partial inducement toward such an establishment, Mr. Jennings offered to discontinue the apprentice class that was being conducted annually in connection with the Seattle Public Library, and he has not since conducted an apprentice class.

Mr. Jennings and the Seattle Public Library have not only co-operated with the School in the discontinuance of the apprentice class; but, what is much more significant than that, they have thrown open to our students the finest possible opportunities for practice work in the Seattle Public Library, and I want publicly to acknowledge the fine co-operating spirit the entire staff of the Public Library has shown in giving their most sincere and intelligent attention to the training and welfare of our students.

Of the three hundred hours of practice done by our students, about one-half is done in the Seattle Public Library and one-half in our own University library. Each library directs the particular type of practice that is distinctive of the type of library. We consider ourselves and our students distinctly fortunate in securing such opportunities for the laboratory phase of our work.

We are also enabled thru the generosity of the Seattle High School administration to secure practice opportunities for such of our students as want to enter upon high school library service.

For a few years following the founding of the Library School in 1911, our classes carried their professional courses in conjunction with the Junior and Senior courses in the academic colleges, so that our first class did not graduate until 1913, altho we have never attempted more than a one-year curriculum in the Library School. Beginning with 1913 we have graduated an average of twelve students each year, the size of the classes ranging from seven to twenty-three, but usually close to the average.

Our teaching staff has been made up of persons who were regular members of the University Library Staff and, all but one, graduates of well-established library schools, usually persons of considerable experience in library service, but never with so much experience that adjustment to new conditions was a painful process, nor with minds sealed to new conceptions. Our

teachers have been selected largely because they had ability to teach. When they have not shown such ability they have been released from teaching obligation. I am firm in my conviction that no one can teach efficiently who lacks enthusiasm for the subject taught, or who is deficient in human interest, as distinguished from mere subject interest. He whose chief and most fundamental interest is other than the welfare and success of his students is not a good teacher. Of course we must assume adequate knowledge of the subject taught.

The most fatal defect in all universities is poor teaching. In our whole educational system the pedagogy grows less and less efficient from the early grades of the public schools up to the universities, because our teachers farther toward the top are selected for their subject interest and mastery and not for their teaching interest nor for their human interest. My own insistence is that the School shall have good teaching whatever else it may not have.

Whether the Library School teacher shall be a teacher only, or whether she shall devote a considerable portion of her time to a staff position, admits of difference of opinion. My own notion and our practice is the latter and we are satisfied with its results.

Out of our one hundred and twelve graduates all but three have succeeded well in their work. They have been successful and a fair percentage of them have possessed that hunger for advanced work in their profession which is the hope of all professions. They have refused to be satisfied with what our school and our environment could give and have gone to two year schools for advanced instruction, and many of them have gone East for varied experiences in different types and systems of library service.

The distribution of our graduates is largely in the western states, naturally so; yet for a school so young they are fairly distributed and can be found all the way from Massachusetts and New York to California.

No one possesses our library school certificate who does not also carry the baccalaureate degree from our own University or some other university of equal rank and standards. We do not yet demand college graduation for admission to the Library School, but twenty-seven per cent of our registrants have been college graduates on entering the School.

Our curriculum is devoid of all frills. We attempt to do only the essential things and to prepare our people to enter upon any phase of ordinary library service, and we think they have sufficient foundation both in academic and professional education to specialize in any line that happens to appeal to them after entering general service.

We are sure we cannot specialize in our instruction in a one-year curriculum. We do, however, place a little stronger emphasis upon the special interest of the individual student if the student is sure enough what is his special interest. This is done, however, largely in his three hundred hours of practice rather than in his instruction, which leads me to remark that we never ask a student to do any service in his practice simply because it is a service we need to have performed. The practice work is selected and arranged for the good of the student, not for the good of the library. We never use a student as an apprentice.

We call to our assistance as lecturers from outside the School only those persons who come fresh from their own work in some nearby library and ask them to speak only on those specific subjects most familiar to them and which will serve as a finishing to some subject already dealt with in the curriculum. These are concentrated near the end of the year. We never permit our classes to be disturbed from their regular curriculum simply because some one comes along who wants to talk. A good speech in the wrong place is never tolerated. Lectures are given only for the service of the students; never for the good of the lecturer, never because a notice of it looks well in print.

Yiddish Publications of America

THE following corrections to the List of Yiddish Publications in the United States, prepared by the A. L. A. Committee on Work with the Foreign Born for the LIBRARY JOURNAL of December 1st, are furnished by the Foreign Languages Information Service.

ERRORS

1. The Jewish World of Cleveland, Ohio, is listed as the Jewish Press.
2. The Jewish World of Philadelphia and the Jewish Times of Los Angeles are marked as Orthodox. Both are independent, progressive papers.

Libraries and Museums

V. Mr. Frisky and What He Proves

By LOUISE CONNOLLY

In the note of explanation which preceded No. V., on "The Memorial at Pinnacle," I stated that Miss Louise Connolly, the Educational Adviser of the Newark Library and the Newark Museum, wrote the memorial sketch just before she went on a month's tour in North Carolina speaking for Better Movies. While stepping gaily about North Carolina, from lowlands to hills and from hills to mountain crags and back again, she wrote this story of the wide and deep influence of a mere dead squirrel when cunningly expounded by a master in the art of presentation.

I am adding this to my very prosy series of articles on Libraries and Museums, partly because I am sure it will be enjoyed by even the most solemn of guardians of children's morals and tastes and the most profound of the surveyors of our half-acre vineyards and the most intense of the certifiers of the laborers who are, as once in Palestine, far too few.

But I print it chiefly because it illustrates so admirably the conclusion to which our observations long ago led both Miss Connolly and me; the conclusion, namely, that in visual instruction the object is minor, and the manner of presentation preëminently major. It is hardly too much to say that, in the fields of history, geography, ethnology and natural science, an equipment of material obtained at a cost of, say, a thousand dollars, accompanied by skilled presentation costing, say, ten thousand dollars, is far more useful, helpful, suggestive, instructive and moving, than are ten thousand dollars' worth of objects, poorly presented by a thousand dollars worth of skill and brains.

It is not things that our museums need; but skill in presentation. Of things it may almost be said that all museums have too many. And it may also be said that nearly all museums, no matter how glorious their achievements in the fields of acquisition, verification and installation, are not inviting, or illuminating, or used.

But this has all been said in a previous number of this series. It is touched on only to introduce the suggestion to librarians that if the idea of museums in libraries is to them of interest, they will find in the sketch which follows the hint that a few quite unimportant and inexpensive objects can form the total apparatus of an engaging and useful museum.

J. C. D.

I WENT to a dozen places in Georgia last June. I have been to eighteen places in North Carolina this November. And with me I have taken Frisky.

Frisky is a common reddish-gray squirrel with well-developed tail, rather poorly mounted on a broken branch precariously attached to a plain wooden slab. I carry him, and a disreputable flat-backed mole and a few quartz crystals and eight or ten financially valueless pictures mounted on thin cardboard, all neatly packed in with my underwear in a compo-board box a little thicker than my grip, but shorter. It is painted black. Its cover is fastened by hinges and an unassuming hasp and hook, and its handle is a very thin piece of rope run through two holes, held in its place by knots, and wound about with a yard of narrow black ribbon—a piece of luggage that offends not the most fastidious porter.

I go from place to place making friends for a constructive movement to better motion pictures. I find that whenever the movies are mentioned the Average Citizen or Citizeness shakes his head and declares, according to his degree of conventionality, "Something should be done to regulate the movies," or "Something should be done to clean up the movies," or "Something should be done to suppress the movies." That is, practically everybody thinks that the motion

picture is a powerful agency, chiefly deleterious in its influence on the young, and wants something inhibitory or prohibitory done to it.

Meanwhile, Frisky on the bureau in my room causes among maids and bell-boys astonishment, curiosity, excitement. They seek opportunities for peeping into and entering the room. They manufacture excuses for remaining. They cast eyes at Frisky as they profess anxiety for my comfort. They make devious exits to pass him as he perches. The socially courageous put dubious fingers on his back and pay him compliments. More than half of them ask if he is alive, and all of them inquire as to his personal relations to me. Is he a former pet, from whose dear remains I cannot bear to be parted? Is he a trophy of my skill in hunting? The addition of the mole more than doubles the interest. Had I intentionally devised an experiment to test the drawing power of a stuffed animal I could not have done better than to travel with Mr. Frisky.

I use him in a simple twenty-minute lesson in ethics, given chiefly in high school assemblies, or to the intermediate departments of Sunday Schools. Hence I sometimes pass thru a hotel lobby or for a short distance along a sidewalk with Mr. Frisky in hand. I am followed, on these occasions, by a ripple of excitement. Commercial travelers and local upper class loafers,

family groups, sophisticated room clerks, all gape and comment.

In my opinion nine-tenths of the people thru-out this state never saw a stuffed animal of any kind, and never thought of a museum as a place having any possible personal interest for them.

I have several times, in a train, taken Mr. Frisky from his box and presented him to a crying child as a diversion. It works. Not only the fretful child, but every other child and adult becomes absorbed. Elderly white women move their seats and enter into conversation, and young men lean forward to listen. "No, I was not acquainted with him in his life time. I got him from a museum. They lent him to me. I am to return him when I have finished using him. I use him in teaching." Marvelous! Marvelous first that museums containing such wonders should be. Marvelous second that a museum once obtaining a wonder of this sort should consent to let it travel about like this. It might be lost, or injured.

When I enter a school house with Mr. Frisky the interest of the high school pupils is just as naïve and concentrated as is that of the first grade.

I feel that the brief lesson that I give, using this small assortment of tangible material, is engraved for life on the minds of practically all of my adolescent audience, and that ninety per cent of this intensity of impression is due to the use of the material.

In a few places I have been asked into a primary grade while waiting for the upper grade assembly to convene. There I tell a little squirrel story. It is a good story for the grade, and closely related to the squirrel in hand; but many of the children hardly hear it, so absorbed are they in the pleasure of Mr. Frisky's tangibility.

I went into the four first grades of one public primary school in Goldsboro and showed them my squirrel. Next day I met the principal of the school at a banquet. She said, "You'll have to stay over a day and come back to my school. The second and third grade children are bitter over the favoritism shown the first grades. They say, 'What have we done? Why didn't you bring that squirrel woman to us?'"

In Greensboro I passed a kindergarten waiting before its building for its doors to open. I had Mr. Frisky in hand. Those children literally swarmed over me. The bravest put out exploring fingers and touched Frisky. The most timid while shrinking from him, yet laid violent hands on me. They poured out questions. And one, on learning that he was not alive, confronted me with, "Now ain't you 'shamed that you killed him?"

What I want to know is this: Since Average Citizen is so sure that the wicked Motion Picture People, in order to make money out of the parents are luring the children of our nation to moral destruction by the attractiveness of their pictured wares, why doesn't he spend a tiny bit of the taxes, which surely could justifiably be used for so laudable a purpose, in setting up as counter-attraction a live museum covering such extremely simple objects as my lesson involves?

There ought to be a museum of some sort in every city and a state museum in every state capital on the order of the extremely modest, half-starved, yet enormously useful museum serving the rural schools of the state as does the New Jersey traveling museum work established by Miss Helen Perry at Trenton, New Jersey.

I put up a duck once—a duck with iridescent neck feathers—in the Children's Room at the Newark Museum. I put no glass protection over it, and no prohibitive sign beside it. And then I watched the people and kept tally of their conduct for several days. Seventy-eight per cent of the adults and ninety-two per cent of the children who entered the room smoothed that duck. Watching a moving picture has its charms. So has smoothing a duck's back. These charms differ. Why spend all the enthusiasm of public conscience on smothering the call of one when there is such an expanse of unexploited territory wherein to cultivate the other?

The Future of the Concilium Bibliographicum

In *Science* for January 6, Dr. Vernon Kellogg of the National Research Council writes on a temporary reorganization of the Concilium Bibliographicum, the continuance of which seemed doubtful after the death of the director, Dr. H. H. Field, last year. Prof. J. Strohl of the Zoological Institute of the University of Zurich is to act as the director of the Concilium Bibliographicum. As to funds, the Concilium has an annual subsidy of 5,000 Swiss francs from the Government of Switzerland together with 1,000 Swiss francs from the Canton of Zurich. Further, the Rockefeller Foundation has pledged a certain financial assistance till Jan. 1, 1927, being \$20,000 for 1922, \$20,000 for 1923, \$15,000 for 1924, \$10,000 for 1925, and \$5,000 for 1926.

"Thus the Concilium has," as Dr. Kellogg writes, "thanks to the generous action of the Rockefeller Foundation, a new lease of life and Dr. Field's noble and self-sacrificing work and his plans for increasing the Concilium's usefulness are not to go unregarded."

J. B. C.

Branch Libraries in Schools in Washington

LIBRARIANS who may have read the reports of the Public Library of the District of Columbia have perhaps noticed references during the last 10 or 12 years to recommendations that a plan be worked out in co-operation with the public schools whereby the public library needs of suburban residents should be met from branch libraries in school buildings. Several years ago the plan was adopted "in principle" by the authorities, library, school and District Commissioners. A detailed plan has now been worked out and has just been adopted by library and school boards. The library board has decided that all separate branch libraries shall be confined to thickly built up portions of the District of Columbia; the library and school boards have agreed that to supplement the separate branches there should be a series of branches, sub-branches and stations in school houses to furnish library service to the school and adult population of the less thickly settled and suburban populations of the District.

With the thought that the Washington plan (all of which is yet to be carried out) may have suggestions for other cities, the joint report of the Superintendent of Schools and the Public Librarian, just adopted by school and library boards, is offered to other librarians, minus purely local details.

G. F. BOWERMAN.

Report to the Board of Education and the Board of Library Trustees

THE POLICY OF THE BOARD OF EDUCATION

The Board of Education desires to co-operate with every department or agency of the municipal government in the furtherance of its plans. As citizens of the District, interested in its general improvement, the Board would naturally look with favor on assisting the Library Trustees in the development of a comprehensive plan for extending library facilities.

The Board is also directly concerned with the development of such increased library facilities because of the direct service which they will render the public school children. The Board of Education, therefore, cordially approaches the consideration of the subject of branch libraries in schools because of its belief that a library may be a large factor in the education of the pupils of the public schools.

THE POLICY OF THE BOARD OF LIBRARY TRUSTEES

The Board of Library Trustees having the direction of the Public Library, which the Act of Congress creating it declares to be a "supplement of the public educational system" of the District, conceives the functions of the Public

Library to include not only the supplying of educational facilities to the entire population when they leave school, but also the supplying of books, pamphlets, magazines and pictures, and skilled help in the selection and judicious use of such material to the entire school population. This service the Board of Library Trustees desires to render not only in and from the central library and one branch as at present, but also thru a system of branch libraries, including separate branch libraries and branch libraries, sub-branches and stations in the Public Schools.

Separate branch libraries are proposed approximately as follows: The report then lists seven separate branch libraries, one of which is in operation, another of which is about to be built, and five of which are badly needed, but not yet provided. The report lists one of these separate branches as "problematical," since the section to be served has a stationary or diminishing population. The establishment of a branch library in a junior high school in the section is recommended, with the idea of determining by experience whether it may not sufficiently serve the needs of the community.

Branch libraries in public schools of three types are proposed: (1) Ten branches (seven to twelve hours of daily service); (2) Nine sub-branches (twenty-one hours or more weekly service); (3) Eight stations (four hours or more weekly service). These ten proposed branches are designed to be placed in junior high and elementary schools, located chiefly in suburban sections. Such branches will have their own book stocks and staffs and will be open during school hours, afternoons and evenings. The nine sub-branches are to be conducted by the staffs of neighboring branches. They will have small permanent collections of books which will be augmented by loans from the central library or neighboring branches. Service will be arranged to suit the school and community; e.g., two mornings, two afternoons and two evenings. Some will be operated in groups, with alternate service. The eight stations will be still smaller collections, open once or twice weekly; e.g., once in school hours and one evening.

PROCEDURE IN THE ESTABLISHMENT OF BRANCH LIBRARIES

1. When the Board of Education plans a new building, or the enlargement of an old building, it shall consider the desirability of making provision for a school branch library. Its conclusion should be based upon the location of the new school building in relation to the program for branch libraries in schools proposed by the Library Trustees.

2. If the Board of Education decides to include provision for school branch library, the Board shall indicate to the Library Trustees, the location, size of room, and other proposed facilities for such advice and suggestions as the Library Trustees may care to offer. If the Board of Education decides not to include provision for a school branch library, the Board shall so inform the Library Trustees.

3. Nothing indicated under 1 and 2 above shall be understood as precluding the expectation that either board may at any time invite the attention of the other board to the consideration of any subject in connection with the establishment of branch libraries in the schools.

4. Plans for the permanent equipment of the room shall be prepared as are other plans for schools and in addition after consultation with the Public Librarian.

EQUIPMENT OF BRANCH LIBRARIES IN THE SCHOOLS

1. The Board of Education shall provide for all physical equipment for the library which is a permanent part of the room, such as built-in shelves, closets, toilet facilities, cloak rooms, etc.

2. The Board of Library Trustees shall furnish and be responsible for all moveable equipment, such as tables, chairs, desks, map and periodical cases.

3. The Board of Library Trustees shall also furnish and be responsible for all books, pamphlets, periodicals, maps, technical library supplies, including typewriters when needed.

MAINTENANCE

1. The Board of Education shall furnish and pay for heat, light, soap, towels, janitor service and telephone service for the branch libraries in the schools. Such janitor service shall cover days when schools are not in session and be paid for in accordance with regulations to be established by the Board of Education governing such service.

2. The Board of Library Trustees shall furnish and pay for all professional library service in the branch school libraries, including transportation of books and all library supplies.

ADMINISTRATION OF BRANCH LIBRARIES IN THE SCHOOLS

1. In all matters concerning the professional conduct of the branch school libraries, the library staff shall be considered a part of the staff of the Public Library and all appointments and transfers shall be made by the Public Librarian.

2. In all matters concerning the heating, ventilating, care of rooms and, in general, the

physical side of the school branch library, the library staff shall be considered a part of the school organization. In the above matters the principal of the school shall have the same jurisdiction over the librarian of the branch library that she has over teachers. The relation of the library staff to the janitor shall be thru the principal of the building in all cases when the principal is in the building. In the absence of the principal, the janitor shall serve under the direction of the branch librarian.

3. All questions that arise relating to the administration of the school libraries shall be handled by the Public Librarian and the Superintendent of Schools, subject to instructions from their respective boards.

4. The schedule of hours of opening any branch shall be by agreement between the Public Librarian and the Superintendent of Schools.

5. The regulations made by the Public Librarian for the use of branch libraries in Public Schools by the public school pupils shall be subject to the approval of the Superintendent of Schools.

Sponsors for Knowledge—A Working Plan

IN the January issue of *Filing and Office Management* George W. Lee reports on the progress made in obtaining "Sponsors for Knowledge" since his article in the issue of October, 1921, which explained the idea and listed forty or more representative topics for which sponsors should be found.

"Sponsors for Knowledge," he explained then, "is a catchy phrase, the underlying idea of which is for individuals to accept topics on which they will be enthusiastic to put questions in the way to getting answers. . . . According to the new plan, which is now under way in connection with the Boston Public Library, sponsors are expected to make lists of sources of information with reference to their respective topics. (Incidentally this Boston plan will afford an experiment station on which the sponsorship committee of the A. L. A. can base the report for the next annual conference.) . . . The sponsorship movement is towards standardization, the sponsor establishing sources of information by turning in to the public library, as a clearing house, a sheet, or else cards, telling where to look for information on his topic."

Mr. Lee is of the opinion that if sponsors' reports were made at library conventions, shaped in the form of motions, and voted upon, it would be possible to point to more progress in library matters than has been the case in the past. He says: "As most of the executives of the A. L. A. and of other library associations will doubtless

agree, it seems unfortunate that, after more than forty years of library conventions, there has been so little attempt to vitalize, thru discussion and vote, the essential points in papers and addresses at the many sessions." Progress would inevitably follow a definite stand on matters of practice taken from year to year.

Since the writing of the first article reports have been received on several topics. The assistance of students of a graduate engineering course at Harvard was enlisted for the compiling of a list of trade directories. Twelve references on Sources of Prices of Commodities Covering a Period of Years were received from the student who had undertaken the research. The list will be swelled in course of time by the inclusion of daily and weekly papers and trade journals.

The student who selected the topic of Resources for Getting at Home and Business Addresses was obliged to spend twelve hours in listing twenty-three directories, but Mr. Lee believes that the number should be quadrupled even tho the work take a corresponding amount of time, and that the list should be classified in greatest detail, covering various aspects of commercial, social, professional or transient addresses. "Questions of this kind are frequently referred to librarians, and the time consumed in answering them by rule-of-thumb methods is often appalling." Harold T. Dougherty, librarian of the Newton, Mass., Free Library, is sponsor for the question of Availability of Lantern Slides. Slides can now be borrowed from the Department of Agriculture and many universities, and borrowed or purchased from the J. Horace McFarland Company of Harrisburg, Pa., and the Conrad Slide and Projection Company of Chicago.

The sponsor for Sources of Information on Statistics of Cities, States and Countries used the State Library, Boston Public Library, Harvard libraries, Chamber of Commerce, Sampson and Murdock Company (directory publishers), and the Social Service Library. In the interests of co-ordination every one of these organizations should be further consulted before the list is actually published.

Resources for Getting at Dates of Coming Events a difficult subject to handle, include, in Boston, the Public Library, the Twentieth Century Club, the daily papers, "This Week in Boston," "Ask Mr. Foster," and others.

Vocations and Avocations for Elderly People is a list which has met with high approval and will be available soon. Other sponsors reported on engineering handbooks, sources for Canadiana, and publications that give regular space to business conditions.

For Better Service in New York City

IN reply to a request from Director Edwin H. Anderson for suggestions for the improvement of library service the Staff Association* of the New York Public Library has recently submitted to the Director and Board of Trustees a report embodying a series of recommendations covering the service in both central building and branches.

The immediate cause of the report was the recent cut in library appropriations by the city government, which leaves the library \$60,000 from which to provide books for the coming year, with no prospect of replacing a rapidly diminishing book stock unless an equal amount is appropriated from collections for fines.

The staff recommends, primarily, a city-wide campaign for books and money in 1922, with possible later establishment of a publicity department for the library in charge of a full-time publicity expert. Another major step towards relieving the demand for books which the library cannot furnish would be the installing of pay duplicate collections in the branches. Economy in the administration of the branches themselves could be effected by the discontinuance of circulating books on holidays, while leaving the buildings open for reading.

PUBLICITY

The reading public is entitled to know why service has been curtailed. It could easily be informed regarding the resources and limitations of the library by charts placed in the branches illustrating graphically the increase in book use within the past few years and the decrease in book stock and book money.

Information would lead to a sympathetic understanding of the library's limitations and at the same time pave the way for a direct appeal to the public for books. Publicity emphasizing only the limitations of the library, which seems to have a negative and depressing effect, might well be abandoned for more cheerful emphasis on what the library is already able to do for its patrons.

A campaign for books in 1922, possibly held during the national library week projected by the A. L. A., would prove not only a desirable means for increasing the book stock but a strategic move toward a better appropriation in 1923. Carl H. Milam, secretary of the A. L. A., says in this connection: "The general enthusiasm for the library which comes as a result of a campaign more than compensates for any feeling on the part of the City Government that it can shift the responsibility for support." The week

* Mary Frank, chief of the Extension Division, is President.

could be distinguished by a spectacular appeal for books from the steps of the main library, by literary gatherings at branch libraries addressed by prominent authors and publicists, a reception in the evening when the public could be conducted thru the workrooms for a demonstration of interior operations, and an "old home day" for books long overdue. One day might be designated for the receipt of gifts of money.

PAY DUPLICATE COLLECTIONS

It is reasonable to suppose that a reading public, restive under the necessity of waiting from six months to a year to borrow such enduringly popular books as "The Education of Henry Adams" or Wells' "Outline of History," would welcome the opportunity of renting them for a small fee. Replying to the objection that the New York public would not countenance "pay" books in a free library, the Association points out that a pay book is always a duplicate of another in the free collection, so that no one is actually obliged to pay for any book; that after rentals have covered the first cost of the pay book it is added to the general book stock; and that such a collection has been operated for years in Brooklyn, part of the city of New York. A further argument is that since about half the book fund for 1922 will come from money paid for fines, the public will pay for books by direct levy.

Quoting Secretary Milam again: "Duplicate pay collections seem to have been accepted by librarians, trustees, and the public generally as a perfectly desirable and natural feature of library service."

Opposition from fiction libraries is not much to be feared, since their managers are generally agreed that anything that stimulates the reading of books also stimulates the sale of books.

OTHER SUGGESTIONS

Other recommendations cover the strengthening of the present inadequate messenger service by establishing a central follow-up bureau with motor cycle messenger service attached; the simplification of the central registration system; an increase in fines from one cent to two cents a day; a biennial rather than an annual inventory, and a time restriction on books borrowed by children.

For improvement of service at the central building it seems desirable to assemble a special corps of research workers, resembling somewhat the docents supplied by museums, which would meet the demands for more intensive research work than can be expected of the regular staff, and business and professional men would probably be as willing to pay for this service as they are to pay for public stenographic and photostat service.

The long-needed information service at the Fifth Avenue entrance of the central building

might temporarily be furnished by the preparation of a classified index covering the subjects usually asked for, and indicating the division where the information may be found. This index would be supplied to the doormen in the form of a pocket guide.

For the staff itself is recommended the establishment of a retirement system and the granting of extended vacations after ten or more years of service.

A. L. A. Officers Proposed for 1922-23

THE Nominating Committee of the A. L. A., Arthur E. Bostwick (Chairman), Edna M. Sanderson, Milton J. Ferguson, Linda A. Eastman, and Edward F. Stevens, reports the following nominations for officers for the year 1922-23.

President: C. F. D. Belden, Judson T. Jennings, Andrew Keogh.

First vice-president: George B. Utley, Josephine A. Rathbone, Adam Strohm.

Second vice-president: Grace Rose, Annie C. Moore, Malcolm G. Wyer.

Treasurer: Edward D. Tweedwell, Louise B. Krause, Theodore W. Koch.

Executive Board: W. W. Bishop, Chalmers Hadley, Franklin F. Hopper, Dorsey W. Hyde, Jr., J. I. Wyer, Theresa Hitchler, Cornelia Marvin, June R. Donnelly, William R. Watson.

Council: Matthew Dudgeon, James T. Gerould, Edith Guerrier, Anne M. Mulheron, Charles J. Barr, Charles H. Brown, Earl W. Browning, C. H. Compton, Charles S. Greene, W. J. Hamilton, Alice I. Hazeltine, Herbert S. Hirschberg, Electra C. Doren, Clarence B. Lester, John A. Lowe, H. M. Lydenberg, Ethel F. McCollough, Anna A. MacDonald, Charles E. Rush, A. J. Small, C. Seymour Thompson, Caroline Webster, Harriet A. Wood, Jeannette M. Drake, George T. Clark, Harold L. Leupp, Ernest J. Reece, C. P. P. Vitz, Martha Wilson, Esther Johnston.

Washington Business Library Course

UNDER the auspices of the District of Columbia Y. W. C. A., Adelaide R. Hasse will give a course in business library work beginning February 15 and ending May 26. The class period will be from 7 to 9 on Mondays and Wednesdays and some outside practice will be required. The subjects are: Sources of Information, Reference Books, Business Literature, Care and recording of material in a business library, and proof reading.

The tuition fee for the course (60 hours instruction) is \$30.

In the annual Publications of the Historical Society of Southern California, recently issued, there is an eight-page article on the Henry E. Huntington Library by its librarian, George Watson Cole.

THE LIBRARY JOURNAL

TWICE-A-MONTH

FEBRUARY 15, 1922

THE executives of most libraries have to face a double embarrassment when confronted with decreased or inadequate appropriations. The demand of the public is for more books and the price of books has so increased with the cost of printing that fewer books can be bought with the same number of dollars. The only saving so far in the cost of books has been the considerable decrease in paper, as printers' wages have been increased, rather than decreased, because of the forty-four hour week. This would mean that saving in book costs would be almost solely in popular books of large editions, rather than in reference or other expensive books. In connection with a review of the past twenty years, it is found that the average cost per volume for the Brooklyn Public Library was 74 cents in 1901 and \$1.56 in 1921, but in the first year that Library was buying only for circulation, as the old Reference Library in Montague Street had not been incorporated with it. After the consolidation the figures increased and the dollar mark was passed in 1907-8. These figures confirm the general impression that the cost of books to libraries has nearly doubled. Further, it is more and more recognized that while it is necessary that a library should be fully equipped with books, the cost of service must substantially increase if the investment in books is to be used to best advantage. Library salaries have not kept pace with printers' wages and book costs, altho good service is more appreciated. Such facts as these should be brought by librarians and trustees to the attention of appropriation authorities throuth the country.

★ ★ ★ ★ ★ ★ ★

IN connection with Mr. Lee's excellent paper on suggestions for conventions, printed earlier in the year, one point should be pressed home

in the arrangement for A. L. A. conferences, namely, the supply of sufficient rooms for the many group meetings. At Swampscott, eight association meetings were assigned five rooms, and, happily, fine weather permitted the excluded three to gather on the lawn. It may be added that the number of such meetings must be kept down if there is to be time as well as space for the conference itself and other larger meetings, and it may be necessary to resort ultimately to the plan of using alternate years for the A. L. A. conference and for the smaller meetings. The larger associations, such as the N. E. A. and now the A. L. A., face difficulties in finding hotel accommodations for the numbers that gather at their call, and, indeed, the problems presented to convention committees are many and difficult, alike in providing for increasing numbers and in keeping down the programs to practicable limits.

★ ★ ★ ★ ★ ★ ★

THE estimate that the standard for library appropriations should be one dollar for each person in the community is likely to call forth some criticism and possibly misunderstanding. There was no suggestion or thought of a poll or head tax, a form of taxation which has been dropped from the statute book of most of the states, and any such impression should be corrected by any librarian who finds echo of it in the local press. The resolution as finally adopted carefully explained that this was a generalized standard, which, under special circumstances, would need modification in lessening that amount. On the whole, however, this round figure is as fair an estimate as could reasonably be made, and in a good many towns it is about a standard with exceptions to fit the particular case of the larger or smaller community.

LIBRARY ORGANIZATIONS

BIBLIOGRAPHICAL SOCIETY OF AMERICA

THE Society met on December 30th at the Hotel Sherman in Chicago in connection with the A. L. A. meetings. President W. W. Bishop was in the chair. He paid a gracious tribute to George W. Cole, the retiring president and read a letter of greeting from the latter from San Gabriel, California. He also read a letter from George S. Godard in which he enclosed his personal book plate and suggested that other members turn over to the custodian or secretary their book plates. Dr. Bishop said that another volume of *Papers and Proceedings* had reached the stage of page proof. As to the next meeting, he said it would probably be with the A. L. A. at Detroit with the possibility that it could be held at Ann Arbor in the new library building.

Professor F. I. Carpenter, trustee of the Newberry Library, read a paper on "Photographic Reproduction of Rare Books." Mr. Carpenter said that the increasing rarity of books wanted by libraries made it necessary to find some method of reproduction of these. Last June the Newberry Library sent out a list of proposed reproductions and Professor Carpenter's paper was largely based on the replies. He took up the question of processes and costs including the photostat, the Manul process and the collotype. He then discussed the question of co-operation and a central bureau. There seemed to be a general feeling that every library should not secure all the reproductions on account of the space and expense. There are two solutions for the problem; one is to have a central depository for negatives; the other to have a place of information about negatives. If there were a central depository it should be the Library of Congress which could then compile a list of its negatives for inquirers. Mr. Carpenter's final point was whether straight photographic reproductions were after all the solution of the rare book problem. His conclusion was that the collotype reproductions seem to be best if they can be afforded.

Discussion was animated and valuable. Mr. Bishop said that the photostat is an admirable copying machine but a poor publishing instrument. In the reproducing of the *Kentucky Gazette* and *Detroit Gazette* at Michigan, it was estimated that the making of seventeen copies reduced the cost only fifteen per cent over the making of one copy. Dr. Andrews described the Manul process which is not profitable unless about one hundred copies are wanted. The

negative is put on zinc. He referred to the cameragraph as having the advantage of printing on both sides of the sheet and reducing the cost but having the disadvantage of not being clearly defined. Mr. Hanson mentioned a reproduction made for the University of Chicago in which the securing of six copies cut the cost nearly in half. Dr. Richardson spoke of the need of copies of manuscripts for ready lending purposes. Mr. Bishop recalled the meeting to the question of a central depository. Mr. Gerould said, "We do not want to burden the Library of Congress unduly especially under present conditions. If cards could be printed for depository catalogs, enough larger libraries might subscribe for a series of such cards. Copy should be prepared by the library owning the reproduction so that the Library of Congress need only print the card." Mr. Gerould added his protest against the reproduction of a large number of copies of a rare book. One or two ought to be enough.

H. H. B. Meyer said he thought the plan to create a collection of negatives in a central depository was best and the Library of Congress would be the best place but at present the Library of Congress is unable to do its own work properly owing to lack of resources. He thought Mr. Gerould's suggestion for cards could very likely be carried out if copy were sent by the possessing libraries. He offered as a practical suggestion that the negatives remain with the owner, that copy be sent to the Library of Congress and that the cards be printed by it. Mr. Carpenter thought Mr. Meyer's suggestion excellent. He said he knew of a number of reproductions in private hands; he had one and Mr. Manley had several. Mr. Hanson said he knew from consultation with Mr. Hastings that the Library of Congress could print the cards if 50 subscriptions were secured. Mr. Meyer amended by saying the Library of Congress could print immediately if thirty-five subscriptions were secured. These cards would then be put in the union catalog. Mr. Bishop suggested an immediate call for subscriptions and fifteen were guaranteed. The Society therefore voted to underwrite the thirty-five subscriptions.

Mr. Windsor of Illinois read a summary of the paper by Professor W. A. Oldfather which will appear in the *Proceedings*. The paper was on the subject of Avianus and was offered in the hopes that additional material might be brought to the attention of Professor Oldfather who is preparing a study of Avianus.

Dr. Pierce Butler of the Newberry Library gave a paper on the John M. Wing foundation. This will also be published in full. He told of the terms of the bequest which was given to buy books to "illustrate and describe the origin and development of printing and allied subjects." There are but three great typographical collections in the world: at Leipzig, at St. Bride's, London and at the Typographical Library in Jersey City. The Wing collection will eventually surpass these because of its resources and of the fact that it is not dependent on a school or society. The Wing collection also draws on the previous collections of the Newberry library in this field especially the Probasco and Bonaparte collections. Among other subjects which are being taken care of are Incunabula of which the Newberry now has 410 specimens; Aldines in which the Wing collection gained by the De Vinne sale; Kelmescotts of which the collection has a complete set; books on the history of printing and the theory of letter design. Among other rarities are specimen of block books, an Apocalypse of 1455 and an Italian *Biblia Pauperum*. The collection has one Caxton and a fair number of modern presses. It is frequently visited by practical printers.

J. Christian Bay of the John Crerar Library gave a delightful talk on some book rarities of Chicago. Mr. Bay had the books he spoke of on a table before him and handled them appreciatively as he described them. He spoke of them from the beginnings in the 1830's, mentioned the early collections of poetry, the publications of the Chicago literary club, the Caxton club, the Dofobs and others. He spoke of some of the early printers like Fergus and some of the later ones and showed examples: the Blue Sky Press, the Village Press and the Road-side Press. Having narrowed the issues of various books down to 100 and then to 20 copies, he closed with the rarest he knew of, an edition of Kipling's "Brushwood Boy" in 1903, consisting of one copy on vellum. With great satisfaction he showed the second copy of this book, intimating only how he came to have it.

AUGUSTUS H. SHEARER, *Secretary*.

NORMAL SCHOOL LIBRARIANS

NORMAL school librarians held a two-session meeting at Chicago, December 30-31. The chairman, Arthur Cunningham, librarian of the Indiana State Normal School, Terre Haute, Indiana, opened the meeting by stating the aims of the meeting as: (1) to discuss whether school libraries should be developed directly by the school or by the public library; (2) to inform ourselves as to what was actually done with regard to the supervision and standardization of

school libraries in the various states.

O. S. Rice, Wisconsin Supervisor of School Libraries, spoke on "School Libraries and School Success." The problem of school libraries is to convince school authorities that the school library is necessary for school success. Retardation statistics in Strayer and Thorndike's "School Administration," show that the largest percentage of repeaters are in the upper grades. As children have increasing needs to depend upon themselves in school work, no corresponding provision has been made to teach them the use of reference books which would make them equal to the occasion. In the upper grades, where much reading is done, for example, the teacher leaves to the children the looking up of words, phrases and allusions occurring in each day's lesson. Children must learn to know where to go for explanations of words, phrases and allusions they do not understand. In a test involving the use of the dictionary, encyclopedia, *Readers' Guide*, and other common reference material, given to children in several different Wisconsin schools before reference lessons became part of the school course, no child received a passing grade (70) and there were many zeros. Observation shows that the question and answer method is used almost exclusively, due in great part to the lack of teaching children to use reference books. This brings out the important duties of the normal school library: (1) to train prospective teachers in the use of books and libraries; (2) to teach students how to teach children the use of the library, using the model school to demonstrate practical methods; (3) to demonstrate in the model school ways of having much good reading done so as to develop good reading tastes and habits; (4) to train teacher-librarians.

The plan of having in each high school a qualified teacher-librarian who, as part of her duties, gives lessons on the use of books and libraries, is of much importance to the school library cause; for the reason that those high school students who later become elementary school teachers, will know the value of such lessons and will be more likely to give them to the pupils in their charge.

PLANS FOR INDIANA

Della Northey, Indiana organizer of school and institution libraries, spoke on fitting library service to school needs.

California's law provides for a definite contract between schools and county libraries for service.

In Oregon, the State Library which supervises school libraries passes the responsibility over to the county library, the school library becom-

ing a branch of the county library, altho the books have the mark of ownership of the school district and separate records are kept.

The Committee on Work with Schools of the Indiana Library Association as the result of a survey of high school libraries in that state, found only nine school libraries with a full time librarian, no definite plan, and no credit given for instruction in the use of books and libraries. This Committee recommended that the Certain Report be approved by the Association and that a committee be appointed to work out definite recommendations to be presented to the State Department of Education. The recommendations made by this committee were: (1) that the minimum fund of one dollar per pupil be spent each year for the purchase of books and the necessary rebinding, the sum to be reduced to fifty cents per pupil where a public library exists, if so desired; (2) that the selection of books be made from the certified list and its supplements; (3) that the organization of school libraries be urged. This program, submitted to the State Department of Education has been cordially received. An educational survey of the state, preliminary to that to be made by the Rockefeller Foundation, is now in progress. The Commission has been invited to outline library standards for different types of schools.

PROGRESS IN PENNSYLVANIA

Adeline Zachert, director of School Libraries for the Department of Public Instruction of Pennsylvania, told of that state's program for school libraries, aiming at "An equal educational opportunity for every boy and girl in the commonwealth."

The appointment of a director of School Libraries under the Department of Public Instruction, is in line with modern ideals of school administration, which Dr. Finegan is working out.

The School Libraries Division has almost a year of activity behind it. The actual achievements in the improving of school library conditions include:

(1) A survey of library conditions in the State by personal visits of the Director to the thirteen State Normal Schools, many high schools, and other schools; (2) the preparing and issuing of carefully selected lists to serve as a guide in the upbuilding of school libraries for rural, graded, junior high, and senior high schools; (3) the outlining of minimum attainable standards for the administration of libraries in State Normal Schools and high schools of various sizes including the junior high school; (4) the establishment of teacher-librarian courses in two of the State Normal Schools; (5) a conference of librarians of the State Normal Schools for the

discussion of all the details of management of the libraries in these schools and particularly for the developing of policies leading toward the better instruction in the use of books for all pupils in the Normal Schools. Progress has been made along the following lines:

(a) The preparation of a manual giving detailed information on all the various phases of school library management, which will be available to principals and superintendents and will serve as a guide in book selection, their care and conservation, and particularly, their use.

(b) Outlines of graduated courses of instruction in the use of books and libraries, to be given to pupils from the elementary grades thro the high schools and normal schools.

In the annual reports which high schools submit to the State Department the following definite questions relating to the library are answered: Is a trained librarian in charge of your library? Seating capacity of your library? Number of volumes not text books? Number of volumes added last year? Number of periodicals taken? Total yearly appropriation? Is *Reader's Guide* used? Are books accessioned? Number of books missing at last inventory? Classification system? Dictionary catalog? Charging system? Total circulation last school year? Number of periods given to instruction in use of books? Compliance with proper standards in respect to library equipment is an important element in the classification of high schools.

Miss Zachert closed by stating her conclusion that the school library should be a *school* rather than a *public library* project. The school library should be considered the book laboratory of the school, it should be housed in the school, and should be under the control of the school administration on the same basis as the other school laboratories. Miss Zachert advocated cooperation between the school library and the public library in urging pupils to become members of the public library and to establish the habit of using the public library. The two types of libraries should maintain friendly relations and where the public library has a surplus supply of books it may supplement the school library with general reading matter.

ORGANIZATION IN MINNESOTA

Harriet A. Wood told of the work in Minnesota. Miss Wood feels strongly that school libraries should be a part of the public school system wherever possible. In Minnesota the library program has put the public library in the place of leader.

The State Director of the Library Division, while having charge of all library work, stresses the public library, while the Assistant Director stresses the school library. Such a plan is re-

commended for the local public library, the head librarian laying emphasis upon the work with adults and the assistant librarian upon work with young people.

Close co-operation with the other divisions of the Department of Education is carried on; such as: (1) membership of the Director of Libraries on the Committee for the Revision of State Aid; (2) the preparation of library standards for different types of schools; (3) the preparation of library courses of study; (4) the library training project in County Institutes carried on jointly by the Rural School and the Library Divisions.

The Institute program was one of the major activities during the last three months. At the request of the Rural School Inspector some instruction on the selection, care and use of books was given by Institute instructors with assistance from local librarians, based on a brief course given by the Supervisor of School Libraries. Some of the results were: (1) the importance of the rural school library is being recognized by teachers and trustees of 6000 rural schools; (2) instructors have been tireless in devising new methods of presenting these lessons and wish the course continued next year; (3) school supply companies have been stimulated to include library mending material and equipment in their catalogs; (4) courses of lessons now in preparation for the teacher training classes in high schools will be made more practical because of this experience and this course will be recommended to the rural department of teachers colleges; (5) reference work with the Department has much increased.

The specific duties of the Department are: (1) the development of a professional library for the use of the Departmental Staff and all teachers of the state; (2) the preparation of the State Aid Book Lists for elementary and high schools; (3) the assembling of a sample collection of the books on the State Aid List; (4) the distribution of State Aid under the terms of the law and the rules of the State Department.

Purposeful State Aid is the cornerstone of Minnesota's educational structure. The school development of the state under the stimulus of State Aid has outstripped the library development without State Aid. There are 150 public libraries in Minnesota (twelve counties having none) as contrasted with 243 high school libraries, 269 graded school libraries, 6181 aided rural school libraries.

The contract system between school and public library in which the State Aid money is turned over to the public library for certain specific returns in service, etc., has been worked out

with success in Pine Island, International Falls, and other places.

"A MEASURING STICK"

Willis H. Kerr, librarian of the Kansas State Normal School, Emporia, Kansas, then presented the "Measuring Stick for Normal School Libraries," a preliminary report on standards for Normal Schools. This report had already been approved by the Library Department of the N. E. A. Mr. Kerr said the report was based on two suppositions: namely, (1) that the training of teachers is supremely important; (2) that no institution is better than its library.

He reviewed the report item by item and the principal points made in the correspondence he had received in regard to the Measuring Stick. Many letters expressed commendation, gratitude for an attempt to formulate standards and remarked upon the usefulness of such a report in obtaining what was needed in a local situation. One criticism was that no provision was made for the small county or city normal school. Mr. Kerr also said that the number necessary for the staff, according to the report, was based on a library opened 60 or 70 hours a week.

In the discussion following the presentation of the report, the question came up as to whether a B. S. degree requirement could be added as an alternative to the B. A. and A. M., as many library schools granted only B. S. degree. Such an arrangement, Mr. Kerr said, could be made, that situation having not previously occurred to the committee.

SECOND SESSION

The second session was opened by a talk by Charles M. Curry, professor of Literature at the Indiana State Normal School, Terre Haute, Ind., on "Standards of Children's Literature." This paper is published in the current number of *Public Libraries*.

Winifred L. Davis of the Wisconsin Library School then told of how to obtain "Maximum Results with Minimum Instruction." Illustrating with an outline, which was distributed to those present, she told what she had found to be the minimum amount of material to be included in lessons on the use of the library to be given to children. Her experience with teachers had shown her, that such information was appreciated, for often the time allowed for such instruction is limited.

Her suggestion was to think of the library in terms of types of indexes, (card catalog index, periodical indexes, and the indexes to books themselves); and that the study of the mechanical side of reference books should be introduced by using books already familiar. The care of books and the rules of the library are not included in this formal instruction, such in-

struction being better given formally. Technical library terms, even the simplest, should be defined.

With a teacher who knows and can use the resources of the library, correlation between various subjects and instruction in the use of books and libraries can be advantageously worked out. Every normal student should have a course in the use of the library and bibliographic work.

Bertha Hatch, librarian-teacher, Cleveland School of Education, speaking on "The Normal School Library and Children's Reading," said that as librarian-teacher she taught the use of the library, story-telling, and juvenile literature in the Junior College of the School of Education, the graduates of which go into the public schools of Cleveland as teachers. Thus indirectly she reaches a large number of children. The children of the Observation Schools are reached directly, those in the building coming as classes in to the library once a week for books to read, and in groups thru the day for reference work.

The Library Hour, introduced two years ago, has been most successful in guiding and stimulating children's reading. Each week a pupil teacher or Miss Hatch herself in the Observation Schools holds a library hour for the children. Sometimes the teacher reads aloud or tells a story, sometimes the children do this, poems are generally read or recited, sometimes favorite books are discussed; again, puzzle games and riddles about books in the library, made up by the children, are the feature of the hour. This last not only fixes in the minds of the children the titles and authors of books but also stimulates the reading of certain books.

During the summer sessions Miss Hatch holds conferences with teachers on children's reading in which different types of books are discussed, such as books suitable to the different grades, chivalry stories, classics for children, pioneer stories, etc., one conference, on children's books grown-ups enjoy, being particularly successful.

Elva Rulon, librarian of the State Teachers College, Peru, Nebraska, then presented a "Summary of Reports from Twenty-nine Normal School Libraries Compiled from a Questionnaire on Magazines." The Report gave the agents used, percentage of the book fund used for magazines, amount of duplication for classrooms, factors determining binding of magazines, the part of the subscription list bound, bindery employed, and rules in regard to the circulation of the magazines.

For chairman for the current year was elected Margaret Dunbar, Library Science Department of the Kent (Ohio) State Normal School.

NEW YORK SPECIAL LIBRARIES ASSOCIATION

THE January meeting of the New York Special Libraries Association was arranged by the Medical Group, Sara L. Halliday of the Public Health Division of the Municipal Reference Library, chairman. The members met for dinner in Schraff's Tea Room, 181 Broadway. Dr. Royal S. Copeland, New York's Commissioner of Health, and Dr. Thomas Darlington, physician, entertained us with humorous and enjoyable after-dinner speeches which carried in them much good advice and inspiration. Dr. Copeland pictured the great need for and usefulness of the special library, and Dr. Darlington gave us a desire to improve our physical condition thru personal hygiene so that we might give the service expected of us. If any came to the meeting with a grouch he left with a light heart and a smile.

The Association continues to increase its membership. Anyone interested may join; dues should be sent to Elsie Baechtold, Irving National Bank, Woolworth Building.

The separate group meetings are being held continually at times chosen by the chairmen. Knowledge of the resources of all the libraries within the group is one of the purposes of these smaller meetings, and the individual librarians realize their importance.

The next monthly meeting of the Association will be held on February 28th, at the Metropolitan Life Insurance Co.

R. B. RANKIN, *President*.

PENNSYLVANIA LIBRARY CLUB

THE Pennsylvania Library Club met on January 9 at the Philadelphia Commercial Museum, Asa Don Dickinson presiding. William P. Wilson, director, spoke on the work of the Commercial Museum, which was organized at the close of the Chicago exposition in 1894, and received immense collections from over forty governments and dependencies exhibiting at that exposition, and has since received tons of exhibits from each large exposition held in the United States and abroad. Many years before the Department of Commerce was organized by the national government, the Museum, realizing that the consuls might become important factors in the investigation of trade conditions abroad for the American manufacturer, sought and obtained permission from the State Department to conduct direct correspondence with the U. S. consuls and to mark out lines of investigation which they should pursue to procure information tending to increase our foreign commerce. The present activities of the museum were further explained by Curator Charles R.

Toothaker, who told in detail of the educational work maintained for the entertainment and instruction of the manufacturer and the general public. There are in the Museum, hundreds of exhibits illustrating the customs of the people, and the products of the countries of the world. A very extensive work in education for the benefit of the schools of Pennsylvania is carried on. Special series of illustrated lectures are given in the Museum to classes from the schools and colleges of Philadelphia and vicinity. The Museum lends free to public school teachers in all parts of Pennsylvania sets of colored slides, accompanied by lanterns, screens and typewritten lectures on geography, commerce and industry. Collections of specimens to aid teachers in geographic and commercial instruction are sent, free of cost, to all parts of Pennsylvania. These specimens are arranged to show the important raw materials and the stages thru which they pass in the process of manufacture.

Dudley Bartlett, chief of the Foreign Trade Bureau, explained the work of his bureau which is prepared to give information on such matters as tariff, shipping, packing, requirements and opportunities of foreign markets, trade mark and patent laws, consular regulations, methods of payment and granting of credits, and names of reliable business houses thruout the world.

John J. Macfarlane, librarian, told of the work of the Museum library, which is maintained for use of the officials of the Museum. It is not a public institution, but it lends books to libraries.

After the addresses the eighty-four visitors were shown moving pictures of some of Pennsylvania's leading industries.

NEW JERSEY SCHOOL LIBRARIANS' ASSOCIATION

THE N. J. School Librarians' Association, held its first meeting of the year in conjunction with the N. J. State High School conference at New Brunswick October 28-29 with Mabel F. McCarnes of Peddie Institute, Hightstown, presiding. Fifty-five were registered.

There was on exhibition a scrap book patterned after the New England scrap book containing plans and pictures of libraries and information about rules, regulations, etc. The Public Library Commission is the custodian. Those wishing to consult it, will send to the Commission for it.

Adeline B. Zachert, director of Pennsylvania school libraries, addressed the general conference on "Use of Books in High Schools."

On the morning of the 29th an address on the importance of a high school library from

an educator's standpoint was given by Thomas H. Briggs of Teachers' College, Columbia University, which was discussed by William E. Cate, Long Branch; Herbert W. Dutch, Montclair; Charles A. Philhower, Westfield, and Margaret Coult, Newark.

FLORENCE C. CATE, *Secretary.*

CHICAGO LIBRARY CLUB

OFFICERS of the Chicago Library Club for the current year are: President, Mary L. Watson, Newberry Library; vice-presidents, Frederick W. Schenck, University of Chicago Law Library, and Meta M. Loomis, University of Illinois College of Medicine; secretary, Margaret E. Ely of the Public Library; and treasurer, William Teal.

ILLINOIS LIBRARY CLUB

THE Seventh annual series of district meetings held under the direction of the Illinois Library Extension Division and the Illinois Library Association has been arranged. To date meetings have been held at Chicago, Freeport, Mendota and Bloomington; and the following are scheduled:

February—15, Galesburg; 16, Davenport, Ia. (joint meeting with Iowa, Indiana and Kentucky); 21, Jacksonville; 24, Hamilton.

March—2, Danville; 6, Charleston; 7, Olney; 8, Belleville; 15, Marion (joint meeting with Iowa, Indiana and Kentucky); and 17, Litchfield.

PUGET SOUND LIBRARY CLUB

THE Puget Sound Library Club met in Tacoma on December 30 to discuss children's work. The morning session was opened with an address of welcome by the Rt. Rev. Frederick W. Keator, president of the Board of Trustees of the Tacoma Public Library, who was instrumental in bringing the first trained children's librarian to the coast. A paper on children's work was given by the President, Annabel Porter, of the children's department of Tacoma, and discussed by Mabel Ashley of Everett, and by Lillian Sutherland and Laurretta Cole of Seattle.

At the afternoon session three teachers from the Tacoma public schools gave talks. That of Lottie H. King on the "Socialized Recitation," practically illustrated by a group of third grade children, was much enjoyed.

Helen Laurie spoke on "Silent Reading," Claudia Hill on the "Project Method."

Ellen Howe of the University of Washington Library was elected President for the next meeting.

IN THE LIBRARY WORLD

CONNECTICUT

Hartford. Connecticut has had but three state librarians since May, 1854, when the General Assembly provided for the appointment of a State Librarian to take charge of the miscellaneous collection of books which had been accumulating in the office of the Secretary of State. Dr. J. Hammond Trumbull served one year from that time, and Dr. Charles J. Hoadly from September, 1855, until his death in October, 1900, a month after which the present librarian, George S. Godard, was appointed.

From its rooms in the old State House, now the old City Hall, the library was moved to larger and more convenient quarters in the new capitol building in 1878, and from there, in November, 1910, to its present home in the State Library and Supreme Court Building. With the other libraries in Hartford the library forms a university system. It comprises, among other departments, the supreme court law library, the legislative reference department, the department of war records, the archives department, and the department of local history and genealogy. It serves as depository and examiner of public records, as custodian of the portraits of governors and of the building which is its home, as depository of Connecticut state, town, municipal and society official publications, as well as of the official publications of the United States and the several states of the union, and finally as library exchange agent for Connecticut state publications.

New Haven. At the time of the report of the Librarian of Yale University for the year ending June 30, 1921, the site of the Sterling Library had not been settled, and no definite plans for the new building made. There were 1,217,500 books in the several libraries of the University, including the 65,059 volumes in the Law Library.

The Far Eastern collection numbered on April first, 17,560 works in 14,536 volumes, consisting of 2,413 Chinese works in 5,702 volumes, 56 Korean works in 126 volumes, and 15,091 Japanese works in 8,708 volumes.

The Tornquist collection on Argentina, presented by Carlos Alfredo Tornquist of Buenos Aires, contains more than 500 volumes, appropriately bound, and accompanied by a catalog arranged by author and topic.

Linonian and Brothers loaned 21,274 and the Main Library 21,184 volumes for home use.

From receipts of \$144,604, expenditures for

the book account amounted to \$46,820 and salaries \$79,318.

Replying to several inquiries as to the increase or decrease of student use of the library and the character and quality of the reading done there, Mr. Keogh remarks, "Bearing in mind the Elizabethan Club and the young poets whose writings are appearing thru the Press and other Yale sources, I am inclined to believe not only that the reading at Yale is greater in amount than it used to be, but that if it has changed in character, the change is for the better."

NEW YORK

Brooklyn. Some of the outstanding events in the history of the Brooklyn Public Library for the past two decades are reviewed in the twentieth report of Librarian Frank P. Hill, which is also the twenty-fourth report of the library.

The Library was organized in 1897, and since that time has had only one President, David A. Boody. The other member of the Board who has served continuously is R. Ross Appleton. Besides the Chief Librarian there are on the staff today twenty-four employees who were with the library in 1901 or came to it in that year. The Library was a department of the city and under municipal civil service for the first six years of its history. It became an independent corporation under an act of the legislature upon consolidation with the old Brooklyn Library in 1903; and the Board of Trustees, under an agreement with the city, undertook to administer the Free Public Libraries, heretofore administered by the Board of Directors as a department of the city.

With the consolidation which was effected on June 12, 1903, when the contract was signed by the city and the board of trustees of the Brooklyn Library, the old Brooklyn Library transferred to the new board of trustees real estate, books and endowments amounting to nearly one million dollars, and the new board of twenty-two members received their appointments, half by the mayor of New York City and half by the representatives of the old Brooklyn Library.

In 1901 the city appropriation was \$99,900; in 1921, \$709,679, an increase of 610 per cent. The income from other sources in that year was \$5,093; in 1921, \$87,909.

There were sixteen branches in 1901, but in 1921 thirty-one branches, three stations, and nine deposit stations. The situation in regard to

a central building has not materially altered, as the library had none in 1901 and had no more than four walls and a temporary roof of one twenty years later. One of the features of the report is a chronological table of steps taken since 1889 to secure the central library building. Brooklyn still remains the only city of any important size in the United States lacking a central building, altho \$813,987 has been appropriated by the city for this purpose. In 1901 the staff numbered 105 persons, and 401 in 1921. The library then had 144,954 volumes and circulated 944,126. In 1921 it had 956,051 volumes and circulated 6,072,707, an increase in per capita circulation from .809 to 3.008.

For books \$22,321 was spent in 1901 at an average cost per volume of \$.74, but approximately \$123,386, at an average cost of \$1.56, in 1921.

On March 12, 1901, Andrew Carnegie offered to the city of New York \$5,200,000 for the erection of sixty-five branch library buildings, of which \$1,600,000 was Brooklyn's share. Twenty branches were built and by careful management enough remained for a twenty-first, a site for which was purchased by the city in 1921 at the corner of Irving Avenue and Woodbine Street. It will be known as the Irving Branch in the Ridgewood district, taking the place of the present Ridgewood branch.

The first completed branch building was the Pacific, which opened its doors on October 8, 1904; and the twentieth the Red Hook, opened April 22, 1915. Last November the Schermerhorn branch was closed and its collections moved to the flourishing Coney Island station, which became a branch.

IOWA

The recently published report of the Iowa Library Commission covers the period from July 1, 1918, to June 30, 1920. During the twenty years of the Commission's existence, the number of tax-supported libraries has increased in the state from forty-eight to one hundred and forty. Four of these, Adel, Primghar, and Toledo were added during the last biennium. In addition to free tax-supported libraries, there exist in the state about fifty subscription or association libraries, supported by membership dues, donations, entertainments "and other such precarious means of support."

Iowa has a workable county library law, but as yet no county libraries. A beginning has been made in the way of township extension, and about thirty libraries are now loaning books to from one to six townships, outside of their municipal limits, Clarinda and Onawa having the largest of these townships systems, and maintaining several branches each.

In 1900 there was but one Carnegie and five other library buildings in Iowa. In 1920 there were ninety-nine public and seven college libraries, occupying Carnegie buildings, aggregating \$1,109,000 in library gifts to Iowa. Twenty libraries have buildings erected by other donors or by tax. New buildings erected by Carnegie gifts at Corydon, Hamburg, and Montezuma, were opened during the biennium.

The present staff of the Commission consists of the Secretary and Director of Library Extension, Julia A. Robinson, a library organizer and library cataloger, and two assistants in the Traveling Library department. With the resignation of Grace Shellenberger in May, 1919, the position of supervising librarian of the State Institutions was allowed to lapse, altho Iowa was a pioneer in institutional library work.

The Commission's appropriation is \$15,000, or less than Cedar Rapids, Davenport, Des Moines, Sioux City and Waterloo each receives in its individual community. The Traveling Library added 10,074 books, making a total of 44,039 books in its collection, and circulated 92,711 volumes during the two years. There are 733 traveling library stations.

The population of Iowa in 1915 was 2,358,066, of whom 857,111 are served by the 1,196,508 books in public libraries and 1,500,955 by the collection in the Traveling Library.

OKLAHOMA

Norman. A \$20,000 appropriation by the last legislature for the establishment of a State Industrial Library at the University of Oklahoma, has been invested in reference books and the new library will be opened for use during the current month.

NEBRASKA

Omaha. An expenditure of \$85,746 (of which \$75,000 was appropriated by the city) enabled the Omaha Public Library to circulate in 1921 565,299 books among a population of 191,601. This circulation represents an increase of 38,079 over that for 1920, and gives 2.95 books per capita. Borrowers numbered 47,620, of which 33,000 are regularly registered borrowers. The expenditure per capita was 45 cents.

CALIFORNIA

Berkeley. The circulation of books from the Berkeley Public Library for home use in the year ending June 30, 1921, was 449,700, an increase of eleven per cent over that for the previous year. There were 25,804 borrowers from a population of 60,000, marking an increase of twenty per cent. The library system has 83,516 volumes in its twenty-eight agencies for circulation, and employs a full-time staff

of twenty-two. Staff salaries were increased for all positions, the average increase per assistant amounting to over \$300. The year's expenditures amounted to \$53,231.

CZECHOSLOVAKIA

The library law of 1919 is to be amended so as to provide for a minimum rate of one Czech crown instead of half a crown. It is proposed to abolish the maximum rate. This will permit of levying larger taxes in small communities where the book fund has been particularly low. The next step planned is the creation of county libraries which will have the supervision of the traveling libraries at present providing literature in the country places.

Prague. The Czechoslovak State School for Librarianship ended its first year in June. Of the hundred students who matriculated the previous October, thirty-eight passed the examination, the remainder having left school to take up positions or intending to take the examination in the winter term.

Twenty-one candidates passed with merit, fifteen with first class certificates and two with second. Twenty-four approved were probated for service in free public libraries and fourteen for the state and university libraries.

Five scholarships of 1000 Czech crowns each, were provided for students showing capacity for library research work.

The new school year, 1921-1922, opened on October 1st with 28 students.

In its early days, the school's quarters were inadequate and presented some difficulties. Now there will be one large room available in the Kinsky palace, wherein is housed a great library which contains a large number of rare books, manuscripts and prints.—L. J. Z.

FRANCE

Paris. The Annual Report of the American Library in Paris prepared by Alida M. Stephens, acting librarian, shows an increase in its endowment from 177,000 francs to 580,000 francs, 300,000 of which is represented by the recent gift of the American Library Association, and an increase in its supporting membership from 185 to 270.

The book collections were increased by 3744 volumes, about half of which were gifts. The collections now number 19,572 volumes.

The number of borrowers is now 3697 of whom 260 are students. Of those students 119 are French. Of 1385 new cards 602 were American, 425 British and 280 French.

The book circulation for the year was 117,439 volumes. Of these 3268 were juvenile.

AUSTRALIA

Auckland. The stock of the libraries, including the Leys Institute, of the Auckland Public Library was estimated on May 3, 1921, to be 105,486 volumes, of which 57,762 volumes are contained in the reference departments, and 47,724 in the lending and children's departments, including schools. All libraries participated in the increased circulation. The lending departments issued 355,948 volumes as compared with 285,293 the previous year.

The receipts of the central library and the five branches from subscriptions and reading fees amounted to £2,010. The number of visitors to the Art Gallery and Old Colonists' Museum, departments of the library, was 148,579 as compared with the previous year's 137,922.

C. F. Goldie, noted painter of Maori subjects, deposited a loan collection of pictures in the gallery during the year.

LIBRARY OPPORTUNITIES

POSITIONS WANTED

College graduate with one year library training and three years city public library experience wants position as assistant in college, special or public library. E. D. 4.

Position wanted by library school graduate, experienced in public and special library work, specialist in economics, business management, finance and insurance, expert cataloger, reference worker, indexer, systematizer. Salary, \$2000. East or New York preferred. L. V. 4.

Lady, Virginian, educated in Europe, wants position in special library in New York City. Has had ten years' experience in editorial and research work, one year in a special library,

also some experience in organizing indexes. Has thoro knowledge of nine languages and is familiar with medical, economic and art literature. A. W. 4.

Good linguist, experienced in abstracting and digesting, would like to hear of interesting temporary editorial or library position. E. T. 4.

Young man, 23, college and normal school graduate, with a year and two summer school terms as librarian in an Oklahoma Teachers college, wants position in some University of the Missouri valley, or of West, where he can work on his master's degree. Address 225 College Avenue, Alva, Okla.

“Find It in Books”

THIS is the slogan that will be given wide publicity during the month of March by publishers and booksellers to stimulate interest in “useful” books.

It is a phrase that should have a strong appeal for librarians who have always featured the “usefulness” of their institutions. The librarians have been the first to note the growing demand for books for study and for reference. An examination of reports from widely varying localities points to the awakening of interest in technical subjects as the explanation for much of the increased circulation of books in the libraries. As one such report stated: “The striking demand is for books on trade, business, technology and all informational subjects rather than for literature, and it comes from the men who do the work.”

Today when enforced economy makes generous buying impossible, it becomes even more imperative to select books of sound merit. On the other hand, an intelligent, definite purpose to serve the educational and business needs of the community is likely to inspire practical support to keep the shelves full of “useful” books.

The “Find It in Books” campaign will undoubtedly result in a still larger number of inquiries of all kinds, which may be turned to account by the librarian. It is a campaign that has distinct advertising value for the smaller libraries, in particular, where close co-operation with the public is most helpful.

Publishers of technical and reference books use the Library Journal for their announcements because they believe the librarians, above all others, realize the importance of such works. It may well prove worth while to examine their announcements in the light of present-day economic tendencies, with the view also of directing a little of the “Find It in Books” spotlight upon the activities of the library.

ANDREWS, Clement W., is the subject of the biographical sketch and frontispiece of the current number (Sept.-Dec. 1921) of the *Bulletin of Bibliography*.

BJERREGAARD, Carl H. A., chief of the reading room of the New York Public Library, died January 28th in his seventy-seventh year, and in the forty-second year of his service with the Library. Mr. Bjerregaard was a graduate of the University of Copenhagen and of the Military Academy of Denmark, and served five years in the Danish army and for a short period with the Danish Legation at St. Petersburg, before coming to this country in 1873. He was an authority on mysticism and various oriental beliefs and was the author of "Mysticism and Nature Worship," "Sufi Interpretation of Omar Khayyam and Fitzgerald," "The Great Mother," and "The Inner Life and the Tao-teh-king."

CARLTON, William N. C., was appointed librarian of Williams College, Williamstown, Mass., on February 3. Dr. Carlton began his library work at the Holyoke (Mass.) Public Library in 1887. In 1892 he became assistant librarian of the Watkinson Library, Hartford, Conn., and in 1899 librarian of Trinity College, a post which he left to become librarian of the Newberry Library, Chicago, in 1909. Early in 1920 he resigned this charge to join the house of George D. Smith in New York, and shortly after Mr. Smith's sudden death accepted for one year the directorship of the American Library in Paris, Inc. On his return last summer he was invited by the City of Hamilton (Ont.)

to reorganize its library system; a work which he completed last month.

EWING, Constance R. S., 1919 P., is in charge of the three months' class for junior attendants, recently started in the Public Library, Portland, Oregon.

FISHER, Mignon, 1918 N. Y. S., appointed head of the technical department of the Library Association of Portland, February 1st.

GROVER, Mabel Chase, 1914 R., appointed librarian at the Santa Cruz (Calif.) High School, succeeding Elizabeth Patton, 1918 R., who has been appointed to one of the junior high schools at Berkeley (Calif.).

Peters, Aimee M. 1913 Syr., has resigned her position of cataloger of the Air Service, Washington, D. C., and has been appointed cataloger of the Public Library, Tulsa, Okla.

SCHWENKE, Paul, librarian of the Prussian National Library and editor of the *Zentralblatt für Bibliothekswesen* died suddenly on December 19, in his sixty-ninth year.

SHATTUCK, Ruth, 1910 S., appointed librarian of the Danbury (Conn.) State Normal School.

WILBUR, Amey C., director of circulation of the Providence Public Library, has resigned to be married.

Pope Pius XI (Cardinal Achille Ratti) "is one of the most scientific librarians in Italy" says the *New York Times*. He has belonged to the profession for thirty of his sixty-four years. In 1888 he became a member of the college of doctors of the Ambrosiana Library in Milan, and in 1907 succeeded Mgr. Coriani as prefect of that library, a post which he held until 1914. Meanwhile he had become vice-prefect of the Vatican Library in 1910 and prefect in 1914, so that he was for some time connected with both great libraries. He gave up his charge of the Vatican Library only on his appointment as Papal Nuncio to Poland in 1918.

In a recent note on the death of Mrs. Salome Cutler Fairchild we said that she gave up library work soon after her marriage. As a matter of fact she continued in the vice-directorship of the New York State Library School for several years, resigning only after a nervous breakdown in 1905, and it was after this that she did much notable work on book-selection.

You Need These Books For Your Readers

AMERICA and the BALANCE SHEET of EUROPE

By JOHN F. BASS, and H. G. MOULTON,

for 25 years war and political correspondent to the American press, Associate Professor of Political Economy, University of Chicago.

Every thinking man and woman will ask to see this new work. The authors present conclusions that, almost inevitably, must be confirmed by the economic conference to be held in Genoa in March and show why America's prosperity is inseparably linked with that of Europe. A book widely read, discussed, reviewed and advertised. Its very timeliness and clear analysis of vital facts is making it a volume in demand. Just published, 361 pages, cloth, \$3.00.

AMERICA vs. EUROPE in INDUSTRY

By DWIGHT T. FARNHAM,

Vice-President, C. E. Knoppel Company.

A vivid comparison of American and European manufacturing methods developed during and since the war. Every manufacturer and business man is vitally interested in the fact, brought out in this book, that Europe is now adopting our policy of mass production, which, with her cheap labor, will put her on an advantageous competitive basis. Copiously illustrated. Just published, 492 pages, cloth, \$4.00.

AUDITING, THEORY and PRACTICE

By R. H. MONTGOMERY, C.P.A.,

of Lybrand, Ross Bros. and Montgomery.

An entirely new edition, rewritten, revised, and enlarged, of this standard work. Incorporates recent changes in auditing policy made necessary by developments during and since the war. Two volumes, about 1200 pages, cloth, \$10.00. Volumes sold separately, (Volume I now ready, 730 pages, \$6.00.) (Volume II ready soon, 500 pages, \$4.00.)

WILLS, ESTATES and TRUSTS

By THOMAS CONYNGTON

of the New York Bar;

HAROLD C. KNAPP, B.S., LL.B.,

associated with the Trust Division of the Irving National Bank; and

PAUL W. PINKERTON, C.P.A.,

with Coffield, Herdrich and Company of Indianapolis.

This work will be valuable to anyone who has anything to do with the handling of an estate—the man with property to leave, the executor or bank official, and the lawyer or accountant handling estate matters. It takes into full consideration all points of law, taxation and accounting. 1921, two volumes, 825 pages, cloth, \$8.00.

CURRENT LIBRARY LITERATURE

Burton Historical Collection Leaflet is to be published monthly by the Detroit Public Library. Volume 1, No. 1, January 1922, is devoted to biographical notes on Henry R. Schoolcraft, geologist.

Horace Gray writes on "Hospital Libraries for Interns," in *The Modern Hospital* for January. The article contains a list of books recommended for the use of interns in hospitals, and illustrations show the libraries in the Boston City Hospital, and in the Massachusetts General Hospital and the Harvard Medical School.

The Library of the United States Bureau of Education has made preliminary plans for a new edition of Bulletin 1915, No. 25, Statistics of Public, Society, and School Libraries, with the advice and co-operation of the Committee on Federal and State Relations of the A. L. A.

Maryland Library Notes, published by the Maryland Public Library Commission (Mrs. M. A. Newell, Secretary and Treasurer, Marion F. Batchelder, Field Secretary) is intended to be issued as a quarterly if the Commission finds that it is helpful to the library workers of the state.

"The Use of the Library" by Frank M. Bumpstead, Superintendent of Circulation of the University of California Library, is prepared for the use of the Department of English, the object being "to enable the students to use the resources of the library intelligently. . . The examples cited apply to the University of California Library but the general principles apply to all scholarly libraries." (Berkeley, The University, 15 cents.)

"Seven Centuries Illustrated in the Congregational Library" (Boston) is a little book edited by Librarian William H. Cobb, designed "not to bring anything new before librarians and other specialists, but to interest men of ordinary attainments" in the history of printing. (25 c.)

The first number of the Standard Catalog Bimonthly (H. W. Wilson Co., New York, \$1.00 a year) lists 175 titles published in 1921. Each succeeding issue is to contain about fifty titles and an annual cumulated number will be published next July covering the full year 1921 as well as the first half of 1922. Thereafter the publication of the annual cumulation in

June will coincide with that of the *Cumulative Book Index*. "For each book is given a descriptive note written with the small library in view and a digest of all important reviews available at the time of compilation; also the subjects under which it should be cataloged, the D.C. classification number and the L.C. card number." The second number (January) lists a great number of children's books, due to the fact that the Christmas Season brings an unusual number of good juveniles.

The subject headings used in the Bimonthly will be those of the "List of Subject Headings for Small Libraries," which is in preparation. It is compiled by Marion E. Potter and Corinne Bacon from representative lists of headings used in thirteen of the smaller public libraries, collected by Estella and Ida Wolf of the University of Indiana Library. The original list, together with subjects will shortly be put into type and "sent to a number of people whose experience qualifies them to criticize such a list from the standpoint of the small library."

"Dawson-Hunting: European War Bibliographies" published by the F. W. Faxon Company of Boston, as No. 25 in the Useful Reference Series (\$1.75 net), consists of two parts.

Part I is a bibliography of European War Fiction in English, compiled by Loleta I. Dawson of the Detroit Public Library. "The term European War Fiction in English has been interpreted to include translations of fiction into English, and both novels and bound collections of short stories when more than half the stories in a volume have war subjects. The grouping is made according to the country which forms the predominant background of each story and the subdivisions are determined by the chief war interest discussed. Annotations are from the point of view of the war content and not from that of literary merit."

The second list, Personal Narratives of the European War, is a bibliography by Marion D. Hunting. The purpose has been to list not the personal experiences "written by every type of person . . . but narratives of those who knew the best way of telling things they saw . . . The material listed is to be found in the Syracuse University Library and the Syracuse Public Library . . . All the personal narratives of the war in both libraries have been carefully examined and only those that have been found to be really worth while have been noted."

Picture Writing at its Best

Charts compel attention and clinch the idea at a glance

The SCIENTIFIC AMERICAN says of *Warne's Book of Charts*, "that it shows 'the most approved ways,' is 'picture writing at its best', displays 'all the rules and principles of cartography', contains 'suggestions of import to industrial statisticians', is 'the shorthand of statistics,' is 'easier, not harder, to read than the corresponding longhand', and will be found 'extremely useful'."

Mills Bldg. Washington, D. C.

A Necessary Reference Book

POPULATION AND ITS DISTRIBUTION

Based on the U. S. Census of 1920

Facts shown at a glance which can be secured elsewhere only by long and patient work

All towns with a population of 500 and over are listed by states, classified according to size, and arranged alphabetically in these classes. There are tables showing the area of every state, its density of population, percentage of urban and rural population, etc. Among other tables are those giving the number of dealers in various trades in the states and in the larger cities; income and tax returns by states and subscriptions to the Fourth Liberty Loan by states and by cities over 50,000, as a measure of purchasing power; percentages of increase or decrease of population since 1910; and state data showing the number of farms, telephones, miles of railroad, etc.

This book has been found of great value as a reference work both by business men and by students of sociology and economics. For the study of the many problems confronting us today in our economic relationships, as well as for the analyses of markets essential in any business, a knowledge of the facts contained in this book is a basic necessity.

The retail price is \$5.00, but to libraries we make a special reduced price of \$3.00. We will be glad to send a copy on approval, with the understanding that it may be returned to us within five days if you decide that it does not meet your requirements.

The World of To-day Series

Edited by VICTOR GOLLANCZ

This series provides in concise and attractive form discussions of the main problems and events of the modern world. A few recent volumes.

Each volume paper, net \$1.00

Increased Production

By E. LIPSON

The author discusses the objects of and the obstacles to increased production, the efficiency and remuneration of labour, the efficiency of management, and finally unemployment and overproduction.

Official Statistics

By ARTHUR L. BOWLEY

This book affords help in understanding the nature of statistics published by the Government dealing with population, industry, income and wages, and social conditions, and shows the proper method of working on official reports.

Foreign Exchange

By T. E. GREGORY

Though brief this study of the problems of exchange will be found to be remarkably thorough in its treatment of all the main principles of the matter. There have also been added many valuable tables showing the condition of various monies before, during and after the war.

"Ideal for the Children's Department"

How Granny Told The Bible Stories

By ELEANOR HERR BOYD

Author of "How to Study the Bible," etc.

There are few authors who succeed in the attempt to interest the child in Biblical stories and who keep their books above the level of tracts. Mrs. Boyd tells the matchless stories of the Gospel in a way that touches the understanding of children. She has the delightful ability to make the figures real people, to give spirited and dramatic action which the child can sense, as well as to emphasize the spiritual truths contained in the stories. Customs and scenes of the Orient are faithfully portrayed.

Handsomely illustrated. 177pp. Bound in Cloth.

RICE'S RULES OF ORDER

A thorough and practical treatise arranged for ready reference and for popular use

By JOSEPH L. RICE

teacher and lawyer; thirty years' experience
in parliamentary practice

An up-to-date guide and text-book containing a digest of rules and principles for conducting meetings, plain enough to be readily understood by the beginner and comprehensive enough to satisfy the veteran. It also contains a complete dictionary of words and phrases, the definitions being combined with parliamentary principles. A Table of Rules in chart form answers at a glance nearly 800 questions. Full list of American authorities consulted; book thoroughly indexed.

233 pp. Bound in Cloth. Price \$1.25.

AMERICAN AND FOREIGN

P. J. Kenedy & Sons, 44 Barclay St., New York

Established 1826

Bishop Francis J. McConnell, of the Methodist Church, says:

"I regard The Christian Century as the greatest journalistic force working for social and international righteousness coming from any press of the Christian church. Personally I watch for its arrival with the utmost eagerness. I never lay down an issue without feeling a new stimulus for the wider application of the gospel."

The CHRISTIAN CENTURY

A Journal of Religion

CHARLES CLAYTON MORRISON and HERBERT L. WILLETT, Editors
Published Weekly *Four Dollars a Year*

NOW that political diplomacy has done its best at the Washington Conference, what our world most needs is an untrammelled discussion of its acute and sensitive problems *from the Christian point of view*. The ideals of democracy wait for realization upon the Christianizing of public opinion. It is dawning gradually upon our best minds that the discussion of religion must be extended beyond the present esoteric circles of specialists into the open forum of public opinion, where favors are neither asked nor given. The vital issues of the social order, of industry, of internationalism; the problems arising out of the modern view of the world, with its doctrine of evolution, its higher criticism, its pragmatic philosophy, its changed thought of God; the problems of the church institution: whether, for instance, our denominationalism is a providence or an impertinence—all these issues must be talked about in open court, where their discussion will directly mould and guide and vitalize public opinion.

The Christian Century is distinguished by its candid discussion of living issues in the light of the mind of Christ

USE OUR MONEY

Many libraries are hampered by lack of working funds which as a rule results in run-down libraries. If a book needs re-binding it should be preserved as soon as it starts to break loose. If you are forced to wait on funds to do the re-binding, the chances are that by the time they are available, your book has passed beyond the repair condition and you are forced to spend a larger sum in purchasing a new book. This is not economy.

We are willing to re-bind your books at this time and will make any extension of credit you may want, whether it be 6 or 9 months extra dating, but *save the book*.

Write for samples and prices.

NEW RADIO BOOKS

Covering details on—How to Operate a Set. How To Build a Set. Principles of Vacuum Tubes. Hook-Ups, Etc., Etc.

RADIO HOOK-UPS

By M. B. Sleeper

A book that gives you not only clear diagrams for all kinds of telephone and telegraph receiving and transmitting sets but simple descriptions of each circuit shown and spaces for notes of results obtained. Price 75c.

EXPERIMENTAL WIRELESS STATIONS

By P. E. Edelman

Tells how to make apparatus to not only hear all telephoned and telegraphed radio messages, but also how to make simple equipment that works for transmission over reasonable long distances. Then there is a host of new information included. The first and only book to give you all the recent important radio improvements, some of which have never before been published. 392 pages, 167 illustrations. Price \$3.00

THE A B C OF VACUUM TUBES USED IN RADIO RECEPTION

By E. H. Lewis, Assoc. I. R. E. and Radio Instructor

Written particularly for the person who "knows nothing about radio" but who would like to gain an understanding of the elementary principles of operation of vacuum tubes and various circuits in which they are used for the reception of radio-telegraph signals and radio-telephone music and speech. Illustrated. Price \$1.00

CONSTRUCTION OF NEW TYPE TRANSATLANTIC RECEIVING SETS

By M. B. Sleeper

There is a peculiar fascination about receiving radio messages from the high-power stations of England, France, Germany, Russia and Italy, as well as those located in the Pacific Ocean and the Oriental Countries. Several types of simple receiving sets for this purpose are described, with detectors and amplifiers to accompany them. Suggestions are also given for operating relays and reproducing the signals on a phonograph. Schedules of operating time for high powered stations are given. In addition there is some valuable data on home-made wavemeters for testing and experimenting. Price 75c.

DESIGN DATA

By M. B. Sleeper

The only book that gives tables and data for designing, receiving and transmitting apparatus so that you need no knowledge of mathematics. It's the first book a beginner buys after he has learned the use of his phone receiver. Price 75c.

WIRELESS TELEGRAPHY AND TELEPHONY SIMPLY EXPLAINED

By Alfred P. Morgan

One of the most complete and comprehensive treatises on the subject ever published. A study of its pages will enable one to master all the details of the wireless transmission of messages. The author explains in simple language the theory and practice of wireless telegraphy and telephony. 154 pages, 156 engravings. Price \$1.50

HOW TO MAKE COMMERCIAL TYPE RADIO APPARATUS

By M. B. Sleeper

This book describes in detail many commercial types of spark and vacuum tube telephone transmitting and telegraph and phone receiving equipment of all kinds. The experimenter will be able to get a world of ideas for the design and construction of his next piece of radio equipment from the very clear descriptions and the 98 clearly illustrated figures. Price 75c.

CONSTRUCTION OF RADIO-PHONE AND TELEGRAPH RECEIVERS FOR BEGINNERS

By M. B. Sleeper

The man who wants to feel the real thrill to accomplishment, and who is not satisfied in the merely making use what others have done for him, builds his own radio apparatus. Radio men can follow the data in "Radio Phone and Telegraph Receivers" with full confidence because each piece of apparatus described was first made, tested, and found efficient before the final design was accepted. Special receivers, both crystal and audion, are shown in detail. Regenerative circuits as well as audio and radio frequency amplifiers are described with clear photos, diagrams, and working drawings prepared especially for the novice and the man who wants to receive the radio telephone broadcast. A special feature is the phonograph type radio set and the loud speaker. Fully illustrated. Price 75c.

Branch Libraries in School Buildings

By ANTOINETTE DOUGLAS

First Assistant in the Art Department, St. Louis Public Library

WITHIN recent years the practice of using the schools as community centers has come more and more into use. Along with the development of this idea, the public library has been searching out new ways to extend the sphere of its usefulness and influence.

The trend of the library has been toward cooperation in every way with the school. And out of the close relations which have been the outcome, in various cities public branches have been established within school buildings, under varying conditions and with varying degrees of success.

On the part of the library the purpose has been two-fold. There has been a decided advantage to pupils and teachers in having the library brought to them. Also, the library has been able to provide more universal service by admitting the community at large. And the needs of the community have been considered in working out the plan, as well as the needs of the schools.

Thru reports from cities in different parts of the country where the experiment of such branch libraries has been made, many general ideas may be formed as to its advantages and disadvantages, and the conditions under which it is most likely to succeed. The cities are: Chicago, Cleveland, Detroit, St. Louis, Grand Rapids, Kansas City, Toledo, Milwaukee, Los Angeles, Newark, Galveston, Dayton, Terre Haute, Evansville, Ind., and Gary, Ind.*

It seems logical to study the subject thru the following sub-divisions: agreements between library boards and school boards, the general plan of such branches, the factors which seem necessary to their proper functioning and the

conditions which have caused their success or failure.

As regards relations between the library board and the school board, and the agreement between the two boards on this subject, the conditions in most cities are practically uniform. The school board provides a room or group of rooms either built specially for this purpose, or set aside in a building already erected. This room or group of rooms has either a separate outside entrance or is located as conveniently as possible to the outside entrance. The school board supplies heat, light and janitor service. The library board supplies books and periodicals, furniture and equipment, and the services of the staff. In the case of Kansas City and Terre Haute, the public library is under the board of education, and it is governed in the former by a committee composed of two members of the board. This simplifies the arrangement in Kansas City. In most other cities there are two distinct boards and the agreement stated above prevails.

Taking up the plans and operation of the branches, the features that will be noted are the location in the schools and the physical arrangement, the size, the staff, the hours of opening, joint use by the school and the community, cooperation between the library and the school, instruction given in the use of the library, publicity, and the particular advantages and disadvantages of the plan in general. First the experience of the larger cities will be considered.

CHICAGO

In 1920 in Chicago there were six branches in school buildings. Librarian Carl B. Roden writes that since that time these branches have been closed because of lack of funds. Mr. Roden goes on to say:

"When the Library occupies quarters in a public school, on the one hand it must open its doors to, and organize its books for all classes of the public, young and old, learned and unlearned. On the other hand, it will soon find itself overwhelmed with special re-

* A plan for the establishment of branch libraries in schools in the District of Columbia is outlined by George F. Bowerman in the LIBRARY JOURNAL for February 15.—Ed. L. J.

quests from the teachers and pupils. Both constituencies can be served with reasonable satisfaction only thru close and enlightened co-operation between the two boards, school and library. It cannot be done (as in Chicago) by assigning the library to some unused room in an old school building set far back in a yard, both building and yard unlighted at night. Adults do not go into this kind of building. In a foreign neighborhood, adults seem to be strangely diffident about going into a school building anyway. On the other hand, the amount of effective Americanization work we have been able to do thru books taken home to parents by children from the school library has been remarkable. In fact, such adult circulation as we get from school branches is largely accomplished by means of the children who interest their parents thru their tales of the library. . . .

"It [the operation of a branch in a school] cannot be done without a clear and comprehensive understanding as to janitor service, heat and light after school hours, or on Saturdays, holidays, etc. Unless this is very definitely arranged for, you will get into trouble. . . .

"The disadvantages are, therefore, chiefly physical and can be avoided or forestalled if the school authorities are disposed to make proper provisions. And the advantages to the library are also chiefly physical, viz: the saving in buildings, or rental, and in service, heat and light, which, of course, should be supplied without expense to the library. The more important and less measurable advantages accrue mostly to the students and faculty—often, I am inclined to believe at the expense of the public at large, which, after all, is our primary responsibility."

After mentioning the fact that in Chicago the library board and the school board were not working in complete harmony, Mr. Roden concludes by saying: "Possibly our present situation is due to a state of mind, which the future may dissipate, but at this writing we think our pessimism is justified by the results of our ten years' experience."

CLEVELAND

Cleveland was one of the first cities to open a branch library in a school building. In the book by Ayres and McKinnie on "The Public Library and the Public School," published in 1916 by the Education Survey of Cleveland, the following passage is found: "At present there are seven libraries in elementary schools. The amount of service to adults varies with the different schools—from seven to thirty-seven per cent., adults being teachers, a few of the people of the neighborhood and night students." Comment is made that "the relations between library and school workers are friendly but the librarian and the library are accepted as an incidental rather than an integral part of the school and its work." According to this report, during eighteen years, twenty such branches were established and thirteen of these were given up after varying terms of existence. It is evident from reports of the Cleveland Public Library of later date, that in the school branches, which now number twenty-two, no effort is made to reach the adult members of the

community. These branches, however, are used by the children of other schools in the neighborhood beside the schools in which the branches are housed.

DETROIT

Detroit conditions have been outlined in a report by Miss Jessie Tompkins, Chief of the Schools Division of the Detroit Public Library. She says:

"The Extension Department of this Library operates what is known to the system as sub-branches—small circulating book collections in factories, institutions, stores, schools, etc., in charge of library assistants and open at one or more periods a week.

"In most cases no provision is made for a reading room, the space only allowing for the exchange of books. Nine of these sub-branches are in elementary school buildings. Placing them in the schools has been primarily for the economic reason of securing heat, light and janitor service; the books, equipment and personal service being supplied by the library. Altho these sub-branches in schools are open to adults and to other schools in the neighborhood, the adult circulation is small.

"Sub-branches as a rule are located where residents of the district have no access to a regular Branch Library. The size of the sub-branch book collection varies from about five to twenty-five hundred volumes, according to demand. The adult books are changed from time to time. The sub-branches are open during the summer with small circulations.

"Generally speaking, the situation of the library room is in a large well-lighted basement. When this is not available, quarters may be given us in a smaller room in the main part of the building, or, as a last resort, books are circulated in corridors. There are no separate outside entrances.

"If a school offers satisfactory quarters in a district where we have decided sub-branch service is advisable, we frequently place the collection there for the sake of the economic considerations stated before, but we are not so convinced of the advantages of sub-branches in schools that we have cared to join with the Board of Education in a definite, comprehensive plan providing for library quarters in new schools as they may be built.

"Economic considerations aside, and from the standpoint of service merely, I believe we hold the opinion that a sub-branch located outside a public school is more favorable to an all-round kind of work and serves a larger adult patronage."

No story hours are attempted in Detroit and from a schedule attached to Miss Tompkins' report, it is observed that these sub-branches are open only during certain periods during the week, these periods varying in every school.

ST. LOUIS

The St. Louis Public Library is at present about to open two branch libraries in new school buildings. Quarters for the library were included in the original plans of the buildings and consist of one large room on the ground floor and a small workroom. There are separate outside entrances. Heat and light as well as janitor service are to be provided by the school. The equipment has been provided thru special memorial bequests made to the Board of Educa-

tion. Books are provided by the Public Library, which will maintain and operate the branches. The branches will open with collections of 4,000 to 5,000 books. The staff in each case will include a librarian, one assistant who will take charge of the children's work, one full time

schools are not in session. Classrooms of the regular size were used for branch library purposes in the beginning, but these were found to be too small, and the boards are making provision in all new buildings for much more commodious quarters. To quote one of the reports:

A MORNING IN THE SOUTH HIGH SCHOOL BRANCH OF THE GRAND RAPIDS PUBLIC LIBRARY

shelver, and one boy who will be on duty in the evenings. The branches are to be open during regular hours, nine to nine, but will for the present not be open on Sundays. Every effort is to be made both to co-operate with the schools in which the libraries are housed, and with other neighboring schools, in their work, while also developing the use of the library by the general public. One other new school has been built having similar quarters for library use and others still are in contemplation. If the new school branches prove successful, it is expected that future development of the St. Louis Public Library system may be worked out to some extent along these lines.

GRAND RAPIDS

The Grand Rapids Public Library reports show that there are at present in Grand Rapids twelve branch libraries in school buildings. This was one of the first cities to make the experiment, the first branch being opened in 1906. Separate entrances and separate heating facilities are provided for community use while the

"The branch libraries are equipped with from fifteen to thirty-five hundred volumes, of which about half are for children and the rest for adults. Each is supplied with from twenty-five to thirty current periodicals in English and special periodical literature in foreign languages, adapted to the population of the district. The use of books intended for children and adults is carefully studied so as to keep only 'live' books upon the shelves, and to return any unused books to the central general library."

The annual reports of this library also show that various means have been employed to advertise these branches. In one report mention is made of the fact that the librarian had called upon the pastors of the churches in the neighborhood to enlist their co-operation in the work. Also exhibitions of the work of the children were hung in one library during the summer months. The interest of the children in the exhibits brought many of the parents. The library rooms may be used for neighborhood meetings. A weekly story hour is conducted during the season, and "systematic instruction of school children in the use of the Library is one of the regular features of the work with schools. This includes some idea of classification, the arrange-

ment of the books, the card catalog, how to use it, with practice work, etc."

The relations between the Public Library and the Schools in Grand Rapids are unusually close. Here the plan of operating branch libraries in school buildings is found to work under as nearly ideal conditions as are to be found anywhere.

KANSAS CITY

Kansas City is generally considered to be the place where the plan has met with the greatest success. As very full material has been available on branches in this city, it is possible to study them in some detail. A report made by Librarian Purd B. Wright to a committee of the A. L. A. gives information on various phases of the work. In condensed form the facts given in this report are as follows:

The Public Library is under the Board of Education and financial support comes to it from the school fund. There is a library committee, composed of two members of the Board.

There are seven branch libraries in school buildings in Kansas City, two of them in high schools and five in grade schools. Each branch has an outside entrance and serves the same purpose as a separate library branch. There has been no difficulty in getting the general public to come to a branch in a school house. The adult circulation averages about fifty per cent. Branches are open from 8 a. m. to 9 p. m. on school days and during regular branch hours when the school is closed.

Classes receive instruction in the use of the library, and the librarian consults with department heads and individual teachers in giving suggestions for supplemental references. The librarian is treated as a member of the faculty. Special attention is paid to tributary schools, and classes visit the branch for library instruction. The children's librarian and the branch librarian keep in close touch with all schools. Story hours are held on Saturday mornings.

In high school branches

"The arrangement is that of most public library branches, a reading room for adults on one side with stacks at the back, and a children's room on the other side. The delivery desk is between the two rooms and opposite the outside entrance. These branches are open from 2 to 6 p. m. on Sundays. In both cases, the staff consists of the branch librarian and four full time trained assistants. One page gives thirty hours a week and one of the advanced typewriting students is usually at the disposal of the library one period a day.

"The public does not seem to hesitate to use the libraries because of their location in school buildings. Most of the adult borrowers come in from 3 to 9 p. m. The usual library advertising is done each week in the local papers. Visits to business houses are made and posters are distributed.

"The disadvantages of the system as here used are partly due to growth. There is not sufficient floor space in one instance to accommodate both the school and

the public. There is need of alcove rooms reserved for the public during school hours. Future buildings will probably remedy these defects. School library work is very different from public library work. The school point of view must be understood. There is more continuity in school reference work than in public reference work, and the one who does this should follow the work of the classes. Also, there should be someone in charge who understands boys and girls of high school age.

"There are splendid advantages in the opportunity to demonstrate the use of the library after school days, and to form in students a literary habit. The use of the library by others does not in any way disturb the students. There is economy in a common larger book collection of 20,000 volumes and in the use of a single staff."

As to the libraries located in grade schools, "periods for reference study work assigned by teachers make the child feel at home in the library and create the habit of going there for a source of information." Instruction in the use of the library is given by the librarians to the upper grades of nearby schools, as these school libraries serve the whole community. . . . One point in favor of school libraries is that they reach the older people thru the children.

TOLEDO

In Toledo, Ohio, a five-year survey was made by the Public Library covering 1914 to 1918. The report states:

"As it is impracticable for the city to build and maintain as many branch libraries in separate buildings as would be necessary to provide universal library service, other means of attaining this end must be found. As this report goes to press, an agreement is being concluded between the Board of Education and the Library Board for the placing of branch library rooms in new school buildings in neighborhoods not now supplied with library service. These branch libraries in schools will be for community use and provided with outside entrances. It is expected that not less than ten new school buildings will be built during the next ten years, most of which will be in districts not now served by the library. Library and school authorities will co-operate closely and correlate the development of the two systems. Any future building of branch libraries will be based on the school program."

In a letter of recent date, the librarian, Mr. Herbert S. Hirshberg, outlines the more recent developments in Toledo:

"Up to this time but one branch of this type has been opened, which began operation in April, 1921. This room is about twenty-five by sixty-eight with an outside entrance and heating plant. It has a book capacity for about five thousand volumes, and is excellently lighted both for day and night use. The staff consists of a branch librarian and one trained assistant, with two part time pages and some training class help. The hours are from 10:00 to 5:30 on Tuesday, Thursday and Saturday, and from 12:30 to 8:00 on Monday, Wednesday and Friday. At the school branch, children are excluded after 5:30 unless accompanied by their parents. This rule is enforced in order to encourage the use of the library by adults in the evenings. . . .

"At present, the adult use is about forty per cent of the total and is constantly growing, so that we hope by our experience to refute the general idea that libraries

in school buildings cannot attract adult patronage. Except that we do not plan for as large collections in the school branches as in our independent branches, I cannot see why service cannot be otherwise as good as in the independent branches."

The library room is for exclusive library use, but according to the agreement between the Library Board and the School Board, "this use may be discontinued by either Board, on giving one year's notice to the other; or such use may be discontinued at any time by mutual consent."

Mr. Hirshberg adds:

"We do not anticipate the ejection of the library, as we feel it will become too important to the work of the school to have it forced out, even under crowded conditions.

"One more school branch library is completed and equipped, and is awaiting the time when we can furnish sufficient staff for its operation, which we hope will be not later than the first of the year. This branch is of a slightly different type and consists of two adjoining rooms with an alcove between, admitting fair to not complete supervision from one room to the other.

"Two school buildings containing branch library rooms are under construction, and as the school building program contemplates the erection and enlargement of twelve more buildings within the next year, we shall probably have several more branches of this kind in the near future."

MILWAUKEE

Milwaukee conditions are described in a statement which, to quote Librarian Matthew S. Dudgeon, he and the supervisor of extensions of the Milwaukee Library, "have agreed upon as reflecting what we consider our experience with placing branches in public school buildings."

"The Milwaukee Public Library maintains three branch libraries in school buildings which are open to the general public as well as to the scholars of the school. We are not considering placing more branches in these buildings since we do not consider them to be effective as branches.

"While theoretically it should be cheaper to maintain a branch library in a school building than in a rented store front or similar room, we find that this is not the case. It has actually cost us more in extra janitor fees and similar expenses to maintain a library in a school building than it has in a rented store front building.

"In the second place, the rooms which we have been able to secure in school buildings are generally in the basement and are somewhat dark and forbidding.

"In the third place, the maintenance of quiet and good order is somewhat more difficult than it is in other buildings, arising partly from the fact that we have not complete control of the surroundings.

"In the fourth place, these school buildings are not as well patronized as some of our other branches since adults appear to be reluctant to go into school buildings and since even the children appear to have a prejudice against returning to their school building after they have once left it.

"In the fifth place, we feel that a branch library should be placed on a business street where the passing traffic is heavy."

LOS ANGELES

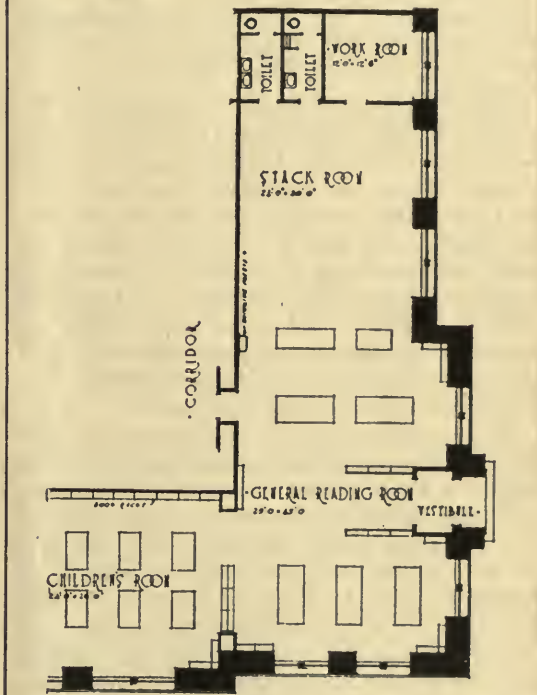

On Los Angeles, Librarian Everett R. Perry writes: "We have tried branch libraries in school buildings and cannot say they were very

successful. They were small, open only two days each week."

Several of the separate branches in Los Angeles are the outcome of stations started in

KARNES SCHOOL BRANCH, KANSAS CITY

CENTRAL HIGH SCHOOL, KANSAS CITY

HERE ARE SHOWN TWO OF THE KANSAS CITY SCHOOL BRANCHES. THE CHILDREN'S ROOM OF THE CENTRAL HIGH SCHOOL HAS BEEN ENLARGED SO THAT THE BRANCH HAS NOW AN AREA OF 4800 SQUARE FEET. TWO NEW BRANCHES PLANNED ARE TO HAVE AREAS OF 5200 AND 6800 FEET RESPECTIVELY.

school buildings, giving neighborhood service with local volunteer workers, sometimes directed by the Parent-Teacher Associations. Mr. Perry concludes:

"Theoretically, the combination of school and public library under the same roof is desirable, being an economical administration of city funds, making the school plant available out of school hours, and using it as a neighborhood center. Better use is made of the library by the children in the school than if they had to go some distance to reach the library.

"In practice, however, our schools have so quickly outgrown their equipment that the library has naturally been crowded out. Unless the building is originally

planned with an outside entrance to the library room, there are always troublesome questions of discipline, either in the hallways or on the school grounds. This phase of our work has been only incidental—a matter of necessity for the time being.”

NEWARK

In Newark, New Jersey, such experience as has been gained is described in a report sent by Librarian John Cotton Dana. The report follows in part:

“The Newark Library has made several experiments in school branch libraries in the last ten years. Our experiences have been, first, with a two months’ experiment in four all-year schools during the months of July and August, and, second, with two branches later established in the two schools where the most successful work was done, for three and four years, respectively. In each case the school supplied the room, janitor and other necessary service, the Librarian supplying books and assistants and furniture, temporarily.”

As to the summer school branches, they were open from July 1st to August 31st, 1915. There were about eighteen hundred pupils in each school. Hours on all school days were 9:30 to 1:00, and from 2 to 5:30, and for the general public from 2 to 5:00. Classes were scheduled for attendance in groups, by arrangement between teacher and librarian, thus controlling somewhat the rush after school hours, and bringing together at the same time children of the same reading ability. The collections included about twelve hundred books.

At one school simple instruction was given by the librarian upon the arrangement of books on the shelves, proper handling of books, etc., with special reference work for 8th grade children. Eighth grade assistants were appointed to help at the noon hour and after school, and two boys regularly delivered material sent from the main library to teachers. Out of the forty-one teachers in the school, thirty-four made active use of the library personally, chiefly as a medium between the teacher and the main library. On an average two hundred books were lent daily. The proportion of books lent to adults was negligible, due first, of course, to the fact that the Library was not open in the evening or on Sundays.

“Records were kept at the Cleveland School to ascertain the use of the school library by children from other schools than Cleveland. We found that sixteen other schools, distant from one-half to one-fourth of a mile, used the library 549 times in ten days.

“Since we never reached the point of opening the branches Saturdays and evenings, we cannot report on use by adults. Because of lack of funds, these branches were closed in April 1919, and we have not since been able to resume work with school branch libraries.”

GALVESTON

In Galveston, Texas, the plan was developed for a different reason from those in other cities.

In a memorial book to Henry Rosenberg, benefactor of the Galveston Library, published in 1918, is the statement:

“Conditions in Galveston required that the use of library privileges by the colored citizens should be separate and distinct from their use by the white people. It was by means of a branch library that the Rosenberg Library Board of Directors attempted to meet the problem. So far as we know this was the first branch library for colored people to be established anywhere in the country. The plan has proved a decided success with us.”

A handbook on the Colored Branch, published in 1918 by the Rosenberg Library gives this additional information:

“The Colored Branch Library was opened in an addition to the Colored High School for public use in January, 1905, with about eleven hundred volumes and twenty-one current periodicals. In the very first year the use of the library was large, and it has grown in size and use year by year. The Branch now has a well chosen collection of about three thousand volumes.”

Librarian Frank C. Patten adds in a letter:

“Our experience has been very favorable to the plan of a branch library closely connected with a school building. The principal of the high school for colored children is given general charge of the branch library. The detail work of the branch, which is kept open about six hours a day is done by a colored girl who has had at least a high school education.”

MINNEAPOLIS

The point of view and some points of the experience in Minneapolis, are given as follows in a letter by Miss Gratia Countryman, librarian of the Public Library:

“Our seven small branches in school buildings and the two which are fully-equipped regular branches connected with junior high schools, are each and all open to the general public. We have done everything within reason to call the attention of adults to the fact that the branch is for general use. We have sent notes home by the children, we have talked to parent and teacher organizations, and have advertised in the local papers. But the use by adults still remains very small as compared with the use by the children.

“I believe that school branches are very profitable, and I expect to increase largely the number of such branches during the next few years in co-operation with the School Board, but I do not believe that such branches take the place of regular library branches in branch buildings.

“The small school branches are open from one until five in the afternoon. We close at five o’clock because the School Board allows the fires to go down so low that we cannot keep them open longer. Our school branches, and everything connected with them, are under the administration of the Library, as I believe they should be.”

DAYTON

In Dayton, Ohio, four branches were opened to the public in four school buildings in 1903. Says a report:

“Thru teachers’ and parents’ associations, the Librarian was able to secure the co-operation of the Library Board and Board of Education to permit the experiment. Notwithstanding many inconveniences on both sides for teachers and library workers, due to lack of adaptation of the older school buildings, the experiment was successful in a number of ways. It brought the library nearer to the homes, where parents and children could enjoy the books equally, and where teachers could make ready use of them for class work; it afforded a certain amount of reference work, and acquainted the boy or

girl not likely to reach the high school with a broader outlook than otherwise might come to him."

In 1917, according to this report, in new buildings being erected, a community library had been definitely provided for in one, and temporary quarters assured in three others. The report continues:

"The essentials are a large well lighted room at the main entrance, which may serve the teachers and children during the day as a working laboratory under the skilled library assistant; and after school, until nine o'clock, serve as library and reading room for the general public. Each community with a new school should have such a public library branch. Under such conditions, books and daily service equivalent to that now rendered by the Carnegie branches may be secured in the most effective relationship to the schools and to the general public, and may promote upon the best lines co-operation with community interests of the whole district at about one-fifth the cost to the taxpayer."

Of one existing branch the statement is made:

"The work of this Branch for the general public last year (alho so severely handicapped by not having a separate room), was nevertheless one-half the circulation of a Carnegie branch, alho the latter was open double the number of hours."

TERRE HAUTE

Information regarding Terre Haute, Ind., was supplied in a letter from the assistant librarian, Miss Grace E. Davis, who writes:

"This library has maintained branches in school buildings since 1914. Since that time eight branch libraries have been opened in school buildings. Three of these are open only three days a week. They have been opened usually at the request of the parents and teachers of the communities and they have given their loyal support to the undertaking.

"All school buildings erected since this plan was adopted have included a library with an outside entrance. The fact that this is one of the few libraries still under the direct control of the School Board makes this plan feasible here.

"The children are sent in for work and are given instruction in the use of the library. The libraries are open from 12:30 to 8 p. m. except Sundays and holidays. There is the advantage of cheaper running expenses, tho sometimes we are shifted from room to room to satisfy the needs of the school. We have to have separate janitor service in some cases.

"My personal opinion is that branches are better in separate buildings, but we could not have reached so large a number of our people in any other way, and since we cannot have separate buildings we are glad to have them as they are and probably they will become so much a part of the community that they will outgrow their present quarters in time to come."

EVANSVILLE

In Evansville, Ind., a branch in a high school was opened in 1920 under seemingly auspicious conditions. But the geographical location of the school proved to be unfortunate for the success of the branch as a community library, and it was withdrawn. According to Librarian Ethel F. McCullough:

"The opening of such a branch is always experimental, and the success of a school library in one neighborhood is no reason at all for assuming that one will succeed in another. . . .

"However, this proves nothing on the side of the un-

success of the school library. For seven years we have maintained flourishing libraries in grade school buildings which reach all classes of people in their neighborhoods. These have usually been opened as school libraries only, but within a short time have developed into centers for general circulation. From being open a few hours in the morning they open first one afternoon and evening a week. As the work grows they open oftener. At the Wheeler School the library is a regular branch open seven days a week. Here more books are issued to adults than to children, and the most serious kind of library work is done.

"The other schools are all stations, with the book stock varying in size from four or five hundred to three or four thousand volumes. As soon as the adult books are read in one station they are shifted to another; not in large groups but a few at a time.

"I thoroely believe in the expediency of using the schools as library centers. I use the word expediency advisedly, because of course you can carry on more activities in your own building than you can ever carry on in another organization's territory. Then, too, the school library offers a fine field for unhappy complications which may develop between two different boards. The spirit of live and let live must control the venture if it is to be a success."

GARY

Librarian Louis J. Bailey reports on Gary:

"We had two branches in schools at one time, but that in the Froebel school was moved to a library building across the street in 1917, and the branch in the Emerson school was closed for lack of adequate finances in 1918.

"The rooms for our branches did not have direct outside entrances, but were corner rooms the first door from the entrance, and we were able to keep them open evenings.

"In those branches the furnishings and the room were supplied by the school, the librarians and books were supplied by the library. The librarian was a member of the staff. The branches were open from ten to five, and three evenings a week from seven to nine. The collections numbered about three thousand books in each branch, about two-thirds being juvenile.

"For a time certain elementary classes were assigned definite hours to visit the library for reading. In the Emerson School, which had a larger number of high school students, the regular class visits of elementary pupils continued for a while, and the library seemed to us to develop mainly into a study hour for high school students. The school even asked us to check the attendance of classes. This we objected to, and finally a teacher or a monitor was sent to do that work. The whole situation developed so unsatisfactorily that we were glad when the lack of funds two years ago compelled us to abandon the library. We received practically no circulation among the people in that vicinity. If we were asked to re-establish a branch in that locality we should not wish to do it in the school building.

"The other branch in the Froebel school building was in a foreign locality and of course we did a great deal with the children. Attracting the adults was a very different proposition, and the room given us was too small to carry on the work adequately. Consequently we raised sufficient funds for the erection of a branch library building near by.

"From our experience I feel it is better to separate the public library from the school. The general conditions for conducting a school library are so different from those in a public library that the school library should be by itself and the public library to be successful must be separate."

From these reports it is evident how varying are the provisions under which the plan of branch libraries in school buildings has been tried. The conditions which make for the greater or less success of the scheme seem clear, and the plan has succeeded in these cities according to the measure in which the necessary conditions have been met.

The outstanding advantage of the plan is the tremendous saving in the cost. Having the library quarters provided and having no overhead expense in maintaining them is an economy. In this way it has been possible to extend library service to many localities which would otherwise be without it. As Mr. Hirshberg has said: "it is unfair that some of the people should have to pay for library service to others when they do not themselves have it easily accessible."

Even in places which have not had as great success as others, it has been definitely proven that the advantage to the schools has been very great. Also thru this channel children may be more conveniently instructed in the proper use of a library, and may acquire an intimacy with one, and a habit of using it on all occasions which will last after the school years are past. In addition to the advantage to the pupils the advantage to the teacher has also been very great.

As to the requisite features for success:

First it seems necessary that there should be a clear understanding between the Library Board and the School Board. The relations between the two, in connection with the furthering of library service thru school buildings, both to the school and to the outside community, should be firmly established.

Secondly, if such a library is to be entirely successful, experience has taught that the quarters to be used for this purpose must be definitely included in the plan of the school building before the building is erected. Also it has been found necessary that the library should have its separate outside entrance and an independent heating and lighting system. The separate entrance makes the library more accessible to the public and keeps it from appearing to be a library maintained only for the school. In this way the problem of attracting the adults of the community is made much easier. The independent heating and lighting facilities make it possible to open the library after school hours in the evening, and on Saturdays and Sundays.

Thirdly, the size of the space allotted for library purposes must be large enough. Where disadvantages have been noted the lack of sufficient space has been a contributing cause of

failure. In Chicago and in Gary this factor was assigned as one reason for their unhappy experiences. And in Kansas City, with its success, the main disadvantage commented on was that due to the growth of the branch libraries insufficient space had been given them.

Fourthly, to make the library a really vital force in the community, consistent and well planned publicity must be used. This is more important than if the library were housed in its own independent building; as a separate building, being more conspicuous, is in itself an advertisement of library service. In the accounts given above many different ways of gaining publicity have been suggested. In this connection it is particularly necessary that visits be made to any other schools in the neighborhood, both public and parochial. They should be made to feel that the library has been planned as far as possible to meet their needs as well as the needs of the school in which the library is housed. Instruction in the use of the library is another very important phase of the work, as is also the story hour, which should be carried on thruout the year.

Visits should also be made to other organizations and institutions of the neighborhood, to pastors of churches, to clubs and parent-teacher organizations. Other forms of advertising employed have been house to house canvasses, distribution of posters, slides in moving picture shows, advertisements in local papers, lists distributed to children and sent to parents, and bulletin boards. Some libraries have permitted various neighborhood agencies to make use of their room.

Fifthly, as regards the school itself, the closest co-operation must be sought. The librarian should have a definite knowledge of the courses of study, should prepare lists of books to correlate with school work, should visit each room and department in the school and try to make the library of service to each and every one.

Lastly, the library should endeavor, in so far as the size of the staff permits, to keep the library open during the same hours as a regular branch. In cities in which reports seem doubtful as to the advantages of the plan, we find, as in Terre Haute, that three of the seven branches were open only three days a week. It has been demonstrated that it is possible for the services of older pupils to be employed advantageously. In this way the staff can perhaps be supplemented and arrangements for longer hours of opening be made. It is conspicuously true that in the cities which have been most successful in their efforts, the hours of regular branches are kept.

French Literature in 1921*

BOOKS ABOUT THE WAR GENERAL

- Rornach, Vice-Admiral. *Souvenirs de la guerre.*
Reminiscences of the famous Ypres battle.
- Palante, Général. *La grande guerre: 4, Victoire de la Marne.*
- Castaing, Général de. *Méditations et pensées de guerre.*
- Cazin, Paul. *L'humaniste à la guerre.*
Remarkable letters from an intellectual.
- Alain, Reboux. *Mars, ou la guerre jugée.*
- Barbusse, Henri. *Le couteau entre les dents.*
Reveals no change in the author's views.
- Bordeaux, H. *La bataille devant Souville.*
A phase of the Verdun battle.
- Boucher et Delvert. *Verdun.*

NOVELS

- Anet, Claude. *Quand la terre tremble.*
Favored by many for the Prix Goncourt.
- Dumur,— *Le boucher de Verdun.*
A worthy brother novel to "Nach Paris" (1920). Involved its author in a lawsuit, intensifying the interest already felt in his picture of the life of the Kronprinz before Verdun.
- Thérive, A. *L'expatrié.*
Resemblance of hero to Romain Rolland unmistakable, altho the author tried hard to differentiate his hero's case from that of the "intellectual" Rolland.
- Rolland, Romain. *Pierre et Luce.*
Touching novel of two young lovers who die together in the Church of Saint-Gervais in the catastrophe brought about by a shell of the Big Bertha on Good Friday.
- Reboux, P. *Drapeaux.*
Discussion of all sorts of problems connected with the war.
- Rosny, J. H., aîné. *Les pures et les impures.*
Psychological study of "sacred and profane love" during the war and after.
- Granvilliers, J. de. *L'amour libérateur.*
Depicts the awakening of love in women in consequence of their activities as war nurses.
- Sheridan,— *Renée: confession d'une amoureuse.*
Explains how individual desertion in case of war is incompatible with honour, but how desertion *en masse* may not be.
- Ripert, E. *L'or des ruines.*
The hero dies in the war dreaming of the "Or des ruines" of his native Provence.
- Iman,— *Les nocturnes.*
Study of the chiefs of the Bolsheviks during the war and before their revolution.

- Hermant, Abel. *Phili, ou au delà du bien et du mal.*
Semi-humorous tale of German prince who accepts dethronement calmly, and in the course of time is recalled from Switzerland to become president of his kingdom, renamed a republic.
- Villetard, Pierre. *Monsieur Bille dans la tourmente.*
Awarded the Grand Prix du Roman by the French Academy. M. Bille is a braggart who emerges from the war with body and reputation undamaged.
- Valmy, Baysse J. *Le retour d'Ulysse.*
Ulysse returns from the war to find his affairs at loose ends, but soon puts things to rights.
- Leconte, G. *Bouffonneries dans la tempête.*
A series of heroes "of the rear."
- Bordeaux, H. *Ménages d'après guerre.*
- Derennes, Charles. *Le Renard bleu.*
Adventures of a "soldat auxiliaire" in a small southern city of France.
- Houley, Jacqueline. *Madedé.*
Tells interestingly of how her boy went thru the war.

POETRY

- Suberville, Jean de. *Le dieu inconnu.*
Awarded the Grand Prix de Poésie Française of the French Academy. Dialog between the Dome des Invalides, Napoleon, and the Arc de l'Etoile rising above the Soldat Inconnu of the Great War.
- Porché, François. *Commandements du destin.*
Contains his famous poem *L'arrêt sur la Marne.*
- Duhamel,— *Elégies.*
Twenty-five little jewels echoing the note of the "Vies des martyrs."
- D'Avenay, Rancé. *Flutes évocatrices.*
Characteristic preface by Barbusse.
- Moussset, E. *Sous le ciel d'Allemagne.*
Beautiful sonnets of a war prisoner.
- Ochse, J. *Repose ailleurs.*
- Delacour, A. *La victoire de l'homme.*

PLAYS

- Lénéru, Marie. *La paix.*
- Frogé, Chr. *Porte-Glaive.*
Adaptation of the theme of Antigone.
- Béchade, H. *Le remous.*
Shows how humanity yielding in turn to reason and to emotionalism is dragged into crises.
- Deval, Jacques. *Soleil de minuit.*
Adds another to list of stories of soldiers blinded by the war.
- Bernard, J. J. *Le feu reprend mal.*
Unfounded jealousy of a soldier who returns to find that an American officer has long been quartered in his house.
- Rolland, Romain. *Le temps viendra.*
The time when humanity will no longer suffer war.

LITERATURE INDEPENDENT OF THE WAR

POETRY

- Noailles, Madame de. *Les forces éternelles.*
- Régnier, Henri de. *Vestigia flammae.*
A rather gloomy retrospect of the days of his abundant and vigorous production.

* This list is compiled from the article on French literature written by Dr. Albert Schinz, professor of French at Smith College, for the 1921 volume of the New International Yearbook, and is printed by permission of the publishers, Messrs. Dodd, Mead and Co. As was the case in the preparation of the similar list summarizing the literature of 1920, printed in the LIBRARY JOURNAL of March 15, 1921, titles are listed as a rule in the order in which they are treated in the article.

- Fort, Paul. *Ballades françaises: Au Pays des moulins de Hollande; Hélène en fleur, et Charlemagne.*
- Bouchor, Maurice. *Chants de la terre et de l'eau.*
- Spire, A. *Samael.*
Ambitious poem about the fall of man, Paradise lost, hardship of humankind and vain aspirations of the soul.
- Morice, Charles. *Le rideau de pourpre.*
Posthumous poems of the time of melancholy Symbolism.
- Vaudoyer,—*Rayons croisés.*
- Jalabert, Pierre. *La vie enthousiaste.*
- Terme, Pierre. *Mon Languedoc.*
The last two celebrate sunny Provence.
- Gasquet, Johachim. *Bûcher secret.*
- Lefebvre,—*Prières d'un homme.*
- Derème, Tr. *Poème des chimères étranglées.*
- Deslimeris, A. *Rimes chevrolantes.*
- Valery, P. *Le cimetière marin.*
- Ponchon, Raoul. *Le muse du cabaret.*
A sort of Brillat-Savarin in verse.
- Sée, Edmond. *L'indiscret.*
A novel in verse, by short poems.
- Frank-Nohain,—*Fables.*
An attempt to walk in La Fontaine's footsteps.
- Maurras, Charles. *Inscriptions.*
- Morand, Paul. *Tendres stocks.*
Subtleties that remind one of Giraudet in prose.
- Reboux, Paul. *Poèmes d'amour.*
Very bold, but in very correct verse.
- Orliac, Antoine. *Métabolisme.*
Futuristic cryptography.
- Burnat-Provins, Marie. *Poèmes troubles.*
- Jonesco, Marie. *Les vers du silence.*
- NOVELS
- Hémon, Louis. *Maria Chapdelaine.*
Idyll of French-Canadian life, the undisputed success of the year.
- Benoît, Pierre. *Le lac salé.*
Unconvincing attack on American clergymen and exaltation of a Jesuit priest in Utah during the troubles of the mid-nineteenth century.
- Escholier, Raymond. *Cantegril.*
Winner of the Prix de la Vie Heureuse.
- Maran, René. *Batouala.*
The winner of the Prix Goncourt, written by a Martinique negro. Unrestrained realism both in description and language.
- Chardonne, Jacques, *pseud.* *L'épithalame.*
Nearly won the Goncourt prize. Recalls Flaubert's "Education sentimentale."
- Bourget, Paul. *Un drame dans le monde.*
- Prévost, Marcel. *La nuit finira.*
- Margueritte, P. *Le sceptre d'or.*
Posthumous novel attacking money makers as the author attacked pleasure seekers in his last novel "Jouir."
- Boyslève, René. *Elise.*
- Jaloux, E. *Fin d'un beau jour.*
- Bordeaux, Henri. *La chair et l'esprit.*
- Corthis, A. *Sa vraie femme.*
- Grasset, Pierre. *Aimer.*
- Rosny, J. H. *Amoureuse aventure.*
- Beaumier, A. *L'amour et le secret.*
- Bachelin, H. *Le bélier, la brebis et le mouton.*
- Binet-Valmer. *L'enfant qui meurt.*
- Farrère, Claude. *Condamnés à mort.*
Story of a strike in America in which the strikers must all perish because of scientific inventions in the hands of the capitalists.
- Duvernois, Le brebis galeuse.
A girl's suffering as the result of slander.
- Elder, Marc. *Thérèse, ou la bonne éducation.*
—*Sang des Dieux.*
Unworthy child of an Academician.
- Schlumberger,—*Un homme heureux.*
A man who has the courage to start life anew.
- Werth, L. *Yvonne et Pijallet.*
- Boulenger, M. *Marguerite.*
Story of a man who suffers because he can have no part in the life of his illegitimate child.
- Giraudoux, E. *Suzanne et le Pacifique.*
A fanciful tale of a female Robinson Crusoe.
- Lichtenberger, A. *Raramené.*
Man of nature again studied in a Pacific island setting.
- Montfort, E. *Chanson de Naples.*
- Duhamel,—*Confession de minuit.*
Tries to picture the mechanism of the brain with all its apparent contradictions.
- Bernard, Tristan. *L'enfant prodigue du Vésinet.*
Humorous.
- Chéreau, G. *Valentine Pecquault.*
- Lafage,—*Abeilles mortes.*
- Rouquette, L. W. *Le grand silence blanc.*
In Alaska.
- Billy, André. *Barabour, ou l'harmonie universelle.*
Satire on reformers.
- Lang, A. *Les responsables.*
Atavism in outspoken terms.
- Dekóbra, M. *Harundal philosophe.*
Humorous story of a boy born in a harem who tries to work out some philosophy of life.
- Lucien-Graux. *Réincarné.*
Spiritualistic novel supposed to be based on facts.
- Jammes, François. *Saint-Joseph.*
- Germain, José. *Pour l'amour de Guenièvre.*
- Pérrin, Jules. *Le mariage d'Abélard.*
- Aragon, Léon. *Anicet.*
Novel of adventure by a dadaist.
The following are the principal novels written by women during the year:
- Gyp (pseud.). *Mon ami Pierrot.*
- D'Houville, Gérard. *Tant pis pour toi.*
- D'Ivray, Jehan. *Rose de Fajorn.*
- Catulle-Mendès, Jane. *Prière pour l'enfant mort.*
- Bertheroy, Jean. *Pavot mystique.*
- Vioux, Marcelle. *Une enlisée.*
Owes much of its success to its outspokenness.
- Rachilde, *Souris japonaise.*
- SHORT STORIES
- Tinayre, Marcelle. *Lampes voilées.*
- Reboux, Paul. *Chonchon et Chouchoune.*

- Humor and delicacy.
 Duvernois, B. Gisèle.
 Mille, Pierre. Nuit d'amour sur la montagne.
 Rey, E. Ariane.
 Adaptation of a new philosophy to old legends.
 Pavie, A. Contes du Cambodge.

DRAMA

- Benoit, Pierre. Kœnigsmark.
 —Atlantide.
 Adaptations of the novels.
 Kistemaekers. La passante.
 Wolf, Pierre. Chemin de dames.
 Felice y Codina, José. Dolorès.
 Adaption in turn poetic and brutally realistic.
 Bataille, H. Tendresse.
 Pictures a deep love in a man of fifty which is finally rewarded.
 Lenormand. Simoun.
 Illustrates the enervating effect of the Saharian climate on even normal people.
 Jean, Albert. Le sursaut.
 A man crushed by his wife finally revolts for the sake of his son.
 Brioux, Eugène. Trois amis.
 Provincial triangle play.
 Rosny, J. H. La prisonnière.
 Contrast between civilized and primitive nature in passion.
 Hirsch. Coeur de Lilas.
 Finds the lofty aspirations concealed in the mind of an apache.
 Descaves. Vestales.
 Amiet et Obey. La souriante Madame Beudet.
 Presented by the Theatre Guild of New York as "The Wife With a Smile."
 Poizat. Circé.
 Explains that Ulysses was not metamorphosed because he was not "mentally a hog."
 Crommelynck. Le cocu magnifique.
 Magre, Maurice. Arlequin.
 Gueroult, Buréau. L'éternel amour.
 Guitry, Sacha. Comédien.
 —Le Grand Duc.
 Produced in English in New York.
 —Jacqueline.
 From a story by Duvernois.
 Curel, François de. La comédie du Génie.
 Rostand, Maurice. La gloire.
 Despair of a young artist because his father has absorbed for himself all the fame that can properly belong to one name. Symbolic rôle of La Gloire played by Sarah Bernhardt.
 Rostand, Edmond. La dernière nuit de Don Juan.
 Bataille, H. L'homme à la rose.
 Produced in New York as "Don Juan," with Lou-Tellegen.
 Regnier, H. de. Le scrupule de Sganarelle.
 A third Don Juan play. The hero's valet vainly warns an infatuated woman.
 Nozière, Elvire.
 Poetic fancies play about a Don Juan episode.
 Aegerter. Une halte de Don Juan.
 Variot, J. La rose de Roseim.
 An Alsatian legend.
- Héroid, F. Cléopâtre.
 Fort, Paul. Louis XI, homme curieux.
 Larguier, L. Les Bonapartes.
 France, Anatole. Au "Petit Bonheur."
 Ghéon, H. Le pauvre sous l'escalier.
 The old legend of St. Alexis, symbolically adapted.
 Schlumberger. La mort de Sparte.
 Porché, F. Dauphine.
 Fallens, L. La fraude.
 Terrible drama on the Dutch frontier.
 These last five were played at the Théâtre du Vieux Colombier.
 Cocteau. Les mariés de la Tour Eiffel.
 Falk et Bousquet. Un ange passe.
 Bernard, Tristan. Daisy.
 Three comedies.
 Claudel, P. L'homme et son désir.
 Strange symbolism. Seems to have failed completely.
- CRITICISM AND HISTORY OF LITERATURE
 Lavissee. Histoire de la nation française, tome 13.
 Contains remarkable contributions of Picavet, Lavissee and Bedier on mediaeval literature.
 Chamard, H. Origines françaises de la poésie de la Renaissance.
 Nolhac, Pierre de. Ronsard et l'humanisme.
 Magne, E. La joyeuse jeunesse de Tallement des Réaux.
 Allays, André. Madame de Sévigné.
 Truc, G. de. Lettres de Madame de Maintenon à d'Aubigné et à Madame des Ursins.
 Taillandier, Mme. Saint René. Madame de Maintenon.
 Milhaud. Descartes savant.
 Cohen, G. Ecrivains français en Hollande au XVII^e siècle.
 Seillière, G. Jean Jacques Rousseau.
 Goyau, G. Pensée religieuse de Joseph de Maistre.
 Vermale, E. Notes sur J., de Maistre inconnu.
 Bordeaux, H. Au pays de Lamartine.
 Choisy, L. F. Sainte Beuve, L'homme et le poète.
 Bertaut, J. Amitié romantique.
 Of Rollinat and George Sand.
 Michaut. Sainte-Beuve.
 Bouglé, C. Proudhon et son Temps.
 Arréat, L. Nos poètes . . . de Béranger à Saimain.
 Miomandre, F. Pavillon de mandarins.
 Stendhal, Rousseau, de Gourmont, Verhaeren, etc.
 Lantoine, A. Paul Verlaine et quelques uns.
 Esch, M. En relisant Maupassant.

 Rostand, Jean. *La loi des riches.*
 Scathing attack against his own class, which one reads with no little amazement. Author is the second son of Edmond Rostand.

To Every Librarian—Everywhere

YOU ought to read the article by Mary E. Hazeltine on "Recruiting for librarianship" in the *Wisconsin Library Bulletin* for December.

The A. L. A. Committee on Recruiting and other recruiting committees are doing what they can to see that librarianship as a desirable profession is brought to the attention of educated young men and women who are adapted to it. The best recruiting work, however, is that done by the individual librarian in talking to small groups of students or in informal conversation with his friends. Miss Hazeltine's article will suggest ways in which you can help.

JUDSON T. JENNINGS,

Chairman, A. L. A. Recruiting Committee.

Books Popular in January

BOOKS most in demand in the Public Libraries in January, according to the *March Bookman* were:

FICTION

- If Winter Comes. A. S. M. Hutchinson. Little, Brown.
 Helen of the Old House. Harold Bell Wright. Appleton.

- Her Father's Daughter.* Gene Stratton-Porter. Doubleday.
 Main Street. Sinclair Lewis. Harcourt.
 The Pride of Palomar. Peter B. Kyne. Cosmopolitan.
 The Brimming Cup. Dorothy Canfield. Harcourt.

GENERAL LITERATURE

- Queen Victoria. Lytton Strachey. Harcourt.
 The Mirrors of Washington. Anonymous. Putnam.
 The Outline of History. H. G. Wells. Macmillan.
 The Mirrors of Downing Street. Anonymous. Putnam.
 The Americanization of Edward Bok. Edward Bok. Scribner.
 The Glass of Fashion. Anonymous. Putnam.
 Best sellers during the same month, as reported by sixty-four booksellers in fifty-two cities for the *March Books of the Month* were:

FICTION

- If Winter Comes. A. S. M. Hutchinson. Little, Brown.
 To the Last Man. Zane Grey. Harper.
 The Sheik. Edith M. Hull. Small, Maynard.
 The Pride of Palomar. Peter B. Kyne. Cosmopolitan.
 Helen of the Old House. Harold Bell Wright. Appleton.
 Her Father's Daughter. Gene Stratton-Porter. Doubleday.

GENERAL LITERATURE

- The Outline of History (Educational edition). H. G. Wells. Macmillan.
 The Mirrors of Washington. Anonymous. Putnam.
 The Americanization of Edward Bok. Edward Bok. Scribner.
 Woodrow Wilson as I Know Him. Joseph Tumulty. Doubleday.
 Queen Victoria. Lytton Strachey. Harcourt.
 Mirrors of Downing Street. Anonymous. Putnam.

LINES

Written by an irritable old gentleman after waiting an hour for a book in the public library.
 The sloth's an unambitious thing:
 The snail's a tedious, crawling beast
 That knows not such a thing as haste;
 But sloth and snail are swift as deer
 Compared to the attendants here.

—*New York Sun.*

At a recent meeting of the Executive Committee of the Carnegie Foundation for the Advancement of Teaching it was ruled that "librarians, associate and assistant librarians [of institutions associated with the Foundation] are eligible for allowances, but that reference librarians, classifiers, catalogers, superintendents of circulation, and library assistants are not eligible."

The Library of the Common Service Committee, 370 Seventh Avenue, New York City, wants to procure a few copies of Thomas Carrington's "Tuberculosis Hospitals and Sanatorium Construction," published by the National Tuberculosis Association in 1914 and now out of print. Will any librarian able to supply this communicate with Florence Bradley, Extension Librarian.

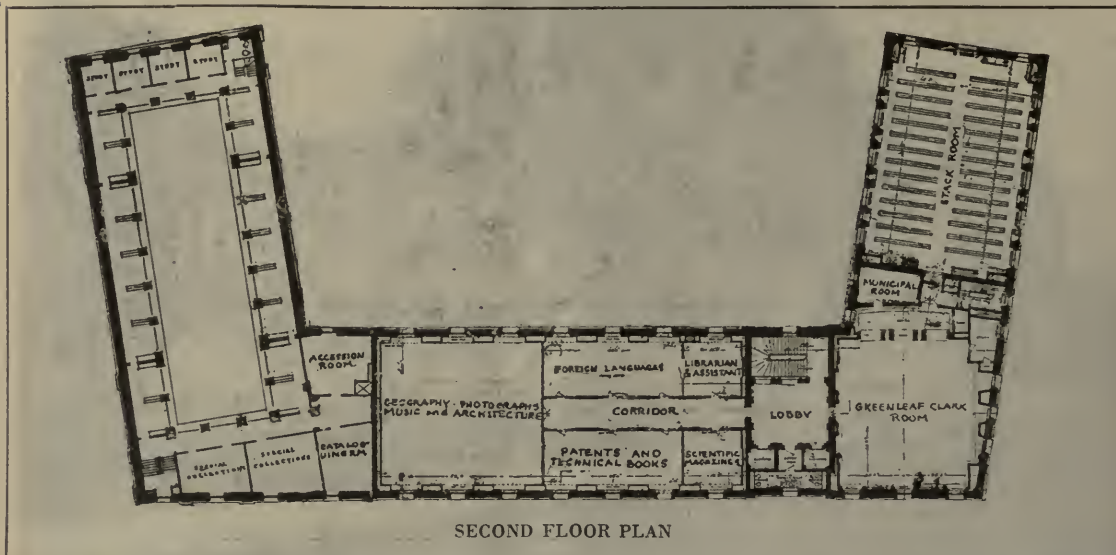

A Building Which Houses Two Libraries

THE opening of the James Jerome Hill Reference Library in December completes the great library building at St. Paul which is an unusual and happy combination of a public library, built and administered by the City, and a reference library built and administered by the gift of a private citizen. Mr. Hill united with the City in planning a joint building which could be built more beautifully and administered more efficiently than two separate buildings could be, and Mr. Electus D. Litchfield of New York was chosen as architect.

The building which is of light pink Tennessee marble is in the shape of a hollow square open on the fourth side. Here is a little park enclosed by the wings of the library, and "one may hope," says R. Clipston Sturgis, in the *Architectural Record*, "perhaps not unreasonably, that this beautiful area overlooking the river will be developed so as to make it possible to use it as an outdoor

Plans are reproduced by courtesy of the ARCHITECTURAL RECORD

SECOND FLOOR PLAN

reading room or an open air hall where lectures and pageants and other educational activities might be given a beautiful and appropriate setting.”

The two main entrances on the north side have between them an entrance to the children’s department on the ground floor, and there are also garden entrances on the south.

In addition to the children’s reading room and auditorium there are on the ground floor the school libraries room, the packing room and the bindery. The other staff work rooms and rest rooms are grouped on the top floor, a plan which has great advantages in the way of light, air, and economy of operation. The accompanying plans show the location of the other departments of the Public Library.

The Hill Reference Library is planned for a very great extension of its book capacity. “At present it is a great open three story hall, top-lighted. . . . Studies occupy the southern end of the main book room and the north end alone reaches an outside wall.”

A solid wall separates the two libraries, broken only by a small door from the reading room of the Public Library to the entrance hall of the Hill Library. “This door has never been used,” says Librarian J. G. Pyle of the Hill Library, “and whether there will be free communication in the future remains to be seen. The two libraries are working in perfect harmony and understanding. The contents of each are at the disposal of the other, subject to the rules provided in each for the use of its books. It has been found, however, that patrons of either prefer to remain within it until their work is done.”

THIRD FLOOR PLAN

The New York Public Library School

By ERNEST J. REECE, Principal

IN the past summer the Library School of the New York Public Library completed its first decade of work. In 1911, almost coincident with the opening of the central building of the New York Public Library, announcement was made that a school for librarians was to be among the features of the consolidated institution. Nothing of the kind had been anticipated when the plans for the building had been begun some ten or twelve years previous, but in view of the library's location and its diversity of work it seemed thoroly fitting, and unassigned rooms provided the necessary quarters. The project was placed before Mr. Carnegie, who agreed to finance such a school for five years. A faculty was designated, the necessary equipment was procured, announcements were prepared, and in September instruction began. The task of organizing was carried on under the direction of Miss Mary Wright Plummer, whom the new opportunity had drawn to Manhattan after her years of experience in charge of the Pratt Institute School of Library Science; and she continued in charge until the time of her illness and death in 1916. Pending the appointment of a new head, Professor Azariah S. Root devoted a year of leave from his post as librarian of Oberlin College to directing the work of the school, serving until the coming of the present principal in 1917. Since the expiration of the five-year period for which funds were originally promised, the Carnegie Corporation has given support in the form of annual grants.

In proposing a school for librarians in connection with the New York Public Library, the thought was to utilize a combination of advantages which is not to be equalled anywhere in the United States. To begin with, the New York Public Library, as most American librarians are aware, represents the merging of several important foundations devoted to reference work, with a group of free circulating libraries designed to reach a great part of the metropolitan community. This means that it is concerned on the one hand with scholarship and investigation as provided for in the economics, technology, oriental, art, American history, rare book, and other divisions of the Reference Department: and that it typifies on the other hand the many and varied activities which are more commonly identified with the free public library, such as branch work, extension methods, club work and general community service. Outside the New York Public

Library, but in and about New York City, there are examples of libraries associated with schools, colleges, welfare institutions, educational and research foundations, banks, insurance companies, manufacturing plants, export houses, and with societies devoted to engineering, law, medicine, botany, history, geography, numismatics, and the literature of specific languages, and examples of county libraries. New York is also in the home of a number of important private libraries; it is the book-publishing center of the United States; it leads in lectures, music and the drama; and it is the city in which the greatest variety of civic and community activities is observable. The Library School of the New York Public Library has sought to take full advantage of these opportunities, feeling that it is in a strategic position and that the maintenance of a strong school for librarians in connection with the New York Public Library is in its way as significant as the locating of a medical school in New York, or the conducting of a school of mines in Colorado or Michigan.

The purpose of the Library School of the New York Public Library from the beginning has been first to fit thoroly for librarianship the applicant who aims only at general work, or who plans to move into particular fields of endeavor only as experience and opportunity may lead; and second to provide facilities for more definitely directed study, over a broad range of subjects, for those who desire the preparation necessary for specialized forms of work in the general library or for conducting libraries of a highly specialized nature. Accordingly the first year curriculum introduces the student to all the important phases of library practice, familiarizing him with comparative methods, with the more obvious tools, and with the literature and history of the profession, and embodying the material usually treated in a one-year library school. The second year courses deal with subjects and books for discussion of which there is not time in the first year, and which are relatively unimportant in many library positions; and it allows also for study which does not belong strictly to the field of library technique, but which may nevertheless prove highly valuable where work with a special collection is concerned. Thus, a second-year student who wishes to obtain the best possible preparation for conducting a branch library may find it advantageous not only to elect courses which include

careful study of such topics as staff training, schemes of service and library buildings, and to prepare a thesis upon some group of branch problems or upon branch opportunities or conditions in some particular community, but he may profit by taking at the New York School of Social Work a course dealing with community problems or social agencies, for which the Library School would give credit. Another student desiring to get the best equipment for school library work may find it worth while to take not only the course in school library methods, together with the related courses, at the Library School, but may see value in a course in the theory or psychology of education at Teachers' College, for which similarly the Library School would give credit. The same might hold for one who planned to hold a position in an economics library, and who might add to the reference courses at the Library School appropriate courses in economics at Columbia University; and for candidates interested in various other particular lines of work. To those who complete satisfactorily the first year of study, a certificate is granted; a diploma is awarded to those who, possessing certificates from the Library School of the New York Public Library or from some other school holding membership in the American Association of Library Schools, pursue and finish the second year's work.

In planning the curriculum both of the first and second years, every advantage is taken of the facilities that lie to hand. The instruction of a resident faculty is supplemented by lectures from members of the staff of the New York Public Library and of many other local libraries, and from a large number of visiting speakers, some of whom are brought to New York by the School and some of whom are caught as they are passing thru the city. The School has always sought to obtain, with no greater conservatism than necessary as to expense, such speakers as could be expected to contribute materially to the richness of the courses—some because of exceptional knowledge and intellectual standards, some because of their power to stimulate interest in fields of knowledge that might otherwise be unattractive, some because of long acquaintance with both practical and instructional sides of a subject, some because they come direct from particular tasks or possess expert knowledge of a special topic, or because they bring novel personal or professional viewpoints, or because they make possible the presentation of varied methods and opinions, or because their names carry marked authority. Similar principles are followed as far as possible in the planning of practical work, visits and inspection tours, the profusion of libraries with-

in reach making it possible not only to see practically every type of effort, but to make choice of those libraries embodying such combinations of work as may be of value to particular groups or to individual students.

The School's reach of influence is indicated by the wide area from which its students have been drawn and its work by their dispersion, this including practically every region in the world in which there is significant library endeavor. Students have come from more than two-thirds of the states in the Union and from ten foreign countries, the staffs of one hundred and twenty libraries being represented among them. They have gone to positions in the New York Public Library, to suburban libraries in the New York district, to the various special libraries in the metropolitan area, to most of the states of the United States, and to Europe, Asia and South America, as well as to certain of the outlying territories under American control. They are engaged in practically every type of library work and related activity, including that of public libraries, county libraries, proprietary libraries, state libraries, college and university libraries, high school libraries, special libraries, as bibliographers, as teachers in library schools and training classes, as library commission workers, and in various forms of business and of social and government service for which their library training has helped to qualify them. In the war period the United States government and auxiliary agencies used fifty-nine former students of the School, many of them in forms of work which they could not have performed except for their library training. At the close of the ten-year period there had been awarded two hundred and ninety-seven certificates and one hundred and sixty diplomas, the number of individuals who had received either certificates or diplomas or both being three hundred and thirty-three.

The School seeks to serve the profession not alone thru its graduates and former students, but as far as possible in each day's work. One means of doing this consists in the auditor system, in which an "open course" experiment of 1914 has been revived on a larger scale. Under this plan persons who possess maturity of mind and experience and familiarity with library tools and usage comparable to that of advanced students are invited to attend as listeners certain of the advanced courses. No credentials are given, but many workers have shown appreciation of the opportunity to get into touch for a time with a new center of library interest and activity. The School also holds on each Wednesday afternoon thruout the school year a social hour, to which former students and

members of the staffs of local libraries and visiting librarians are commonly invited, and at which it has frequently enjoyed authors' readings by men and women of literary achievement; these occasions have come to serve as a center of professional interest and acquaintance, for librarians who are within reach as well as for the students and faculty. In recent years the School has also been acting as host each May for an institute, for the library workers of Westchester and Rockland counties and western Long Island, New York, under the direction of the Committee on Institutes of the New York State Library Association.

Economy in Moving a Library

WHAT proved an economical plan for moving a library was worked out by the Pacific Unitarian School for the Ministry at Berkeley, California, which recently moved its library of fifteen thousand volumes and as many more unbound pamphlets from very crowded quarters into a new building furnishing ample room.

Assuming that the future growth of the library in its several classes would probably be in proportion to the present size of those classes, the problem was to determine the ratio of space to be occupied by the present collection, to the space in which it was to be spread out in the new stack.

The total length of the shelving in the new stack was ascertained. From this were deducted, to allow for future expansion, all top shelves, and, at the end of each main class, an additional number of shelves proportioned to the present size of the class. Further deduction was made for shelf-room to be occupied by large folios to be shelved separately, and for space set aside for duplicates, etc. The remainder gave the space in which to spread out the collection. The collection was then measured and the length of each class or group of small classes, noted, excluding the folios above provided for. From these totals it was shown that there were approximately twenty-four inches of books to each three-foot shelf.

A plan was next drawn on separate sheets, one for each range, with subdivisions showing each tier and shelf. On this plan were marked, shelf by shelf, from the measurements of the classes and groups, the class numbers to be assigned to the given shelves, care being taken to leave vacant as planned all top shelves and the further shelves reserved. In order to have certain large classes start at the beginning of a floor, range, or tier, certain adjustments were made as the work proceeded, which were later compensated to the general scale.

The history of the Library School of the New York Public Library has been brief, but it would not be complete without mention of a few personalities which have had much to do with its making. The building of the school was the final task of Miss Plummer, honored, beloved, and a pioneer in the library school field. One of her colleagues was Miss Agnes Van Valkenburgh, whose buoyant, cheery leadership pointed the way to the perplexed and hesitant, without number. The other, Miss Mary L. Sutliff, strong still in service, continues a spring of inspiration to successive generations of students.

Strips of paper about three by twenty inches which could be wrapped round the books were then prepared. On these were marked the floor, tier, range and shelf to be occupied by the book bearing the label.

The collection was next measured off into twenty-four inch groups, and one of the labels attached to the first volume in each group. So as to avoid undue breaking up of classes between shelves, or undue grouping of separate classes on the same shelf, a given shelf was often assigned more or less than its quota, compensation being made on later shelves so as not to disturb the general average.

For moving the books a carpenter made two parallel book troughs four feet long, framed together and carried like a litter on poles projecting for handles. Care was taken always to load and unload the carriers in precisely the same order. When loaded and taken out of doors, all dust was thoroly blown off by a pneumatic sweeper. On arrival at the new stack the labels indicated on precisely what floor, range, tier and shelf the books were to be placed.

The plan did not in practice at once work out quite so smoothly as it sounds, but this was due to haste and carelessness, resulting in inaccurate measurements. Still all troubles occurred and were corrected previous to the actual moving, which was accomplished without a hitch. The point of the scheme is that the whole re-arrangement can be worked out on paper, and any necessary corrections there made; so that after it is once shelved no book need be shifted because of a mistake discovered too late.

EARL M. WILBUR.

"WHAT YOUR GOVERNMENT PROVIDES"

The Providence Public Library has placed a table in the main delivery room bearing the following sign: "Watch This Table." "Keep in Touch With What Your Government Supplies." "Collection Continually Changing."

School Librarians' Salaries

SALARY schedules for forty-eight cities in the United States compiled by the Education Association of the District of Columbia* show the following scale for school librarians:

City	Minimum	Increments		Maximum
		Amount	Number	
New York, N. Y.	\$1400	\$100	10	\$2400
Detroit, Mich.	150 per month			200 p. mo.
Assistant	20 per month			40 p. mo.
St. Louis, Mo.	1800	100	4	2200
Baltimore, Md.				1200
City College				1400
Los Angeles, Calif.	1800			2400
Washington, D. C.	1200	40	10	1600
Newark, N. J.	2100	100	7	
		200	5	3800
Cincinnati, Ohio:				
Non-college graduate	1300			2800
College graduate	1400			2800

Americanization thru the Library

"HAS not Americanization by the most enlightened library methods weighty claims as compared with lessons in English likely to antagonize?" asks Ralph H. Bevan in the March *Forum*, discussing "Libraries and Americanization."

He mentions "advanced library methods to induce habits of profitable reading and turn out valuable citizens," such as reading and science clubs, story hours, and reading diplomas, and more especially the use of artistic hand-made bulletins in prominent places, and of drawings, diagrams, magazine illustrations, photographs, pictures, models, etc. These appeal especially to children, who spend so much of their out-of-school time in the library. As an instance of still bolder initiative on the part of a library in acquainting its foreign constituents with its value to them, he describes the house to house canvass of a foreign district made by the assistants of a branch of the Providence Public Library, a survey, which, while not unattended by disagreeable features, was in the end advantageous to library and foreign elements alike.

Notable Anniversaries of 1922

AMONG the notable anniversaries occurring in 1922 the centenary of the death of Percy Bysshe Shelley will doubtless receive the attention that was accorded last year to the memory of John Keats.

"The new year is further rich in the anniversaries of great characters and events. In 1922 are due the birthday centennials of James Parton, the biographer (Feb. 9); Edward Everett Hale, New England writer and thinker (April 3); Ulysses S. Grant, warrior and president (Oct. 27); and Matthew Arnold, poet and essayist (Dec. 24). The bicentennial of the birth of Samuel Adams, the patriot, will fall on Sept. 27; and the 250th birthday anniversaries of the associated writers Joseph Addison and Richard Steele will occur May 1 and Sept. 1 respectively. Jean Baptiste Poquelin Molière, the French dramatist, was born 300 years ago (Jan. 15, 1622) and in France, chiefly, observance will be appropriately made. Three hundred years ago the first English newspaper made its appearance; and four hundred years ago, in September, 1522, the first circumnavigation of the globe was accomplished by Magellan."—*Quarterly Booklist* of the Pratt Institute Free Library, Winter 1922.

Your Calling Judged by Your Handwriting!

Miss Reed:—
I have followed your
s in the Detective Story Magazine
of time and I am very much
in them, so I take this opportunity
in this specimen of my handwriting
you would kindly analyze it for me!

"N. W. H.—Your writing is certainly most exceptional for that of a young person. It shows caution, reflectiveness, carefulness, attention to detail; also it expresses some timidity and a considerable lack of enterprise; but its chief interest is that, altho your education is not unusual, it is already expressive of the scholar's trend of mind.

"What I earnestly suggest is that you study for the position of a librarian, and that you bend all of your energies to the getting of a really good education. . . ."—*Detective Story Magazine*. (The italics are ours. ED. L. J.)

County Libraries in Hawaii

LAST year was one of transition for library extension in the Territory of Hawaii and this year ought to see intensive book service well established thruout the Territory thru the agency of county libraries.

For several years, the Library of Hawaii has been sending traveling library collections to the islands making up the Territory of Hawaii. This service had increased until three hundred stations were receiving collections and twenty-five thousand books were going out during a year. It is rather difficult to estimate what proportion of the people were being reached thru these three hundred stations, but it was at best small. The juvenile readers, reached thru the schools, were not having anything like the attention they should have had. It was obviously impossible for one shipping point to handle the work that came unsolicited without any effort to extend where it might be even more needed. Local libraries seemed to be the only solution.

A county library bill, modelled after the California County Library law, was drafted and passed by the Legislature which met early in 1921. It allowed for county organization under three different methods, and oddly enough in the four counties of the Territory these three methods are in operation.

Appropriation was allowed the Hilo Library for its maintenance and for extension of its service to the whole county of Hawaii. It was not stipulated that a certain proportion of the \$25,000 appropriated should be expended for Hilo City and the remainder for the outside districts, the intention being that service should be as uniform as possible. It seemed only fair that the books which had been in the traveling library collections should be divided among the counties in order to assist them in their greatly increased work. These books and the books in the Hilo Library formed the nucleus for the collection which grew rapidly after the territorial appropriation became available in July.

Certain interested residents of Maui, thru appeals to the Maui Board of Supervisors, brought about the establishment of a county library. According to law, before territorial appropriation could be made for a county library, the county must provide housing of a permanent character. In order to meet these requirements, the Supervisors purchased a lot and residence at the county seat, and have just completed its remodelling into a library building. Books from an old association library and books from the traveling libraries here formed the beginning of the county library collection. The appropriation is \$10,500 per annum.

On Kauai, a committee has been appointed which has applied for a charter to incorporate the Kauai Library Association, Ltd. The Lihue Church Library is a nucleus here and will receive the territorial appropriation of \$8,000 after satisfying the Kauai Board of Supervisors and the Governor of the Territory that there will be county-wide library service.

On Oahu, rural extension is carried on as a department of the territorial library, the Library of Hawaii.

There is but one real county library, altho each of the four counties does now, or soon will, perform the functions of a county library.

A county library conference was held on January 16th and 17th, Miss Margaret Newman representing Hawaii; Miss Marion Morse, Maui; and Miss Laura Robson, Oahu.

The first day was spent in a trip around the island of Oahu, on which Honolulu is located, visiting school and community branches. In one school the principal had the children tell stories which they had read from library books. This is a regular Friday afternoon feature of the school program.

In the evening there was an open meeting for which invitations had been sent out. Mr. Charles Atherton, president of the Board of Trustees of the Library of Hawaii, presided. Mr. Vaughan McCaughey, superintendent of public instruction, spoke on the need for co-operation between schools and the libraries, and expressed an optimistic view upon the special Americanization task which confronts all educational institutions in the Territory. Dr. Karl Leebrick, Professor of History at the University of Hawaii, next spoke on the work of the Hawaiian Historical Commission, of which he is a member. He contrasted the two phases of a library's work—that of collecting and preserving, and that of bringing the public to use its resources—and pointed out how the local libraries can be of great help to the Commission in collecting material of historic interest.

Following, the delegates gave reports on the progress of their work.

Miss Robson gave a short history of the bill authorizing the organization of the county library, and told of the union catalog as an instance of how co-operation between the counties will be effected. Requests from the different counties will be handled by the county department of the Library of Hawaii. She then reported on rural work on Oahu, with special emphasis on the needs of the schools.

Miss Newman gave an interesting report of progress in Hawaii. With a trained children's librarian, interest among the children has been

so stimulated that it is impossible to supply the books necessary altho extensive purchases have been made. Some changes have been made in the building to accommodate the increased amount of work. The community at Kealakekua is interested in library service to the extent of having a library board, and a reading room with periodicals.

Miss Morse told of the purchase of a residence at the county seat and its remodelling into a library building. To date she had been engaged

in preparing books and had not established outside branches, but she expected soon to take over the book service so that Maui will soon be on "its own."

Following the reports refreshments were served, and after the guests had left, the librarians again assembled to form the library organization reported elsewhere in this number.

The second day of the convention was spent in routine matters, and in visiting the various libraries in the City of Honolulu.

"Find it in Books"

"Find it in Books" is the March slogan of the Year Round Bookselling Plan. Useful books are emphasized this month: Business books during the first half, and books in the home during the latter. Several hundred li-

**Books Give
Information
Knowledge
Power**

BY COURTESY OF THE NATIONAL CITY COMPANY

brarians are using the posters here illustrated (which are supplied by the National Association of Book Publishers, Room 417, 334 Fifth Avenue, New York) mostly in co-operation with the local book-stores.

The American Library Association has prepared two timely lists for this month.

"Business Books for Profit and Pleasure" lists forty titles "as carefully chosen as a set of fine tools" by Ethel Cleland. Up-to-date books are classified under such headings as: The Great Game, Speeding up Efficiency and Effort, Studying the Players and Directing the Force, Every Business Has a Beginning, Getting the Most out of the Office, Charting Progress and Results, Giving and Getting Credit.

These lists may be had as

follows: 5 for 25 cents (in stamps), 25 for \$1, 100 for \$3, 250 for \$7, 500 for \$12, 1,000 for \$20. Postage extra.

"Useful Books in the Home" is a small practical selection of the most useful books on cooking and food values, dressmaking, millinery, etiquette, house planning and decoration, household budgets, gardening, child care, hygiene and morals, suggested reading for children, etc.

Prices: 6 for 25 cents (in stamps), 30 for \$1, 100 for \$2.50, 500 for \$10, 1,000 for \$18. Postage extra.

THE LIBRARY JOURNAL

TWICE-A-MONTH

MARCH 1, 1922

THE retiring Postmaster General is to be thanked, among other good results of his common-sense administration, for an incidental service to libraries in repealing the meticulous rule that prices of books cannot be stated in periodicals without forfeiting bulk rates. Mr. Hays came to his post as a reward for efficient party management, but after a first distribution of political "plums" in the nomination of Assistant Postmaster General, he put aside partisan considerations, brought efficiency to the fore and cleared away much of the rubbish and red tape which had accumulated during the previous war administration and prevented postal progress. It is regrettable that the small salaries paid by the government has deprived the people of his services when he was only at the beginning of the service he might do. It is to be hoped that the Postal Commission, which should report in July, will adopt for the Department the re-organization plan which will make it a great business corporation on the best lines in which partisan appointments will have no place. Incidentally, public libraries should have full consideration, either by giving them the benefit of the bulk rates vouchsafed to periodicals, or else in line with the A. L. A. Council's recommendations by reducing postage on library books under the parcel post system, especially in the service of rural communities where the cost is confined to local transportation.

★ ★ ★ ★ ★ ★ ★

THE decimal classification, which has carried the name of Dewey into all library countries and has almost completely standardized our own public library system, has another potential application which should not be neglected by librarians. This was introduced into the Edison system in New York many years ago for the control of operating accounts, and permitted at once a comprehensive generalization as well as minute knowledge of detail in auditing accounts and making them of practical significance, and there is no reason why a like application should not be made to library statistics and thus furnish a standardized and uniform method which would permit comparisons which are still practically impossible. The system of uniform statistics recommended by the A. L. A. does not go far enough, nor does it include the convenience of the decimal system, nor has it been as widely

adopted as it should be. A decimal classification could be adapted and adopted as well for expense accounts and for circulation statistics, including in the latter relation a standardized alphabetic scheme to indicate languages by their initial letters as *e* for English, *f* for French, and the like. Some enterprising librarian of an ingenious turn of mind would do well to work out and propose some such scheme for general discussion and criticism.

★ ★ ★ ★ ★ ★ ★

IT will especially interest those who have heard Miss Zachert's account of the extension of Uncle Sam's library field into the Virgin Islands to note that in our earlier island possession, Porto Rico, conditions are ripening toward an extended library development on the home model. The Dominican friars founded a library on the island, which was destroyed by buccaneers about the time the Pilgrim fathers landed, and it is a far cry from that to the Carnegie library of San Juan, half of English and half of Spanish books, administered by Mr. O'Neil who prepared himself at the Pratt Library School, and including a traveling library department of fifty or more stations. The only other distinctive library building is a charming one at Yauco, built by the enterprising inhabitants of that live coffee centre, temporarily utilized to supplement overcrowded schools. But thruout the island each municipality of any importance has a fair-sized reading room and library of Spanish books and periodicals, housed usually in the City Hall or administration building. These are supported by the municipality, are open morning, afternoon and evening for a few hours each, and are commonly under charge of an unprofessional librarian paid as an untrained custodian. They furnish opportunity for local development, which, combined with leadership from the Carnegie Library and a library school or apprentice system in connection with that, should become the Spanish translation of our county system. San Juan has also historic or governmental libraries of a special sort, and the higher educational institutions, as the high schools, also are developing collections of books for their respective purposes. It will be some years before the A. L. A. can expect the affiliation of an insular library association, but that will doubtless come in due time.

LIBRARY ORGANIZATIONS

RHODE ISLAND LIBRARY ASSOCIATION

ONE hundred people attended the Mid-Winter meeting of the Rhode Island Library Association on February 6, at the John Carter Brown Library, Providence. This ideal place of meeting gave a wonderful opportunity of visiting several fine libraries and of seeing many rare books and manuscripts.

Charles L. Nichols, of the Library Board of Management, in his opening address, spoke of the two objects of this Library—to furnish a place of research for historians and students, and to reproduce for the benefit of the public some of the rarest books in its collection—the second almost as important as the first. Already nearly fifty unique books in various libraries, including the John Carter Brown, have been reproduced by photostat, so that now they can be studied in various parts of the country almost at first hand.

In a short address Dr. Azariah S. Root, president of the A. L. A., emphasized the need of establishing standards, so that librarianship will come to be recognized as other professions, law, medicine, teaching, etc., are now recognized, and urged the necessity of some kind of certification. Librarianship requires training and equipment, and all possible encouragement and backing should be given the training schools. To guard against the monotony of mechanical work, librarianship should be emphasized not as technique, but as a gradually acquired mass of knowledge, and assistants should be encouraged to read and study so as to become specialists in some particular field.

At the Round Table, conducted by Mary E. Robbins, pamphlets and pay collections were discussed. Certain groups of pamphlets ultimately become books, so that binding is the only thing which can be done. A vertical file for those constantly in use is often the solution, the ideal way being arrangement by subject. Another desirable method is to place pamphlets in cases, or boxes, shelving those of sufficient importance with the books. Pamphlets should never be bound into miscellaneous volumes. Professor Robbins expressed herself in favor of a pay collection, provided there are no titles in it which can not be found in the general collection. To those who are willing to pay, it furnishes desirable books and thus counteracts the often undesirable books found in commercial collections. By lessening the demand on the popular volumes in the general collection it releases them to those who do not wish to pay.

Francis K. W. Drury, speaking on the library as a detective agency, outlined a method which

can be used in presenting the subject for recruiting purposes. The library, as a detective bureau, has the resources for finding answers to questions, such as Mr. Edison's 100 questions, intelligence tests, etc. The chief of the bureau is the librarian. He knows the clues to the answers, and arranges the books so that they will be easily accessible. System is necessary, hence the card-catalog, which is so planned that the desired book may be found quickly. Authors' titles sometimes mislead. The detective puts all books about a subject together. This is called classifying. The librarian, like a detective does very little for himself and a great deal for others. Librarianship offers both a livelihood and respectability, and unlike some professions, there is no retirement, save for inefficiency, for librarians are more valuable as they grow older, because of their accumulation of knowledge.

Henry N. Sanborn of Bridgeport, in his address on the field of a state library association, asserted that a state association can best accomplish its purpose by holding meetings with provision for free discussion and with programs confined to purely professional matters, such as principles of book selection, standards of literary quality in relation to public demand, tests of good children's books, etc.; by initiating and securing legislative action for better service; by educational publicity with other professional associations; and by active affiliation with the A. L. A.

Following the sessions, many special libraries were thrown open for inspection, and much of the day's pleasure was gained by visiting the Annmary Brown Memorial, Col. George L. Shepley's Library, The Rhode Island Historical Society, The Providence Athenaeum, and The John Hay Library.

MARION L. ARNOLD, *Recorder.*

SCHOOL LIBRARIANS OF SOUTHERN NEW YORK

A CONFERENCE of the school librarians of New York City, Long Island, Westchester, Rockland and Putnam counties was held at the Washington Irving High School Library on February 11th, with seventy-five in attendance. This conference, the fourth in a series of five which are being called by Dr. Sherman Williams, chief of the State School Libraries Division, in different parts of the state during the current school year, was held under the auspices of the New York High School Librarians' Association. Katharine M. Christopher of the Julia Richman High School Library presided.

At the morning session Mr. Leland, supervisor of New York City school libraries, spoke on Book Selection; Sabra Vought, told of the help which the School Libraries Division could give to school libraries; and Dr. Williams spoke on certification of school librarians.

The afternoon session was devoted to a stimulating round-table discussion of topics which are of vital interest to all doing school library work. At three o'clock Anna Hempstead Branch read from her poems and tea was served in the school foyer. An interesting exhibit of library forms, methods and equipment was held in connection with the meeting.

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

WASHINGTON Librarians held a very successful "Acquaintance Meeting" Friday evening, January 20th, in the tea house of the Grace Dodge Hostel, coincident with the annual meeting of the District of Columbia Library Association, at which officers were elected for 1922 as follows: President, Dorsey W. Hyde, Jr., Chief of the National Civics Bureau, U. S. Chamber of Commerce; vice-president, Anne G. Cross, librarian, Department of Commerce; secretary, Mary F. Carpenter, Department of Agriculture Library; treasurer, Nelson W. McCombs, librarian, Federal Reserve Board.

Vice-President George F. Bowerman presided over the short business meeting at which committee reports were heard. Mr. Bowerman reported on the status of reclassification legislation emphasizing the need for the working out of credits equivalent to university training. It was voted that a special committee be appointed to study the problem. A resolution was unanimously adopted expressing the profound sorrow of Washington librarians for the death of Eunice R. Oberly and their recognition of her constructive service to the library profession. H. H. B. Meyer spoke upon relations with the A. L. A., urging that all Washington librarians become members. It was voted that the Library Association of the District of Columbia re-affiliate with the American Library Association. The new President, Mr. Hyde, next took the chair and spoke for a few moments stating that the object of the meeting was to promote personal acquaintance as a first step towards better library co-operation in Washington.

An appetizing supper was served by the Grace Dodge management during which the members of a specially appointed Acquaintance Committee, wearing distinguishing badges, circulated about the hall making introductions.

A contest to see who could remember the names, and libraries, of the largest number of Washington librarians, had been previously announced, the winner to receive a copy of Arthur E. Bostwick's "Library Essays." Owing to scarcity of paper the award was not made, and the committee in charge welcomes suggestions as to how this book should be disposed of.

The meeting was voted an overwhelming success by the one hundred and sixteen librarians present, and it was felt that a long step had been made in the direction of better library co-operation. Arrangements for the meeting were made by Claribel R. Barnett, Adelaide R. Hasse, Mary G. Lacy, Nelson W. McCombs, Thomas P. Ayer and Dorsey W. Hyde, Jr., and its success was in large part due to the efforts of the "Acquaintance Committee" of which Helen C. Silliman was chairman.

CHICAGO LIBRARY CLUB

THE Chicago Library Club held its January meeting at the Library of the Western Society of Engineers. Harry McCormack of Armour Institute lectured on "Our Chemical Industries and National Defense." The lecture proved most stimulating and considerable discussion followed.

At the February meeting held in the East gallery of the Art Institute, Frank V. Dudley lectured on art and composition in painting. Mrs. Dudley sang groups of songs on out of door subjects. After the meeting, the galleries were open for inspection.

The executive committee presented the names of fifteen new members. At the January meeting twenty-three new members were voted in. The club now has a total membership of 425.

MISSOURI VALLEY LIBRARY CONFERENCE

THE presidents of the Missouri, Iowa, Nebraska, and Kansas library associations have made preliminary plans for the Missouri Valley Library Conference to be held at St. Joseph, Missouri, October 17-20, opening on Tuesday morning and closing Friday noon. The Iowa Association has not voted officially to merge its annual meeting, but Kansas, Missouri, and Nebraska have voted definitely. The four presidents and the St. Joseph librarian constitute the program committee. They are: Loretta Murphy, North Platte, Nebraska; Irving R. Bundy, Jefferson City, Missouri; (Mr.) W. F. Riley, Des Moines, Iowa; Willis H. Kerr, Emporia, Kansas; and Jesse Cunningham, St. Joseph, Missouri.

CALIFORNIA LIBRARY ASSOCIATION

THE annual meeting of the sixth district of the California Library Association was held at Santa Barbara January 7. This district includes the nine southern counties from San Luis Obispo to San Diego. Over a hundred librarians enjoyed the hospitality of Mrs. Linn and the trustees and found much to admire in the Spanish architecture of the building, with its great fireplaces and the patio which is used as an open-air reading room.

A short business meeting included a report from the chairman of the certification committee, Jeannette M. Drake of Pasadena, and an outline of the plans of the California Library Association by the president, Althea Warren of San Diego.

The program was devoted to books, and most of the speakers were new to C. L. A. audiences. Walter Lindley, a director of the Los Angeles Public Library, gave a charming talk on his adventures in collecting books, showing some of his first editions of *Borrow and Gay's Beggar's Opera*, and delighting everyone by his contagious enthusiasm. George Watson Cole described the rich collection of manuscripts in the Huntington library, which includes unique treasures of literary and historical interest, as varied as Franklin's *Autobiography* and George Meredith's *Ordeal of Richard Feverel*.

Round table discussions filled the rest of the morning. Mrs. Vivian Gregory Smith, librarian of the Security Trust & Savings Bank in Los Angeles, planned an exhibit of business aids and presided at the discussion of books for business men. Standards in the selection of fiction were discussed by the fiction group with Eleanor Hitt presiding. Sarah M. Jacobus of Pomona presided at an inspiring discussion of work with foreigners. Laura Grover Smith of Los Angeles led the school librarians' discussion, and Elizabeth C. Riddell of Long Beach presided at the children's section.

The wider use of books was discussed from different angles in the afternoon. Vierling Kersey, supervisor of part-time schools in Los Angeles, showed the need for flexible methods and the co-operation of libraries in part-time classes. Charles H. Brown described the work of the A. L. A. with the Navy. Eleanor Foster, of Bullock's book department, gave a thoughtful presentation of the opportunities of a bookseller in a department store. Ethel Richardson, state superintendent of immigrant education, described the pictures and objects provided by some progressive libraries for the use of teachers of foreigners and showed how the library may be a social factor in the community. The climax of the program was a

thought-provoking paper by Ethel Sawyer of Portland, who urged a knowledge of books as the essential of library work.

In the evening the Community Arts Players presented Booth Tarkington's *Clarence*. Many of the librarians spent Sunday in driving over the famous hill roads and exploring the Montecito gardens.

MARION HORTON,
President, Sixth District.

HAWAII LIBRARY ASSOCIATION

AIMING to "promote library service and the interests of librarians in Hawaii and to cooperate with the A. L. A. in the promotion of the highest library ideals," the Hawaii Library Association has been recently organized.

Plans were made at a meeting to which Edna I. Allyn, librarian of the Library of Hawaii, invited the librarians of Honolulu to hear a report of the Swampscott Conference given by Alice Burnham, who was a delegate from the Library of Hawaii. Temporary officers were appointed as well as a committee to draw up a constitution.

The second meeting was called during the County Library Convention in January. Permanent officers were elected and the constitution adopted. While the organization is of necessity small, a great deal of benefit will doubtless be derived from it by the members. The "charter members" included librarians from the following libraries: Library of Hawaii, University of Hawaii, Bishop Museum, Cooke Library of Punahou School, Territorial Normal School, McKinley High School, Kalihiwaena Grammar School, Maui County Library and the Hilo Library. All except the last two are located in Honolulu.

The constitution provides that an annual meeting shall be held; also other meetings when called by the President.

Laura Robson, *Corresponding Secretary.*

LIBRARY CALENDAR

April 28-29. At the Hotel Chelsea, Atlantic City. Annual meetings of the New Jersey Library Association and Pennsylvania Library Club.

June 26-July 2. In Detroit. Headquarters at the Hotel Statler. Forty-fourth annual conference of the American Library Association.

July 3-8. In Boston. Annual meeting of the National Education Association. Exact dates of the Library Department meeting will be announced later.

BEDLOW, Elinor, 1917 S., formerly assistant librarian of the National Bank of Commerce in New York, has been appointed librarian.

BIRCHOLDT, Harriet R., 1914-15, N. Y. S., who has been first assistant on the editorial staff of Public Affairs Information Service, New York City, for more than a year, became acting editor February first. She is succeeded by Edith Edwards, 1916, N. Y. S.

BOWNE, Jacob Titus, who has been for thirty-seven years librarian of the International College, Springfield, Mass., celebrated his seventy-fifth birthday on February 12.

EMERSON, Ralf P., 1916, N. Y. S., has succeeded Earl N. Browning as librarian of the Public Library, Jackson, Mich.

FEIPEL, Louis N., editor of publications for the Brooklyn Public Library has an interesting article on "Our Rich but Neglected old Naval Historical Literature" in the January *Proceedings* of the U. S. Naval Institute.

JEWETT, Alice L., 1914, N. Y. S., resigned her position as editor of the Public Affairs Information Service Bulletin, to become head of the mailing section of the Information Service of the Rockefeller Foundation, on February first.

McINTOSH, Rosamond, 1917 P., appointed first assistant in the branch department of the Library Association of Portland.

NORTON, Margaret C., 1915 N. Y. S., will leave the Missouri State Historical Society Library on April first to become head of the Illinois State Archives Division at Springfield.

NUNN, Dorothy, 1911 S., has been appointed head of the circulation department of the Houston (Texas) Public Library.

OSBORNE, Lucy E., 1909 S., cataloger in the Williams College Library since 1914, has been appointed custodian of the Chapin Collection of rare books which is to be housed in the Williams College Library, as soon as the new building is completed, probably in November. Until her new duties begin, Miss Osborne will be in New York, studying and visiting other special collections.

PARKER, John, librarian of the Peabody Institute, Baltimore, who celebrated his golden jubilee last year, has received from the trustees a purse of gold, and arrangements have been made to install his portrait in the Library which he has served since the age of seventeen.

RICHARDSON, Louise, 1913 P., appointed assistant librarian at Marshall College, Huntington, West Va.

SHERRARD, Mary C., 1915, N. Y. S., has resigned as hospital librarian of the First Naval District, Boston, and will reorganize the library of Lincoln University, Pennsylvania.

SPAULDING, Forrest B., 1912-14 N. Y. P. L., is acting temporarily as consulting librarian for Gaylord Brothers, Syracuse, N. Y.

VITZ, Carl P. P., 1905 W. R., 1907 N. Y. S., vice-librarian of the Cleveland Public Library, has been chosen to succeed Herbert S. Hirshberg as librarian of the Toledo (O.) Public Library. Mr. Vitz had some nine years' varied experience in the Cleveland Public Library during his school and college years. In 1907, he became assistant librarian of the District of Columbia library, going thence to Albany as assistant to the Director of the New York State Library School. He was recalled to Cleveland in 1912 as second vice-librarian and in 1920 became vice-librarian. He has been instructor in both the New York State and Western Reserve library schools, and was president of the Ohio Library Association in 1921.

WHEELOCK, Webster E., has been appointed librarian of the St. Paul (Minn.) Public Library in succession to W. Dawson Johnston. Mr. Wheelock, who is a native of St. Paul and a graduate of Yale, has been in business in St. Paul. He enters on his librarianship on March 1.

IN THE LIBRARY WORLD

MASSACHUSETTS

Springfield. Hiller C. Wellman, librarian of the City Library Association of Springfield, points out in his report for the year ending April 30, 1921, that in spite of the advent of the automobile, outdoor sports, and moving pictures, all of which are supposed to threaten the reading habit, for a generation the number of books drawn from the library has increased at a very much faster rate than has the population. The circulation has mounted from 161,091 volumes in 1900, or 2.6 volumes per capita, to 1,189,991 in the year under review, or 9.2 per capita, an increase over all previous figures of over one hundred thousand. The branches all showed gains, Memorial Square circulating 216,849 volumes, Forest Park 217,135, and Indian Orchard 58,855 volumes. The picture collection was drawn upon to the extent of 131,988 prints. Forty thousand books were deposited in the schools.

During the past seven years 66,559 persons were registered as card holders, still leaving, however, more than half the population of Springfield unenrolled.

The library distributed numerous useful lists besides its own publications. Among these last a printed appeal calling attention to the increasing prices of books and binding, and asking assistance in the care of books, reduced binding costs for the last five months below the estimate.

The library's receipts were \$136,792, of which \$111,000 came from city appropriation, \$7,147 from fines, and nearly five thousand dollars from the city dog tax. Expenditures for salaries amounted to \$51,049, and for books, periodicals and binding \$13,029.

CONNECTICUT

New London. The contract for a library building for Connecticut College for Women, costing about \$150,000, has been let.

NEW YORK

New York City. The American-Scandinavian Foundation has received a bequest of \$10,000 from the estate of the late William Henry Schofield, professor of comparative literature at Harvard, for a library in an educational building to be erected by the Foundation.

Utica. The Utica Public Library achieved a per capita circulation of five volumes in 1921 by circulating nearly 500,000 books among a population of 100,000. A balance of eleven

cents remained at the end of the year from an appropriation of \$64,040, and the librarian, Caroline M. Underhill, asks for a larger appropriation and staff. It was necessary to withdraw 6,572 volumes, leaving a book stock of 105,068 volumes. The library has two branches, and also sent collections to mills, fire stations, and hospitals. Personal service claimed \$42,453 of the appropriation.

Syracuse. The circulation of books for home use thruout the Syracuse Public Library system amounted to 368,159 in 1921, an increase of 29,672 over 1920. The receipts from local taxation were \$81,000, a per capita tax of forty-two cents on the population of 171,717. There were thirty-four persons on the staff, and the expenditures for salaries totaled \$46,855. Books, periodicals and binding took \$18,448. The library had 161,688 volumes and 45,010 registered borrowers at the end of the year.

Arrangements have been made for workmen's compensation insurance for library employees.

The Lockwood act which became law last spring provided for the establishment of library privileges in any community by contract with any municipal or district body having a free library, and opens the way for rural extension work to the Syracuse Public Library.

DELAWARE

Wilmington. The population of Wilmington increased from 88,000 to 110,000 since the census of 1910, or twenty-five per cent. The card holders at the Wilmington Institute Free Library increased thirty-eight per cent in the same period, the number of volumes in the library (103,532 in February, 1921) fifty per cent, and the number of volumes issued for home use (374,632) forty-eight per cent. The juvenile circulation amounted to 96,341 in the year under review, the largest circulation ever reached by the children's department. The reference work of the library included much special work with the big powder companies and also with the many artists who live in or near Wilmington. Next to the need of a new central building, which has been provided for, the question of branches across the Third Street bridge in the district south of Front Street and west of Madison Street is most pressing. The library already has two branches in separate buildings. Of an income of \$51,230, the Mayor and Council of Wilmington appropriated \$24,371. Payments included \$12,139 for books, periodicals, and binding, and \$25,599 for salaries and wages.

ABINGDON

Books for today

IN Abingdon Books one meets the spiritual and social builders of the age—they who write for today. Their sincerity, their unaffected directness, their courageous and constructive spirit have won them a place on the bookshelves of every thinking American man and woman.

Abingdon Books may be obtained at all good book-shops.

BEYOND SHANGHAI

By Harold Speakman

This exceedingly charming "look in" upon China is unique because it is "different." The author says: "I made a solemn compact with myself not to attempt to describe, sketch, or otherwise molest the imperial palaces at Peking, but to see as much as I could of the Chinese people themselves in their humblest and most intimate surroundings, to live alone with the Chinese and to eat their food."

Net, \$2.50, postpaid.

WITH EARTH AND SKY

By Bishop William A. Quayle

These essays are full of the mystery of the recurring seasons, and of the ineffable glory of flower and field, of mountains, meadow, river and prairie, of star and sun and cloud,—and one is reminded of the praiseful Psalmist who bursts out with this song: "Let everything . . . praise the Lord."

Net, \$1.25, postpaid.

A HANDFUL OF STARS

By F. W. Boreham

The author appropriates the title of this book from Caliban, who cries out, "O God, if you wish for our love, fling us a handful of stars." And these "stars" are gathered together to make a companion to his volume entitled "A Bunch of Everlastings," for "it is not good that a book should be alone."

Net, \$1.75, postpaid.

THE OPEN FIRE

By William Valentine Kelley

This group of charming and gripping essays constitutes one of the rich and scholarly contributions of William Valentine Kelley to some of the vital discussions of this generation. No more penetrative or appreciative mind has applied itself in our day to the consideration of the sources, influences and products of literature and religion in their reactions upon life, character and civilization.

Net, \$2.00, postpaid.

THE STORY OF THE AMERICAN HYMN

By Edward S. Ninde

"Those who have cultivated that fine spirit of reverence and worship which reveals the possible richness of man's inner life will appreciate this book. The scholarly care and chaste diction will appeal to the love of the esthetic, and its spiritual inspiration will appeal to the religious nature."—*Boston Evening Transcript*.

Illustrated. Net, \$3.50, postpaid.

THE ABINGDON PRESS
NEW YORK CINCINNATI

U. S. NAVAL INSTITUTE

The Naval Institute publishes and sells many books of value to the Army and Navy. The following named books should be on the shelves of every LIBRARY in the country:

HANDY BOOK FOR ENLISTED MEN OF THE ENGINEER DEPARTMENT: 60c.

MANUAL OF RADIO TELEGRAPHY AND TELEPHONY. (1919); Canvas: \$2.50

STORAGE BATTERY MANUAL: \$7.00

U. S. NAVY COOK BOOK: (Flexible buckram, 1920 edition): \$1.00

NAVAL RECIPROCATING ENGINES. (With Atlas) Cloth: \$7.50

A MANUAL OF INTERNATIONAL LAW, (1921): Cloth, \$4.00

AIRPLANES, AIRSHIPS, AIRCRAFT ENGINES: \$3.50

THE NAVAL ARTIFICER'S MANUAL: \$2.00

BLUEJACKET'S MANUAL. Stiff Buckram, 75c.

MARINE & NAVAL BOILERS. Cloth: \$3.80

MANUAL OF ATHLETIC REQUIREMENTS:

STEAM TURBINES, 1920: \$7.00

NAVAL ORDNANCE, Cloth: \$8.00

THE U. S. NAVAL INSTITUTE

—The Forum of the Navy—

The Naval Institute PROCEEDINGS, with 100 pages of original articles and 100 pages of professional and international notes, is the leading publication of its type. Now published monthly, annual subscription, \$3.50; enlisted men, \$3.00; single copies, 50c.

U. S. NAVAL INSTITUTE
ANNAPOLIS, MARYLAND.

Write for our complete PRICE LIST

MARYLAND

Baltimore. The Enoch Pratt Free Library experienced as successful a year as was anticipated when its appropriation was raised from \$139,953 in 1920 to \$192,000 in 1921. The appropriation for 1922 is \$206,000, and the library looks forward to remedying some of its continued disadvantages: the lack of a new central building, a downtown business branch, and branches in certain sections of the city, and a salary scale less than that of other libraries of its size, and less than that of the public school teachers of Baltimore.

Three new branches were built during the year, and another is under construction. An eligible lot for a library was given by the Roland Park Civic League. The increased appropriation enabled the library to occupy No. 406 Cathedral Street, which it had owned for several years. Here the Fine Arts and Education Departments have been opened, and the Children's Department transferred from the central library.

The home circulation of books exceeded the population of the city by over 100,000 and amounted to over 863,765 volumes, a notable increase over the 714,531 books circulated in 1920. The entire system owns 409,944 volumes, including the 28,730 volumes added during the year.

The training school at the Lafayette Square branch was attended by 78 students, of whom 48 completed the course and thirty-three received appointments. The staff normally employs 164 persons in addition to the librarian and the two assistant librarians.

GEORGIA

Atlanta. The appropriation to the Carnegie Library of Atlanta for 1922 is \$114,323. Of this amount, \$14,281 was brought over from 1921 as part of a contract for a new building, so that the new appropriation for 1922 is \$100,042—an increase of \$18,033 over the appropriation for 1921, not taking into consideration a gift of \$10,000 made by Fulton county in 1921 towards the construction of a branch library building.

The appropriation provides for the completion of a new branch which was started in 1921 and its maintenance for nine months, and for the opening of another branch in rented quarters in another part of the city. An appropriation of \$3,500 was made to build a new book stack at the main library and a fund of \$1,000 was provided to put a deposit collection of books in East Atlanta school from which the immediate community will be served. The staff was increased by several new assistants in addition to the staff for the new branches.

KENTUCKY

Louisville. At the close of the fiscal library year on August 31, 1921, there were 412 centers for the circulation of books in 205 buildings in Louisville and Jefferson County. The circulation of books for home use was 1,117,916 volumes, an increase of 8,663 as compared with that of last year. Sixty-six stations are located in Louisville, and twenty-four in Jefferson County outside the city. The population served was 234,891. The county paid \$10,000 for library service, and the city, by taxation, \$98,688. Receipts in all were \$146,590. The cost of maintenance was \$119,739, of which \$23,548 was required for books and \$71,530 for payroll.

Comparing thirty of the largest public libraries in the United States spending over \$100,000 a year for maintenance the Librarian, George T. Settle, finds that the city ranks twentieth in the circulation of books for home use, twenty-seventh in the cost of maintenance, twenty-sixth in payroll, twenty-seventh in money spent for books and binding, and thirtieth or last in librarian's salary and in money received from city taxes for library purposes. The library is now receiving three and three-fourths cents out of a possible four cents from city taxes.

OHIO

Akron. The Public Library has opened a portion of its ground floor to the newly organized Akron Art Institute which purposes to work for an art museum for the city. On February 1st it opened to the public an exhibition of American paintings and bronzes. In March a second exhibition will be offered. It is the intention of the Institute to use this gallery continuously. The library finds that its patrons appreciate the art gallery, and that non-patrons who come to the exhibition soon show a growing interest in the library itself.

MICHIGAN

Detroit. The conspectus of ten years' library progress in Detroit made by the librarian of the Public Library in his report for the year 1921 to the Detroit Library Commission shows that the library, which had four branch buildings in 1911, now has thirteen; that its property valuation exclusive of books and equipment has risen from \$500,000 to \$4,337,760 (the new main library building with its equipment and decoration cost \$2,750,000, and its site \$415,335); that the home circulation of books has grown from 881,408 to 2,533,541 (the increase during the last year of the survey being 378,407); its book stock from 267,633 to 525,886 volumes (of which 57,668 were added last year); its general appropriation from \$151,222

IN EVERY TOWN

Some one is studying Interior Decoration and rely upon the Library for books on the subject. The following are standard text books used in the trade, schools and libraries.

PERIOD FURNISHINGS

An Encyclopedia of Furniture, Furnishings, Decorations. Contains 2,731 illustrations, 266 pages, size 9¼ x 12; 112 fabric illustrations covering all periods; 360 illustrations of chairs alone; 800 of carvings, design details, table tops, chair legs, etc.; 800 design motifs of furniture, walls and ceilings, with 65 interiors. Price, \$6.00 postpaid.

COLOR VALUE

A valuable book treating of color contrasts and harmonies. It will assist the decorator and the manufacturer in the selection of color designs or for decorations generally. Colored plates and diagrams illustrating the fundamental principles of the subject, of inestimable value to either student or artisan. Price, \$1.50 postpaid.

CUTTING AND DRAPING

Making and hanging portiers, lace curtains, shades and draperies generally are described in the most complete and practical manner. Festival decorations and interior furnishings are treated in a way to greatly assist everyone doing this work. Durable cloth covers, 10 x 13 inches, with over 300 diagrams and illustrations. Price \$4.00 postpaid.

FURNITURE UPHOLSTERING

The most authoritative and complete instruction book ever published on the art of upholstering furniture. Over 700 illustrations. Price, \$4.00 postpaid.

THEORY OF SILK WEAVING

A practical guide for manfr. or student on weaving broad and narrow fabrics, over 100 illustrations. Price \$3.50 postpaid.

CLIFFORD & LAWTON

373 Fourth Avenue NEW YORK

**CHARTOGRAPHY
IN TEN LESSONS**

PRICE \$4.00

INSTRUCTIVE BOOKS
For Those Who Read to Learn

**EVOLUTION, GENETICS, AND
EUGENICS**

By Horatio Hackett Newman

Most thoughtful people today are interested in these subjects. This book has been prepared to meet an increasing demand for an account of the various stages of evolutionary biology condensed within the scope of a volume of moderate size. Illustrated. \$3.75, pstpaid \$3.90.

**A NATURALIST IN THE GREAT LAKES
REGION**

By Elliot R. Downing

An interesting new volume by an eminent naturalist, who gives an authoritative account of the flora and fauna of a great region in connection with its geological and physiographic features. Just the book to read before a spring outing. Beautifully illustrated. \$3.50, postpaid \$3.70.

THE RELIGION OF THE PSALMS

By J. M. Powis Smith

The aim of this book is to bring out the significance of the Psalms as indicative of the religious and moral standards of later Judaism. No attempt is made to find in the Psalms spiritual nourishment for the life of today. The effort is rather to present their meaning as it lay in the minds of the authors and earliest readers. \$1.75, postpaid \$1.90.

**AN INTRODUCTION TO THE SCIENCE
OF SOCIOLOGY**

By Robert E. Park and Ernest W. Burgess

This book is based on the belief that concrete material placed in the readers' hands makes possible a clearer understanding of the principles of sociology than has been possible with the methods of presentation in the past. It consists of a collection of readings, varying from two hundred to three thousand words each, representing the research of many writers. \$4.50, postpaid \$4.75.

The University of Chicago Press
5773 Ellis Avenue Chicago, Illinois

to \$610,583, and the number of employees from 126 to 437. The population of Detroit from 465,766 reached one million. Of the four new branch libraries under construction three are to be opened this winter. It seems to the Commission that the site of the old library building, erected in 1875, is an ideal one for the imperatively necessary downtown branch, but that the building itself is not suitable for use as such a branch.

Whatever success the library has scored. . . says Librarian Adam Strohm, is owing to the staff. . . of *trained* workers. Close to sixty per cent have had college experience. . . . An equally large number have certificates from accredited library schools.

WISCONSIN

Milwaukee. During 1921 the Milwaukee Public Library added 58,575 volumes to its collection, an increase of 85 per cent over the additions for 1920. The total number of volumes in the library at the end of 1921 was 456,750.

Circulation for 1921 was 2,199,359 volumes, an increase of 22 per cent over that for 1920. Of these 1,133,352 volumes were circulated thru the branch libraries 300,918 thru the city schools, and 207,084 thru the county branches. The system now includes eleven city branches with permanent collections and seventy-five county branches whose collections are changed periodically.

The income for the year was \$249,502, of which the tax levy gave \$207,000 and receipts for county library service contracted for \$22,500. Of this salaries for library service took \$98,470, and other personal service \$18,094: books, \$53,898, periodicals, \$3,391; binding and bindery expense, \$13,340, and fees for county service \$6,394.

SOUTH DAKOTA

From the good things of 1921 the South Dakota Library Commission picks out these: A county library law passed; an increase of 27 per cent in the commission appropriation; a 44 per cent increase in the membership of the state Library Association (bringing the total to 65); eight new libraries established; a sixteen per cent increase (86,281) in circulation in public libraries; and 17,333 new books added to book stocks in libraries.

To the end of December six librarians were granted certificates under the certification plan adopted by the S. D. L. A. Five of these are life certificates.

OREGON

Salem. The circulation of books in 1920 from the Salem Public Library registered 7,000 above the previous year, and 1921 outdistanced that mark by 17,700. In all, 77,526 books were loaned. Forty-three per cent of the 17,679 inhabitants are registered borrowers. The book stock numbers 16,866 volumes. Forty-nine per cent of the appropriation of \$7700 was required for the payroll, and 27 per cent for books, binding, and periodicals. Instruction in the use of the library was given to the entire school system from children in the grades to university freshmen.

CALIFORNIA

Pasadena. In the year ending July 1, 1921, 22,995 people of a population of 48,300 were using the Pasadena Public Library, or 9,500 more than the previous year. They borrowed for home reading 542,500 books from the Main Library, juvenile department, four branches, and eleven deposit stations, a gain of 104,492 over last year, or 23 per cent. The average circulation per capita was eleven books. Expenditures were \$56,073, with receipts from fines amounting to four thousand dollars.

CANADA

Toronto. A thousand books a day measures the increase in the circulation of books from the Public Library of Toronto in 1921, as the chief librarian, George H. Locke, points out. Book-used numbered 1,854,579, an increase over 1920 of 325,000, and an increase of 1,400,000 over 1908, the year before the library moved to College and St. George and began the era of branch expansion. More than half a million books were borrowed by the boys and girls of Toronto, and hundreds of children were turned away from the College Street Circulating Branch.

The great success of the library's Canadian history Story Hours has brought requests for help in establishing such work in the towns of the Province.

In connection with Canadian Authors' Week the Library undertook the organization of the public libraries. Selected lists of Canadian books now in print and available for purchase were distributed, displays of valuable Canadian books of historic interest were made, special collections of Canadian books of local interest were held, lectures were given and, indeed, the Public Library became the centre of this interesting national movement in each community.

The success was beyond expectation. The Canadian Authors' Association has already a membership of 800, and has promoted the first real intellectual revival of interest in the intellectual products of Canada.

FOR ALL LIBRARIES

PITMAN'S COMMON COMMODITIES AND INDUSTRIES SERIES

In this series a particular product is treated by an expert writer and practical business man. Beginning with the life history of the plant or other natural product he follows its development until it becomes a commercial commodity and so on through the various phases of its sale in the market and its purchase by the consumer.

In addition to the 52 titles already published the following are now ready:

- WINE AND THE WINE TRADE. By Andre L. Simon.
- TEXTILE BLEACHING. By A. B. Steven.
- SULPHUR AND SULPHUR DERIVATIVES. By Harold A. Auden.
- ALCOHOL. By C. Simmonds.
- IRONFOUNDING. By B. Whiteley.
- CONCRETE AND REINFORCED CONCRETE. By W. Noble Twelvetrees.
- PLAYER PIANO. By D. Miller Wilson.

Send for Complete List

PITMAN'S TECHNICAL PRIMERS

A new series of Technical Primers is intended to enable the reader to obtain the very necessary foundation of a clear appreciation of first principles and basic facts in any particular branch of technology.

Each 6 x 4 1/4, cloth, about 120 pp., fully illus., 85c. In addition to the 26 volumes already issued the following are now ready:

- INDUSTRIAL AND POWER ALCOHOL. By R. C. Farmer.
- MECHANICAL HANDLING OF GOODS. By C. H. Woodfield.
- RADIOACTIVITY AND RADIOACTIVE SUBSTANCES. By J. Chadwick.
- DIRECTIVE WIRELESS TELEGRAPHY. By L. H. Walter.
- KINEMATOGRAPH STUDIO TECHNIQUE. By L. C. MacBean.
- CONTINUOUS WAVE WIRELESS TELEGRAPHY. By B. E. G. Mittell, A.M.I.E.E.

A HISTORY of MINNESOTA

By **WILLIAM WATTS FOLWELL, LL.D.**

President Emeritus of the University of Minnesota

IN FOUR VOLUMES

VOLUME I

From the beginning to 1857

"If the standard of scholarship adopted in this first volume is maintained thruout, Minnesota will have a more erudite account of its origin, growth, and present status than any other state in the Union."—*New York Evening Post.*

Cloth, royal octavo, xx, 533 pages, with 15 illustrations and 7 maps.—\$5.00 net.

There is also a limited edition of 200 copies, bound in 3/4 leather, uncut, and with an extra illustration—a hitherto unknown portrait of Hennepin—inserted. Each copy is numbered and is autographed by the author.—\$10.00 net.

MINNESOTA HISTORICAL SOCIETY

SAINT PAUL

CURRENT LIBRARY LITERATURE

The recently issued number (21) of the *Publications* of the California Library Association contains the Handbook and Proceedings of the Annual meetings of 1920 and 1921. The cost of printing prohibits the inclusion of the papers read at these conferences; but reference is made to most of the other publications in which papers have appeared and a list of others on file, which may be borrowed from the Secretary, is given.

A Hand book of the library of the New York City Association of the Bar is issued as *Bulletin*, No. 8 (November, 1921). Since the printing of the Catalogue in 1892 the collection has been much enriched, and because the cost of a new edition is prohibitive this description is given "in the hope that it may bring home to the members . . . and to the public the scope of the Library It will also indicate where the collection is lacking in rare material, so that those who may desire can fill the gaps by donation."

The first part of volume 14 of the *Papers* of the Bibliographical Society of America has just been issued, and contains papers read at the annual meeting of 1920: George Watson Cole's "Bibliography—A Forecast," Leonard L. Mackall's appreciation of Sir William Osler, and Edith Brinkmann's account of her acquaintance with John Boyd Thatcher. Augustus H. Shearer's "Bibliographical Notes on *Le Courier d'Amérique*" will be given in a proposed issue of the *Papers* which will be devoted to eighteenth-century newspapers printed in America in French.

The first part of the Catalogue du Livre Français prepared by the Office pour la Propagation du Livre Français, 117, Boulevard Saint-Germain, has just been published. It is entitled "Littérature Française XIXe et XXe Siècle," and includes the titles of all books having literary merit which are still in print. It is divided into the following five sections: 1. Fiction, 2. Letters, Memoirs, Travels, 3. Essays and Miscellanies, 4. Poetry, 5. Drama. There are also author and title indexes. Almost a thousand authors are listed and almost four thousand books.

A second part, now in press, will contain a catalogue of French literature prior to the

nineteenth century, ancient and foreign literature in French, histories of literature and literary criticism. This will be followed by history and geography, fine arts, science and technology, law, philosophy, religion, applied science, education and juvenile literature.

Altho one may be tempted to deplore the fact that the writings of an author and criticism of them are thus separated, and wonder a little at other features of the scheme of classification, both student and librarian cannot be sufficiently grateful for this addition to existing bibliographies of French publications.—W. D. J.

In the December number of *Library Life* (staff bulletin of the Boston Public Library) George Winthrop Lee makes a rough grouping of the 117 libraries included in the second edition of "The Directory of Special Libraries in Boston and Vicinity," published last June. "This grouping . . . compiled from the present index *plus* a personal knowledge of some of the libraries to which the index hardly does justice" is here given for the convenience of the librarians using the "Directory" who have not access to *Library Life*. The initial figure in each case gives the number of libraries in the group.

TRIUMPHANT PLUTOCRACY

by former U. S. Senator Richard F. Pettigrew

This is a book you MUST read if you want to understand what has occurred in the government of this country and what is now happening.

Senator Pettigrew found difficulty in securing a publisher because of the frankness with which he told the story of the development and triumph of plutocracy, and how it used men in high places to accomplish its purpose. He has therefore published it himself and we are selling it direct to the people.

It is a startling exposure that will not only open the eyes of the people but bring down upon Senator Pettigrew the wrath of the legal looters of the U. S.

But Richard F. Pettigrew has determined that *The Truth Must Be Told.*

Four hundred and thirty pages of FACTS as interesting as fiction and of vital importance to every man and woman in the country.

THE WILD HEART

*The handsomest
popular book of
many years*

By
Emma-Lindsay Squier

With a 10-page Introduction by

Gene Stratton-Porter

A dozen splendid illustrations and numerous marginal decorations by PAUL BRANSON.

IT is a record of the true experiences of a little boy and girl who lived, not many years ago, on the shores of Puget Sound. A book that every nature lover, every

Square 12mo.; cloth; 224 pages—Price \$2.00

mother, every teacher and every child can enjoy—a book that will be widely discussed all year. Mrs. Porter's introduction, of course, will give it a tremendous send-off.

THE VANISHING POINT

A story of thrilling adventure, supremely handled by

Coningsby Dawson

AUTHOR OF "THE KINGDOM ROUND THE CORNER," "THE GARDEN WITHOUT WALLS," ETC.

A mystery and adventure story by Coningsby Dawson is a new thing. This one is a wonder. Picture an American hero unexpectedly involved in breathless international

mysteries and adventure—a plot packed with thrills and written in Dawson's inimitable style—and you'll realize why "The Vanishing Point" is destined to break records.

Illustrated by James Montgomery Flagg.—Price \$2.50

OVER WEIGHT? GUARD YOUR HEALTH

By Royal S. Copeland, M.D.

Commissioner of Health, New York City

Do you realize how much you would have to pay a physician to tell you how to take advantage of the New York Health Commissioner's widely-advertised health experiments?

Dr. Copeland's newspaper audience exceeds 5,000,000 daily.

To a thousand people in every community this book will be worth a thousand times its cost.

Facts Everyone Should Know!

New York Herald says: "This book is an event of importance. The author is spokesman for a large segment of the people, for the most part unheard, and his work is a frank, vigorous, often eloquent, appeal to revelation—to the Bible literally accepted as the supreme teacher. Mr. Bryan has the courage of his convictions and realizes that world religion must rest squarely upon the validity of its revelation.

Four NEW BOOKS Every Library Will Need.

THE WORK OF THE STOCK EXCHANGE

By J. Edward Meeker, Economist to New York Stock Exchange.

An important work for everyone with financial interests. The author has spent two years in making a detailed study of every department of the New York Stock Exchange. In this new book he gives an authoritative and detailed explanation of all the functions and operations of the stock exchange and shows its position as an important part of our financial system. A wealth of practical information never before presented.

1922. 610 pages. Cloth binding. Price \$5.00

HISTORY OF THE SOUTHERN PACIFIC

By Stuart Daggett, Ph.D.

The story of the financing and building of a great railroad system and the part it played in helping develop our far west. The book is an interesting description of the business methods of that time. Its material has been drawn from original sources and is indispensable to those interested in American railroads and their problems.

1922. 470 pages. Cloth binding. Price \$5.00

INCOME TAX PROCEDURE—1922

By Robert H. Montgomery, C.P.A.

For five years this standard work has been invaluable to thousands of taxpayers. The 1922 edition considers the Law of November 1921 fully and discusses the latest Treasury Department Regulations No. 62. It is invaluable in preparing returns, in checking returns already prepared, or in adapting office methods to facilitate the preparation of future returns. Every item is considered from legal and accounting points of view, and the book is specially indexed for reference use.

1922. One Volume. 1931 pages. Cloth binding. \$10.00

PRACTICAL ACCOUNTING PROBLEMS,

Part II

By P.-J. Esquerre, C.P.A.

Contains thirty problems so diversified as to enable practicing accountants to keep fresh on accounting theory and prepare for a wide range of situations. The problems are developed with complete discussions and solutions and no student of accounting should go before a board of examiners without a knowledge of the contents of this book. Printed in typewriter type on an 8½ x 11 page to show exact arrangement of statements reproduced.

1922. 356 pages. Flexible binding. Price \$10.00

Is your card catalog easy to use?

To the average layman, a card catalog is a labyrinth. He is lost.

We have a guide to be placed in each tray of each cabinet, explaining the use of the catalog. This aids the searcher to find quickly what he wants. It materially lessens your work in serving quickly and efficiently the patrons of your library.

We have guides to cover a multitude of library needs. All these guides are made of fine L. B. quality stock, legibly printed and designed to give long and efficient service.

Send for our catalog in which are full descriptions and illustrations. Write now to our nearest branch.

The Contribution of Librarians to Agricultural History and Research*

By EUNICE R. OBERLY,

Recently Librarian of the Bureau of Plant Industry, U. S. Department of Agriculture.

IT is axiomatic, to all except those who are trying to demonstrate that everything that mankind has learned should be rejected and the world built anew to meet their theories, that civilization and science can be advanced only as we learn by the experience of the race, building on what is found to be true and usable and rejecting that which proves to be false. It follows from this axiom that the greater our facilities for ascertaining what has been learned and thought, or tried and rejected, the more steady will be the advancement of science, since time and effort will be used for learning new facts and making new experiments rather than repeating what has already been done. This fact has been emphasized again and again in the discussion of librarians and its truth is admitted in theory at least, by scientists and librarians alike. Yet when we consider how inadequate, in many quarters, is the provision for collecting, co-ordinating, recording and analyzing the literature of science as a basis for original investigation, we are forced to the conclusion that the importance of the statement is not as yet adequately comprehended by many of those who are concerned with the organization and administration of our institutions of scientific research since they do not seem to realize that any institution which is investigating scientific problems, should be provided not only with the equipment and personnel for original experimentation and research, but also with adequate bibliographical equipment and personnel.

It is the purpose of this paper to survey in a general way what the library personnel of our research institutions has been able to do under present conditions toward collecting, cataloging and co-ordinating published material for the use of scientific investigators and to consider

some of the ways in which their contribution to scientific research may be improved and extended.

In preparation for this paper, I wrote to the librarians of the agricultural experiment stations and colleges, asking for information on work done in their libraries which might be mentioned in such a survey. Most of the answers received were the same in substance; namely that the daily duties of the library, the collecting of the material, the cataloging, reference and other work were so arduous that there had been no time for the librarian or the staff to contribute anything to research. Many expressed regret that this was the case and said that they hoped some day "to be able to do something really worth while." I fear the implication of my letter was that only special card indexes and published bibliographies and articles should be considered as contributing to research, but this it seems to me is too narrow an interpretation of our topic. Published catalogs, bibliographies and articles are definite and tangible and their value is fairly easy to estimate, but, after all, books must be collected, the library organized and operated before any bibliographical research can be done either by the investigator or the librarian. The librarian who builds up the collection for a research institution, and, in connection with it, administers an effective bibliographical service is making a fundamental contribution to the research work of the institution, too important to be underestimated or forgotten, merely because he may not find time to publish catalogs or bibliographies. The cataloger who describes the books for the permanent record, which is to be the key to the library's collections, the loan desk assistant who shows the visiting investigator how to use the catalog, the reference librarian, who guides and assists him in the use of all the resources of the library, all of these are daily con-

*Paper presented at the Swampscott meeting of the Agricultural Libraries Section of the A. L. A., June 21, 1921.

tributing materially toward the investigational work of the institution. In all the libraries where one person must be at once administrator, cataloger, loan desk assistant and reference librarian, this one, who succeeds in giving real library service, makes a contribution which is perhaps more to his credit, than those who work in libraries where division of labor is possible and where inspiration may be gained thru association with others in the same work. In passing, let me say, that altho we are in this discussion considering primarily the librarian who serves the scientific investigator, the librarian in the agricultural college who deals with the college student is also making an indirect contribution to research, for as was pointed out in an article¹ recently published in *Science*: "the raw material from which the scientist of the future must be secured is found in the students now in the college classes, and anything that aids in the preparation of these students for their future life work will ultimately be of prime importance not only to pure science, but also to applied science and the welfare of mankind."

At best, no agricultural library is rendering the service to research which it might render, since none, even that of the Department of Agriculture, has ever been adequately supported. It has been estimated that approximately one-tenth of one per cent of the Department's appropriation is spent for books; as one of the Department's scientists says, "about the proportion to the total income which is spent for print by an individual who reads nothing but the daily papers." Since the Department library is, nevertheless, the best and most important agricultural library in the world, it is interesting to review its development to show the ways in which a well organized and wisely administered library may contribute to the study of agricultural problems.

In 1893, Mr. W. P. Cutter was appointed librarian, and with his assistant librarian, Miss Josephine A. Clark, began to organize the library on modern lines. To quote Miss Barnett: "Together they reorganized the library, employed trained assistants and laid the foundations of a library policy looking toward an enlargement of the collections and service." Miss Barnett, building on these firm foundations, has perfected a library service, which might well be used as a model by any research organization. She has worked on the theory that books are tools, and as such a part of the laboratory equipment as microscopes or other apparatus; that they are for the use of the investigators

where and when they need them most. There are, therefore, no regulations or restrictions on the circulation of books or periodicals, and no limits to the time they may be retained for use, other than those which are essential to the safeguarding of the books from loss or destruction, or which are necessary to make the books available to all who may need them, but not confine their use to a few who might feel that they should be accorded special privileges. The library is conducted on the theory that it is for the use of agricultural investigators not only in the Department of Agriculture but thruout the country, and books and photostat reproductions are lent every year to institutions in most of the states of the Union, to the agricultural colleges and experiment stations in particular, and to other institutions doing research work in science. You, who have benefited by this far reaching service, will agree with me, I am sure, that Miss Barnett speaks thoughtlessly, when she says: "We contribute nothing toward research. We haven't time."

Admitting that the library is fundamental to the research work of any organization engaged in agricultural inquiry, it is obvious that there are certain phases of the library work which demand a larger understanding of the problems of research, and closer and more frequent contact with the research workers themselves, than do some other library tasks. Of these, no work offers a wider opportunity than that of the reference librarian, and to aid in analyzing the character of reference work in agricultural research libraries, it may pay to attempt for a moment to define our terms. Mr. Bishop, in his paper on the "Theory of reference work,"² says that reference work is "organized effort on the part of libraries in aid of the most expeditious and fruitful use of their books;" it is "the service rendered by a librarian *in aid* of some sort of study." This definition would, I think, be accepted by all librarians, but an acceptable definition of the word "research" as used by librarians is yet to be made. Some one is reported to have said, "In the course of my life, I have met with various things fertile of disagreement, but for a real apple of discord, nothing that I know of comes near to a schedule of classification." Ask any group of librarians what is meant by "research," and I think you will agree with me that attempts at a definition of this term equal the schedule of classification in exciting lively discussion. Mr. Bishop touches on the question when he says that since reference libraries are those which function primarily to

aid specialized and advanced research, "reference" in their case "spells research." Altho the work of a reference librarian in an agricultural research library may not with exactness be characterized as research, nevertheless, it often borders closely on it. Might not, then, the term "reference-research librarian," be adopted for the reference librarians of agricultural research libraries, to show the close relation of their work to the investigational work?

Our best agricultural reference-research librarians must know the literature, the bibliography and something of the history of agriculture and the sciences fundamental to it, chemistry, zoology and economic entomology, botany and plant pathology, veterinary science and bacteriology, and, in order to co-ordinate this knowledge and make it useful to those engaged directly in the investigation of agricultural problems, must possess some of the qualities of observation, critical analysis and judgment essential to the investigator himself. The reference-research librarian need not have at his command the technique of agriculture and the sciences—he has a technique of his own. Bibliographies, catalogs and reference guides are accumulating, as the literature itself accumulates, and only a specialist can hope to become thoroughly familiar with all of this material and learn how to make the best use of it. It is unfortunate that more of our experienced reference librarians do not find time to analyze for the use of others their specialized knowledge of sources of bibliographical information. A series of what might perhaps be called "reference monographs," describing the sources of information in various subjects, and methods of using these sources, would be of inestimable value, not only to other librarians, but to investigators who have not available the services of a trained reference-research librarian. An example of the type of paper I have in mind is the one on "Sources of Agricultural Statistics,"³ read before this section in 1918 and later published with a bibliography.

Before discussing the contribution which librarians have made to agricultural research thru bibliographical work, I should like to mention a project of library service of great value to all bibliographers and research workers, now so much taken for granted that we forget, sometimes, its importance. This is the printing of catalog cards and the co-operative cataloging which grew out of it. W. P. Cutter began in 1899 to print cards for the publications of the Department of Agriculture, which was the first attempt to furnish to the outside world a com-

plete printed card catalog of the publications of any institution. The Department of Agriculture library was also the first to work with the Library of Congress in its co-operative cataloging plan, by furnishing to them copy for the cards describing the books in the Department library. This was begun in 1902, when Miss Clark was librarian. At the present time, any library may secure from the Library of Congress an approximately complete card catalog of the important books on agriculture and the allied sciences in the Library of Congress, the Department of Agriculture, and all other libraries for which the Library of Congress prints cards, and also, for the publications of the Department of Agriculture, and for those of some of the agricultural experiment stations, since some of them are now printing cards for their own publications. The research institutions who purchase these cards are not only relieved of the expense of the original cataloging of many books in their own collections, but they also make available to the investigators in their institutions the agricultural and scientific collections of the Washington libraries and many others, for all libraries are becoming increasingly liberal in their policies of inter-library loans. The printed cards, in addition to furnishing a union catalog for these collections on agriculture, constitute a valuable source of bibliographical information. Before beginning any extensive bibliography, a nucleus of L. C. printed cards may be procured, so that the bibliographer need not duplicate work already done. Is it too much to say that the development of the idea of printing catalog cards and of co-operative cataloging has notably increased thruout the United States the facilities for research in agriculture as well as in all other subjects?

In the bibliography of agriculture proper, little has been done by librarians or by anyone else. The idea of the *Agricultural Index* was originated by the A. L. A. Agricultural Libraries Section, and I believe, librarians are now working on the *Index*. The Library of the Department of Agriculture formerly published in its bulletin lists of publications on special subjects in the Department's collection. Curtailment in the printing funds of the Department necessitated the discontinuance of the *Library Bulletin* in 1913. *Library Notes* No. 6, U. S. Department of Agriculture Library, a mimeographed circular of eight pages gives a descriptive list of the bibliographies in progress in 1918. It is hoped that at some more favorable time a way may be found for the library again to publish some of this important bibliographical work, for the benefit of the research workers in institutions with less well equipped libraries. The ex-

periment station libraries have been able to publish little or nothing in the way of bibliographies. Most of them maintain card indexes of their own publications and some have published these indexes. A partial bibliography and index of the publications of the Missouri Agricultural College and experiment station was issued as a bulletin of the Library series of the University of Missouri.⁴ The Colorado station has recently published an index of its publications, compiled by Miss Dilts,⁵ the assistant librarian.

A contribution to agricultural bibliography too frequently overlooked is the part devoted to agriculture in Miss Hasse's Index to Economic Material in State Documents,⁶ published by the Carnegie Institution. In the thirteen volumes which have been published, there is an aggregate of four hundred and seventy-two pages on agricultural subjects and in these pages is to be found much elusive material indexed nowhere else. There is much of interest in these pages for the agricultural historian, as all state documents from 1789 to 1905 are indexed for the thirteen states so far covered.

A fertile field for the agricultural bibliographer is the collecting of literature on some special crop. Miss Mary G. Lacy, as bibliographical assistant in the Office of Crop Acclimatization in The Bureau of Plant Industry, compiled a bibliography and index to the literature of maize, which has attained to the size of 48,000 cards. In the course of this work much material of historical value was found, and some of these interesting points concerning the origin of maize were published in an article on "Pre-Columbian References to Maize in Persian Literature,"⁷ an article of interest not only to the agricultural historian but also to the agronomist and the systematic botanist.

In general, the bibliography of the sciences related to agriculture has been given more attention, than that of agriculture, and in some of these bibliographies librarians have done notable work. An important project of the Office

of Systematic and Economic Botany of the Bureau of Plant Industry is the comprehensive index-catalog of the literature of economic and systematic botany, which has been, in the main, the work of Miss Marjorie F. Warner and Miss Alice C. Atwood, bibliographical assistants. This catalog was started about 1903 by Mr. F. V. Coville, the botanist of the department, for the purpose of providing a union catalog of the books and periodicals in Washington libraries, as a basis for co-operative book buying. Miss Warner and Miss Atwood, who have worked on this catalog since its inception, have built up probably the most complete bibliography of botany which exists anywhere in this country. They have done a great deal of valuable work in tracing the authorship of anonymous books, and the identity of editions, in determining obscure dates of publications of works of importance, and in correcting errors in reference books and bibliographies. It would be an excellent practice for all reference librarians and bibliographers to publish notes giving the facts in cases like this as Miss Warner^{8,9} and Miss Atwood^{10,11} have done in a few instances. In connection with her work on this catalog, Miss Warner has specialized on the bibliography of horticulture, and the articles^{12,13} which she has published on horticultural books and bibliography are not only informing, but are also delightful reading. Her article read before the Agricultural Libraries Section two years ago, on opportunities in horticultural bibliography,¹⁴ shows the extent of her bibliographical researches. Tho the botanical catalog is a project of his office, Mr. Coville is interested in seeing it used as widely as possible. Thru his co-operation, it is located in the reference room of the Bureau of Plant Industry Library and is used by the library staff and investigators of the Bureau and by many others.

Other important bibliographical contributions in the field of botany, made by librarians, are the catalog of the Arnold Arboretum, compiled by Miss Ethelyn M. Tucker,¹⁵ the librarian of the Arboretum, that of the Massachusetts Horticultural Society compiled by Miss M. C. Hewitt,¹⁶ assistant librarian of the society, and the bibliographies relating to botany, compiled by Mr. William Holden,¹⁷ former librarian, and Miss Edith Wycoff,^{18,19} present librarian of the Lloyd Library.

An important contribution to the bibliography of economic entomology has recently been made by Miss Mabel Colcord, the librarian of the Bureau of Entomology. This is "Index II to the Literature of American Economic Entomology."²⁰

Agricultural investigators are giving an increasing amount of attention to the subject of agricultural history, and this interest is shared by librarians, for the data for the history of agriculture may all be gained from books, and need not be accompanied by direct experimentation as is the case in other lines of agricultural investigation. There have already been some contributions to the history of agriculture on the part of librarians, and there are indications that there will be more in the future.

Interesting work of historical value has been done by Mr. Earl G. Swem, formerly assistant librarian of the Virginia State Library. In "A Contribution to the Bibliography of Agriculture in Virginia,"²¹ Mr. Swem has edited the manuscript of the bibliographical material collected by Mr. N. F. Cabell, in connection with the preparation of a comprehensive history of Virginia agriculture. Mr. Swem has also published "A

list of Manuscripts Relating to the History of Agriculture in Virginia, collected by Mr. Cabell, and now in the Virginia State Library."²² These two bibliographies, with Mr. Swem's "Analysis of Ruffin's Farmers' Register with Bibliography of Edmund Ruffin,"²³ made available much valuable material to the student of the history of agriculture in the Old Dominion. In the Yearbook of the U. S. Department of Agriculture for 1899, Mr. W. P. Cutter,²⁴ then librarian, published a short account of Mr. Ruffin and his relation to "scientific farming." In *Special Libraries* for last March was published an annotated bibliography on government regulation of prices before 1800 A.D.²⁵ compiled by the Librarian of the Bureau of Markets. In addition to its interest for the student of the history of agricultural economics this study makes surprisingly entertaining reading for the layman.

Few, even of the librarians themselves, have as yet fully realized the large possibilities of the contribution which, with wider opportunities, agricultural librarians might make to the advancement of agricultural research. In his paper, "The Librarian as an Aid to Agricultural Research,"²⁶ Dr. E. W. Allen, chief of the Office of Experiment Stations, has pointed out that the literature of agriculture is difficult to trace, because of the nature of the subject matter and the number of the sciences which are related to it, and because in agricultural inquiry there has been little monographing. This offers a suggestion for agricultural librarians to whom bibliographical work appeals; namely the suitability as a library project of the preparation of bibliographies of agricultural subjects, to be used as the bases for monographs. Such bibliographies should include all that has been written on the subject, preferably with some annotations and perhaps a certain amount of appraisal. For many subjects, the monographs themselves could, of course, be written only by specialists in those subjects, but in certain lines

of agricultural investigation which do not require training in the laboratory or experience in the field for an intelligent understanding of their subject matter, it is conceivable that the librarian might prepare a creditable and authoritative monograph based on his bibliographical studies. An example is Miss Lacy's analysis of experiments on the seed values of maize kernels, butts, middles, and tips," recorded in literature over a period of forty-five years. Whether such work could properly be a library project, might arouse question. We have admitted the difficulty of determining when a librarian's work becomes research; we may also be confronted by the question: Where does research work, originating in bibliographical or reference work, cease to be library work? But, since I have no desire to throw an apple of discord into this friendly gathering, I will not pursue that discussion further. Whether library work or not, such co-ordination and analysis of data would, of course, be of value and it seems that whenever a bibliographer is so situated as to be able to do so, he should conserve the knowledge acquired thru examination of literature, by putting it into permanent report form.

To quote again from Mr. Bishop's article on reference work, I will read you his description of the reference librarian: "He is a man who is compelled to be all things to all men, who counting nothing and no one trivial, spends his days opening to the miscellaneous public the stores of the library's books. . . . Here he averts a difficulty, there he smooths down an irate reader with too often a just grievance; he is an interpreter, revealing to inquirers what the library has; he is a lubricant, making the wheels run noiselessly and well. Little glory and less reputation accrue to him. . . . At his best scholars use him, like him, thank him. At his lowest ebb no one considers him except as a useful part of the machinery. . . . This is the theory of his work—service, quiet, self-effacing, but not passive or unheeding. To make books more useful, more used, this is his aim. This aim and this theory are alike honored in any gathering of librarians." Is this not a good characterization, not only of the reference librarian, but of the librarian in general? And is not what Mr. Bishop says of the general attitude toward the reference librarian true of that of scientists toward librarians and libraries in general? Dr. Bostwick has pointed out in the *LIBRARY JOURNAL* the failure of authors to acknowledge their debt to the library, when it is

evident from the nature of their books, that the debt must be great, and he has mentioned several rare instances of acknowledgment. The scientific book in which an acknowledgment to a library is made is, for me at least, yet to be found. Books by the many friendly and grateful patrons of our libraries appear on the new book shelves, and like Mr. Bostwick, we look in footnote or preface for some acknowledgment of the contribution of the library. What do we find? They thank their scientific colleagues for suggestions and assistance, the artists for skill in coloring the illustrations, their wives for reading proof, but the librarian is unmentioned, unthanked, "unhonored and unsung."

Librarians, accustomed to playing the part of the modest handmaiden to science and letters, would be the last to claim, as individuals, any acknowledgment of their services. But, if we actually do believe in the theory that we have a real and important contribution to offer to research, should we not, in the interest of research itself, make it one of the aims of groups like this to bring investigators and administrators to a fuller appreciation of what this contribution might come to be, if the library were ever really given its opportunity? The accumulation of literature essential to research workers is becoming almost appalling, and at the same time, the problems presenting themselves for solution to agricultural investigators are becoming increasingly complex. Many years ago Von Ranke said that the time was fast approaching when it would be as much of a contribution to knowledge to discover a fact in a book as to discover a new fact, and much water has run under the bridge and many books thru the printing press since then. Hand in hand with the discovery and publication of new facts should go the constant development and perfection of our means for discovering the facts recorded in the mass of scientific literature already published. The necessity of division of labor here is obvious, tho, for the best results, there must always be in this work the closest co-operation between librarians and research workers. The opportunities for agricultural research librarians and bibliographers to render service, at present, perhaps, undreamt of, are limited only by the appreciation of these possibilities on the part of research workers. The more encouragement librarians receive, the more eagerly will they undertake to qualify themselves to increase a hundred fold their efforts to mobilize and organize the literature of agriculture for the use of the research worker, thus conserving his time for original observation and experiment in the field and laboratory for which he is trained.

* Lacy, Mary G. Seed values of maize, kernels, butts, middles and tips. *Journal of the American Society of Agron.*, v. 7, p. 159-171. July 31, 1915. Literature cited, p. 170-71.

Music in the Public Library

MUSIC was the topic for discussion at the winter meeting of the Massachusetts Library Club, the morning session being devoted to a treatment of the subject on its practical side, the afternoon session to the possibilities for developing a further interest in music and the evening session to a musical program.

Barbara Duncan described the music collection in the Boston Public Library. Music seems always to have been a feature in the library. Mr. Joshua Bates is to be credited with showing the first interest in the subject. As early as 1855 it was thought desirable that books by European authors should be purchased. Mr. George Ticknor bought freely from foreign collections when abroad in 1856. About 1878 Mr. Athrop was asked to make a survey, and he recommended the addition of more music and books on the literature of the subject. The Allen A. Brown collection is a monument to patience and industry. Mr. Brown's idea was to provide a good working collection for the student. He stipulated that the material should not leave the library. Additions have been made along the lines of Mr. Brown's collection of music and clippings. The circulation has been continued. All music for preservation is bound and none is circulated in an unbound form. The library has symphony scores and collects symphony programs from various parts of the country. In conclusion Miss Duncan mentioned the campaign for the improvement of church music which was sponsored by Mr. Wallace Goodrich and in which he hoped to secure the cooperation of libraries.

Lydia W. Masters, librarian of the Watertown Free Public Library, discussed the uses that may be made of a small collection of music. Her library had found it safest to buy standard material. Most of the music collection has been used enough to require binding within a seven-year period. Librettos have been bought liberally, also standard oratorios and cantatas and volumes of the Musician's Library. It has been found that piano music is more popular than is vocal. The demand for the works of modern composers is limited. Music for children, who are among the best users, has been bought to some extent. The collection has been placed in a corner of the Reading Room where people may see and consult it.

Helen B. Bangs described the collection in the Fitchburg Public Library, where the department of music was established about twenty-five years ago. The great classical compositions were bought as a foundation, and a little later

the collection was rapidly increased. The collection of organ music is of fair size, the library has vocal music and there is no intention of slighting the popular music of the day. The music has been placed on open shelves and forms a circulating library which is well patronized, and material is sent out on the terms of an inter-library loan. The entire collection now numbers about thirty-five hundred volumes, including nearly eight hundred on the literature of the subject.

George H. Tripp spoke of the collection of music in the New Bedford Public Library, a small but well rounded collection of about 2000 books.

Discussion of the possibilities for developing a further interest in music was opened with a paper on "Music and the Public Library" by William Arms Fisher, editor and publishing manager of the Oliver Ditson Company. Mr. Fisher protested against the exact wording of the title, because he thought we had too long had dissociation of music and library. He preferred the wording "Music in the Public Library." Thirty years ago Mr. Fisher said he had been asked to select music, not books about it, for the Oakland (Calif.) Public Library. Now its neighboring libraries have considerable groups of books. San Diego has a large collection which is functioning well. Los Angeles has a generous music section which is not, however, sufficiently large to supply the demand. Santa Barbara has a rich music section which has been presented as a memorial. Oakland now reports its inability to meet the public demand. San Francisco has a large room wholly for music and quarters for trying out musical compositions. Portland has a rapidly growing collection. The Chicago Public Library has some twelve thousand pieces of sheet music and eight thousand books of music, besides books on the history and appreciation of music, biographies of musicians, essays and related topics. The music section of the New York Public Library has about thirteen thousand books on music, eight thousand volumes of music and some four thousand pieces of sheet music.

In spite of the progress which has been made in the establishment and growth of music collections in American libraries, Mr. Fisher feels that the needs of the people are not fully met. Acknowledgment was made to the women's music clubs of the country for promoting the musical activities of the nation, and especially of the work of Mrs. James Hirsch, of Orlando, Fla., Chairman of Library Extension for the

General Federation of Women's Clubs, which has adopted as its slogan: "A music section in every public library." "This activity," Mr. Fisher said, "is primarily for the smaller towns and cities but is indicative of the present demand for music in the libraries."

Mr. Fisher closed his remarks by expressing the belief that it is the function of those who inherit the Puritan and literary tradition to supply the demand for music which he thought, in coming years, would be especially strong from "new Americans."

Professor John Patton Marshall, of the Music Department of Boston University, discussed "Musical Possibilities of a Public Library."

The first possibility is the formation of a collection of music, both for library use and circulation, to include phonograph records and perforated rolls, in addition to printed music.

The second is a good collection of reference books on music. It is true that reading about the subject does not, in itself, furnish a taste for good music, but it is a valuable supplement to the actual hearing of music.

The third possibility is direct education. "The information and training which I believe are necessary for most members of the community," Professor Marshall said, "may be gained thru a study of musical form, musical history, and ear training, in the form of practice listening. Thru a series of lectures and recitals, backed up by the resources of the music collection, the public library can provide this training." To take a few examples, a lecture on Beethoven with piano illustrations, including the principal themes from some of his works, a lecture on the art song, illustrated by songs of Schumann, Schubert, Franz and Brahms, a lecture on folk songs, always an interesting subject, a lecture on the orchestra with demonstrations on various orchestral instruments, a trio concert or string quartet concert, with introductory remarks . . . I believe that in any city lecturers and performers would be found who would be glad to contribute their services to a library in such work."

The fourth suggestion is a bulletin board or bureau of information which would keep the community posted on important musical events. Professor Marshall frankly admitted that this, his concluding suggestion, had been criticized because it called for a degree of discrimination which the average library is not in a position to exercise.

"Music for the Masses" was discussed entertainingly by Mr. Geoffrey O'Hara, composer of the song "Katy." After an introduction to the subject given in a humorous vein, Mr. O'Hara sang two songs for which he had written the music.

The schools are making helpful contributions to the appreciation of better music. As a proof of it Mr. O'Hara mentioned the bits of opera which his young nephew whistled as a matter of course—music learned from victrola records at school. About seventy-five miles from a railroad station in Arizona Mr. O'Hara said he had seen fifteen or twenty Indians sitting around victrolas enjoying the great music of the masters. Victrolas have gone to both poles. The songs of all nations are to be had on records.

Mr. O'Hara does not consider that music is retrograding. He cited the experience of one publisher, that the demand from teachers has doubled. He mentioned a community in Long Island where one hundred people had bought instruments since the demand for jazz had sprung up. An organizer had called the one hundred together. They began by playing jazz, thru preference, but within a week the organizer had his group playing Beethoven. Thousands of small orchestras are springing up all over the country, and union orchestras are finding competition. The reason for the nation-wide interest in music is due to the "rhythm which was struck us." To cultivate the present interest in music is the problem to which educators should address themselves. The solution of the matter does not consist of putting TNT under the present demand for jazz. A plan of more constructive value is to write better songs. Mr. O'Hara recommended the purchase of the Musician's Library and in conclusion said that "we should go where people are if we wish to take them where we think they ought to go."

The St. Thomas Public Library which was organized by Adeline B. Zachert and Eleanor Gleason and opened in December, 1920, has steadily increased in usefulness during its first year. It has now, writes Mr. W. L. Steiner of the Department of Public Welfare to Director E. H. Anderson over 3000 visitors a month and a monthly circulation exceeding 2500—and this with a book stock under 5000 and a population of less than 8000. This photograph was taken by Mr. W. B. Gamble on a recent visit.

Summer Courses in Library Science

Simmons College School

THE regular summer session will be held July 6 to August 15. The needs of persons interested in School Libraries or in Business Libraries are especially considered in the two programmes in Library Science offered in the summer session.

Each programme begins with a basic course on the fundamental principles and processes of library work (given by Director June R. Donnelly and Florence T. Blunt), which proceeds to a course dealing specifically with the problems of the School Library (given by Marion Lovis, librarian of the Hutchins Intermediate School in Detroit) or those of the Business Library (given by Miss Donnelly).

The basic course is open to any applicant, man or woman, who is a graduate of a high school or has the equivalent education, and who now holds a position in either a general or a special library, or is a secondary school teacher engaged in, or looking forward to, school library work.

The specialized courses are open only to persons who are registered in the basic course or who offer formal library training as a substitute for that course.

Applicants must send with their applications written statements showing that they now hold library positions or are teachers.

Further information may be had from Secretary of the College, 300 The Fenway, Boston 17, Mass.

Vermont Summer School

THE second two-weeks' Library Summer School for Vermonters will be held in connection with the University Summer School at Burlington. The date will be announced later.

The library course is planned primarily for the benefit of small libraries, and for librarians who have had little or no training. It aims to take up practical, everyday problems and to deal with them from the point of view of the Vermont library.

Classes will be given in cataloging; classification; subject headings; ordering; reference; accessioning; publicity; children's literature; work with schools; charging systems; mending and binding.

Courses in children's literature, work with schools, and mending, will be of interest to teachers as well as librarians. The work in children's literature last year proved so popular that the attendance at some of the lectures was double that of the number regularly enrolled

for the course. Those taking regular Summer School courses may attend the Library School lectures. An opportunity for practice work will be given at the Fletcher Free Library.

Tuition will be free for librarians within the state, and \$12 for those from outside. A limited number of scholarships will be available for Vermont librarians.

Further information may be obtained from Julia C. Carter, secretary of the Vermont Free Public Library Commission, Montpelier, Vt.

New York State School

PLANS are now being made to hold two summer sessions with overlapping courses at the New York State Library School. The first course, which will begin on June 19 and close July 28, is intended for the training of librarians and assistants of small public libraries and will be in charge of Mildred H. Pope, organizer, Library Extension Division, University of the State of New York. It will be open to those already holding paid library positions, or written appointments to definite library positions. Entrance examinations will not be required but candidates from states other than New York must have completed at least a full four-year high school course or its equivalent.

This course will be general in scope, covering simplified methods of technical work and dealing particularly with the problems of a small public library.

The second course, which is intended for school librarians, will begin July 10 and close August 18 and will be in charge of Sabra W. Vought, inspector, School Libraries Division, University of the State of New York. School librarians and others interested in the work of the school library will be admitted upon application. Simplified technical methods will be studied, but the emphasis will be laid on book selection, reference work and teaching the use of the library.

During the three weeks when both these schools are in session, work which is common to both the school library and the public library will be discussed, and the co-operation which may exist between these two types of libraries will be specially stressed.

Those in charge of these courses will be assisted by members of the faculty of the State Library School, University staff and visiting lecturers. For application blanks and further information address Edna M. Sanderson, vice-director, New York State Library School, Albany, N. Y.

Chautauqua School

THE twenty-second annual session of the Chautauqua School for librarians will be held from July 8th to August 19.

There will be freshman, sophomore, junior and senior classes developing the year's course. Students records are cumulated and filed from year to year, so that those completing the work of four annual sessions are granted the diploma of the school.

The Freshman class will have regular courses in cataloging, classification and allied subjects, reference work, bookbinding and library development. Courses of the Sophomore group, include library organization, cataloging with special attention to subject headings, classification and reference work. Classification and general reference work are finished in the second summer. The courses of the Junior class include subject bibliography, book selection, public documents, library administration, cataloging, and history of libraries and bookmaking. The work of the Senior class includes national and trade bibliography, book selection, organization and administration of libraries, types of libraries, parliamentary law, and history of education. In addition to the regular courses there are general conferences and special lectures given before the classes in joint session.

The instructors include Mary E. Downey, librarian and secretary, North Dakota Library Commission; Edna M. Hull, Warren (Ohio), Junior High School Librarian; Ellen A. Hedrick, North Dakota Historical Society Library; Mary Belle Nethercut, Emporia, College Library; Mary P. Farr, Southwark Branch, Free Library of Philadelphia; and Mae Byerley, Long Branch, New York.

Only those are accepted who are already in library work or definitely appointed to positions. Application for admission should be made to Mary E. Downey, State Library Commission, Bismarck, North Dakota.

Columbia University

THE summer session courses in library economy offer to librarians, library assistants, and teachers in charge of school libraries, opportunity to add six weeks of systematic instruction to library experience. This work is not intended as a substitute for a one or two years' training. School librarians are advised to take Library Economy S1, S2, and S3; but if two courses only are to be taken S1 and S2 are advised, unless S1 has been covered previously, when S3 should be included. Public library assistants are advised to take S1, S3, and S4 unless part of the work has been taken previously.

The subjects are: Library Economy S1.

Charles F. McCombs, Credit 1, 2 points; Library economy S2, Administration and book selection for the school library, Mabel F. McCarnes, Credit 4, 2 points; Library economy S3, Cataloging, classification, Bertha V. Hartzell and Alma M. Penrose, Credit 4, 3 points; Library economy S4, Administration and book selection for the public and college library, Harriet E. Howe, Credit 4, 2 points; Library economy S5, Indexing, filing and cataloging as applied to business, J. Grace Thompson.

Admission to all courses is by permission of the Department Representative, Professor Harriet E. Howe.

New Jersey Summer School

A FIVE weeks' summer school will be held by the New Jersey Public Library Commission at Navesink beginning July 17th. Navesink is delightfully situated on the coast near Monmouth Beach and Atlantic Highlands.

The course is open only to librarians either holding positions or under definite appointment to positions.

Applications for admission should be sent to Sarah B. Askew, secretary of the New Jersey Public Library Commission, Trenton, N. J.

Pennsylvania Summer School

THE Summer School for Library Workers will open its twelfth year at State College on June 26th for a six weeks' term in connection with the Summer Course for Teachers. In accordance with the regular policy of such schools admission will be limited to those who are already in library work or are under written appointment to library positions. Experience shows that it is impossible for those without previous knowledge of library work to carry the course successfully.

No entrance examination will be required but the work will be such as needs a high school course, or its equivalent, as preparation.

A certificate is given at the end of the course to those successfully passing the tests and State College allows six credits for this work.

Tuition will be free to all residents of Pennsylvania. Others will be expected to pay a fee of twenty dollars at registration. A certificate of vaccination must be presented.

The course of study consists of:

Accessioning, 1 hour; administration, 4 hours; alphabeting, 1 hour; book binding and mending, 5 hours; book ordering and buying, 1 hour; book selection, 17 hours (which includes fiction, 5; children's, 4; general, 8); cataloging, including public documents, 16 hours; children's work, 10 hours; classification, including subject headings, 18 hours; loan work,

2 hours; reference, including bibliographies and indexes, 10 hours; review of current news, 5 hours; review of fiction, 5 hours; review of magazines, 5 hours; shelf-listing, 1 hour; other general lectures 3 hours. Government documents will be specially dealt with under cataloging and reference work.

General lectures will be given by the State Library staff and the staff of the Carnegie Library, State College and others.

Instruction will be given in the form of lectures with as much practical work as possible.

A folder giving directions as to supplies, textbooks, expenses and travel can be had on application to the Library Extension Division, Harrisburg, Pa.

University of Georgia

THE summer school course in library methods for 1922 is especially planned for those high school teachers who are acting in the capacity of librarian in the high school libraries of the state.

The faculty will consist of: Susie Lee Crumley, principal of the Atlanta Library School; Duncan Burnet, librarian of the University of Georgia; and Charlotte Templeton, organizer for the Library Commission.

Instruction will be given in: Reference work, book selection, book buying, binding and mending, cataloging, classification, records, equipment and supplies, and an outline of a suitable course in the use of libraries to be given in high schools.

The fees for the six weeks course will be \$9.00. Supplies and text books will not be more than \$10.00. Room in any of the dormitories of the University or Normal School will cost \$5.00 for the six weeks and table board, either at the University or Normal School, \$30.

For the catalog of the Summer School write about March fifteenth to Joseph S. Stewart, Supt. Summer School, Athens, Ga.

CONFERENCE FOR LIBRARY WORKERS

The course outlined above is planned to meet the needs of the teacher-librarian, but as the subjects are fundamental it would be helpful also in conducting a public library. The course is open to librarians of public libraries or to those under appointment to such positions. One week of the summer school course is to be planned for libraries of public libraries. During this week special lectures will be given by leaders of the library profession in the state and a large attendance of library workers is expected. Further information in regard to this conference will be issued at a latter date by Miss Charlotte Templeton, organizer of the Georgia Library Commission.

Indiana Summer School

THE twenty-first session of the Summer School for Librarians conducted by the Public Library Commission of Indiana, will be held June 19 to August 5, at Shortridge High School, Indianapolis. As during former years, admittance will be restricted to students already employed in Indiana public libraries. There will be about forty such students. The courses will be conducted by the members of the Public Library Commission staff and by outside lecturers. Miss Carrie E. Scott of the Indianapolis Public Library, will give the course in work with children, and Mrs. Julia S. Harron of the Public Library at Cleveland, Ohio, will conduct the work in book selection.

For further information address W. J. Hamilton, secretary, Indiana Public Library Commission, State House, Indianapolis.

University of Illinois

BEGINNING June 13, two groups of courses will be offered, as last year: *first*, a group of courses chosen from the curriculum of the Library School, lasting eight weeks; and *second*, a group of more elementary courses lasting six weeks.

For admission to the eight-weeks Library School courses, the same formal entrance requirements prevail as for admission to the school, namely, college graduation or its equivalent. For admission to the six-weeks courses it is required that the applicant shall have graduated from an approved high school and be employed in a library, or else that the applicant shall have completed one full year of study in an approved college or normal school.

The instructors this year will be Mr. J. S. Cleavinger, Miss Ethel Bond and Miss Anne M. Boyd, all of the Faculty of the Library School; Miss Adah F. Whitcomb, Director of the Chicago Public Library Training Class; Miss Emma M. Shoup of the Library School; and Miss Jim P. Matthews of the University of Arkansas Library.

Recent college graduates, especially those already at work in a library, will often find it advantageous to begin their library training in the summer, especially if during the following year they desire to earn a part of their living expenses while in a Library School.

Until May 1, only applicants from Illinois will be accepted for the six-weeks courses. Applications for these courses received from out of the state will be filed, and not finally acted upon until that date. As many will then be accepted as accommodation permits.

Application blanks for admission should be secured well in advance of June 10th.

University of Wisconsin

THE twenty-seventh Summer Session of the Library School of the University of Wisconsin is announced for June 26 to August 4, 1922. Two courses will be offered: one for librarians and assistants in public libraries and one for teacher-librarians.

Application for admission should be made, and the required blanks filed, before June 1, and as much earlier as possible. Application blanks will be furnished by the School upon request.

COURSE FOR LIBRARIANS AND ASSISTANTS IN PUBLIC LIBRARIES

This course is designed to meet the needs of librarians of the small public libraries of the State, and of those assistants in Wisconsin libraries who are unable to take advantage of the training offered by the full year's course of study. It proposes to give those already engaged in library work some knowledge of approved library methods, and some elementary technical training in the conduct of a library; and to convey in as great a degree as possible the inspiration which comes from a broader conception of library work as an important educational factor in the community.

The object is to train those already engaged in library work for more efficient service. The course is open only to properly qualified workers in Wisconsin, unless it is found that Wisconsin librarians applying for the course are less than the number which can be properly accommodated in the school room, when other library workers will be considered. It is expected that the Wisconsin registration will be completed by June 1.

The course of study, covering six weeks, is systematically planned to include as much as possible of library technique and methods. The subjects are: Cataloging, 18 lessons; classification and book numbers, 10; book selection, 10; reference and public documents, 15; children's work, 6; library administration and lending, 12; accessioning, shelf-listing and other subjects in library economy, 8; book ordering, 3; binding and mending, 3. Library publicity, the relation of the library to the community, and other topics will have due recognition, and special lectures are also given by others outside of the faculty.

There will be no charge for tuition to students who hold positions in Wisconsin libraries, or who bring credentials showing definite appointments thereto. For others, the fee is \$20. Board and room may be had in Madison during the time of the summer session for a price ranging from \$9 to \$12 a week.

COURSE FOR TEACHER-LIBRARIANS

This course offers the training in library methods necessary to secure a license as a teacher-librarian in high schools of the State. It is open to teachers holding a state certificate or license to teach in high schools and to junior and senior students in the University and colleges of the state preparing to qualify as teacher-librarians. Because of limited quarters preference will be given to those expecting to do library work in Wisconsin.

The course of study includes: Cataloging, 18 lessons; classification and book numbers, 10; books and reading, including selection of books, principles of judging books, and methods of developing good habits and right taste in reading, 14; reference work, including the use of books as tools, the study of indexes, also for debating, rhetorical and declamatory work, etc., 12; library economy, including book buying, accessioning, withdrawals, shelf-listing, and mechanical practice, 10; binding and mending, 2; school library administration, including equipment and management of the school library, plans for instruction in the use of books and libraries, 10. Special lectures are also given by others outside of the faculty.

This course receives full summer session credit in the University—6 credits. The fee for this course is \$20.

All correspondence should be addressed to Preceptor, Library School, 206 N. Carroll St., Madison, Wisconsin.

Iowa Summer School

THE University of Iowa announces it will hold its twenty-first annual Summer School for Library Training, during six weeks, beginning June 12. Students are admitted on the same terms as for other work in the College of Liberal Arts, preference being given to those who hold library positions.

University credit is allowed for the five main courses, book selection, cataloging, classification, reference work, and children's literature.

Miss Blanche V. Watts continues as director. Instruction in Cataloging will be given by Blanche Smith, and the courses in book selection and reference by Mae Anders, both of the Des Moines Public Library staff. The children's literature course extending thru the last three weeks will be presented again by Grace Shellenberger, librarian of the Davenport Public Library.

The third annual Conference for Library Workers, under the auspices of the Extension Division of the University, will be held some

time during the session, the dates to be announced later.

JANE E. ROBERTS, *Resident Director.*

University of Oklahoma

TWO courses in library science are offered during the summer. Library Science II is a special course for librarians taking all of the student's time. Library Science I is a general course for eight weeks, taking only a part of the student's time and permits, therefore, enrolment in other courses in the Summer Session.

The subjects of Library Science 11 are: Classification, 12 hours weekly; cataloging, 12; reference work, 6; order and accession, 2; administration and extension, 2. A credit of six hours is given for this course.

There is no tuition fee, but a laboratory fee of \$12 is required.

Library Science 1 is a two-hours' course extending thruout the University Summer Session and may be elected as a part of the regular summer work. It is designed for those, particularly high school teachers, who do not desire to take a full course such as Library Science 11.

The Walking Book of Brobdingnag

IF the people will not go to the book, the book must go to the people is a principle long since accepted by the library world. A practical application was the Brobdingnagian book recently sent forth into the busy streets of Stockton with the object of forcing acquaintance with that large division of society, whose literary creed is that of the "innocent bystander."

This mammoth book, measuring four feet high, two and a half wide, and fifteen inches thick, is constructed of a light wooden frame covered with sign cloth, with sides hinged at the back and opening at the front.

On one cover appears the timely admonition:

BE WISE
TIME FLIES

USE YOUR PUBLIC LIBRARY

Perched on the "T" of "Time" is Mr. Owl, twirling a watch about by its fob, while from the corner of his eye he surveys the effect of this demonstration upon surprised observers.

On the other cover is a cartoon of a delighted business man with a "eureka" look, holding an

open volume, the title of which reads "Do it with books." Below this appears again the phrase, "Use your Public Library."

The rounded back of this huge book is divided into three panels in which are lettered respectively the title, the author's name and the mark of ownership, as follows:

ANY BOOK YOU NEED
BY ANNE O'THORITY
PUBLIC LIBRARY

The front edge of book is painted to represent the edges of leaves. When opened, the following cloth poster is displayed:

TRADE
at your
FREE PUBLIC LIBRARY
Year 'Round Discount 100%
ALL BOOKS GUARANTEED
TAKEN BACK OR EXCHANGED
IF NOT SATISFACTORY
Ask for
TRIAL SAMPLE

This poster is attached to the open edges of the book and supported across the top by a strip of

tempered steel (hinged at each end) which springs inwardly, taking in the slack when book is closed.

A ten year old boy inside faces the forward edge of the giant book while carrying it slung from his shoulders by straps, in such a way that he is visible only from the knees down. His hands rest upon handles directly in front of him, by means of which he can open and shut the book at will. A peep-hole enables him to see ahead.

The unprecedented appearance of this walking book of Brobdingnag attracted as much attention as Gulliver himself among the Lilliputians. Moreover, its advertising range was many times extended thru its photographic reproduction in a local newspaper which made it the basis of a feature article on library publicity. A simultaneous increase of fifty-two per cent in the library's circulation over the corresponding month of 1921 is evidence of the power of this type of peripatetic advertising.

Better Business Libraries

TO the steadily and sturdily growing literature of business libraries is added another volume, the second on the subject, by Miss Louise B. Krause, librarian of H. M. Byllesby & Co. of Chicago.

This is a reprint of articles which originally appeared in *Trained Men*, a monthly publication of the International Correspondence Schools. Without duplicating the material in "The Business Library," Miss Krause presents information regarding the scope, organization and management of the business library in concise form designed for the perusal and information of a busy executive. Such a book on the shelves of every public library would prove useful propaganda for the establishment of such libraries.

Every one who has to do with the filing of things either in a business office or a library could with profit read the chapter on the "Arrangement of Material." In it, Miss Krause argues effectively for the alphabetical arrangement of files as against the classified arrangement and presents several concrete and valid reasons why the former method is in most instances preferable.

It is to be regretted that authors of books on special and business libraries show a growing tendency to alienate their "special" field of endeavor from that of the public library. In a book such as "Better Business Libraries" a real service could be rendered by suggesting that an

executive contemplating the establishment of a business library first consult with, and secondly, keep in close touch with, the librarian of the local public library to the advantage of both. Furthermore, in presenting as Miss Krause has done, the value of the business library, it could advantageously be suggested that the business which cannot for the time being afford its own library can nevertheless share in the advantages of a wealth of available information in print, to be found, well ordered, on the shelves of any progressive public library.

F. B. S.

Quality v. Quantity Statistics

To the Editor of the LIBRARY JOURNAL:

Library statistics have been altogether statistics of quantity; so far as I know, no attempt has been made to gather data regarding the quality of reading. Such data would be difficult to secure and even more untrustworthy than figures of quantity. But as an experiment, we have been doing a little work of this kind. Mrs. McNiece, the Chief of our Issue Department, has divided the fiction circulation for one week, at the main desk of the Central Library, into three grades, A, B, and C. A consists almost entirely of the recognized standards, including very few living authors. B has the better of the current books and C most of the relatively trivial and ephemeral works. Of course, no two persons would make the division in the same way, but Mrs. McNiece has been rather rigid, as will be seen from the fact that she puts Tarkington in B and "Main Street" in C. Her percentages for the week come out as follows: A—23; B—37; C—40.

I think it is a fair interpretation of this to say that at least sixty per cent of our fiction circulation has been of books that anyone would class as intellectually worth while.

I am interested to know whether anyone else has tried a similar experiment.

ARTHUR E. BOSTWICK, *Librarian*.
St. Louis Public Library.

WANTED

The Library of the University of North Carolina, Chapel Hill, N. C., wants the *Federal Reserve Bulletin*, vols. 1, 2, 3. *Commercial and Financial Chronicle*, any vols. before 1921.

The A. L. A. reports that its publishing business is flourishing. Receipts from sales of A. L. A. publications in 1921 were forty-nine per cent greater than the receipts in 1920; and the receipts from the sales of A. L. A. publications in January, 1922, showed a gain of sixty-six per cent over those of January, 1921.

"Better Business Libraries." By Louise B. Krause. 526 South Park Ave., Chicago, Ill.: The Indexers Press. 1922.

Addition to the Riverside Library

THE recently completed addition to the Riverside Public Library was officially opened to the public with a reception on the afternoon of February 25. There was no formal program but the hundreds of people who called were welcomed by the Library Board, the Staff of the Library and the teachers and students of the Library School, and escorted thru the various departments.

The rooms were beautifully decorated with spring flowers and sprays of acacia, and an orchestra and light refreshments added materially to the hospitable greetings.

The new east addition, which is 55 by 30 ft., with light and airy basement underneath, was the center of interest. It houses the reference room and several special collections, among them the Ethan Allen Chase Collection, the John Correja Collection and a collection of rare Bibles. The library has grown from 1000 volumes in 1889 to 90,000 volumes in 1922. A portrait of the beloved former librarian, Joseph F. Daniels, who had planned and was supervising the erection of this new addition at the time of his death last September, occupied a conspicuous place in the Reference Room and was silently greeted by the many friends who missed his genial presence.

The addition was made possible in 1921 by the gift of twenty-five thousand dollars from the Carnegie Corporation, the original building being the gift of Andrew Carnegie with addition-

al contributions from the prominent citizens of Riverside. Conditional with the Carnegie gift the City purchased in 1921 two adjoining residences, for the use of the Library School.

LILLIAN DICKSON,
Acting Librarian.

“Service with a Smile” in New York

To the Editor of the LIBRARY JOURNAL:

In these days of short skirts, abridged personal rights, bobbed hair, brief cases, housing shortage, short change and short answers—the unvarying courtesy and service with a smile, offered at the New York Public Library, is as pleasant to come upon as an old friend.

For instance when one attempts to check one’s muddy rubbers the attendant at the free checking room diplomatically explains that on account of a health department ruling he is not allowed to check rubbers *unwrapped*; but he offers a newspaper to the checkee to enable him to comply with the regulations. And at noon, the visitor asks the doorman whether there is a restaurant run in the building as is the case at the Metropolitan Museum. The doorman answers in the negative; but directs the stranger to three restaurants nearby.

These are only little things, still they count in making this Public Library a real servant of the people, in making its users feel like welcome guests.

CHARLES IRVING CORWIN

New York City.

"THE ONLY THING IT NEEDS IS A SELF-STARTING MOTOR," SAY THE ASSISTANTS

THE FILING DESK IS THE INVENTION OF LIBRARIAN ANDREWS AND THE JOHN CRERAR LIBRARY STAFF

A Movable Filing Desk

THE public catalogs of The John Crerar Library occupy 1968 trays in cases which total sixty-three feet in length. The growth of the catalogs is steady and amounts to over forty thousand cards a year. The filing of these cards has to be done regularly and as promptly as possible and in order to lessen the physical strain of this work the movable filing desk shown in the cut is used. The idea originated with Librarian Clement W. Andrews, and several members of the Library staff had a hand in determining the form.

The method of use is self-evident, as is also the advantage of the device. The general construction is also shown by the cut, but the details may be of interest to other libraries which have the same problem. The dimensions were determined to suit the convenience of a woman of medium height and are as follows:

Platform 17" x 42", and 5½" from floor; desk 18" x 14" and 30" from platform; stool, swivel, 20" high with centre 15½" from rear of platform, wheels 6" in diameter, ball bearing and rubber tired.

A Thousand Dollars Well Spent

Dear A. L. A.:

Never could a thousand dollars have been spent to better advantage than that which you invested in books for the American Forces in Germany. They have come at a most opportune time. The forces here are being rapidly reduced, and we are losing literally hundreds of our readers thru evacuation. We have had no new books other than an occasional gift since the last A. L. A. shipment came over a year ago,

and it has been an increasingly difficult problem to maintain interest in the library. Besides adding many names to our list of borrowers, the new books are bringing back to us those who had given up coming to the library because we had nothing different to offer. In fact, they have put new life into all of us.

There were 702 books in the shipment, 57 titles of fiction and 37 of non-fiction. They were all new titles for us and were most carefully chosen—exactly the sort of collection we were in need of. We accessioned about 275 of them for the Main Library. The others were distributed to the libraries in the thirteen Y. M. C. A. huts (12 in and around Coblenz, and 1 at Antwerp), to our two regimental libraries, to the library at the Station Hospital, and to the Salvation Army. The whole army is thus having an equal chance, and all the men are aware of the fact that altho the A. L. A. is no longer here in the flesh, it is still vitally interested in their welfare.

ELIZABETH B. STEERE.

Y. M. C. A., with American Forces in Germany.

"Information gathered from answers to two hundred and fifty questionnaires recently sent out to chief executives, department heads and employees reveals the fact that few realize or appreciate the value of reading. Of the 250 men questioned, says *The Executive*, approximately 50 per cent own from 50 to 250 books; the others own less than 50 books each. Sixty per cent of them state that they are in the habit of devoting less than 30 minutes daily to reading. General reviews, articles on business and technical books are popular in the order named."—*Filing and Office Management*.

Gifts to American Libraries in 1921

THE following list of gifts and bequests to American libraries includes all gifts valued at one hundred dollars or more whether of money, buildings, sites, books and miscellaneous and undescribed items, which have been reported to the American Library Association for 1921.

Thirty states reported the gifts here listed. A few states reported no gifts valued at one hundred dollars; and from others no report was received, due either to the absence of a state library commission or its equivalent, or to there being no general record kept of gifts received.

In making the summary which follows gifts definitely promised have been included in a few cases as well as those actually received. A case of apparent repetition occurs where the bequest of Mrs. George Jones to Lynchburg (Va.) Public Library is listed as \$564,750. In last year's summary this was estimated and counted as \$500,000. Only \$64,750 is included, therefore, in this year's total.

The following is the summary:

Gifts of money or gifts (other than books) valued in money, about..	\$3,590,800
Gifts of books, valued, about.....	\$39,483
Number of volumes, where money value was not quoted.....	78,385
Buildings, where money value was not quoted	7
Sites, where money value was not quoted	7
Miscellaneous	42

RIDGWAY. Public Library. Gift by Mrs. J. P. K. Hall, of residence worth \$20,000 or more, subject to mortgage of \$10,000 to be assumed by Library Association.

ST. MARY'S. Public Library. Gift of the home of the home of Dr. Eben J. Reess, for a library building.

SOUTH DAKOTA

IPSWICH. Public Library. Library has permanent use of building owned by the estate of Marcus P. Beebe, probably equivalent to \$300 annually.

LEAD. Hearst Library. Entirely supported by estate of Mrs. Phoebe Hearst.

PIERRE. Public Library. Annual gift of \$200 for the purchase of books made by Mrs. William G. Renwick, Weston, Mass., as a memorial to her mother, Mrs. C. D. Mead, a former trustee.

ST. LOUIS. \$5,000 from estate of Mrs. D. S. Cliddon, a former trustee of the library.

TENNESSEE

CHATTANOOGA. Carnegie Library. \$300 from Richmond Fund for Richmond Memorial Room. \$472 from Junior High Civic League. Books valued at \$1527.

— University of Chattanooga. Private library of scientific books valued at \$700.

GREENVILLE. Tusculum College. Bequests of \$3,000.

JEFFERSON CITY. Carson and Newman College. Gifts amounting to \$150.

KNOXVILLE. University of Tennessee. John L. Rhea Fund for purchase of classics, annual income of \$250. Angie Warren Perkins Foundation for the purchase of books, \$1,000. J. Allen Smith Foundation for the purchase of books, \$1,000. Dante Society of America, Divine Comedy, \$500.

MARYVILLE. Maryville College. Contributions of \$141.

NASHVILLE. George Peabody College for Teachers. Copies of the six mural paintings by John W. Alexander in the Library of Congress, representing the Evolution of the Book, also Labour and Religion by Charles Sprague Pierce. Gift of faculty and student body.

LAREDO. The High School has acquired the library of the late W. R. Pacc by will, as well as \$250 to defray the expense of its transfer to the school.

SAN MARCO. Library conducted by the Chamber of Commerce acquired approximately 500 volumes valued at \$500 from citizens.

WINSBORO. Carnegie Library. Standard Club, \$100 for books; Civic League, \$150 for property improvement.

TEXAS

AMARILLO. Potter County Free Library. From various clubs, \$213. Books valued at \$500 from citizens and the A. L. A.

DALHART. Dallam County Free Library. Women's Literary Club, 1104 volumes valued at \$750; patrons, 507 volumes, value \$350.

GREENVILLE. Carnegie Library. Books valued at \$150 from patrons—after requests in newspapers.

HOUSTON. Houston Lyceum and Carnegie Library. \$500 from Mr. Meldrum for children's books; library of the late Bonner McCaraven, gift of his son, Pringle McCaraven; 1700 volumes; 500 volumes from other sources.

VERMONT

BARNARD. Charles B. Danforth Public Library has been left by the will of Ira A. Abbott of Haverhill, \$1,000.

BARTON. Public Library. Legacy of \$7,968.

BENNINGTON. Free Library. "Chronicles of America," valued at \$250.

BURLINGTON. Fletcher Free Library. \$500 in money and 279 books.

— University of Vermont Library. Valuable collection of medical books from the library of the late Bingham Stone. Divina Commedia, valued at \$500.

CONCORD. Public Library. Books valued at more than \$100.

DERBY LINE. Haskell Free Library. About \$150 worth of books.

FAIR HAVEN. Free Library. \$200.

HARTLAND. Public Library. 75 books and \$34 in money.

MANCHESTER. Mark Skinner Library. 1000 volumes and a 60-tray catalog cabinet.

NORTH BENNINGTON. John G. McCullough Free Library Inc. has received a two story library building, fully equipped and funds for maintenance for current year. Also, gifts amounting to \$200.

PROCTOR. Free Library. \$100.

READING. Public Library. Interest on \$2,000.

RUTLAND. Free Library. \$120.

ST. ALBANS. Free Library. \$1,327 from a "Community Day" was given to the library.

SOUTH ROYALTON. Royalton Memorial Library Association has received gifts of money amounting to \$800.

SPRINGFIELD. Town Library. Gift of \$300.

SWANTON. Public Library. Bequest of \$3,800.

WASHINGTON. Public Library. 134 books.

VIRGINIA

LYNCHBURG. The Jones Memorial Library Association received the estate of Mrs. George M. Jones, amounting to about \$564,750.

WASHINGTON

KONNEWICH. \$235 from estate of Rev. E. W. Fraiser.

CHEHALIS. \$100 from N. B. Coffman.

SHELTON. \$250 from Mrs. A. H. Anderson. \$250 from Mrs. S. G. Simpson.

WEST VIRGINIA

MORGANTOWN. West Virginia University. 350 engineering books from library of the late Prof. F. L. Emory.

WESTON. Mrs. Louis A. Bennett donated her residence and grounds for use as a public library.

WISCONSIN

ASHLAND. \$130 from L. K. Baker.

BRODHEAD. \$500 from Mrs. Charlotte Thompson.

ELKHORN. \$20,000 by the will of the late Mrs. Belle Mallory for a building.

PALMYRA. \$140 for the Good Templars' Memorial fund; \$180 from the Vigilance Society.

THORP. \$100 from the Woman's Club for the building fund.

WATERTOWN. \$3,000 by will of the late George Hawkins.

WYOMING

CODY. Park County Library Board. \$500 from W. R. Coe of New York City for purchase of books.

TO MAKE FACTS WORK SPECIAL LIBRARIES ASSOCIATION THAT IS OUR BUSINESS

STICKER TO BE USED BY MEMBERS OF THE EDITORIAL STAFF AND THE PUBLICITY COMMITTEE ON THEIR LETTERS. THE IDEA ORIGINATED WITH ADELAIDE R. HASSE, EDITOR OF *Special Libraries*

French Books on the United States

To the Editor of the LIBRARY JOURNAL:

I have been asked to prepare a list of French books, including translations, of use in making French immigrants to the United States acquainted with American history, institutions and life.

In the preparation of this, I am being assisted by the Ligue Française de l'Enseignement, and by the Maison du Livre, but I beg also the assistance of American librarians who have made any study of this particular problem.

Will librarians who have discovered any French books on these subjects particularly useful please send me their titles?

W. DAWSON JOHNSTON, *Librarian.*
American Library in Paris,
10, rue de l'Eylsée, 8^c.

Bibliography of University and College Publications

THE Committee on Bibliography of University and College Publications (Ernest C. Richardson of Princeton, chairman) presented the following report at the twenty-third annual conference of the Association of American Universities held in November.

"The Committee . . . has printed and distributed to a large number of libraries, a circular describing two sample lists (Harvard and Princeton) showing two degrees of brevity. This material is printed in the *American Library Institute Proceedings* [1920, p. 41 ff.]. In the almost total lack of response to the widely circulated material it is hard to advise whether the matter would better be dropped or the Association itself urge its members that they at least should prepare lists for a small collected volume. It seems likely, however, that the mere agitation of the matter having so far secured the object at first intended by getting the material into University Press lists, general publishing lists, and especially into the Library of Congress cards, that the wind has been taken out of the sails of a separate volume or even separate lists. All theses, for example, are provided for. The committee therefore advises (1) a simple recommendation of the Association to its members to have its libraries take pains to see that such material is represented in the Library of Congress cards, the *Publishers' Weekly* and the *Cumulative Book Index*, and (2) that the idea of a volume be dropped and the committee discharged."

The report was accepted and the committee discharged.

A Library Program

AT the Boston meeting of the National Education Association Library Department in July the following library program will be submitted for action.:

1. The *library* is an educational institution made up of various agencies, the two most important being the school library and the public library.
2. The school library should be the heart and center of the school work.
3. It should be so used as to train pupils to use a public library intelligently.
4. Pupils should be so instructed as to want to read books that are worth while.
5. There should be a collection of books in each classroom suitable to the age and purposes of the pupils.
6. Teaching children to read is of little value unless they are taught what to read, and are provided with the right kind of books.
7. The public library should serve as a continuation school for those who have finished their school life.
8. Public libraries should be supported by public tax as are the public schools.
9. Librarians should be as specially trained for their work as are teachers for theirs.
10. All people should have easy access to libraries.

The present winter session of the Riverside Library Service School is proving one of the most successful in its history. Thirty-four students are in attendance, a number of whom are college graduates.

Decimal v. Alphabetical Classification

THE Prentice Hall Business Digest recently sent to its users a questionnaire on the relative merits of the decimal and alphabetical classifications of business literature. Ninety per cent of the replies indicated a preference for the alphabetical classification in cases where material is to be consulted by the reading public at large; others qualified their opinions by saying that the decimal classification is better for filing purposes if cross-indexed alphabetically. Many of those replying agreed that in a small library the alphabetical arrangement is better, in large libraries a decimal or subject classification is desirable, preference being shown for the Dewey System, amplified if necessary by the Brussels System, and that for libraries in special fields a decimal or subject classification should be developed which would best meet the needs of that field. As the digest is used mainly by the average business man the publishers have discarded the decimal in favor of the alphabetical system.

"Good Books are Life Teachers"

In Connection with "Religious Book Week," scheduled for April 2-8, many libraries are using this poster which is issued by the Year Round Bookselling Plan, Room 417, 334 Fifth Avenue, New York.

THE LIBRARY JOURNAL

TWICE-A-MONTH

MARCH 15, 1922

THE long-continued business depression of last year made itself felt in the libraries which suffered from appropriations not only insufficient to permit of much needed extension of service but also often times so meagre as to necessitate curtailment of service previously undertaken. It is encouraging therefore to note how numerous and how extensive were the gifts and bequests to libraries during the year. From reports sent to the American Library Association gifts in money or gifts whose money value was estimated amounted to over \$3,630,000 as compared with a little over half a million in the preceding year. To this must be added more than seventy-eight thousand books not valued in terms of money, as well as seven buildings, seven sites and over forty miscellaneous gifts many of them of considerable value. In this connection may be noted also a gift re-given, namely the books equipment and records transferred from the A. L. A. merchant marine work to the American Merchant Marine Library Association which was incorporated last April. A great part of this material is still in ships tied up in different parts of the world and its extent can not well be estimated at present; but the new Association expects to collect about 100,000 volumes in good condition to carry on this part of the country's library work.

★ ★ ★ ★ ★ ★ ★

SCARCELY less significant than this great total are the individual items which compose it. A few unusually large sums have been given, of which the million dollar addition made by Mrs. Stephen V. Harkness to the endowment fund of the Reference Department of the New York Public Library is the outstanding example. But for the most part the total is made up of the very numerous and relatively small benefactions of individuals and groups far from wealthy, and in some cases are the result of special efforts made on behalf of the library. Again, timeliness adds value to gifts made to meet a specific need, such as a book

truck for a newly established county service or sums specially given for heating, or lighting or the payment of salaries. Well planned publicity to which libraries everywhere are devoting more attention is without doubt responsible for much of this public appreciation which will result further in influencing appropriating bodies in the direction of making adequate provision for this branch of the public service.

★ ★ ★ ★ ★ ★ ★

INCREASING realization of the importance of the library's share in supplying religious books is shown by the fact that the Round Table of Libraries of Religion and Theology held in connection with the Swampscott Conference was the best-attended meeting of this group since its inception. The general subject of discussion was religious books in the public library and so great was the interest displayed that it was planned to devote this year's session to further discussion of the same topic. Meanwhile librarians are planning to observe the second annual Religious Book Week in April, in co-operation with the churches, the publishers, book-sellers and the religious journals. Some thirty of the important religious papers are laying emphasis on religious books in special numbers, and these ought to be of help to the librarian who realizes need of adequate representation of religious thought in the public library and aims at a wider distribution of the literature of religion than has as yet been attempted.

LIBRARY CALENDAR

- April 28-29. At the Hotel Chelsea, Atlantic City. Annual meetings of the New Jersey Library Association and Pennsylvania Library Club.
- June 26-July 2. In Detroit. Headquarters at the Hotel Statler. Forty-fourth annual conference of the American Library Association.
- July 3-8. In Boston. Annual meeting of the National Education Association. Exact dates of the Library Department meeting will be announced later.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

THE DETROIT CONFERENCE

THE A. L. A. Conference will begin with an Executive Board meeting on Monday morning, a Council meeting on Monday afternoon and the first general session on Monday night, June 26, and will continue thruout the week.

The tentative program provides for greetings from Mayor James Couzens and the President of the Council, John C. Lodge. The A. L. A. presidential address will be made by Azariah S. Root, and President Marion L. Burton, of the University of Michigan, will deliver an address.

The subject for the second general session which will be held on Tuesday morning, June, 27, will be "A. L. A. Publications." There will be talks on the policy of the A. L. A. in this department of work, suggestions as to things which have not yet been settled and general discussion of the usefulness of A. L. A. publications from the standpoint of librarians in all kinds of libraries.

Recruiting for library service will be the theme of the third general session on Wednesday morning. Tentative plans provide for brief addresses by people representing every kind of library and most of the departments in libraries, and there will be general informal discussions of how persons of ability may be attracted to the profession.

The fourth general session has not yet been worked out in detail.

The fifth and last general session will be devoted to the individual's responsibility to his profession with one or two brief addresses and many short talks.

A. L. A. Council meetings are tentatively planned for Monday afternoon, June 26, and Wednesday evening, June 28, and it is expected that both of these meetings will be devoted to discussions and possible action on the recommendations of important A. L. A. committee reports.

From one to four meetings each are being planned for the following associations, sections and groups:

- American Association of Law Libraries
- National Association of State Libraries
- League of Library Commissions
- Special Libraries Association
- Bibliographical Society of America
- Michigan State Library Association
- Association of American Library Schools
- Library Workers Association
- College and Reference Section

Professional Training Section

Agricultural Libraries Section

School Libraries Section

Lending Section

Public Documents Round Table

Round Table on Work with the Foreign Born.

Small Libraries Round Table

Training Class Instructors

Librarians of Religion and Theology

Thursday, June 28, is a day of recreation.

A visit to Ann Arbor has been planned. It is expected that a special train will leave Detroit for Ann Arbor about half past ten in the morning. A complimentary luncheon will be served at the University Union on the Campus. There will be brief after-luncheon talks by University people and two hours will be spent in visiting the University Library and Campus. A special train is scheduled to leave Ann Arbor about half past four. Dinner meetings of library schools and other groups will be held in Detroit on Thursday evening. A few other meetings will also be held on Thursday evening.

A boat ride up the Detroit River to Lake St. Clair is planned for Friday evening. A large ferry boat capable of accommodating two thousand persons will be provided and it is expected that the local and entertainment committee will provide a variety of entertainment on that occasion, including perhaps one-act plays, dancing and music.

Headquarters will be at the Hotel Statler which will accommodate about eight hundred members. Other hotels within easy walking distance are: Wolverine, Tuller, Charlevoix, Addison, Cadillac, Shelby, Norton, Lenox and Madison. Single rooms in the headquarters hotel, all with bath, range from \$3.00 up. Double rooms, \$5.00 up. In the other hotels the prices range from \$2.00 up. Reservations should be made at once, as the hotels in Detroit are likely to be crowded at the time of the conference. Full particulars of hotel rates are to be found in the LIBRARY JOURNAL for February 1, p. 126.

It is too early yet to make definite announcements about railroad rates, but the Travel Committee hopes to be able to offer something less than the regular fare.

Three New Books That Will Be In Constant Demand

Be prepared for the requests of your readers by ordering these books now.

Material Handling Cyclopedia

Roy V. Wright and John G. Little, Editors

Contains three main sections. *Definition Section:* Gives terse, clear-cut definitions of the principal terms used in connection with material handling methods and equipment with full descriptions of the mechanisms of the various devices. *Technical Section:* Principal types of material handling machines are taken up under classified headings. Transference methods are discussed at length showing the advantages of the various types of devices for specific lines of work. Carefully chosen photographs, drawings and charts, etc., render the text easily understood. *Catalog Section:* Completes the other two sections. Leading manufacturers illustrate and describe their own products pointing out their particular advantages. All three sections are cross referenced—any information you desire is available in an instant. A Directory of Products, a Trade Name Index and an Alphabetical Index of Manufacturers are included.

850 pages, 1,500 illustrations, 9x12, buckram, \$10.00; leather, \$15.00

Electric Arc Welding

E. Wanamaker and H. R. Pennington

Written by the Electrical Engineer and the Supervisor of Electrical Equipment of the Chicago, Rock Island and Pacific Railroad, respectively. Both of the authors have had years of practical experience and lead in making new and practical applications of the welding process. Every phase of the subject is covered in a thorough and comprehensive manner and in a style that practical men will appreciate.

260 pages, 167 illustrations, 6x9, cloth, \$4.00

Electric Ship Propulsion

Commander S. M. Robinson, U.S.N.

Traces the history and development of electrical ship propulsion from its inception down to the present day. Full descriptions of typical installations in both naval and merchant vessels are given as well as a host of information that has never been given before in book form.

275 pages, 140 illustrations, 6x9, cloth, \$6.00

Mail the coupon now, checking the books you desire. 30 days free examination—regular library discount allowed.

IN THE LIBRARY WORLD

NEW YORK

New York City. At the New York Public Library there has just been completed a most interesting series of conferences for assistants in branch libraries located in Yiddish-speaking districts. The conferences, planned by Hannah C. Ellis, librarian of the Hamilton Fish Park Branch Library, were designed chiefly for assistants new to branch libraries, where there is considerable work with those who read Yiddish. They proved to be so valuable, however, that they soon became generally popular with the branch librarians and assistants from all the foreign-speaking communities. Thru the Bureau of Jewish Social Research, lecturers of unusual attainments and ability were secured, all specialists in some phase of work with foreigners. General discussion followed each lecture.

The following were the lecturers and their subjects:

Professor Julius Drachsler, Democracy and assimilation; Dr. A. M. Dushkin, Jewish education in Eastern Europe and the United States; Dr. Samuel Goldsmith, Jewish organizations; Rose Schneiderman, Aspirations of the Jewish young working woman; Harry Schneiderman, Political background of Jewish immigrants; M. Soltes, The Jewish Press; and Emanuel Neuman, Zionism. A symposium on methods of approaching the foreigner who has just arrived occupied one evening, and another was devoted to discussion of a list of Yiddish books which can be purchased at the present time, compiled by Jennie Meyrowitz.

IOWA

Sioux City. The City Council of Sioux City has appropriated \$49,200 for the use of the Public Library during the fiscal year beginning April 1. This is an improvement over the \$37,501 received from tax levy in the past year, which allowed an expenditure of only \$5,900 for the purchase of books for use at the main library, five branch libraries, two lending stations, three deposit stations, and seven hospitals. Not less than \$10,000 should be expended annually for books, in Librarian Clarence W. Sumner's opinion. For salaries \$25,393 was reserved. The entire receipts of the library, including a special appropriation, were \$58,977. It owns 71,160 volumes, and circulated 288,647, a gain of 12,420 over 1920.

Since the Department of Hospital Service was established November 1, 1919, more than 34,000

books have been placed in the hands of the sick. The circulation for the past year was 17,566, a gain of 934. Numerous libraries have requested the blue-print of the Sioux City book truck used in the hospitals. This was reproduced in the LIBRARY JOURNAL for January 1, p. 22. Rose O'Connor's "Two Hundred Books for Every-Day Use in the Hospitals," based on her practical experience as Hospital Librarian, has met with favor. The price of this list is fifteen cents.

The School Department, which had supplied class-room libraries for the outlying graded schools for several years was discontinued altogether in September, 1920, owing to the failure of the Board of Education and School authorities to co-operate with the Board of Library Trustees in helping to maintain this service.

MISSOURI

St. Louis. The Public Library opened its first branch in combination with a public school building on Friday evening, February 24. This branch, to be known as the Stix Branch, is located in the William Stix School building at 226 S. Euclid Avenue, and if it is successful other such branches will be established by arrangement between the Board of Education and the Public Library Board. The branch quarters were planned as part of the school building, with a separate outside entrance and with complete library equipment. The Board of Education gives the use of the space and furnishes light, heat and janitor service, while the Library supplies books and assistants, the branch being operated in all respects as if it were a branch library in a separate building. The furniture and equipment of the room were given by Mrs. William Stix, as a memorial to her late husband, after whom the school building is named. The ceremonies of opening the school and the library were held together and were attended by 3,500 persons. Addresses were made by President John C. Tobin, of the Board of Education, Vice-President John F. Lee, of the Library Board, Superintendent of Schools John J. Maddox, and Librarian Arthur E. Bostwick.

The second branch in a school building will be opened in the Buder school, in the outlying district of Southampton, in the near future.

OREGON

Portland. Perhaps the highest per capita circulation of any library in the United States was achieved by the Public Library of Multnomah County in the year ending October 31, 1921.

PUBLIC LIBRARIES

should contain the following recent Religious Books:

GOD UNKNOWN

A Study of the Addresses of St. Paul at Athens. By CHARLES SEARS BALDWIN, Professor at Columbia University. Cloth, \$1.00. Postage about 8 cts.

Intended especially as intellectual balance for college students and other men. The Boston *Transcript* says: "One feels grateful for such an intellectual and scholarly work as that of the author of this small volume, who has made real one of the most famous events of ancient times."

THE GOOD NEWS

By BERNARD IDDINGS BELL, President of St. Stephen's College, Author of "Right and Wrong After the War." Cloth, \$1.35. Postage about 10 cts.

Speaking of his experiences as Chaplain at the great Lakes during the war, President Bell says in his Preface: "Perhaps four-fifths of the men I knew at Great Lakes were quite uninterested, at least from any vital viewpoint, in any definite religion. . . The discovery I made, which came to me at once as a challenge and as an encouragement, was that most of the non-interest was due, not to deliberate disbelief or even to indifference, but rather to plain ignorance. They had, for the most part, scarcely any idea what the Christian religion was all about. . . The chapters of this book came into being in barracks talk. They were not made in one sitting. They grew. Later on, after the war was over, I gathered them together and wrote them down. . . I have endeavored to use a minimum of theological terminology. . . I have tried my best to talk the language of the twentieth century."

ARTHUR R. WOMRATH, Inc.

Public Library Department

21 West 45th St.—Fifth Floor N. Y. City

when 2,037,545 books were circulated among a population of 275,898. The gain over the previous year was 326,330, or 19 per cent. In 1901 the circulation of books was 50,351, and the number of volumes in the library 38,692. There are now 331,846. The year's additions numbered 27,749, of which 23,003 were purchased at a cost of \$32,876. Binding and periodical subscriptions raised the total to \$53,221. Salaries required \$184,169 of the receipts of \$295,054, which included \$245,335 from taxation and \$11,000 from fines.

The book wagon started in the summer of 1920 made weekly trips into the county over five different routes during the summer months, also stopping at three of the large city play-

grounds. The number of stations in operation during the year was 41 as against 25 the year before, while the number of books circulated thru deposit stations advanced to 30,090, a gain of 5,302. Including the book wagon, the circulation of the stations department totaled 39,074 for the year. A new branch building was constructed and placed in commission in South Portland at a cost of \$18,491.

A series of articles published in the *Oregon Journal* describing activities and phases of the library's work ran for a month, evoking interest and favorable comment. Six students were graduated from the training class, discontinued in July during Miss Sawyer's leave of absence for a year, and are all on the staff of the library.

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

THE United States Civil Service Commission announces an open competitive examination for information assistant. Vacancies under the Federal Board for Vocational Education at \$2,400 to \$3,600 a year, and in positions requiring similar qualifications, at these or higher or lower salaries, will be filled with this examination.

The duties consist of popularizing the activities and purposes of the Federal Board for Vocational Education thru magazines, trade journals, and the daily press and of winning public co-operation for the cause of vocational education and rehabilitation of persons disabled in industry or otherwise.

Competitors will not be required to report for examination at any place, but will be rated: (1.) Education and experience, 60 weights; and (2.) Published paper or magazine and newspaper articles prepared by the applicant, to be submitted with the application, 40 weights.

Applicants should at once apply for Form 2118, stating the title of the examination desired (information assistant) to the Civil Service Commission, Washington, D. C., and in other cities in the United States and territorial possessions.

The Tacoma Public Library has two vacancies in its central circulation department, one in the grade of junior assistant (salary schedule \$75-\$100 per month), and one in the grade of senior assistant (salary schedule \$100-\$120 per month.) Qualified applicants interested in spending a year or more in the Puget Sound country and at the gateway to Rainier National Park, apply to John B. Kaiser, librarian.

POSITIONS WANTED

Young woman, library school graduate, with two years' experience, wants a position in public, college or special library. M. L. 6.

Young lady, with good training and five years' varied experience, wants position as cataloger or general assistant in public or college library. C. H. 6.

Library school graduate, several years experience in public and college libraries, wishes position for summer, June 15th to Sept. 1st. New York City or vicinity. G. A.

Librarian, of several years' experience both as librarian and teacher, seeks position in college or school library. College graduate, graduate student of education. D. K. 6.

College graduate with eighteen years' experience in library work and special course in cataloging and reference work wants position as assistant in public or college library. Salary \$1,800. L. C. 6.

Trained librarian and university graduate, with nine years' experience in charge of a college library and with high school teaching experience, wishes a position as high school or small college librarian, or that of reference librarian in a larger school or college library. Salary, \$1800 for ten months. Prefers middle west. L. Y. 6.

Position of responsibility wanted in college, special, or public library, by librarian with year's training, M. A. degree, and four years' experience in public, university, and high school libraries, also teaching experience. Reference or research work preferred. Present salary \$2200. Western states or New York City preferred. L. V. N.

COMPULSORY SCHOOL ATTENDANCE AND CHILD LABOR

By FOREST C. ENSIGN, Ph.D.

Professor of Education in the State University
of Iowa

A study of the development of regulations
compelling attendance at school and limiting the
labor of children.

"Certainly the most scientific study that has
been made in this field."—*Journal of Education.*

An interesting and historically accurate presen-
tation of the foundations of modern legislation
in behalf of children.

A graphic description of the early national
period of non-enforceable legislation.

A scientific study of the most effective modern
laws as exhibited in a group of progressive
states.

Used successfully by Women's Clubs and other
organizations interested in Child Welfare.

A valuable book for teachers of Education or
Political and Social Science, for research students,
welfare workers, school superintendents, and at-
tendance officers.

White Eggshell book paper. Cloth. IX+ 263
pages. Postpaid \$2.50.

BAILEY, Loa, 1907-08 S., has been since last September the educational assistant in the 6th Division of the Navy. Her present address is 702 19th Street, N. W., Washington.

BOSWORTH, Harriet E., 1918 S., appointed first assistant to the cataloger of the State University of Indiana, Bloomington, Indiana.

BOWMAN, Marion, 1917 S., is temporarily employed on a piece of organizing at the Medfield State Hospital, Harding, Mass.

DWIGHT, Reba, 1920 L. A., has been appointed to a temporary position in the children's room of the Library of Hawaii in Honolulu. After June 1, she will be children's librarian for the county of Hawaii, with headquarters at Hilo.

HURLBUTT, Isabelle, 1916 S., is now vice-librarian of the Washington County Free Library at Hagerstown, Maryland.

JOHNSTON, W. Dawson, director of the American Library in Paris has offered his services to the National Association of Book Publishers to help the distribution of American literature in Europe. The Association has gladly accepted and is suggesting to its members to keep in touch with Dr. Johnston who will be glad to receive books for reviewing in English and French newspapers.

JONES, Carrie, 1919 S., appointed head of the catalog department at the University of Idaho, at Moscow.

LOVIS, Marion, 1909 S., appointed librarian of the Hutchins Intermediate School in Detroit.

MCCARTHY, Mary, 1914 S., is temporarily doing editorial work on a Catalog of Standardized

Plant Names, which is being brought out by Mr. Harlan P. Kelsey, Secretary of the American Joint Committee on Horticultural Nomenclature. Mr. Kelsey's office is at Salem, Massachusetts.

NELSON, Ina Forrest, 1904 D., formerly instructor at the Riverside Library Service School, and recently librarian at Oxford University, Miami, O., is cataloger in Leland Stanford University Library.

PATTERSON, Sarah, formerly of the University of Illinois Library and for the past two years on the staff of the Riverside (Calif.) Public Library, has been appointed assistant librarian in the University of California, Southern Branch, Los Angeles.

RULON, Elva E., 1907 P., librarian of the State Normal School, Peru, Neb., has resigned to join the staff of the University of Iowa Library.

STEVENSON, Burton E., author, librarian of the Chillicothe (O.) Public Library and representative of the A. L. A. in Paris and Coblenz during the most strenuous period of the library war service "has sailed," says the Boston *American*, "for Constantine, Algeria, where he is to join a special French military expedition headed by Colonel J. Maurice. . . . The commission is to visit . . . the . . . Auree Mountain regions, calling on tribal chiefs for the purpose of consolidating their support of their government."

WITTE, Edwin E., since 1917 secretary of the Wisconsin Industrial Commission becomes chief of the Legislative Reference Department of the Wisconsin Free Library Commission in April, succeeding the late Charles McCarthy.

Recent changes at the Smith College Library are: Frances B. Boone, chief of the department libraries, has resigned and is succeeded by Carol Burpee of the music department; and Edith Wells, cataloger, resigned, is succeeded by Elizabeth Leech.

Recent changes among Texas librarians include the following: Mrs. Frances R. Humprey, acting librarian of the Carnegie Library, San Antonio, appointed librarian; Rose Hutchenrider, acting librarian at the Waco Public Library, appointed reference librarian of the Dallas Public Library; Emily Kemp is librarian of the High School at El Paso; and Zona Peek of Sul Ross State Normal at Alpine. Rosa Belle Breedlove, librarian of Simmons College, Abilene, died last month of pneumonia.

SOCIALISM EXPOSED

A Scientific Treatise in Story Form

BY
George McCready Price and Robert B. Thurber

In a sane, unprejudiced manner the authors of this new book examine the character and trace the growth of the various socialistic and evolutionary theories which are abroad in the world. These theories are put to the TEST with astonishing results.

The story centers around a young man who mingles with men and women of other nations, with their ideas, and ideals. He returns home questioning, weighing opinions, seeking a more solid foundation of belief. Are old standards crumbling in the dust

before modernism? If so, what is the cause? Read this unusual narrative about MARRIAGE, THE MODERN HOME, THE LABOR QUESTION, EVOLUTION, etc. You will find it profoundly fascinating as well as instructive. 128 pages. 51 illustrations, many in colors. Single copy 25 cents, postpaid. In lots of 10 or more, 30 per cent discount.

Address—

SOUTHERN PUBLISHING ASSOCIATION
North Station, Nashville, Tennessee

The American Indian

By CLARK WISSLER \$5.00

Never before, we think, has so much authoritative information on the Indian race and its culture been presented in this highly attractive volume.

A Musical Pilgrim's Progress

By J. D. M. RORKE Net \$2.25

Written with candour and without convention this book records the psychological development of an amateur music lover. A charming book for anyone to whom music means more than sounding brass or tinkling cymbal.

Etruscan Tomb Paintings

By FREDERIK POULSEN \$5.65

A splendidly illustrated work describing the subject and significance of these paintings. Those who have read George Dennis's "Cities and Cemeteries of Etruria" will find here the illustrations so notably lacking in that work.

Wiltshire Essays

By MAURICE HEWLETT Net \$2.50

In a happy mood Mr. Hewlett says of these essays "they were all written in my county. Some of them deal with the doings of my neighbours as I view them from here; some deal with literature as I think about it here." Incidentally they make good reading for anybody anywhere.

OXFORD UNIVERSITY PRESS

American Branch

SHALL WAR GO ON?

Is Religion Directly or Indirectly
Responsible for War?

What Is Evolution? How Does It Work?

What Part Does "God" Play?

If these and a thousand other questions interest you, you will find them discussed by the author of **MENTAL EVOLUTION**. Among many subjects ably treated he contends to prove that Heaven or Hell is not a locality, other than existing as a locality from generation to generation. While laying due stress on physical science, it is, he believes, to mental or spiritual science that we must turn for results. Speaking of his book, Mr. King says: "This work is the result of over thirty years' experience and observation." He finds that thru the Mental being recognized over the Natural, man becomes healed. It is thru the Mental that longevity is acquired, not according to the general opinion thru Physical Science.

Send \$2.00 to-day by P. O. Money Order and receive this rational 20th Century Book of Knowledge. Postage Prepaid.

2 HIGH ST., ALBANY, N. Y.

CURRENT LIBRARY LITERATURE

Owing to inadequate funds the Library Association of Portland (Ore.) has been obliged to discontinue the publication of its bulletin with the December 1921 issue.

The Indianapolis Public Library during 1921 clipped 1535 publicity articles about the Library from newspapers and periodicals, chiefly city and community papers.

"Community English, a Book of Undertakings for Boys and Girls," by Mildred Buchanan Flag (Macmillan, \$1), has a chapter on the use of reference books. The matter is simply and attractively presented, and suggestions for contests and questions on the most useful reference books are included.

The fifth part of the fourth series of the "Classified Catalogue," of the Carnegie Library of Pittsburgh, is off the press. It includes the books in the class Literature (800) which were added to the Library from January 1912 to January 1917. This part contains 174 pages and is issued in sheet form ready for binding. The price is forty-five cents postpaid.

"Books on Printing" is a fourteen-page list of books and periodicals printed and presented to the Newark Free Public Library and Museum by the Master Printers' Association of Newark and the Club of Printing House Craftsmen on the occasion of the Printing Exhibit held in the library in February.

The list includes only a few of the books on the several subjects, the aim being to select those most interesting and valuable to a person making a study of the printing business.

A second edition of the classified annotated list of "Books by Catholic Authors in the Carnegie Library of Pittsburgh" has been issued. The catalog, first published in 1911, "owes its inception to a desire to present in convenient form a chosen list of books by authors of the Catholic faith for the benefit of those who do not feel sufficient confidence in their own knowledge to select from the library catalogs." The work of selecting the additions to the original catalog has been done by Librarian Agnes Schmidt of the Cathedral Library and her associates, and the final decision made by the Reverend Thomas F. Coakley, assistant director of the Conference of Catholic Charities of Pittsburgh diocese. This edition forms a volume of 325 pages. The price is fifty cents postpaid.

A group of "Constructive Aids in School Library Work" is offered by the A. L. A. as a contribution towards helping the school library to be "the heart of the school it serves."

Fundamental Principles are discussed in C. C. Certain's "Standard Library Organization and Equipment for Secondary Schools" (1920), which, being the report on library organization and equipment of the N. E. A. and of the North Central Association of Colleges and Secondary schools, embodies a constructive program; and in Gilbert O. Word's "High School Library" which is helpful to all school librarians.

Aids in Choosing Books are *The Booklist*, listing in each number about two hundred titles with full catalog information, "Booklist Books of 1921," including "about three hundred of the most usable books for the small library"; Caroline M. Hewins' "Books for Boys and Girls" (1915); Caroline Webster's "Buying List . . . for Small Libraries" (1920) which lists "not 'great' or 'best' books but wholesome standard classic and contemporary books" . . .; Martha Wilson's "Books for High Schools" (1914); and Frank K. Walter's "Periodicals for the Small Library" which annotates over one hundred titles, and includes a list of subscription agencies, etc.

To Stimulate Interest in Reading there are Sarah C. N. Bogle's "Children's Books for Christmas Presents" with descriptive notes, and two titles in the "Viewpoint" series, namely the lists in biography and in travel selected by Katherine Tappert and Josephine A. Rathbone respectively.

Amateur Plays are taken care of in Alice I. Hazeltine's "Plays for Children," which includes lists for special occasions.

Technical Aids are: "An apprentice course for small libraries prepared by the University of Wisconsin Library School faculty" (1917) and the following chapters of the preprint of the "A. L. A. Manual of Library Economy:" "Binding for Libraries" (1915), "Mending and Repair" (1921), "Pamphlets and Minor Library Material" (1917), "Cataloging for Small Libraries" (1915), and "Training for Librarianship" (1921).

This entire set published by the Association is offered for ten dollars.

The program of "Beyond the Horizon," recently produced by the Indianapolis Little Theatre Society, was accompanied by a list on the drama made by the Public Library.

That Delightful Story for Young People

THE LOST SONG

By PROF. LOREN S. NOBLITT
Principal of Zarephath Academy

Mr. Stanford, a musician, sailed away on a long journey. He had an unforgiving spirit toward his sister because of some dispute about a will. A great storm arose and drove the vessel far out of its course. And then something happened.

But Harold Stanford, the little son, was a musician, too. He thought his father had been drowned, but—

It can't all be told here.

Cloth, 260 pages, illustrated, \$1.00.

Mysteries of the Great Operas

By MAX HEINDEL

*FAUST, PARSIFAL, THE RING OF
THE NIEBELUNG, TANNHAUSER,
LOHENGRI*

The Secret Teachings concealed in the Great Myths as embodied in the major operas are here interpreted. The Evolutionary Plan and Methods of Spiritual Unfoldment are shown to lie hidden in the imagery of Folk Tales. The treatment of this subject adapts the book to the use of the Musician and Student of Folklore.

Bound in Cloth with the usual three colored with gold covers used on all Rosicrucian Fellowship Books.
\$2.00 Postfree

Fellowship Press, Box 18, Oceanside, California

"THE NEGRO STORY"

"William Henry Harrison, Jr., of Bethlehem, Pa., (820 Wyandotte Street), has issued a volume of 254 pages, which is a very remarkable record of the progress of the Negro race in America. The author with commendable restraint rarely yields to the temptation to expound in detail the repeated injustices that undeniably deface the account of the white man with the black in America."—PHILADELPHIA PUBLIC LEDGER.

"I have just had an opportunity to look through your Colored United States History. It is truly a remarkable compilation, not only because of its completeness and unique style but also because it is current and abreast of the times."

C. A. Barnett, Director, ASSOCIATED NEGRO PRESS.
400 subjects and 50 original poems, price \$1.60.

WILLIAM HENRY HARRISON, JR.
820 Wyandotte St., Bethlehem, Penna.

SIGNS AND WONDERS

By MRS. WOODWORTH-ETTER

It gives Life, Work and Sermons of Author, who has had forty-five years of experience, and is known by many as the Miracle Working Evangelist.

Scores and scores of people, hopelessly sick and afflicted with all manner of diseases, have been healed in her ministry.

It inspires faith in God and His Word and so will prove a great blessing in the home and library.

Abridged editions of it are out in English, French, Italian and a number of other languages. The book has nearly 600 pages and a copy of it may be had by addressing the author at 2114 Miller St., Indianapolis, Indiana.

Price \$1.65 postpaid. Special to librarians.

Hesterday

A Chronicle of Early Life in
the West. By Chas. E. Weller

Author of "The Early History of the Typewriter."

An attractive little volume of 200 pages, bound in olive green cloth, stamped in gold lettering, printed on first class book paper in 12 point type. The author in easy and graceful diction draws a graphic picture of country and small town life in the early years of the last century. A book for family reading that will hold the interest of the reader from beginning to end. Published for, and sold by the author. Mailed to any address, on receipt of \$1.50. Address

CHAS. E. WELLER,
No. 206 Masonic Temple, La Porte, Indiana

An Appreciation Worth Having

(from VICTOR HARRIS, *Musician, Composer, Conductor*)

OLIVER DITSON CO.:

I have just finished reading the two volumes of Russian Songs edited by Mr. Ernest Newman and published by your house. I hasten to send you my heartiest congratulations on the extraordinary success and value of these two volumes. They are edited in the highest judgment and published in the sumptuous and tasteful effectiveness which are the distinguishing marks of all the volumes of the **Musicians Library**. I am proud to say that I possess all the many volumes of the **Musicians Library** and nothing would tempt me to refrain from adding every new volume of the series as it appears.

The **Musicians Library** as it stands is a liberal education in itself; in fact, a Complete Education to the student of singing as well as to the public singer. It is the finest thing of its kind in the history of musical publications and I congratulate your house as well as the American public on the possession of so complete and satisfying a monument of your good taste and enterprise. Faithfully yours,
New York, Dec. 26, 1921. VICTOR HARRIS.

Art in the Public Library

By RICHARD F. BACH

Extension Secretary, American Federation of Arts

THE conception of art as a cultural asset is not a new one among librarians. Yet as an active factor in current methods of reaching the people it has not by any means received due attention in the public library. Its possibilities as a representative avenue of approach to an always larger body of library users and especially its collateral value as a "drawing card" for many whose interest will logically follow thru from exhibition to book shelves are beyond question. As a legitimate type of material to be regularly available, and in larger collections to be granted the attention of qualified custodians the field of art is gradually obtaining somewhat delayed recognition.

Prominence was given to this whole matter at last year's convention of the American Federation of Arts at Washington, when "Art in the Public Library" was a topic of discussion. Miss Mary Powell attacked the subject in an interesting manner, emphasizing the value of the public library as a point of contact for bringing art to the people, the importance of exhibitions in libraries, the responsibility of librarians in directing readers along art lines, and the importance of books in the library as aids for the development of industrial art, especially the function of the library as a depository for records of all public art activities and as a source of information toward their development.*

Other opinions are of decided interest in this connection, giving sidelights on practice and plain statements of findings. Dr. Frank Weitenkamp, chief of the Art and Prints Division, New York Public Library, makes this statement with his usual clearness and practical common sense:

"My own experience has been mainly in a large reference library, comprising also a print collection of some importance. Prints and print

exhibitions are worthy of separate treatment. There are other activities perhaps more within the scope of the circulating library, for instance, influencing the taste of the children, in co-operation with schools and museums. Then there is the matter of the technique of the art librarian's activities—acquisition and use of books, collection and classification of pictures, indexing of chapters and pictures in books, not only in the art department but in the whole library, which thus is more or less directly at the art department's disposal. The classes a public art library serves are many and varied: painters, sculptors, illustrators, designers, art students, actors, scenic artists, "movie people," and others who come with questions that can be answered with pictures. It is in that direction that our activities are mainly enlisted. The scholars, the serious students of the historical development of art, are not numerous, altho we make the fullest possible provision for them. The art department of a large library well illustrates the intimate relation of art to business. Art is a business asset, which has hardly been well exploited. If fears be felt as to the commercialization of art, the reassuring answer is that it is precisely art which usually has not been commercialized, but an inferior surrogate.

"Along with designers in the various branches of applied and decorative art who know their business, there come to us alone those who do not, but who in place of proper and thoro training have the desire to 'put it over,'—a thing they often may accomplish with more or less cleverness. Our collections, as often as not, serve not so much as an inspiration to consciously directed effort, but rather as a *pons asinorum* for untrained workers driven to speed in the hunt for the novel. Obviously this has relation to the movement for better training of designers, which again is part of the bigger educational movement. This involves a change of attitude toward life. All of that takes much

* This paper will appear in full in the American Magazine of Art for May 1922, obtainable thru Miss Leila Mechlin, Editor, 1741 New York Avenue, Washington, D. C.

time and work and patience. What can the art librarian do about it?

"Our influence must in the main be exerted indirectly. It is all very well to assume the pedagogic attitude, but to exercise the educational function within the library walls is another matter. We 'deliver the goods,' but they are used according to the user's capabilities. How can we aid in bringing about such a state of affairs that a still greater, more thoro and intelligent use is made of the treasures in our books? We can exert some influence, incidentally and unobtrusively, in the course of our daily work. In helping the searcher for the new, we may help to the new that is good. And while recognizing art's function as an expression of its time, we can yet point to that art of the past whose basic importance must ever be considered. But to a considerable extent our aid will probably be given outside of the library walls, in the rôle of propagandist rather than of mentor. This agitative activity will be exerted in co-operation with those manufacturers, merchants, teachers and designers who realize the necessity for it, and it will at the same time benefit us by bringing us into more direct contact with the outer world. Thus, perhaps, can we librarians do our share in promoting those arts which enter so intimately into daily life."

Mr. Samuel H. Ranck, of the Grand Rapids Public Library, writes:

"During the last 15 years we have used the walls of our corridors and lecture room for various exhibition purposes. We did this primarily because the walls were there, and it seemed a shame that they should not be used to the fullest advantage. Primarily, of course, our interest and work is in the promotion and use of books in the public library. First of all I have always told our Board and the people in this community that the time and money which we put into our exhibitions are more than justified by the publicity which comes to the work of the library in general. We have had an attendance at these exhibitions of some 650,000 persons, and they have been the means of getting into our main library building a large number of people who ordinarily would not come to use it, and to that extent they have become better acquainted with our other work, and felt that they were getting something from the Library at the same time. In this way we have gained a certain amount of good-will, which, to a library, like every other public institution, is a matter of importance.

We have made these exhibitions, of course, worth while in and of themselves, and in connection with them we have made it a means of

calling public attention to art books, periodicals, etc. We have built up here a large collection of books on furniture and interior decoration, which is really an art library. We also have an income from an endowment fund for the purchase of books by and about American painters which has enabled us to get practically everything on this subject which has appeared in print. All of this means that the Library has fostered directly an interest in art, and helped the public to a better understanding and appreciation of art subjects.

"I am of the opinion that in the smaller communities the people can get very much more for their money in the way of art development and art education by combining their efforts with the public library than with a separate institution. The overhead expenses are very much less, and altogether the work can be done at a minimum of expense. Outside of the purchase of art books and magazines in this Library, the promotion of an interest in art thru exhibitions, lectures, etc., does not cost us more than about \$1000 a year, and a number of years we have had an attendance at the exhibitions of over 50,000 in the year.

"It seems to me that it would be advisable for the American Federation of Arts to recommend in the smaller communities especially that in erecting library buildings, provision be made for taking care of the art education of the community, for by so doing, much more can be accomplished for the money that it is possible for the community to expend than by maintaining two organizations or institutions."

Mr. William F. Seward of the Binghamton, N. Y., Library, states that "since our opening in 1904 we have sought to develop the art sense in the community by the use of art books for reference and circulation and by the utilization of its adequate art gallery. Several exhibits have been given annually, including the drawing work of pupils in the public schools, the work of local artists and architects. The Library has also placed on exhibit from time to time selections from its own collection of important plates consisting of modern architectural drawings, advertising posters, European costume designs and French war posters. Other exhibits have included: wood engravings, paintings by American artists, and Japanese prints.

"As a result, in part, perhaps, of this continuous bringing before the community the high place of art in daily life, there has now been organized, with headquarters at the Public Library, the Binghamton Society of Fine Arts and Crafts. As its name indicates, its aim covers all the fine arts, including music and drama. Art instruction will be given. An out-door sketch

club is under way, acquiring material for an exhibit in the fall. The association contemplates as its immediate program exhibits from time to time of the best material obtainable and lectures by qualified speakers.

From Des Moines comes the statement of Miss Louise Orwig that the Art Library of the Des Moines Public Library is now a special department with its own room and owning a group of circulating pictures on many subjects such as costumes, design of all kinds, interior decoration and the like. An Art Gallery is maintained by the Library; the pictures exhibited are brought to the City by the Des Moines Asso-

ciation of Fine Arts. A number of paintings which were purchased by the Fine Art Association are hung in the corridors. The Art Librarian is also acting secretary for the Fine Arts Association and has charge of the two rooms. Teachers are encouraged to bring their pupils and special talks are arranged for them. Club women and study clubs are invited to use the rooms.

From all of which it will appear that the matter of Art in the Public Library is a live topic, and one represented furthermore by a considerable public interest which in library practice is tantamount to public demand.

What the Library Can Do for the Student*

IN the early days of the League there was little opportunity to see books that might help us. To-day, the library has become an indispensable aid. Your school gives you technique, a necessary matter, but a means to an end. Technique alone is a sorry matter. On the other hand, the artist's expression and his means of expressing himself are inseparable. The medium leaves its impress on a work of art because it has limits to be respected and possibilities to be utilized. The library can help by its reproductions of the best examples.

From the art-student body will come not only painters and sculptors, but illustrators, designers of costumes, advertisements, stage scenery, furniture, jewelry and the numerous products of applied and decorative art. Designers in all these branches come to the library as to a laboratory. The teacher puts you on your feet, but you must do the walking. You can be taught the technique of illustrating, but you cannot be turned into an illustrator without further study on your own part. Nor can you become a good cartoonist simply by reading a volume on "how to build a comic strip"; it is sad to see how many boys come to the library with the apparent idea that you can.

This is the day of novelty of any kind, at any cost. Tradition is taboo. But you cannot get away from the past any more than you can spring into the air and stay there seated on nothing. Of course it's a matter of assimilation, not of copying, for art should be of its time. These things have to be understood, and the library helps here, too.

This is the day of the easy way, of mental indolence. Have I not on my desk an advertisement: "Become an artist. No talent needed"?

And are there not schools of applied art that promise a job after three months' tuition? Compare that with foreign methods. There is no easy way. "Getting by" is not getting there. To deliver the goods you must have the goods to deliver, and the library will help you get them.

Trained designers are badly needed, designers who know their job and the history of it. It is disheartening to get requests from those who must have their material absolutely fitted to hand, who cannot, for example, translate a wash drawing into pen-and-ink. Wild attempts to get something new by scurrying aimlessly thru book after book are not exhilarating to the observer. Copying it is, nothing else. We cannot prevent such things at the library. We have the stuff to help the reader help himself. But we are not a school, not a kindergarten.

The library helps students singly and in classes, sets aside tables for them with selections of illustrated books on the problem given by the instructor. It can help you also when you have gone into the world to turn your studies into results. It aims to answer any query that can be answered with a picture. People have asked at the New York Public Library for blunderbuss, Cleopatra, locomotive chimneys, lyre, papposes, mediæval shop fronts, spinning wheels, stage coaches, trees, windmills, and so on down a list that taxes the resources of our picture collection and of a catalog which points to pictures in books all over the library, not only in the Art Division.

Contact with your public is essential. Art is the expression of experience. Experience is interwoven with experience of others. Its expression implies sympathy, and that, again, service. Art should have contact with its time and express it at its best. Even here, the library should help you.

*Summary of talk on "How Can the Library Help You in Your Studies?" before Art Students' League, New York, Feb. 25, 1922.

Missouri Book Week's Success

MISSOURI Book Week was observed in the state from February 12 to 18. It was sponsored by the Missouri Library Association, and the dates were chosen early in the year in order to give such impetus as was possible to the establishment of county libraries in the state. A county library law was passed by the last Missouri legislature and the first opportunity for voting on such establishment is early in April. The particular dates in February were selected in order to include Lincoln's Birthday, as it seemed especially appropriate that the significance of books should be emphasized at that time.

An outline of suggestions for conducting Book Week was sent by the committee in charge to librarians previous to February 12th.

According to the reports received, thirty-three communities took a more or less active part in Book Week. A proclamation issued by the Governor setting aside Book Week added greatly to its success. Newspapers gave wide publicity to the proclamation as well as to other Book Week news. Many editorials as well as news items were printed. A number of releases were sent out by the Committee to libraries and also directly to newspapers. These were used pretty extensively, having been put in such form that they could be adapted to local news items. The best publicity, naturally, was that concerning local Book Week activities.

Many book stores co-operated actively, making window displays appropriate to Book Week and using their advertising space in the newspapers to call attention to the Week. The Doubleday-Page store in St. Louis offered a prize of twenty-five dollars in books for the best list of fifty books for a home library. Book talks were given in the schools by librarians and teachers and ministers in many churches emphasized the influence of books in their sermons on February 12th.

Mention should be made of several libraries which were especially successful in Book Week publicity. Miss Jean E. Cameron, librarian of the Sedalia Public Library, reports good newspaper publicity and the clippings secured bear testimony to this. The ministers were requested to make special mention of the value of books in their sermons February 12th. Effort was made by the library to enlarge the circulation in the schools and the principal of the school spoke to the children on the value of reading. Miss Cameron says, "At the library we held an exhibit of how to catalog a book, putting on a table all our tools and examples of each step, with a description of each typewritten on a

catalog card. This seemed to interest many people, who had no idea that 'library work was so hard.' We also asked each one to write on a slip of paper, and deposit in a box for that purpose, the name of the book he or she had read recently and liked best. The result was interesting and ranged all the way from 'Pilgrim's Progress' to 'Eminent Victorians' with 'Helen of the Old House' ahead."

From Columbia the report comes that the library has been reorganized and a nucleus has been formed for the establishment of a county library. Special credit is due Mr. Alphonso Johnson, Editor of the *Columbia Evening Missourian*, who gave unusual space in his paper for Book Week.

The public library of Hannibal, home of Mark Twain, did some very interesting things during Book Week in addition to getting good newspaper publicity. In all, there were nine articles in the Hannibal newspapers. Miss Helen D. Birch, the librarian, says, "We decided to try to push advertising during the Week and to have Open House. We have a panel of posters, so I took one to each school for display. One member of the library board put up posters in the windows of the stores. We did not have as many people or as many library strangers as I hoped we would have, but I believe it was worth while. About two hundred and thirty people were here during Open House hours. But I think we would have been able to get more if we could have had time to arrange a program."

Thru all the publicity, special emphasis was given to the need of the extension of libraries in Missouri. The fact that eighty-nine counties in the state have no free tax-supported libraries and the fact that the Library Commission estimates two million people in Missouri without library facilities were brought out in all the news releases. These facts called forth editorials from the large city dailies as well as from the papers in smaller communities. Three out of four of the St. Louis papers published editorials endorsing Book Week and the movement for county libraries. It is too early to tell with any degree of accuracy the permanent benefit from Book Week publicity but there are already signs that it has stimulated some communities and counties to a new interest in the extension and betterment of libraries.

The Committee in charge consisted of Miss Jean E. Cameron, of the Sedalia Public Library. Mr. E. Lucas, of the Missouri Store Company, at Columbia, and Charles H. Compton of the St. Louis Public Library.

CHARLES H. COMPTON.

Pictures in Business

A PICTURE file, or if you prefer, a picture "morgue" is really more fun than work.

The Business Branch of the Indianapolis Public Library spent its first years in building up its collection of books, seeing that the most suitable magazines and trade and financial papers were on its reading tables, assembling all the city, telephone and special and general trade directories possible without spending too much money, collecting maps and statistics, and keeping on the lookout for good pamphlet material which could be procured free or at small cost for its files.

So busy was it that little attention was paid to the occasional calls that came in for a good picture, say, of a "log cabin of pioneer days," "baby polar bears facing front so that you can see their expression," "a team of horses coming up over a hill to illustrate team work," "Babe Ruth," "San Francisco Harbor," "how a little Japanese girl wears her hair." If the request for a picture could not be readily met from a book, it was transferred to the Central Library—six blocks away—which boasts two picture files, one largely designed for the use of teachers and school children and the other, in the Art Department, for artists and art lovers.

But the Business Branch presently saw its opportunity to build up a picture file a little different from the others, one which would meet a direct need of the commercial artists and advertising men, who, day after day, had been sent away disappointed. And it is a very bad thing for a business library to do—to send away disappointed a young man who comes in confident that here is the very place where he is going to find just what he or his boss wants, take it back to the office and perhaps boast a bit of his prowess in running down the very model extremely necessary for a piece of hurry-up work.

Nothing clippable escapes from an up-to-date library without being clipped. So, when the picture file idea had been accepted, clipping for pictures was undertaken along with the clipping for statistics and general articles for the files, and in a year's time, the collection had grown to over 6000 pictures, of all kinds and sizes and all degrees of art and beauty and potential usefulness.

Very seldom is it necessary now to send a seeker away without something that will help him. Sometimes he has to combine two pictures to get his one. A man for whom a picture illustrating the process of placer mining was found, felt that the background in the picture was dreary and uninteresting, so a fine specimen

from the mountain picture group was furnished him and supplied just the ideal atmosphere in which a miner, he felt, should be found at work. This may not be art in its highest form, but it is service.

The dozen large envelopes which at first housed the pictures have given way to over three times as many main subjects and many of these have been sub-divided either into natural sub-groups or, as in the case of public characters, (authors, artists, etc.), alphabetically.

Each picture is roughly labeled with the subject with a china-marking pencil—particularly good for glazed surfaces—and the sub-topic, if any, also indicated. For example, a picture of an entrance hall is marked Interiors—Stairways and Halls. It might be more efficient to organize some numerical scheme of classification to correspond with the subjects so as to make their grouping and filing simpler and quicker. But as this picture file "just grewed," the original plan has been adhered to.

Here is the scheme of classification as it now stands, capable of further expansion by the addition of new subjects and the sub-division of those already started.

Besides serving the patrons of the Business Branch Library, the pictures have performed a further service as a source of good, lively material for exhibits and displays on the Branch bulletin boards, the captions of some of which will indicate their character: "The Appeal of Color," "House Organ Covers," "The Booklet—An Effective Medium," "Bank Publicity," "Letterheads," "Travel Publicity."

Some day this picture file will have to be weeded out and only the best retained. Perhaps the more enduring pictures will then be mounted so as to preserve them, as filing loosely

in envelopes does not always do. Perhaps a better classification scheme can be worked out and filing cases provided. But at present in its primitive state it is really doing the work, with but little expenditure of time and effort, no tools but a pair of scissors and a black pencil, no equipment but a long wooden box and some big manila envelopes.

ETHEL CLELAND, *Branch Librarian,
 Business Branch of the Indianapolis
 Public Library.*

Books Popular in February

THE six titles most in demand at the public libraries in February according to the April *Bookman* were:

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown.
 Helen of the Old House. Harold Bell Wright. Appleton.
 Her Father's Daughter. Gene Stratton-Porter. Doubleday.
 Main Street. Sinclair Lewis. Harcourt.
 The Pride of Palomar. Peter B. Kyne. Cosmopolitan.
 To the Last Man. Zane Grey. Harper.

GENERAL LITERATURE

The Outline of History. H. G. Wells. Macmillan.
 Queen Victoria. Lytton Strachey. Harcourt.
 The Mirrors of Washington. Anonymous. Putnam.
 The Mirrors of Downing Street. Anonymous. Putnam.
 The Americanization of Edward Bok. Edward Bok. Scribner.
 Margot Asquith: An Autobiography. Margot Asquith. Doran.

Best sellers of the month as reported by sixty-eight booksellers in fifty-three cities for *Books of the Month* were:

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown.
 To the Last Man. Zane Grey. Harper.
 The Sheik. Edith M. Hull. Small, Maynard.
 The Head of the House of Coombe. Frances Hodgson Burnett. Stokes.
 Cythera. Joseph Hergesheimer. Knopf.
 Brass. Charles G. Norris. Dutton.

GENERAL LITERATURE

The Outline of History. (Educational ed.) H. G. Wells. Macmillan.
 Mirrors of Washington. Anonymous. Putnam.
 The Story of Mankind. Hendrik W. Van Loon. Boni and Liveright.
 Queen Victoria. Lytton Strachey. Harcourt.
 Americanization of Edward Bok. Edward Bok. Scribner.
 The Cruise of the Kawa. Walter E. Traprock. Putnam.

In the March *American Review of Reviews* Marjorie Shuler writes on Community Campaigns for better books, in an article describing the methods used by various campaigns, both urban and rural, for securing funds and books for the advancement of public libraries. Among the campaigns referred to are those of Corvallis, Oregon; Caney Creek Community Center, in Knott County, Ky.; New York City; Cleveland; Indianapolis; Evanston, Ill.

Western Reserve Library School

By ALICE S. TYLER, Director.

TWO names are inseparably associated with the founding of the Library School of Western Reserve University—those of William Howard Brett, for thirty-four years librarian of the Cleveland Public Library and Charles Franklin Thwing, president of Western Reserve University.

Mr. Brett's keen, far-seeing vision of library service gave him an enthusiastic interest in the training of librarians for the enlarging field which he saw so rapidly developing. The need for capable, skilled librarians on his own staff convinced him of the general and wide-spread need for trained service. To quote him: "While a large measure of efficiency can undoubtedly be secured by experience in libraries of high grade, this cannot be done so rapidly, completely and thoroly as in a library school which aims to give a general knowledge of the whole field, with accurate instruction in methods of library work accompanied by practice. Those using the library have a right to expect prompt and efficient service. Such service can be given only by those with adequate training." Mr. Brett's constructive program for a widely extended library system for the City of Cleveland brought him in close touch with other educational agencies of the city, his conception constantly enlarging on the unity of the educational field in which libraries have an important part. He, therefore, proposed to President Thwing the establishment of a library school as one of the professional schools of the University, with the close co-operation of the Cleveland Public Library, which would provide, thru its branches and extension system, facilities for wide variety in practical work and thus giving adequate balance of the theoretical and practical.

President Thwing, with his comprehensive view of the educational field and his intimate contacts with the world of books, as educator and man of letters, was equally impressed with the desirability of establishing such a school, and heartily supported the proposal.

The Trustees of the University considered the matter favorably and the gift of a moderate endowment from Mr. Andrew Carnegie made it possible to open the School in October 1904. Mr. Brett served as Dean of the School from its founding until his death in August 1918, giving lectures on library administration and library history, inspiring faculty and students with his own high ideals and creating a spirit of practical idealism in the School, which continues as a tribute to his memory. Dr. Thwing, who has

recently resigned the presidency, has steadfastly and with sympathy and understanding, supported the policies of the School, recognizing the necessity for the occasional departure from academic traditions in the conduct of a school of this type, and rejoicing in the advancement of the profession of librarianship which seeks to make books vital factors in life.

The first director was Miss Electra C. Doren, whose careful and comprehensive plans for the organization and administration of the School, laid the foundations for sound future work. After two years she was succeeded by Miss Julia M. Whittlesey, who had been a member of the Faculty from the beginning, and she continued to strengthen and develop the courses as director and instructor until 1913, with one year's intermission when she was succeeded by the present director, Miss Alice S. Tyler. During Miss Whittlesey's absence in 1911-12, Miss Bessie Sargeant Smith was the acting director.

The ideals and standards of the School were maintained with devoted zeal by the first members of the Faculty: Miss Esther Crawford, Mr. E. C. Williams, Professor Allen D. Severance and Miss Linda A. Eastman, all resident members, and Professor Azariah S. Root, librarian of Oberlin College, and this year's President of the A. L. A., who has been a member of the Faculty since the organization of the School.

Miss Eastman, as vice-librarian of the Cleveland Public Library, was closely associated with the plans of the School in the formative years. As Mr. Brett's successor in the librarianship of that Library, her helpful co-operation has continued. This is manifested in her wise judgment as Library Counselor on the Faculty and the continuance of her lectures as Assistant Professor of Library Administration, while carrying the heavy responsibilities and problems of a great library system.

The minimum educational requirement for admission is the completion of a high school course or its equivalent. Entrance examinations were required of all applicants until 1918, since which time graduates of approved colleges, meeting the general requirements for admission, are accepted without entrance examinations.

The curriculum was originally planned for a two years' course, but due to financial limitations the senior year has never been realized, and the courses are arranged to give a balanced training of one year, which prepares students for general library work, with the need of public libraries especially in view, a certificate being

granted by the University. The subjects in the curriculum are those usually offered in a library school, being grouped under three general headings: Bibliographic, technical, and administrative. The School has been fortunate in having trained and experienced librarians from the staff of the Cleveland Public Library and the libraries of Western Reserve University, as lecturers on their special subjects or departments and also their valued supervision of the students' practice work. Thruout the year visiting librarians of wide experience lecture on special phases of library work.

A series of lectures on children's books has always been a part of the general library course, but special training was not offered until 1920. Library work with children had been recognized as a special field of library service, requiring certain personal qualifications as well as general and special training. The need of such assistants on the staff of the Cleveland Public Library had been so definite that that institution had provided its own course of training since 1909. In 1920 an agreement was made between the School and the Cleveland Public Library for continuing and extending that course as a special department of the School, under the supervision of Miss Effie L. Power, director of children's work in the Cleveland Public Library. This arrangement affords students unusual opportunity for practical work in the children's rooms of the Cleveland Library while taking the course at the School. Closely associated with this instruction is the lecture course on school libraries by Miss Annie Spencer Cutter, head of the School Department of the Public Library.

An open course of twelve weeks has been offered since the Spring of 1914, to provide an opportunity for those who are unable to spend an entire year in study, to attend lectures and to have such class work in the regular course as the character of the subjects permits. Altho various adjustments have had to be made in the original plan for this course, experienced librarians continue to be admitted.

Certificates for the completion of the general course have been granted to three hundred and thirty-one students, of whom five are men. Graduates are holding positions of responsibility in libraries thruout the United States and a few foreign countries; and the library development in the Hawaiian Islands has been largely in the hands of Reserve graduates. Two members of the first class were the first trained librarians employed in Honolulu and organized the work there, Miss Edna I. Allyn becoming the librarian of the Library of Hawaii, which has continued to develop under her administration, and

Mr. Ernest J. Reece, who became Librarian of Oahu College, Honolulu. There are now five graduates in the libraries of Hawaii.

The Alumni Association, with a large chapter in Cleveland, is in close and sympathetic touch with the School and aids it financially and otherwise. A students' loan fund of several hundred dollars is rendering valued service and at the last annual meeting of the Association, the Brett Endowment Fund, in memory of the beloved Dean of the School, was started and this continues to increase thru the devoted efforts of graduates.

The rapid development of American library activities has called for constant adjustments in the curriculum. It is aimed to make the one year course comprehensive, practical and flexible, while recognizing that the fundamentals of library organization and administration are sufficiently established to make the basis of instruction stable. In a general one year course there is little opportunity for specializing except in the character of the practical assignments, which are under supervision. Probably one of the most distinctive features in the founding of the School, was the incorporation of supervised practical work in the Cleveland libraries, as a part of the regular curriculum. When students show special aptitude for certain types of work, or expect to return to definite positions requiring special preparation, assignments for practice are made with this in view, with personal conferences regarding it.

Visits are made to many libraries in the city of Cleveland thruout the year and to libraries in other cities, thus providing a basis for comparison as to methods of administration and types of libraries.

Between the Lines

All kinds of women make me think of books:

Those richly bound are often found in sets
When all their value lies in outward looks,

The man who's fooled deserves just what he gets.

The lure of titles counts with dames and tomes,

And gaudy jackets give the wise a hint.

Good books and women both belong in homes—

Old-fashioned girls are nearly out of print.

The bold face type and those who set their caps

Are made that way so he who reads may run.

Though girls speak volumes as in book of chaps.

Still that is not the last comparison.

Some wives and books as mummies in a case,

Fulfill their purpose just by filling space.

CHARLES IRVING CORWIN in the *New York Sun*.

Indiana's Library Week, April 23-28

THE week of April 23rd has been chosen as Indiana Library Week.

The week, which was proposed by the retiring president of the Indiana Library Trustees Association, Mr. Edmund L. Craig of Evansville, at that Association's meeting last November, was unanimously adopted, and the new president of the I. L. T. A., Mrs. W. A. Denny of Anderson, was appointed chairman of a committee of five from that Association while Miss Winifred F. Ticer, president of the Indiana Library Association, appointed a committee of ten from her Association. These fifteen people together with the President and Secretary of the Public Library Commission formed the general Arrangements Committee. In December an Executive Committee was appointed consisting of Mrs. Denny, chairman; Mr. Hamilton, vice-chairman; Miss Gretta Smith of Indianapolis, secretary, also Miss Ticer and Mr. Rush. On the Advisory Council are the Governor, the State Superintendent of Education, the State Librarian, the State presidents of the Federation of Clubs and the League of Women Voters, the President of the State Normal College, Mr. Meredith Nicholson and other well known Indianians.

Governor Warren T. McCray (formerly President of the Public Library Board in his home town) has issued the following proclamation which has been released thru the Associated Press:

Whereas, "to spread the influence of good books is not simply a missionary work for human betterment, but a patriotic work in disseminating the principles in which democracy finds support and strength," and

Whereas, today as never before the well being of our state and the progress of our communities depends upon the vigor and effectiveness of our educational institutions, our public libraries as well as our schools, and

Whereas, the public library in Indiana and elsewhere has proven itself one of the most valuable social, spiritual, and practical forces in the life of any community, by fostering reflection, ideals and progress, and by stimulating the reading and assimilation of the best in books, the treasure chests of human aspiration and knowledge.

Therefore, in order that the citizens of Indiana may come to recognize more fully the value of books, reading and libraries, and that they may become more familiar with the advantages and needs of the public libraries in their own communities.

By virtue of my authority as governor of the State of Indiana, I, Warren T. McCray, do now designate the week of April 23-29, 1922, as "Indiana Library Week" and do urge the observance of this week in all parts of the state, I especially recommend that the Trustees of public libraries, librarians, teachers, and clergymen do their utmost to reach all in each community with the message and influence of good books.

WARREN T. MCCRAY, *Governor of Indiana.*

The expense of stationery and postage, less than \$100, will be met half and half by I. L. T. A. and I. L. A.

The Committee in addition to several general letters has sent out a three page communication with plans and suggestions for local adaptation and adoption. Newspaper copy in the shape of a half dozen "stories" which can be altered and tinged with local color, or used as basis for local inspiration were released late in March. These will cover in general the entire field of

"The Library as an Institution," "The Library and the Children," "The Library, its Value to the Practical Men," "How our Library is Used," "What our Library Needs," "Use your Library, You Pay for it," and "An Extension University," are some suggested topics.

The three general plans suggested for choice or combination are:

1. Publicity campaign, newspapers, tags, posters, benefits, talks, movie slides.

2. Library "at home" week. Receptions, meetings of all sorts, club talks on the library. The week divided into special days from Sunday, Church Day, to Saturday, Children's Day.

3. An appeal for books. Posters, talks, appeals for good books, scout collectors, school contests, bookstore discounts.

A dozen suggestions are as follows:

Library directors' endorsement.

Co-operation of prominent citizens and organizations.

Newspaper publicity.

Talks everywhere and before all sorts of organizations.

Exhibits, in library and store windows. Books by local authors, historical relics, worn out books, new or fascinating volumes.

Posters, home made, or school-prepared.

Contents, for book drive or in poster making.

Advertisement. Slips for enclosure, space in merchants ads.

Tags, for publicity rather than "benefit," hence seldom sold.

Library benefits, plays, athletic contests, concerts, bridge.

Club programs. Every gathering in April.

Library "at home." Open house. "What we do and how we do it" exhibits, contributions of flowers, music or printing, reference books talks.

The response has been surprising even to the most sanguine. Apparently all the libraries of the state have become as enthusiastic over the

plan and its possibilities as its backers. The only embarrassment has been the inability of Library Commission representatives to accept a place on all the programs of the week.

One librarian, in a town of eight hundred, reports thirty-five posters prepared by the beginning of March, many of them "revised" war posters, contests planned, library puzzles prepared, window exhibits, a joint reception of women's clubs, and a special large size edition of the local weekly for general distribution.

A county library reports that the local Kiwanis Club is taking over the program for the entire week and "will push it big." A city library has hired an advertising man to conduct

all the publicity. Two libraries were so enthusiastic that they could not wait. One of them in a town of 375 raised \$159 for its book fund during the week of February 11th, and the other is redecorating the entire library as a result of a benefit bridge party.

The entire plan is working splendidly in the state and there is no doubt that the 1922 "Indiana Library Week" will be a remarkable success. Over and over again we are hearing, "And it isn't only the actual gain in books and financial support that we will get, but it's the wonderful opportunity to kindle anew the inspiration of books, the realization of the value of the public library to the community."

Germany. Tariff. Copyright

APRIL 1 brings a change in the German book trade. The foreign schedules operative for the past year yield to new ones. During this time the group of countries with which the United States is bracketed have been charged twice the domestic price for publications issued since 1900. Under the *Verkaufsordnung für Auslandlieferungen* now adopted, publishers are required to enroll in one of two classes. The first will add one hundred per cent in American orders; the second, two hundred per cent. Most publishers have chosen the latter. If no choice be made, the cheaper class is prescribed.

This measure has a double aim. The one is to offset in part the continued depreciation of the Mark. Since the last revision of foreign terms, the paper Mark has fallen below a half cent from 1.6 cents.

The other purpose is to discourage irregular pricing abroad. Under the old rule of April 12, 1921, publishers might apply more than the regulation *Zuschlag* if they chose. That privilege is now cancelled, except by special permission of the Government, which is expected rarely to be given. This refers to pricing in Marks. The publishers may still fix special prices in foreign money, but the Government here, too, reserves a veto power, which may be exercised in case of effective competition. The number of those adopting this course has increased, especially in the sphere of science. Per contra, the one hundred per cent class will be mainly *belles lettres*—and small.

As heretofore periodicals may be exempt, at the publisher's pleasure. So also a volume with a domestic price above 300 Marks. Recognized school books and antiquaria are, as usual, a law to themselves. The *Ordnung* fails, finally, to apply to "Musikalien" and "Gegenstände des Kunstverlags." They are governed by their own organizations.

These measures seem justified. The domestic price of German books has apparently multiplied but five fold since 1914, tho the Mark has shrunk to less than one-fiftieth its normal value. During the past year the domestic advance has been about fifty per cent. The American price has doubled in Marks, but dropped thirty-three and one third per cent in dollars. The new rule, therefore, but restores the actual rates of early 1921.

The book sections of the Fordney Tariff Bill were rewritten in mid-March by the Senate Committee on Finance. The understanding is that the A. L. A. contentions have been allowed, with the possible exception of the present rate of fifteen per cent. Apparently only English books published within twenty years will, as heretofore, fail of the free list, tho there may be a duty on new bindings of old books. Librarians will not learn with equanimity that, when the publishers were asked to make their position plainer, they assented to the Fordney rate of twenty per cent, contrary to their earlier public declaration. Libraries remain exempt.

The copyright bill has not yet been introduced. The Chairman of the House Committee on Patents wished more information than its sponsors gave and specifically demanded proof, not yet forthcoming, that the printers, who are doubtless awaiting the outcome of the tariff contest, had assented to repeal of the manufacturing clause. No hearing may be expected soon, or any enactment this Session.

The New York Public Library in 1921

THE unprecedented increase in use of both the Reference Department and branches of the New York Public Library has been as much a matter of concern as a source of gratification to the directors of the library's work. The limit of accommodations for readers has frequently been approached in the past year at the Central Building, where twenty-four per cent more books were called for in the Main Reading Room than in 1920. The number of books issued for use in this room was 835,254, and it is probable that more than 600,000 readers consulted 1,800,000 volumes in all, if the books used from the open reference shelves are taken into account. The number of visitors to the building was 3,008,158 as compared to 2,696,709 in 1920.

The number of volumes issued for home use from the Circulation Department rose again above ten million, as before the war, in spite of the fact that the stock of books was enlarged by only 4,194 volumes, and many of those circulated were in such condition that they would not have been on the shelves at all if there had been sufficient funds to replace them. More than fifteen thousand books are idle because of insufficient binding funds. The entire circulation thru the 43 branch libraries, the Extension Division including six sub-branches, and the Library for the Blind, was 10,226,366.

In the Central Building the problem of insufficient shelving will soon be added to the question of finding seating accommodations for all readers. Altho the library has completed only its tenth year in the new building the accommodations for books were first planned in 1897, and have not been increased in amount since the final floor plans were fixed about 1900. The shelves now hold 1,468,521 books and pamphlets, as determined by actual count of each item made by members of the staff early last year, with additions since that time. The Circulation Department had 1,161,608 books at the end of the year, making a grand total of 2,630,129. The Reference Department purchased 15,953 volumes and 10,102 pamphlets, and received by gift 35,213 volumes and 58,528 pamphlets. The Circulation Department added 136,731 volumes, withdrew 132,537, and received by gift 12,998 volumes and 3,738 pamphlets.

The changes in staff in both departments have been fewer than in the last six or seven years, and it has been possible to devote more time to the perfection of organization and administrative methods and less to the training of newcomers. The Circulation Department was handicapped by lack of funds to provide substitutes for members of the staff absent thru illness.

The number of employes on the payroll on December 31, 1921, was 1,236, of whom 528 were in the Reference Department, 11 in the Municipal Reference Library, and 697 in the Circulation Department.

The disbursements of the Reference Department were \$979,221. Salaries required \$674,271; books and periodicals, \$49,972; binding, \$4,721; Central Building maintenance and repairs, \$189,987; books for Central Circulation Branch, \$12,100. In the Circulation Department \$833,684 was paid in salaries and wages and \$225,768 for books, periodicals, and binding from receipts of \$1,185,352.

The Economics Division, the Division of Science and Technology, and the Music Division were among those in which the staff and the available room for readers were often swamped by the increase in use. The three reading rooms of the Division of Science and Technology had 148,241 readers, a daily average of 406. The convenience to chemists of consolidating the collection of pure and applied chemistry has been apparent. The installation of a photostat machine in the stack adjacent will prevent much confusion and delay in the handling of patent records. The Division receives many calls from representatives of firms interested in developing and making use of natural resources and derived products.

Foreign exchange and the economic condition of foreign countries have been the foremost topics for investigation in the Economics Division. The pamphlet and clipping collection, containing 196 boxes of 15,000 pieces, has been of great use in this work. The gaps created by the war have been filled for all the more important French economic journals and most of the German.

In the Music Division 23,301 readers were recorded and were furnished with 61,478 volumes. The chief of the Division, Dr. Otto Kinkeldey, secured many interesting items in France, Spain, and Portugal. The C. H. Ditson Company and the Composers' Music Corporation of New York and the Universal Edition of Vienna have been generous with gifts. The collection of vocal and instrumental music belonging to the late James Gibbons Huneker was another valuable addition.

Registered readers in the Genealogy and Local History Division numbered 33,107, and 121,018 volumes and pamphlets were furnished them. The preparation of the festival and exhibit "America's Making," representing three centuries of immigrant contributions to the national life, enlisted teachers and school children in the search for material.

In the Manuscript Division 904 readers con-

sulted 1,417 volumes, 192 boxes, and 650 single pieces of manuscript. The purchase of outstanding interest was that of the correspondence of James Leander Cathcart, 1785-1806, as U. S. Consul at Tripoli and as Consul General to the Barbary States, about 400 pieces.

In the American History Division Wilberforce Eames continued his study of the typography of the first decade of the 16th century to determine from the type, the printers and places of printing of some of the early Americana, and has also spent much time in securing photostat negatives of the earliest printing done in American colonies and some of the western states, when it was possible to locate copies and seemed impossible to secure originals. The first year of printing in New York City has been completed and includes twenty-four different pieces containing over 140 pages, the originals of which are scattered among eleven widely separated libraries in the United States, England, and France. The reading rooms and the Map Room in especial were overcrowded. The staff of "Chronicles of America" has continued its work, with additional search for material for the moving-picture plays to be based on the series.

The Russian collection of the Slavonic Division was utilized in connection with a report on Far Eastern matters made for the Washington Conference on the Limitation of Armaments, and its resources were also drawn upon for assistance in producing several Russian plays. The Oriental Division notes among its readers many who have come from the East and are glad to find there many books and periodicals in their own particular languages which they would seek elsewhere in vain.

Visitors to the Print Gallery grew in number to 179,550. The Art and Prints Division found an increased demand for material on Spanish and South American architecture, interior decoration, furniture and painting. More architects have used the division, and the effect of the housing shortage was evident in the increased demand for material about small suburban homes.

The Newspaper Division receives currently 254 domestic papers and 121 from foreign countries. The average number of volumes used daily was 533.

The Children's Room in the Central Building has had visitors from the Orient, Europe, South America, the British colonies and Scandinavia to gather ideas from the work of the room. The total circulation of books to children from the Children's Rooms and thru the Extension Division was 3,966,590. The return of several

experienced children's librarians and the addition of others to the staff made it possible to revert to the pre-war custom of interchange between branch libraries of children's librarians and assistants.

The circulation of books in the Library of Blind was 36,817, the largest of any American library for the blind. About 150 music scores were borrowed each month.

The Interbranch Loan Office filled 68,760 of the 93,356 requests made. From the Central Reserve collection, shelved in the stacks of the Central Building, 21,084 volumes were borrowed. This collection, built up gradually from books unused in the branches, now proves invaluable to those branches which are struggling with inadequate book stocks.

The Municipal Reference Library maintained its usual activities, circulating 6,752 books, and acquiring numerous review books thru its publication of *Municipal Reference Library Notes*. Many of its bibliographies have had large circulation in typewritten form thru the Public Affairs Information Service.

An Appreciation Expressed in Books

AS a slight sign of appreciation of the support it has received from the Montclair (N. J.) public, the management of Unity Concert Course has, after conferences with the librarian, presented to the Montclair Public Library the following books dealing with the appreciation of music from the point of view of the hearer, also a number of volumes of songs and folk songs in the Musicians Library Series:

- Artcliffe, How to enjoy music.
- Bispham, David Bispham song book.
- Botsford, Folk songs of many peoples.
- Downes, Lure of music.
- Farnsworth, How to study music.
- Yvette Guilbert, How to sing a song.
- Hamilton, Music appreciation.
- Hamilton, Typical piano pieces and songs.
- Hague, Spanish-American folk songs.
- Lee, On listening to music.
- Luce, Canciones populares (folk songs of Spanish America).
- Mason, Music as a humanity.
- Mason, Contemporary composers.
- Montagu-Nathan, The orchestra and how to listen to it.
- Pollitt, Enjoyment of music.
- Pratt, Grove's dictionary of music and musicians. New volume.
- Saint-Saens, Musical memories.
- Sembrich, My favorite folk songs.
- Seymour, What music can do for you.
- Spalding, Music, an art and a language.

With the February number *The Capitol Eye* changed its name to *The Congressional Digest*. The address is Munsey Building, Washington. D. C.

Drive for Louvain Library Fund

SEVEN hundred American colleges and universities" says the *New York Times*, "will unite on Monday, April 3, in a week's drive to complete a fund of \$1,000,000 for the erection of a library at the Belgian University of Louvain to take the place of the historic structure destroyed by German armies.

"A new National Committee of the United States for the Restoration of the University of Louvain has been organized and includes educators, high churchmen of all denominations and prominent business men in all parts of the country. The campaign will be under the active direction of an executive committee, whose membership, announced yesterday, comprises President Nicholas Murray Butler of Columbia University, Chairman; Archbishop Patrick J. Hayes, Bishop William T. Manning, Justice Victor J. Dowling, Herbert Putnam, Librarian of Congress; George Barr Baker, Samuel R. Berton and Thomas W. Lamont.

"The National Committee, in addition to its work among the colleges, will endeavor to secure outside subscriptions. The previous American campaign yielded only about \$156,000, and in an appeal to the American people, signed by Dr. Butler and his associates, the nation was reminded of its duty to restore the Louvain Library. The committee requests that subscriptions be sent to the Secretary, Henry S. Haskell, 407 West 117th Street, New York."

The building* is thus described by the architects, Messrs Warren and Wetmore of New York, in an article in *Architecture* for March:

"The location is the Place du Peuple, by far the best and most imposing site in the city of Louvain. . . .

"The principal façade will consist of a covered arcade, which will serve as a general meeting-place for the students, over which is placed the main reading-room lighted by large windows.

"The material to be used is of local white stone and red brick, with blue-slate roof and

copper flashings, certain details of the façade being gilded, as is usual in monuments in Belgium.

"On the ground floor besides the arcade already mentioned will be a small museum for the treasures of the library, also the administrative offices.

"A monumental stairway leads to the second story, on which is the catalog and distributing room, situated in the very heart of the building, connecting the reading room (occupying the entire front) with the stack (occupying the entire rear), thus giving the most economical and efficient service possible. Twelve seminars or special study-rooms complete the building.

"The stacks have an eventual capacity of two million books, and the seating in the reading-room is for three hundred—

figures required by the university authorities.

"The façade is symbolical in composition and detail: in the central motive, interest centres on the figure of Notre Dame des Victories, supported by St. George and St. Michael crushing the Evil Spirits; above is a bas-relief representing the destruction of the old library, while underneath, crowning the doors leading to the three exterior pulpits, are busts of the heroes of the war: King Albert, Cardinal Mercier, and Queen Elizabeth. The coats of arms of Belgium and the United States are framed in the high balustrade which surrounds and crowns the building; in this balustrade is interwoven an inscription describing the destruction of the old library and the fact that the restoration is a gift of the American people.

"On the stepped gables at either end are commemorative tables and the heraldic animals of the allied powers: the eagle, the unicorn, the lion, the cock, etc.

"The tower crowned by the carillon, or chimes, so universal in all Flemish towns, typifies the voice of the university—the voice of Truth. It is supported on the four corners by the beasts or symbols of the Evangelists: the bull, the eagle, the angel, and the lion. Hourly, this carillon will ring forth the national airs of the nations who fought in the Great War. . . ."

The illustration of the tower is here reproduced by courtesy of the editor of *Architecture*.

Who Will Help Russian Librarians?

THE many librarians who met Madame L. Haffkin Hamburger during her visit to this country in 1914 will be glad to know that she is still alive and doing library work as principal of the State Institute for Library Science, formerly a division of Shaniavsky University in Moscow, and now reorganized as a separate institution. In a letter just received by Director E. H. Anderson of the New York Public Library Madame Hamburger writes:

"We have library courses, library information, library conferences, etc. For myself and my institution . . . the hardest thing is the absence of foreign library literature. May I ask you to put me again on your mailing list and if possible to send me all the publications and pictures of the New York Public Library issued since 1916—reports, bulletins, reading lists, etc.? Everything will be not only appreciated but immediately applied to our work, which has made considerable progress. We expect to have a great library convocation in a few months and American material is especially valuable for the exhibition. Therefore if you have some duplicate material from other libraries, or if you can inspire others to send us their publications as well, we will be very much obliged, and the Russian librarians, who are working under such adverse conditions and are dying from typhus and starvation, will at least see what results can be obtained by libraries in normal conditions. . . ."

Madame Hamburger adds that since 1920 very few books have been printed but that new activity in this field is now anticipated.

Replies to this appeal should be addressed to: Madame L. Haffkin Hamburger, principal, State Institute of Library Science, Meons Place, Moscow, Russia.

Where Loafing is a Torture

THREE loafers sentenced in Omaha on Friday, March 24, to ten days in the public library as an alternative to twenty days in jail have found life irksome and one is reported to have regretted not having chosen jail—and this on the second day of the "contact with culture." A second was looking forward to a bookless Sunday.

"Considering the case at this distance," says the *New York World*, "it seems to us that the carrying out of the Omaha sentence involved a clear instance of cruel and unusual punishment. It left Murphy and Willis and Hennessey with all of time on their hands and, according to their lights, nothing to do with it. If such a sentence is to be taken as a Police Court precedent, surely there should be specifications modi-

fying a liberty which in itself is a harshness of condition. A felon goes to prison and hard labor. Shall a small offender be compelled brutally to suffer loafing where it is tedious and a torture?"

"Under the rule of the humanities the Judge should have been obliged to prescribe occupation for his culprits of the library term; something cheerful like Zane Grey adventure reading if they were first offenders, a course of Ezra Pound poetry if they were habitués of the court. Anything to keep them from wandering guileless and guideless amid a maze of letters."

THE LIBRARY, LIKE THE BOOK STORE, WILL FEATURE OUT-DOOR BOOKS DURING THE COMING WEEKS, AND THE FIVE-COLOR POSTER WHICH THE YEAR-ROUND BOOKSELLING COMMITTEE (334 FIFTH AVENUE, NEW YORK) IS USING IN APRIL CAN BE USED TO ADVERTISE THESE WARES.

"Collezione dei Libri Italiani Moderni che Trovansi nella Libreria Pubblica della Città di Boston" is a list of books published (for the most part) in Italy since 1900, compiled by Mary H. Robins of the Catalog Department of the Boston Public Library. The principal works in all branches of literature are included even if the Library does not in all cases possess a recent edition. The list is broadly classified and there is an author index.

The Newberry's Typographical Treasures

IN *The Open Court* for August and December, 1921, John T. Bramhall has described some of the chief treasures of the Newberry Library and its typographical library, the John W. Wing Foundation.

John M. Wing came to Chicago in 1865 from Oswego, New York. He was given work as reporter on *Storey's Times*, where he quickly made good and was given the city editor's chair. His correspondence with eastern newspapers led to his engagement by the editor of the *Boston Herald* to conduct his son on a world tour, during which he bought many of the books which were left to the Newberry Library on his death in 1917, with a substantial fund for their care. Pierce Butler was placed in charge as custodian.

The books of the foundation range from block books to the productions of the Kelmescott Press and beyond. There is one block book: *Apocalypse* of S. Johannis, about 1450. Impressions of 48 blocks, each leaf being printed on one side only. Figures colored roughly by contemporary hand.

There are five Schoeffers in the library, one of which, a fine Thomas Aquinas of 1467, is the earliest dated book of European origin in the library.

The Wing library has a round dozen of fifteenth century Bibles, nine of them in Latin and three in German text. Of the former, two are from Strasburg without date, four from Venice, 1476 to 1480, two from Nuremberg and one from Basel. The German texts are from Cologne presses, in the Low German, Low Saxon, and Luebeck dialects. In the Newberry library proper there is a magnificent *Biblia Latina* printed by Franciscus Renner de Heilbrun on vellum, Venice, 1480, and bound by Grolier. Among the missals is a fine Plantin, notable as being one of the more recent productions of the old Antwerp press when it was under the management of the widow of François Moretus, bearing date of 1765. Another and older Plantin is an *Emblemata* of Andrea Alciati, 1577, with woodcuts and handsomely cut Greek and Latin text.

The first edition of the Nuremberg Chronicle (*Chronicum Liber, cum Figuris et Ymaginibus*. Nuremberg, Anton Koberger, 1493) has over 2,200 woodcuts, most of them executed by Michael Wohlgemuth, to whom Dürer was apprenticed in 1486. Among the Caxtons the *Chronicles of England* is notable. It is in the number 4 type, 182 pages, has no punctuation except the long comma, and no illustrations, as Cax-

ton did not begin the use of woodcuts until the year following the undertaking of the Chronicle. There is also the first and rarest edition of the *Tewrdannckh*, Nürnberg, 1517, the famous metrical romance written by Melchior Pfintzing between 1512 and 1516 for the amusement of the young king of Spain, afterwards the Emperor Charles the Fifth, and setting forth the chivalrous deeds of the emperor Maximilian the First.

The Florentine Homer of 1488, Bartolomeo Libri's first edition, in two volumes, is one of the gems of the collection, which also owns eleven fine Aldines. Aldus Manutius followed Libri in 1495. Perhaps the most notable is the *Hyperotomachia Poliphili* of Francesco Colonna, 1499, impressive from its size and the profusion of the illustrations, of which there are 168 of various sizes. A folio Dante from the press of Nicolaus Laurenti, of Florence (Laurenz of Breslau), 1481, is one of the earliest examples of the use of copperplates, and of the difficulties encountered in their printing with type. Three notable original primers of the art of printing strengthen the value of the collection as a typographical library: an exceptionally fine copy of the *Champ Fleury* of Geofroy Tory, Francis First's printer and bookbinder, 1529, the first book in any language to discuss letter design; *Albrecht Dürer's Underweysung der Messung*, Nurnberg, 1538; and *Joseph Moxon's Mechanik Exercises*, London, 1683, the first book in English to treat of letter design, as Dürer's book was the first in German.

The patriarch of the Wing Foundation collection is the *T'ung kien kang mu* of the Chinese Chu Hsi, being an abridgment of the *Mirror of History* which cost Se-ma Kuang nineteen years' labor in the eleventh century. The Foundation has a complete copy of this *editio princeps*, blockprinted in 1172. Mo Yu-Chi, the Chinese bibliographer, says that the printing-blocks were cut in 1172, that the printing was done on pure paper, that each page has eight lines with seventeen characters for each line. The library also has the Manchu translation of the Se-ma Kuang history in a Palace edition beautifully printed under the patronage of the Emperor K'ang Hi, in ninety-six sumptuous volumes in imperial yellow.

The Newberry's earliest printed book is the *T'ang Liu sien shêng wên tsi*, dated 1167, in twelve volumes, containing the poems and essays of Liu Tsung-yüan (A. D. 773-819), one

of the most celebrated poets of the T'ang Dynasty. The pages have twenty-six lines of twenty-three characters and are printed from a single block, three centuries before Gutenberg.

Further details of the library's extensive collection of East Asiatic works, assembled largely in 1907 by Dr. Berthold Laufer while conducting investigations in the Far East for the Field Museum of Natural History, are given in the second of Mr. Bramhall's articles in the *Open Court*. While the collection cannot be assumed to be complete in any section, says Dr. Laufer, "so much has been attained by including the majority of all important works that the student will be able to carry on serious and profound research in any of the branches enumerated, and it may therefore be considered a truly representative collection of the Chinese, Manchu, Tibetan, and Mongol literatures." There are over a thousand works, or over twenty-one thousand volumes. In Manchu literature Chicago has one of the richest collections in existence. Many works in Manchu, it is said, seem never to have been placed on the book-market and to have come out of the Palace in consequence of the panic following the death of the Emperor Kwang-su and of the Empress Dowager in 1908.

The Newberry copy of the Kanjur, or collection of the sacred books of Lamaism made by King Kri Song Tsan in the Eighth century, was printed at the monastery of Narthang (Tashilhunpo) in Central Tibet in 1742. Tibetan books are not ready-made, but printed only as ordered by the Abbot, the printing blocks being kept under lock and key in the temple and the shop opened but once a year. There is, accordingly, a great variety of paper and ink in the editions, but the Newberry copy is of the best in every particular. The Tibetan translations of the Buddhist scriptures are almost literal and prepared with the greatest care and accuracy, and as most of the Sanskrit originals are lost, they become a primary authentic source for the study of Buddhism. A scholar equally versed in Tibetan and Sanskrit and familiar with Buddhist style and terminology may even possibly restore the Sanskrit original from the reading of the Tibetan text.

The collection in the Newberry library represents Japanese with one hundred and forty-three works, Tibetan by three hundred and ten, Mongol by seventy-two, Manchu by sixty. The rest are in Chinese. "With such facilities for research, together with those now possessed by the John Crerar Library and the Field Museum, it is quite reasonable to say that Chicago may offer better opportunities for scholars in Oriental research than can now be offered in either Lhasa, Peking or Tokio," concludes Mr. Bramhall.

Inexpensive Markers for Catalog Drawers

PROBABLY nearly every librarian has at some time or other, decided that some system of marking card catalog drawers was necessary, beside the usual small alphabetizing label. A patron who has withdrawn several drawers for consultation, quite commonly replaces them wrongly.

Several of the larger libraries have added small metal emblems of varying shapes and colors, but the cost of such an equipment leaves it beyond the reach of a small library.

A device which works entirely satisfactorily, and which is much less expensive is the colored thumb tack, made by the Moore Push-Pin Company, Wayne Junction, Philadelphia. These tacks are in $\frac{3}{8}$ " and $\frac{5}{8}$ " diameters and are numbered as well as colored.

As our main catalog of one hundred and twenty drawers was in vertical columns of ten drawers each, we used Nos. 1 to 10 in red, 11 to 20 in white, 21 to 30 in blue, etc., attaching two tacks to each drawer—one in the lower left hand corner of the front face of the drawer, and the other on the edge of the case beside the first, so that the two tacks are almost touching. We find that a misplaced drawer "sticks out like a sore thumb." The total cost of equipping one hundred and seventy-one drawers was less than nine dollars.

WILLIAM R. SPRAGUE,
Assistant Librarian.

Library, C. A. S., Fort Monroe, Va.

Take Care of a Library Book

THE Springfield (Mass.) Library Association recently found that users of the library were decidedly more careful of the books after a bookmark bearing the following appeal was placed in outgoing books:

TAKE CARE OF A LIBRARY BOOK

How many people who use the library know that books have nearly doubled in price and that this increased cost seriously limits the number the library can buy? As the price goes up, the quality deteriorates; paper is poorer and bindings are weaker.

The amount of service a volume will give depends largely on the care it receives. A book that is carefully handled returns to the library in good condition for the next reader. A book that is dropped or soiled or has its back broken by careless handling is ready for the bindery, and so will not be available again for several weeks. Often books so treated must be thrown away and new copies bought.

If readers will use especial care in handling books, they will help themselves and the other fellow—themselves because the library will have more money to buy new books for them to read, and the other fellow because the book will reach him in better condition.

THE LIBRARY JOURNAL

TWICE-A-MONTH

APRIL 1, 1922

THE Conference of 1922 at Detroit will not have before it any burning questions which will excite dissension, and the common-sense program which has been outlined should utilize the working sessions to good purpose. The abuse of simultaneous meetings has, however, not been checked but has rather grown, so that there is talk of an "eight ring circus," and it will be harder than ever to get space as well as time for the many meetings and to decide to which the perplexed conferee shall give his, or rather her, attention. The first test will be made of the new system of election under which three nominations are made for each important office—which system does not seem to be working well. There is indeed danger that, as in civil service examinations for chief librarianships, eminent members of the profession will not care to come into competition for the offices, and declinations from one cause or another have kept the Committee on Nominations busy in filling gaps. The experiment, however, should be fairly tried before further impending revision of the Constitution comes before the Association.

★ ★ ★ ★ ★ ★ ★

DESPITE the action of the Secretary of War, who caused an item of \$60,000 for library service for the Army to be added to the \$20,000 for military post exchanges in the Army appropriation bill, there is possibility, indeed probability, that the welfare service for the Army in the library field will be not only crippled but actually come to an end. The Sub-Committee of the House Appropriations Committee dealing with the Army bill has not only cut out the \$60,000 but has reduced the minor appropriation to \$15,000 which would be exclusively for the purchase of books. It is now a library truism that service is even more important than books in all good library work, and to provide \$15,000 worth of books for haphazard use is to break away entirely from the carefully worked plan which the government practically accepted under the "gentleman's agreement" when the American Library Association turned over \$2,000,000 worth of property to Uncle Sam at the close of the war. Nothing could be more disappointing than this outcome, and it is to be hoped that the Senate may restore the \$60,000 item and

stand stoutly in conference committee for this welfare work. The Sub-Committee of the Appropriations Committee on the Navy has dealt with the Navy library appropriation in a more liberal spirit and has cut the original item only in proportion to the reduced strength proposed for the Navy. To this, no objection can reasonably be made, as the reduced appropriation can be utilized both to continue good service and to supply a reasonable quantity of books. Both Secretary Weeks and Secretary Denby have been cordial in their appreciation of library service, and it is to be hoped that the Secretary of War will obtain the same justice that has happily been accorded to the Secretary of the Navy in this respect. Both the Navy forces and the American Merchant Marine will have this branch of welfare work adequately conducted, and it is highly desirable that the Army ultimately receive as good attention.

★ ★ ★ ★ ★ ★ ★

THE national library of Cuba has for years been in such suspended animation that it has been impracticable for its colleagues, national or other libraries, to get in touch with it by correspondence. It is gratifying, therefore, to be able to announce that a new librarian, Senor Coronado, has been in charge for the past four months, having accepted office at the urgency of the Cuban President, and is making satisfactory progress in putting Cuba's national library on the library map. He found the library a chaotic mass, books and pamphlets indiscriminately jumbled on the floors, in worse condition than even our own national library in its most congested days in the Capitol. Order is already coming out of this chaos; a number, tho an insufficient number, of catalogers are busily at work, the Cervantes collection and the books of historic interest are being segregated, and a classification is being worked out, somewhat on the lines of the Library of Congress scheme. Senor Coronado was for many years a member of the Cuban revolutionary Junta, residing for seven years in New York, and he has caught the spirit of library enthusiasm to the full. He is to be welcomed to the ranks of active librarians, and it is to be hoped that the progress made by the national library will inspire further library development in Cuba.

LIBRARY ORGANIZATIONS

THE DETROIT CONFERENCE HOTELS

INFORMATION regarding hotels and registration is to be found in the *LIBRARY JOURNAL* for February 1, p. 126-127, and for March 15, p. 274.

It is highly important that reservations be made early as the Detroit hotels are very likely to be crowded during the conference. If the hotel to which you write cannot give you the accommodations you request, the hotel manager will turn your letter over to Adam Strohm, Secretary of the local committee.

MEETINGS

Plans for the general sessions of the A. L. A. are given in our March 15th number, p. 274.

During practically all the week except for the time reserved for the general sessions about eight group meetings will be held simultaneously. Tentative hours have been assigned these as follows:

AFFILIATED ORGANIZATIONS

Special Libraries Association. Four sessions are planned, the first being scheduled for Tuesday afternoon.

League of Library Commissions. Sessions are planned for Tuesday and Wednesday evenings.

American Association of Law Libraries. Program to be announced.

National Association of State Libraries. Meetings are planned for Wednesday afternoon and Thursday evening, also a joint meeting with the law librarians on Friday afternoon.

OTHER ORGANIZATIONS

The *Association of American Library Schools* will hold two meetings.

The *Bibliographical Society of America* will discuss the library resources for the history of the Great Lakes region. Time to be announced.

Library Workers Association. Program to be announced.

The *Michigan State Library Association* will hold a business meeting probably on Wednesday afternoon.

A. L. A. SECTION MEETINGS

Agricultural Libraries Section. Meetings are planned for Tuesday evening and Friday afternoon.

Catalog Section. Two meetings will be held, one some time on Tuesday, the other on Friday afternoon.

Children's Librarians Section. Meetings are planned for Tuesday and Wednesday afternoons. The section is also planning an exhibit of children's books.

College and Reference Section. Probably the main topic will be the ranking of librarians and assistants in colleges and universities. Time to be announced.

Lending Section. Meetings are planned for Friday and Saturday afternoons.

Professional Training Section. A meeting is scheduled for Tuesday evening.

School Libraries Section. Three meetings are planned: On Tuesday afternoon a round table (May Ingles of the Omaha High School of Commerce presiding) on the relationship of the library to different departments of the school; on Wednesday evening special speakers; and on Friday afternoon a round table for normal and elementary school librarians, with Bertha Hatch of Cleveland presiding.

Trustees Section. Meeting probably on Tuesday afternoon.

OTHER GROUPS

Meetings of other groups are tentatively scheduled as follows:

Library Buildings Round Table (Willis K. Stetson in charge). Probably Wednesday evening.

Librarians of Religion and Theology. Thursday evening.

Small Libraries Round Table. Tuesday evening.

Public Documents Round Table. Tuesday afternoon.

Training Class Instructors. Wednesday evening.

University Library Extension Service Round Table (Edith Thomas, Library Extension Service, University of Michigan, in charge), at 9.30 Thursday morning at the University of Michigan.

Work with the Foreign Born. In response to many requests, Eleanor E. Ledbetter, Cleveland Public Library, chairman of the A. L. A. Committee on Work with the Foreign Born, is arranging for a round table for discussion of practical problems, and invites suggestions.

RAILROAD RATES

One-way railroad fares and lower Pullman rates, from principal points to Detroit are shown below:

From	Rail Fare	Lower Berth
Albany, N. Y.	\$19.69	\$ 5.63
Atlanta, Ga.	26.68	8.25
Baltimore, Md.	21.55	6.38
Birmingham, Ala.	26.89	11.25
Boston, Mass.	26.92	7.50
Buffalo, N. Y.	9.00	3.00

*From Smith Falls. †Seat.

SPECIAL RATES

The Western, Central, Trunk Line, South-eastern, and New England Passenger Associations have granted a one and one-half fare for round trip to Detroit.

ATLANTIC CITY MEETING

THE 26th annual joint meeting of the New Jersey Library Association and the Pennsylvania Library Club will be held at the Hotel Chelsea, Atlantic City, on Friday and Saturday, April 28-29. The American Library Institute will also hold its annual meeting on Friday, April 28th.

The New Jersey Library Association will have two sessions: one, on Friday afternoon, will be the annual business meeting; the other, on Saturday morning, will be devoted to discussion of "Certification of Library Service." A joint meeting with the Pennsylvania Library Club will be held on Saturday evening when Francis Neilson will speak on "Conservatism, Liberalism and Radicalism" and Joseph Wharton Lippincott on "Truth in Literature."

At a meeting under the direction of the Pennsylvania Library Club on Friday evening Christopher Morley will describe "The Anatomy of Biblioprudence," Director John H. Leete will speak on "Our Appeal as a Profession" and G.

R. Prowell on "Washington and the Lost Diary."

The program for the American Library Institute's two sessions is tentatively announced as follows: Morning session—President's address, Clement W. Andrews; University Library Cooperation and Business Engineering, Ernest C. Richardson; Tariff and copyright legislation, M. Llewellyn Raney; Printed cards for monograph series, J. C. M. Hanson. Afternoon session—The Vatican Library, Theodore Wesley Koch; Proposed List of Union Periodicals, H. M. Lydenberg.

The rates at the Hotel Chelsea are the same this year as last, namely: 1 person in room (without bath) \$6.00 per day; 2 persons in room (without bath) each \$5.50 per day; one person in room (with bath) \$8.00 per day; 2 persons in room (with bath) each \$6.50 per day.

PENNSYLVANIA LIBRARY CLUB

AT a meeting of the Pennsylvania Library Club, held at the Historical Society of Pennsylvania, Philadelphia, on February 20, Hampton L. Carson, jurist, historian, teacher, and president of the Society, spoke on the Society's treasures. All races and all creeds came to Pennsylvania to take advantage of the broad principles of government laid down by William Penn. Pennsylvania was America in miniature. Helping one to visualize the tragedies and glories of those early days and the men who made them, are the valuable manuscripts, correspondence, relics and portraits housed in the building of the Society. The fine collection of manuscripts, comprising 7,000 volumes, and valued at \$4,000,000, includes numerous originals of treaties, documents and state papers that have no equal in value in any other collection on American history. The correspondence includes letters of George Washington, Thomas Jefferson, Benjamin Franklin, William Penn, and other celebrated men who made the beginning of history in Pennsylvania, and helped to organize the government of the United States. Among the relics of the Historical Society is the girdle worn by William Penn at the occasion upon which he consummated his famous treaty with the Indians, immortalized by Benjamin West's famous painting of that event.

Mr. Carson's address was full of delightful, human touches, that seemed to bring to life the famous sons of Pennsylvania, whose portraits hung upon the walls.

MARTHA LEE COPLIN, *Secretary*.

MASSACHUSETTS LIBRARY CLUB

THE 1922 winter meeting of the Massachusetts Library Club was held in the Lecture Hall of the Boston Public Library on February

3d, with President Harold T. Dougherty in the chair, and was opened with an address of welcome by Rev. Alexander Mann, president of the Board of Trustees of the Boston Public Library.

Greetings from the A. L. A. were extended by President Root who spoke briefly on the librarian's need of an educational outlook, and for the adoption of certification which is fundamental for advancement in professional work.

In conclusion, Professor Root stated it is his belief that we must individually have in view tasks which shall make a valuable contribution to the work of the world. Taking bibliography as an example, it is essential that the topic should be selected with care and that the compiler should know the subject. Work to be considered valuable in the field of bibliography must show not only titles but such knowledge that those who follow in the path of progress may be helped by the one who preceded.

At the business meeting which followed, the President announced that a committee of three, with Miss Alice M. Jordan as Chairman, had been appointed to work in co-operation with the New England School Library Association in connection with the meeting of the National Education Association in Boston during the coming summer. Attention was called to the vote of the Committee recommending that the Club become a Chapter member of the A. L. A., and it was voted that the recommendation be adopted.

A gift to the Club of a life insurance policy of \$500 from Miss J. Maud Campbell was announced. The President reported that, out of the amount which had been collected for the entertainment of the A. L. A. and which remained as a balance, two Liberty bonds of \$100 each had been turned over to the Special Libraries Association.

The Personal Service Committee, recently formed as a memorial of the late President of the Club, John G. Moulton, reported thru its Chairman, Katherine P. Loring. It is intended to have a small number of persons ready to help and advise any librarian who may be ill, or in distress, by the recommendation of a skilful surgeon or the proper hospital for specific treatment and furthermore to assist in procuring a "free bed" if necessary. The Committee would also undertake to suggest where legal advice could be obtained at reasonable rates and of reputable character. Lists of good places for rest, for vacation, or good lodgings in Boston and other cities would be kept. Every member of the Club is asked to co-operate with information about librarians who have met with misfortune and also by sending addresses of boarding places, homes, hospitals, etc., known to be good and moderate in price. Moderate financial aid

will be given in emergencies. Any application will be confidential.

In the evening eighty-six members of the Club and guests were present at a dinner at the Hotel Vendôme. After the dinner about seventy-five others came in for the evening's musical program.

The day's discussion of the place of music in the library was outlined in our last number.

FRANK H. WHITMORE, *Recorder.*

WESTERN MASSACHUSETTS LIBRARY CLUB

THE winter meeting of the Western Massachusetts Library Club held at Forbes Library, Northampton, on Thursday, March 9, 1922, President Harold A. Wooster, presiding, had an attendance of eighty-two members representing thirty libraries, and included the training classes of both Springfield and Westfield.

The morning session was mainly occupied by a discussion of the Club's annual booklist. This list is made up of about 120 titles recommended to small libraries from the publications of 1921. Each member offered criticism of a book and vigorous approval or dissent followed the presentation of some of the more prominent books.

The recommendation of the A. L. A. that appropriations on behalf of libraries should amount to one dollar per inhabitant was indorsed.

In the afternoon an address by John Spencer Bassett of Smith College on "Furor Politicus" presented interestingly the adverse treatment accorded by their contemporaries to those who now appear to us only in the light of eminent patriots. The language in which political opponents of Washington, Jefferson and Lincoln upbraided and denounced them makes the tone of political attack of the present day seem mild indeed. This treatment is to be attributed to "furor politicus," the state of mind induced by heated campaigns, and is related to that public frenzy in time of war which attributes every evil of purpose and method to the enemy and every virtue to the home side.

MERIBAH E. KEEFE, *Secretary.*

ST. LOUIS A. L. A. GROUP

THE St. Louis organization of local A. L. A. members has had two meetings this session. One held on October 29 at the Library of Washington University was attended by about forty members. After viewing the Library, including several of the special treasures of the collection, the members were entertained by Lulu M. Wescoat and Synnove Larsen of the Public Library staff. Miss Wescoat gave an account of the post-conference trip of the A. L. A. last summer, and

Miss Larsen of the Missouri State Conference at Ha Ha Tonka Park.

This visit to Washington University suggested to the Committee in charge of the following meeting the desirability of holding meetings in different libraries in the city in order to gain at first hand knowledge of the book resources of St. Louis and vicinity.

On February 17 by invitation of the Hon. Frederick W. Lehmann, about forty-five members met at his residence, where his large and interesting private collection of books was viewed, followed by an interesting talk by him on bookish subjects illustrated with some of the gems of his collection.

PASADENA LIBRARY CLUB

MORE than one hundred members of the Pasadena Library Club met on March 5 in the charming new Boys' and Girls' Library Building of the Pasadena Public Library.

As was most fitting, the subject for discussion was "Children's Books and Work with Children in the Library." Mary Oxley, librarian of the Boys' and Girls' Library, told of her work with the children; Katherine West spoke of her work with the children and teachers in the elementary schools; the trials and joys of a high school librarian were reviewed by Winifred Skinner, of the Pasadena High School Library; Alice Blanchard, supervisor of children's work in the Los Angeles Public Library spoke most inter-

estingly of the development of children's libraries and prophesied a bright future for them and the program closed with Jasmine Britton's delightful brief reviews of some of the outstanding children's books, many of which are as interesting to the grown-ups as to the children.

FRANCES H. SPINING, *Secretary*.

SAN ANTONIO LIBRARY CLUB

SAN ANTONIO Library Club members held their mid-winter meeting at the Pomona Public Library on February 18th, Miss K. A. Monroe of the Ontario Public Library presiding.

A talk on literary England by Miss Armstrong of Pomona High School reflected the experience of one who having known and loved the great writers thru their works, looked with seeing eyes upon their beloved haunts, and the pleasure of near association with Royalty was experienced as Sarah M. Jacobus ably reviewed Lytton Strachey's *Life of Queen Victoria*, which stimulates the perusal of other books about Victorians.

Thru the efforts of Victor E. Marriott of Pomona College Library, the libraries of the Club secured a twenty-five per cent discount on a recent purchase of catalog cards.

The forethought of Miss Jacobus in providing a table of Pomona's duplicate government pamphlets, resulted in the completion of files for some other libraries.

ISABEL M. NEALES, *Secretary*.

IN THE LIBRARY WORLD

NEW YORK

Brooklyn. The Brooklyn Public Library has in a bill recently passed by the New York State Legislature been included among enterprises for which provision can be made without regard to the debt limit of the city. This will permit of the completion of the new central building upon which work was begun several years ago.

Syracuse. Extension of the service of the Syracuse Public Library to Onondaga County was begun on March 17 when the Jamesville Home Bureau began to supply library service to Jamesville thru a contract with the Syracuse library.

In a recent note in the *LIBRARY JOURNAL* the circulation for 1921 was given as 368,159 (which represents the circulation thru the main library only) instead of 847,640.

Troy. The Troy Public Library, in common with many other libraries, experienced an inapplicable increase last year in the use of both adult and juvenile departments. Librarian Mary

L. Davis reports that the circulation in the main library jumped from 96,567 volumes in 1920 to 111,141 in 1921, and the East Side Branch circulated 3573 volumes in addition, altho opened only ten weeks before the end of the year. The library has 55,217 books. Its income in 1921 was \$28,190, and its salary roll \$8560.

MARYLAND

The Maryland Public Library Commission, thanks to an increased appropriation, has been able to afford the continuous services of an office secretary in addition to a field secretary during the biennium November 1919 to 1921. Its offices are still located in the State Normal School Building near Towson. In 1919-1920 one hundred and nineteen traveling libraries were shipped from the offices, and two public libraries were assisted to open.

During the last half of the biennium a library of 3,000 volumes was opened in Annapolis, and smaller libraries in Hyattsville and Ocean City.

The state has twenty-nine public libraries, and there are also seven subscription libraries. Thirty-three cases of books were received from the A. L. A. Library War Service, and the 3,100 volumes allotted to the Commission and the libraries of the state. Disbursements for two years amounted to \$7,262. A quarterly, *Maryland Library Notes*, was started last October. The Commission is requesting \$14,000 for the two to come, as it is anxious to procure more supplementary reading for school children.

DISTRICT OF COLUMBIA

Washington. The majority of the libraries of the Department of Agriculture continued work along the lines of previous years in the year ending June 30, 1921. These were the libraries of the Bureau of Chemistry, Bureau of Crop Estimates, Bureau of Entomology, Forest Service, Bureau of Plant Industry, and States Relations Service. The Bureau of Markets library, however, was entirely separated from the editorial work of the bureau, and the Dairy Division library was merged with the library work of the other offices of the Bureau of Animal Industry, with the exception of that of the Animal Husbandry Division. Part of the work of the Dairy Division library was the adding of 1,800 cards to the index to veterinary literature, now containing about 182,000 cards.

The circulation did not reach pre-war figures, altho 92,115 books and pamphlets and approximately 173,000 current periodicals were issued. The list of periodicals taken by the library includes 2,999 appearing not less than four times a year and 3,849 serials of less frequent issue. The number of titles prepared for printing by the Library of Congress in what is known as the "Agr." series, 1,724 in all, represented an increase of 286 over the previous year. The library has prepared 34,692 titles for printing since 1902, the year in which the printing of cards was begun. The loss of four of the cataloging force accounted for a large decrease in the output of the Cataloging Division, and lack of funds has prevented the appointment of a reference librarian, a post vacant since March, 1919.

VIRGINIA

Norfolk. The librarian of the Norfolk Public Library, Mary D. Pretlow, has been able to report that the library circulated more than 100,000 books for the first time in its history, in the year ending December 31, 1921. The complete figures were 110,138, about sixty per cent of which were taken from the main library; the remainder from the Van Wyck, Berkley and Blyden branches and one sub-station. Most of the expense of the new Berkley branch was as-

sumed by the Berkley Home and School League. The shelving was given by Colonna Bros. A branch for negroes was opened in a room loaned by the Booker Washington High School. The entire system now includes 35,616 volumes, and the registered borrowers number 25,929, or about one-fourth the population.

GEORGIA

A lending library on agricultural subjects was assembled by the Georgia Library Commission in its second year of active work, as promising the best results that could be obtained with its limited funds and facilities for handling traveling library work. The books were loaned to any citizen of Georgia for one month, at no expense except the return postage. A letter was sent to every farm agent in the state acquainting him with the service. The *Market Bulletin* gave space for frequent advertisements. In the last seven months of 1921, 402 packages of farm books, averaging two books to the package, were sent out. Books for teachers and children were purchased freely, bringing the book collection up to 4,719 volumes. Loans of 4,377 volumes were made to 129 counties of the state.

New libraries were established at Greensboro and La Grange by women's clubs, which have also begun rural library service in Thomas County without county appropriation. A \$25,000 library building was dedicated in Cedartown. Muscogee County made an appropriation of \$1200 to the Carnegie Library of Columbus for county work. The Seaboard Air Line Railway Company has carried on a notable library work, which may be considered a Georgia library enterprise since it is a continuation of the work begun by Mrs. Eugene Heard of Middleton, Ga., twenty-four years ago, and still has headquarters at "Rose Hill," the old Heard plantation. Books are sent to any community reached by the Seaboard Line, with a special effort to serve Seaboard employes. In Georgia, which is only one of six or seven served by the Seaboard Line Library, there are two branch libraries in the railroad shops of Savannah and Americus, and twenty-one communities receiving traveling libraries, while several employes receive individual loans regularly.

The Commission's appropriation for 1921 was six thousand dollars. It expended \$3,050 in salaries and \$1,680 for books.

Savannah. The Public Library of Savannah with its two stations furnishes practically all the library facilities available to the city's white population of 44,057, as the Georgia Historical Society has not sufficient funds for the purchase of new books. Librarian C. Seymour Thompson looks forward to the time when a per capita tax

of one dollar will furnish a reasonable minimum annual revenue for the library. The 1921 appropriation of \$25,000 represented a per capita tax of thirty cents, and this appropriation has been reduced ten per cent for 1922. The library, with 10,554 registered borrowers, circulated 172,890 books. Payments for maintenance included \$15,534 for salaries and \$6,262 for books.

INDIANA

Indianapolis. Hospital service has been extended to Robert Long Hospital as well as to City Hospital by the Indianapolis Public Library. Lucile McCray, daughter of Governor Warren T. McCray, has volunteered her services for this work. She served for three years as librarian of the Kentland (Ind.) Public Library, and is a graduate of Wells College and of the Indiana Summer Library School. In response to an appeal made for gifts and magazines to use in library hospital work, in a little more than a month, 676 magazines, 273 books, 33 sets of paper dolls and \$16 in cash have been received.

The Technical Department of the Indianapolis Public Library prepared a brief list of books on automobile engineering and distributed several hundred copies thru the various booths at the Automobile Show held at Indianapolis March 6 to 11.

ILLINOIS

Chicago. The release of departmental appropriations to the general fund and the appropriation of \$5,000 for the purchase of books in France enabled the University of Chicago libraries to acquire 26,583 volumes in the year ending June 30, 1921, making the number available for use 623,423 volumes. Unaccessioned volumes are estimated at more than 85,000. Expenditures for books amounted in all to \$18,475. The recorded use was 504,580. More than three thousand volumes were purchased for the student lending libraries at a cost of \$4,377, the receipts amounting to \$1,460.

The plan, which is described in the *LIBRARY JOURNAL* for December 1, 1921, p. 994-995, is steadily increasing in popularity. Fifty-four graduate students and 166 undergraduates were used in the work of the library, receiving \$24,056 for their services. The cost of printing cards has averaged forty-six cents a title.

Chicago. A notable increase in use, numerous valuable additions, and the steady growth of the John M. Wing Foundation marked the past year's work of the Newberry Library. In the Public Service Department 53,673 readers, an increase of 13,838 over 1920, were served

with 174,731 volumes, or 31,218 more than in the previous year. The Library has 400,205 volumes, pamphlets, manuscripts, etc.

The Friday Club gave the library a superb copy of *The Essayes of Montaigne*, as rendered into English by John Florio, and printed in London in 1603. By a special arrangement between the Board of Trustees and Edward E. Ayer, the latter transferred to the library for permanent ownership his extensive and valuable collection of European and oriental manuscripts, including a number of printed books. To the transcripts from the Spanish and Mexican archives, there were added 327 documents, consisting of 9,695 pages, making the total number of pages now in the collection 67,512. The chief addition to the Edward E. Ayer collection was *The First Decade of Peter Martyr*, printed at Hispali (Seville) by Jacob Cromberger, or Cromberger, in 1511, one of the primary sources of American history. Three early editions and twenty-six other editions are also in the Ayer collection.

The following examples of early printing that have been added to the Wing Foundation deserve special mention: Richard Arnold, *Chronicle*, in English, first edition, probably printed in Antwerp, about 1503; Petrarch, *Il Canzoniere*, Venice, Gabriele and Filippo di Pietro, 1473; *Opera Nova Contemplativa*, Venice, 1510, an Italian paraphrase of the *Biblia Pauperum*, the only Italian block-book, being a perfect copy of the 120 woodcuts engraved by Giovannia Andrea Vavassore; Plato, *Opera*, translated into Latin by Marsilio Ficino, Florence, Nicolaus Laurentius, 1483-84, the first printed edition of Plato's collected works; Isidorus, *Etymologiarum sive Originum Libri XX*, Strassburg, Mentelin (1472), containing a woodcut reputed to be the first printed map; Gregorius I, the Great, *Homiliae*, Paris, press of Ulrich Gering, 1475; Lorenzo Valla, *De Elegentia Linguae Latinae*, Rome, Pannartz, 1475, one of the most beautiful books acquired during the year. The Newberry Library has in all more than four hundred fifteenth-century books. Other books in the Wing Foundation are described in this number of the *LIBRARY JOURNAL*. Altho the books of the Foundation are not yet installed in permanent quarters, considerable use has been made of them by typographers and professional artists. One local manufactory has already cut matrices for type-casting based on designs found in old books recently acquired by the Foundation.

MISSOURI

Columbia. The library of the University of Missouri loans books to citizens, clubs, high schools, libraries, and other institutions of Mis-

souri, and prepares and circulates packages of material for debates. These packages and books went to 236 different towns, of which 201 were in Missouri. The 870 books loaned represented an increase of twenty per cent over the previous year. The internal circulation of books from the general library amounted to 51,128 volumes. Including unaccessioned books, the library owns approximately 200,000 volumes.

The separate library for students of journalism which was opened in Neff Hall in October, 1920, has already almost outgrown its quarters.

St. Joseph. A historical sketch of the growth of the St. Joseph Public Library was contributed by Librarian Jesse Cunningham to the *Gazette* of that city, on the occasion of the seventy-fifth anniversary of the paper. The Free Public Library was preceded by a school library organized in 1873 by John Crosby, a circulating library in the store of Woolworth and Colt, and a subscription library operated by the St. Joseph Public Library Association in quarters donated by Warren Samuels, opened on November 8, 1887. The books of this association were given to the new public library organized in 1890, and opened for the issuing of books on March 16, 1891. The popular interest which had voted in favor of a library also provided it with a home of its own nine years later. Ground was broken for the new building by Librarian Purd B. Wright, in September, 1900, and it was opened in March, 1902. A Carnegie branch was opened in South St. Joseph the following December, and a second, the Washington Park branch, in June, 1910.

Henry J. Carr was the first librarian. He came from Grand Rapids and took charge in October, 1890, leaving the following August for his present post in Scranton, Pa.

William H. Culver and Lulu C. Senter served successively until July, 1892, when Henry L. Elmendorf was appointed. He was succeeded in September, 1896, by Purd B. Wright, whose connection with the library had begun practically with its inception, when he as city clerk had assisted in putting the question of a new library before the citizens. When Mr. Wright resigned in August, 1910, to accept the librarianship of the Los Angeles Public Library, Charles E. Rush succeeded him and thoroly popularized the library during his six years' stay. The present librarian assumed charge in March, 1916, when Mr. Rush went to Indianapolis.

St. Louis. The music collection of the St. Louis Public Library is being advertised by a series of recitals given free to the public at the Library by the courtesy of St. Louis teachers of music

and their pupils. Numbers on the program are all from the music shelves of the Library and a typical collection of volumes is on exhibition in the room where the recital takes place. Each program contains a brief article on some division of the music collection calling attention especially to the works of authors not generally obtainable in this country. The collection, altho only about ten years old, now numbers nearly six thousand volumes.

The first recital of the series in charge of Professor Ethan Allen Taussig, was given by Miss Lucille Cook, pianist, and Miss Ethel Cook, soprano, on March 21. Between two and three hundred persons were present and much interest was manifested. Professor Taussig made a brief address, calling attention to the resources of the library in the way of musical scores.

TEXAS

Houston. The Board of Trustees of the Houston Lyceum and Carnegie Library authorized a change of name in September to the Houston Public Library, as the former name was no longer appropriate. At the beginning of the year the library's activities were carried on in the one Carnegie building, but the close of the year saw five branches in operation, with collections in fifteen schools and other deposit stations. Early this year at the Democratic primaries an ordinance was voted fixing the library's income at not less than two and one-half cents on the hundred dollars valuation, insuring an income for 1922 of \$42,021 as compared with \$23,900 last year. The expenditures for salaries were \$20,243; for books, periodicals and binding \$12,624. Readers from a population of 140,000 borrowed 289,701 books, or 67,896 more than in 1920.

COLORADO

During the last three years in Denver the number of library buildings increased 33 per cent; the home use of books 49.3 per cent (1,121,717 in 1921); the number of books purchased decreased 34.7 per cent, and the library's appropriation increased 26 per cent. The amount expended for salaries increased 61.6 per cent.

In addition to books loaned for home use, 172,256 more than last year, the number of pictures and photographs loaned totaled 421,051. The 23,734 new borrowers made the number of borrowers in Denver, with its population of 256,000 inhabitants, 63,937. The per capita circulation of books last year was 4.37.

The appropriation for 1921 was \$116,000, while the addition from fines, etc., made the library's total income \$129,279. Of this sum \$60,000 was paid in salaries to the fifty-four li-

ABINGDON

Books for today

IN Abingdon Books one meets the spiritual and social builders of the age—they who write for today. Their sincerity, their unaffected directness, their courageous and constructive spirit have won them a place on the bookshelves of every thinking American man and woman.

Abingdon Books may be obtained at all good book-shops.

A WINTER OF CONTENT

By Laura Lee Davidson

Here is the story of a woman who had a winter of content, not amid the balminess of Florida or of Southern California, but amid the rigors of a Canadian winter. She lived all alone in a one-room shack, on a bluff overhanging a lake, and reveled in the glories and wonders of her unique surroundings and experiences.

Illustrated. Net, \$1.75, postpaid.

FLAMES OF FAITH

By William L. Sider

The author—as an interpreter of the modern poets, says: "I have selected for this new book such writers as I have found full of a great and abiding faith. By that I mean a religious or spiritual faith. Many of the poets whom I acclaim in these pages, all of whom have been crowned by worthier hands than mine in a literary way, I have the honor of knowing personally; and in every instance, whether I have had the joy of personal acquaintance or not, these chapters have been labors of great and loving enthusiasm."

Net, \$1.50, postpaid.

THE RIVER DRAGON'S BRIDE

By Lena Leonard Fisher

Mrs. Fisher's book is made up of some story beads gathered in South China and strung on a "thread of memory," which are part of the treasure trove of a recent visitation to that country that used to be spoken of as "the Land of the Yellow Dragon."

Illustrated. Net, \$1.25, postpaid.

THE LINE IS BUSY

By Edgar Hurs; Cherington

This book was written as a recreation. Much of it found expression out where the "trees unfold their banners" during the author's vacation days, and it represents his sincere desire to interpret with clearness and comfort the great and abiding things of religion and life.

In Press.

OLD BLACK BASS

By A. B. Cunningham

In this book the author tells of Old Black Bass as he has seen him on dusky evenings when the whippoorwill calls. Old Black Bass was the leader of his school. He was big of body, aggressive of spirit, and bold. With him was cleverness in eluding the cannier angler, and his life knew both sorrow and joy, love and bitterness.

The Bells of the Blue Pagoda

By JEAN CARTER COCHRAN

Author of "Nancy's Mother," "Foreign Magic,"
"Old John," and Other Stories

"I think this is the best story of life in China that has been put out thus far. A million copies of it ought to be read by the young people of America. It is true to life—to every phase of life you touch. Nothing is overdrawn. All the characters are true to what has happened in recent years; all the incidents are true to life."—Isaac Taylor Headland, author of "Chinese Mother Goose Rhymes," "Chines. Boy and Girl Court Life in Peking," lecturer on China.

Cloth, 282 pages, \$1.75, postpaid.

The Coming of the Slav

By CHARLES E. EDWARDS, D.D.

This book is an appeal for the evangelization of the Slav as the strategic movement towards the regeneration of the Continent of Europe.

An Excellent Book for Mission Study Classes
Containing a select bibliography concerning Slav nationalities. Eight illustrations. Map of Czechoslovakia.

Cloth, 75 cents. Paper, 50 cents, postpaid.

The Truth About Christian Science

By JAMES H. SNOWDEN, D.D., LL.D.

Professor of Systematic Theology in
Western Theological Seminary

"This book is perhaps the most vigorous and comprehensive indictment of the origin, history, doctrines and doings of Christian Science that has ever yet appeared within the covers of a single volume."—*Boston Herald.*

Cloth binding, 300 pages. \$2.40, postpaid.

Week Day Church School

By WALTER ALBION SQUIRES

Director of Week Day Religious Instruction,
Presbyterian Board of Publication

This book has been written on the assumption that the week day church school movement is more than an experiment; therefore, the author evaluates the movement in the entirety, as well as in its various forms in different communities.

Cloth, 168 pages. \$1.25, postpaid.

brary employees, and \$18,000 was paid in wages to the forty-two janitors, pages and shelf readers, twenty-one of whom are on part time. \$16,098 was spent for books and \$3,674 for periodicals.

AUSTRALIA

Adelaide. The library division of the Public Library, Museum, and Art Gallery of South Australia felt the force of the general increase in use of public libraries after the war in its

year ending June '30, 1921. This growth had the usual concomitants of shrinking funds and congestion of shelves and catalogs. No additions have been made to the catalog cabinets since 1914. Including the year's accessions of 2,941, there are 110,627 books in the main library. The librarian, H. Rutherford Purnell, reports a record attendance of 138,751 persons. Expenditures were £4,692, or £1,073 for books and binding and £3,683 in salaries and wages.

CONTINUOUS WAVE WIRELESS TELEGRAPHY. By B. E. G. Mittell, A.M.I.E.E.

Send for Complete List

ISAAC PITMAN AND SONS

2 West 45th Street, New York

CURRENT LIBRARY LITERATURE

Timely lists on home making have been issued by the A. L. A., and the Trenton and Detroit public libraries.

The March number of the *Book Review Digest* gives subject headings following the Decimal Classification number so that "the entry now carries all the information that the librarian needs for ordering and cataloging a book." The practice hitherto followed of indicating in addition to the price of the book its estimated cost per thousand words is discontinued and the number of pages in the book will hereafter be given.

The Henry E. Huntington Library is illustrated and described in the *Architectural Forum* for March in an article which contains a number of illustrations of the new building at San Marino, California. The Library is part of an estate of 700 acres, and will doubtless be the Mecca of students from all parts of the world. This article considers only the architectural features.

In the same number there is a series of illustrations, with floor plans, of the Converse Memorial Library at Amherst College, of which McKim, Mead, and White are the architects.

In "The Modern City and its Government" by William Parr Capes, director of the New York State Bureau of Municipal Information (Dutton, 1922, \$5) is a chapter on "Making Municipal Officials Efficient," which discusses responsibilities of public servants and the essentials of efficient administration including adequate information services—municipal reference libraries, bureaus of information, and, in particular, the work of the New York State Bureau of Municipal information.

"Booklist Books of 1921," like its predecessors of 1919 and 1920, is a selection of "the year's books sifted according to their significance to librarians—their usefulness to readers. About three hundred titles are included and each is briefly described. General literature, Fiction, Children's books, Technical books are separately listed. General literature is conveniently classified under such headings as Ethical training and living, Peace and war, Labor and laborers, Costumes, Language, Heredity, Household economy, Fine arts, etc., so as to guide any reader to the book he wants. Single copies,

25 c.; 10 to 50 copies, 10 per cent discount; 50 to 100 copies, 20 per cent discount; 100 or more, 33 $\frac{1}{3}$ per cent discount.

Community Bookshelf is the new house organ (Vol. 1, no. 1, March 1922) of the Minneapolis Public Library, dedicated to the service of patrons present and prospective. "It is not good business," the *Bookshelf* reminds the taxpayers, "to make large investments in the Public Library which can return hundred per cent in pleasure, in broadened interests, in intelligence, in mental growth, and then not use the possible returns"; and it goes on to give bright chapters on how to listen to music (telling of the Library's symphony study table); on the rare books exhibit, on what a writer reads, bird notes and news, on making a puppet show and on "increasing your earning power." Informing little paragraphs are well calculated to increase good understanding between the Library and its users and to attract new clients, and about half the number is devoted to a selected annotated list of recent popular books.

"The Green Book of methods of organizing county library service" by Joseph L. Wheeler, librarian of the Youngstown Public Library, is published by Gaylord Brothers, Syracuse, N. Y., who offer it as their contribution to the county library movement. With a view to helping the county library worker to avoid much "vain endeavor and expense thru the adoption of standardized methods and forms for this field of library service," the Green Book "summarizes the most common principles and features from many counties and approximates the routine followed in several counties which seem to have worked out a satisfactory system."

County library workers will be glad to know also that the paper on the relationship between the central library and branch libraries of a county system, by Sabra L. Nason, librarian of the Umatilla County Library, Pendleton, Ore., which was read at the League of Library Commissions meeting at Swampscott has been printed in full by the Oregon State Library as county library campaign material. As illustrating the fitness of the county unit to provide the best reading at the least cost the working of the Umatilla County Library is discussed in detail. "When Women Will" by Anne Shannon Monroe in the November *Good Housekeeping* throws some sidelights on the good work of this library.

THE WORLD BOOK

Organized Knowledge in Story and Picture

IN TEN VOLUMES

Editor-in-chief, PROFESSOR M. V. O'SHEA, University of Wisconsin

Assisted by 250 of the leading educators of the country.

A reference library written in non-technical language.

It is now being used in the juvenile departments of all the leading libraries of the country.

Unique system of Loose-Leaf Annuals which keep the work up-to-date.

Monthly Service Bulletins of inestimable value in connection with use of THE WORLD BOOK.

Recommended by the American Library Association in their "Booklist."

Officially approved by 21 State Departments of Education.

Adopted and in use in school libraries of all large cities.

1922 EDITION JUST OFF THE PRESS.

Write for booklet and terms.

The Art of CONVERSATION

A Series of Twenty Lessons

This book treats in an interesting manner of a subject regarding which little has hitherto been written. It contains the details of a simple method which, if conscientiously studied and applied, should not fail to perceptibly improve the conversational powers of the reader. Some of the subjects covered are, "How to gather material for conversation," "How to acquire a good conversational style," and many others, in addition to hundreds of hints which will be invaluable to anyone who is interested in improving his or her conversational ability. The book is bound in very beautiful castilian covers and the price, \$1.00 postpaid, is

Out-of-Print Books

Catalogues Issued

E. R. ROBINSON, 410 RIVER ST. TROY, N. Y.

DOES your library merely serve its regular readers and those who drift in or does it work constantly to attract new ones? How many in your community never come to the library? How many of these could you capture by a little outside publicity offering your services in a definite, practical way? Order some of these reading lists, mail a few to strangers and see what happens.

THE latest addition to the A. L. A. reading lists is one on **HOME PLANNING**, an eight-page leaflet, in which twelve titles are briefly described. A direct route to the facts, figures, plans and pictures needed for building a home. The books suggested will give as much pleasure as practical help;—to build a home without reveling in such books is to miss one of the joys of building. Prices: 6 for 25c (in stamps); 30 for \$1.00; 100 for \$2.50; 500 for \$10.00; 1,000 for \$18.00;—postage extra.

USEFUL BOOKS FOR THE HOME is another new reading list compiled by *The Booklist* staff. Home making is both an art and a science. There is much to learn about it from books. After a thorough weeding-out of this field of literature twenty-four titles survived. They have been published as an annotated list which will serve as a guide to the latest facts and ideas on cooking, food values, dressmaking, millinery, house decoration, gardening, household budgeting, child care, etc. Prices the same as for the *Home Planning* list.

BUSINESS BOOKS FOR PROFIT AND PLEASURE, by Bethel Cleland, Librarian, Business Branch of the Indianapolis Public Library, is a carefully chosen list of forty titles, annotated, for people who want to use their time to the best advantage. It includes books of general interest, books to be read for inspiration and efficiency, arranged under such headings as A Great Game, Studying the Players and Directing the Force, Charting Progress and Results, Writing and Talking Business, Crying the Wares, Selling the Product. Prices: 5 for 25c (in stamps); 25 for \$1.00; 100 for \$3.00; 500 for \$12.00; 1,000 for \$20.00;—postage extra.

COLLEGES, Academies and Schools the country over—many of them religious—are teaching Evolution, teaching your children that they and you are come from a gorilla.

Even Ministers and “teacher-Theologians” of our now Croesus-owned Christianity are chattering with the monkeys and hurling milkless nuts at a personal God and at normal God-made men and women.

When your children insistently and trustingly ask you “Who made us?”—your answer must not be evasive, it must be truthful and you must choose for their maker either God—or a gorilla.

GOD—OR GORILLA

BY ALFRED WATTERSON McCANN

Famous Special Expert of the N.Y. Globe

The work of one who has given his entire life to the study of man, animal, plant and food. In his defense of truth, of purity, he has been plaintiff or defendant in 206 libel suits—most of them brought by the richest profiteers—and won every one of them. Some of his opponents he sent to jail. He has never lost a case—oral, written or legal.

He is the best equipped man in the world today to handle Darwinism, Wellsism, barn-yard materialism—Evolution

Mr. McCann gathers facts, proofs, contradictions, and flings them into sorry heaps. He does not criticize the prevailing conception of evolution as expressed in the monkey-man theory; he tears it to pieces. Not content with scourging the self-esteemed educators who keep the simian fancy boiling in a caldron of anemic erudition, he demonstrates how no part of the dogma preached by these eminent anti-dogmatists fits into any other part.

His methods are not suave, but terrifically penetrating. He seizes you by the heels and drags you into places you thought you had explored, only to show you that the stuff you were taught to recognize as orthodox evolutionary science is flimsy phantasia, unsupported assertions, clumsy inconsistencies, physics without law, mathematics without numbers, deductions born in fraud and forgery.

No sane man or woman, despite former convictions on the subject of evolution, can ignore the astounding facts which the author of GOD—OR GORILLA has marshalled against the most spectacular hoax of a hundred years.

Librarian: This note appears in all our advertisements

If you can't afford to buy “God—or Gorilla” now, go to the libraries for it—and own it later. A book not worth owning is not worth reading; a book not worth reading often is not worth reading at all.

THE DEVIN-ADAIR CO., Publishers, 437 Fifth Ave., N. Y.

A FRANK STATEMENT

To Librarians, Trustees of Libraries and Architects
about the

Borden Cantilever Bookstack

THE Borden Cantilever Bookstack was invented by William Alanson Borden, and perfected by the engineering force of Post & McCord of New York.

Mr. Borden is a practical librarian of 30 years' experience, who, as Director of State Libraries in Baroda, India, organized over 450 state controlled public libraries. Mr. Borden is also a mechanical engineer and has invented a number of articles of library equipment, among them being the removable card catalog drawer now used all over the world.

The Borden Cantilever Bookstacks are fabricated under our patents by the Kramer Steel Products Company of Philadelphia.

Personal Notes by Mr. Borden

The first point about the Borden stack is that it is the most rigidly constructed stack made. I make that statement with no doubt whatever. I know them all and am familiar with all the principles upon which they are constructed and I know that many of the others rely, to a more or less extent, upon the walls of the building to keep them steady.

Now, for another thing, although it is the strongest stack on the market, it is so constructed that it will retain that strength indefinitely. There is only one other stack that will do this. In other words, the Cantilever and one other are the *only* two stacks made today that have no hollow, *inaccessible* spaces hidden away in them.

Steel will rust when exposed to the air, and no preventative has ever been discovered. Baked enamel will prevent it for a time, but only for a

time; the dampness finally works through it, and then the enamel begins to chip off over the rusty places. The only safe way is to have every surface exposed to the air; exposed also to inspection, so that the rusty places can be cleaned and repainted. Except our stacks and one other Standard all of the posts of the stacks on the market today are hollow—and these hollows, while they are open to damp air (and all air is damp in this climate) are not open even to inspection, to say nothing about cleaning and painting.

Next, our stack is more convenient than any other. The shelves (full of books) can be adjusted to height at any time without moving the books. And they can be so adjusted one end at a time. Librarians will sometimes tell you that they seldom have to change the height of a shelf. To a certain extent that is true—they seldom do change the height of a shelf *because* in order to do so they have to take all the books off, make the change, and then put all the books back again. It is no wonder they seldom make any such change. I wouldn't do it myself under such circumstances, but when it can be done as easily as with our stacks, it is a daily operation in any library of any size.

Next as to capacity: we save the two inch space usually wasted between the back edges of the shelves of a double faced case. This means that we not only stop up the hole through which books are continually dropping down and getting lost, but that two inches multiplied by 25 is just the space occupied by an extra double case and its passageway—in other words, we get 26 rows of double faced cases in every 100 feet of stack room

A FRANK STATEMENT

(Continued)

length, instead of 25 rows that other stacks get— or else we add that two inches to the passageway. This adds 4% to the capacity of the stack. (You get the extra row).

But our principal gain is in height. By removing all obstructions from the paths of the shelves we are able to place 8 shelves in every section of our stack and these shelves are spaced on 11 1/3 inches apart on centers. No other stack will take

more than 7 shelves to the section with this spacing. Here we gain 14% in capacity.

The Borden patented shelves are absolutely interchangeable throughout the stack. This is an advantage. Whenever the librarian wants to put in an extra shelf anywhere, he knows that the first shelf he picks up will fit.

The wide-panelled ends and an arched or straight cantilever (optional) give the same attractive appearance possessed by standard stacks.

To sum up:

1. The Borden Stack is stronger than any other.
2. It will stay strong longer than any other (with one exception).
3. It is more convenient in daily use.
4. It is more capacious than any other by over 10%.
5. It is no more expensive than the others in spite of being superior to them in most ways.
6. It is attractive in appearance.

Some years ago, when plans for the book stack installation of a large Public Library were first made, our drawings of the Stack Room showed that with the Borden Stack the capacity would be 200,000 volumes greater than with any other stack. We are enabled to do this on account of the fact that the cantilever principle gives the necessary space for eight shelves in each press instead of seven, and the further fact that we can instal 26 double rows to every 100 feet, instead of 25 double rows, on account of space saved.

Some years ago, Mr. William Alanson Borden, President of this Company, went on record as saying: "It is my intention to make a Bookstack as cheaply as good construction will permit, and sell it to my fellow members of the Library Profession at a fair advance over the absolute cost. I do not enter the field to exploit libraries, but to help them."

If you are in need of shelving, or soon will be, write us for our Booklet. The cost of steel makes it possible for a Library to instal the perfected and up-to-date Borden Cantilever Bookstack at a price no more, and often less, than inferior makes.

THE LIBRARY JOURNAL

TWICE-A-MONTH

APRIL 15, 1922

South America and Library Progress

BY FORREST B. SPAULDING

Recently Director de Bibliotecas y Museos Escolares, Lima, Peru.

IN these days of express steamships and agency planned tours, books and articles about South America are increasing to a most unfortunate extent. Unfortunate, because by far the greater number of such publications are written by hurried travellers who speed from place to place, according to a "tour" schedule, and indeed in some instances write about countries and cities remote from their routes, and concerning which they have been unable to make even the superficial first hand observations that the "tour" makes possible in the countries visited.

For this reason we begin this short article with an apology. That part of it which concerns the Republic of Peru, is written from personal observation during a year's residence as an official of the Peruvian Government. That which concerns Chile was gleaned in the course of conversation with Chilean friends whose names are well known in Santiago literary circles and who are, without exception, deeply interested in the future development of libraries in their progressive country. That which concerns other countries is based merely on hearsay and reading.

In Peru, and the same is doubtless true of all other South American countries, there is a most intense interest in literature as well as in all the creative arts. Bookstores abound, magazines and newspapers enjoy large sales, the most popular being those which contain literary features which in the United States would be considered too "highbrow" to enjoy general popularity.

The government recognizes the importance of education in the national program by the appointment of a Minister of Education or Instruction in the Cabinet, a precedent which the United States may soon follow. Upon this ministry depend all the universities, schools, libraries, and museums in the Republic, as well as a score of learned, scientific and literary societies which enjoy financial aid from the state.

We in the Northern of the American continents sometimes fail to realize the inheritances

which the republics of the Southern continent enjoy. Spain did not fail to endow her colonies with books and institutions for learning, however greedy she may have been in other ways. Both Mexico City and Lima, then the Spanish capitals in the Americas, had printing presses many years before the English colonists settled in the North. There is a record of a press in Mexico City in 1544, and in Lima in 1584, the first book printed in South America being published in the latter year. The date of the founding of the first South American library is difficult to determine, tho it is certain that collections of books existed in various monasteries and schools, long prior to the coming of the Pilgrims to Massachusetts. The first University in the New World, that of San Marcos in Lima dates from 1551.

The peoples of the Spanish American countries have retained an affection for the mother country of Spain, in no way lessened by the series of revolutions which, a century more or less ago, finally brought independence to all her former colonies. It was the Spanish yoke of government which was then thrown off, all the manners and customs, especially the intellectual traditions of old Spain being zealously retained. Scarcely an important Spanish book is published today, which is not immediately to be found on sale in Buenos Aires, Santiago, Lima, or Bogota, most of them being published simultaneously on the two continents. Similarly do these cities enjoy the art and the drama of what was formerly, and is now in effect, the mother country of Spain.

It is not to be wondered at that such peoples should view with high favor an institution so essential to education and general culture as the library. But tho libraries are so favored in theory, their potential service is scarcely imagined by peoples who until recent years, may be said to have retained culture at the expense of national progress. The public library, open at convenient hours, lending books on all subjects, to any who wish them, is to this day

practically unknown in South America. Public libraries exist in Brazil and Argentina, but measured by North American standards, they would hardly be recognized as such.

For an example, let us visit the library of San Marcos University, generally considered to be the most progressive of Peruvian libraries. The twenty thousand volumes will be found divided in four special rooms or departments, the first containing the books acquired for the general library of the University, and the remaining three each containing a special collection (not on one single subject) given or bequeathed to the University. Among these is the collection of about three thousand volumes, given by the American Association for International Conciliation.

With the exception of the books in one of these special halls, the entire library is cataloged, over-cataloged, one might say, tho not classified by subjects. There is a subject card catalog only of the American collection already referred to. First there is what corresponds to an accession record of the entire library, in which each book is given its number in consecutive order. Printed author catalogs in book form exist for the books in the main hall and one of the special halls. There is no method of keeping these up to date. Fifty separate subject catalogs cover the books in the main hall. All but eight of these contain, in alphabetical order by authors, sheets listing the books, roughly classified under broad subject headings. The remaining eight contain the entire list of pamphlets arranged alphabetically by authors making it practically impossible to locate any pamphlet material on a given subject. (It should here be added that during the lifetime of the present custodians, any pamphlet of the present date is likely to be remembered and found. The memory of a Peruvian for such details is astounding. I know one instance of a man who has had charge of the archives of a large government department, who can unerringly recall from memory a letter filed under date of receipt, five or ten years back.)

To borrow a book from the San Marcos University library is not difficult, providing one can prove that one is entitled to the privilege. Merely a signature written in a book kept for that purpose is required. Card records of any sort do not meet with favor in Peru. All library records, including catalogs, circulation records, etc. are from choice kept in books. Similarly, large books, specially ruled and printed are everywhere to be found in Government and business offices. Correspondence is almost invariably kept in binders in chronological order,

each sheet being perforated to fit a mechanical binding contrivance.

The most important library in Lima, is of course, the Biblioteca Nacional. Founded in 1822, the year following Peru's independence, it had grown to a total of about sixty thousand volumes in 1880. Many rare and even priceless early American books and manuscripts were in the collection. But in 1881, this collection was sadly looted and pillaged by the Chilean troops who invaded Peru's capital. Books were ruthlessly destroyed, stolen, sold and otherwise scattered, and the library reduced to a mere skeleton of its former greatness. The rebuilding of the collection was undertaken, after the treaty of peace of Ancón, by Don Ricardo Palma, a librarian, writer, and historian whose name is famous wherever the Spanish language is spoken. Thru his large circle of friends in every Spanish-speaking land, thru appeals to foreign governments, and to a smaller extent by purchase, the library was again built up to a collection numbering about fifty thousand volumes.

There is no one who knows just what treasures the national library now contains. The stupendous task of cataloging the collection is slowly proceeding, having been courageously undertaken by the present librarian, Dr. A. B. Deustua. But unless the Peruvian Government appropriates money for this task, it seems likely never to be accomplished. (The Peruvian Chamber of Deputies passed a resolution on October 19, 1921, recommending to the Minister of Instruction that the writer be given charge of the cataloging of the Biblioteca Nacional, in addition to his other duties. But up to the beginning of this year, not one cent was appropriated for this purpose.) One dauntless cataloger is now at work, making an author record of the collection on specially printed and ruled slips.

Learned societies in South America generally possess libraries of considerable importance. Of some of these there are printed author catalogs, but of the majority, the memory of the honorary librarian is the only clue to the books. In Lima the collection of the Sociedad de Ingenieros (about eighteen thousand volumes) and the library of the Sociedad Geografica de Lima (eight thousand volumes) are especially noteworthy. The librarian of the latter society, Senor Carlos Arellano Ibanez, is now at work on an adaption of the Dewey Decimal Classification in Spanish, also serving as classifier of the Biblioteca Escolar y Administrativa del Perú.

The Biblioteca Escolar y Administrativa del Peru, was created by decree of President A. B. Leguia, April 9, 1921, and provides for grouping under one central administration, all libraries in

the schools and colleges of Peru, as well as all of the separate libraries in the various offices of the Government. By the preparation of a joint or union catalog of the books in these separate libraries, and arranging for the interchange of volumes, it was thought, and rightly so, that the book resources of the government could be easily manipulated and made to serve to a degree impossible under the present system of uncataloged and uncorrelated separate libraries. Unfortunately, due to the present financial straits of Peru, but little has been accomplished to the end desired. But this library, existing now only on paper may some day be developed as there are many people of influence in Peru who heartily believe in the plan. Peru will also have the nucleus of a travelling library system when the American Colony which has been raising funds for the purpose, finally makes its gift of sixteen thousand books to the Government, in commemoration of the Centenary of Peruvian Independence, in accordance with plans decided upon in May 1921.

The ancient University of Cuzco, of which a Northamerican, Dr. Albert Geisecke, has been the Rector for ten years past, also possesses a fine library especially rich in Latin works. This library is at present uncataloged. During the past few years many small public libraries have been started due to local initiative, in various parts of Peru, distant from the Capital. Tho these are small, poorly selected, and generally uncataloged, the interest in them is great, and time and money are all that are needed for their development. That such local initiative exists in spite of the efforts made in Lima to control absolutely from the Capital, all educational institutions in the Republic, is an encouraging sign.

The spirit of competition among South American nations is keen. And it is this spirit which may do more for the development of public libraries, than local initiative can ever do when not thus spurred on. In 1910 a National Board of Public Libraries was formed in Argentina, and shortly thereafter a comprehensive report was issued showing the feasibility of Traveling Library systems based upon practice in the United States. Public libraries in Argentina now number about two hundred, and Buenos Aires boasts a National Library second only in contents and in its edifice, to the splendid Biblioteca Nacional of Rio de Janeiro, with its 330,000 volumes and its \$1,500,000 building, built in 1910. Similarly Brazil boasts two hundred or so public libraries.

Chile did not let the high Andes prevent her from watching what her neighbor Argentina was doing. In 1913, a course in library management

for women high school teachers was inaugurated in Santiago, under the direction of Senor L. Ignacio Silva Arriagada, assistant librarian of the National Institute. In the librarian of her National Library, Senor Carlos Silva Cruz, Chile boasts one of the leaders in library progress on the South American continent. Senor Silva Cruz, librarian of the Biblioteca Nacional of Santiago since 1911, has instituted many reforms, including several, the ideas for which were brought back from a visit to the United States, when he had the opportunity to inspect many of the leading libraries in the Northern republic.

Mention of Chile's library progress would be incomplete without the name of Dr. José Toribio Medina, not a librarian, but undoubtedly one of the world's foremost bibliographers. His works include more than three hundred titles, and his fame, like that of Don Ricardo Palma, his former friend, extends to every Spanish speaking land.

The National Library most recently established, is that of Paraguay at Asuncion, founded in 1915. So library progress in South America goes on. South America wants libraries and is going to have them. North America can encourage her and help her, not by sending librarians to her countries, but by opening her library schools, calling the attention of the Ministers of Instruction to these schools and inviting the librarians of her sister continent to encourage attendance at these schools.

In the United States, library progress is said to commence in 1876, the year of her Centenary of Independence. Only in the last decade have most South American republics reached their 100th birthdays. They are now about to proceed with their library extension and development, but slowly and comfortably as is their custom.

Of all peoples on earth, the Latin is the most lovable, tho to people of the northland often the most exasperating. Were we to visit him and tell him what we wished to do, he would listen courteously and thank us. Were we to ask him to start this or that at once, he would smile engagingly and reply, "Si senor, manana." And if we know him well, we know he means what he smilingly terms "la manana proverbial," the tomorrow, which exists not as a set time, but the tomorrow which is used for convenience, to delay action until he is ready.

And when he is ready, we in the Northern continent, must be ready too, to help as he wants to be helped. Meanwhile we can do much to gain and to keep his friendship, so that when he is ready to ask, he can be sure that he is asking a friend, as is his wont.

The John Crerar Library

By CLEMENT WALKER ANDREWS, Librarian

I COULD have wished, and probably you will wish, that this part of the programme were assigned to a more eloquent speaker than a librarian, who of necessity is more familiar with the printed than with the spoken word. Nevertheless, the choice has one great advantage in that the librarian, who of necessity is most familiar with the multitudinous details of library work, can therefore best avoid them.

From the terms of the bequest it will be seen that in 1886, when he made his will, Mr. Crerar had in mind a general library which should furnish to the South Division of the city facilities similar to those offered by the Newberry Library to the North Division. But after he had drawn his will he often discussed his plans with the friends who were to be the Directors and especially with Mr. Williams, who was to be the first president. As a result of these discussions he came to the conclusion that the Library should not duplicate the work of the Chicago Public Library as a circulating library and that it should be made especially strong in subjects not well cared for by other libraries in the city. Farther than this he had not gone at the time of his death in 1889, and it was left to the Directors, when the Library was organized in 1895, to determine the scope of the institution. After a careful consideration of the subject, and especially of the work of the libraries then open to the public in the city, they decided unanimously to establish a free public reference library of scientific and technical literature. As they stated at the time, they believed that the decision accorded with the particular business activities by which the greater part of Mr. Crerar's fortune had been accumulated, would exclude naturally certain questionable classes of books which his will distinctly prohibits, and would favor the aim and object which it expressly points out.

The exact lines of the division of its field of work from those of the Chicago Public Library and the Newberry Library were established after a series of conferences with the trustees of those institutions. The subjects assigned to the John Crerar Library are defined by the titles of its departments of Social Sciences, Physical Sciences, Natural Sciences, and Applied Sciences. To these was added later the Department of Medical Sciences. Only this last has a separate organization and reading room. With three notable exceptions, namely, theology,

philology, and law, all well provided for elsewhere in the city, these departments include nearly every subject comprehended in a broad interpretation of science as organized knowledge.

The maintenance of the Library is provided, of course, by the income from the the Crerar bequest. The first act of the Directors was to declare that the total amount of the bequest was not too large for the sufficient fund they were required to reserve to promote, maintain, and support the Library for all time, and that therefore the endowment should not be encroached upon for land, building, or books, but that a building fund should be accumulated from the income. The decision did not mention furniture and fixtures so that by a curious anomaly expenditures for these have been charged to capital account.

The next important decision in regard to maintenance was made in 1899 when, because of the improvement in financial conditions, the income increased very markedly and promised to increase still more. This decision was to keep the annual addition to the building fund at about its former figure and to use the balance for a more rapid development of the Library. The Directors, in making this decision, desired to give the generation of citizens who had known Mr. Crerar, and whom he had known, the greatest possible advantages from his bequest. It is to this action that is due the present value of the collections as well as the extent of the service rendered in the past twenty years. On the other hand the building fund, now \$1,300,000, would have been ample, under normal conditions, to have provided fully for the needs of the Library at as early a date as it could have been used to advantage. Even under present abnormal conditions it is enough to build the structure now being dedicated.

The administration of the Library is governed by the act of the Illinois Legislature entitled "An Act to Encourage and promote the establishment of free public libraries" approved June 17, 1891. Under the provisions of this act The John Crerar Library was incorporated on October 12, 1894, and duly organized on January 12, 1895. All of the Directors named by Mr. Crerar were present. To the Board of thirteen named by him there were afterwards added the Mayor and Comptroller of Chicago, *ex officio*. The By-Laws of the Corporation provide for standing committees on Finance, Administration, Buildings and Grounds, and Books. The Directors meet quarterly and act, as a rule, only upon the recommendation of Committees. The Chairmen

*Address made at the opening of the John Crerar Library's new building on May 28, 1921. A paper describing the building in detail appeared in the LIBRARY JOURNAL for June 1.

THE GENERAL READING ROOM, THE FURNITURE FOR WHICH WAS SUPPLIED BY THE LIBRARY BUREAU. HERE THE DEDICATION CEREMONY TOOK PLACE.

of the standing committees together with the President form an Executive Committee which has power to act if necessary between meetings of the Board. There are two appointive officers, the Treasurer and the Librarian. The former in consultation with the latter submits an annual budget to the Board, and to the latter has been delegated the selection of the individual works added to the Library. It will be seen that such an organization makes for ease in routine administration and yet reserves for the Board the final decision in all matters of importance. In such cases they have before them the opinion of the committee or committees directly interested, and it has been their practice to discuss the questions informally until a general agreement has been arrived at. In not more than one or two cases in the whole twenty-six years is there a record of a division on the final vote.

The development of the Library has been governed by a few guiding principles. These are to undertake no more than could be accomplished with reasonable completeness; to add first all publications of the year which appeared to contain the results of original research, secondly the most useful texts and compilations of the year, and only afterwards older material and that chiefly of historical interest; but on the other hand to take advantage occasionally of exceptional offers of collections; to devote an un-

usually large proportion of the expenditures to periodicals; to provide liberally for effective service to readers; and to co-operate with other libraries and institution as fully and as generously as possible.

No record of the development of the Library would be complete without a most grateful recognition of the assistance received from its many friends and correspondents. Before the Library opened its books of record more than two hundred volumes sent as gifts were awaiting entry and last year there were received as gifts 5,034 volumes, 14,134 pamphlets, and 53,574 numbers of periodicals, from 3,667 donors. Except for the periodicals this is not an unusual record for there was no other large single gift. In past years the Library has received a number of collections so important that the name of the donor has been attached to them. Among these are the Senn Collection of older medical works, the Chanute Collection of Aviation, and that of the Cremation Association of America on Cremation. Still another, the David L. Barnes Collection on Railroad Engineering has been received this year.

More important still is the provision some donors have made for the increase of their collections by endowment. The Library at present has three such endowed collections: the Huntington W. Jackson Collection on Constitutional

Law, the Henry Gradle Collection on the Eye and Ear; and the Collection of the Chicago Academy of Sciences on the Natural Sciences. To these will be added in the future the Nathan S. Davis, Jr., Collection on the Throat and Lung. Such endowments are most welcome because they enable the Library to provide the maximum assistance to research workers in their fields without undue limitation of purchases in other fields; and on the other hand they form lasting and fitting memorials of the donors.

Thru the application of these principles the collections have been built up to a total of nearly 450,000 volumes, 300,000 pamphlets and 13,000 sheet maps. In size the Library is surpassed by at least seven public libraries and seven university libraries in the United States, but it would not be fair to measure its value solely by its size. Its field is limited, it contains no duplicates, and it has an unusual proportion of sets of periodicals, so that without exaggeration it may be said to be a good working library on all the subjects within its scope and more than this on some.

To justify its existence a library must be used. On this point alone a complete statement would take more than the time allotted to this address. As has been stated, the Directors have realized the importance of providing as much assistance as possible; the Librarian has tried to secure trained and enthusiastic assistants; and the men and women of the staff have given earnest and efficient care to the work and have shown much initiative in devising and perfecting the means. For instance, the public and official catalogs contain features entirely novel, which make this one of the most readily consulted libraries of its size.

The result has been a service by no means confined to the city. By interlibrary loans, photographic reproductions, and the distribution of its printed catalog cards and other publications the Library is known to and assists a wide circle of institutions and individual scholars. Indeed it is perhaps better known outside Chicago than in the city, tho it may be hoped that the occupation of this building will lead to a more general recognition of its possibilities for usefulness. It should not be understood that these possibilities have been generally overlooked in the past. At the time it was opened on April 1, 1897, the number of readers in the subjects within its field in the public libraries of New York and Boston was about seventy-five a day, and the Librarian informed the Directors that he thought that they might expect a like number when the Library became known, perhaps as soon as in five years. Yet the average daily attendance for the first year was seventy-nine and this rose steadily to a maximum of five hundred and forty-four in

1915. The war stopped this growth in numbers, but substituted for it a marked increase in the importance of the work done.

The variety of the service rendered is no less remarkable than the volume. The Library has tried to serve all who have asked for information or assistance within its field, the high school student as well as the university professor; the young man just beginning as linesman for the telephone company as well as the president of a great railroad corporation; the man who wants to know when the next train leaves for Waukegan as well as the patent experts defending a suit involving millions.

The general character, however, is research work on pure and applied science and is well illustrated by the statement that in their numerical order the largest classes of readers are physicians, engineers, chemists, teachers, and business men.

The very important question of the location of the Library was given earnest consideration by the Directors from the first. Temporary quarters in the Marshall Field & Co. Building, on Wabash Avenue and Washington Street, were taken in order to study the question and obtain information as to the character and residence of those who would use the Library. The result of this study convinced the Board that a central location was absolutely necessary to obtain the greatest usefulness. They therefore asked for permission to build in Grant Park, near the Chicago Public Library. This was granted by the Legislature in two different acts, confirmed by ordinances of the City Council and the South Park Board, approved by ninety-five per cent of the abutors and ratified by a large majority of the voters at a special election, but denied by the Supreme Court on the ground that the question was *res judicata*.

The final decision was not rendered until 1910. The Directors then determined to secure a suitable site by purchase, and after an examination of perhaps a score of offers in 1912 purchased the one now occupied. Unfortunately the existing leases on the property prevented building before 1915, but plans were begun at once. The war and other changing conditions made it necessary to alter the plans again and again, so that the plans for the present building are the ninth set on which estimates have been obtained, and some of the sets in their final form were the result of several revisions. Indeed, it is probably that even this plan would not have been carried out had it not been for the constantly increasing need of more space for the books and readers and the improbability of obtaining this in temporary quarters at any rental within the resources of the Library. The cost

of construction, tho not much larger than was estimated, has been so great as to make it necessary to suspend, for the time being at least, the evening service, and the resumption of this important part of the work will depend upon the attitude of the financial authorities of the nation and city.

In conclusion a brief description of the building may make more interesting the inspection of it which you are invited to make.

In the first place, it should be stated that this is only a portion, about two-fifths, of the whole building that has been planned. The Library owns the building adjoining on the north and that adjoining on the west. This Reading Room, therefore, and those on the twelfth floor will extend eventually fifty-five feet or three bays further north. The width and height of these rooms have been determined with this extension in view. A similar set of reading rooms will be built on the west side of the lot. The total capacity of the lot is estimated at twelve hundred readers and three million volumes. At the present rate of growth this should accommodate the Library for about one hundred and fifty years.

The architectural style of the building is a modified Romanesque. The construction is the usual column and girder with the columns protected by concrete, tile floors, metal window cases, doors, and trim. The only wood used in construction is for the stair hand rails. The building rests on twenty-eight concrete columns reaching eighty-four feet below the sidewalk to a very hard stratum immediately above the bed rock. The height of the outer walls is two hun-

dred feet above the sidewalk but the columns are strong enough to carry four more stories should the addition seem advisable. The permanent outer walls are of Bedford stone and in the final building this will be the case for the north and west walls as well as for the street façades.

The restricted area made necessary a radical departure from the usual type of library buildings tho perhaps no one of the ideas employed is strictly novel. For instance, the location of the reading rooms at the top of the building is found in both the New York Public Library and the Chicago Public Library. The fact that those of the John Crerar Library are twice as far above the entrance level means very little for the time spent in the elevators is the smallest part of the time required to obtain a book and a seat. The compensating advantages of better light and air and greater quiet are evident.

The four upper floors are devoted to the readers. The top or fifteenth will contain the maps, rare books and the union catalog. Up to the present it has been used as a temporary reading room. This, the fourteenth floor, is the general reading room with the public card catalog of over a million entries; the thirteenth, a mezzanine floor, contains the cloak room and toilets; the twelfth provides the reading room of the Department of Medical Sciences, called the Senn Room in honor of the late Dr. Nicholas Senn, the reading room for the general current periodicals, and a small class room.

Below these four floors are two used for administration; the eleventh floor contains the offices and the tenth the work room of the staff.

Here are taken most of the thirty-six separate steps which lie between the receipt of a notice of a new publication and its final preparation for use by readers. Part of the ninth floor is used for the work connected with the printing and distribution of the catalog cards. Below these floors are the book stacks, occupying the space from the fifth to the eighth floors. The fourth and eighth have been left out and four stack floors inserted in their place. This gives six stack levels with a total capacity of six hundred thousand volumes. This should be enough to shelve the present collections and the usual increment for about ten years. At the end of that period the substitution of two stack floors for the fourth regular floor will provide for three hundred thousand volumes, or for about fifteen years.

Unfortunately the space available for readers is by no means as satisfactory. Even to make the present provision of about three hundred and fifty seats it was necessary to omit temporarily the notable feature of a monumental central staircase hall which eventually will run thru

A VIEW IN THE STACKS. THIS WORK WAS DONE BY THE ART METAL CONSTRUCTION COMPANY OF JAMESTOWN, N. Y.

the four upper stories. The western half of the building is therefore at present strictly utilitarian and unimpressive.

It will be seen that the system of lighting adopted is the semi-indirect, but the elasticity of the system of ventilation needs to be pointed out.

This is the reverse of the usual unified system. Besides a general ventilation of the type employed in office buildings of its size, there is a separate installation for the reading rooms and another small one for the class room alone. The reading rooms can be ventilated by the windows alone, by the windows and an exhaust fan or by a mechanical supply and exhaust. Probably the last method will be used only occasionally in the winter.

So far as tested the building promises to meet expectations. At least the Directors hope that the public will confirm their belief that they have given Chicago a building which is, as the Founder wished, "tasteful, substantial and fire-proof," which will render adequate service to his friends, acquaintances, and associates, and which will be a not unimportant factor in the improvement of the Community.

The Russian Public Library

THE fourth issue of the Petrograd review, *Science and Its Workers*, contains a report on the present state of the so-called Russian Public Library (*Rossiiskaya Publichnaya Biblioteka*), formerly the Imperial Public Library of Petrograd. This report is summarized below.

Since 1918 the Library has been administered by a committee, in which the Academy of Sciences, the University, the Book Chamber, the Library Science Society, as well as the readers, are represented. No substantial changes have taken place in the inner organization of the institution. As before it comprises the following departments: Manuscripts, Russian Literature, Orientalia, Natural Sciences, Philology and Incunabula, Arts and Technology, History, History of Cults, Social and Economic Sciences, Polygraphy, Rossica, Slavica, Philosophy and Pedagogy, and the General Catalog. A separate technology division is being formed, but the work is greatly hampered by the lack of space in the library building and by the scarcity of funds for the purchase of recent technological literature.

In 1919 and 1920 two large collections of books, namely, the library of the quondam Theological Academy (*Dukhovnaya Akademiya*) and that of the Free Economic Society, were merged with the Library and named respectively The First and The Second Division of the Russian Public Library. The library of the Theological Academy is known for its manuscript collections and for its literature on philosophy, history of Christianity, and archæography. That of Free Economic Society is strong in files of Zemstvo and municipal publications and in works on economic history and theory.

Since the beginning of the war the current

output of foreign books has been beyond the Library's reach. This has been the cause of great concern to its administration. On the other hand, the acquisition of native literature, including manuscript material, was considerable. The Art Division has obtained Olsufyev's collection of popular prints, about three thousand in all, some of which are very rare, and a large group of lithographed portraits. Valuable additions were made to the collection of eighteenth century Russian literature and to the official documents bearing upon the early years of the present century. Among the Library's individual accessions are found two exceedingly rare editions of Catullus, namely, the Leipzig edition of the close of the fifteenth century and the Paris edition of 1473.

Within the last few years the Library organized a series of exhibits, devoted to such subjects as Turgenev, Gorki, Jan Amos Komensky, the history of revolutionary movements, the history of socialism. In October, 1918, the Library opened a central information bureau, for the purpose of locating books for inquiring readers in the libraries of the two capitals. The bureau gradually became a clearing-house for bibliographical information.

Twenty-five Years of Constructive Trusteeship

THIS year marks the twenty-fifth consecutive in which Dr. David A. Boody has served as President of the Board of Trustees of the Brooklyn Public Library. In recognition of this fact, the Board, at its regular meeting on March 21, 1922, presented Dr. Boody with a silver waiter.

President Boody has been called "the father of the free library movement in Brooklyn." Even before the library was established his interest in such a project was manifest. In his first message, as Mayor of the City of Brooklyn, January 4, 1892, he called to the attention of the Board of Aldermen the wisdom of establishing a library. In this same message he pointed out the fact that the Legislature had recently authorized Brooklyn to erect on the so-called East Side Lands, a Museum of Arts and Sciences, under an agreement with the Brooklyn Institute, and he urged that "the time seems to be opportune for providing a worthy adjunct of the Institute in the way of a free library." The Museum plans were adopted during Dr. Boody's term as Mayor in 1892-1893, and four years later the library was organized. The immediate development, therefore, of both the library and Museum was greatly advanced by the active pub-

lic interest of this enlightened and far-sighted citizen.

Several libraries, private and public, joined the Brooklyn Public Library soon after its organization, the most important of which was the Brooklyn Library, the large proprietary library on Montague Street. Later, Mr. Carnegie's gift of \$1,600,000 for branch buildings provided for twenty Carnegie Buildings. Owing to good planning and thrifty execution the required twenty were opened, and with the balance remaining a twenty-first building is now under construction. Several years ago the City started the erection of a large central building at Prospect Park and Eastern Parkway. The Legislature, just adjourned, passed a bill providing for the sale of corporate stock in the amount of eleven million dollars for the completion of the building, and Governor Miller signed the Act on April 7th, 1922. The erection of the Central Library Building is a matter to which President Boody has devoted tireless energy and undaunted enthusiasm thru many years, and today the fulfilment of the vision he has cherished for Brooklyn gives fair promise of realization.

In 1917, in recognition of Dr. Boody's eightieth birthday, the Board commissioned Mr.

Louis Betts to paint a portrait of the President. The painting is temporarily lent to the Brooklyn Museum, and is here reproduced thru the courtesy of the Brooklyn Institute of Arts and Sciences, of which Dr. Boody is the senior member of the Board of Trustees.

Books on America in Foreign Languages

THE New York Library Association Committee on Work with the Foreign-Born is trying to encourage the translation into foreign languages of books reflecting American life and traditions. Since Yiddish is the language of a large part of our new immigration, and has a literature in which continental life is more adequately portrayed than American, the Committee with the cordial co-operation of the American Library Association Committee on Work with the Foreign-Born is urging translations in that language. Suggestions from librarians interested in work with foreigners were used to make up a list of fifty books considered desirable for translations into various languages, most of them tested by use in one or more languages of our immigrants or by popularity among our English-speaking foreign-born.

Five books are under consideration for early publication if enough support can be gained from libraries thruout the country. These books will be brought out by a Yiddish publisher who has a high standard for translation and publication, if he can be assured of a sale of five hundred copies of each within the first year after publication. This seems to the Committee a reasonable condition.

Hawthorne's "Scarlet Letter" and Harte's "Luck of Roaring Camp" have already been translated and can be published within two or three months if adequate support is given. These two novels were considered desirable for translation because they show periods and conditions of American life now largely historical and a part of our tradition. The "Scarlet Letter" is specially popular with Jewish readers. "The Luck of Roaring Camp," with the accompanying Western stories shows a phase of American life usually known only thru lurid cinema presentation.

Altho Lincoln is the hero of the foreign-born, there is no biography of him in Yiddish. Charnwood's "Lincoln" with its wide sweep of American history and politics was chosen as possessing the greatest appeal for the intelligent Jewish reader. We hope that an arrangement can be made with the American publishers of this and the two following books for the translation, if a sufficient demand is indicated.

Garland's "Son of the Middle Border" was selected for its picture of pioneer life and hardships in the growth of our great Middle West.

As there is no one-volume history of the United States in Yiddish, the Committee felt that need to be the greatest, and hopes that Muzzey's American history will be translated and pub-

lished. It has recently been translated into French for use at the Sorbonne, and is exceedingly popular with English-speaking readers in foreign libraries.

The Committee feels that the translation of American classics is a most important contribution to Americanization work, since foreign readers are eager to learn about America even before they read English. Books that faithfully reflect phases of American life have been chosen rather than those written specially for the foreigner, showing only the idealistic side of our national life. The Committee feels that true pictures rather than touched up ones should be put before the immigrant as well as before the native-born, and will lead to a better understanding of American life.

One hundred subscriptions have been received in advance of publication of these first five books of an American Library in Yiddish. The Committee urges every library which supplies Yiddish books to its public to subscribe to these five books (to be published at a cost of two dollars to three dollars) writing to Esther Johnston, Chairman, Committee on Work with Foreign-Born, New York Library Association, 192 East Broadway, New York City.

Peruvian Libraries

The following are the principal libraries in Peru:

Lima

- Biblioteca de la Academia de Medicina.
- Biblioteca Municipal.
- Biblioteca Nacional.
- Biblioteca de la Escuela de Ingenieros.
- Biblioteca de la Escuela de Minas y Construcciones Civiles.
- Biblioteca del Instituto Historico del Perú.
- Biblioteca de la Sociedad Geografica de Lima.
- Biblioteca de la Universidad de San Marcos.
- Biblioteca Escolar y Administrativa.
- Biblioteca de la Facultad de Ciencias Naturales.

Cajamarca

- Biblioteca "La Popular."

Cuzco

- Biblioteca "El Progreso."
- Biblioteca Publica y Musea.
- Biblioteca de la Universidad del Cuzco.

Libertad

- Biblioteca de la Liga de Artesanos y Obreros.
- Biblioteca de la Sociedad Auxilios Mutuos del Carmen.

Arequipa

- Biblioteca Universidad.

Truxillo

- Biblioteca de la Universidad del Truxillo.

Simmons College School of Library Science

By JUNE RICHARDSON DONNELLY, Director

THE visitor to the Simmons College Library School, as we usually call it for short, finds its headquarters in a suite of rooms on the third floor of the main instruction building of the College, on the Fenway, Boston.

Until very recently the College had no name visible, a piece of modesty very trying to the visitor seeking it, who is usually directed to it as "the building next to Mrs. Jack Gardner's Italian palace." When he arrives, he finds the College in the midst of a great educational group, the most beautiful of which are the buildings of the Art Museum and the Harvard Medical School.

Soon he reaches the administrative offices of the Library School, two small rooms, and from there one of the School staff will guide him to the big adjoining room, "318." That is the "Home Room" of the library students, envied by the other students in this over-crowded building, because there each student has some space allotted as her own, and can work in peace. It is a room of windows, bright, and gaining yearly in attractiveness. It contains the students' desks, and the School's department library of bibliography and library science, which was greatly strengthened by the acquisition of the Drexel Institute Library School's collection in 1914.

Opening from the "Home Room" is the work-room of the College Library and of the School. This contains also some sixteen hundred volumes gathered for the problems which constitute the laboratory work accompanying courses in cataloging and classification. The College Library is on the floor above, but the library background of the School is far greater than the visitor sees. It includes the Boston Public Library, the Massachusetts State Library, and the wealth of fine special libraries of every type in which the city is so rich, as well as the Public Library of Brookline, and indeed of all the parts of Greater Boston.

To the visitor, who sees a thousand students thronging corridors and classrooms, and who has probably heard that librarians are scarce, it is necessary to explain something of the College and the relation of the School to it. Because the School of Library Science is an integral part of the College, and can not be understood apart from it, I want to give the readers of the LIBRARY JOURNAL the same explanation.

Simmons College, a vocational college, is usually thought of as the embodiment of an idea of education belonging to the twentieth century, and so, in its present physical manifestation, it

is. If we go back to the inception in the mind of its founder, it shares pioneer honors with Vassar in the recognition of the value of higher education for women.

John Simmons, a Boston merchant, was much interested in the founding of Vassar in 1865, and in the plan of the Massachusetts Institute of Technology, founded 1862, and on his death in 1871 it was found that his will of 1867 provided for the establishment of a college for women. With a foresight decidedly ahead of his time, he realized that not only for cultural development, but as an economic necessity, women would require broader education if they were to compete with men in professions and vocations. His will therefore directed that the institution should give instruction "in art, industry and science best calculated to enable its scholars to acquire an independent livelihood." He very wisely abstained from prescribing the exact lines of instruction, but suggested medicine, music, and telegraphy. The College was not opened until thirty years later, simply because in 1872 the great Boston fire so impaired the value of the property of the foundation that it had to be restored before it could support the establishment visioned by John Simmons.

The development of facilities for the higher education of women in that interval complicated the problem faced by those finally entrusted with formulating plans for the new college. Apparently their principle was to avoid duplication as far as possible, but to supplement existing opportunities and to try some new experiments, always mindful of the necessity of preparing women to earn an independent livelihood.

Thus they planned the first vocational college for women, throwing equal emphasis on both words of that phrase. That is, they sought those vocations that needed a solid background of general education and of theory behind the practical application, required trained and well-stored minds, scientific methods of procedure and artistic technic. It seems natural enough to a librarian that librarianship should have been included under those specifications.

The College is organized into Schools, one of which is the School of Library Science. Each School is planned to give in four years' time, first, the most essential elements of a liberal college course, especially those which make the best foundation for the vocation for which that School prepares; second, the technical subjects requisite for that vocation. Many subjects, technical in regard to a special vocation, are of course liberal in themselves.

The Schools, regardless of size, have equal representation in the Committee of Admissions and the Administrative Board. All resident members of the instructing staff are on the College Faculty, and those of professorial rank enjoy a Sabbatical year.

True to its intention to supplement existing educational opportunities, the College has always so arranged its technical programs that women who have received adequate academic education at other colleges can enter Simmons for the technical work alone.

Thus the Library School contains each year two groups of regular students, called familiarly CI's and CII's.

The latter group is easily explained. It consists of women from other colleges, admitted without examination, on their college credentials. Their previous college course must have included a nucleus of prescribed subjects, but beyond that the widest variation is welcomed. For this group the whole library science program is offered in one college year. On the successful completion of the program in one year of residence the degree of B.S. in Library Science is granted. Formerly the degree was deferred until after one year of experience. Usually many members of this group have had library experience before entering the School. A few women of maturity who have library experience and desirable personal and intellectual qualifications are admitted as special students, but not as candidates for the degree. They carry all or the greater part of the technical program. The experience of this "handpicked" group adds interest and actuality to class discussions. Some of the strongest people on the active list are "Specials."

The CI group, coming for a four year period, tho enrolled from the beginning as Library School students, really enter the College rather than the School. That is, they have to fulfil the college requirements no matter which of the schools they mean to enter, and details are published in advance in the College catalogs. Students are admitted on the certification of approved high schools, or on examinations of the College Entrance Board, or on those set by Simmons College. So far we have not adopted the "comprehensive examination" used recently by some of the best colleges. This group in its four years spends three fourths of the time on liberal studies, such as English, modern languages, science, history, social sciences; just such subjects, except for the lack of the classics, as would be pursued elsewhere toward an A.B. degree. Their degree, however, is B.S. in Library Science. I was interested to note recently that when Simmons was opened in 1902 no li-

brary School, except Albany, required as much academic work—three college years—as Simmons has always considered a minimum.

The CI students have the same library science program as do the CII, but it is distributed over their last two college years. It would be much simpler, as an administrative problem, to concentrate it into the Senior year, but so far it has not been done, for two reasons: first, it is an advantage to the college student in her other courses, to know how to handle library tools; second, she can use her last college vacation to acquire practical experience in a library. At present, therefore, elementary courses in reference, classification and cataloging are given in the Junior year, and a fortnight of field work is required the following summer. Actually many students hold paid positions for most of the summer voluntarily. The combined theory and practice brings them to the beginning of their Senior year with a much more intelligently questioning attitude. The "co-op" method appears again in the Senior year, when both CI and CII groups spend two weeks in March in practical work in assigned libraries.

The curriculum need not be dwelt upon in detail, for in its fundamental courses it resembles all the other good one year library schools. For a decade library work for children has been a separate course of at least twenty-five class hours, and now it is accompanied by work in children's rooms. Electives are now offered in school library work and in a course on special libraries.

Each institution of training has its own problems to solve, but the one common to all professional schools is that of combining in its instructing staff teaching ability and experience and familiarity with modern pedagogical methods, while retaining up-to-the-moment practical experience in meeting the current problems of library work. Mr. Bowker, in his article on Riverside, spoke of its method of meeting this difficulty by having short courses by eminent librarians twice a year. That method often secures fine presentation of subjects, and is especially valuable for certain courses to advanced students, if properly co-ordinated in a carefully planned, inclusive, and progressive curriculum. No school can afford to neglect the method, but to depend upon the isolated special course exclusively would seem to me much like trying to run a magazine with some brilliant contributors, but no editor.

The Simmons organization includes an administrative head, a resident staff, and lecturers drawn directly from active work to present certain subjects. Thruout the twenty years of Simmons history it has happened that with rare ex-

ceptions the instructors have been secured from actual library positions, rather than from the instructing staffs of the other library schools. The long summer vacations, the constant visits to libraries, and the fact that much of the work done by instructors in preparation for their courses is done in other libraries so that they continue to know practically the feelings of "the constant reader," help to ward off fossilization. The Sabbatical year is meant to serve the same purpose. Library school people constantly attending library meetings of many kinds, usually have a pretty wide acquaintance which keeps them more closely in touch with the field.

Far more than is generally realized, a library school is a co-operative undertaking, and I never cease to marvel at the generosity with which all librarians with whom I come in contact respond to any appeal for help. It is to these librarians and to a school's graduates that its instruction owes most of its vitality. Their personal letters, their gifts of forms and library publications, their talks to the students, the permission granted to use their institutions as practice fields, their comments on the graduates they know, and the criticisms, whether favorable or the reverse, on the schools, are invaluable in keeping open lines of communication with practical developments. Moreover a library school introduces its students to a wider group of instructors in the editors of, and the contributors to, library periodicals; the authors and publishers of library science books; the library supply houses, and the great fraternity of publishers and booksellers. If it happens to be, like Simmons, in a great city, with all that that means of mental stimulation, the environment is one of the most potent teachers.

During the formative period Miss Mary Esther Robbins guided the development of the School. From 1902 to 1913 she was in charge of it, and in addition to her administrative duties taught cataloging and classification and much of the library economy, still finding time to be a friend to every "library girl." Among the members of her staff were Miss Frances Wiggin, and Miss Grace Hill. Mr. Charles K. Bolton, ranking officer of the School 1910-13, gave the course in the history of libraries until his resignation before his visit to England last year. The present director of the School has held that post since 1913. The instructing staff has included many members whose names are well known in library accomplishment. Miss Whittlesey began her library school teaching at Simmons, Dr. W. Dawson Johnston came on leave from the Library of Congress and Miss Mudge from Columbia. Mr. Belden gave our course in Documents, and Miss Jordan still con-

ducts the work for children. The Brooklyn Public Library earned our gratitude by letting us borrow Miss Hitchler to teach cataloging in 1913-1915, and, incidentally, to serve as a tonic in a period of transition. We have always thought of cataloging and reference as the foundation of a safe library edifice, and every effort has been made by Miss Mary E. Hyde and Miss Harriet Howe to develop strong cataloging courses. The reference courses, too, have been fostered successively by Miss Donnelly, Miss Isabella M. Cooper and Miss Florence Blunt.

"By their fruits ye shall know them," so we speak with confidence of our crop of 429 graduates. One hundred and fifty of them received their academic education before entering the Library School, the others are our four year students. At present some 263 graduates are on our active list, as well as about fifty others, not graduates, but good "Simmons girls." They have hardly, even yet, measured themselves against the older schools for the biggest prizes of the profession, for two-thirds of them have been graduated since 1914, and so, the majority are between twenty-three and thirty years old. Nevertheless, a recent survey showed an interesting range of positions of responsibility. For instance, sixteen are heads of public libraries, eight of college, twenty-four of school, six of business, libraries. The library commissions claim four, ten are head catalogers, eight head reference librarians, and six chief children's librarians.

Our foreign contingent has been comparatively small. We do not count our Canadian neighbors as foreigners, of course. Two Japanese women, however, have carried our course. One is doing valuable work on the Japanese and Chinese collections of the Boston Museum of Fine Arts, the other has just returned to Japan with her husband, who, like herself, is intensely interested in library work for children in Japan. The Dean of the new Library School at Boone University (China) spent a year at Simmons two years ago, preparing for this addition to her noted achievements in the Library of that University. Mrs. Henrietta Derman, recently of the Slavonic Department of the Library of Congress, has also just returned to her country, hoping to promote library welfare in Russia. She has prepared booklets in Russian and Lettish on "The National Library and its Activities," "American Library Methods," "Co-operative Cataloging," all to aid in library propaganda. A charming Norwegian from the Bergen Public Library spent a part of last year with us, just before her marriage.

A six weeks summer session is held each year. In most of the years a general course has been

given for those already engaged in library work. Special courses in library work with children are usually given by women prominent in that field, as Miss Alice M. Jordan, Mrs. Root, Miss Alice Higgins, Miss Alice I. Hazeltine.

As the N. E. A. meets in Boston this summer, it has been decided to offer a special six weeks' course on school libraries. Another special course which may meet a current need will be given on special libraries. Since the special courses are equivalent to those offered in the regular college year they receive college credit, when the student can offer the academic prerequisites asked of its regular students. Our good friends, the Massachusetts Division of Libraries, add a great attraction to the summer school by arranging their summer library conference, which is held at the College, to come while the summer session is being held.

With an increased enrollment in the Freshmen and college graduate groups this year, and the hope of a greater endowment in the future, the School looks forward to greater usefulness each year.

Who Will Help Russian Librarians?

IN the last number of the LIBRARY JOURNAL appeared an appeal by Madame L. Haffkin Hamburger to American librarians to send recent and current publications for the use of the students of the State Institute of Library Science in Moscow.

While in this country in 1914 Madame Hamburger attended the summer session of the New York State Library School, and a letter just received by Director J. I. Wyer tells of some of the plans and difficulties of a band of library workers in a country where "The lights are ahead."

When I left the shore of your hospitable country, I received a last greeting from my American friends undersigned by yourself and now I begin by asking you to remember me to all my American friends and especially to the kind staff of your Library School.

It was a great joy for me to receive the November number, 1921, of the *New York Libraries*—the first American Library material I had seen since 1916. I am still alive, as you see from the fact that I write a letter, but it may be a wonder, so many of our library people have perished from starvation and typhus. I am even doing library work. The division of library science in the Shaniavsky University was progressing—there were one-year library courses for scientific librarians, one-year courses for librarians of public libraries, summer courses, etc.—when in 1920 the University was closed and its building became a communist school. The former library division now exists as a "State Institute of Library Science," and even occupies the same rooms. It is easy to tell it now, but it was not at all easy to obtain it. Perhaps one day I shall be able to give you a full account of our work of those seven years, but I cannot do it as yet. The Institute has library courses, a library information bureau, a library museum, a model library and it organizes conferences,

etc. I am principal. We expect to have, in a few months, a Pan-Russian library convocation called by the State, and I have a great wish to have in our Institute on that occasion, an exhibition of achievements in foreign libraries during recent years. We have had no connection with other countries, we don't know what has been done in the library field. Please help me in getting for that purpose as much American material as possible. You cannot imagine to what extent American methods are now being adopted by our libraries, working in quite adverse conditions, and I can assure you that your co-operation will pay. Pictures, picture bulletins, samples of library advertising, diagrams, reports and especially library literature, library journals, will be very welcome.

If possible, we should like to have just a fragment from a good American dictionary catalog (we have that *printed* in the first volume of A. L. A. catalog), but I mean a fragment from a dictionary card catalog. Of course, all the publications of library schools since 1916 are very necessary. May be you can write a circular letter about it to important libraries or have an appeal printed in the library periodicals. But it must be done as soon as possible, that the materials may arrive in time. I suppose it would be best to send them by post separately and not thru the Smithsonian Institution, because that would take too long.

Recently I sent you a post card thru the A. R. A. (American Relief Administration) but it needs explanation. It was not for my sake, nor to yourself personally, but may be the staff of the N. Y. State Library School would be willing to send thru the A. R. A. one standard food package for each member of the staff of our Institute of Library Science, (excepting myself, whom I pray not to reckon, because I am in better condition; I have a sister in America from whom I expect just such a package for my family). Not only the food contained in this ten-dollar package costs millions on our market and is inaccessible to librarians, but a friendly link would be a great moral support to your Russian colleagues, who in the days of trial have remained faithful to their work. Just one fact: in Petrograd the librarian of the Military-Medical College, Mr. Voinich-Sianodzinski, one of the best known Russian librarians, did not come to his office for two or three days. Somebody went to visit him and found him dead in his room. He lived alone (having sent his family to another less hungry place) without attendants, as we all do now, and God knows whether he had or had not suffered and wanted aid in his last hours alone in the cold gloomy room.

These are thorns, but we see also roses, the very small ones, in the developing of different library types, in getting new readers, etc. And even in the saddest moments we bear in mind the words of our beloved writer Korolenko: "The lights are ahead," and we do our best to go on.

Yours faithfully,

L. HAFFKIN HAMBURGER.

Replies to Madame Hamburger request should be addressed to Mme. L. Haffkin Hamburger, Principal, State Institute of Library Science, Meons Place, form. Shaniavsky University Building, Moscow, Russia.

Printed material can most easily be sent as third class matter in parcels weighing not over 4 lb. 6 oz. each. In this way trouble with "declarations" can be avoided.

The ten-dollar standard food parcels may be sent thru the American Relief Administration, 42 Broadway, New York City.

Summer Courses in Library Science

New Hampshire College Library

THE Third Annual Summer Library School and Institute for New Hampshire Library Workers will be held at New Hampshire College Library, Durham, N. H., from July 24th to August 5th. Instruction will be free for those employed in New Hampshire libraries or under appointment to such positions and a nominal fee of fifteen dollars charged to others. The lectures will include the following topics all from the standpoint of the small library—cataloging, classification, subject headings, reference work and children's work, in addition to several outside lectures of interest.

For further particulars write to Willard P. Lewis, New Hampshire College Library, Durham, N. H.

Vermont Summer School

THE Summer School of the Vermont Free Public Commission as already announced will be held in connection with the University Summer School at Burlington. The date has just been fixed as August 7th-18th.

McGill University

THE Summer Library School of McGill University, Montreal, Canada, will be held from June 1 to June 30.

The instructors will be: Director Gerhard R. Lomer, University Librarian; Mary M. Shaver, cataloger, of Vassar College Library, Poughkeepsie, N. Y.; Blanche McCrum, assistant librarian, Washington and Lee University, Lexington, Ky.; Jean Cameron, assistant librarian, McGill Medical Library; Laura A. Young, Doris A. Lomer, Elizabeth G. Hall, and Margaret E. Hibbard, of the University Library; Charlotte Houston, librarian, Montreal High School; Mary Dudley Muir, David Ross McCord National Museum, Montreal.

The course is intended to give a general introduction to library routine and to afford practice in elementary cataloging and classification.

The courses of study will be:

A.—Technical Courses: Elementary Cataloging, Miss Shaver; Classification, Dr. Lomer and Miss Shaver; Book Numbers, Miss Shaver; Accessioning, Miss Hibbard; Shelf-Listing, Miss Shaver; Binding and Repairs, Miss Cameron; Alphabating, Filing, and Indexing, Dr. Lomer and Miss McCrum; Library Handwriting and Typewriting.

B.—Bibliographic Courses: Reference Work, Dr. Lomer; Book Selection and Subject Bibliography, Miss McCrum; History of Books and

Printing, Dr. Lomer; Periodicals and Serials, Miss McCrum.

C.—Administrative Courses: Summary of Library Routine, Dr. Lomer; Library Administration, Dr. Lomer; Library Buildings, Equipment and Supplies, Dr. Lomer; Printed Forms and Printing, Dr. Lomer; Loan Administration, Miss Young.

D.—Special Lectures: The Public Library, Publicity and Extension Work, Miss McCrum; Traveling Libraries, Miss Hall; The School Library, Miss Houston; Museums and their Use, Miss Muir; Special Lecture on "Books in the Balances," by George Iles, author of "Flame, Electricity, and the Camera," etc.

About one hundred and fifty hours will be devoted to lectures and practice work. The fee for the course is \$40. As the number of students is limited, application for admission should be made at the earliest possible opportunity to The University Librarian, 65 McTavish Street, Montreal.

University of Michigan

AN eight weeks' course in library methods will be given by the University of Michigan beginning on June 26th.

The instruction will be given by Director W. W. Bishop, librarian of the University; Francis L. D. Goodrich, associate librarian; Harriet R. Peck, librarian of the Rensselaer Polytechnic Institute, Troy, N. Y.; Clara E. Howard, librarian of the Schenley High School, Pittsburgh; and by Fredericka B. Gillette, William C. Hollands, Edith Thomas, Clare Mullett and Nina V. Preston of the University Library.

The courses are planned chiefly to meet a demand from University students for an elementary knowledge of library methods. They have been found of benefit to librarians of small libraries and to library assistants who have had no library training. The work is not offered as a substitute for a regular full year library course. The courses in high school library work are planned to assist teachers who must take charge of high school libraries in addition to their other duties, and to give some formal training in library work to persons in charge of libraries in the smaller high schools.

All persons desiring to take any of the courses in Library Methods must be admitted by the University Librarian *before registering* for the work in the office of the Summer Session. Applicants for admission to these courses **must** show thirty hours credit in the University of Michigan, or an equivalent. . . . Employment

for not less than one year in a library of good standing may count in lieu of university credits, provided the candidate is a graduate of an accredited high school.

The fee for the courses in Library Methods is \$30.

The courses given are:

Introduction to Library Work. Two hours credit. Librarian Bishop, and Mr. Goodrich.

Cataloging. Three hours credit. Miss Peck.

Classification and Ordering. One hour credit. Miss Peck.

Elementary Reference Work. One hour credit. Miss Gillette.

Book-binding. One hour credit. Mr. Hollands.

The High School Library. Two hours credit. Miss Howard.

Book Selection and Book Buying, particularly for High Schools and the smaller Public Libraries. One hour credit. Miss Howard.

The Collection, Organization, Care, and Use of Current Pamphlet Material; with special reference to Civic Subjects for High School Libraries. One hour credit. Miss Thomas.

Colorado Library Summer School

THE seven weeks' session of the Fifth Annual Library Summer School of the Colorado Agricultural College will begin June 12.

This course is planned for librarians, for those who wish the training necessary to take charge of a small library, for teachers who wish instruction in the use of books, and for students who wish to decide whether to take up library work.

Only those will be admitted who have good health and fitness for the work and who have had a four years' high school course, or who are creditably filling, or under definite appointment to, library positions.

The preliminary course devoted to bookbinding will be given from June 12 thru June 16. Librarians working at a distance from a bindery will find this course invaluable. The six weeks' course in library science will begin June 19.

Students passing the final examinations will be given a certificate. Those who are graduates from accredited high schools will receive college credit.

A fee of \$25 will be charged for the six weeks' course in library science. A fee of \$10 will be charged for the preliminary week in bookbinding. Provision is made for adjustment of fees for those who wish to select their work in groups. Rooms may be had from \$12.50 to \$20 a month. Board varies from \$5.50 a week to \$7. The college cafeteria where

one may get excellent meals is a one minute walk, and the business section of the town eight blocks from the library.

The instructional staff consists of Charles A. Lory, president of the College; George T. Avery, director of the Summer Session; Charlotte A. Baker, librarian and principal of Library Summer School; Zelia M. Rank, cataloger, Colorado Agricultural College; Mrs. Gertrude Gilbert Drury, chief instructor, St. Louis Library School; Helen F. Ingersoll, Supervisor of Children's Department, Denver Public Library; Louis Williams, Denver Evening Vocational High School; Laura Makepeace, assistant, Colorado Agricultural College Library.

Several evenings a week the college summer school will have lectures by educators of national repute. These will be open to summer school students. There will also be special lectures by librarians in addition to the following courses:

1. Classification and Cataloging. Miss Rank.
2. Library Economy. Miss Rank, Miss Baker, Miss Makepeace.
3. Children's Work. Miss Ingersoll.
4. Reference Work and Book Selection. Mrs. Drury.
5. Documents. Miss Baker.

Circulars giving fuller information may be obtained about April 1 from the principal, Charlotte A. Baker, The Library, State Agricultural College, Fort Collins, Colo.

Riverside Library Service School

THE Summer Session of the Riverside Library Service School will begin June 26 and continue for six weeks.

Teachers and subjects are as follows: Theresa Hitchler, Cataloging and classification; Edna Whiteman, Children's literature and story-telling; Ardena Chapin, Book selection, Library administration; Lillian L. Dickson, Reference and documents; Alice M. Butterfield, The high school library: Library law; Mabel F. Faulkner, Binding, repair and library handicraft, Periodicals and serials.

The tuition fee is \$30. An additional fee of \$2 is charged for catalog cards.

Applications should be addressed to the Riverside Library Service School, Riverside, California.

In the LIBRARY JOURNAL for March 15 appeared announcements of summer courses at the following schools: Simmons College; Vermont, New York State, Columbia, Georgia, Illinois, Wisconsin, Iowa and Oklahoma Universities; Chautauqua, New Jersey, Pennsylvania, and Indiana.

"Sure Fire" Publicity at Pittsburgh

AN opportunity to cater to a ready-made market with publicity that was, from the facts of the case, practically "sure-fire," recently presented itself to the Pittsburgh Public Library.

A questionnaire sent to several hundred libraries by the Bureau of Education at Washington showed the Musical Collection of the Pittsburgh Library to rank among the first twelve in this country. To bring the facts of the size and extent of the collection to the particular people interested and these people to the books, a Music Week was instituted on the following plan.

The date was chosen so as to "catch" the biggest meetings of the year of the city's two largest musical organizations. At these meetings appeared effective posters announcing a music exhibit at the Library and the slogan "The Library Lends Music"; a generous allowance of leaflets and a "four-minute" man. The Superintendent of Music in the Public Schools and the City Organist volunteered, respectively; their popularity as men and their standing as musicians were invaluable "boosts" to the Library. A mailing-list of twelve hundred covered these organizations again and filled up all gaps left in the profession. Meanwhile posters and leaflets were sent to all City high schools, all branch libraries and three large institutions offering music courses. The Pittsburgh Musical Institute enclosed leaflets with their second semester statements to one thousand pupils and distributed another thousand to "casuals." Every evening paper on the Saturday preceding the exhibit carried an announcement, and every Sunday paper an article by the music critic in his "Music Notes," a feature story by a special writer or a "personal" in the form of a letter to the editor from a particularly well known musician. Forty special articles covered the foreign dailies and weeklies, school and college journals, "society" and district publications.

The exhibit was held in the club room of the Central Library. Its main body was, of course, the scores and books about music in the loan collection. About thirty local composers of rank loaned manuscript of published and unpublished work, such names as Ethelbert Nevin and Victor Herbert drawing much attention to this feature. The Museum Department of the Carnegie Institute and several private owners loaned a few rare instruments, "illuminated" antiphonies, etc.; charming prints from the Department of Fine Arts of the Carnegie Institute and the City's chief art-dealer, plants from the city hot-houses and an art-gallery system of lighting gave it color and effectiveness. The members of the staff in

charge made particular efforts to engage in conversation "all comers" so disposed, and to put reservations immediately on books desired. Quite a business sprang up between the exhibit room and the reference and catalog departments: comments and questions arising from this "business" brought out strong and weak points of the present collection and method of handling and improvements to be made.

The amount of time and money expended by the Library was small; the attendance was larger than at any previous exhibit the Pittsburgh Library has held. The real gain is the fact that the musicians of Pittsburgh as a body now really know the resources of their Library in their own field and are actively interested in its maintenance.

All of which demonstrates the economy and value to a public library of specific appeal and aggressive approach to organized groups in the community.

"Private Book Collectors"

MANY librarians will recall helping in the compilation of the first list of "Private Book Collectors" in the United States. The publishers of the LIBRARY JOURNAL, about ten years ago, invited the librarians in all the more important cities to send in lists of people in their vicinity known to be enthusiastic book buyers and, if possible, to mention the hobbies or specialties of each. As a result a fairly good list in which every state was represented was included in the *American Library Annual* for 1912-13. The list has since twice been revised and extended, the second edition having appeared in the *American Book Trade Manual* in 1915, and the third, further enlarged, as a separate volume, "A List of Private Book Collectors in the United States," 1919. The direct value of this directory, as might be expected, was to bring into closer touch the book buyers of similar taste in collecting, as the list in its final form had a very complete topical index. It was also prized by old and rare book dealers, both here and abroad, for its importance as a mailing list for catalogs.

A fourth edition is now in preparation, and a thoro revision is being made thru direct correspondence with every collector mentioned in the preceding one. Librarians interested in having their cities adequately represented can help the editor materially by sending at an early date the names of other active book buyers of whom he can request information and for permission for inclusion in the new list.

The Passionate Reference Librarian to His Love

(With Apologies to Christopher Marlowe)

COME live with me, and be my love,
And we will all the pleasures prove
That facts and figures can supply
Unto the public's ravished eye.

We'll sit us down 'midst books galore
And never say: "Oh, what a bore!"
A million facts of every sort
Shall prove for us the greatest sport.

We'll learn how the last census closes
(All the art of counting noses);
Oh, if these pleasures may thee move,
Come live with me, and be my love.

We'll note the data fair and full
Relating to the price of wool,
The annual change of heat and cold,
The death-rate, and the price of gold.

Per-centages shall stir our blood
Also surveys, as clear as mud.
We'll know a joy most sweetly solemn
In clippings field by lengthy column.

More analytic cards shall be
Prepared each day to give us glee.
Come live with me, dwell by my side,
Help me consult the *Readers' Guide*.

For lexicon: Liddell and Scott,
For gazetteer: see Lippincott.
If these delights thy mind may move,
Come live with me, and be my love.

J. E. TOWNE,

University of Illinois Library School.

Photostat Copies of Rare Books

THE Harvard Library has had occasion recently to reproduce by photostat for correspondents several rare books or pamphlets. Additional copies of the following can be supplied at a flat rate of fifteen or twenty cents per page, according to size.

[Philip C. Webb.] A short account of Danegeld; with some further particulars relating to Will, the Conqueror's Survey. By a member of the Society of Antiquaries. London, printed in the year 1756. 4°. pp. (2), 38. \$8.00

The copy reproduced is one given to the Harvard Library by Thomas Hollis in 1764, bound with four other papers read before the Society of Antiquaries in its early days.

A full collection of all poems upon Charles, Prince of Wales, published since his arrival in Edinburgh the 17th day of Sept., till the 1st of Nov. 1745. [Edinburgh?] 1745. pp. 24. \$3.60

A description of Georgia, by a gentleman who resided there upwards of seven years. Lon., 1741. pp. 8. \$1.60

Journal of the Proceedings of the Common House of Assembly of Georgia at the first session of the seventh General Assembly, Savannah, 30th October, 1769 [to 10 February, 1770] pp. 52. \$10.40

As opportunity occurs, other reproductions will be offered from time to time.

WILLIAM C. LANE, *Librarian.*

Headquarters for Librarians in Paris

THE Trustees of the American Library in Paris, 10 rue de l'Elysée, 8^e, invite American librarians to make the Library their headquarters while in Paris, and the Director of the library will be glad to assist them as far as possible in becoming acquainted with the libraries and booksellers of the city.

It will promote the use of the Library if they will also insert in their local newspapers and college journals an invitation from the Trustees to any who are visiting Paris this summer to make use of the resources of the library, its collection of books for the tourist, its files of current American magazines and newspapers, and its information service.

The library will also furnish competent and experienced guides to persons desiring to make the most of a short visit.

W. DAWSON JOHNSTON, *Librarian.*

Poland Needs Books on Sociology

STEPHEN P. DUGGAN, director of the Institute of International Education, calls attention to a request recently received:

The Department of Sociology in the University of Poznan is in great need of American publications on Sociology. This is the only institution in Poland teaching Sociology, and it is under the direction of Dr. Florjan Znaniecki, joint author with Professor W. I. Thomas of the great work in five volumes called "The Polish Peasant." If any readers of the LIBRARY JOURNAL can furnish books on this subject, these should be sent directly to: Dr. Florjan Znaniecki, Department of Sociology, University of Poznan, Poznan, Poland.

On Monday evening, April 3, by invitation of the St. Louis *Post-Dispatch*, Dr. Arthur E. Bostwick, Librarian of the St. Louis Public Library, made an address on libraries, in connection with the radio broadcasting service of that paper. This address was heard at all receiving stations within two hundred miles. There may be a suggestion here for additional library publicity.

The Indianapolis Public Library has arranged with the John Herron Art Institute to lend for display at the Library each month one painting by some prominent or famous artist.

THE LIBRARY JOURNAL

TWICE-A-MONTH

APRIL 15, 1922

IT is gratifying to note that the most eminent spiritual potentate, in the faith of loyal Catholics, and the highest secular official in the world, in the view of good Americans, may now be connected with the library profession. For the first time in history there has been elevated to the papacy in the person of Pius XI one whose life training has been that of a librarian. This has given him the widest outlook on world affairs from the intellectual as well as spiritual point of view. The latest accession on the other side is that of President Harding, who, it is understood, will accept the honorary presidency of the American Merchant Marine Library Association and thus enroll himself in association with the library profession. If there is any doubt that the library profession is really a profession with worthy membership, these two instances should strengthen the belief of librarians that they are really among the most important people in the world!

★ ★ ★ ★ ★ ★ ★

RUSSIA and Germany are the two countries from which, when their economic problems begin to be solved, the greatest library development may be expected. It is good news that Mme. Haffkin Hamburger is alive and at work, and we ask every sympathetic librarian to read and act upon her letter to Mr. Wyer, printed elsewhere. We take for granted that many librarians will wish not only to send her by post all available material, but to provide something toward the food supply for which there is such pitiful need among fellow members of our profession. Accordingly, we are arranging to send \$100 worth of these food packages at once to Russia, and should be glad to have contributions from fellow librarians to make up and exceed this amount. The American Relief Administration, 42 Broadway, New York, provides for the delivery of \$10 packages to specified persons in Russia; subscriptions may be sent to the LIBRARY JOURNAL or forwarded on application forms, obtainable thru most banks, to the A. R. A. with postal order or proper check. Freed from the Czar despotism which kept public library development largely underground, tho for the moment netted in a new despotism, Russia ought before long to be able to steer for "the lights ahead" and then amaze other countries by the rapidity of her

development in this field, as she has done more than once in other fields. Germany, also, should be forging ahead now that she is relieved of the Prussian superstition that libraries can be better administered by a central authority which saves them the trouble of thinking or doing for themselves, as a "Kaiserlich" professional once frankly put it. It is a great misfortune that the German library world lost in the death last December of Dr. Schwenke—with whom the writer had sympathetic converse without thought of the war cloud impending in the very week of the first declaration—one who was the most progressive of German librarians in his international intercourse, as at Brussels in 1910, with his fellow librarians from other countries. New men, however, will rise up for the new times, when both Teuton and Slav will come to their own again and be aided in the new development, as America has been aided, thru her public library system.

★ ★ ★ ★ ★ ★ ★

SPAIN left to the Latin-American countries rich traditions of culture, and the habit of establishing libraries in her municipalities affords the germ for modern library development. These were usually reference libraries, for use within narrow circles, for circulation departments were not within ken in those days. In fact, within recent years the national library of Chile communicated with the public chiefly by a ticket-seller's window, thru which the few books circulated were passed out. The Latin republics have still to develop a true public library system, but there is great promise in several countries, as Mr. Spaulding's excellent paper points out. It is a pity that the splendid plan which took him and his associates to Lima proved to be only a scheme on paper, premature at the moment and unsupported by possibility of adequate funds. Still, good seed has been sown and the traveling libraries provided by the American colony in Lima, if they can be intelligently handled, should be the beginning of good work thruout this forward-looking republic. Incidentally, one good result has been that an American librarian has come back to us with first-hand knowledge of conditions in Latin America, which may hereafter bear fruit. Mr. Spaulding has been cordially welcomed home again, in a new field as a library mission-

ary for a firm which is doing real service to libraries thru its introduction of better methods and new library devices.

★ ★ ★ ★ ★ ★ ★ ★

ALL this suggests that in the library field America has a function of world leadership which should take courage from President Harding's and Secretary Hughes' triumphs for America and the world thru the Washington Conference. That has rescued for us a repute in other countries which was getting sadly clouded. The American Library Association should not hesitate to take part in world advances, and it is to be regretted that the project for the Italian world exhibition reached us too late for the participation which otherwise would have been gladly given. Two other international movements are on foot which have not developed sufficiently to form an opinion upon what participation should be practicable. One is a world conference on education which it is proposed to hold in this country, in co-operation with the National Education Association, and the other, fresh world co-operation in the preparation of the International Catalogue of Scientific Literature, which is promoted by our internationalist friends in Brussels, where the Institute still lives and looks forward with rejuvenated Belgium to new success in the future. We shall hope that effective participation in both may prove desirable and practicable.

★ ★ ★ ★ ★ ★ ★ ★

THE tariff bill reported by the Senate Finance Committee, April 11th, happily includes books for public libraries and like institutions on the free list, altho this item was omitted from the published reports in daily papers. Thanks to Dr. Raney's energetic representation of the A. L. A. the restriction to two copies in any one invoice has been altogether removed. The general duty on books is fifteen per cent, except for those of American authorship which is twenty-five per cent—a clause to meet the fears of the printers lest, in view of the present high rates for typographic work, publishers should send manuscripts abroad for printing. The one objectionable feature of the bill is the wording of one provision in the free list, the full significance of which is not at first sight evident. The free list includes "unbound books which have been printed more than 20 years at the date of importation; books which have been printed and bound more than 20 years at the date of importation," which phraseology relegates old books which have been bound within twenty years to Section 1310 prescribing the general duty on books. The result is that a First Folio Shakespeare, costing perhaps \$10,000, if it happened to have been bound within 20 years,

would be subject to 15% duty on content as well as binding, or \$1500—a prohibitive rate. The duty should be levied only on the value of the binding and everyone interested in libraries should stoutly uphold this contention. The copyright bill has not yet been introduced into either house, and it is understood that when introduced hearings will not be held or other action taken until the tariff bill has left a cleared field for less pressing questions.

★ ★ ★ ★ ★ ★ ★ ★

THE break-up of the building materials ring of manufacturers and Unions should clear the path for library building both by decreasing cost and by preventing, under the stipulations of Attorney General Daugherty, such abuses as the requirement that stone should be dressed within the Union district and not at the quarries, which so complicated the Philadelphia situation and delayed work on its library edifice. For this the foundations are at last completed and it is hoped the building may be occupied within 1923. The Brooklyn situation has been cleared by legislative enactment, including the public library, in those buildings exempt from the debt limit, on the wholesome theory that such a building is an asset to the city. It will be especially gratifying if this building can be made ready for use within the presidency of Dr. David A. Boody, the honored Mayor of the whilom city of Brooklyn, the first and only President of the Brooklyn Public Library, and before 1925, when the authority of the old Brooklyn Library trustees to nominate half the board terminates and all appointments are in the hands of the Mayor. President Boody accepted the leadership of the new movement for a public library twenty-five years ago, when the old Brooklyn Library was still a subscription institution, and his long service has been happily celebrated by the portrait which hangs in the Brooklyn Institute Museum, of which he is also a trustee, pending the completion of the library building, and by the presentation on his twenty-fifth anniversary of a memorial from his fellow trustees.

LIBRARY CALENDAR

- April 25-26. At Muskogee. Oklahoma Library Association's annual meeting.
- April 25-27. At Boise. Annual meeting of the Idaho Library Association.
- April 27-28. At Tampa. Florida Library Association.
- April 28-29. At the Hotel Chelsea, Atlantic City. Annual meetings of the New Jersey Library Association, Pennsylvania Library Club and American Library Institute.

CANOEOING ON BELLE ISLE—DETROIT'S UNIQUE RECREATION PARK—A RIVAL ATTRACTION TO THE "EIGHT-RING CIRCUS" OFFERED BY THE PROGRAM COMMITTEE

LIBRARY ORGANIZATIONS

THE DETROIT CONFERENCE

RESERVATIONS for the Detroit Conferences are being made rapidly, and early registration is advisable. Information on hotels, regular and special travel rates and an outline of the program will be found in the *LIBRARY JOURNAL* for February 1, p. 126-127, March 15, p. 274 and April 1, p. 314-315.

A Detroit Local Committee has been appointed:

Bernard Ginsburg, Board of Commerce, general chairman; Adam Strohm, librarian, Public Library, general secretary; Blanche Tate (Transportation), Jessie Chases (Reception), Natalie Hutton (Information), William Webb (Hotels and Exhibits), Frederick Goodell (Automobiles), Mrs. Madelene Hirth (Excursions, Trips and Entertainments), Marion R. Service (Hospitality, City Clubs and Country Clubs), Edna Moore (Guide Books and Publicity), Elizabeth Knapp (District Libraries).

SPECIAL RAILROAD RATES

Advantageous special rates have been secured. Since the announcement printed in our number for April 1, the Southwestern Passenger Association has granted reduced rates, so that now round trip rates of one and one-half are offered by the New England, South Eastern, Trunk Line, Central, Western and South-western passenger associations.

SPECIAL RATES FROM NEW YORK

By a combination of rail and boat and by the use of party rates, A. L. A. members can obtain very advantageous arrangements for travel to and from the conference. Definite announcement cannot be made at present, but it is probable that the rate for those who travel with the A. L. A. party will be about \$31 for the round trip as against a round trip rate of \$37.23 based on

the convention rate of fare and one-half. The rate of \$31 will permit of a side trip from Buffalo to Niagara Falls. It is planned that the New York party will leave Saturday night, June 24th, reaching Buffalo Sunday morning, spending Sunday at Niagara Falls or in Buffalo and leaving on that boat Sunday evening. The low rate of \$31 is possible only if fifty or more join the party. It is requested that those who wish to join the Saturday night party from New York or similar parties from Philadelphia, Baltimore, and Washington will communicate with Charles H. Brown, Bureau of Navigation, Navy Department, as quickly as possible. Definite announcement will be made later.

COUNTY LIBRARY EXHIBIT

A joint committee has been appointed by the A. L. A. and the League of Library Commissions to make a county library exhibit at the Hotel Statler during the Conference. Loleta I. Dawson, county librarian of the Detroit Public Library, is chairman. Small appropriations have been made by the two organizations for the expense of assembling the material. It is expected that the result of the committee's work will be the most complete display of county library activities and county library methods that has ever been brought together.

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

ON March 22nd, a "Program of Work Meeting" was held by the District of Columbia Library Association in the attractive annex of the Grace Dodge Hotel.

President Dorsey W. Hyde, Jr., introduced the speaker, William Mather Lewis, education specialist of the National Chamber of Com-

A CORNER OF THE LOBBY OF THE HOTEL STATLER, THE HEADQUARTERS FOR THE DETROIT CONFERENCE

merce, Civic Development Department. Mr. Lewis spoke of the special need for intelligent and correct thinking during these after war days. "In view of these conditions the librarian becomes a more important factor in progress than ever before. He is the liaison officer between the accumulated knowledge of all the ages and the great army of seekers after truth. The great majority of our people leave school before they enter the high school. The library from then on throught their lives becomes their school and university, as it was to Abraham Lincoln. . . . Most people do not know of the special libraries in the various government departments, but they are the schools to which officials turn for the facts which aid them in serving the public efficiently. The department librarians never step into the limelight, but without them the business of government would be sadly handicapped."

Mr. Hyde then spoke of the letter he had written to each member of the Association asking for suggestions as to what the organization should do to obtain more valuable service and better co-operation among the libraries of the District of Columbia. He had received some very helpful and constructive answers and read interesting extracts from them. With the aid of suggestions received he had made up the following program of activities:

I. Committee on Informational Resources

To make an intensive study and survey of the informational resources of the libraries of Washington, and to compile a detailed report thereon, such report to be published by the Association for the aid and convenience of its members and others.

II. Committee on Publicity and Education

To prepare news stories and special articles upon the

service and activities of Washington libraries based upon the census already published, upon the findings of the Informational Resources Committee, and other material furnished by various members of the Association, and to provide for the release of such material thru the various Washington newspapers.

III. Acquaintance Committee

To increase personal acquaintance among Washington librarians as a means of fostering closer co-operation and also to increase the membership of the District of Columbia Library Association.

IV. Committee on Employment

To keep in touch with all library opportunities in Washington, to receive applications for library positions, and to refer such applicants to persons in need of their services.

V. Committee on Professional Problems

To study all matters relating to the professional status of librarians and the library profession in Washington; to follow the progress of reclassification legislation, and, in co-operation with the Publicity Committee, to work for more widespread public recognition of the importance and value of professional library service.

VI. Committee on Library Training

To study the present facilities for library training in Washington; to co-operate with national movements for the improvement of library training in Washington and elsewhere.

VII. Committee on Entertainment

To develop programs for meetings; to obtain able and forceful speakers, to plan the details of meetings, and to make every effort to insure interesting and helpful gatherings.

Copies of this program were passed about among the sixty-five librarians present and discussed while refreshments were being served. The evening ended with a feeling of satisfaction that the organization had accomplished a real beginning towards more and better facilities for library service in Washington.

IN THE LIBRARY WORLD

MASSACHUSETTS

Malden. In the ten years of Librarian Herbert W. Fison's administration, the number of active borrowers of books from the Malden Public Library has increased from 8,662 to 13,377; the circulation from 189,929 to 324,275, or 77 per cent; and the total number of volumes in the library from 64,203 to 78,502. The annual budget has grown from \$20,027 to \$32,461, and the endowment fund has increased \$18,361 from bequests. The expenses for the year were \$33,302. The Main Library required \$29,343; Maplewood Branch, \$2,424; and Linden Branch \$1,534.

RHODE ISLAND

Providence. An increased volume of work, entailing among other activities the circulation of 685,949 books, 335,664 from the Central Library and 300,285 from the five branches and three sub-branches, was handled by a numerically inadequate staff in congested quarters in 1921. A staff of three only was available for the work of the children's room, where 19,623 more books were circulated than in 1920, or 107,539 in all. The extension of the main building was again postponed.

Publicity for the work of the library was embodied in the weekly notes in the daily newspapers, the monthly section of the *Providence Magazine* and the library's own publication, the *Quarterly Bulletin*, all under the direction of Eva S. Gardner.

The number of borrowers' cards in use was 46,190 at the end of the year, an increase of 18 per cent. The book stock comprised 245,716 volumes, of which 21,645 were added that year by purchase at a cost of \$34,628. Periodicals and binding consumed \$15,844. Salaries for library service were \$104,904; for building service \$16,455. Of the receipts of \$205,089 the city granted \$30,000 (the population of Providence is 237,595), and endowment funds yielded \$142,387.

NEW YORK

Albany. The New York State Library as at present organized comprises eleven sections as well as the Library School. The sections include Executive, Reference, Law, Legislative Reference, Medical, Order, Book Selection, Manuscripts and History, Catalog, Library for the Blind, Shelf. The number of budget positions in the State Library and Library Extension Division has been constant at 106 for the last two or three years. There were 36 resignations

in 1920-1921 from the permanent staff, representing a turnover of 34 per cent as opposed to 25 per cent before the war. Low salaries have been largely responsible for the resignations, and in order to fill the lower professional grades of the library's service it has been necessary to lower the entrance requirements.

In the general library there were 443,393 volumes on June 30, 1921; 119,720 in the traveling libraries, and 10,720 in the library for the blind, a total of 573,350. These three departments circulated, in order, 59,529 volumes, 73,962 volumes, and 15,497 volumes, or 148,988 in all. Bound volumes to the number of 36,055 were received by gift and purchase. Of the expenditures of \$381,890 salaries represented \$138,655; books, serials, and binding \$72,821; grants to free public libraries and for their benefit \$40,852; and grants to school libraries \$117,996.

A count of the Library's present holdings shows that its collection of early American almanacs approaches 5,000 separate pieces issued by the original thirteen states.

NEW JERSEY

In summarizing its activities for the year ending June 30, 1921, the New Jersey Library Commission finds that never before in the history of the Commission has such great interest been shown by the people in reading and in the development of libraries. It is the cumulative result of the work of twenty years not only by the Commission but by libraries, the Federation of Women's Clubs, the Mothers' Congress, and the New Jersey Library Association.

Twenty-six new libraries were organized during the year, eclipsing the previous record of nineteen libraries organized in 1920. Ridgefield Park, Hackettstown and Metuchen voted to support their libraries by taxation. The libraries at Mt. Holly and Bridgeton were made free. A consolidated library has been established in Middletown Township, Monmouth County, to serve eleven small villages and a rural population of about 5,000. After a vigorous campaign to inform the people, Burlington County voted by a three-fourths majority for a county library. Morris and Camden counties voted for tax-supported county libraries at the last election. South Orange township voted favorably on the library question and Palisades Park voted to place their library on the municipal budget. Twenty libraries were aided in re-organization; thirty-seven library meetings attended and talks given; nineteen meetings were

held with library boards; and forty-five public meetings were addressed. Four hundred and twenty-three visits were made at an expense of \$1,369. The kindness of Y. M. C. A. secretaries, Helping Teachers, Farm Demonstrators, Home Economic Demonstrators, and others helped to keep the cost of these visits down.

At a cost of \$10,450,, 11,465 volumes were purchased as a result of the unusually high rates of discount enjoyed by the Commission. The available collection now includes 74,617 volumes. The special loan work has grown until it is almost a department in itself, as evidenced by 41,284 volumes circulated in 1921, an increase of over thirty thousand in five years. New traveling library stations were established in seventy-one communities, and books are now being circulated from 762 centers. To serve these stations 2,289 traveling libraries containing 114,450 books were prepared and shipped from the central office. Redistribution of traveling libraries from a local center instead of the constant return to the central office has proved even more effective and economical than in previous years because of the rise in express rates. Express bills for 1921 averaged \$130 per month, and the action of the express company in withdrawing half rates on return libraries was the main factor in this large increase over the 1916 average of \$70 per month.

The State institutions are in need of books. The library at the State Prison, reorganized and augmented during the year, showed a circulation of over 43,000.

The Carnegie Library at Long Branch has been completed. The borough of Verona thru an amendment of the library law was enabled to accept a Carnegie gift and the library building is now in process of construction. The Memorial Library building presented to the City of Ridgewood by Dr. G. Adolph Anderson is ready for use. The Oxford Steel & Iron Company has erected and equipped a building to be used by the free library of Oxford.

Bayonne. The per capita circulation of the Bayonne Free Public Library in 1921 was 4.9. The Main Library together with three branches and a high school branch circulated 370,090 volumes. There were 2,737 new registrants. The large increase in circulation came at the close of the library's twenty-ninth year.

OHIO

Youngstown. The unemployment situation in Youngstown, a steel centre, had one effect in the increased circulation of books from the Public Library (the Reuben McMillan Free Library), which in the past year loaned 512,005 books, 123,366 more than in 1920, to 27,918 card holders. As the population of the city is

132,358, this represents a per capita circulation of 3.86. More men than women used the library.

Beginning in October a series of afternoon meetings were arranged for the various nationalities represented in the membership of the library. At the first meeting, for Slovaks, over four hundred people, including a good number of men, were present, the Slovak Choral Club gave several animated selections, and the guests at the end of the meeting were shown the library and their books, with the result that forty-three new readers were added to the library. Similar meetings were held for Spaniards and Russians.

The children's work exceeded all records with a circulation of 238,991 books. The Project for Home Reading instituted by Librarian Joseph L. Wheeler continued a success, and 4,113 certificates were issued to children reading over ten books on the list. Circulation from home reading was 109,512.

Receipts were \$72,248; expenditures \$65,067, including \$31,946 in salaries, and \$14,366 for books, periodicals, and binding. The library received last month a bequest of \$10,000 by the will of Dr. Ida M. Clarke, president of the library board since 1901.

ALABAMA

Birmingham. Within two months the city will be asked to vote a bond issue of \$7,000,000 and a three mill increase in taxation. This is to finance a building program which will include a \$750,000 public library. The library plans to spend about \$600,000 on a building and \$150,000 on the site and equipment.

MICHIGAN

Ann Arbor. The cornerstone of the Clements Library was laid on March 31 and the dedication will take place in about a year. In his address Librarian W. W. Bishop spoke of the ceremony and of the formal acceptance of the gift of Americana by the University of Michigan as marking the culmination of the effort made by Regent W. L. Clements in gathering together the collection and putting it where the best results could be obtained and the most good accomplished. In comparing the Clements library with others of a similar nature Mr. Bishop said that there is one library possibly a little more complete; but that the Clements collection is on a par with or better than any other similar library in this country or in the world.

TEXAS

Leavenworth. Thirty-four per cent of the 16,901 residents of Leavenworth are card holders at the public library. The circulation of last year was 112,353, a gain of 12,567 over that of any previous year. The report of the

Important New Ronald Publications

The Retail Charge Account

Prepared for the Associated Retail Credit Men of New York City.
F. W. Walter, Editor.

This book is a detailed description of the methods developed in large city stores for handling their retail problems. The sixteen chapters have been written by the heads of the credit department of Franklin Simon & Co., Oppenheim Collins & Co., Saks & Co., Bloomingdale Bros., and other firms.

They have been co-ordinated into a comprehensive volume by F. W. Walter, Credit Manager of the Bailey Company, Cleveland, Ohio. The book covers every aspect of retail credit-granting and the retail dealers among your readers will find much material in it that they can profitably use.

1922. 264 pp. Cloth. \$3.00.

Human Factors In Industry

By Harry Tipper, Manager, "Automotive Industries."

This comprehensive work deals with the relations of employer and worker, and with experiments in changing or modifying existing organizations in order to better industrial conditions. It is consequently a book of primary importance to everyone, especially employers and employees.

The author analyzes in detail the factors in the present industrial situation, and discusses labor unions, manufacturers associations, the open shop, the employment department, the industrial relations department, bonuses and profit-sharing, etc., and sketches the outlook for industrial society.

1922. 260 pp. Cloth. \$2.00.

The Philosophy of Accounts

By Charles E. Sprague, Ph.D., C.P.A., former Professor of Accounting, New York University, School of Commerce, Accounts, and Finance.

A new edition—with prefaces by four men of high professional and academic standing—of one of the fundamental books with which accountants should be familiar.

From the standpoint of the pure logical reasoning on which accounting is based, this book discusses the mathematical equations of accounting, the construction and form of the account, the balance sheet, assets and liabilities, proprietorship, theory of detection of errors, etc. Does not attempt to deal with practice or detail, but is one of the most satisfactory presentations of fundamental accounting theory. An accounting classic.

5th Ed., 1922. 183 pp. Cloth. \$2.50.

20 Vesey Street, Publishers New York City

Publishers of ADMINISTRATION and of MANAGEMENT ENGINEERING

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small,

Expert and efficient service, the result of years' experience.
The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

Librarian, Elsie Evans, indicates that special attention was paid to work with children, particularly in the schools. Classes from the seventh and eighth grades received elementary library instruction, and twelve volunteer helpers were chosen from these grades for help during the busy fall and winter months. The library had an income of \$7,341.

WASHINGTON

Tacoma. The use in 1921 of the Tacoma Public Library far surpassed all previous records. Preliminary figures indicate that over 580,000 volumes were circulated, a gain over 1920 of about 80,000. At its monthly meeting late in December the board of library trustees had before it the problem of revising the 1922 budget from the \$72,849 requested of the coun-

cil in October to the \$61,851 which will be available, as far as estimates at the time could determine, on the basis of the tax levy of .92 mills and incidental revenue from fines, etc. The board decided to close the library at 9 p. m., instead of at 9.45 p. m., to reduce the annual increase in salary to the assistants from \$7.50 a month to \$5 a month, to increase the fee for reserving a book to five cents, and to increase the annual non-resident fee from \$1 to \$2.

BELGIUM

Louvain. The contract for the construction of the Louvain University Library has been awarded the Foundation Company of New York. The work which will cost about \$1,000,000 is to begin at once.

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

The Lake Placid Club Educational Foundation which has just been chartered by the University of the State of New York has received from the founders of the Club \$424,000, and further substantial gifts are definitely promised by others interested.

The present library of the Club contains about six thousand volumes and subscribes to over one hundred serials. In connection with the work of the Foundation a fine library room to hold about twenty-five thousand volumes is planned.

Club members in residence vary from 100 in April to 1263 in August; and the staff from 300 to 900. The families of staff members add hundreds to this number.

A librarian is needed—one who would be thoroly interested in the development of the library, and in making it of the greatest possible service to the members, the staff and their families, and who would co-operate heartily in the educational work of the Foundation and of the Foundation Press.

It is possible that a librarian who had overworked and who wished at first to give only part time while regaining full health might here work to advantage.

Recommendations and applications should be sent to Melvil Dewey, Lake Placid Club, Essex County, N. Y.

The St. Paul (Minn.) Civil Service Bureau announces examinations for May 31 for candidates for the following positions: (1093) General library assistant, present entrance salary \$105 monthly; (1094) Reference librarian. \$116.80;

(1095) Junior branch librarian, \$116.80; (1096) Senior Branch librarian, \$139; (1097) Principal assistant (reference division) \$138.

Residence requirements are waived.

The salary limits mentioned are given merely to indicate what the compensation is for the position on the date of this announcement.

The examination will consist of (a) practical questions relating to duties of the position, 5 weights; report writing, 1 weight; training and experience, 4 weights.

For application blank, sample questions, etc., apply to Room 413, Court House, St. Paul, Minn.

POSITIONS WANTED

Lady with thoro and wide knowledge of languages and experience in indexing, editorial and research work, especially in art and literature, seeks position. W. A. 7.

Lady with fifteen years' valuable experience in libraries of New England as cataloger, desires position in college or special library. New England states. R. L. B. 7.

Lady, middle aged, experienced in teaching in public high and normal schools and with over four years' experience as assistant librarian, wants position, full or part time. Prefers Canada but would accept suitable position elsewhere. R. A. 7.

Trained librarian with experience as cataloger, children's librarian and story-teller, desires substitute position during August or September in New York State or neighboring State. A. S. 7.

SEVENTY YEARS OF PROGRESS IN WASHINGTON

By EZRA MEEKER

Mr. Meeker, at 91, has written one of the most important historical works that has come out of the great northwest. Always an outstanding figure of his time, he has injected a great deal of his vigorous personality into his book, which gives an accurate, comprehensive survey of the origin, growth and development of the territory and state of Washington. The records and material included in this book make it of great value for reference and historical libraries. Commenting upon this volume the well known Editor, Harvey Scott, in a column Editorial Review said:

"The story, in Mr. Meeker's hands, is a drama of intense interest. It is history, too, not fiction; though it comes through his narrative almost in the nature of romance. The book will live. It will carry Mr. Meeker's name down to future times; for it is a book for which there will be no substitute. As a record of pioneer life in a section of the old Oregon Country it will hold always a distinct place."

JOHN B. KAISER, Librarian, Tacoma, writes:

In "Seventy Years of Progress in Washington," it seems to me you have provided that rare combination of book, a source-book of pioneer conditions and an authoritative manual of current history.

You came to Washington in 1853, the year it became a territory and have witnessed its growth from a state of 4000 inhabitants to 1,400,000.

You have helped to make a great state and your volume deserves a place on the shelves of all libraries which have any pride in their American history collections.

440 pages buckram binding; best grade text book paper; insert illustrations; an elegant volume;

An Important New Title For The Business Library

A business book to meet library circulation needs, should not only be sound as to fact and theory, but should also be useful for a large number of readers. No one knows better than the librarian that in this age of specialization and intensification the art of selling has a great hold on the imagination of all classes of readers, and is one of the subjects most in demand. Librarians will probably be interested in another librarian's opinion of a 1922 Bobbs-Merrill book.

Modern Methods in Selling

By L. J. HOENIG

Designed for all salesmen, whether wholesale or retail, house or road, window dresser, advertiser, letter writer or department manager.

MISS ETHEL CLELAND

of the business branch of the Indianapolis Public Library, who compiled the recent A. L. A. list of business books, expresses her confidence in Mr. Hoenig's book, as follows:

"My pleasure in MODERN METHODS IN SELLING as an addition to business literature and my confidence as to its future success are based on its very evident merits.

"There may be better books on special phases or problems of salesmanship but this seems to me to be the best all round discussion of the selling game as a whole that I know of. I am sure that the copies we have ordered for the Indianapolis Business Branch will be constantly on the go.

"The first part of the book will appeal to practically all students of salesmanship as they never seem to get enough of the practical application of the principles of psychology to buying and selling. The chapter on The Sales Department has more real practical detail in it than is usually met with in discussions of sales management. And I particularly like the inclusion of the chapter on The Sales Letter."

Modern Methods in Selling will give the salesman breadth and understanding which he could not get in the reading of literature relating only to his own work. It is a highly serviceable book from every angle and one we believe you will find worth while to order in quantity.

ADAMS, Edward Brinley, librarian of the Harvard Law School, died in the last week of March. Mr. Adams was librarian of the Social Law Library of Boston from 1910 to 1913 when he succeeded John H. Arnold at the Harvard Library.

BLANCHARD, Grace, librarian of the Concord (N. H.) Public Library, is the author of "The Island Cure" just published by the Lothrop, Lee and Shepard Company of Boston (\$1.50). The "cure" was made not in the overworked South Sea Islands but in some of those off the New England Coast: Isles of Shoals, Orr's Island, Baily's, Monteeagan, Islesford, Mount Desert and Nantucket, and the heroine returns a changed person, even in name. The full page illustrations are by Emil Pollak-Ottendorff.

CAPLES, Mary, 1920 L. A., is story-teller in the elementary schools of El Paso.

McCAINE, Helen J., formerly librarian of the St. Paul (Minn.) Public Library, died on March 30, aged eighty-six. Mrs. McCaine went to the St. Paul Library from New Hampshire in 1874 and in 1877 was appointed chief librarian. During her thirty-seven years the book collection grew from a couple of thousand to nearly 150,000 and the circulation to nearly half a million.

McLAUGHLIN, Gertrude, 1918 L. A., appointed librarian of the county library of Kauai, T. H.

MANLEY, Marian C., assistant in the Sioux City (Ia.) Public Library, has been promoted to the charge of the recently combined circulation and reference department.

MERRILL, Julia Wright, 1903 I., for the past four and a half years library visitor for the Wisconsin Library Commission and instructor in the Wisconsin Library School, began work as chief of the Organization Division of the Ohio State Library on April 3d.

NORTON, Margaret C., formerly of the State Historical Society of Missouri became superintendent of the Division of Archives of the Illinois State Library on April 1.

SMITH, Edith Louise, 1913 C. P. Dip., first assistant in the Morristown (N. J.) Public Library has been chosen librarian of the newly created Morris County Library, the appointment to date from July 1.

TROWBRIDGE, Helen R., 1895 P., the first woman appointed to the Lenox cataloging staff after consolidation with the Astor and Tilden Foundations to form the New York Public Library, resigned March 31.

UTLEY, George Burwell, librarian of the Newberry Library, Chicago, has had the title of chevalier of the Order of the Crown of Italy conferred on him by the King of Italy in recognition of his services to Italy in connection with the Newberry's Dante exhibition last year.

Graduates of the Riverside Library Service School class of 1922 have been appointed as follows: Alice B. Fowler, assistant, Alhambra (Calif.) Public Library; Frances Stockebrand, assistant, Orange County Library, Santa Ana, Calif.; Nellie G. Rowe, assistant at Orange County Library, El Centro, Calif.

The A. L. A. Headquarters' staff in Chicago now consists of the following persons, some of whom have joined the staff within the last few weeks: Carl H. Milam, secretary; Sarah C. N. Bogle, assistant secretary; Eva M. Ford, assistant secretary; Helen Seymour, editorial and publicity assistant; Gwendolyn Brigham, secretary to Mr. Milam and general assistant; Norma J. Johnson, bookkeeper; Isabelle Craig, order clerk; Margaret Pakenham, Florence O. Watson and Cena Bolt, stenographers.

The editorial staff consists of May Masseur, editor; Isabel Starbuck, and Isabel Bowen, editorial assistant; Jessie G. Van Cleve, publications assistant, and Margaret Terwilliger, secretarial assistant.

CURRENT LIBRARY LITERATURE

Leonard L. Mackall's appreciation of Sir William Osler published in the current number of the *Papers* of the Bibliographical Society of America has been reprinted for private circulation.

"Cataloging Rules" by Dorcas Fellows is now ready. (H. W. Wilson Company. \$4.) This is a second and much enlarged edition of Miss Fellows book published in 1915 by the New York State Library.

The list of Technical Books of 1921, prepared by Donald Hendry of the Pratt Institute Free Library for Booklist Books of 1921, is being reprinted by the A. L. A. in a twelve-page pamphlet. Prices are \$3.50 a 100; \$30 a 1000.

Based on a paper read at the last annual meeting of the Ohio Library Association is Gilbert O. Ward's book on library publicity announced for fall publication by the H. W. Wilson Co.

The new Fiction Catalog edited by Corinne Bacon in the Standard Catalog Series (H. W. Wilson Co.) will be ready in the fall. In addition to the author and title list there will be a partial subject index.

The report on certification of librarians presented by Louise G. Hinsdale to the New Jersey Library Association in November with a supplementary statement covering the subject to February 1 is printed in the current (March) number of the *New Jersey Library Bulletin*.

The youngest library periodical is *Library Notes*, the attractive square four-page leaflet published at irregular, but short intervals, by the James Blackstone Memorial Library, Branford, Conn. Between January 10 and March 28 appeared eight numbers of this informing news letter.

The March number of *Varsity* of Columbia University is a Louvain Library number containing a brief history of the Library, a story of the "Drama of Louvain" in 1914-1921 including the laying of the corner stone of the new library and a outline description of the proposed new building.

The papers and proceedings of the twelfth annual conference of the Pacific Northwest Library Association, held at Spokane last September, are now ready. Copies may be had from

the treasurer, Elena A. Clancy, Tacoma (Wash.) Public Library, for seventy-five cents. Back numbers may be secured at twenty-five cents.

The Historical Reading-List for Children, compiled by Leonore St. John Power of the New York Public Library for Van Leon's "Story of Mankind," is being reprinted in response to requests from children's librarians and with the consent of the publishers, Boni and Liveright. It will probably be a sixteen-page list. Prices will be \$3.50 a 100; \$30 a 1000.

The "Sommaire des Sommaires" recently inaugurated as a supplement to the *Bibliographie de la France*, is a classified list of articles in fourteen of the leading French magazines. Two of these, the *Mercure de France* and the *Revue des Deux Mondes*, are indexed in the International Index to periodicals. The others which are included are: *Art et Décoration*, *Le Correspondant*, *Gazette des Beaux-Arts*, *La Nature*, *Nouvelle Revue Française*, *Revue des Beaux-Arts*, *Revue Contemporaine*, *Revue de France*, *Revue Hebdomadaire*, *Revue Musicale*, *Revue Universelle*, and *Science et Vie*.

To information services is now added the Loose Leaf Perpetual Record (vol. 1, no. 1, April, 1922) published by the Perpetual Record Service, 150 West 18th St., New York. The aim is "to present every phase of social activity in such a manner as to permit a continuous record for ready reference. Every group or class organization . . . serving economic, political, or cultural needs is to be treated without bias in its historical development in a mechanical, tabular, and descriptive form. To facilitate filing the record will be issued in loose leaf, each subject or subdivision of subject to be treated within the space of a page. . . ."

"The Book Collector's Guide," by Seymour de Ricci (Philadelphia and New York: The Rosenbach Company, 1921, 649 p. \$10) is a practical handbook of British and American bibliography which aims to remedy the fact that "since the days of Lowndes and of Henry Bohn, no serious attempt should have been made to supply English and American book-collectors with a trustworthy and satisfactory guide. . . . It should . . . prove a useful guide . . . furnishing the collector with a certain amount of indispensable information and telling him, in almost every case, where he may obtain a more minute knowledge of the same subject."—*Preface*.

THE WORLD BOOK

*Organized Knowledge in Story
and Picture*

IN TEN VOLUMES

*Editor-in-chief, PROFESSOR M. V. O'SHEA,
University of Wisconsin*

*Assisted by 250 of the leading educators
of the country.*

A reference library written in non-technical language.

It is now being used in the juvenile departments of all the leading libraries of the country.

Unique system of Loose-Leaf Annuals which keep the work up-to-date.

Monthly Service Bulletins of inestimable value in connection with use of THE WORLD BOOK.

Recommended by the American Library Association in their "Booklist."

Officially approved by 21 State Departments of Education.

Adopted and in use in school libraries of all large cities.

1922 EDITION JUST OFF THE PRESS.

Write for booklet and terms.

LATEST *and* BEST RADIO BOOKS

Radioactivity and Radioactive Substances. By J. Chadwick, M.Sc. 32 illus. and 9 tables. Price, 85c. With a Foreword by Sir Ernest Rutherford, F.R.S. An introduction to the study of radioactive substances and their radiations. The nature of radioactivity and the bearing of radio-active transformations on the structure of the atom.

"The virtues of this little volume of the Pitman Technical Primer Series are that the author does not essay to explain more of his subject than a hundred-page book properly can, and that he presents his material in a logical order and not in the chronological order, which is so frequently done, to the confusion of the average reader."—*N. Y. Saturday Evening Post.*

Directive Wireless Telegraphy. Direction and Position Finding, etc. 57 illus. and 5 tables. Price, 85c. By L. H. Walter, M.A.

Continuous Wave Wireless Telegraphy. 58 illus. and tables. Price, 85c. By B. Mittell.

Telegraphy, Telephony and Wireless. By J. Poole. Price, \$1.00.

"This volume is technically sound, excellently written and produced, and is recommended confidently as an exceptionally comprehensive and accurate introduction to the subject."—*Electrical Review*

Marine Wireless Pocket Book. By W. H. Marchant. Price, \$1.75. (*Ready At Hand* 201422)

The work is divided into six sections. The first section contains a brief outline of the principles of various electrical apparatus. Sections 2-5 deal with the different instruments specially designed for wireless work. The various types of transmitters and receivers are dealt with very fully. Section 6 contains regulations, codes and similar information which is of special interest to the Marine Operator.

Lillian L. Dickson,

Acting Librarian, Public Library.

Riverside, California.

The Legacy of Greece

By GILBERT MURRAY *and others* Net \$2.50

A remarkable book written by a dozen of the world's greatest classical scholars to show what modern civilization owes to that of Greece and what it can still learn from her.

Rabindranath Tagore

By E. J. THOMPSON 85c

A brief but satisfactory biography throwing much light of the oriental subtlety of Tagore's thought. It is based on the original Bengali texts.

Book of Women's Verse

By J. C. SQUIRE Net \$2.50

"Poetry is poetry whoever writes it, but so far as my observation goes, people do feel curiosity about women's contributions to the arts. I felt this curiosity when I conceived this anthology; and it would be stupid not to admit it." A delightful addition to Mr Squire's already long list of charming volumes.

Three Studies in Shelley

By ARCHIBALD T. STRONG \$3.50

Deals with the thought and symbolism of Shelley's poetry rather than with its formal characteristics. A pleasing volume valuable alike for the light it throws on Shelley and as a study of poetic thought.

OXFORD UNIVERSITY PRESS

American Branch

35 West 32d St., New York

The A. L. A. has compiled a list of boys' books for distribution thru libraries, schools, Rotary clubs, and boys' organizations. The list consists of twenty-nine titles briefly annotated. One library is contemplating the purchase of fifty thousand copies for distribution to all boys during Boys' Week which will be observed by Rotary clubs in many cities. The list is especially suited to this purpose, but is equally good for distribution any time during the year and in connection with any organization or by the library itself. It is not designed primarily for distribution in the library; it is something to be given to every boy in town, and especially to those who do not use the library. Prices (with the library's own imprint): \$6 a 1000; \$45 for 10,000.

The complete list of titles of the volumes of the "Classics in American Librarianship" series is announced by the H. W. Wilson Company. The first three volumes of this series of reprints of papers and addresses under the general editorship of Arthur E. Bostwick have already appeared. They are: "Relationship Between the Library and the School," selected by Dr. Bostwick; "Library Work with Children," by Alice I. Hazeltine; "Library and Society," by Dr. Bostwick. Forthcoming volumes are: "The Library and its Organization" and "The Library

and its Home," by Gertrude G. Drury; "The Library and its Contents," and "The Library as a Vocation," by Harriet P. Sawyer; "The Library Within the Walls," by Katherine T. Moody; "The Library Without the Walls," by Laura Janson; and "The Library and its Workers," by Jessie S. McNeice.

Two brief A. L. A. Reading Courses are now in the printer's hands. These are more than lists; each one describes a brief but comprehensive course of study and prescribes the books which should be read and the order in which they should be read. They have been prepared by university professors who are in the habit of giving just this sort of advice personally to young men and women. The courses are not, however, especially academic in character, but are well suited to the needs of readers in even the smallest libraries. The Course on Accounting will be an eight-page booklet involving the study of seven books, and the Journalism Course, a four-page leaflet, recommending ten books. Other courses are in preparation.

These courses will be supplied practically at the cost of printing, and it is hoped that they will help libraries to meet the needs of ambitious readers anxious to read seriously on a given subject.

Creswell, E. J. J. Sponges: their nature, history, modes of fishing, varieties, cultivation, etc. Loudon:

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, Of the LIBRARY JOURNAL, published Twice-a-month, at New York, N. Y., for April 1, 1922.

STATE OF NEW YORK,
COUNTY OF NEW YORK, ss.

Before me, a Notary Public in and for the State and County aforesaid, personally appeared J. A. Holden, who, having been duly sworn according to law, deposes and says that he is the Business Manager of the LIBRARY JOURNAL, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

- Publisher R. R. BOWKER Co.
62 West 45th St., New York.
- Editor R. R. BOWKER
62 West 45th St., New York.
- Managing Editor ELEANOR FF. DUNCAN
62 West 45th St., New York.
- Business Manager J. A. HOLDEN
62 West 45th St., New York.

2. That the owners are:
R. R. BOWKER Co., 62 West 45th St., New York.
R. R. BOWKER, 62 West 45th St., New York.
MARION A. OSBORNE, Morristown, N. J.
J. A. HOLDEN, 62 West 45th St., New York.
F. G. MELCHER, 62 West 45th St., New York.
CAROLYN T. BOWKER, Brooklyn, N. Y.
A. C. FRASCA, 62 West 45th St., New York.
A. R. CRONE, 62 West 45th St., New York.
ELEANOR FF. DUNCAN, 62 W. 45th St., New York.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are:

NONE.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation, has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

J. A. HOLDEN, *Business Manager.*

Sworn to and subscribed before me
this 27th day of March, 1922.

ARMOND FRASCA,
Notary Public, New York Co., N. Y., No. 191

AMERICAN AND FOREIGN

P. J. Kenedy & Sons, 44 Barclay St., New York

Established 1826

Bibliographical

"There never was a profession possessed of better tools than the bookselling profession. Every aid to information that could be given it has been given it. The use that has been made of this information is all that stands in need of improvement."

—*Bessie Graham.*

The Tools of the Profession

THE PUBLISHERS' WEEKLY

(The American Book-Trade Journal). (Established 1872).

Recognized as the representative journal of the bookselling and publishing interests in the United States. Contains full weekly record of American publications, all the news of interest concerning the book-trade; discussions of vital problems, lists of "Books Wanted" and "Books for Sale," etc., etc. Subscription, \$6.00 a year in zones 1-5; \$6.50 a year in zones 6-8 and Canada; to foreign countries \$7.00 a year.

THE AMERICAN EDUCATIONAL LIST

Contains a price-list of the school text-books in use in the United States, arranged alphabetically by author's or editor's name, and a detailed subject-index referring from each specific subject to authors of books on that subject. (Published annually.) Bound in leatherette boards, red edges, \$1.

WHITAKER'S REFERENCE CATALOG OF CURRENT LITERATURE 1920

Containing the catalogs of British publishers bound in two volumes with a separate Index volume. The set of 3 vols. bound in half leather, \$12. Issued at irregular periods, the previous set in 1913, the next probably in 1924.

THE PUBLISHERS' TRADE LIST ANNUAL

Contains the latest catalogs of upward of 400 American publishers, contributed by themselves and arranged alphabetically by the firm-names, with smaller lists, in the front of the volume. Indispensable to every one who has any interest in the sale or purchase of current books. Ready each year on September 1st. Thick 8vo, thumb index, cloth. \$5.

THE BOOKMAN'S MANUAL: A GUIDE TO LITERATURE

By Bessie Graham. Founded on the series of "Home School of Bookselling" that appeared in THE PUBLISHERS' WEEKLY. An introduction to book knowledge with some discussion of editions and their makers. Deals with the education a bookseller might have. 12mo, cloth, \$2.50.

THE BOOKMAN'S JOURNAL AND PRINT COLLECTOR (Monthly)

An illustrated magazine of literature relating to rare books and prints. Issued jointly in London by the Bookman's Journal Company, and in New York by the R. R. Bowker Co. Single copies, 50 cents; Subscription, \$6 a year.

THE FAMOUS BOOKS OF OZ

KABUMPO
in
OZ

Mr. Baum's charming stories of the Fairyland of Oz belong to the children, tens of thousands of whom have written to "The Royal Historian of Oz" in the years that these delightful books have been entertaining little folks all over the land. They write of their joy in the stories, giving suggestions for new ones and begging, always, for more.

Imagination and the Happy Spirit are the foundations of all of the Oz Books. The natural child-impulse for adventure and the child's delight in invention are stimulated by the wonderful adventures of the quaint people of the Fairyland of Oz and the marvelous magic wrought by the Wizard of Oz, Glinda, The Good Sorceress and the lovely girl ruler, Ozma of Oz.

Mr. Baum loved and understood children. He delighted to have them about him. He knew what they wanted and he was happiest when he was making his great audience of little folks happy. It is this close and loving contact with childhood that has put the Oz books in the very front rank of all juvenile books. John R. Neill's whimsical and astonishing pictures step hand-in-hand with Mr. Baum's stories. As illustrations for children they have no equal.

YOU WILL WANT THESE FIFTEEN BOOKS

- The Land of Oz.
- Ozma of Oz.
- Dorothy and the Wizard in Oz.
- The Road to Oz.
- The Emerald City of Oz.
- The Patchwork Girl of Oz.
- Tik-Tok of Oz.
- The Scarecrow of Oz.
- Rinkitink in Oz.
- The Lost Princess of Oz.
- The Tin Woodman of Oz.
- The Magic of Oz.
- Glinda of Oz.
- The Royal Book of Oz.
- Kabumpo in Oz.

To the Librarian:—Mr. Baum's publishers sincerely feel that every American Library that has a department for children, should have the Oz books on its shelves.

May we serve you?

An Outstanding Book Publishing Event

THE OUTLINE OF SCIENCE

Edited by J. Arthur Thomson, M.A., L.L.D.

A tremendous undertaking, the importance of which can not be over-estimated. A popular and readable record of scientific achievement from the beginning of time down to the present day. It is science reduced to its simplest possible terms for the benefit of those who find unfamiliar names, places and phrases stumbling blocks to the study of the subject.

Published in four volumes. Uniform with the handsome English edition of "An Outline of History." 800 Illustrations. First volume now ready. Orders taken for the entire set at \$3.75 per volume. Complete set, \$15.00.

A NATURALIST IN THE GREAT LAKES REGION

By Elliot R. Downing

An interesting account by an eminent naturalist of the flora and fauna of the Great Lakes region together with descriptions of the geological and physiographic factors which have affected the distribution of plants and animals. A splendid volume for the student and lover of the out-of-doors. Pocket size, limp binding, illustrated. \$3.50, postpaid \$3.70

THROUGH THREE CENTURIES

By Jesse L. Rosenberger

A series of connected life-stories tracing through successive generations changes and developments from early Puritan days to the present time. The narrative includes many references to historical events, local customs, some phases of religious history, and educational developments. Earnest and adventurous spirits are seen taking their part in the establishment of settlements, in the founding of institutions, and in many other ways contributing to human progress and welfare. Cloth, \$2.50, postpaid \$2.65

INDUSTRIAL SOCIETY

By Leon C. Marshall

This volume first traces the evolution of industry, preparing the way for an understanding of the characteristics of modern industrial society, which is analyzed in terms of the structure and functions of each part of this intricate organization. A complete economic interpretation of modern industrial society. Cloth, \$4.50, postpaid \$4.75

MAY 1, 1922

Some More Children's Librarians

IT is not only the star of empire that westward takes its way. The children's library movement early acquired the same tendency, long ago crossed the Mississippi, and is now in full flower on the Pacific coast. It has, in fact, also crossed the seas, for Porto Rico has its children's room in the Carnegie Library at San Juan with a native librarian who had her schooling in Ohio, not to speak of the remarkable developments in France since the war.

In the children's library number for October, 1921, some account is given of children's librarians in the East who had been pioneers in the movement. It would be unfair to the library world in general if these brief biographies were not continued, as has been promised, to include some of the newer work by librarians in the West, who have so admirably taken up the mission of the eastern pioneers.

Following the policy established at the inception of its branch service some twelve years ago, the Chicago Public Library does not maintain a separate department for work with children. At present the staff schedule includes no especially designated children's librarians, tho in every branch there is at least one assistant assigned to this duty, and usually well qualified by training and interest to cover it adequately. Meanwhile, there is Miss Adah F. Whitcomb, director of the Training Class, directing head of the central children's room named The Thomas Hughes Room. These two activities occupy adjoining quarters and Miss Whitcomb's gifts and qualifications, comprising a combination of teaching experience, library school training and branch library administration, fit her admirably for these interlocking responsibilities which under her guidance, have developed some novel and mutually helpful elements of co-operation.

Miss Whitcomb's interest in librarianship and especially in children's librarianship—still her first love—dates back to her student years at the Cook County Normal School, then under the inspiring direction of Francis W. Parker, one of the educational revolutionaries of our time. While preparing for school work, and afterwards in the school field, the urge towards help-

ing children to read and to find the right things to read grew until it overcame the ambition to teach, and led her to reconsider her choice of a life work. A timely suggestion from Miss Ahern that there was a school in Pittsburgh for the special training of librarians for children decided her, and at the end of the Pittsburgh course, she was appointed children's librarian at the Public Library of Oak Park, Ill. At first completely fascinated by the appealing art of story telling, she soon extended her interests to include organization and administration of children's rooms, and when, a few years later, Mr. Legler sought recruits to aid in his development of the Chicago Public Library, she joined this staff as librarian of the branch library at Abraham Lincoln Center, the institutional enterprise founded and conducted by Dr. Jenkin Lloyd Jones. After some years in this assignment, she was transferred to the first real branch library built in Chicago, the Hiram Kelly Branch, where she remained until the resignation of Faith E. Smith, left a vacancy in the training class directorship. Miss Whitcomb was chosen for this position, which she has now filled with distinguished success for five years. The Thomas Hughes Room, meanwhile, has become the unofficial center of children's work, not only of the Public Library but generally in Chicago. Because of its downtown location, it is not largely patronized by children; but hither resort the school teachers, public and parochial, the mothers and leaders in child welfare work, to whom Miss Whitcomb is guide, philosopher and friend. Here meets the local chapter of the Story Teller's League, of which she is an officer. Here come the writers and publishers of new books for children, the promoters of juvenile encyclopedic enterprises and the like, leaving their wares "on approval" for Miss Whitcomb, who all too often feels bound to disapprove. Incidentally she is the court of last resort in the selection of children's books for the Chicago Library system.

And when there is added to this catalog minor activities, such as representing the Library on numerous platforms, with addresses in the field of children's reading, giving courses at the Uni-

versity of Illinois Summer Library School, and collaborating in a new book of stories with Mrs. Gudrun Thorne Thomsen, it becomes apparent that Miss Whitcomb leads a fairly active life and that her services meet with a reasonable degree of appreciation on the part of her Chicago public.

Detroit has for the past eight years enjoyed the services as children's librarian of Miss Elisabeth Knapp who began at thirty dollars a month about twenty years ago her early library experience in the Sewickley (Pa.) Public Library where as she says, "they are still correcting the mistakes of my enthusiastic youthful ignorance." Mr. Edwin H. Anderson was then librarian of the Carnegie Library at Pittsburgh and in those days Miss Knapp made bold to consult him frequently as to her problems and she pays him the compliment of saying that she "never came out of that office without definite help and suggestion." After completing her college course and obtaining her degree she spent a year at the Simmons College Library School and the ten years, from 1904 to 1914, was successively at branches of the Pittsburgh library system. In September of the latter year she became organizer and director of children's work at Detroit where she has made her mark to the benefit alike of parents and children and where in the new building she will have unusual facilities for the work of her department.

Alice Isabel Hazeltine is a native of northern Pennsylvania and was educated there and at Syracuse University where she was graduated with the degree of Ph.B., afterwards studying at the New York State Library School and at the Carnegie Library School of Pittsburgh. She has served as a cataloger in the Buffalo Public Library, as librarian of the Carnegie Library at Oil City, Pa., as chief children's librarian in the Carnegie Library at Pittsburgh, as branch librarian in that library, and afterwards as first assistant in the Children's Department, and in the training school for children's librarians. Later she was supervisor of branches in the Buffalo Public Library, and in 1914 she became supervisor of children's work in the St. Louis Public Library. She is a member of the faculty of the St. Louis Library School, and has served as chairman of the children's librarians' section of the A. L. A. She is joint editor with Elva S. Smith of "Christmas in Legend and Story," editor of "Library Work with Children," the second volume in the series of Classics of American Librarianship, and compiler of "Plays for Children; an annotated index."

Miss Hazeltine is only the third incumbent of the supervisor's position in St. Louis, the depart-

ment there having been organized in 1909. She was preceded by Miss Douglas (now Mrs. Oliver Carpenter), and by Miss Effie L. Power, now head of the Children's Department in the Cleveland Public Library. She has worthily upheld the traditions inspired by these organizers and has given her department an enviable reputation for carefully considered book-selection, for effective discipline well concealed in the velvet glove of kindness, and for helpful co-operation with the educational authorities.

Her manner has poise and charm and her estimates of the abilities and personality of others are marked by surprisingly few errors. Her weekly meetings with the children's librarians under her supervision are always interesting and furnish the exact quality of cohesiveness desirable in an organization of this kind.

Among the interesting features of Miss Hazeltine's administration in St. Louis are the intensive summer work with the city playgrounds, including the "playground book-wagon," the first of its kind; co-operative effort, with other departments, in organizing and maintaining the Teachers' Room—a feature so popular that the space allotted to it has been quadrupled in the past year, original publicity work at different times, including exhibition and sale work for "Children's Book Week," the carrying of courses is her specialty in the St. Louis Library School and considerable outside educational work, including that at the biennial Missouri Summer School at Columbia and a summer course at Simmons College in Boston, which has now run for two years.

Los Angeles and the children of that enterprising and growing city enjoy the services in the Children's Department of the lady who had the widest experience from one coast to the other. A Vermonter by birth, Miss Alice A. Blanchard, after her graduation from Smith College, in 1903, went directly to the New York State Library School, and was a special student in the Training School for Children's Librarians, 1905-1906, directly after which she went to Seattle as head of the children's department of the Public Library there. The following year she was head of the school department of the Newark Free Public Library, after which she went to the Pacific again spending two years in Seattle as head of the School Division of the public library. From 1913-1915 she was first assistant in the children's department and in the Training School for Children's Librarians of the Carnegie Library of Pittsburgh, returning thence to Newark where for three years she was in charge of work with children and schools connected with the Free Public Library. Since August, 1920, she has been principal of the

ELIZABETH KNAPP

ALICE I. HAZELTINE

Department of Children's Work in the Los Angeles Public Library and as a member of the faculty of the Library School has conducted courses in Library Work with Children.

In the once far Northwest Miss Gertrude Andrus has done notable work in the Seattle Public Library, with an unusual outcome. Her first library experience was in the Buffalo Public Library as an assistant under Mr. Elmendorf and she says candidly that she would fire an assistant who behaved as she did there. She was not fired but library enthusiasm fired her and she found her way to Pittsburgh and its training school for children's librarians. At the end of the first year she took a position in Pittsburgh and continued her library training piece-meal until she graduated in 1909. In 1908 she went to Seattle and continued her childrens' work in the library for more than ten years. It had been her habit during the Christmas rush to lend herself for bookselling service in the department stores and this led her in 1919 to become the manager of the Bookshop for Boys and Girls in Frederick and Nelson's in Seattle. Incidentally she has given courses in library work with children at Earlham College and done many other good things.

It is not only on the Pacific coast that librarians have turned from direct children's library

work to the profession of bookselling with the missionary spirit of the librarian inspiring the commercial aim of bookselling. Children's bookshops are especial features of the book-selling trade in Boston and New York. One of the earliest institutions of this kind is the Bookshop for Boys and Girls in Boston, whence the book wagon makes its yearly pilgrimages throughout New England. In New York, Miss Marian Cutter, a graduate of Pratt, whose wide library experience has ranged from Brooklyn to Labrador and back to Bridgeport, has found her vocation in the Children's Bookshop in New York. In Cleveland Veronica Hutchinson, who went to Halle Bros. from the Cleveland Public Library, has so successfully administered the Children's Book Department in that store that her charge has recently been extended to a much wider field in book selling.

The experience of children's librarians respecting books for children has led many of them into the paths of authorship or compilation. One of the pioneers in this field was Mary Wright Plummer, second woman president of the A. L. A., whose charming books of travel describing the adventures of "Roy and Ray in Canada" and "Roy and Ray in Mexico" are as agreeable reading for grown-ups as for the younger folk. It may be added that another

GERTRUDE ANDRUS

book in the first-named field has been provided by Miss Mary S. Saxe of Westmount Library in the province of Quebec, who has something of the lively wit of her grandfather, John G. Saxe, in "Our Little Quebec Cousin" in a well-known series. Miss Frances J. Alcott, on leaving her post in the Carnegie Library of Pittsburgh, where she had labored earnestly and successfully thru many years both in its children's department and as head of the school for children's librarians, gave herself to this line of authorship with such success that she has become a popular and prolific author of books which have been equally welcome to children's librarians and to library children. Her first essay in this direction was "The Arabian Nights Entertainments" published in 1913 by Henry Holt and Company, who also published her "More Stories from the Arabian Nights" in 1915. Her other books of stories from many lands and all ages, published by Houghton Mifflin Company, have followed one upon the other in quick succession. "Story-Telling Poems," were collected in 1913, and in 1914 "Good Stories for Great Holidays" gave over one hundred tales celebrating seventeen holidays and answering the question often asked by parents and teachers "What can I find to bring home to my children the importance and significance of this holiday?" In the following

year "The Jolly Books for Boys and Girls," drawn from classics old and new, was prepared in collaboration with Amena Pendleton. "Bible Stories to Read and Tell" formed the next year's volume. Then came "The Red Indian Fairy Book," "Tales of the Persian Genii," and "The Book of Elves and Fairies." Nature myths and tales are collected in "The Wonder Garden," published in 1919, and once again items valuable especially for their story telling qualities formed the 1920 volume, "Story-telling Ballads," the last so far of this fine series, to which illustrations by Willy Pogany, Milo Winter, Frederick Richardson, and others have given added charm.

For the guidance of the custodian of the child's reading was prepared Miss Olcott's first volume, published in 1912, "For the Children's Reading," reviewing the entire field of juvenile literature, as were also Annie Carroll Moore's "Roads to Childhood," a volume of views and reviews of children's books published by George H. Doran Company in 1920, and Clara Whitehill Hunt's "What Shall We Read to the Children" issued by Houghton Mifflin in 1915. For the children themselves Miss Hunt has charmingly written "About Harriet" and "The Little House in the Wood."

In Edmund Lester Pearson's varied list are three juveniles: "The Believing Years," "The Voyage of the Hoppergrass," and recently a young people's life of Theodore Roosevelt in the True Stories of Great Americans Series. Jacqueline Overton wrote a "Life of Robert Louis Stevenson for Boys and Girls" published by Scribner's in 1915, and edited for the same publishers Kingsley's "Westward Ho!" "Twenty-four Unusual Stories for Boys and Girls" by Anna Cogswell Tyler, superintendent of story-telling in the New York Public Library, were published last year by Harcourt, Brace and Company, and a collection of "New Plays from Old Tales for Boys and Girls" by Harriet Sabra Wright has grown from stories enjoyed by the reading clubs of the New York Public Library.

Miss Hazeltine has written, in collaboration with Elva S. Smith, cataloger of children's literature of the Carnegie Library of Pittsburgh, a book on "Christmas Legends and Stories" published by Lothrop Lee and Shepard, who have also issued Miss Smith's recent collection of poems and stories on "Heroines of History and Legend."

This imperfect summary of the growing list of children's books from librarians' pens illustrates anew each year the widening influence of the children's librarian.

The Boys' and Girls' Library at Pasadena

THE Boys' and Girls' Library at Pasadena, which has just been completed, was built to remedy the crowded condition of the main library building. It is a one-story semi-colonial building, consisting of a main room forty by sixty feet, a staff kitchenette, a story hour room fifteen by eighteen feet in one wing, a work room in another wing and the necessary lavatories. The wings form a court in the rear which will be developed later. There is a fireplace located in the alcove of the main room.

The cost of the building was \$11,500 exclusive of furniture. The exterior is of plaster washed cream color with green roof and shutters. The walls of the interior are a warm light gray with the shelves and furniture a darker gray, the cork carpet is a grayish green, with cretonne curtains with orange and blue as the predominating colors. A fireplace in the alcove of the main room adds greatly to its attractiveness, and there are special shelves for the finely illustrated books, picture books and a collection of highly colored butterflies.

The Library tries to reach every child in town. It works in various ways to attract them to the library and to develop in them the reading habit.

The nearby schools are asked to send the pupils to visit, during school hours. During these visits the children are taught the arrangement of the books, how to find them and how to use the catalog. Then questions on cards are given them and they find the answers or the books asked for.

Other groups of children come to the library regularly, in school life, to spend an hour in reading. These usually come once every two weeks. The purpose in bringing them is to interest them in books, to improve their reading and to establish the library habit. Also, to make them feel at home in the library. All classes are accompanied by their teachers.

In the summer time the Boys' and Girls' Library conducts a Vacation Reading Club to encourage better reading. If the children read ten of certain books, briefly telling the stories to the children's librarian, they receive certificates in the fall which are presented to them at their schools. Last summer two hundred and ten children received certificates and, as the books read were of a superior type, this meant that at least twenty-one hundred books above the average were read during the summer months.

Some of the reports of these stories were very short; others were excellent, showing that the children had grasped all of the important points.

Another selection of books has been set aside for the winter and spring months. If a child reads ten of these and writes a paragraph on each, he receives a button on which is printed "I belong to the Public Library Reading Club." The books on the list are made up of non-fiction and of the better fiction.

The Library has a small club room which may be used for various meetings in connection with the work. The Woodcraft League for boys

INTERIOR OF THE BOYS' AND GIRLS' LIBRARY AT PASADENA

meets there once a week and the butterfly club, once a month.

During Children's Book Week in November, many lists to encourage the purchase of better books for the home were distributed to parents, teachers and children.

The children's librarians of Pasadena spend much time in the library helping the children select their books. In this way they find out what the children are reading, and what are their preferences; and are able to make many suggestions, often interesting them in things more worth while, as well as leading them into new paths.

JEANNETTE M. DRAKE, *Librarian.*

Books Popular in March

REPORTS from 200 representative libraries to the May *Bookman* show that the following were the books most in demand at the public libraries during March:

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown.
 To the Last Man. Zane Grey. Harper.
 Helen of the Old House. Harold Bell Wright. Appleton.
 Her Father's Daughter. Gene Stratton-Porter. Doubleday.
 Brass. Charles G. Norris. Dutton.
 Main Street. Sinclair Lewis. Harcourt.

GENERAL LITERATURE

The Outline of History. H. G. Wells. Macmillan.
 Queen Victoria. Lytton Strachey. Harcourt.
 The Mirrors of Washington. Anonymous. Putnam.
 The Americanization of Edward Bok. Edward Bok. Scribner.

The Mirrors of Downing Street. Anonymous. Putnam.
 Woodrow Wilson as I Know Him. Joseph P. Tumulty. Doubleday.

Best sellers of the month as reported by sixty-eight booksellers in fifty-three cities for *Books of the Month* were:

FICTION

If Winter Comes. A. S. M. Hutchinson. Little, Brown.
 The Head of the House of Coombe. Frances Hodgson Burnett. Stokes.
 The Sheik. Edith M. Hull. Small, Maynard.
 Cythera. Joseph Hergesheimer. Knopf.
 To the Last Man. Zane Grey. Harper.
 Brass. Charles G. Norris. Dutton.

GENERAL LITERATURE

The Outline of History. H. G. Wells. Macmillan.
 The Story of Mankind. Hendrik W. Van Loon. Boni.
 The Americanization of Edward Bok. Edward Bok. Scribner.
 Queen Victoria. Lytton Strachey. Harcourt.
 The Mirrors of Washington. Anonymous. Putnam.
 Diet and Health. L. H. Peters. Reilly & Lee.

In a recent issue of the Paris edition of the *Chicago Tribune*, W. Dawson Johnston says that the most popular books of a week in March were:

"If Winter Comes," Dos Passos' "Three Soldiers," Galsworthy's "To Let," Strachey's "Queen Victoria," Wells' "Washington and the Hope of Peace," and Walpole's "The Young Enchanted."

Much of the A. L. A. War Service material, consisting of photographs, slides, films, scrap-books, posters, printed publications, multi-graphed and mimeographed booklists, circular letters and other miscellaneous material, has been assembled and organized at A. L. A. Headquarters by Miss Margaret Palmer.

The John Newbery Medal

PHOTOGRAPH OF THE PLASTER CAST OF THE JOHN NEWBERY MEDAL. THE MEDAL WHICH IS TO BE EXECUTED IN BRONZE IS THE WORK OF RENE P. CHAMBELLAN OF NEW YORK, AND IS THE GIFT OF FREDERIC G. MELCHER. THE NAME OF THE WINNER WILL BE ANNOUNCED AT THE DETROIT CONFERENCE

PHOTOGRAPH OF THE PLASTER CAST OF THE JOHN NEWBERY MEDAL. THE MEDAL WHICH IS TO BE EXECUTED IN BRONZE IS THE WORK OF RENE P. CHAMBELLAN OF NEW YORK, AND IS THE GIFT OF FREDERIC G. MELCHER. THE NAME OF THE WINNER WILL BE ANNOUNCED AT THE DETROIT CONFERENCE

THE impulse that led to the establishment of the John Newbery Medal came out of the big Children's Librarians Section gathering at the Swampscott Conference last year, when the discussion at two sessions showed that the large group present were interested in children's reading in all its aspects: in the library, in the school, and in the home. While following the discussion it occurred to Frederic G. Melcher, who has been for three years Chairman of the Children's Book Week Committee that this group might do one more thing for the cause of good books, beside the study of their selection and distribution; namely, that it might give new impetus to the writing of children's books by showing to writers of real creative ability that there is a large and continuing clientele for children's books. With this in mind, Mr. Melcher presented to the business meeting of the Section a suggestion for bringing about such a condition. He proposed that there be established a medal to be awarded annually at the A. L. A. Conference to the author of the most distinguished book for children published during the preceding calendar year. The six months between the end of the year and the following Conference would give ample time for the selection, and he believed that children's librarians, trained in the judging of children's books and having daily contact with the children themselves, would be by far the most competent judges. He suggested that the Medal be called the "John Newbery Medal" in honor of that interesting old eighteenth century bookseller who seems to have been the first to realize that children have reading interests of their own, and

who sought to meet their needs by finding authors to write for them.

The Executive Committee welcomed the idea, accepted Mr. Melcher's offer to present the medal, and set in motion the machinery for the selection for 1921. René Paul Chambellan, a young American, was chosen to design the medal which is to symbolize that the award is to honor the gift of a work of imagination to the children. Mr. Chambellan, who was a successful student of the Beaux Arts Sculpture Academy and the Architectural League of New York, enlisted in the 11th Engineers under orders for overseas service in April 1917 when the United States entered the war, and saw service in the Cambrai front where he was gassed. After convalescence he was assigned as instructor in modeling at the A. E. F. Art Center at Bellevue under the direction of the late Solon H. Borglum, and with him worked on the dedication panel of the Pershing Stadium at Vincennes. He has done work for the New York Building of the Panama Exposition and for many public buildings and residences. Recently he made all the models for the reredos and other additions to the New York First Presbyterian Church, and is at present, under the direction of the architect, Grosvenor Atterbury, making the series of large sculptural panels for the Russell Sage Foundation Building in New York City.

In the *Architectural Forum* for March is an illustrated description of the Henry E. Huntington Library at San Marino, California. In the same number are plans and views of the Converse Memorial Library at Amherst College.

Roumanians in the United States and Their Relations to Public Libraries*

By JOSEPHINE GRATIAA,

Librarian of the Souldard Branch, St. Louis Public Library

IN the heart of Rome, on the Quirinal hill, stands the column of Trajan. It commemorates the victory of the Emperor and his legionaries over the Dacians. The story of his triumph winds its way spiral-wise around the shaft in a procession of over two thousand figures. Among the Dacian captives, shepherds are wearing the wrapped leggings, the same woolen cap and cloak, the "caciula" and "zeghea" that remain the dress of the modern Roumanian peasants at home, or of their transplanted brothers, arrayed for a folk dance in an Americanization celebration in any of our cities. The modern Roumanians are the descendants of the Roman colonists and the Dacian aborigines. The matter of costume, as well as language, is significant of the permanence and persistence of the Dacian-Roman tradition in this Balkan people, in spite of Goth, Slav, Tartar, Turk, and Magyar invasions, or Teutonic and Russian influences. The "Remarkable Rightness of Rudyard Kipling" points to a basic truth when he says: "For whoever pays the taxes old Mus Hobden owns the land."

Ancient Dacia extended from the Theiss to the Dneister, from the Carpathians to the Danube. The area is practically identical with the Roumania of today. The population of this greater Roumania numbers about eighteen and a half millions, of whom fifteen millions are Roumanian. The race has been modified by Greek, Gothic, and Slavic elements. One observer says they have Greek culture, French taste and that they chose a German Royalty. The commerce of the country is mainly in the hands of Jews and foreigners, notably Germans. There is a wide gap between the gentlemen and the peasants with no sympathy to serve as a bridge.

Over three-fourths of the Roumanians are peasants. Some authorities put the number at ninety per cent. They are good-humored, sober, cleanly, and law abiding. The percentage of illiteracy among them is very high. Professor Simonescu in *Vitorul*, of June 20, 1920, says that eighty-one per cent of the women are illiterate. In some counties the number is as high as ninety-two per cent for women and over thirty-eight per cent for men.

The *Socialismul*, published in Bucharest, says, in its issue of Feb. 12, 1920: "61.63 per cent of the children of school age are unregistered, of those attending school less than 10 per cent graduate."

Since the war, the Roumanian government has instituted a land reform to mitigate the evils of absentee landlordism and to improve the conditions of the peasants. Formerly, over half the arable land was in the hands of wealthy proprietors. The new distribution allows only 8 per cent of it to remain in large estates. The old owners are to be compensated in bonds maturing in twenty years.

There seems to be a sincere attempt on the part of the Roumanian government to check emigration by making conditions more livable at home. On the other hand, it has resorted to several prohibitive regulations of the mosquito type, to prevent large numbers from leaving the country. Further, it seems that immigrants returned from America have been discriminated against by their countrymen.

The Roumanian newspapers on both sides of the water have taken up cudgels for their respective patrons in this geographical controversy. Native Roumanian papers write long editorials, saying: "Do not go to America." The American Roumanian sheets print piteous letters from disappointed returned travelers, or advise their patrons to sit tight.

While this wordy war wages, Roumanian emigrants and immigrants cross one another on the broad Atlantic, upsetting the accuracy of census reports and estimates of leaders with a fine disregard for anything but their own material advancement.

Roumanians are comparatively recent among our immigrants, and comprise only two generations in America. The 1920 Census reports 102,323 of them in the United States. This number is smaller than most of the estimates given by their own leaders, some of whom think there may be half a million Roumanians in this country. But, all admit that accuracy is impossible because of the number of Roumanians who returned to the home country after the war.

In a table which follows, their geographical distribution in the United States is indicated, and their relations to libraries is shown statistically.

*This is the fourth of a series of articles prepared by the A. L. A. Committee on Work with the Foreign Born. Eleanor E. Ledbetter, Chairman.

The average independent American who does not need societies to bolster up his comfort or strengthen his standing in the community would say the Roumanians of America are very well organized. Estimates as to the number of societies differ and the number given by various persons in possession of the facts ranges from 118 to 150. They seem to fall mainly into four groups:

The Union of Cultural and Relief Societies of America, (*Uniunea societătilor Române de ajutor și cultura*) includes one hundred and sixteen societies, and is represented by the newspaper *America*.

Liga și Ajutorul, (League of assistance) of which *Romanul* is the official organ.

The Roumanian Greek Catholic Union, whose paper is *Foaia Poporului*. (People's News.)

The Federation of Roumanian Socialists, organizations grouped about *Desteptarea*. (Awakening.)

There are also smaller societies here and there, unaffiliated with any of these greater organizations.

It is interesting to note here, that in spite of the apparently formidable banding together of the members of the Roumanian colonies in this country, *America* states disapprovingly: "Not even ten per cent of the Roumanians in the U. S. belong to Roumanian societies, are insured, or get a Roumanian paper."

Only three to five per cent of the Roumanians in America are skilled workers according to the statement in Commons' "Races and Immigrants." Rev. ed.

The Department of Education *Bulletin of Adult Illiteracy*, 1916, reports 34.8 per cent of the Roumanians in America illiterate. Those who read, have an average education equal to that of a grade school, or less.

In connection with this question, the opinion of *America* in its issue of April 28, 1920, is worth noting:

"It has been proved, say persons who have studied the social, cultural, and economic conditions of the U. S., that of all nations, Roumanians stand lowest on the level of culture. No people has been more mercilessly exploited by private and official agencies at the time they sought to return to Europe than the Roumanians."

The paper sums up the causes of this unfortunate condition, as: Unfavorable conditions in the home land; emigration of the illiterate; lack of interest in the workers shown by the small number of educated Roumanians in this country; the indifference of illiterates toward going to schools in the United States; their intention to return to Roumania as soon as it is financially profitable.

Very few Roumanians bring their families over or intend to establish themselves here permanently. The number of American citizens among them is small.

Most of the Roumanians are Greek Orthodox under the direction of the Metropolitan at Bucharest. There are churches of this denomination in Akron, Alliance, Canton, Cleveland, Dayton, Lorain, Warren, Youngstown, and East Youngstown, Ohio; Detroit, Mich.; Trenton, N. J.; Erie, Farrell, McKeesport, and Mount Union, Pa.; Aurora and Chicago, Ill.; Buffalo, and New York City; Gary, Indiana Harbor, Indianapolis, and Terre Haute, Ind.; St. Paul, Minn.; Omaha, Neb.; and Woonsocket, R. I.

Besides these congregations, there are a number of churches of Roumanian Greek Catholics in this country. These are located in Alliance, Canton, Cleveland and Youngstown, Ohio; Farrell and Scalp Level, Pa.; Trenton, N. J.; Aurora, Ill.; Gary, East Chicago, Indiana Harbor, and Indianapolis, Ind.

There are Roumanian Baptist churches in Akron and Warren, Ohio.

In St. Louis, the Roumanians attend the Serbian Orthodox Church.

Roumanian newspapers mention schools in Alliance and Youngstown, Ohio, and Farrell, Pa., at which Roumanian is taught the children.

Roumanian workers in the United States are sober, thrifty and kind hearted. They are proud of their Roman descent, but unlike some other groups among our immigrants, they have not Stalky's habit of dramatic or picturesque "gloating." The majority of them are factory or foundry workers. Their largest colonies, in the iron and steel manufacturing centers of the middle west, prove their gravitation toward these occupations. Others are in the automobile and rubber industries. Some are found in the railroad and construction work and in mines. There are a few Roumanian farmers in the United States, and a small colony of Roumanian shepherds is in Montana.

It can be easily seen from these facts that Roumanians have not the natural affinity for books and reading that some of the other groups of our immigrants display. Their natural choice of amusement seems to be gymnastics and dancing, and the social gatherings and entertainments that their own clubs and societies supply. Their native folk dances are beautiful and a joy to any spectator as well as recreation for the participants.

The statistics of library use in the table appended concluding this paper would seem to prove that the character of the work in which most of the Roumanians are engaged and the large percentage of illiteracy among them, have

combined to keep the number of Roumanian users of public libraries very small.

Romanul in the number of October 24, 1920, says: "Roumanian libraries in Roumanian Clubs are neglected. Roumanians in America read very little. The number of newspaper readers is insignificant."

There has been a real effort on the part of the leaders in the group to improve this condition as can be shown in the generous gifts of the Mauriciu Blank Fund of the Roumanian Educational Bureau, New York, to native clubs and to interested public libraries.

Public libraries on the whole have done so far very little for the Roumanians in the way of supplying books for them in their own language. In compiling the statistics for the table appended circular letters were sent to all the libraries which could be located, and to several State Commissions. Most of the libraries speak of donations of the Roumanian Educational Bureau as constituting the bulk of their collections. One library reports that it does not buy any foreign literature in the original. One of the State Commissions writes that several of the libraries, in the part of the state which contains the largest number of Roumanians, have withdrawn all books in foreign languages from their shelves.

The table further shows that twenty out of forty-four libraries have no Roumanian books on their shelves. In no one library is the circulation of Roumanian books large. The New Jersey State Library Commission owns a small Roumanian collection, and circulated several thousand volumes in the small towns of the state. This seems to be the largest issue noted, but it will be seen, on examination, that many libraries cannot give definite data, so that comparisons are not entirely safe.

The consensus of opinion given by various librarians as to how to "catch your rabbit," seems to be that propinquity is the largest factor in attracting the individual Roumanian to the library. English classes in library buildings, and cooperation with their influential leaders or their priests are the normal methods of securing the interest of any group of them. The Roumanian press is always ready to urge its readers and the members of the multiple societies to use public libraries. The same good and tried methods of securing foreign readers of any group can be used successfully with Roumanians, and a patient ear and good memory for personal preferences, ailments or interests will do much to keep them individually loyal.

It has been very hard to get any expression of opinion from librarians as to any peculiarities in the literary taste of Roumanian readers,

especially of those who can use English books. Those who have commented on this topic, at all, say that Roumanians read adventure and detective stories, just as any average patron of similar culture reads, be he foreign or American. The more ambitious and less secure of them keep at their spellers, histories, and arithmetics, as do all students and strugglers with the intricacies of English and first papers.

One notable exception comes to my mind of a Roumanian giant who reads Hamlet, and Cicero and Homer in English for pleasure. But this same high brow once confided to me that Karl May's adventure stories were "Oh! some good!" He, too, is human in spite of his bulk.

Naturally, the Roumanians prefer their own literature to anything else. Here, their taste seems to be for folk lore, poetry and drama. Probably the adaptability of these forms for entertainments and national celebrations is a large factor in their choice. Another determinant is the meagre character of Roumanian collections in public libraries, which, as a rule, do not contain books in all classes.

The Roumanian language is a mixture of Latin with Dacian, influenced by Slavic and Greek. It is the same in the old Roumanian Kingdom and in the lately acquired provinces. Dialects are not numerous and are of little importance. The grammar of the language is Latin. In the sixteenth century, Antonio Bonfinius pointed out that the Roman elements are more ancient in Roumanian and closer to the forms of the original Latin than the corresponding Italian, French or Spanish.

Like other Balkan nations, Roumania has a vocal as well as a written literature. Its folk lore and epics are not so rich as the Serbian, but they compare favorably with the Bulgarian. In all these literatures, there is a parallel development. It is not a borrowing but a likeness due to similar influences on conditions prevailing thruout the whole peninsula.

These are the divisions of the Roumanian spoken literature: *doine*, lyric songs; *balade*, epic songs, which are much like the Serb hero tales; *hore*, dance songs; *colinde*, carols; *vorbe*, proverbs; *basme*, fairy tales (and here there is a resemblance to the eerie ghostlike stories of the Irish and Scotch) and animal stories in which the *dramatis personæ* have the distinctive character of that clever creature in Uncle Remus. Finally, there are *snoave*, anecdotes; and *ghiciloare*, riddles.

Alecsandri, the pride of Roumanian lovers of poetry, was one of the first authors to collect this folk lore. The most important collection is that of Ispirescu.

Dr. M. Gaster's "Roumanian Bird and Beast

Stories" (London, Sidgwick and Jackson, 1915, 10s. 6d.) contains a large number of animal tales, in which God, the devil, and the saints, animals which assume human shape, and human beings who are changed into beasts take parts in exciting or weird dramas. The Foreign Division of the Young Women's Christian Association of New York kindly sent me a translation of an article from the "Steana Noastra si Romana Nova," New York, January 1920, by Feliciu Vexler, which contains a number of little known stories.

Roumanian written literature can be divided, like Ancient Gaul, roughly into three parts, which correspond to the Slavic and Greek periods of influence, and the final one of national consciousness.

The earliest writings are Slavic and are practically all religious. The Greek period, 1710-1830, when the Turks ruled by means of the Phanariot families, consists largely of poems and chronicles, which try to prove the Latin origin of the people. One of these early writers, Eliade Radulescu, was the main factor in the Latinization of the written language. He freed it from the Slavic alphabet.

Modern Roumanian literature is mainly concerned with the cultural struggle of the old and new Roumania, between its oriental and occidental elements. Some of it marks the difference between the old patriarchalism and the bravo veneer polish of the over-modernized city dwellers. Pessimism colors the work of Eminescu, Delavancea, Caragiale and Vlahuta. Cosbuc, the Transylvanian, represents a more optimistic and entirely Roumanian tradition.

Charles Upson Clark's "Greater Roumania" (Dodd, Mead, 1922) contains a most helpful and illuminating chapter on modern Roumanian literature.

Conscience, thrift, and critical sense, three prosy, flat-footed, and obviously useful sisters, recommend a practical survey of publishers and book sellers before the purchase of Roumanian books be undertaken. After a year's angling for facts, the following have been secured.

Mr. Leon Feraru, president of the Roumanian Educational Bureau, which has already been mentioned, says there are no Roumanian publishers in America, and there is no critical information on hand which would evaluate the wares of the sellers of Roumanian books in this country.

The Foreign Division of the Young Women's Christian Association in New York furnished the names of five book dealers, but on writing for lists of books on hand at present, only one reply was received. It was from the Biblioteca Romana, 72 Greenwich St., New York City.

Mr. P. Axelrad is the proprietor. His catalog contains a few books on useful arts, some grammars, a few song books, a considerable number of plays and monologues, as well as general Roumanian literature and a few translations. The catalog gives prices in American money, but does not state whether or not any of the books are bound. Judging from the low prices quoted, it would appear most of the books listed are in paper covers. I have not had an opportunity to examine any of the books personally, so cannot report on paper, type, or other physical qualities.

The following Roumanian newspapers are published in the United States:

America. Roumanian Independent Daily, 5705 Detroit Ave., Cleveland. \$3. Editor Joan Jivi Banateanul. Official organ of Roumanian Beneficial and Cultural Society.

Desteaptate Romane. Weekly, 1115 East 72nd St., New York. Editor Jancu Roman.

Desteptarea. Roumanian Socialist Weekly, 1037 Russel St., Detroit. \$1.50.

Foaia Poporului. Religious Tri-weekly, 1338 West 64th St., Cleveland. \$3. Editor George M. Ungureanu.

Romanul. Independent Semi-weekly, 524 Market St., Youngstown, O. \$3.

Steana Noastra. Roumanian Weekly, 72 Greenwich St., New York. \$2.50. Editor P. Axelrad.

The following list of monthlies and dailies published in Roumania have been recommended by Mr. Leon Feraru, the Director of the Roumanian Educational Bureau. The magazines are of a literary character:

Adevarul Literar si Artistic. Weekly. Adevarul Pub. Co., Strada Sarindar, Bucharest. 80 lei, a year.

Gandiera. Semi-monthly. Cezar Petrescu and D. I. Cucu, editors and pub., Strada Regele Ferdinand 38, Cluj, Rumania. 100 lei a year.

Viata Noua. Monthly. Ovid Densusianu, Pub. and ed., Calea Victoriei, Bucharest. 100 lei, a year.

Viata Romineasca. Monthly. Viata Romineasca Pub., Strada Alecsandri 14, Iasi, Rumania. 140 lei, a year.

The following dailies are "independent organs of information, with slight tinges of party sympathies. There is none of religious character among them." Subscriptions are 400 lei per year:

Dacia. Dacia Pub. Co., Bucharest.

Dimineata. Adevarul Pub. Co., Strada Sarindar, Bucharest.

Izbanda. Teaparul Romanesc Pub. Co., Strada Sarindar, Bucharest.

Luptatorul. Luptatorul Pub. Co., Strada Sarindar, Bucharest.

Universul. Universul Pub. Co., Strada Brezioanu, Bucharest.

On a notable occasion Cyrano de Bergerac described his nose in terms of wit and rich variety. A less gifted imagination could only bring monotony to a reiteration of the outstanding facts of this paper. It has therefore seemed most economical and lucid to place the relations of Roumanian colonies and public libraries in a table that he who runs may read.

* Where the population figure is enclosed in brackets the actual population figure is not available and the estimated number is given instead.

** Towns marked thus have no libraries.

School Library Assemblies

IN "Some Uses of School Assemblies" just published by the Lincoln School of Teachers College, New York City, are descriptions of two library assemblies.

The first was a meeting on the use of the library by the elementary grades. The librarian asked each teacher to have her grade prepare a short statement about the use of the library. Each class prepared its story independently, and the speakers were chosen by the class on the basis of the best contributions to the discussion.

The second assembly was held in 1921. "Book Week" offered a good opportunity to carry on a campaign for the proper use of books and the library, and had gratifying results. At the same time lists on the bulletin boards and in the assembly itself, and especially "A Shelf of Books" represented by children in costume ("Little Black Sambo," "Cinderella," "Red Feather," "Heidi," "Tom Sawyer," etc.) and discussed by the librarian, served as a stimulus to reading. Following "A Shelf of Books" came a symposium on the making of books contributed by the sixth grade which had been studying printing and had recently visited a publishing house. Grade five told of the increased cost of books (as this fitted in with the work they were doing in mathematics) and Grade four concluded the program with weighty and effective notes on the care of books and their prompt return to ensure the maximum usefulness of the books available.

A Tribute from General Pershing

THE following letter addressed to President Azariah S. Root tells its own story:

My dear Mr. Root:

I desire to acknowledge the receipt of your letter of March 30th, 1922, with reference to the reduction of \$15,000 of the item for library service in the House Appropriation Bill, and in reply I would say that this service, so generously established by the American Library Association, has demonstrated its practical value to the army. As an agency for promoting the morale, recreation and education of officers and men, and for purposes of military reference, it should be continued on a scale commensurate with its usefulness.

The war department budget estimates for 1923 carried items for library purposes aggregating \$80,000 on a basis of a military strength of 150,000 men, and it seems logical that some similar proportion should continue to exist with whatever reduction in military personnel may be decided upon by the Congress.

JOHN J. PERSHING,

General of the Armies,

Chief of Staff.

In the current number of *California News Notes* the leading article on "The Flowers of Shakespeare" is by Mrs. Frances Burns Linn of the Santa Barbara Public Library. An exhibit of all herbs and blossoms mentioned by Shakespeare and available in Santa Barbara Gardens at the time of the Shakespeare tercentenary brought forth so many expressions of pleasure that the Library has continued to make the exhibit each spring.

The Organization of Government Statistics

THE following paragraphs from the report on the growing demand for organization of government statistics recently prepared by Mr. Roger W. Babson and Mr. Clarence N. Stone are of especial interest to librarians.

HISTORICAL NOTE

The development of Government statistics has been very competently set forth in the "History of Statistics," a book which deserves very careful reading.

Even the briefest perusal of this history will make clear that Government statistics have grown up almost at random. It is inconceivable that this free-for-all development, without a central plan or controlling purpose, could have produced entirely satisfactory results. With such a history, the wonder is that we have any statistics at all.

Furthermore, there are other lessons to be gathered from this volume, both as to the statistical work of foreign governments and also as to the statistical work of our own state governments. The latter activities are especially significant, altho the statistical work of the various states is not the subject of this memorandum.

Urgent need of organization is the unmistakable lesson of the "History of Statistics." All those interested in this subject should secure and read this excellent work.

CONCLUSION

Those interested in the problem of mobilizing statistics may be divided into two groups. One group stands for drastic centralization, while another group stands for the present system of decentralization or a mild modification thereof. Careful study leads to the conclusion that both of these groups are justified to a certain extent in their conclusions. For instance, there must be some form of central clearing house. The present system of several departments sending out for the same information, almost at the same time, is both a waste of money and very irritating to the people of the country. Furthermore, there should be some central clearing house which knows at once what statistics are available and where they are available. On the other hand, those who stand for the present decentralization are right in that greater efficiency and promptness develops where the people who are compiling the statistics have a sympathetic technical knowledge of the subject.

No doubt whatever exists but that the Agricultural Department would get out crop figures

much more quickly than an impersonal centralized bureau. In the same way, the Department of Commerce could secure better results on commercial figures, and the Department of Labor could secure better results on labor figures. Moreover, experience teaches that it is very necessary in a compilation of statistics to understand what they mean. A physician can compile statistics on medical cases much more accurately than could a statistician of the stock exchange, and vice versa.

Theoretically it may be safe to have someone compile statistics who has no interest in them, but practically this is a very dangerous thing to do. A purely clerical compiler is often unable to detect errors that often tend to creep into the work.

We thoroly sympathize with those who oppose the interpretation of statistics by the Government. The Government should be the greatest collector and compiler of statistics. Many groups of statistics can be compiled only under Government order and direction. On the other hand, after these statistics are collected and compiled, no attempt by Government officials should be made to interpret them. This interpretation has caused the Federal Trade Commission much trouble and has to some extent injured the prestige of other Governmental statistical bureaus. Statistics should be compiled by those sympathetic with the particular subject under consideration, but such a person should not be allowed to interpret these statistics. In the interpretation of statistics there is a great danger of permitting the heart to get the better of the head. This is the reason for the old witticism about the three kinds of lies. It is inherent in human nature that feelings are stronger than figures and that when feelings and figures conflict there is usually trouble. This natural human tendency should be carefully kept in mind and to this extent we heartily commend the work of Senator Reed Smoot and Director Brown of the Efficiency Bureau.

We most heartily sympathize with Secretary Hoover in his efforts to make statistics more available and helpful. No one thing would be more useful in preventing another panic and depression than to keep the country informed as to the production, storage and distribution of the great basic products of America. Moreover, such work must not wait until the horse has been stolen before locking the barn door. Secretary Hoover's famous address at Atlantic City in 1921, already referred to, deserves most earnest commendation.

With these three basic principles in mind (namely, the need of some form of central clearing house, the value of specialization, and the danger of interpretation) we suggest the following as a means of mobilizing the statistics of the country and making them more useful and valuable. Briefly these recommendations are as follows:

(1) That the different executive departments be held responsible for the compilation of the Federal Statistics relating to their special work. This means that the Agricultural Department should compile the statistics on agricultural production; that the Commerce Department compile the statistics on other commodities and the manufactured articles of agricultural products; that the Labor Department should continue the work of its efficient Bureau of Labor Statistics as relating to wages and dependent subjects; that the Treasury Department should compile financial statistics; and that the various other executive departments should have similar privileges.

(2) Duplication should be avoided and no statistics should be compiled by the various commissions which are working independently of the departments. There should also be certain allocations, for in some instances certain work which is now being done by one department should be assigned to another. The mineral statistics should be transferred from the Interior Department to the Commerce Department and the Lumber Statistics from the Agricultural Department to the Commerce Department. Tobacco Statistics should be transferred from the Commerce Department to the Agricultural Department or what would be better, to the Treasury Department, in view of the tobacco figures which they must collect for Revenue Tax purposes. The annual publication by the War Department of two volumes on "The Commerce of the United States" seems unjustified. There are also other instances which could be mentioned but with which the Efficiency Bureau is well acquainted. This will still leave a small group of statistics which have no apparent mother. These should be placed with the Census Bureau.

(3) The work of the Census Bureau should be thoroly reorganized and stimulated. Its work should be divided into two distinct groups; one, the compilation of precise figures on population and other vital statistics. This work could be carried on as it is now being carried on, since it is used only in a very general way by the business interests of the country. The man in charge of this section may be of the old-fashioned, statistical type, who is keen upon precision and little interested in speed. The

other group should take those statistics which are of only immediate or current value. The man in charge of this second section should be a man who is keen on speed and is willing to risk his reputation in making estimates when necessary. The business man is more interested in having figures promptly and 95% precise, than to have them delayed in being published and 100% precise.

A committee should be appointed to study the general mechanics of the Census Bureau. It is a debatable question among statisticians as to whether it is necessary to take a census of all things at the same time. If this is not necessary a small force could be working all the time instead of the present method of having a big force for one or two years with a general loaf or breaking up of the organization during the inactive years. For the work that this Census Bureau was originally designed, it is doing excellently, but it is today in the stagecoach class when everybody is using automobiles. We have considered the suggestion that the name be changed to the Bureau of Federal Statistics. For psychological reasons, it might be well to change the name, but we think it would be a mistake to use any name which would suggest a centralized bureau. Rather we would prefer the name Federal Bureau of Vital and Miscellaneous Statistics.

(4) The various statistical libraries now scattered thruout the departments should be combined into one Inter-Departmental Statistical Library. For the purpose of co-ordination there should be appointed by the President's Cabinet a statistical librarian who will be in charge of this statistical library, and who will be directly under the President's Cabinet, serving all equally and being amenable to no one else. This librarian would compile no statistics himself, but would perform three functions, as follows:

(a) Have a knowledge of all statistics being compiled by the Federal Government; where they are located and by whom they are being compiled. In this way he would act as a train dispatcher and immediately upon request put the administration or any inquirer into touch with the proper bureau when inquiries arise.

(b) Have the authority of interpreting the law under which this reorganization would take place, and decide jurisdictional conflicts between statisticians of the various departments. This is a very important function and one that only such an inter-departmental man could perform.

(c) Serve as a clearing house on all questionnaires sent out by different departments. By this arrangement, before a department de-

sired to send out a questionnaire it would send the same over to this librarian to make sure that no other department was sending the same or similar questionnaire.

(d) The criticism has frequently been made that since each department is entrusted with promoting and pleading some special interest, the figures produced by any such department are open to the charge of bias. The statistics, therefore, would be received with much more confidence if they were subject to an independent audit. This, of course, need not be constant or complete, but could be applied at intervals somewhat on the same principle as the "call" of the National Bank Comptroller. If such an audit were provided, it should be under this Librarian.

(5) Arrangements should be made for some form of a service organization. Possibly this could be operated most effectively as a division of the Census Bureau, altho some recommend it to be a part of the Inter-departmental Statistical Library above referred to. This organization would stand in the same relation to the other

Departments as does the Public Printing Office, It should be provided with the requisite equipment to handle mechanical and routine statistical work at the request and under the direction of any department needing such service.

It is probable that with effective promotion, sufficient subscriptions could be secured to the periodic Government reports to pay in a large part the cost of such service. In the same way occasional or special Government reports could be sold and the cost of service largely offset.

Repeating, we are exceedingly sympathetic with the purpose that Secretary Hoover has in mind when making his recommendations. We believe that these ends can best be accomplished by neither centralization as proposed by the Bureau of Efficiency, nor by the present haphazard methods of decentralization. We believe that the best results can be obtained by the plan above outlined. Furthermore, we believe that this plan will be the most economical for the United States Government.

ROGER W. BABSON
CLARENCE N. STONE

Cataloging Rules

"CATALOGING Rules; with explanations and illustrations, prepared by Dorcas Fellows, instructor in advanced cataloging, New York State Library School; second edition revised and enlarged. New York, The H. W. Wilson Company. London: Grafton & Co. 1922."

So reads the title page, and instantly to the cataloger's mind comes the query, "Who is Dorcas Fellows? Oh yes, Jennie 'D.' Unused forenames, A. L. A. rules, 28. Even an instructor in cataloging may change her title page name!" Those who have been eagerly awaiting the finished work will forgive Miss Fellows this concession to simplification in their gratitude that she has had the courage, conscientiousness and patience to carry thru the detail work necessary on this book, particularly since it had to be completed after she assumed her duties as editor of the Decimal Classification.

Following the dedication to Dr. Melvil Dewey are two tables of contents, the one summarized, the other analytical, the latter giving reference to page and section numbers. These, together with an eleven page alphabetic index to the sections, make possible ready reference to desired points. To facilitate use there are also in Appendix 5, Lists of articles and abbreviations, repeated from their places in the text.

The preface, explaining some of the problems faced in preparation, is followed by an extract

from Mr. Bishop's address "Cataloging as an asset."

The changes in the new edition begin in the "General directions and suggestions," where the typewriter is recognized as a factor in making catalog cards, and where the differences in practice between the large and small library are touched upon. One could wish that a simplified form of the Library of Congress extension card heading might have been substituted for the historic but unsatisfactory form included.

The text follows the general arrangement of the older edition, with the addition of a new chapter on art objects, natural history specimens and miscellaneous objects, and of five appendices; 1, Fiction; 2, Biography; 3, Authority list; 4, Guides; 5, Lists of articles and abbreviations.

Suggestions for the smaller library are made in the first few sections by sample cards showing alternative as to fulness of detail. The differences are not marked, however, consisting only of the omission on the "Simplified form" of the three dots, of brackets except in the title and collation, of size, and, in the text, of the suggestion that "illus." be used to stand for plates also, unless the latter were distinct features of the book. The sample cards used, however, do not show this point, and probably it will be overlooked. It would seem that the term "il-

lus." might have been recommended to cover all kinds of illustrative material except portraits and maps.

The chief changes in the chapter on author entries consist in the rearrangement of the text, in the use of better typography to emphasize subheads, and in some eliminations and additions. The use on typewritten cards of "call numbers put on by pen rather than by typewriter" is advocated, a practice which will be followed by but few librarians. In the items on the author card, the differences noted are the inclusion of the dates of birth and death of the author, the adoption of the Library of Congress placement for the collation, the latter long desired, and that names quoted in a title are to be included in the form printed on the title page. In this chapter one could wish that a simple statement about the series note had followed the discussion of size, that tracing had been included here instead of in the next chapter and that the chapters called "Name references" "Notes: Miscellaneous" and "Series notes" had been placed directly after this one.

The chapter on subject entries substitutes the dash for the period before the subheads in the subject heading, and uses colon abbreviations in the "subject fullness" of the author's name. Library of Congress cards have made observant users of the catalog realize the benefit to be derived from the author's full name on secondary cards, and it is a question whether the time saved to the typist by the use of any "subject fullness" is not spent many times over by reference workers because of the resulting lack of definiteness.

If the chapter on "Compiler, editor, or translator as author" must be separated from the chapter called "Editors, compilers and translators," it would seem better to limit the latter caption to "Editors, compilers and translators as secondary entry," or, better still, place the two chapters together. It seems unnecessary to have separated the two sides of A. L. A. rule 126. as "Compiler as author" p. 82, and "Collections under title" p. 159. In the latter chapter one gladly greets the sample cards, especially those using the Library of Congress form of hanging indentation, introduced also under "Periodicals." At the end of the first paragraph under "Form" the addition of the words "until after the first line of the collation," would make the statement true to Library of Congress usage.

Under "Periodicals" new material has been added and the discussion greatly improved. Appendix 3, "Authority list," credited to Mary E. Hyde, is a distinctive addition, even if one must regret the recommendation of a card form differ-

ing from all others in indentions and order of items.

As Miss Fellows suggests in the preface, her cataloging rules probably will not suit every cataloger in every detail, but grateful thanks are due her for all the exacting labor that has gone into this exceedingly valuable book which should be in the possession of all interested in cataloging problems. HARRIET E. HOWE,

*Instructor in Cataloging,
Simmons College School of Library Science.*

The Best Twenty-five Books for a Country School

THE best twenty-five books for a one-room country school will be chosen by ballot of librarians and teachers at voting contests to be held at the American Library Association 1922 Conference in Detroit, June 26-July 1, and at the National Educational Association meeting in Boston in July.

Dr. Sherman Williams, chairman of the Library Department of the N.E.A. will be in charge of the contest at the Boston N.E.A. meeting. Miss Marion Horton of Los Angeles, chairman of the School Libraries section of the A.L.A., will conduct the contest at the A.L.A. Detroit Conference.

Ballots will be distributed with official programs and announcements from the registration desks at the two conferences. A printed list of about one hundred carefully selected books will be printed on the ballot so that each teacher and librarian can conveniently check twenty-five titles. The ballot will also have blank spaces in which titles not printed may be added. The list will not include dictionaries, encyclopedias, textbooks or the Bible, but only such other books as are suited for general reading for children in the grades.

The list of the twenty-five winning titles will be widely published and it is expected that the voting contests will do much to bring the school library idea before school boards, trustees, public officials and the general public in an effective manner. They should also have the effect of encouraging rural teachers to demand more and better books for their children.

Free on Request

THE Grosvenor Library, Buffalo, has various duplicate numbers of the following magazines, some for several years back, and offers them to any library that needs them before selling to the old-paper man:

Power, Iron Age, American Machinist, America, Electric World, Ingeneria Internacional, National Engineer, Power Plant Engineering, Iron Trade Review; also Buffalo Directories, nearly every year of issue.

Art in the Public Library

IF the librarian is susceptible to new ideas and has powers of initiative, any public library, whether in a large or small town, can become an art force in that locality. This is the contention of an address delivered by Mary Powell of the Art Department of the St. Louis Public Library at the annual convention of the American Federation of Arts held in Washington May 18 to 20, 1921, and now published in the May issue of the *American Magazine of Art*. A library in a small town which has no art gallery nor other art organization can become the art center of the community if the librarian is alive to his opportunities.

Frequent exhibitions are an essential part of the plan. Small libraries which have no large exhibition space may purchase some form of exhibit screen or have one made by a carpenter. Failing an exhibition such as those sent out by the American Federation of Arts, the small library can improvise its own exhibition from its picture collection. "For example, the advertising pages of any series of magazines will supply enough material for a good exhibit of commercial art; color illustrations of the stories, when assembled, will show the typical work of our contemporary illustrators; copies of old masterpieces of art and recent examples of the work of American painters and sculptors are often found in the periodicals; pictures of gardens, fountains, furniture, room interiors, costume designs, the dance, settings for plays and pageants are only a few of the subjects of general art interest that may be gathered together from the magazines found in any locality that may be clipped and shown as exhibitions." Publishers of magazines will sometimes furnish the originals of drawings for the cost of transportation.

On the practical side, much use can be made of the art collection by artisans and industrial art workers, makers of advertisements, printers, store window decorators and the designers of settings for music and dance numbers in motion picture houses. If business men are promptly furnished with the pictures they request they are likely to become advocates of the extension of artistic activity in the library.

In the larger towns with larger colonies of artists "one man" shows offer a greater variety of media for art expression. Individuals will be interested to share with the library the best of their own private collections.

It is when the art museum recognizes the public library as an agent for art education and organizes a plan for museum extension by carry-

ing art to the people thru the library and its branches that the most far-reaching results are obtained. In St. Louis paintings from the Art Museum are hung in the art room and the children's room of the library each month, and exhibition cases are placed in each branch and in the central library which contain objects from the museum's collection and are carefully labeled. The collections in the cases circulate among the branches, allowing the objects to remain two months in each branch, and making it necessary to assemble new collections only once a year. In this way material in the store room of the museum not on display in the permanent collections is put to work.

Invariably in close connection with the exhibitions should be members of the staff qualified to explain to visitors processes involved in the making of the objects on view, whether lithographs, etchings, or batik, and a carefully chosen selection of books from the larger resources of the library. Nor should the books be forbiddingly technical. The books which Miss Powell mentions as art books "that should be considered for a person who is commencing to be interested in art are: "The Enjoyment of Architecture," by Talbot Hamlin; "Art and I," by C. Lewis Hind; Pennell's "Life of Whistler;" Reade's "Cloister and the Hearth;" Balzac's "Cousin Pons;" Merejkowski's "Romance of Leonardo da Vinci;" Walter Pater's "Renaissance" and "Imaginary Portraits;" "The Enchantment of Art," by Duncan Phillips; and "Estimates of Art," by Frank Jewett Mather.

Have you Waited for a Book?

IN books much in demand the Springfield (Mass.) City Library Association places a bookmark which reads:

HAVE YOU WAITED FOR A BOOK

THE accompanying book is one for which other readers are waiting. They will appreciate your consideration if you will return the book just as soon as you finish it, and doubtless by returning their books promptly will make it easier for you to get the book you want.

To furnish the books asked for when they are asked for, is the Library's constant endeavor and hardest problem. If one hundred and thirty readers—less than one out of each thousand of population—want an expensive new book, it is obviously impossible with the funds available to provide them all with the same book at the same time. The library buys extra copies liberally, and aims to provide just as many as will be used for a reasonable length of time.

Promptness in returning books, by increasing the turnover, may easily be equivalent to doubling the supply.

In a town of a hundred the sand inhabitants the eager literary life was restricted to the news stands

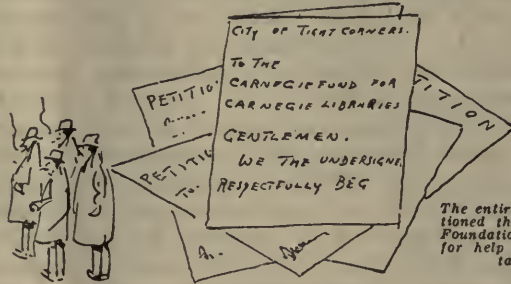

This pained the wise men who ruled the city. They said, "Let us have a library"

And so they began a newspaper campaign

A noted firm of architects worked up a plan

The entire city petitioned the Carnegie Foundation, asking for help and assistance

The board of aldermen most disinterestedly looked at different sites for the purpose of building

They spent a year examining different sorts of tables. They bought half a million worth of tables and chairs and fixtures

Finally, they opened a magnificent building twice as large as planned and costing ten million dollars

They put in luxurious rest rooms and a dining room

They installed a scientific ventilator costing another half million

They bought three hundred thousand dollars' worth of filing cabinets

And then they paid their librarians eighteen hundred dollars a year

Hendrik Willem van Loon, March 1911

THEY BUILT A LIBRARY IN OUR TOWN

This is the third of Dr. Hendrik Willem Van Loon's Letters from a self-made town in the Survey, and is here reproduced by the kind permission of the Survey Associates. It was suggested in a letter by George F. Bowerman, librarian of the District of Columbia Public Library, in which he said: "Most of the powers that be think that they have done the main thing if they have built the building, and they even let . . . the Carnegie Corporation do that. They also think some books are necessary . . . and last of all they think of the librarian. For that purpose they . . . employ almost any under-educated person without training, or if they do . . . get some one with training, they pay him or her almost nothing."

THE LIBRARY JOURNAL

TWICE-A-MONTH

MAY 1, 1922

THE development of children's library work has been remarkable, not only in itself but for what has come of it. Children's Book Week has brought booksellers as well as librarians into closer touch with the plans for better reading for the little folk, and has also stimulated publishers to cater more widely and wisely to their juvenile clientèle in a way that will bring fathers and mothers to their help. The demand thus stimulated has led publishers to engage many librarians in the production of books for children, to good purpose, and the number of literary librarians is thus yearly increasing. A number of department stores have developed successfully the specialty of books for children and have enticed several librarians into the service of placing books promptly in the home, which is even better than loaning them from the children's room in the libraries. The development of the library section in the National Education Association is another sign of the times, and a normal school is not now complete unless it teaches, and, indeed, does practice work in teaching, the better use of a better class of children's literature. Parent-teachers' associations and women's clubs have also become practically interested, and all these agencies are combining to give youthful readers of today a far better chance for their future in the way of good reading than their elders enjoyed.

★ ★ ★ ★ ★ ★ ★

THE children's room has, in fact, burst its walls and taken possession of out-of-doors. This out-of-door feature began, perhaps, in the placing of children's libraries or books for children in or close to public parks and playgrounds, and the movement for children's playgrounds has grown in happy parallel with the children's library cause. An interesting feature is exemplified in one of the branches of the Los Angeles Public Library, which has certain library hours in a community house where children have right of way during this time and where the books at other times form an ornament to the community room. This house is itself a part of a public park, so that the little ones may be in and out at their sweet will. In further line with this development has come the growth of plays for children, many of them

fostered by children's librarians, both within and without school and library rooms. The children's clubs which exist in connection with many libraries under the inspiration of children's librarians have been a useful factor in all this, stimulating the younger folk and giving them opportunity of practice-work in organization under their own leadership. The yearly Hans Christian Andersen festival at Los Angeles, described in our children's library number for October 1, 1921, by Miss Jasmine Britton who is chiefly responsible for its success, is a happy culmination of this kind of work in which children and the passing throng have equal joy.

★ ★ ★ ★ ★ ★ ★

HAPPILY, welfare work for the Navy has been amply provided for, as previously stated, in the Appropriation Bill, and a fair quota of the total appropriation, of approximately half a million dollars, will be available for library work. The visit of Librarian Brown to the Pacific fleet and naval stations proved most successful, and library institutes for the "yeomen," who on most ships have practical charge of the books, were especially of interest and value. A notable instance of the use of navy libraries is on the Battleship Mississippi with its complement of a thousand men, where, from its pleasant and comfortable library room serving also as a social center for the men, fifteen hundred books a month have been circulated. It is gratifying to record that Secretary Denby has been most alive and alert in pressing home to the Navy, of which he was a modest member during the war, the duty of reading. To his recent circular letter was appended a brief list of recommended books which he personally revised and modified to the satisfaction and gratification of his library specialists. The Army probabilities are in sad contrast, for, despite the admirable letter of General Pershing, printed elsewhere, a good many of those who should be acquainted with recent history have quite overlooked the proven value of books to the boys in khaki. Senator Wadsworth has been giving his sympathetic attention to this matter, and it is to be hoped that by Senate action and insistence in conference enough may be saved for this important work to continue library organization within the Army, even in

skeleton fashion, until the Congress is prepared to accept the lessons of war experiences and give the Army what it needs and deserves for welfare work. If Congressional action has not been completed before this reaches our readers, it would be well for librarians, especially those who were in War Service, to write to senators and representatives, particularly those on the Army Appropriation Committees, in defense of library work for the Army and in protest against its enemies, economy and inertia.

★ ★ ★ ★ ★ ★ ★

THE report on the statistical work of the government from Roger W. Babson, one of the most eminent of our economists and statisticians, is especially interesting to librarians because of the suggestion that a librarian should be appointed for an inter-departmental statistical library who would be also an interpreter of statistics and serve in the allocation of statistical work among the departments and the prevention of duplication. The report does not approve the thoro centralization proposed by the Bureau of Efficiency, of which Mr. Herbert D. Brown is the head, but emphasizes the importance of the collection of statistics in a given field by the department which knows the

field. On the other hand, it agrees that there is much duplication and waste, especially in the sending out of questionnaires and its plea for organization rather than centralization is thoro-ly justified. It is a fair question whether this function of an inter-departmental library could not better be performed as a part of the Library of Congress similar to the Legislative Reference division, and the suggestion that the librarian should be appointed by the cabinet officers jointly involves considerable difficulty. Whether the most intelligent of librarians should have his work confused with the other kind of work proposed in the report, which is utterly different, is at least doubtful, for it is not the business of a professional librarian to interpret the contents of his library but rather to see that his library is properly administered for public use, which principle would apply to statistics as well as to books. It is to be hoped that Mr. Babson's report will obtain the general discussion it merits and result ultimately in a well-conceived and unified plan, which will incidentally put government statistics before the public in the best possible manner and to best possible effect, in which the system of public libraries thruout the country should be useful helpers.

LIBRARY ORGANIZATIONS

THE DETROIT CONFERENCE

June 26-July 1

A SPECIAL convention rate of fare-and-one-half for round trip to Detroit has been granted by all railroads east of the Rocky Mountains, except those in Canada. To secure this rate delegates must plan to return home over the same lines by which they go and must reach destination returning before midnight of July 11 except those from points in Colorado, Idaho, Montana, Utah, New Mexico and Wyoming, who will have a return limit of midnight July 12.

This reduced round-trip convention rate can only be secured by presenting to ticket agent an Identification Certificate which will be mailed to any member of the A. L. A. planning to attend the meeting, if request for it is made to A. L. A. Headquarters, 78 East Washington Street, Chicago. The convention round-trip will be on sale on June 22 at all ticket offices.

As there may be various reduced fare trips and excursions offered by railroads in June the Travel Committee advises consultation with local ticket agent before purchase of ticket. Between Buffalo and Detroit railroad tickets

reading via the Michigan Central, Wabash or Grand Trunk Railway will be accepted in either direction on the steamers of the Detroit and Cleveland Navigation Company.

For those from Chicago and other middle-western points who may wish to proceed East after the Conference, especial attention is called by the Travel Committee to a possibility of a round-trip rate between Chicago and New York City with stop-over at Detroit and at a reduction from the regular fare. There may also be in force by June "circle tours" East which may allow a route via Toronto and Montreal with the Post Conference party and return direct.

Special parties will be conducted by Mr. C. H. Brown, Bureau of Navigation, Navy Department, Sixth Division, Washington, D. C., from New York, Philadelphia and Washington; by Mr. F. W. Faxon, 83 Francis Street, Boston 17, from New England; by Mr. John F. Phelan, Chicago Public Library, from Chicago.

All persons planning to travel with a special party should register with the persons named as soon as possible.

The Post Conference trip, under the personal conduct of Mr. F. W. Faxon, will be from Detroit to Buffalo and Toronto. A steamer would be taken on Lake Ontario via Rochester, N. Y., and Kingston, to some point in the Thousand Islands and then on down the St. Lawrence River, running the rapids to Montreal. The Post Conference trip will last from July 1 to July 7, according to present plans. Detailed announcements will be made soon.

TO TRUSTEES

The Section will meet on Tuesday afternoon, June 27. The subject for discussion will be "What must be done to divert a larger proportion of funds derived from taxation to the needs of public libraries?" There will be speakers of national prominence and it is hoped that a large number of trustees will take advantage of the central location to contribute to the discussion of this pressing question. The Chairman, Frank Hervey Pettingill, President of the Los Angeles (Calif.) Stock Exchange, will welcome suggestions from all interested.

TO LIBRARIANS OF SMALLER LIBRARIES

There is to be a special round table for Smaller Libraries at the Detroit Conference in connection with the Catalog Section meeting on Friday afternoon, June 30. This round table discussion will be conducted by Ellen A. Hedrick, of the North Dakota Library Commission. A paper on suggestions for the solution of some cataloging problems in smaller libraries will be given by Susan Grey Akers, 1913 Wis., cataloger of the University of North Dakota. Will those members of library commissions and librarians of the smaller libraries who are interested in the discussions of this round table please communicate with the Chairman of the Catalog Section, Mrs. J. T. Jennings, St. Paul Public Library.

THE AKRON LIBRARY CLUB

AT the March meeting of the Club, held in the Art Room of the public library, 43 members were present at dinner which was followed by talks on recent books: Juveniles, by Dorothy Tobin; fiction, by Maude Herndon; biography, by Louise E. Grant; travel, by Miss Henry.

Officers for 1922 are: President, Fannie M. Slabaugh, Public Library; vice-president, Mrs. Hoover, Law Library; secretary-treasurer, Hesper Buckingham, Goodyear Library.

ALABAMA LIBRARY ASSOCIATION

THE Alabama Library Association held its annual meeting at Decatur, Florence, and Tuscumbia, April 10-12. About forty librarians were in attendance, this being the largest

meeting ever held in the State. The principal speaker was Carl H. Milam, Secretary of the A. L. A., whose subject was "A State System of Libraries." The theme of this address was aggressiveness and was instructive and inspiring to the librarians present.

Charlotte Templeton, Organizer of the Georgia Library Commission, gave many illuminating points during the round-table discussions.

A resolution was offered by Mrs. Marie Bankhead Owen that a legislative committee be appointed to work with the next State legislature in order to secure the passage of a bill providing the appropriation of a sum large enough to carry on extension work. This bill would permit the employing of an experienced extension worker who would be connected with the Department of Archives and History. It was decided that the 1923 meeting of the Association be held in Montgomery during the session of legislature in order to help with the passage of this bill.

The Association voted unanimously for affiliation with the A. L. A.

The Tuesday evening program was especially interesting. Alabama authors and musicians were present in person and were roundly applauded after having given their own selections.

MARY R. MULLEN, *Secretary*.

PENNSYLVANIA NORMAL SCHOOL LIBRARIANS

THE first Teacher Training Conference of the State Normal Schools of Pennsylvania was held April 10 at the Central Normal School at Lock Haven, Pa. An important section of this conference was that of the librarians, assistants and other representatives of the libraries in the fourteen State Normal Schools. Three sessions were held.

The first was in charge of Rose Stewart of Slippery Rock. The general subject was: Our present course in library methods. Alice Cochran, librarian of the West Chester State Normal School, in an excellent paper discussed printed helps for the teachers' use. Miss Cochran brought with her samples of textbooks and other material and briefly characterized each. Mrs. Catherine Brew of Indiana State Normal School followed with an evaluation of the printed helps for the students' use. Helen Ganser of Millersville State Normal School had for her topic, "In Which Semester Should the Course be Given?" Admitting that some of the lessons might more profitably be given in the senior class, Miss Ganser advocated giving the course to the Juniors so that they might as soon as possible have the information which would help them to use the library. Discussion fol-

lowing showed opinion to be that such topics as book selection, school library management, and methods of introducing children to the library, might well be repeated or enlarged upon in the senior class.

The second conference was in charge of Harriet K. Avery, librarian of the Keystone State Normal School. Elsie Whittaker, supervisor in the Model School of the Millersville Normal School, read a very interesting paper in which she outlined "The Need and Value of a Children's Library Room in the Model School." She described the children's room in the school and told of methods used in making it a vital factor in the school organization. Hubert Eicher, state director of School Buildings, sent copies of blueprints showing how an ordinary classroom may, with comparative ease and little cost, be transformed into an attractive children's library. Details of furnishings and equipment, such as slant top tables, folding benches, etc., were included in the plans. It is the plan to send these blueprints to each of the State Normal Schools where they will be on display in the library, and where it is hoped that they may stimulate an interest in the establishment of such rooms at each of the normal schools and in the schools in which graduates will later teach.

Anna Shutterly of the California State Normal School read a paper on "Greater Use of the Normal School Library." She told of her experiences in making her library known to every member of the faculty and student body, emphasizing the fact that a Normal School Library must use advertising methods just as does any other progressive library.

Gladys Hadley, librarian of the Bloomsburg Normal School, in a happy, convincing manner told of the methods employed in that library of interesting children in books. This library has recently established a children's department in a room equipped with suitable furniture and with a good working collection of children's books. Miss Hadley and her associate, Marjorie Wilson, have had training and experience in children's library work, and between them have been able to accomplish very satisfactory results in their work with the children of Bloomsburg.

Etta O. Christiansen, director of rural training at the Keystone State Normal School, represented the Supervisors of Rural Education. On behalf of the children in rural schools, Miss Christiansen pleaded for more and better books, pictures, and museum material to be used in these schools. She told of the splendid results obtained thru the traveling libraries now sent out from the normal school at Kutztown to the

small rural schools used as practice centers for the students specializing in rural education. Miss Christiansen advocated that sufficient collections be supplied by each of the normal schools in the state to their respective group of rural schools, that these collections be exchanged from time to time so that the pupils may have access to a wide range of reading. A satisfactory plan for distribution of geography material from the normal to the rural schools is now in operation. Miss Christiansen recommended that the service to the rural schools should include, in addition to books and visual instruction material, large wall pictures, and cases containing museum specimens.

A book symposium was a feature of this conference.

The third conference was devoted entirely to a discussion of the many details relating to the teacher-librarian course given at Keystone and Millersville. This course is an elective, open to students preparing to teach junior high school subjects. Satisfactory progress was reported from both schools and plans for greater correlation of the work were outlined.

A set of questions and comments typed so as to leave space in which to enter answers or conclusions was prepared for each of the three conferences. The questions and comments were selected by the Director of School Libraries from correspondence received from normal school librarians.

This is the second time in seven months that the Normal School librarians of Pennsylvania have had an opportunity to discover problems and ways of solving them, to learn the best methods of library work in normal schools, and to create individual friendships and *esprit de corps*.

ADELINE B. ZACHERT,

Director of School Libraries of Pennsylvania

ILLINOIS REGIONAL CONFERENCES

ILLINOIS regional library conferences held during February and March were unusually well attended, over two hundred libraries being represented by four hundred and fifty librarians, directors and others interested.

The Illinois Library Extension Division and the Illinois Library Association again worked together in arranging for the meetings. The number of adjacent libraries and the convenience of train schedules are determining factors in selecting the places of meetings, and as far as possible, different cities are chosen each year—this year Chicago, Freeport, Mendota, Bloomington, Galesburg, Davenport (Iowa), Jacksonville, Hamilton, Danville, Charleston, Olney, Belleville, Marion, and Litchfield. The Daven-

port and Danville conferences were joint meetings with Iowa and Indiana.

APPROPRIATIONS

Discussions brought out the fact that a few libraries had been able to secure the new maximum rate of one and eight-tenths mills for this year, and that most of the others were receiving the previous maximum levy of one and one-third mills. The one dollar per capita rate recommended by the A. L. A. if put in operation in all Illinois libraries, would require a higher tax rate than the present law permits. It was suggested that the legislative committee be asked to prepare a bill amending the library law for an increased tax rate. Others thought this an unpropitious year in which to ask for increase in taxation.

BUDGETS

In talking over budgets, it was found that the cost of maintenance, or heat, light, repairs, and supplies had increased in greater proportion than any other item. Julia Robinson suggested the following budget: Salaries, 50 per cent; Operation (heat, light, janitor service) 15; Repairs, 3; Books, 20; Binding and Periodicals, 5; Supplies, 5; Miscellaneous, 26.

KEEPING IN TOUCH WITH THE PROFESSION

The I. L. A. representative at each meeting presented the subject of keeping in touch with our profession. President J. S. Cleavinger pointed out that the number of persons in library work is relatively small, hence the need to foster the spirit of unity. Professional consciousness is necessary if we are to convince our communities of the value of our work. Among methods of improving status and raising the professional average are raising the standard of general education by taking courses offered in college and university summer schools, and of professional training by attending the summer library school or the regular course in one of the accredited library schools, and by reading the professional journals, state commission and library bulletins. The library staff forms only a small group in any community. Touch with other library workers can be made by visits to other libraries, writing to or call on the Library Extension Division, attending library meetings—district, state, and national.

A SCHOOL LIBRARY POLICY

A school library policy for Illinois was presented by Martha Wilson, chairman of the Educational committee. At present the only law providing for school libraries is a permissive one which states that school directors may approve the purchase of books for a library with any money left after salaries, laboratories, and other school equipment has been provided for. The last legislature created an Educational

Commission to investigate the present educational system of Illinois and to report its recommendations to the next legislature. The educational committee of the I. L. A. is preparing plans for a definite development of school libraries to submit to this Commission. The first step is the appointment of a Supervisor of school libraries for the State.

Schools have had the use of libraries, but they have secured this service thru the public library, so that to-day a school otherwise well-equipped has often a very poor library.

READING LISTS

The discussion easily turned from this topic to that of co-operating with teachers on pupils' and teachers' reading lists. The last selection of books on the Illinois pupils' reading circle were generally disapproved of, as having little merit and costing as much as a really good work. The teacher is always most grateful for suggestions on supplementary reading. As Miss Northey stated, "the teacher knows the child and the librarian knows books." Teacher and librarian can co-operate with the best of results. The suggestion was made that the librarians send the primary grade teachers lists of books for reading aloud, and the other grades and high school teachers lists of books for supplementary reading, at the opening of the school year.

Edith Moon of the Evanston Public Library who opened the discussion of children's books at the Chicago meeting believes that the children's reading should be related somewhat to their school work. She began with the primary grades and urged the librarians to choose the best of folk tales, legends, myths, that the child might have a keener delight in his later studies in literature. For the grades she stressed history, geography and biography, mentioning titles and series which were most helpful.

DO LIBRARIANS READ?

The five minute talks on new books showed conclusively that librarians are reading even more than usual. One librarian reported that the fifty volumes of the *Chronicles of America* had been read aloud in her family, and the favorites discussed included many up-to-the-minute books.

Mr. Richman of Muscatine, Iowa, spoke of the value of the current periodicals in helping one to form an idea of the trend of thought of the day; after which naturally enough the meeting turned its attention to the *New Poetry* and recent fiction.

HOME BREW BINDING

Francis K. W. Drury, Assistant librarian, Brown University, was good enough to send a sample of his "Home brew" binding. This was exhibited at each conference and brought forth

much favorable comment. (See LIBRARY JOURNAL for January 1, p. 20.)

FIRE INSURANCE

The question of insuring books against loss by fire, while in circulation, was brought up by one librarian, who had lost a considerable number of books loaned to a school. The school's equipment and books were destroyed by fire and the school refused to make good for the loss of the library books. The school's own loss had been covered by insurance. Insurance companies say they can insure books while in circulation, but the increase in the rate would scarcely justify it.

PAMPHLET FILES

Some librarians classify their pamphlets and clippings by the decimal classification, and file in vertical files or pamphlet boxes. All agreed that if they were to start over again they would not classify the material, but assign subject headings, using the *Reader's Guide* subjects, arrange alphabetically the subjects and file in vertical files or pamphlet boxes. It is well to stamp the date of receipt on all pamphlets, as an aid in withdrawing out-of-date material, in the necessarily frequent weeding out of the pamphlet files.

PUBLICITY METHODS

Many and varied were the plans for publicity. One librarian whose Board set aside a certain appropriation for advertising suggested that she ask advice of an advertising expert. He suggested circularizing certain groups of people. Another librarian was having a library leaflet printed to be distributed from house to house by boy scouts. Another made reprints of the annual report as published in the newspaper, and distributed them from the desk and by mail. Another edited a column in the local paper called "read a book a week" in which she reviewed some worth-while books.

DIRECTORS' CONFERENCE

The directors of library boards met in separate session in the Chicago conference. The discussion was devoted chiefly to library appropriations and budgets. Mr. Wilson, Secretary of the Library Board of Chicago, pointed out that the amendment tax for cities over 100,000 population can not be scaled below eight tenths of a mill and for cities under 100,000 below one and eight tenths mill, will cease to be effective after 1923, and that the question will have to be considered in the next legislature. The question came up as to whether the town board of a town incorporated under a special charter has a right to change the library tax rate voted by the people, and Miss Price was asked to obtain the opinion of the Attorney General.

Professor Luther Robinson, Secretary of the Warren County Library, gave a most interesting and detailed account of the progress of that library. Mrs. Elizabeth Claypool Earl, president of the Indiana Public Library Commission, read a most excellent paper on the trustees' opportunity, and Mrs. Leonard of Crawfordsville, Indiana, and Mr. Wallbridge of Hoopston, Illinois, spoke on the relations of trustees to librarian and staff.

LIBRARY CALENDAR

May 4-6. At Jackson, Miss. Mississippi State Library Association.

May 5. At the Watchemoket Library, East Providence, R. I. Rhode Island Library Association.

District meetings will be held by the Ohio Library Association as follows:

May 2. At Ohio University Library, Athens.

May 5. At Greenville Carnegie Library.

May 9. At New Philadelphia Public Library.

May 12. At Delaware Public Library.

May 16. At Toledo Public Library.

May 19. At Western Reserve University, Cleveland.

May 22-23. At St. Louis. Annual meeting of the Medical Library Association.

May 24-26. At Menominee, Mich. Upper Peninsula Library Association of Michigan.

June 26-July 2. In Detroit. Headquarters at the Hotel Statler. Forty-fourth annual conference of the American Library Association.

July 3-8. In Boston. Annual meeting of the National Education Association.

Aug. 30-Sept. 1. At Olympia. Pacific Northwest Library Association's thirteenth annual conference. Visitors to the Pacific Northwest will be particularly welcome.

Sept. 11-16. At Alexandria Bay, Thousand Islands. 32nd Annual Meeting of the New York Library Association.

Oct. 18-19. At Flint. Annual meeting of Michigan Library Association. There will be a special meeting of the Association held in connection with the Detroit Conference, probably on June 28.

October 19-21. At Chicago. Illinois Library Association's annual meeting. Headquarters at the Chicago Beach Hotel.

Oct. 24-27. At Altoona, Pa. Keystone State Library Association. Headquarters at the Penn-Alto Hotel.

THE CHILDREN'S ROOM

Of late more emphasis has been laid by publishers on the distribution of children's books throughout the year. As the librarian well knows, the tendency to make children's books primarily for Christmas giving has not improved the quality of juvenile literature.

To call attention to the work of the library in meeting the continuing needs of the children for sound entertainment and instruction, the *Library Journal* has featured in this issue a number of articles on the administration of children's departments which should be most timely.

Books must now compete with a multitude of outdoor lures, in addition to the ever-present movies and the flood of questionable periodicals. If the library's endeavor in behalf of the children is given proper publicity, however, such modern institutions as the Burgess Books or the Royal History of Oz will more than hold their own in the affections of the masses of children.

It is the children's room that calls for high-spirited co-operation upon the part of all concerned with books.

The Publishers.

MAINE

"Maine is not asking for a county library system The county is not the unit in our state, nor are the transportation lines and geographical conditions such as admit the county system to be carried on to the greatest advantage. Some of the counties would have to be equipped at heavy expense to assume the necessary duties of such a system. . . . More-over we feel strongly that with sufficient funds to oversee library activities from the state department the middle man—the county library—can for the present be eliminated. Our goods can go direct from the producer—the State Library—to the consumer—the individual reader. . . . The Library of the State of Maine belongs to the citizens of the state and is used by them to the extent of a book circulation in 1921 of approximately 200,000.—*Maine Library Bulletin*.

NEW YORK

Binghamton. Besides loaning more books in 1921 than ever before in the history of the library (238,509) the Binghamton Public Library became the theatre of many diversified exhibits and lecture courses. The Americanization League also held 278 sessions at the library, with a total attendance of 1,106.

A branch library was opened in the American House late in September, since which time 3,513 books have circulated. Sub-stations and traveling libraries accounted for 11,703. In the young people's department 1,206 new borrowers were registered and 323 were transferred to the adult department, making the registration there 8,306.

Buffalo. On the publication of its twenty-fifth annual report the Buffalo Public Library is able to count its circulation in millions. The exact number of issues in the year 1921 was 2,049,082. In spite of this large total not all the city was satisfactorily served, as the seven branch libraries are widely scattered and only one has a permanent and adequate building. Librarian Walter L. Brown emphasizes the fact that the greatest need of the Library is proper housing for its branch libraries.

On January first of this year the number of registered borrowers was 119,774 as compared with 108,870 at the beginning of 1921. The 9,312 registered child borrowers took 121,489 books from the children's room. The circulation thru the 1,103 classroom libraries in the schools was 555,445, and it was noted that children of the foreign born made

greater use of the books than did the children of the older residents. The Public Library branch in the Lafayette High School thru the courtesy of the school authorities was kept open thruout the summer. The record of the circulation of books from the traveling libraries was 44,949, exclusive of the use of the books made at the places of deposit. A small library was placed in the office of the State Employment Bureau for the use of the many waiting for employment.

The Library has 416,663 volumes. From receipts of \$242,378, books, periodicals and binding required \$55,030, and library salaries \$112,170.

New York. Of the library problem at Columbia University President Butler says in his annual report for the year ending June 30, 1921: "If the main Library is made the center for scholarly research and special study, and if the Reading Room in University Hall is so furnished and administered as to meet the needs of the army of undergraduate, University Extension and Summer Session students, a notable improvement will have been effected in the University's resources and efficiency." A count taken in February, 1921, showed a total of 407 readers in twenty-five reading rooms at 10 a. m., and 572 readers at 2.30 p. m. The total seating capacity of the Main Reading Room is 150. The assignment last year of Room 301 Hamilton Hall as additional quarters for the College Study has helped materially in caring for the overflow. The 1,535 volumes added to the Study library did not increase the collection to the point where it can begin to supply the demand.

An important step taken in the Law Library was the equipment of 405 Kent Hall as an officers' library, where a duplicate collection of the most important law reports and some other useful sets, in all about 10,000 volumes, was installed in a separate room on the same floor with the offices of the teaching staff and for their exclusive use. The Law Library has in all 95,581 volumes, and a Columbia University Law Library Association was organized during the year with an initial membership of over two hundred to assist in its development.

The year as a whole showed an almost complete return to the recognized conditions of use and growth that were interrupted by the war. Shipments of new books are now received from all parts of the world except Russia and Turkey. Exchanges with Germany and Austria have been sent from the library for the first time

LATEST and BEST RADIO BOOKS

Radioactivity and Radioactive Substances. By J. Chadwick, M.Sc. 32 ills. and 9 tables. Price, 85c. With a Foreword by Sir Ernest Rutherford, F.R.S. An introduction to the study of radioactive substances and their radiations. The nature of radioactivity and the bearing of radio-active transformations on the structure of the atom.

"The virtues of this little volume of the Pitman Technical Primer Series are that the author does not essay to explain more of his subject than a hundred-page book properly can, and that he presents his material in a logical order and not in the chronological order, which is so frequently done, to the confusion of the average reader."—*N. Y. Saturday Evening Post.*

Directive Wireless Telegraphy. Direction and Position Finding, etc. 57 illus. and 5 tables. Price, 85c. By L. H. Walter, M.A.

Continuous Wave Wireless Telegraphy. 58 illus. and tables. Price, 85c. By B. Mittell.

Telegraphy, Telephony and Wireless. By J. Poole. Price, \$1.00.

"This volume is technically sound, excellently written and produced, and is recommended confidently as an exceptionally comprehensive and accurate introduction to the subject."—*Electrical Review.*

Marine Wireless Pocket Book. By W. H. Marchant. Price, \$1.75. (*Ready April 25, 1922*)

The work is divided into six sections. The first section contains a brief outline of the principles of various electrical apparatus. Sections 2-5 deal with the different instruments specially designed for wireless work. The various types of transmitters and receivers are dealt with very fully. Section 6 contains regulations, codes and similar information which is of special interest to the Marine Operator.

ISAAC PITMAN AND SONS
2 West 45th Street New York

since 1914, and in return there have been received packages evidently made up in 1914 and 1915 and held for dispatch.

The catalog of the Avery Library has been thoroly revised, making the great architectural resources more readily available in important ways to its users. The question of lost books, hitherto regarded as a Loan Desk problem, has been referred to the Catalog Department. A daily report is made from the Loan Desk of books asked for but not found, and a shelf-reader has been added to the Library staff whose duty it is to see that books are placed on the shelves in accordance with the catalog. Replacement copies of important books after a proper period of search are supplied, and the titles of others missing temporarily removed from the catalog. The library has advertised much more extensively for books out of print or out of stock than ever before, and has found the amount thus spent for advertising more than returned.

In all 40,499 volumes were added, comprising 22,299 in the General Library and departments; 12,072 in the School of Law; 1,860 in the School of Medicine; 1,175 in Barnard College, 2,979 in Teachers College, and 114 in the College of Pharmacy. On June 30 there were 797,106 volumes and 45,000 estimated unbound pamphlets in the library. The volumes supplied from the Loan Desk for outside use, including 23,383 renewals, was 162,387, and 252,247 were loaned from reading rooms. The total recorded use was 1,079,567. Nearly 100,000 pieces were handled in the bindery. Expenditures for binding were \$8,722, and for salaries \$77,890.

NEW JERSEY

Dover. The work with schools conducted by the Dover Free Public Library showed added growth in all lines at the end of 1921. Libraries were placed in five more classrooms, and 75 books were sent for the use of the high school. Two book stacks made by the pupils of the manual training department of the high school added greatly to the attractiveness of the Library. Classes of instruction in the use of books and libraries were held from October to April, and in June 110 certificates were presented by the library to the graduates of the grammar school.

The voters of Morris County decided at the November elections to establish a county library, which will be of material aid to the Dover library, as the out-of-town borrowers will be transferred to the county library and the local library will be on the exchange list.

The use of magazines and reference books showed a marked increase. A large percentage of the readers was men and boys. There were 41,710 books issued for home use, or 7,013 more than in 1920.

PENNSYLVANIA

Philadelphia. The foundations of the new building for the Free Public Library of Philadelphia are complete and the superstructure is to be finished by next March, so that it is probable that the library will be ready for use in the fall of next year.

ILLINOIS

Chicago. The Chicago Real Estate Board has established a library of zoning, containing literature and illustrations relating to zoning in cities thruout the United States. The library is in charge of Jacob L. Crane, technical adviser of the zoning committee of the Board.

MISSOURI

The secretary of the Missouri Library Commission undertook during the latter part of the year to secure greater publicity for the Commission among the newspapers of the state and by direct communication with people in a position to aid in extending its usefulness. News articles were prepared and sent in mimeographed form, at intervals of a few months, to one paper in each county, with a request to print for the information of their readers. Other articles were mimeographed and mailed with application cards to parent-teacher associations, country preachers, county agricultural agents, county superintendents, and members of the legislature. Two numbers of the Commission's bulletin, the *Library Messenger*, were published.

Five new libraries were started. Cape Girardeau at the time of the report was completing its Carnegie building which was promised before the war, and was soon to house the new Public library operating on a tax-supported basis. The state legislature at its 1921 session enacted a county library law, making it mandatory upon the county court of any county, upon the petition of 100 tax-paying citizens, to submit the question of the establishment of a county library to the voters at the next April election. The matter of county libraries has been agitated in several counties, with no active campaign begun as yet. Twenty-five counties contain a tax-supported town or city free public library, but eighty-nine counties with a population of 1,999,139, including the population of those parts of the other 25 counties not included in the cities and towns having public libraries, have no free, tax-supported public libraries within

their borders. The state as a whole, in addition to the 30 tax-supported free public libraries referred to above, has 27 other libraries supported mainly by subscription, but in a few cases by endowment.

The Commission loaned 16,423 books thru the traveling libraries, which were placed in all counties but one. The Legislative Reference Library was in operation during the entire regular session and the first special session of the legislature. The work was performed by the Secretary of the Commission, Irving R. Bundy, and two clerks appointed by the legislature as provided by law. A bill providing for the establishment of a permanent legislative reference library was passed by the House, but killed in the Senate.

MINNESOTA

Minneapolis. Architects for the million-dollar city library for Minneapolis have been chosen. They are Messrs. Long and Thorshov of Minneapolis, associated with E. L. Tilton of New York. Mr. Tilton is the architect of the Wilmington Institute Free Library now in process of construction, the Morrystown Public Library, and of several Carnegie libraries.

ENGLAND

Oxford. The Bodleian Library received £5,000 from George Bodley in 1921, its most important monetary gift of the year. Mr. Bodley does not claim kinship with the Founder of the Library, but there is a tradition in his family that such a connection exists. Walter Morrison, who gave £50,000 to the Library in 1920, died on December 18. The income from his benefaction, £2,814, has enabled the Curators to supply the most pressing needs of the library without allowing for expenditure on the scale of the years before the war. The entire receipts amounted to £17,709, and the chief expenditures were £9,637 in salaries and £1,248 for mss., periodicals, and printed books. At the end of the year there were fifty persons on the staff. A larger proportion of boys is employed, and the adult staff is still steadily decreasing.

Among the important donations of books were 3,000 valuable Chinese books and manuscripts from Sir Edmund Backhouse. Thru the generosity of graduates of Yale University, the Yale University Press presented a number of its publications, bearing on the war, the United States, and general subjects. Each volume has a bookplate commemorating the sacrifices of England and the part played by 3,000 Yale graduates in the war.

Work on a new catalog has been begun. In

1907, when the printing of it was first considered, the Bodleian copy consisted of 829 folio volumes, and at the end of 1921 it had grown to 1,137 volumes. The Camera copy is still larger and occupies most of the central floor space of the Reading Room. The rise in prices and the bulk of the catalog has made the question of printing quite impossible. After consideration of various schemes it was decided to begin a new catalog with books published in 1920, retaining the old catalog for books published before that date.

To prevent a breach of continuity the publications of 1920 and 1921 are entered in both catalogs. The cataloging rules were revised with a view to reducing the number of headings and making the entries as concise as possible. The slips on which 1920-21 publications had been cataloged were then collected and corrected in accordance with the revised rules. These slips were printed in sheets, which were then cut up, and the printed slips are now being pasted into specially designed volumes.

Four exhibitions were organized during the course of the year: for the Dante sixcentenary, the fourth centenary of the appearance of Luther before the Diet of Worms, the tercentenary of the landing of the Pilgrim Fathers from the *Mayflower*, and the centenary of the death of Napoleon.

FRANCE

Paris. At a General Meeting of Members of Paris Post No. 1, American Legion, on March 10th, a resolution was unanimously adopted: That the work of the American Library in Paris be, and the same is hereby endorsed and heartily approved by the Members of this Post, and that the Commander of the Post is hereby requested to bring the attention of the National Commander of the American Legion, thru the commander of the Department of Continental Europe, our hearty appreciation of the splendid work which the Library has done, and is doing, for Americans abroad.

HALF-PRICE SUBSCRIPTIONS TO THE LIBRARY JOURNAL

Half-price subscription rates (\$2.50 instead of \$5.00) apply to:

- (a) Any library having an income of \$3000 or less;
- (b) Any librarian or library assistant having a salary of \$1500 or less; and
- (c) All duplicate copies ordered by any library, whether for the use of trustees or staff members.

WILLIAM F. McCOMBS The President Maker

by

MAURICE F. LYONS

Mr. Lyons, one of the leading members of the Bar of Kentucky, was Secretary to the late Mr. McCombs during the prenomination and Presidential campaigns of 1912 which resulted in the election of Woodrow Wilson to the Presidency, and gives a startling account of how Mr. McCombs paved the way for Governor Wilson's entrance into the White House, later being denied a place in his cabinet. The great Baltimore Convention is vividly portrayed, and the book with its many illustrations is intensely interesting.

COWGILL, Ruth, 1911 P., station librarian in the U. S. Marine Barracks, Quantico, Va., appointed librarian of Roanoke Public Library which has been organized by Emma V. Baldwin.

HUMISTON, Alice M., 1911 S., of the staff of Dartmouth College Library, appointed head cataloger in the library of Montana State University, Missoula, Mont.

ROGERS, Elsie, 1922 L. A., has been appointed librarian of the Sierra Madre, California, public library.

SOLBERG, Thorvald, this year completes his seventieth year and his twenty-fifth as Register of Copyright. He entered the library profession in 1876 and was for thirteen years a member of the Library of Congress staff under Mr. Spofford, being detailed as librarian of the special law library.

SWERIG, Mabel B., 1918 P., formerly first assistant in the Reference Department of Columbia University, appointed librarian of the Insurance Society of New York.

TERRILL, Katharine, first assistant of the Burlington, Iowa, Public Library is now reference librarian of the Wichita City library succeeding Mrs. Eva Lyle Plant who died on January 27.

VAN KIRK, Ruth, 1918 C. P. cert., appointed first assistant in Department of Work with Schools, Carnegie Library of Pittsburgh.

WATSON, Cecile A., reviewer of the Bureau of War Risk Insurance, Washington, appointed librarian of the Silver Bay School, New York.

WEITENKAMPF, Frank, curator of prints New York Public Library, has an article on "An Etching Sculptor, Mahonri Young," in the *American Magazine of Art* for April.

WOOLSEY, E. Fay, 1921 Wash., appointed librarian of the Jackson County Library, Medford, Oregon.

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

It is expected that a new Civil Service register will be established in May for vacancies in the Naval Establishment and Public Health Service. Written examination will probably be waived, applicants being required to write a short thesis and fill out an application blank. Positions to be filled are those of librarians in the Public Health Service, Naval Hospitals and Naval and Marine Stations.

Requirements for both services are practically identical and one list will be established to fill vacancies in either service.

Altho the undersigned cannot speak with any official sanction, yet we personally believe that library service as established in the Public Health Service and the Navy will prove permanent. The positions offer opportunity for administrative work, requiring handling of per-

sonnel, tact and judgment as well as knowledge of library routine.

The undersigned will be glad to answer any questions as to details. Copies of the Civil Service Announcement of examination will be forwarded upon request. Copies may also be obtained when printed from the offices of the Civil Service Commission in the various cities.

CAROLINE WEBSTER, *Library Specialist, Public Health Service, Washington, D. C.*

C. H. BROWN, *Library Specialist, Bureau of Navigation, Sixth Division, Navy Department, Washington, D. C.*

A position is offered to one able to act as librarian of the Kirkland town library and cataloger in the Hamilton College Library, both in Clinton, New York. Time to be divided equally between the two institutions, salary \$1000. Write to Mrs. W. M. Carruth, Clinton, New York.

A Good Turn for
The Library Journal

In the Library Journal year after year appear the announcements of the business friends of the library profession. Most publishers know and appreciate the library as the outpost of the publishing business, and manufacturers of supplies are keen to have the good will of all librarians.

If you feel disposed to do a good turn for the Library Journal, tell the people with whom you deal that you are glad to see their announcements in the magazine. If you know of others whose work would seem to justify some expenditure for advertising, send us their names and we will try to suggest a plan of campaign that might be helpful.

This is the kind of friendly, practical interest that contributes most directly to the continued growth of the Library Journal.

“HOW TO IMPORT”

A Note on Library Economics

A recent article on this subject showed that book importing is easy and very economical if you deal with a firm that knows the export trade. Messrs W. & R. Holmes, Dunlop Street, Glasgow, and of Lancashire, have connexions all over the world. Their Library Department supplies to libraries of every description, and it is highly organised to that end. Place your orders for books published in England with them and secure a prompt and efficient service, post paid. Monthly priced list of books published in England mailed free on application,—send a card for it.

HEAD OFFICE: MESSRS. W. & R. HOLMES,
LIBRARY DEPARTMENT,
3-11, DUNLOP STREET,
GLASGOW, SCOTLAND.

“THE LIBRARY JOURNAL”

Does Your Set Lack Any Volumes?

I have for sale 27 complete volumes (unbound) of the Library Journal running back to 1898. Let me quote price for any year you need to complete your file.

COMPTON'S PICTURED ENCYCLOPEDIA

A New Achievement of Great Educators

Written Especially for Children

THE inspiring character of modern teaching methods sends children more often than ever before to the public library for information on subjects suggested in the classroom.

The librarian knows to how small an extent the encyclopedias of the past have met the needs of children. In most cases the volumes have been so large, so grim and uninviting, and so difficult to understand that their presence rather multiplied than answered the child's questions. And so every librarian realizes how valuable to the Children's Room would be the right kind of encyclopedia that children could really use and would actually want to use.

To build an encyclopedia that children would be glad to come to again and again was the one purpose of the great educators who planned and directed Compton's Pictured Encyclopedia. Unlimited means were placed at their disposal. Three years ago the task was begun; today it is finished—an entirely new kind of encyclopedia, one of the greatest publishing ventures ever launched.

Write for Free Sample Pages of this First Encyclopedia of the New Age

A postcard to the publisher will bring 100 sample pages so that you may judge for yourself the significance of this new work. It is impossible here for us to do more than suggest in the vaguest terms a few of the distinctive features of the books.

THE INDEX is one of the most striking features of the new work. The editors decided to give the Index somewhat the character of a dictionary which should contain pronunciations and brief definitions of unusual words, short biographical, geographical and historical summaries and countless other informative details, all in the interest of saving time and trouble. This treatment makes readily accessible every detail of information in the whole work, whether in the text or pictures. It made it possible for us to eliminate useless repetitions of the same material under different headings and to include all organized knowledge in eight compact volumes.

Up-to-Date —Every word written since the World War. New point of view, new maps, new inventions, etc. Not one page is a "revision" of an older work.

Really Pictured —Thousands of Pictures chosen from over half a million, 99 per cent of which are halftones. It is the only encyclopedia in which half-tone illustrations are inserted directly in the text they illustrate. There is a picture for every idea that needs a picture, and every detail of every picture is clearly explained and emphasized in caption and legend. Many pages in color.

Easy to Read —Every page is printed in large, clean-cut type on specially prepared paper stock, absolutely free from glare. Subject headings stand out prominently; page guides make reference easy. Bound to withstand hardest usage.

Intensely Interesting —The text is composed in clear, vivid style which brings the very heart of each subject into brilliant relief to catch and hold the attention of the reader.

For Sample Pages, Address Dept. 305.

EDITORS

Following is a partial list of editors of *Compton's Pictured Encyclopedia*. Every editor of this great work gave his time as well as his name to it. The list below is a guarantee of the accuracy and the scholarship of this work, the result of three years' continuous effort.

Editor-in-Chief

GUY STANTON FORD, A.M., Ph.D.
Dean of the Graduate School,
University of Minnesota.

Managing Editor

SAMUEL BANNISTER HARDING, A.M., Ph. D.

Former Professor of History,
Indiana University.

NEW "BOOKS WITH PURPOSE"

THE COMING OF COAL

ROBERT W. BRUERE

of the Bureau of Industrial Research

\$1.00

"For the first time in human history coal has brought the possibility of the good life to every man's door, for coal means food, clothing, houses, shops, railroads, newspapers, chemicals, guns."

Has it found us spiritually unprepared? Read this book and know for yourself the essential facts of our "bungling and inadequate use of a gift more magnificent than any allotted to man since grain was first sown to the harvest and ground at a mill.

Prepared for the Educational Committee, Commission on the Church and Social Service of the Federal Council of Churches of Christ in America.

THE FIND YOURSELF IDEA

CLARENCE C. ROBINSON

\$1.40

It is a clear, brief statement of the purposes and practicability of vocational guidance, with many suggestions for making such work effective among older boys. Much of the drifting in business and industry would be averted by the adoption

of a plan like the one discussed in this book.

Two important points are stressed: First, the aim of vocational guidance is self-discovery; second, its method is scientific. Vocational guidance is not yet a science, but it is scientific in that it seeks, through *observation, analysis and testing*, to help one discover the particular form of life work which promises most for that individual.

BUILDING A CAREER

E. W. WEAVER, Pd.M.

\$2.00

Vocational guidance or "human engineering" is, perhaps, the youngest of our modern sciences, but its findings are as reliable as the deductions of any science which must work with variable factors, some of which are too elusive to permit measurement." Young people drift about in various branches of industry, seemingly without definite aims—through no fault

of their own. What is needed is clearly set forth in this book. In addition to assisting young workers to find their own aptitudes, the following points are discussed:

1. The demands for labor and the opportunities for service in an average community.
2. The requirements for success and the prospects in certain professions.
3. The relative advantages and disadvantages of various occupations.

Reg. U. S. Pat. Off.

Latest and Most Popular Books on **RADIO**

THE RADIO EXPERIMENTER'S HAND BOOK By M. B. SLEEPER

A book which answers the practical problems of the beginner and the advanced student of radio experimental work. 133 pages. Illustrated. Price \$1.00

RADIO HOOK-UPS By M. B. SLEEPER

In this book the best circuits for different instruments and various purposes have been carefully selected and grouped together. All the best circuits for damped and undamped wave receiving sets, buzzer, spark coil and transformer sending equipment, as well as vacuum tube telegraph and telephone transmitters, wave meters, vacuum tube measuring instruments, audibility meters, etc., etc., are shown in this book. Price 75 cents

DESIGN DATA FOR RADIO TRANSMITTERS AND RECEIVERS

By M. B. SLEEPER

The only book that gives tables and data for designing, receiving and transmitting apparatus so that you need no knowledge of mathematics. It's the first book a beginner buys after he has learned the use of his phone receiver. Price 75 cents

THE A B C OF VACUUM TUBES USED IN RADIO RECEPTION

By E. H. LEWIS

Written particularly for the person who "knows nothing about radio" but who would like to gain an understanding of the elementary principles of operation of vacuum tubes and various circuits in which they are used for the reception of radio-telegraph signals and radio-telephone music and speech. Specially made illustrations. Price \$1.00

CONSTRUCTION OF NEW TYPE TRANSATLANTIC RECEIVING SETS

By M. B. SLEEPER

There is a peculiar fascination about receiving radio messages from the high-power stations of England, France Germany, Russia and Italy, as well as those located in the Pacific Ocean and the Oriental Countries. Several types of simple receiving sets for this purpose are described, with detectors and amplifiers to accompany them. Suggestions are also given for operating relays and reproducing the signals on a phonograph. Schedules of operating time for high powered stations are given. In addition there is some valuable data on home-made wavemeters for testing and experimenting. Price 75 cents

CONSTRUCTION OF RADIO PHONE AND TELEGRAPHY FOR BEGINNERS By M. B. SLEEPER

The man who wants to feel the real thrill to accomplishment, and who is not satisfied in the merely making use what others have done for him, builds his own radio apparatus. Radio men can follow the data in "Radio Phone and Telegraph Receivers" with full confidence because each piece of apparatus described was first made, tested and found efficient before the final design was accepted. Special receivers, both crystal and audion, are shown in detail. Regenerative circuit as well as audio and radio frequency amplifiers are described with clear photos, diagrams, and working drawings prepared especially for the novice and the man who wants to receive the radio telephone broadcast. A special feature is the phonograph type radio set and the loud speaker. Price 75 cents

HOW TO MAKE COMMERCIAL TYPE RADIO APPARATUS

By M. B. SLEEPER

This book describes in detail many commercial types of spark and vacuum tube telephone transmitting and telegraph and phone receiving equipment of all kinds. The experimenter will be able to get a world of ideas for the design and construction of his next piece of radio equipment from the very clear descriptions and the 98 clearly illustrated figures. Price 75 cents

WIRELESS TELEGRAPHY AND TELEPHONY SIMPLY EXPLAINED

By ALFRED P. MORGAN

This is undoubtedly one of the most complete and comprehensive treatises on the subject ever published, and a close study of its pages will enable one to master all the details of the wireless transmission of messages. The author has filled a long-felt want and has succeeded in furnishing a lucid, comprehensive explanation in simple language of the theory and practice of wireless telegraphy and telephony. 154 pages. 156 engravings. Price \$1.50

EXPERIMENTAL WIRELESS STATIONS By P. E. EDELMAN

The first and only book to give you all the recent important radio improvements, some of which have never before been published. This volume anticipates every need of the reader who wants the gist of the art, its principles, simplified calculations, apparatus dimensions, and understandable directions for efficient operation. Vacuum tube circuits; amplifiers; long-distance sets; loop, coil and underground receivers; tables of wave-lengths, capacity, inductance; such are a few of the subjects presented in detail that satisfies. It is independent and one of the few that describe all modern systems.

Endorsed by foremost instructors for its clear accuracy, preferred by leading amateurs for its dependable designs. The new experimental Wireless Stations is sure to be most satisfactory for your purposes. 27 chapters, 392 pages. 167 illustrations. Price \$3.00

THE NORMAN W. HENLEY PUBLISHING CO.
2 West 45th Street, New York

THE A. L. A. short reading lists have been published not only for use in the library but for distribution *outside* the library. A few of them mailed to persons who do not use the library, or distributed at meetings of various sorts will prove a good investment. Why not give them a chance to make new friends for your library? Libraries which place standing orders for all A. L. A. publications will receive free sample copies of new short reading lists as they appear.

BOYS' BOOKS has been prepared especially for use during Boys' Week (which is being observed in May by many Rotary clubs) but is timely at any time. It is a 4-page leaflet with an illustration that will catch any boy's attention, and is printed on substantial paper to stand wear and tear. Twenty-nine titles are listed, each one briefly annotated. The prices are: 100 copies for \$1.00, 500 for \$3.00, 1,000 for \$5.00, 5,000 for \$23.00. On quantities of 500 or more you may have your own imprint for \$1.00 extra. This list is already our best seller; orders received in advance of publication were greater than the total sales of any other list we have issued.

HOME PLANNING is an 8-page leaflet listing and describing 12 books—books which will be an assistance and a delight to any one who is planning a house either with serious intentions, with far-off hopes or just for fun. The prices are: 30 copies for \$1.00, 100 for \$2.50, 500 for \$10.00, 1,000 for \$18.00. On orders of 500 or more you may have your imprint for \$1.00 extra.

THE FIRST THOROUGH STUDY IN ITS FIELD

CRIMINAL JUSTICE IN CLEVELAND

The report of the Cleveland Foundation's survey of criminal justice, directed by Roscoe Pound and Felix Frankfurter.

Conditions typical of large American cities were found by the directors and a staff of specialists of their study of methods and organization of the police department, criminal courts and correctional institutions. Many of their recommendations are of universal application to American urban life.

Sections of the report are:—

1. **POLICE ADMINISTRATION.** By Raymond B. Fosdick.
2. **THE CRIMINAL COURTS.** By Reginald Heber Smith and Herbert B. Ehrmann, both of the Boston Bar.
3. **PROSECUTION.** By Alfred Bettman, formerly city solicitor of Cincinnati.
4. **CORRECTIONAL AND PENAL TREATMENT.** By Burdette G. Lewis, state commissioner of institutions and agencies in New Jersey.
5. **MEDICAL SCIENCE AND CRIMINAL JUSTICE.** By Dr. Herman M. Adler, state criminologist of Illinois.
6. **NEWSPAPERS AND CRIMINAL JUSTICE.** By M. K. Wisehart, newspaper and magazine writer.
7. **LEGAL EDUCATION IN CLEVELAND.** By Albert M. Kales of the Chicago Bar.
8. **CRIMINAL JUSTICE IN THE AMERICAN CITY.** By Roscoe Pound.

700 pages, 60 tables, 17 diagrams; cloth.....\$3.75

Prices of separate sections, paper bound: 1, 2, 3 & 8, \$1; 4 & 5, 50 cents; 7, 25 cents

UP-TO-THE-MINUTE BOOKS ON RADIO

The attention of librarians is called to the interesting and instructive books by **James R. Cameron**, whose text books are used and indorsed by the U. S. Army, Navy, and Department of Public Instruction.

HOW TO BUILD YOUR OWN RECEIVING SET

A booklet written for those who know little or nothing of the subject of Radio, which gives full instructions with diagrams and drawings to make it easy for the beginner to build his own set. 25 cents

RADIO DICTIONARY

A dictionary of radio, wireless and electrical terms—Contains over 600 terms with explanations and illustrations—Radio laws and regulations—List of broadcasting stations with call letters. A number of useful tables for the radio fan. Directions for building a receiving set, etc. 50 cents

RADIO FOR BEGINNERS

"The best book written on the subject," which covers the subject of radio from beginning to end and written so everybody can understand it. Widely indorsed by the trade press. 160 pp. Illustrated \$1.00

THE STANDARD AUTHORITY ON THE SUBJECT

MOTION PICTURE PROJECTION

By **JAMES R. CAMERON**

No technicalities, yet complete and comprehensive. Over 10,000 copies sold within eight months.

Bureau of Economics, Dept. of Public Instruction, Washington, D. C., say of this book:

"By far the most complete manual we know of. The most complete work of its kind."

560 pp. Over 200 illustrations.

Collateral Reference Guide

Your catalog guide cards— utilize them 100%

Catalog guide cards can be made to serve a thrifty purpose by utilizing the space on them which is usually wasted

With this in mind Library Bureau offers a guide card which is also a collateral reference guide. It points out to the searcher where there is reference material on a subject not necessarily represented by specific cards in the catalog.

These collateral reference

guides greatly speed a search for information. They reduce the labor of librarians by helping the layman to find or ask for specific things.

They are furnished with plain tabs, cut in thirds, assorted positions, unless otherwise ordered. Price \$1.20 per hundred. See page 37 of our Catalog No. 812 "Library Supplies" or better still, write our nearest branch for samples.

University Library Co-operation and Business Engineering*

By ERNEST CUSHING RICHARDSON
Director of Princeton University Library

THIS paper is intended roughly to gather up into a sort of net sum what we have been saying, experimenting and doing in the matter of library co-operation for the last twenty years, as a starting point for further effort. The word university is introduced to suggest a concrete starting point.

The idea of co-operation as a practical working principle is a matter of course to librarians. The idea is latent in all civilized institutions, notably the state, industry and the church. It has now been erected into a world recognized principle under the seal and signature of half a hundred nations in the preamble of the League of Nations. It is in fact the vital principle of civilization, of human personality, and of human progress.

By co-operation we understand the effort of two or more persons to accomplish more by acting together than they could by acting separately. It may be distinguished as physical and organic. Its simplest form is where two or more men do something together which neither could do separately, e. g. lifting a stone too heavy for either singly. This is simple arithmetical co-operation—adding one man power or one horse power or one wolf power to another.

Organic co-operation comes in with specialization. Here each person does something different from the other, but the work of both converges on a common product, e. g. a brick wall where one makes the mortar, the other lays the brick. In this case the result is not a mere addition of man power, but there is a surplus of profit. Two men can lay more bricks in a day than twice one.

This principle of differentiation of function lies at the foundation of living nature. It is in the order of nature that living units each capable of doing a great number of things equally well, should specialize and thru habit

come to do each its specialty better than any other originally like unit. A union of such units is a living being; it is organic and its product is not a total of the work of each but a total plus something. No aggregate of jelly fish could ever produce what a man produces. This surplus or profit is almost unlimited. There is an inexhaustible reward for all who study diligently in the field of co-operative production. It was a great step forward toward human civilization when wolves discovered that they could get practical results from hunting together which were quite impossible when hunting singly and it was a much greater step when someone discovered that it was profitable for man to have a helpmate or co-operator.

This matter of co-operation is going on all the time within the individual library. Its systematic study and application is what is now known as management or management engineering, or in its largest aspects perhaps business engineering. By business engineering we mean simply the habitual application of brains and foresight to the problem of getting more results out of the work of two or more persons, that is, to co-operative production. Study in this field has resulted in the recognition of a good many fundamental principles, rules, and factors; division of labor, specialization, aptitude, skill, standardization, interchangeability; planning, job analysis, time, study and the rest.

The idea of co-operation is obvious in the distribution of library operations into departments; acquisitions, cataloging, circulation, reference, and their subdivisions. Simple arithmetical co-operation is found in libraries where one cataloger performs all cataloging operations and the library simply adds a new cataloger for each additional one thousand normal accessions. Organic co-operation comes in where the same department specializes, either say by having all entry work done by one, classi-

*Paper read at the meeting of the American Library Institute at Atlantic City, April 28, 1922.

fication by another, title and bibliographical work by others or else distributes its staff by subjects or languages. Each of these three methods of specialization has its own advantages and all have possibilities of profit which reward study. The same is true of the detailed operations in all departments and these run into hundreds of organized and budgeted routines. Librarians understand quite well the advantages of planning, analysis and time study on each of these tasks and with reference to applying general and detailed principles of specialization, standardization, quantity work, interchangeability of persons, supplies of operations and all the rest and including above all the study of personal aptitudes and the ability to acquire skill. They understand quite well that two, three and even ten times as much work may be produced by studied management as by either rule of thumb methods on the one hand or ultra conventionalized methods on the other. This is business engineering.

Now what is true of the individual library is obviously truer still of the bigger field of inter-library co-operation. The field for saving and profit does not merely grow arithmetically with the size of the job, but often geometrically. It is one of the axioms of management engineering that increase in the size of the job or "aggregation" tends to increase profit. If all the member libraries of the A. L. A. were really organized for real co-operation the increase of service without increase of cost would be something enormous. Even such comparatively feeble essays as we have already made appear rather tremendous in results, if one e. g. sits down to count up the economies produced by the Poole Index and its efficient successors, or the L. C. cards.

When one notes again the number of fields into which inter-library co-operation has already extended itself: choice, purchase, cataloging, classification, lending, reference, one can only wonder that with so much successful experiment the method has not been applied on a much larger scale.

In looking forward to the extension of co-operative library work, it will be worth while to look over the situation and consider first what we are driving at anyway—the nature of library service, then what we have already done co-operatively, then what the present most felt needs are to which co-operation can be applied, and finally what new enterprises are ripe for profitable undertaking.

THE NATURE OF LIBRARY SERVICE

Library service consists in connecting a reader and book surely and promptly; it has two aspects and two methods. Its primary aspect is connecting a reader surely with a book that

he knows that he wants to use. This is the essential and only strictly library task. Its secondary aspect is connecting a reader with a book that he ought to want to use. This is properly an educational, informational or bibliographical task, not a library task; but it has been thoroughly and happily grafted on and is a most valuable time saver for users. It is important however for practical management to remember that it is in fact secondary.

The first object of library service whether primary or secondary, is to connect a reader with his book surely; the second object is to do it promptly. For the first purpose the essential is simply a definite location and an author index with plenty of editor and analytical cards. For it the old fashioned method of a fixed location for all books, and serving books over the counter, has never been beaten. All our elaborate classifications, our subject catalogs and reference librarians are, on last analysis, secondary service helping to promptness and to finding the books which ought to be used but contributing nothing to the certain finding of a known work. They are none the less worth spending a lot of money on, after the essential has been provided for, and if one has the money; but they are all in fact secondary.

The two methods of library service, that is to say of connecting a reader and a book surely and promptly, are, first taking the books to the reader and second, taking the reader to the book; or, if you like, serving the reader and helping the reader to serve himself. One of the greatest oversights of economical administration in the old days—and today for that matter—is the failure to recognize, as a practical principle, the fact that the best library service is that which helps the reader to help himself and that the greatest economies in library management come from the liberal spending of money, and even some sacrifice of certainty of finding to promote this. It has been estimated that in the Princeton University Library, ten books are used by self-help to one by desk delivery, or say a million uses to a hundred thousand a year. It is obvious that for the same service the users themselves contribute nine-tenths of the page work. The instruments of self help are open shelves, classification and simplified catalogs.

Delivery service is essential, fundamental and in the case of big libraries needs to be carried to a still higher degree of development. In libraries like the British Museum it is necessarily the main service. Moreover it must be confessed that it is often as much more comfortable and agreeable for some kinds of research work to sit at one's desk in an alcove of Duke Humphreys' library and have books brought to him,

as it is to sit at a well served dinner table compared with self service at an automatic lunch. Even the British Museum, however, finds itself constrained in self-protection to larger open access reference collections. In university libraries open access has to be pretty general. It is expensive in page work for keeping books in order, in the fact of an occasional loss from theft, and in a certain loss of certainty of connection thru misplacement, theft, or unauthorized borrowing but it justifies its cost in the great saving of time to users and in that saving of administrative time which is implied in the fact that a man helps himself ten times to once that he asks for fetching service.

The foundation of the management problem is thus the clear distinction between primary and secondary service, the methods of delivery and self-help and the factors of certainty and promptness.

The problem of library service, whether primary or secondary is best visualized by realizing that it is in fact a business or industry. The library is a double something with a business and an educational side. It may be looked on as a public service corporation. Its production may be expressed in terms of units of service, the unit being the connection of a reader and a book. It may be looked on as a transportation service, express and passenger, transporting book to reader or reader to book. As a business it has its purchasing, manufacturing, distributing, and even selling factors—for the display of goods and the tempting to use, which is so big a factor both in public and college library service, is essentially a selling proposition and invites the study of selling methods. Purchasing methods and expert buyers enter with the purchase of books and supplies. The manufacturing element enters with the making of aids and guides, of which the catalog card is a typical unit. The cataloged title is a standardized article of manufacture, altho largely handwork and each card differing from all the rest, except in large libraries where there are duplicate catalogs, and save for the fact that several like cards are manufactured each calling for a minimum of handwork-finishing by the addition of subject headings, etc. This is not a mere analogy or illustration but an industrial fact, as well as a very complex one which rewards almost any amount of planning, analysis, and time study.

The bottom problem of library service is simple; first to provide essential service and second to provide as much secondary service within the budget as will justify itself on the ground of saving more than it costs.

The problem of co-operation between libraries obviously rests upon the same principle; that

any amount of co-operation is justified whose result will increase certainty and promptness of use in such way and to such extent as it will save more than it costs—and if the cost can be provided for. One may add to this the observation that it is negligence somewhere on the part of libraries not to provide the cost somehow where profit is obvious and large.

WHAT WE HAVE ALREADY ACCOMPLISHED

Passing to the matter of what we have already done in the field of co-operation; choice, purchase, cataloging, classification, lending and reference:

Of course practical co-operation in American libraries had its germs far back in the plans of Jewett and his contemporaries, in the development of the use of interchangeable cards by Dr. Ezra Abbott, in the first Poole index, in the pioneer studies of Dewey and Biscoe over the beginnings of the decimal classification.

The real beginning of the modern spirit—the spirit of '76—was the organization of the American Library Association and the founding of the LIBRARY JOURNAL. The Association is essentially one for co-operation and to promote co-operation. Its main objectives have been in the field of popular education and in the development of library management. As an instrument for organized co-operative thinking on the thousand and one details of our technical library tasks, it has been the means of our rapid progress in economic library management and the agent for promoting that further step in library co-operation, the organized undertaking of productive tasks by groups of libraries.

The concrete beginning of this characteristic work of the Association was the Poole index and its highest exemplification is in the printed card of the Library of Congress, both in the field of cataloging.

Co-operation in the choice of books is illustrated in the A. L. A. Catalog and *Booklist*.

In the lending department the inter-library loan is typical taken in its broad sense of lending by transportation and lending to visiting users. The systematic recognition of this as a field for co-operation dates from Mr. Lane's list of special collections. The idea has been developed thru the work of Johnston and Mudge and the joint finding lists of periodicals, history collections, incunabula, etc.

In classification the Decimal system is the familiar type. Its use by a large group of libraries offers the best illustrations both of the advantages and the disadvantages of standardizing. Its gains and savings are great both to staff and users but the wider its use, the greater the number of users who are disadvantaged by obsolete categories.

Co-operation in reference work has its typical illustration in the plan for literary sponsorship for which Mr. Lee is sponsor.

Co-operation in purchase is perhaps the least developed of all aspects altho by its nature it is the most promising of all fields for the practical application of business principles of co-operation. It has so far been limited in practice chiefly to casual groups of libraries joining with purchase lists when some librarian happens to be making a purchase trip. Recently, however, a good deal of attention has been given to the analysis of the problem and experimenting with the methods: expert training, absorption of duplicates, purchase lists, specialization, etc. Last winter experiments took on a shadow of a co-operation thru the formal agreement of Harvard, Yale and Chicago to support systematic experimentation by Princeton in the matter of purchase with direct reference to its bearing on the problem of curing our national poverty in research books.

Looking over this list of co-operative efforts one is impressed again with the incredible saving produced by the Library of Congress cards. On account of its large scale use by many libraries and in much used libraries the savings, administrative on the one hand in cataloging and a dozen minor matters of purchasing, etc., with the saving of user's time on the other, must be reckoned in millions of dollars and hundreds of thousands of years of users' time. One must also be impressed with the equally great potential saving in the field of co-operative choice, purchase, location and analytical indexing, if these could be undertaken on a corresponding scale.

OUR PRESENT MOST FELT NEEDS

Passing now to the matter of needs, two things stand out as most called for and ripest; one, the location or purchase of infrequent books, the other the analytical indexing and abstracting, especially of scientific literature.

Analytical indexing falls in the category of secondary service but stands at the very front of this service. The problem of the multiplication of literature, in these days, is serious enough as a matter of administration but it has become a vastly more serious matter for research workers and especially now for the workers in the natural sciences. The breakdown of the International Catalog of Scientific Literature has made the need acute. The trouble lies in the fact that the literature even of very specialized subjects, has become so huge that even the best bibliographies do not fill the bill. It is impossible for a biologist, say, starting a routine of research, to gather and go over all the literature which might conceal a record of this very work already done

by someone else, or contain a record of experiment which would save labor in working out the problem. He therefore demands abstracting on a large scale. He wants something more than bibliographical annotation and evaluation—something like the calendaring of written documents. This would give him his orientation. This demand is so real that the chemists and biologists are practising it on a large scale in their journals and many (among others Professor Howell of Princeton) are now urging the printing of these abstracts on standard cards and including them in our library catalogs.

This is certainly a field for standardization and co-operation with unlimited possibilities and when one considers the number of titles involved and the direct saving of vast quantities of research time it looks like a field so fertile that it could not fail to be a money saver, even under the crudest and most expensive methods.

The very great need of many useful but unusual books in scientific, historical and linguistic research has often been discussed in the last seventeen years and especially since the ending of the war left us with a greatly increased responsibility for research work. The actual lack of research books, except in the commonplace lines, is a severe handicap to students. It has been noted that there may be perhaps a couple of millions of such books of which copies may exist in this country but in unknown locations. Co-operative cataloging is the remedy for this and especially the joint finding list. Another couple of millions are not in this country at all and the remedy for this is co-operative purchasing and copying.

The normal need at this point has been diagnosed as two copies each of all moderately priced useful books, in each of half a dozen geographical localities, one a reference copy which the user will be sure to find when he visits the library, another a lending copy to be freely borrowed by any other library. In fifty per cent of cases we might get along pretty well with only two copies in the country for a time at least and the two copy method could be applied in the case of unique, very expensive printed books and to codices thru photostat copy. This too is obviously a field for co-operation on a very big scale of economies and profits.

All in all it would seem that the preparations are ripe enough for some pretty long and radical steps in big scale co-operation as follows:

1. The co-ordination of the card printing work of the four printing libraries and its systematic extension.

2. Extensive joint lists, prepared so as to locate infrequent books and to serve as basis for the co-operative purchase and location of these.

3. Still more extensive co-operative indexes to analytical material, on reasonable principles of cumulation.

4. Abstracting scientific articles.

5. Organized choice of the first ten, twenty or fifty thousand books in various types of libraries.

6. Organization for co-operative purchase; first, of infrequent books, second, of best books. To this may also be added the possibility of organizing a new recommended classification based chiefly on the Library of Congress outline but with a decimal notation.

Think of the saving of time that a joint catalog of infrequent books would be to thousands of research students who sometimes waste weeks or even months of time hunting for the books which may lie close at their hand. Think of the hotel bills and travelling expenses of ambitious and underpaid professors in small colleges, and of a catalog which would obviate the need of many an expensive and futile journey. Take this in its most concrete and expensive form and think of the multitude of students who grope their way, thru inadequate catalogs and visits to European libraries, to their codices. It costs many of these men months of time and thousands of dollars merely to get the orientation which a joint list of codices would give at a glance. It costs them still more to work over this material on the spot instead of at home as they might do if there were lending copies of these codices in American libraries. Consider the saving therefore of a joint index to codices and a co-operative supply of photostat copies of the more useful codices.

WHAT SHOULD BE DONE FIRST

As to what should be done first, the problem of book poverty seems ripest, simplest and most obvious for solution.

The problem of co-operation in analytical work and abstracting is now very closely bound up with the question of the revival of the International Catalog of Scientific Literature and with the abstracting efforts of the chemical and biological associations. It is bound to have early attention and should have it at once but it does not seem to be ripe for initiative action on the part of the library associations beyond a watchfulness to induce the new enterprises to conform so far as possible to actually standardized methods.

The remedy for book poverty on the other hand has been so fully discussed and experimented and is at bottom so simple of solution by co-operation methods at a profit that it might be done at once without further ado.

Owing to hindering circumstances, the report on the purchasing experiment in general is not

yet fully worked out. About a thousand items in two thousand volumes were purchased. Nine hundred and seventeen of these titles have been analyzed to the point of comparing with the joint catalog of the Library of Congress and other printed cards, the Princeton University library catalog, the British Museum catalog and the Paris catalog. The printed cards do not of course show in any sense the resources of Harvard, Chicago, the John Crerar and the rest; but they include the printed cards of these libraries and afford an extremely useful contribution to the problem of the research student, so that the study of these illustrates admirably just how far our finding machinery now goes. A Princeton research student, it appears, would have found in his own library, eighty out of these nine hundred and seventeen titles. By turning to the joint catalog of printed cards he could have located one hundred and sixty-three more titles in the Library of Congress and fifty-one others in other American libraries. These would be more or less duplicatory of one another but he could have found in this way one hundred forty-five items not in the Princeton University Library or a total of two hundred and twenty-five titles for his use. Making allowance for oversights in searching and we have perhaps two hundred and fifty titles out of 917 in known locations. The remaining six hundred and sixty-seven titles not located in these sources no doubt exist in part but the analysis seems to show that two-thirds of these books can not be readily found. Even if a man happened to be going abroad he could only locate in the British Museum three hundred and twenty titles and at Paris about the same number.

Heretofore we have been met, when attention has been called to the situation, with the idea that the missing books are not of much importance, that those which we have are the best books, the high peaks and it doesn't much matter about the rest. I want to say clearly, therefore, that no books were purchased without a reason and none of these nine hundred and seventeen titles were purchased in bulk, although occasionally a bunch was bulked after selection. They all have a reason and they are hand picked from stocks of perhaps a million volumes. The books in this lot include a hundred or more volumes of sound Americana, many good books on art, a lot of usable history, a couple of hundred volumes of first rate periodical literature. They do not as a rule come in the class of most used books but many are much used books and they will all stand pretty high in the class of desired books and books much needed when needed.

So much for the need, now as to the remedy. This is simple. Get the books—by co-operation.

This matter has been discussed so often and all its aspects experimented over so much that the methods of procedure are in a general way as well understood as the need and the remedy. The matter seems to be as ripe as the printed cards were in 1900. It is a question of who and when. The first question is: why not now? The answer to this is, I believe, that we make too much bones of the magnitude of the matter. It is big but simple and if simple, the bigger it is the better—the profit is correspondingly big. The main question is who will attempt it?

It has long been obvious that the twenty-nine university libraries which contain twelve million volumes, spend a million dollars a year for books and as much more for administration and add half a million volumes a year could do it if they would. They form an ideal field for the application of co-operative methods on a large scale because their type is so similar at all points and their budgets considerable. It is equally obvious that for real success on a large scale and at once they need the more powerful aid of the great research libraries of Washington, New York, Chicago and the rest, but it is the University libraries which thru their research students, research professors and research teaching, know at first hand the problem in all its aspects and are perhaps most by way of roughing out the elements of the problem as a starter.

Since geographical circumstances, the mid-winter meetings at Chicago and the Atlantic City meetings, with other circumstances, have tended in later years to bring the librarians of Harvard, Yale, Princeton and the University of Chicago a good deal together into frequent discussion of various aspects of this matter, it did not seem that it would be presumption for these libraries to get together on the rough details as agreed and experimented out, and invite the co-operation of other University libraries to help in maturing plans, with the frank purpose, as in the case of the printed cards, of enlisting the leadership of the Library of Congress and the definitely organized support of the great reference libraries—and doing the job.

No meeting of these university libraries has been invited, altho it had been the intention to call one at this time. If it had been called the plan docketed for discussion would have run something like this.

1. Ask the Library of Congress to print a short title list of its cards with its card order number attached to kill two birds with one stone and serve as a purchase method for libraries which do not have the depository cards. Ask it also to insert, if possible, the titles of other purchaseable cards and all titles included in its joint catalog.

2. Harvard, Yale, Chicago and Princeton will check this list with their own catalog and provide short title bar of all their books not included in the Library of Congress joint list, hoping that about a dozen other large libraries will do the same.

3. Make a cumulative joint list of these and ask all libraries to contribute such titles as they have that are not in this preliminary joint list.

4. Engage the interest of the Institute and of the American Library Association and the help of a committee.

5. Approach the great research institutions with (1) this plan for locating copies of books in this country not included in the joint list; (2) plan of purchasing from two to ten copies each of all useful books not included in the list and arranging for proper geographical distribution of these, (3) a plan for securing photostat copies of unique books and codices for lending to American students. The idea would be, not that the institutions should buy the books or stand the expense of checking joint list or even of securing copies of codices, but simply provide for central organization—unless it should seem wise to them to quicken the pace by helping with initial capital.

6. The four libraries set apart a fraction of their annual purchasing fund in pool for joint purchase and hope for the co-operation of many others in this.

7. Prepare extended lists for purchase, printed with bars suited to put into cumulative catalog when books are received.

8. Prepare lists of best books, i. e. the first ten, twenty or fifty thousand books for typical libraries, first in order to secure the card cataloging of these and second to purchase them co-operatively for co-operating libraries.

9. The four co-operating libraries each to train some competent member of its purchasing department to send abroad at least once in two or three years for a three months trip to purchase co-operatively and more especially to keep in touch with the sources and dealers.

There are of course endless alternatives and details as to methods of selection, cataloging, purchase and location, most of them already well discussed. But this is enough to suggest what must be considered. They seem to call for two committees of co-operators, one like the International Cataloging Rules Committee for working out the standardizing rules and one a promotion committee to secure the co-operation of other libraries and form an organization for doing the work or getting the Library of Congress to do it. I had planned to suggest a concrete proposition with statement of what four libraries might be ready to do and based on a

Princeton offer. But as this is not now in shape I confine myself to offering the following resolution, looking to co-operation and perhaps initiation by the Institute and the American Library Association:

Resolved that the Institute Board be requested to appoint a committee out of A. L. A. members of the Institute and ask the American Library Association to appoint a larger committee including these members, to consider inaugurating at once co-operation in the getting of research books and the possibilities of the early development and application of other co-operation plans.

THIS IS A BUSINESS PROBLEM.

In conclusion let me return to the fact that, whatever the general motive and nature of library work, we are here dealing with a business problem, not a sentimental nor directly an educational one. It has to do with making dollars produce results. It involves purchase, manufacturing and transportation problems, and all the involved rules, principles and methods.

It is the business of a library to connect the reader with the book that he knows that he wants to use—and with reasonable economy of the user's time. We now wholly fail of this as to half of the world's books. This is quite unnecessary. We can easily and simply do the whole thing not only without special expense but at a large financial profit. It isn't like a spending enterprise, Red Cross, missions, where money used has its justification in humanitarian or educational results. We are dealing with the problem of putting at least one copy of each of half of the world's books where any librarian can connect his reader with it. It is the problem of libraries which spend a million dollars a year on book purchases. They are trying to solve it in a desultory way and spending huge sums in unnecessary duplication, housing and cataloging. A definite and strong-handed co-operation could easily produce out of the wasted funds practically complete connection with every useful book in the world, with shortest haul for use and thereby release thereafter in perpetuity for other service large sums now wasted in the inefficient and desultory attempts to produce the recognized service.

The problem is well defined and preliminary surveys have been made. There were Culebra cuts and Gatun dam problems to be figured out in the matter of the cumulative catalog and the absorption of duplicates; but, thanks to the experiments by the Wilson Company and others, these have been reduced to a simple matter. The work is ready to be done. Why not treat it as a business matter—and do it.

Even the financial problem is solved; it can

be done out of income. It would be better solved, and much more quickly, with capital enough to make a working catalog of a million titles in the next twelve months. Some capital for books, too, would be quite worth while and hasten the solution but it can be done within income and at a profit simply by setting off a part of the money now spent for new books into a pool. This money can purchase as much direct book service for each co-operating library and at the same time solve the general problem as a by-product. The by-product to each library would be a potential service of five or ten books to each reader where it now serves one.

This is speaking only from the standpoint of administrative profit but in a University library direct profit includes all saving of paid time of professors and in a public library the time saved research workers is not benevolence but business. It is a profit to which the workers, as a part of the public which has established this service, are entitled by right and to which the public which has established the service for these workers on the grounds of public benefit from their work are entitled. The community benefits by each hour of worker's time saved. They are entitled to as much saving as possible. A biological or chemical research might often benefit ten times as much in practical saving of research time. Research workers now have to go around Cape Horn to get their books for lack of a Panama Canal. Their crops are relatively scanty and poor for lack of a Roosevelt Dam. The work has been surveyed and can be done. It is our business to do it. It can be done with financial profit. Why not do it?

A Talk on Art for Children

GIOTTO and the modern painters seem to be far removed. Mrs. Walter Scott Perry thrilled about forty children from twelve to fourteen years of age in a talk on art at the Pacific Branch of the Brooklyn Public Library recently. Mrs. Perry explained the growth and changes in art from the time of Giotto to the present day and illustrated her talk with beautiful photographs of famous paintings. The interest manifested by the children and their enthusiasm for the speaker and the intelligent questions which they asked in the discussion following the talk showed that the talk was well worth while.

The occasion of Mrs. Perry's talk was an exhibit of a collection of paintings by contemporary artists arranged at the Pacific Branch thru the co-operation of the People's Institute. Altho the exhibit was intended for adults, so many children took an interest in it that it seemed worth while to explain it to them.

THE READING ROOM—FORMERLY THE DINING ROOM

An Adventure in Community Service

By CHARLES R. GREEN, Librarian, Jones Library, Amherst.

SAMUEL MINOT JONES, to whose generosity Amherst owes its new library, was born in Enfield, Mass., in 1836, of lineage tracing back to the earliest families settling in this country. His mother, Mary Hubbard Field Jones, an early graduate of Emma Willard's famous School for Girls, was a sister of Roswell Martin Field, father of Eugene and Roswell Field. Thomas Jones, his father, was descended from the Minots of Concord and Minot's lighthouse fame.

In 1898 Mr. Jones married Miss Harriet Watson Stenger, an attractive and accomplished woman, the daughter of Mr. and Mrs. William S. Stenger of Philadelphia. Mrs. Jones died when their only son, Minot, was about eight years old. Mr. Jones died in 1912, after a long and successful business career, honored by business associates and esteemed by hosts of personal friends. In his will he left the residue of his estate (after remembering relatives and friends) to his son, with the provision that if he died before he reached his majority, the entire amount was to be used for a free public library in the town of Amherst, Mass.—Mr. Jones' boyhood home, and the place where he made the lasting friendships of his long life.

The unusual and not to be expected thing happened. Young Minot Jones enlisted in the service of his country, becoming attached to Company C, 305th Battalion, United States

Tank Corps. While in training in Camp Polk, Raleigh, North Carolina, he was stricken with influenza, raging thruout the country at that time, and died on September 16, 1918, while in Base Hospital Number 12, at Biltmore, North Carolina, at the age of nineteen.

Dr. George Harris, president of Amherst College from 1899 to 1912, Dr. John M. Tyler, professor of biology at Amherst College, 1879-1919, and Mr. George Cutler, a merchant of Amherst and personal friend of Mr. Jones, became incorporated by act of the Massachusetts legislature on April 19, 1919, as the Trustees of The Jones Library Incorporated. The only specifications made by Mr. Jones in his will concerning the use of the fortune which he left were that the Library was to be known as The Jones Library, that the trustees, succeeding those mentioned in his will are to be elected in annual town meeting, that land be purchased and a fire-proof building be erected thereon, and that at least one hundred thousand dollars be saved as an endowment fund. The trustees received about \$650,000 from the S. Minot Jones Estate.

Pending the purchase of land and erection of the building, the trustees early in 1921 rented temporary quarters, engaged a librarian and staff, and decided to put to immediate use some of the money left by Mr. Jones.

Tuesday, September 7, 1921, will always be an important date in the history of the work of The Jones Library. We opened our doors to

THE CHILDREN'S ROOM

the public just as the public schools were opening their doors to the children of the town. We planned this simultaneous, tho independent, action because we wanted the Library to function as part of the educational machinery of the community, with and for the school children as the nucleus of our new clientèle. Six rooms in the old Amherst House, formerly the leading hotel of Amherst, now a four story brick apartment house, at the very center of the town, were fitted up as temporary library quarters.

The children's room (formerly a private dining room for college trustees and special student functions), under the direction of Jennie M. Read of Springfield, Mass., and Manchester, N. H., was popular and populous from the very first. The reading room (the large dining room of pleasant memories), containing newspapers, magazines, reference books and circulation department, with Miss Annise B. Kane of Simmons, Radcliffe, and the Engineering Societies of New York City, in charge, received the commendations of the older public. The stack room (once the serving room) separated the reading room from the study—the old hotel kitchen. The change from kitchen to study is radical and complete and very much worth while. Rugs, large comfortable chairs, book shelves and tables and pictures, combine to make this an ideal room for quiet conferences or uninterrupted study.

The first public gathering was held in the Assembly room, nee parlor, on Tuesday, September 14, one week after opening day. The occasion was prompted by the fact that about

fifty boys and girls go out from Amherst homes every fall to continue their studies in other colleges or preparatory school towns. It seemed proper that they should know their new library and feel some interest in the organization which came just too late to help them in their school work. So we invited them to come in at about five in the afternoon. After being taken thru the various rooms and shown the new equipment, they assembled for a few minutes in what we hoped will be an annual affair—our opportunity to say Good-by and God-speed to these representative young people. The librarian urged them to make use of the college libraries to which they would go within the next few days, to make friends with the college library people and so become better able to use the vast resources provided for them. An enthusiastic college teacher spoke a few words about the centuries old search for knowledge and the great storehouses of information available at the present time, and the pastor of a majority of the young people closed the program with a brief talk on the opportunities and obligations which were theirs as they went from parents and homes to the larger schooling of college and life beyond.

Our little stage was set for business, we had said good-by to those who couldn't stay with us, and the next thing was to tell our own people the when, the where and the why of our library work. The eight page local weekly and the octavo semi-monthly issued by the Amherst Business Men's Association accepted our paid and free contributions from the start. A glass

covered bulletin board between the windows of two stores on the main street has helped out wonderfully. The moving picture man and the trolley car people have given us valuable space—on the screen in the movie theatre (Town Hall) and on the inside glass doors of the cars on the local lines. Last but not least of the various factors in our advertising campaign should be mentioned the barber shops, manufacturing establishments, and business places generally, willing to hang signs or pass notices among employees, telling about hours, new features or coming events at the Library.

Our doors had been opened, our machinery had been started full speed ahead, but we had not had the proverbial opening reception. We had been waiting for carpenters and plumbers and electricians to finish up—and it took several weeks after opening day. Finally, however, we plucked up courage, sent out invitations, had our pictures taken for the local papers, and bargained with the caterers. Friday, November 18th, was the date set, everything and everybody turning out splendidly. The little hand counters registered four hundred and fifty who responded to our invitation to the informal reception and inspection of quarters. It was good to give the townspeople this chance to see their own new free public library, and good to see their response and reaction. Something of this sort, we feel, ought to be on every librarian's calendar. We plan to do it again next year, calling it Founder's Night or our anniversary party.

Another scheme which has served to bring into the Library a large number of people who might otherwise stay away, is our series of Sunday afternoon gatherings. The Library is open from three to six on Sunday afternoons from Thanksgiving to Easter, with some kind of a formal program in the Assembly room from five to six o'clock. We started our series with an informal talk about Mr. Jones, our benefactor, by the man in town best qualified to talk on this subject. This has been followed on every succeeding Sunday with lectures on Germany, China, folk music illustrated by victrola, our schools, town meeting opportunities, our own local history, and, most successful of all, a musical program supplied by the Music Section of the Amherst Woman's Club. This last affair drew such a crowd that the landlord began to worry about the safety of his property. It demonstrated, however, the real desire people have for good music. In all of this Sunday afternoon work we have sought to attract and provide something for those too busy or too tired to respond during the week-day hours, and the result thruout has been most gratifying.

Mention should also be made of the various gatherings held at the library during the week. Story telling hours on Saturday mornings and afternoons have been a real boon to the school children. Business and social organizations, and more especially committees of these organizations, have held numerous meetings either in the Assembly room or the Study. Since the beginning of the year twenty-two different associations or boards or committees have held forty-eight meetings here.

As far as the circulation of books is concerned (the yardstick generally used to measure library work) our records for the first seven months of our work show a very fair measure of business. The last census population is 5530, but we consider the 1250 students brought to town by the two colleges as belonging to our clientele, and its is no discredit to either college library to say that a good many students find attractive books, home newspapers or something else in the comfortable, centrally located village library. Including the children's department, we have a total registration of 1691, an attendance of 24,395 and a circulation of 25,048 volumes since we started last September. This, with all the other activities, seems to indicate a fairly good response on the part of our people.

A map of the United States marked to show the density of books would be an interesting thing. Perhaps the American Library Association headquarters could put some of their wonderful statistics into graphic form. This section of the Connecticut Valley just north of Springfield would be of interest. Within a radius of about eight miles of wonderfully beautiful country we have four colleges: Mount Holyoke, pioneer in the education of women; Smith, the largest woman's college in the world, Amherst, and the Massachusetts Agricultural, also the Forbes Library in Northampton and now The Jones Library. Approximately 500,000 volumes are thus available. Within the libraries of this single town, however, we have more than 200,000 volumes—more books than in all the libraries of Florida, or in Delaware, or Idaho or Wyoming. We see both the obligation and the opportunity—the obligation to prove the real value of books in the great work of the world and also the great opportunity to cultivate the wider use of good books, to direct and stimulate the reading of the best in literature in every home in the village as well as in every house in the remote parts of our countryside. We hope and trust that The Jones Library—this newest recruit in the field of library endeavor in this region—will meet its opportunity and measure up to the full significance of its work.

Functions of American Library Institute*

By CLEMENT WALKER ANDREWS

THE annual meeting of the American Library Institute is a much younger institution than those of the Pennsylvania Library Club and of the New Jersey Library Association. It is, therefore, showing only proper gratitude for the President of the Institute to thank the other Associations for the hospitality they have shown in welcoming the Institute to these joint meetings and for the compliment implied in their courtesy in assigning to our sessions the opening place on the program. We hope that this companionship may be found as mutually profitable as it is pleasant.

On me personally falls this year another pleasant duty, to express my thanks for the honor conferred in my selection as President of the Institute. This, it seems to me, entails the obligation to state briefly the ideals and hopes with which the office has been accepted. I feel, therefore, that no apologies are needed for the presentation of such a statement at the present time.

The members of the Institute are, of course, familiar with its character as a comparatively small body of persons of more than average age and experience in library work. As nearly all its members occupy executive positions and as it has only an income sufficient for its moderate administrative expenses, it is evidently not a body capable of executing plans for library work and it is probably not especially well fitted to devise them. On the other hand, in the opinion of its founders, it should be admirably adapted to discuss plans and it is in the hope that this opinion may be justified that the program for the present meeting has been arranged.

It has been held by not a few that the Council of the American Library Association offers sufficient opportunity for such discussion. It is true that the membership of the two bodies is so nearly the same that the meeting of the Institute might almost be a third meeting of the Council were it not for two considerations which seem to me important. Apart from these, however, it might be argued with some reason that a third session of the Council would only be a second meeting; for the one held in connection with the annual meeting of the Association is of necessity very brief and is confined to executive matters.

The first consideration which leads to a differentiation of the meetings of the Institute and the Council is that the latter is charged most emphatically by the new constitution with the duty of determining the policy of the Association. Its time, in the future, even more than in

the past, will be given to consideration of plans proposed by the Executive Board, or brought before it by the affiliated organizations. It is evident that there will be little opportunity for the discussion of plans in their earlier stages when the consideration of principles and broad outlines are most needed. Such consideration might well be given by the Institute.

The second factor in differentiation between the two bodies is the difference in point of view. The members of the Council have always to consider first the interests of the Association as a whole and secondly, those of the institutions or groups of institutions which they represent. On the other hand, the members of the Institute are elected as individuals and as such are free to regard any subject without special reference to the particular interests of the institution with which they may be connected.

A few illustrations will make my meaning clear, and for these, it is not necessary to look further than the program of this meeting. Thus the question of the tariff which Dr. Raney is to present, must be considered chiefly, if not wholly, by the Council with regard to the effect it will have on libraries, while the Institute may well consider its effect on the individual scholar and writer. So also the council in considering the burning (or is it just kindling?) subject of certification must place its effects on library administration and library staff first, and after so doing, may find it difficult to change its point of view to take in the effects on the individual in the library staff and still more to include those who may or might become members.

Again, the proposed check list of periodicals to be discussed later, can receive only formal indorsement from the Council—first because it is not proposed to make it an Association matter, and second, because the principles involved will have to be determined by the needs of individual workers rather than by those of libraries or even of library readers.

If then, the Institute finds it possible to consider a wider range of subjects than the council and from a somewhat different point of view, there still remains the question of making the best use of its deliberations. Evidently, this will not be by votes or direct advice on matters which are or may be brought before the Council, but perhaps, and I offer the suggestion very seriously, by preparing briefs which shall give succinctly the arguments pro and con *and* across. Such a presentation might well shorten and clarify the discussions of the Council, and if this should prove to be the case, the latter might in time come to ask the Institute to discuss a question which has been, or is likely to be

*President's address given at the meeting of the Institute at Atlantic City, April 28, 1922.

brought up. Then there would arise a connection between the two bodies, not unlike that between the general government and the national academy of sciences, which would be beneficial to both and to the library world in general, without affecting in the least degree the independence or prerogatives of either.

Even if this broader result were not obtained, such discussions would at least enable the members of the Institute to decide the questions arising more surely and more satisfactorily.

It is with the hope that some of these advantages may be secured that the program for this meeting has been arranged, but the Executive Committee realizes that a mixed diet is essential for omnivorous animals, such as librarians are, and have not limited its scope to debatable matters, but have included papers which will furnish instruction and inspiration.

The Best List of Books for a Home Library

IN connection with Missouri Book Week the Doubleday Page Bookshop of St. Louis offered a prize for the best list of books for a home library. So many and so excellent lists were submitted that it was difficult to arrive at a prompt decision as to the winning list. The winner is now announced as Miss Frances C. Sawyer, librarian of the U. S. Public Health Hospital No. 35. Miss Sawyer graduated from the University of Wisconsin Library School in 1913 and was in charge of the high school branches at the Omaha Public Library until February 1918, after which she held the hospital librarianships at Fort Sheridan, Fort McPherson and Fort Bliss before her appointment to the Public Health Hospital No. 35 last October.

The winning list follows:

REFERENCE BOOKS AND GENERAL LITERATURE

1. Bible. American standard version.
2. Century cyclopedia of names.
3. Webster's new international dictionary of the English language.
4. Bartlett, John. Familiar quotations. 9th ed.
5. Stedman, E. C. ed. American anthology.
6. New International encyclopaedia.
7. World Almanac. 1922.
8. Autobiography of Benjamin Franklin. Illus. by E. Boyd Smith.
9. Bunyan, John. Pilgrim's progress. Illus. by Louis Rhead.
10. Scott, Sir Walter. Ivanhoe.
11. Dumas, Alexandre. Count of Monte Cristo.
12. Twain, Mark. Adventures of Tom Sawyer.
13. Dana, R. H. Two years before the mast.
14. Hugo, Victor. Les misérables.
15. Ordway, E. B. Opera book.
16. Hughes, R. ed. Music lovers' cyclopedia.
17. Cervantes. Don Quixote; retold by Parry. Illus. by Crane.

Wanted

PROFESSOR J. N. MANLY of the University of Chicago is engaged in a study of Poe's work in Alexander's Weekly Messenger for the period 1839-40. He has located a file of the periodical for 1839 but has so far failed to find even a single number for 1840. Anyone who happens to know of a file or single issue for the year 1840 will confer a great favor on Professor Manly by notifying the undersigned of this fact.

J. C. M. HANSON,
University of Chicago Library.

Boston's Record Circulation!

"The library is a magnificent building, founded in 1852, containing over 2,000,000 volumes, half of which are lent out daily for use at home. As my time was limited I concentrated on the works of my friend the artist, John Sargent."

MARCOT ASQUITH.

The Chautauqua School for Librarians

By MARY ELIZABETH DOWNEY, Director

IN the twenty-one sessions already held, librarians from every state in the Union except Nevada, have had training in the Chautauqua School of Librarians, and thru appointment or promotion have rendered effective service in more than twelve hundred library positions. Established as a short course summer school in 1901, it so continued until 1918 when advanced work was added with the object of extending the work to a year's course. The first to develop this plan, the Chautauqua School is still unique among existing library schools.

Soon after taking charge in 1906 I saw that the school could be expanded into a year's course under the installment plan of four summers, thus giving the same opportunity to librarians to obtain a diploma, as teachers have had in our great universities. The idea appealed, not only to those in need of such a school, but also to the instructors and broad minded librarians with whom it was discussed. Pressure for advanced work came not only from the students of this school but there was every evidence that the need for such a school for librarians was universal. Librarians were going from one short course summer school to another practically repeating what they already had done with no opportunity for advancement for which all were eager. Many librarians, who like teachers, cannot afford to give up their work for a continuous year, can devote a summer to study. The plan also affords opportunity for those unable to come consecutive summers, to receive credit, continue the work and finally complete the course.

So, in 1918 the Sophomore Class, doing advanced work, was organized, continuing as Juniors in 1919 and Seniors in 1920, when the year's course was fully organized on the college or university plan. The first class of four students completing the year's work was graduated in 1920. The class of 1921 contained eleven members. It is interesting to note that in the first year with the four classes, under the new plan, the school doubled its average number of students for the years in which it operated as a short course summer school. The total number of students in the four classes in 1920 was sixty-two and in 1921 fifty-nine.

The Freshman or first summer's work was so well organized under the short course, or summer school plan, and so satisfactory both to faculty and students that it seemed best to change it only in so far as was needed to adapt it to the three years following which are built upon it. This gives several advantages: those

who come for only one summer follow a general, comprehensive short course, while those having formerly completed this course in our own or another standard short course school, under instructors of recognized ability, are given credit and accepted for advanced work.

Standards are high. Faithful, accurate work under careful supervision, is required, and examinations are given at the end of each course and session. This method automatically eliminates any persons unable to pass from class to class, so that only those wholly capable are finally graduated from the school. Certificates, passing the students from class to class, are given at the end of each summer, with the official diploma at the end of the course.

Last summer an Alumni Association was organized which plans to have a reunion for former students each summer. A week's program will be given under the auspices of the alumni and faculty of the School in co-operation with the general Chautauqua program. Visiting librarians and trustees will be invited to attend and take part in the program and discussions.

Only those are accepted who are already in library service or under definite appointment to positions, hence the name "Chautauqua School for Librarians." The school is thus composed of librarians from all parts of the country representing the different kinds of library work and becomes a clearing house for their various experiences and ideas which are regularly discussed. In this way every student who finishes the course has at least three full years of actual paid experience, while most of them have more. The plan not only gives students opportunity to put into practice what they learned the preceding summer, but also to test how much and how well they learned it. In addition to these advantages the opportunity for association with library workers from all over the country is most stimulating.

The required visiting of libraries and places of book interest, attending of library association meetings, reading and writing assigned to be done in the time intervening, all done under direction, forms a connecting link between the sessions, and fosters the habit of continuous study and systematic reading. Reports and discussions of these items are given in the school and students' records cumulated and filed from year to year. All perplexing problems met between sessions also are noted by the students and brought to the school for class discussion

or solution with teachers of the various subjects concerned.

Salaries of the students are recorded from year to year and it is interesting to note the marked increase either by promotion or change of position which invariably follows the student thru her four years of study with the school. Library trustees and heads of schools visit the school seeking librarians and assistants. The mail, too, brings constant requests for students to fill positions, the demand being always greater than the supply. The school thus serves as an employment bureau which functions thruout the year.

Development in students from class to class, with the intervening year of experience between each summer, is as marked as teachers would observe between the grades and classes of any school or college. The class work is far more intensively done under the four summers' plan with time intervening, than possibly could be accomplished thru a continuous school year. The opportunity for comparative study between the various phases of this new plan and that of the continuous year schools, offers keen interest to the instructors of wide experience. All agree enthusiastically that results are even better than the most optimistic could have thought.

The standing of any school must be judged by its instructors. The faculty of the school is carefully selected from the best available sources. The present instructors have college degrees, followed by library school education, are actively engaged in important positions when not with the school, and each is a specialist in her chosen field of library work: all have unbounded enthusiasm for their work with the school, are sympathetic with the students and seek to understand them individually. Since the students also are librarians there is the double relation of instructor and student and of one librarian meeting another. Members of the regular faculty since the year's course was established have included Anna R. Phelps, Mary L. Sutliff, Mary M. Shaver, Jennie D. Fellows, Edna M. Hull, Polly Fenton, Ellen A. Hedrick, Mary B. Nethercutt, Mae Byerley, and the Director.

The course of study is planned to accomplish the most possible in each summer's work. Class work is given also on Saturday, thus giving the equivalent of an additional school week. Lectures continue from eight o'clock thru the morning and laboratory work thru the afternoon. Practice work is carefully revised and opportunity given for questions and discussions of problems relating to library experience. The Freshman Class has regular courses in cataloging, classification and allied subjects, as accessioning,

shelf listing, indexing and filing, reference work, bookbinding and library development. Courses of the Sophomore group include library organization, cataloging with special attention to subject headings, classification and reference work. The Junior class has courses in subject bibliography, book selection, public documents, library administration, cataloging, and history of libraries and bookmaking. The work of the Senior Class includes national and trade bibliography, book selection, organization and administration of libraries, types of libraries, parliamentary law, and history of education.

The courses in organization and administration of libraries, are given thru the four years in such a way as not only to include the whole field of library development and so broaden the vision, but also so to present these courses by the "Project Method" that the individual development of each student and the solution of her particular problems will be accomplished.

The elements of cataloging and subject headings given in the first year are followed by advanced work in the second and third years. The A. L. A. and Library of Congress subject headings are taught and standard cataloging practices.

Classification, beginning in the Freshman year is carried thru the Sophomore year when the students are introduced to the more difficult phases of the work.

The general reference course alternates with classification thru the Freshman and Sophomore years with the feature of a current events class for all the students of the school held on Saturday mornings. Reports are given on representative newspapers from different sections of the country and the best periodicals from the viewpoint of current events are discussed. There is much interest in the exchange of ideas and experience regarding the care and use of this kind of reference material in the different types of libraries represented by the students.

The course offered in subject bibliography in the third year continues the work in reference given in the Sophomore year, and a systematic study of standard, general and subject bibliography is undertaken. After completing the term's work each student compiles a bibliography of some subject of her own selection. These bibliographies are always of a practical nature, being frequently based on work needed in the home library of the student.

The study of federal, state and municipal documents, how to procure them and how to catalog and use them, is included in the Junior year, and our aim is to familiarize students with the means to unlock this great treasury of in-

formation, procurable by the library at so small a cost.

"Selected National Bibliographies," published as Library School Bulletin 38 of the New York State Library is the basis for the study of trade and national bibliographies. The output of the presses of all European countries, as well as those of North and South America, is studied with particular attention to that of the United States and Great Britain. This subject is given in the Senior year.

To gain familiarity with the characteristics of current book production, with individual authors and publishers, with the catalogs of second-hand books and remainders; to use current book aids in selecting material for various types of libraries, as well as to cultivate judgment as to the need of libraries is the purpose of the course in book selection, offered in the Junior and Senior years. This course is given as a seminar in the Senior year and the students are given practice in speaking before the school on different aspects of the work. A special study of publishers is undertaken and each student selects one publishing house as a subject for detailed study between sessions and prepares a paper which is given before the school at the beginning of the Senior year.

The course in library history and bookmaking given in the Junior year is followed by one with the Seniors in types of libraries, and traces the evolution of the book from its beginnings thru the various stages, to our printed book. The libraries of the ages are studied from the earliest library in the Assyrian palace down to those of the United States, and the development of administration records and library science, showing their relations to the history of the countries is traced. In the class during the summer, the results of the reading on these subjects previously done by students in their own libraries are given, and a survey of the entire field and various types of libraries is made.

The Chautauqua and neighboring libraries provide adequate laboratory facilities. Book equipment for the school has increased with its development until it has a standard collection for library school purposes, and no instructor is deprived of any material that can be supplied to insure the greatest success of her courses.

An important feature of the school is the open conferences held for an hour, four evenings each week in the Hall of Philosophy, or at the Arts and Crafts quadrangle, attended by the students and faculty as well as by visiting trustees and librarians and others interested. From seventy-five to two hundred persons attend these conferences each evening. The sessions have the flavor of a regular library asso-

ciation meeting, and in training students for such work have great value. Discussion of the various subjects and problems are freely entered into by faculty, students and visitors. Librarians and trustees have opportunity to obtain each other's points of view and many problems of mutual interest are happily solved by them in these informal gatherings.

As Chautauqua is such a delightful place for spending the summer it is easy to secure leading experts on special subjects, who lecture before the classes in joint session. A number of other schools at Chautauqua offer subjects directly co-related to library work with which to affiliate. The general program also affords special lectures on allied topics to incorporate in the school schedule. In addition to hearing inspirational and instructive addresses from librarians, and instructors in other library schools over the country, students also have the unequalled opportunity of listening to splendid addresses and discussions of present-day problems by the greatest speakers which this and other lands afford.

Chautauqua gives students some of the advantages of University life, together with something of the summer resort and ideal outdoor surroundings in which to work. The climate is one of the coolest to be found anywhere in the country. Experience of many years has proved the place to be a very delightful one in which to study. Altho the school is practically an outdoor one, it has commodious quarters, including five rooms in the Arts and Crafts Building on College Hill.

Because of the fine spirit of faithfulness, enthusiasm and good fellowship which prevails, much is accomplished each summer. Strenuous class work is supplemented by relaxation thru social events and the rare opportunity to balance intellectual development with healthful, physical recreation which life at Chautauqua affords.

Librarians completing the work have had a course of study of high standard, a deeper insight into library work and have received inspiration for higher ideals of service. They go out from the school with a clearer vision of what the library should mean in the life of a community and are well qualified to fill responsible positions. Trained under such favorable conditions they have not only technical foundation, but also a degree of liberal culture which is an intellectual inspiration to the communities they serve. Even one summer spent in the school is full of promise for those who recognize in librarianship, not a mere custody of books, but a profession which seeks to make the library a vital part of the life of a community.

Training for Librarianship

THE Library Workers Association has sent out the following questionnaires, one to the heads of library schools and others particularly interested in training and the second to representative libraries in the country. The replies received have been summarized by Marian C. Manley, secretary of the Association.

QUESTIONNAIRE FOR LIBRARY SCHOOLS

1. Taking for granted that a complete course taken all at one time is the most desirable training, but taking into consideration also that there are many people in library work who cannot take these courses as at present arranged, do you see possibilities in a system of credits that may be acquired at different times? This would follow present university practice.

All affirmative. "There would seem to be no reason that there should not be developed some plan for offering library school courses at different times, the credits therefrom to be cumulated by individual students as they are able to complete the work."

2. Do you favor or oppose permitting library assistants who work full time, to take single courses in the library school, provided the time for the recitation period is allowed by the library, and study period is taken on the assistant's own time?

Three affirmative. Three think the library should allow neither study nor recitation time. Two find it difficult to arrange.

3. If you are opposed to an assistant's taking a single subject without intending to complete the course, would you favor giving such an assistant single subjects one at a time, in library schools, if his intention eventually were to complete the course?

One affirmative. Others answered elsewhere.

4. If you are opposed to both the above propositions do you disapprove because of the extra work involved and consequent additional cost, or do you think that it would involve a lowering of library schools' standards?

Answered elsewhere.

5. If the objection is based upon the grounds of

additional work and cost, would this be met by the payment of proportional tuition by the library assistant?

Two would like small fee.

6. If you disapprove because you believe the standards will be lowered, do you think this would follow if the assistant met the entrance requirements and submitted necessary work and passed examinations successfully?

Four specified that entrance requirements should be met. Others answered elsewhere.

7. Do you believe that credit might be given by library schools for summer school class work concentrated in one subject rather than for less intensive work in a number? (This does not assume the elimination of the present short courses designed for small libraries.)

Seven affirmative, provided summer school work is the equivalent of other work. One sees difficulty in standardizing summer work.

8. What existing agency, if any, do you believe could be empowered to bring about such standardization of summer courses?

One thinks as summer schools are established to fit special needs they should not be required to be standardized. Three think they should be regulated by A. A. of L. S. Two doubt the authority of A. A. of L. S. Two think such regulation should be done by the schools themselves.

9. If no such agency exists at present, do you think that the proposed National Certification Board could effectually perform this function? Association of American Library Schools?

Answered with previous question.

10. What do you think of the possibilities of group courses so arranged that the completion of a group would fit the student for definite work in one line? Example: cataloging, reference work and bibliography to constitute one group to qualify for either cataloging or reference work. This is proposed to provide for persons who could not qualify for executives and so do not need, or have not time or money for, a well rounded library training.

One considers this worth trying. Four are dubious because of the necessity for a well rounded training.

One considers it the field of a training class. Two think it possible under some conditions but not advisable.

11. If you favor such a school, do you think the library training school of a large library would be the proper place for its development? Can you suggest grouping of courses in line with this suggestion?

Five answered elsewhere. One thinks large library essential. One thinks more depends on the character of the school than of the library. One sees no possibility outside of technical courses.

12. Do you believe any library school courses can be given successfully by correspondence?

Three see no possibility. Four see possibility for some courses and would like to see tried. One "has no experience by which to judge."

13. If you believe some can be given successfully, but not all, which do you think could be so taught?

Four had answered above. One thinks facts and technical processes can be taught. One thinks History of Libraries and Reference. One, courses without laboratory work. One thinks nothing worth while could be done.

QUESTIONNAIRE FOR LIBRARIES

1. Do you believe that libraries can successfully train their assistants and fit them for promotion?

Thirty-one librarians say "yes, it can be done." Three say "no." Two are uncertain whether it could be done successfully or not—"it might be." Five say that it depends on the library—the size, requirements, etc. Five say, "To some extent."

2. If you do, do you believe that this can be done only for apprentices or for assistants of the higher grade as well?

Thirty-three say that this can be done for assistants as well as apprentices. Thirteen say that this can only be done for apprentices.

3. If you believe in training assistants in libraries, do you believe that any time should be granted by the library to the assistant to pursue such studies? If so, should it be for the recitation period only, or for the study period as well? If in favor of the library granting time to assistants for this purpose, how many hours a week do you think should be granted?

Six were not able to answer. One said it depended on the conditions in the library. Thirty said that time should be granted for training. Of this number (30), fifteen thought that time should be granted for recitation or instruction time only—seven said time should be granted for both recitation and study. Some did not care to state a definite number of hours weekly; nine thought no time should be granted on library time.

4. Do you believe that a direct recognition, possibly an increase in salary should be given assistants who take short summer courses in library training, abbreviated library school courses (course in one or more subjects) or who satisfactorily complete work in a library training school?

Five say "no." One librarian wrote that if one of their assistants wanted to take a special course during the summer he would be inclined to think that that assistant was merely remedying deficiencies in her preparation. Two wrote that an opportunity for earlier promotion was better than an increase in salary. Thirty-eight said, "yes"—a direct recognition should be given. The majority of this number, however, said that an increase in salary or promotion should be given only after the results of the course directly affected the work of the assistant. This reward should not be given because the assistant had taken a course, but because she was more valuable to the library and her work was more efficient for having taken that course.

5. Do you believe that continuity of service or gain in library efficiency can be attained by encouraging

assistants to "work up" in the library? Is there a reason why libraries cannot or should not educate and train their assistants in the same manner as commercial concerns?

(a) Thirty-eight said, "yes." Two said "no." Several didn't know. One said, "only up to a certain point." One said it depended on the individual, the size of the library and the opportunities offered. One person answered "partly."

(b) Fifteen said "no." One thought it depended on the size of the library. Another said it depended on the funds available. One said that this could be done only in the lower or clerical grades of service. Several didn't know. One thought it would only be possible in a large library. Several said that it was cheaper and that better results could be obtained if the library schools did the training. Another one said that a "library is not a commercial concern, and librarianship, being a profession, requires a broad, general preparation such as only a library school affords." Many did not answer this part of the question at all. One librarian said, "libraries cannot educate their assistants as well as business houses because they are not as free to discharge the unpromising and select better material."

6. Would you be willing to aid in an effort looking to the correlation and standardization of those library school courses which are as yet unaccredited?

Nine did not give any answer at all. Twenty-five said, "yes." Seven were not quite clear as to the meaning of the question. (One said "all library school courses are at present accredited.") One said it should be done by the A. L. A.. Three said, "no." One of these had "grave doubts as to the wisdom of standardization." Another one said he thought "there was danger of perhaps too much standardization in the training and education of individuals in work of this kind."

7. What is the present practice along these lines in your library?

Eleven have a training or apprentice class. One library has the year leave of absence plan. One library trains apprentices for Civil Service examination. One has graded service. Several libraries allow time with pay in order that assistants may take a library course. In one library, library school graduates begin as general assistant at \$100 per month. In another the salaries begin at \$20 a week running up to \$28 a week, \$1.00 increase per week each year. This is automatic within limits. Some of the libraries have staff luncheons, meetings, lectures, etc., thereby helping the assistant to progress. One library requires the beginner to have two years normal (teacher's certificate) or two years university training while another requires a college education and a year in a library school. One library keeps a service record of all employees. Another library has substitute assistants several hours weekly. These are taking High School or College work.

The A.L.A. Bookbinding Exhibits

AFTER the usually full itinerary for the fall and winter seasons, the two A. L. A. Bookbinding exhibits are available for the summer schools and library institutes. Reservations for the state meetings in the fall may be made early also. Applications should be addressed to Mary E. Wheelock, Public Library, Des Moines, Iowa, giving dates or approximate dates preferred.

Mark the "Booklist Books" with the library call number and put it on the "New Books" shelf for circulation.

Preparation for School Librarianship

By MARION HORTON

Principal of the Los Angeles Public Library School, and chairman of the School Libraries Section of the A. L. A.

THE attention of the A. L. A. School Libraries Section during the last two years has been concentrated on the problem of the content of a course preparing librarians especially for school positions. A statement was presented the Colorado Springs Conference which expressed the opinion of a group of library training experts, school library people and school men who had met in conference in New York City at the call of Martha Pritchard, chairman of the section. This statement emphasized the desirability of a special course for school librarians which should include practice in school libraries and public libraries with emphasis on reference and children's work. The course should include discussion of child psychology and modern educational methods in addition to the usual library technique. The year following a questionnaire was sent out in co-operation with Dr. Williamson in his investigation of library training. The courses offered in the different library schools of the country were summarized and tabulated to show the emphasis given in each school on the technical, administrative and bibliographical courses.

At the Swampscott meeting the program of the School Libraries Section was planned to show what was demanded of a school librarian in the four aspects of her work, administrative, technical, pedagogical and inspirational, and to show the need for closer relationship between library schools and schools of education. No one who has not worked in a school library can realize what is expected of the school librarian who may be required to do everything ever done by any librarian anywhere, from selecting books and preparing them for circulation to the page and janitor work, while in addition she must teach the use of the library and fulfil all the social duties of a teacher.

Library schools give thoro preparation for the technical part of the work. The courses in book selection and administration may be adapted to school library conditions, but not all schools prepare for the pedagogical side of the work. Graduates have tests for selection of different kinds of books and know how to use book lists, but they are often rigid in their standards and not sure enough of the steps from mediocre to good in the reading of the high school students. They know that they must lead upward and onward, but only experience

can give a knowledge of the infinite gradations and the slow steps between "Freckles" and "David Copperfield," both of which may be found on the required reading list in sophomore English. They are least prepared for the school atmosphere, discipline, hours, course of study, and the construction of a teacher's mind.

Miss Pritchard's committee has made a study of the courses of different library schools to find the amount of time devoted to different subjects and their weights in the curriculum. The schools agree in considering cataloging and classification, reference and book selection the essentials, with varying emphasis on children's literature, school library problems and administration in different types of libraries for persons prepared to specialize in these fields. Each person who completes the course should know the fundamentals of library technique and should be able to adapt them to any kind of library. If we divide the duties of the school librarian into four classes, administrative, technical, pedagogical and inspirational, we find that the library school prepares adequately for the first and second, not always for the third, and indirectly for the fourth.

To be an executive, one must have knowledge of library and also of school organization. The library school graduate is usually ready for any technical emergency and can adapt the method she has been taught to the exigencies of the situation. We suggest, however, that for those preparing for school librarianship, certain modifications of technique be summarized instead of being touched upon incidentally in the different courses. For example, in classification students should make modifications of the decimal classification for a school library and should be given practice in classification of the books likely to be used in school libraries. This should be done in cataloging also, and the importance of analytics for the use of teachers and students should be emphasized. A practical loan system should be worked out. Quite as important as the specifications for binding "Classic Myths" and the *National Geographic* is instruction in how to make the purchasing agent see the need for rebinding, and grant the money for it.

The graduate of a library school rarely knows much about school organization. Do Curtis tests, project method, medians, units of school measurement, mean anything to her? Does she

know how knowledges, skills, ideals, attitudes and powers become objectives? Can she talk the teachers' language as fluently as she can say "B. M. cat." and "bib?" One candidate for a school library position defined visual education as an education broad enough to make you see both sides of every question!

Several schools are now requiring all students who wish to be recommended for school library positions to have some college or normal training in pedagogy. The library school graduate who wishes to be a school librarian must have the educational background of a teacher, so that she can have the same position on the faculty and the same salary. If the school librarian does not have this background, lack of amalgamation is inevitable, and she is considered merely a super-clerk. The high school librarian should be a college graduate with at least twelve credits in pedagogy and an elementary school librarian should have the equivalent of normal school training. If she has not had pedagogy before entering library school, she should be able to combine the study with her library school course. The University of Illinois, the New York State Library School, the New York Public Library School and possibly others have arranged for co-operation between the schools of education and the library school, so that students wishing to specialize in school library work may secure the necessary training. Other schools have lectures by specialists on modern educational methods, mental tests and measurements, visual education, silent reading, part-time schools, projects and child psychology, in order to give an intelligent comprehension of new tendencies, and a power of anticipating the future, as librarians must.

Some instruction must be given in teaching the use of the library. This is a part of the work of most school librarians and many children's librarians, yet very little preparation is given for it. Because librarians can use reference books, they are expected to know how to teach others to use them, but the strange lessons sometimes produced do not always justify the time spent on them. If we librarians expect to have instruction in the use of the library made a part of the course of study, we must learn to teach the lessons effectively.

For the inspirational part of the school library work, the courses in book selection and children's books are well planned, altho the need for children's literature needs to be stressed. High school freshmen are only three months older than eighth grade children; books chosen for the first two years are often children's classics and books like Masfeld's "Jim Davis" and Hawes' "Mutineers." It is de-

sirable to check the *Publishers' Weekly* in library school with this in mind, and to make annotated lists for different grades in different types of schools. Like everyone else, students must be reminded that books can be easy to read and still meet our requirements of style and content. If we scorn Tarzan and Ethel M. Dell, we must have something equally alluring to put in their place.

At Swampscott there was exhibited a model high school library made after Mr. Certain's recommendations by the Simmons Library School. Here was a delightful application of the project method in the library school, for the students made this instead of taking a final examination in school library work. The room was shaped to meet Mr. Certain's specifications. Tiny readers sat at 3 x 5" tables, in little chairs, and the equipment of the room was complete from the curtains and pictures to the vertical file, truck, periodical case and books.

In Los Angeles we find many opportunities for using the project method in the school library course. Questionnaires so appalling to one familiar with them have the joy of novelty to students, and they find much practical value in collecting titles of books for a questionnaire for an English association, deciding which books were most popular for home reading for boys and girls in each grade and suggesting stepping stones for boys and girls. In subject bibliography the class makes lists of books on subjects which the teachers wish to use. In children's work reviews of books are written for Mr. Wheeler's reading lists in Youngstown. Such actual problems in each course put vitality into the curriculum.

In the children's room there is an opportunity for real laboratory work when the school children come to study industries. Geography is taught as a living thing and many books besides those classified in the 910's must be used in finding material for the fifth grade studying dairying in Holland, or street fairs in Russia. Practice work in the reference room and in school libraries under supervision is essential.

School library work is attractive in so many ways and offers such opportunities that it is important to prepare for its many aspects. As the demand for school librarians increases, educational institutions will offer training for the positions if library schools do not. Thru the co-operation of schools of education and library schools, as the School Libraries Section suggested at Swampscott, it will be possible to recruit more persons and to give them the wide vision of the possibilities of library and school working together.

Naval Libraries

A NUMBER of inquiries have been received from librarians interested in naval libraries. From this correspondence it would appear to be uncertain to the writers how naval libraries could be continued without a Navy, as the Navy was supposedly abolished by the recent conference.

The Conference on Limitations of Armament was strictly a conference on limitations, not an abolishment. The conference in itself did not effect the Navy as it exists today. It limited only the future programs of Naval construction. Incidentally officers, who almost without exception supported the Limitations Conference, believe that a strong treaty Navy will be an absolutely necessary aid to the success of future international conferences on "Limitations" or "Abolishment." If the United States has nothing to abolish or limit how can its advice and suggestion at some future conference have any weight?

Since the war Congress has been considerate in the appropriations which are designed for the enlisted men of the Navy. Under the appropriation entitled "Recreation for Enlisted Men" \$800,000 was voted for each of the last two fiscal years. This amount will probably be somewhat reduced next year on a scale proportionate to the personnel. An appropriation for next year has been voted by the House and it is anticipated that the Senate will raise no objection. Altho library funds are drawn from different appropriations the "Recreation" appropriation furnishes the major amount.

Last year about one hundred and thirty thousand dollars was available for library purposes, most of which has been spent for books and periodicals. This amount is small in itself, being equivalent to about a dollar and a quarter per man in the Navy and Marine Corps, or one-eighth of the cost of an individual subscription to one newspaper. Yet, from the libraries supplied by these appropriations nearly a million books were circulated last year. The most encouraging feature of the work is the great use which is made of libraries and books wherever suitable facilities are available. As would be expected from a reading public which does not include younger children, the circulation of books is much greater than in civil life. In hospitals the average patient reads from three to four books per month. On ships where suitable library facilities are afforded the average issue of books from libraries is equal to one and a half books per month per person.

The need of study and of a thoro grounding in subjects relating to Naval arts and sciences

is keenly felt. A letter from the Secretary of the Navy to Officers of the Service dated February 16 clearly emphasizes this fact. The following is a quotation from the statement of the Secretary which was followed by a list of books recommended for reading by officers and men:

The Department knows of nothing that can contribute more to the morale of the Navy than a thoro understanding of the great part the Navy must inevitably take in the future development of the Republic and directs that all commanding officers make every effort to indoctrinate the officers and men of their commands.

Captain Belknap in an address delivered before the officers of the Atlantic Fleet emphasized the need of accurate knowledge. Captain Belknap's article on the advantages of thorough study applies to civilian adults as well as to Naval Officers. His conclusion is as follows:

By reading history, biography, and books on the large problems and prominent topics of the world's life, one acquires the power to see events in their real significance and to form sound opinions of one's own. The College course and other exercises conjointly with other officers point the way and help to keep one on the right track, not in a rut, but most of all must officers depend upon their own efforts keeping in mind the purpose of all our training and effort—that the Naval Commander and Naval Force, in any way, and every situation, shall be equal to the task.

The great names of naval history were men of large general information and knowing insight in international affairs—St. Vincent, Rodney, Nelson and Farragut, to mention only a few. Nowhere does "knowledge is power" apply more strongly than in the Navy, and it is obvious that the power of the leader to act to best advantage is greatly enhanced by broadminded, well informed grasp of the situation by his subordinates.

Rear Admiral H. C. Taylor, an early president of the War College, an officer of wide reading and experience, recommended young officers to read Mahan again and again, adding "put it under your pillow." In a recent number of the *Naval Institute* our Vice Admiral Knapp urges officers to acquire the international outlook. Only reading and study will lead to that, with real intent to read, mark, learn and inwardly digest,—the reflective kind of reading which stocks the mind with information and develops the ability to apply it. Officers who form this habit of serious reading find it refreshing as well as profitable. By means of it you will surely advance yourself towards real fitness for that occasion when the situation may suddenly tax your utmost abilities. Then, if prepared, you may demonstrate with the world looking on, that indeed, "knowledge is power."

It is hoped later to present to those interested a comprehensive statement of the organization of Naval Libraries as it exists today, but in order, however, to give at the present time to the many who are still interested in bluejackets some information as to the use of a ship's library the following quotation from an article by Lieutenant C. A. Neyman, (Chaplains Corps) U. S. N. in a weekly publication entitled "The

Baptist" is quoted. This article was not written by a professional librarian or for professional librarians. It is believed, however, that Chaplain Neyman shows clearly the value of a ship's library:

In so far as the chaplain wishes (limited only by his abilities or energy) he may guide the athletic, recreational and educational activities of the men on a battleship. For example he may choose the motion pictures which are shown as frequently as four or five times a week. Thus he may apply censorship at the point where it is least wordy and most effective.

The library falls under his supervision. Modern battleships carry large and excellent libraries and men read a great deal. The chaplain's knowledge of fiction, modern and classical, will be taxed considerably and need much refurbishing if he is to make the most of all the opportunities that will be presented for directing men's reading. Approaching, also, by way of text books or correspondence courses, and mounting into the wholesome significance of organized classes, he will be called upon to help men plug sad gaps in their grammar or high school or even college education. Should a man come with a trigonometry problem, when the chaplain has not seen the inside of a trig. text for ten years, he had best determine to save his face by solving the problem.

DEVELOPING READING TASTES

There are interesting cases. One marine wishes to be shown how to draw up a pedigree. He plans on a farmer's career later. A sailor wades thru every mathematics text in the library. Another reads all there is of Eucken, James, Rousseau and Darwin. The next wants a story book and is willing to be aided in its selection, though he is a bit crestfallen to learn that every volume of Zane Grey is out on loan. He doesn't know of any other authors that interest him unless it be Rex Beach, and all Beach's books are worn out. What does one give him? Sometimes Conrad works; or fails. Or Stevenson! or Dumas! But it pays to go by easier stages, via say, Curwood, Cullum, Kelland, Vance, Rinehart, Wells or even "Tarzan." One must not be too fastidious. In that great boon, reading, taste develops slowly. And almost anything beats "Whiz Bang." Another sailor was an assistant scout master before enlisting and desires to be a full fledged scout master when his "hitch" is finished. He reads Allan Hoben's "The Minister and the Boy" (declaring it a fine book) and H. Thistleton Mark and Begbie—all before the regular Boy Scout Manuals have time to arrive. H. G. Wells' "Outline of History" is as busy as anything, and almost any book needs but be mentioned in a sermon in order to be requested immediately from the librarian. A great packing case gave up its Bibles, one by one, before there was time to distribute them, though sceptical observers made facetious declarations that the big rubber bands which embraced them had something to do with the demand."

Book Collection at the St. Paul Union Depot

THE Branch Department of the St. Paul Public Library has placed a deposit of books in the women's waiting room of the new Union Depot. The collection, which is shelved in a bookcase provided by the depot authorities, includes volumes of short stories and light novels, story magazines, picture books and other books for children.

A deposit of twenty-five cents is paid by the borrower, for which she is given a receipt similar to a baggage check. This check which is about the size of a narrow book card is placed in the pocket of the book. The deposit of twenty-five cents entitles any one to the use of one book, or, if it be a mother with one or more children, she may draw one book for herself and one for each child by using the same deposit.

The check indicates the number of books issued and the deposit will be refunded when all books are returned. These duplicate checks will be sent to the library at the end of each month to be used for statistical purposes.

This service is intended for travelers who may find it necessary to make a long wait in the depot and have made no provision for reading matter.

The social worker at the depot is in charge of the books.

Since the books used for this purpose are far from new, it is expected that the deposit, tho small, will cover any actual loss to the city.

MYRA W. BUELL,

Chief of Branch Division.

St. Paul Public Library.

A Union List of Scandinavian Periodicals

To the Editor of the LIBRARY JOURNAL:

May I call the attention of librarians and investigators to a union list on cards of Scandinavian periodicals now accessible in American libraries?

This list is due to the labors of Miss Anna Monrad, in charge of cataloging at the Yale University Library, and thanks to her courtesy it has now been turned over to me to form a part of a union list of wider scope being formed for the American Scandinavian Foundation.

Miss Monrad's list notes periodicals no longer being issued, as well as those still in course of publication, and her cards generally record the extent of the sets. In one section investigated references were found to some twenty libraries; this shows that the sources from which Miss Monrad has drawn are numerous and well distributed over the country.

I shall be glad to answer questions in regard to the whereabouts of Scandinavian periodicals whenever such questions can be answered from Miss Monrad's list or from the additional material which is being incorporated into it.

T. FRANKLIN CURRIER,
Assistant Librarian.

*Harvard University Library,
Cambridge, Mass.*

THE LIBRARY JOURNAL

TWICE-A-MONTH

MAY 15, 1922

TWO important bibliographical plans came to the front in the Institute meetings at Atlantic City. Professor Richardson, whose paper is printed in this number, developed his plan for a brief title list, a title to a linotype bar, of books in the leading university and other libraries, with the double purpose of utilizing their treasures thru inter-library loan and of filling out gaps by a co-ordinated scheme of purchase abroad. He proposed that the Library of Congress should make a bar title list of its cards as the foundation of the enterprise, to which list the university and other libraries would add further titles. His scheme of co-ordinated purchasing would place one copy for reference and one copy for circulation on the shelves of half a dozen regional libraries. Incidentally, he brought out the statement that twenty-nine universities spend about two million dollars a year on their libraries, half of which is for books, covering accessions of half a million volumes at an average cost in these days somewhat above two dollars each. He estimates further that there may be two million different books in American libraries, outside the well known collections such as the nearly three millions in the Library of Congress, and that two million more books ought ultimately to be purchased abroad for the use of American students.

★ ★ ★ ★ ★ ★ ★

THE other plan is that worked out by a committee of exceptional personnel for a check-list of periodicals to be found in American libraries. It is a guess rather than an estimate that forty thousand or more different periodicals of practical use, in more or less complete sets, are to be found in American libraries and that a check-list might be provided, at the cost of less than one dollar per periodical, which would include some indication of the libraries containing sets or partial sets, particularly in regional libraries. The suggestion of the committee is that thirty-six university and other libraries might combine to guarantee an average of one thousand dollars, spread over three years, which would provide for the estimated expenses. Such a guarantee would, of course, be lessened by the sales of the publication, and it is believed that the usefulness of the list would be out of all

proportion to the cost in any of the great libraries where research is done. In this connection, regret must be expressed that the International Catalogue of Scientific Literature as engineered by the Royal Society of London, is not likely to be resumed, altho the meeting which has been called by the Brussels institute may take up the question of reviving or reshaping such a catalogue. These great plans all involve large vision—but this is the day for large visions of world scope.

★ ★ ★ ★ ★ ★ ★

IN respect to such enterprises as these co-operative catalogs of books and of periodicals in American libraries, there are two complementary needs quite distinct from each other. One is to know where are the materials which are needed for not unusual reference, and the other, those needed for unusual reference, that is, the general material and the rare material. Whether to attempt both in one catalog or to segregate them in two catalogs, is a question of importance. A first catalog would put at the disposal of most readers in the great body of libraries information as to the nearby or regional libraries where the material could be seen or whence it could be borrowed, and such a catalog would be of wide use and corresponding circulation. The other would be chiefly for the use of scholars engaged in research, and being of infrequent use, would have less chance of pecuniary return. It might be well if, in connection with the first-named class of enterprise, the second kind of material should be collected for card deposit in some central library, regarding which questions could be asked. One method of collecting this material might be by dividing the field geographically and by periods, and asking for information on each separately. The great body of publications have been, of course, east of the Mississippi and north of the Ohio, whether of books or periodicals. A tentative list might be compiled by a library having presumably the best stock of periodicals south of the Ohio, and another, the best stock of periodicals west of the Mississippi, and another, of periodicals before 1800, the historical libraries probably furnishing the best material for such a tentative list. This might be sent to libraries thruout the designated section or those

of earliest organization, and thus much local and early material could be brought out which is practically unknown outside the library which possesses it. Tho these schemes as above suggested, involve large plans, the time is ripe at least for starting such plans for the future to work out.

★ ★ ★ ★ ★ ★ ★

AS has often been emphasized, there are few if any professional schools which can make the boast of the library schools that their graduates are assured a place even before their graduation. The demand for library school graduates is indeed so great that there are not enough schools to supply it. It is most interesting, therefore, to note that there is talk of the revival of the library school of Drexel Institute, which was one of the earliest of the schools, did most creditable work and sent out into the library field many librarians whose work has proven equally creditable to themselves and the school. The Drexel alumnae—there are also two alumni—have been most loyal to their Philadelphia flag and Drexel dinners are a usual feature of many library meetings. It is from the alumnae, who have in so many fine ways shown their steadfast loyalty to the school, that the suggestion for revival of the school has come, and the new administration under Dr. Matheson, recently of Atlanta and a trustee of the Carnegie Library there, is disposed to look with favor on the plan. Philadelphia and eastern Pennsylvania are likely to make considerable demands for library school graduates in the near future, beyond the supply from the nearest schools in New York State and at Pittsburgh. Washington is another great library

center—farther removed, indeed, than Philadelphia from the present schools—and here also is a possible opportunity for broader development. It will do no harm if, as Mr. Daniels formerly pointed out, these schools should be somewhat different one from the other and specialized more or less, as is Miss Hasse's class in Washington, for different classes of needs.

★ ★ ★ ★ ★ ★ ★

THE plan of triple nominations for each office in the A. L. A. is working out some curious complications and in the case of the Trustee of the Endowment Fund to be elected this year the resignation of Mr. Edward W. Sheldon has come so late that the Nominating Committee is unable to fill the gap within the required period. At the desire of the two Trustees, Mr. Appleton and Mr. Coolidge, nomination will be made on an independent basis of a nominee from the East, who can be more readily in touch with the other two Trustees than one from the West. Mr. William M. Kingsley, vice-president of the United States Trust Company, has been suggested and his name will be put in nomination with his consent. There are also in nomination, by the Committee, Judge Porter of Cincinnati and Mr. Charles E. Schick of Chicago, excellent nominations both. Judge Porter has always been one of the standbys in the Trustees Section of the A. L. A. and this is a notably fitting nomination, except for the matter of geographical separation from the two others. It is to be hoped that this triple method of nomination, which is less in favor now that its defects are being shown, will not leave any misunderstandings behind it as the result of choice of one out of three.

LIBRARY OPPORTUNITIES

The Atlantic City Meeting

FOR the twenty-sixth annual joint meeting of the New Jersey Library Association and the Pennsylvania Library Club, which was again made the occasion of a meeting of the American Library Institute also, about three hundred people gathered at the Hotel Chelsea, Atlantic City, on April 28-29.

AMERICAN LIBRARY INSTITUTE

THE American Library Institute held two sessions on the first day, Friday, April 28. Clement W. Andrews, in his presidential address printed in this number, outlined the character and functions of the Institute.

Dr. E. C. Richardson read a paper on "Uni-

versity Library Co-operation and Business Engineering," in which he summed up what had been said and done in the nature of experimentation in the field of library co-operation for the last twenty years,—but viewed as a starting point for future effort. This paper forms the leading article in this number of the LIBRARY JOURNAL.

M. Llewellyn Raney, speaking on "Tariff and Copyright Legislation," reported that in the Senate Committee's revision of the House tariff measure, presented April 11, the rate is kept at fifteen per cent on foreign valuation (twenty-five per cent if book is of American authorship). The limit on number of copies allowed free importation is removed, while the following are

*A Comprehensive Manual of Corporation
Law, Finance, and Accounting*

Corporation Procedure

By THOMAS CONYNGTON; R. J. BENNETT,
C.P.A.; HUGH R. CONYNGTON and PAUL W.
PINKERTON, C.P.A.

In this comprehensive manual are concentrated full, definite, and authoritative counsel and working methods covering each of the three important problems of corporation management—Law, Finance, and Accounting. Corporation officials, lawyers, accountants, bankers, investors, and others interested in the corporation management will find this manual invaluable for reference and study. It will undoubtedly be in frequent demand.

"Corporation Procedure" carries the reader through the entire procedure of incorporating an enterprise. It shows what should be done at every point, cites and interprets the law and gives authoritative advice. 267 corporate forms are included, the most complete list ever brought together between two covers.

The book goes right to the heart of corporate finance, shows how to put an enterprise in shape, how to promote it, and how to secure capital on a favorable basis.

It gives clear, detailed examples, fully worked out, covering practically every situation in corporation accounting, and points out changes in accounting technic necessitated by modern developments.

In this manual the authors have combined material from three works, each recognized as standard:—"Corporate Organization and Management," "Business Finance," and "Corporation Accounting." This material has been brought thoroughly up to date and much new matter added. The price, \$10.00, is small for the amazing amount of material contained in the 1,815 pages of this book.

1922. 1,711 Pages. Cloth Binding. Price \$10.00

American Commercial Credits

By WILBERT WARD

Chairman, Committee on Standard Letter of Credit
Forms, American Acceptance Council

This book presents the findings Committee on Standard Letter of Credit forms of the American Acceptance Council. Because it gives the first full and authoritative discussion of this subject the volume will be in demand by bankers, exporters, lawyers, and students of international trade.

The purpose of the book is to point the way to a more beneficial use of the letter of credit. The author analyzes the legal nature of the credit, the purpose it is intended to serve, the rights and liabilities of the several parties, the defects in the practice of issuing bills of lading, and other questions that have been the subject of much dispute. Forms recommended by the committee as most satisfactory are reproduced and explained. Accounting methods to be employed in recording the legal relationships entered into under the several types of credit are also fully discussed.

restored to the free list: 1. Foreign language books. 2. Books printed and bound more than twenty years. 3. The immigrant's books (and necessary household effects).

Duty free text-books are missed, but on this point reconsideration is probable, and it is but fair to say that the concession of unlimited importation was intended to meet this need.

The rate compromise suggested by us at the last hour, after the bill had gone to press, is a concession to the book binders, as is also the requirement that the old books must not be in new bindings to escape duty, and the provision of a forty-five per cent duty on books, the chief value of which lies in their leather binding.

Under the copyright measure about to be introduced, repealing the manufacturing clause in the existing law, in order to clear the way to American entrance into the International Copyright Union, the publishers have included a clause allowing institutions and individuals to import for use and not for sale single copies of "any book as published in the country of origin with the authorization of the author, or copyright proprietor . . . *provided* the publisher of the American edition of such books has (within ten days after written demand) declined or neglected to agree to supply such copy."

Librarians oppose this proviso because under the guise of safeguarding copyright it puts in the hands of American publishers the monopoly of the country's book importations. This follows irrespective of whether the United States enters the Union or stops at the repeal of the manufacturing clause. Inside, (virtually) all European books would enjoy American copyright. Outside, such right would be established by mere compliance with the formality of notice, deposit and registration. Without cost, or for a dollar and a copy, according as we were in or out of the Union, the price of an edition would in a twinkling shift from the foreign price to the American. The depreciation of foreign money would make sole agencies mutually alluring. What the international publisher would do is not a matter of conjecture. His catalogs are already in print. Thus, Macmillan is found to be charging for his importations an average of 38.3 cents per shilling. Under the existing law we can escape by buying abroad, but with this deadly proviso enacted we must come to him or do without. As for the author, for whom copyright law was called into existence, he is lost in the shuffle.

J. C. M. Hanson, on behalf of the Committee on printed cards for monographs and series, reported that word had been received from a score of libraries indicating willingness to cooperate in the purchase of cards for all or part

of the analyticals for some fifty-seven titles submitted by the Committee. With the required number of subscriptions in for over one-half of the titles and the necessary co-operation assured for the preparation of entries, the Committee feels that its work has not been in vain.

By way of introduction to his paper on "The Vatican Library" Theodore W. Koch gave a pen picture of the newly elected Pope, Pius XI; who as Monsignor Ratti was Prefect of the Vatican Library during the period of the World War. The history of the collection of manuscripts by the different popes was sketched broadly from the fourteenth century to the present day. The chief characteristics of the various periods of the growth of the library were pointed out and the special interests of the various benefactors were emphasized. The present state of the Library was described briefly and attention called to the liberalized policy of recent administrators which has served to make the collections more useful to visiting scholars.

Harry M. Lydenberg spoke on the "Proposed Union List of Periodicals" and especially on the raising of a guarantee fund. It was suggested that the publication might be financed by some three dozen libraries paying say a thousand dollars each, receiving in return a certain number of extra copies of which they would have the disposal. Mr. Bowker was of the opinion that some of the research and industrial foundations might be looked to for a part of the necessary support. Dr. Andrews thought that if the list were issued in monthly parts they might be subscribed for by libraries interested and the payment spread over several years.

THEODORE W. KOCH, Secretary.

PENNSYLVANIA LIBRARY CLUB

THE first session of the Pennsylvania Library Club was held on Friday, April 28, President Asa Don Dickinson in the chair.

LIBRARIANSHIP AS A PROFESSION

John H. Leete, Director of the Carnegie Library of Pittsburgh, gave the first address, the title of which was "Our Appeal as a Profession." Mr. Leete quoted Herbert Spencer's statement that "professions are for the augmentation of life," but said that tho that might furnish a starting point for the discussion, it did not fully determine the question or differentiate some professions from allied trades. The qualifications demanded of the ideal member of a calling determine whether the calling is a profession or not, regardless of the shortcomings of the individual. The characteristics of this ideal professional man are liberal education, expert knowledge in a special field, desire to serve others and an ambition for leadership. The ideal

A Musical Pilgrim's Progress

By J. D. M. RORKE *Net \$1.50*

Written with candour and without convention this book records the psychological development of an amateur music lover. A charming book for anyone to whom music means more than sounding brass or tinkling cymbal.

The American Indian

By CLARK WISSLER *Net \$5.00*

Never before, we think, has so much authoritative information on the Indian race and its culture been presented in a single attractive volume.

Government and Industry

By C. DELISLE BURNS *Net \$5.00*

A study of actual practice with a view to discovering fundamental principles. It is not a statement of an ideal nor propaganda for a policy, but such a survey as may be useful.

Children and Childhood

By N. NIEMEYER *\$1.85*

An attempt to see more clearly the subjects of psychology in the work and play of real children. It is the numerous illustrations of these facts drawn from life which make this book valuable to parent and teacher.

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

librarian, Mr. Leete said, requires these professional characteristics, and the conclusion drawn is that librarianship is a profession. With other professions more than filled, why does the library not attract its quota of strong professionally inclined people? Low salaries may furnish one explanation, but that is not the only reason. The routine of library work impresses the visitor to the library and the professional character of the work is not apparent. This professional work must be carried on both in the library and outside its walls. It must be shown by example also, that there is opportunity for individual leadership in the library profession; that librarianship requires initiative and that it offers a chance to do things. Mr. Leete emphasized the fact that the library needs publicity to correct the mistaken impressions of library work, but the publicity must be of a definite character. It must emphasize the bigness of the job, the need of liberal education and technical training, and the opportunity it offers for professional work and personal leadership. That kind of publicity will bring into the library field, not reluctant recruits but enthusiastic volunteers. The library appeal as a profession is of vital importance to library work. To realize the possibilities of the greater library of today we need the strongest and ablest of the present generation of college graduates for service in the rank today and for leadership tomorrow. To get them we must convince them by precept and by example that the library offers them opportunity for professional service and for personal leadership.

The second speaker of the Friday evening session was Christopher Morley, who gave his usual humorous address in which he discussed among other things, the art of public speaking and the making of a poet. In concluding Mr. Morley read several of his short poems, among which were "The House Where Brown Eyes Are" and "The High Chair."

George R. Prowell, curator and librarian of The Historical Society of York County, Pennsylvania, gave a brief and interesting talk on his finding of "The Lost Diary of Washington."

TRUSTEES' SECTION

A Trustees' Section met on Saturday afternoon, Thomas Lynch Montgomery, librarian of the Pennsylvania Historical Society, presided. "The library trustee" was discussed by Henry D. Brown, Trustee of The James V. Brown Library, Williamsport, Pennsylvania; Clinton Rogers Woodruff, Trustee of the Free Library of Philadelphia, and president of the Civil Service Commission of Philadelphia; and R. R. Bowker, editor of the LIBRARY JOURNAL.

Mr. Brown outlined a plan formulated at the 1921 meeting of the Keystone State Library

Association, whereby a Trustees Section was created, which is trying to reach all library trustees in Pennsylvania, interest them in the library movement in general, and in their own libraries in particular. Letters were sent to all free libraries in Pennsylvania, asking each to send one trustee, to the annual meeting of the Keystone State Library Association to be held in Altoona next October. The hope of this Section is that as a result of this meeting, a new interest will be aroused in the trustees, and a closer bond will therefore be formed between each library and its Board.

Mr. Woodruff said that most people do not realize what a good sized library has to do; nor the responsibility that is upon a board of trustees. This board must be composed of people known for the ability to execute any trust placed upon them. They must have understanding of matters of investment. The responsibility for salaries is theirs. Tho the real responsibility rests with the legislature, or the city council, the Board makes the recommendations. It is the primary duty of the trustees to assure adequate appropriations both for salaries, for books and for proper buildings. All suggestions should come from the librarian, who should, whenever possible, be supported by his trustees.

The board must keep in touch with the librarian, and be able to give advice on all important points. In Philadelphia, those present at a trustees meeting, constitute a quorum, and there is always a goodly group present. The board discusses policies; but details are carried on by committees. The Board must be considered a court of last appeal for serious difficulties. Mr. Woodruff emphasized the fact that very much of the success that a board achieves is due to the zeal and energy of the librarian.

R. R. Bowker gave an instructive address on the methods of procedure employed by the three boards of which he is a member. The Brooklyn Institute, The Brooklyn Public Library, and the Stockbridge (Mass.) Public Library. The Brooklyn Public Library trustees meet once a month. This Board has committees on Administration, Books, Buildings, Finance, and Law. The Committee on Administration considers every promotion and discharge, and leaves of absences. The Committee on Books practically accepts from the librarian the lists of books for purchase. The Committee on Buildings takes care of branch and new buildings; and the Committee on Finance has, of course, to deal with questions of money, salaries, etc. The Board is a final court of appeal, tho seldom have cases come before it.

THE WORLD BOOK

Organized Knowledge in Story and Picture
In Ten Volumes

AMERICAN SOCIAL WORK IN THE 20th CENTURY

By

EDWARD T. DEVINE and LILIAN BRANDT

62 pp. Paper covers. 50 cents.

A comprehensive and authoritative review of the status of charity and correction at the end of the nineteenth century, and of the developments since 1900, both in underlying philosophy and in practical accomplishments.

THE FRONTIER PRESS

100 West 21st Street

New York City

Mr. Bowker explained also the workings of a small town library as exemplified in Stockbridge. There are women serving upon this Board. The Board in this case does the work of actual suggestion for the purchase of books. The relation between the town and the Board is interesting; one member being elected by the town, the others being regularly appointed, as is done in most cities. Mr. Bowker said that serious difficulties in procuring necessary appropriations are sometimes encountered in boards constituted of political appointments only. In closing he emphasized the necessity for very close co-operation between the librarian and the Board of Trustees.

MARTHA LEE COPLIN, *Secretary*.

NEW JERSEY LIBRARY ASSOCIATION

THE first session of the New Jersey Library Association held on Friday, April 29th, was devoted to business details and to the discussion of budget making, book buying and business methods. Miss Burnett of Dover introduced the subject of budget making, Miss Baillet of Irvington, book buying and Miss Gillies of Edgewater, business methods. In each case, after the introduction, there was a general discussion from the floor. At the end of the meeting the following were elected officers for the coming year: President, Louise G. Hinsdale, East Orange Public Library; vice-presidents, Arthur Mack, trustee, Edgewater Public Library, and Alva Barker, Montclair Public Library; secretary, Lynda Phillips, Chatham Public Library; and treasurer, Kate Brower, Orange Public Library. As Miss Hinsdale found it impossible to serve, her name was withdrawn later and James T. Gerould, librarian, Princeton University Library, was elected in her place.

CERTIFICATION OF LIBRARIAN SERVICE

The Saturday morning session was given up entirely to the discussion of Certification of Librarian Service. The two principal speakers were Azariah S. Root, president of the A. L. A., and John Cotton Dana of Newark, N. J.

Professor Root speaking for the affirmative took up the following questions: Is certification desirable as a policy? If it is desirable, what kind of qualifications should there be? Who should be the judges?

Some kind of certification is advisable so that the right kind of service be given a community and that the public be protected against inefficiency and lack of knowledge. So far there has been no satisfactory alternative. "Civil Service" has not worked out, neither has the individualistic method of letting each library look after itself in cases where the library boards are not competent. Certification would see that the right person—the library school graduate—is in the

higher positions, the less highly trained persons in the lower places. Many other professions—lawyers, doctors, teachers—are certified so that the public may be protected. Certification is not merely a library policy.

"Librarians must be the judges," Mr. Root concluded. "There must be no chance for interference by politicians. The librarian must decide upon the professional qualifications. The whole scheme must be worked out by librarians."

Mr. Dana prefaced his talk by saying that as certification is, in his opinion, sure to come, he is doubtful whether it is worth while to spend time and energy in opposing it. The country is drifting toward socialism. The tendency of all of us (and this seems particularly to include librarians) is to put more and more faith in government and government activities—and this is plain state socialism.

Dr. Root says that librarians must see to it that the public is protected against incompetence in library staffs, implying that poorly equipped library workers have already done the public harm and will do it more if they—the poorly equipped workers—are not eliminated.

"But," said Mr. Dana, "how does that protection of the public work in the classical instance, that of the doctors? They have very rigid laws forbidding persons to practice medicine unless they are fully qualified, and in spite of these rigid laws they have been obliged to admit to their ranks the homeopathist, osteopathist, the mind healer, the chiropractor and others, to say nothing of those silent practitioners of patent medicines that are found in the countless bottles on the druggist's shelves.

"Now, as a matter of fact, the best protector of the public is the public itself, which can learn to stand on its own feet only by practicing the art of standing.

"It is true that many practitioners of professions and technical trades are now more or less safeguarded by state legislation; but let us not look so closely at these facts as to forget that the really important things of the world, like the management of great industries, that have been done and are now being done, are done by persons who were never certificated. That is to say, the world goes on and gets more skilled and more productive and a more agreeable place to live in, all at the hands of non-certificated brains!

"How is this certification to be managed? By politicians, of course. The new certification boards, no matter how carefully they may be safeguarded at first, will inevitably drift into politics and the office holders of the State will take from librarians the control of their own self-certification.

::

Lansing, Mich.

"And how have libraries got on these forty-odd years without being certificated? Very well indeed, as we are very proud of proclaiming. And what evidence have we that an outside body, not in touch with library work, will by any hocus-pocus of legislation make workers in libraries better qualified to develop the library institution than those who have developed it for forty years?"

"Remember another thing, and most important it is, that librarians have at present their salaries, their reputation, their standing in their respective communities all at stake in the work they do. Only if and when they conduct their libraries well do they succeed, and only by their success do they advance. But if now you take from the librarian the responsibility of running well his own library, of selecting wisely his own assistants, you straightway rob him of his greatest incentive to do well."

Going on, Mr. Dana called attention to the fact that the library workers of this country form a small and weak group. They have not been able, in spite of their efforts, to keep up with the output of print; and it is probably safe to say that libraries to-day have a relatively smaller influence on the quality of all the reading that is done in this country than they had a few years ago. To hold their present position, to gain a better one, they must make themselves felt in their respective communities as institutions of value. To do this they must keep pace with the changes in modern American life; and must keep wide awake, must have original ideas, must study them and apply the good ones, and continuously advance. But, note now, that the whole standardization and certification scheme is a scheme which, by its very essence, will tend to keep out of the library profession new ideas and to keep the work of library management in the old ruts. We need not the conventional librarian. Of him we have a plenty. We need the unconventional, the kind of librarian who originates, and tests out new plans; and the certification scheme is certainly sure to be a barrier to him and to originating and to testing of the candidate and which require library school or college and library school graduation—such as bibliographical work, book selection, cataloging, reference work.

In the discussion that followed it became evident that any compulsory certification scheme would be unwise; that if libraries cannot get assistants now because of lack of funds certification would not relieve the situation; and that certification would not help out in the matter of personal qualifications of assistants, qualifications which were most important in library work.

Miss Parsons moved that the Association go on record as against the certification plan. This was amended by Mr. Dana who moved that the Association go on record as opposed to compulsory certification. This was unanimously carried.

Miss Askew spoke of the untrained librarian of the small library and the untrained worker and of their need of a recognized certificate for summer school and short library courses. At present no matter how many of these courses the untrained librarian may take, she receives no credit. Miss Askew, therefore, moved that a committee be appointed to ask the library schools and the A. L. A. to co-operate in giving credit for summer school and other short courses in library economy. This motion was seconded and unanimously carried. Miss Winser appointed Miss Askew, Miss Pratt, Miss Parsons and Miss Van Dyne to serve on this committee.

ADELINE T. DAVIDSON, *Secretary*.

At a joint meeting of the Pennsylvania, New Jersey groups on Saturday evening, Mr. La Monte, vice-president of the New Jersey Association, and chairman of the meeting spoke on "The Will to Peace." Mr. La Monte recalled Kipling's "Recessional," Wilfred Owen's, "Parable of the Young Men and the Old Men," as poems which had given us a lasting message of war. But with war over we should now turn our minds from it towards lasting peace. The conference at Washington accomplished many things in this direction, and, it is for all of us to help to make this ideal become a reality.

Following, Joseph W. Lippincott, vice-president of the J. B. Lippincott Company, addressed the gathering on "Truth in Literature." Mr. Lippincott reviewed some of the reasons underlying distortion of fact, especially in contemporary literature and concluded by saying that what is needed to guide the reader to truth in literature is sane, accurate, trustworthy advertising description in every case. There would be less labor, less waste, less crowding. The "pot boiler" would disappear. The price of a good book would come down because its sale would be larger than now and its advertising less costly. The libraries may in time become the impartial judges between good and bad literature. Already they are doing a great deal in this direction. They can do more. They are in a strategic position, with no ax to grind, no entangling alliances, the best advisory talent at their disposal, and the general public behind them. What is more logical than more and more reliance on their guidance while that guidance continues to be good?

A Good Turn for The Library Journal

In the Library Journal year after year
appear the announcements of the business
friends of the library profession. Most
publishers know and appreciate the lib-
rary as the outpost of the publishing busi-
ness, and manufacturers of supplies are
keen to have the good will of all librarians.

If you feel disposed to do a good turn
for the Library Journal, tell the people
with whom you deal that you are glad to
see their announcements in the magazine.
If you know of others whose work would
seem to justify some expenditure for ad-
vertising, send us their names and we will
try to suggest a plan of campaign that
might be helpful.

This is the kind of friendly, practical
interest that contributes most directly to
the continued growth of the Library
Journal.

(b) Any librarian or library assistant having a salary of \$1500 or less; and

(c) All duplicate copies ordered by any library, whether for the use of trustees or staff members.

Special Research in Present-Day Problems

A TYPE of popular book has made its appearance within the last few years that might be said to be a new development in American publishing. Special social studies, and special researches in the field of economics, have long been pursued, but the resultant publications were intended mainly for specialists or students.

Of late the general state of industrial relations, class antagonisms, and the various dislocations caused by the war, have literally forced thinking and reading upon the part of large numbers of persons who previously had but a vague idea of "problems." Through this welter of conflicting desires and needs was afforded the opportunity for specious pleading and propaganda of many sorts, bringing to light an array of publications in which data have been marshalled to parade favored theories.

But the call is becoming more insistent for facts and figures without distortion or embellishment. The public thirst for exact knowledge seems to be growing. In some cases funds have been provided making possible wide and thorough surveys by a number of painstaking men, who are able to eliminate extraneous matter and produce a book "all meat," such as "Income in the United States," (*Harcourt*). A wide examination of new titles has its rewards, for frequently in unaccustomed places is discovered much of specific value in throwing light on the present state of affairs. To cite but one example, there is the book by Ingalls on "Wealth and Income of the American People," which, while frankly championing the status-quo-ante point of view, contains much valuable material. In other fields the range of good work is constantly widening.

The growth of the desire for sound information is of pleasing import for librarians, who, quite as well as anyone, must like to see Truth stalking through the pages of unpretentious books and pamphlets.

The Publishers

COMPTON'S PICTURED ENCYCLOPEDIA

A New Achievement of Great Educators

Written Especially for Children

THE inspiring character of modern teaching methods sends children more often than ever before to the public library for information on subjects suggested in the classroom.

The librarian knows to how small an extent the encyclopedias of the past have met the needs of children. In most cases the volumes have been so large, so grim and uninviting, and so difficult to understand that their presence rather multiplied than answered the child's questions. And so every librarian realizes how valuable to the Children's Room would be the right kind of encyclopedia that children could really use and would actually want to use.

To build an encyclopedia that children would be glad to come to again and again was the one purpose of the great educators who planned and directed Compton's Pictured Encyclopedia. Unlimited means were placed at their disposal. Three years ago the task was begun; today it is finished—an entirely new kind of encyclopedia, one of the greatest publishing ventures ever launched.

Write for Free Sample Pages of this First Encyclopedia of the New Age

A postcard to the publisher will bring 100 sample pages so that you may judge for yourself the significance of this new work. It is impossible here for us to do more than suggest in the vaguest terms a few of the distinctive features of the books.

THE INDEX is one of the most striking features of the new work. The editors decided to give the Index somewhat the character of a dictionary which should contain pronunciations of unusual words, short biographical, geographical, and historical summaries and countless other informative details, all in the interest of saving time and trouble. This treatment makes readily accessible every detail of information in the whole work, whether in the text or pictures. It made it possible for us to eliminate useless repetitions of the same material under different headings and to include all organized knowledge in eight compact volumes.

Up-to-Date —Every word written since the World War. New point of view, new maps, new inventions, etc. Not one page is a "revision" of an older work.

Really Pictured —Thousands of Pictures chosen from over half a million, 99 per cent of which are halftones. It is the only encyclopedia in which half-tone illustrations are inserted directly in the text they illustrate. There is a picture for every idea that needs a picture, and every detail of every picture is clearly explained and emphasized in caption and legend. Many pages in color.

Easy to Read —Every page is printed in large, clean-cut type on specially prepared paper stock, absolutely free from glare. Subject headings stand out prominently; page guides make reference easy. Bound to withstand hardest usage.

Intensely Interesting —The text is composed in clear, vivid style which brings the very heart of each subject into brilliant relief to catch and hold the attention of the reader.

EDITORS

Following is a partial list of editors of *Compton's Pictured Encyclopedia*. Every editor of this great work gave his time as well as his name to it. The list below is a guarantee of the accuracy and the scholarship of this work, the result of three years' continuous effort.

Editor-in-Chief

GUY STANTON FORD, A.M., Ph.D.
Dean of the Graduate School,
University of Minnesota.

Managing Editor

SAMUEL BANNISTER HARDING,

A New Kind of INDEX!

It is one of the new developments in

COMPTON'S PICTURED ENCYCLOPEDIA

A new kind of reference work, designed to be minutely accurate and yet intensely interesting and thoroughly usable in the hands of children. . . . One of the most significant developments in this wholly distinctive work is the Fact—Index, which occupies over 300 pages in the last volume, and is, in itself, a miniature work of reference. Typical entries are given on the opposite page and are here explained.

Afghanistan Notice that it is immediately identified. The busy reader seeking only a tabloid summary need go no farther. Salient facts are given in this manner for nearly every important entry. If additional information, map or picture, is wanted, the figures in black face type refer the reader at once to the exact page.

Baalbek In addition to the immense number of strictly indexed entries, there are thousands of additional Fact-entries—like Baalbek, Babington, Balaam, Banquo, Bardell which one would not expect to find in a work of this scope. They carry no page numbers because they are only briefly treated in the Index. All the necessary information in each case is condensed into a few concise phrases, thus saving the time of the busy reader. By treating only in the Index all material to which the child—or the older reader—seldom, if ever, refers, we have made a children's reference work *complete* in eight volumes; and we have been able to maintain on every page that keen interest which is so vitally necessary in such a work. With this new idea in index-making, it was possible, also, to include *every item* of essential fact and information, many of which can be found in no other work.

Balloons All types of balloons are treated in the main article, *Balloons*, pages 310-320. But all material has been indexed, also under all the headings under which it is likely to be sought. For example, Zeppelin, Dirigible, Sausage Balloon, etc., have each a separate entry. A further example: *Electrical Motors* has been indexed also under *Motors, Electrical*.

China In this comprehensive outline, every article relative to China is indexed, no matter on what page it occurs in the encyclopedia. Thus the Great Wall is treated only once, but it is indexed under *Great Wall* and under *China*, also. In this way practically all repetition of the same material under different headings has been eliminated.

Electricity With a complete summary like this, there is no need for the child—or the older reader—to consult article after article before finding the special bit of information he wants. We have obviated a difficulty that is overwhelming to the youngster. He can find the *exact page* at a glance.

Vitamins One of many subjects which you will have difficulty in finding in any other encyclopedia. . . . Populations are those reported in the census of 1920. . . . All maps are those of a remade world. Pronunciations are given for all words that present difficulties, and a simple key is given at the bottom of each page. Not one page is a "revision" of a preceding work. But most important—this work is an entirely new kind of encyclopedia.

Typical Excerpts from the Index

Afghan greyhound, picture, 1022.
Afghanistan (*af-gan-i-stan'*), mountainous inland country of Asia between India and Persia; pop. 6,400,000; nearly as large as Texas; 31, maps, 31, 232-3; ancient trade route, 1751; Khyber Pass, 31, 1744; people, picture, 1748.
Afghan Wars, 31, 3027.
Baalbek (*bal-bek'*), Syria. Village 35 mi. n.w. of Damascus, famous for splendid Rom. ruins; once finest of Syrian cities; called Heliopolis by Greeks.
Bab'ington, Anthony (1561-86), page to Mary, Queen of Scots; executed for conspiracy to murder Elizabeth, 2158.
Balaam (*ba'lam*). Prophet disobedient to divine command until miraculously rebuked by his ass; compelled against his will (Num. xx-xxiv) to bless Israel.
Balloon, 310-20; dirigibles, 313-6; early types, 310-2; helium, 320, 1629; highest ascents, 52, picture, 51; hydrogen, 312, 320, 1710; parachute, 2674; "sausage" or "kite," 316, 320; use in meteorology, 3708, pictures, 3709, 314; use in warfare, 314, 316-7, 2422-3, picture, 3792.
Banquo (*ban'koo*). Scotch thane in Shakespeare's 'Macbeth' murdered by Macbeth; his ghost appears to his murderer at a royal feast.
Bardell, Mrs. Widow in Dickens' 'Pickwick Papers', plaintiff in case of Bardell v. Pickwick; teaches Mr. Pickwick to "beware of vidders."
China, country on e. coast of Asia; 4,277,000 sq. mi.; pop. 362,000,000; 739-49, maps, 740, 232-3; story, 'Wung Foo's Busy Day', 749-52, Study Outline, 0000. Art, 744, 1140, 1145-6, 1168, 1954, 2881-3; average income, 233; child life, 749-52; costume, 749-50, pictures, 744, 750; education, 639, 2708, pictures, 746, 3139; emigration, 639 (see also under Chinese); etiquette, 742; festivals, 751, 742, 2478, 2479, 1931, 3234; flag, 749; foot-binding, 742; foreign interests in, 748, 3195-6, 1678-9, 232; ginseng in medicine, 1460-1; Great Wall, 744-5, map, 740, picture, 741; kite-flying, 1931, 742; language, 744, 2771, 2772; opium, 2585; piracy, 2810; population, 740, 742, 749, 230, 2286, map, 232-3; religions, 744, 2993-4, 525, 639, picture, 638; Rockefeller Medical Commission, 3034; river-dwellers, 230, 751, 639, 1679, picture, 229; transportation, 749, 3827, 638, pictures, 638, 3525; treaty ports, 746; wells, 3702; writing, 744, 1871, 3816.
Geography and industries: agriculture, 744, 230; bamboo, 323-4; chief cities, 638-9, 1319-20, 1574-5, 1678-9, 2389, 2707-8, 3195, 3498; climate, 740; deserts, 228; fisheries, 749, 151, 1286; foreign commerce, 744, 746, 639, 1320, 1678, 2708, 3195, 3496, 3498; lacquer, 1954; loess soil, 3273, 3750; manufactures, 1575, 1679, 1954, 2389, 2903, 3079, 3195, 3498; minerals,

744, 814, 1575, 1868, 3195; pearl industry, 3234-5, 2365, 2366, 2380, rice, 3013, 3015; rivers and canals, 740, 749, 230, 1706, 3827, 625; silk industry, 3234-5, 2365, 2366, 2389, 3195, 3196; surface features, 739-40, 1706, map, 232-3; tea, 3445-51; vegetation, map, 232-3.
History and government, 745-6, 748, 749; early civilization, 232, 3730, 1780, 1552; Confucius, 858; conquered by Mongols, 2285; Marco Polo's visit, 2874; Manchu dynasty founded, 2134; Opium War, 2585, 1679; Treaty Ports opened, 746, 3498; Taiping rebellion, 749, 1489; war with Japan, 1869-70; German acquisitions, 3195; "open door" policy, 3606; Russian and Japanese occupation, 3098; Revolution of 1912, 2389; woman suffrage adopted, 3779; relations with U.S., 748, 1611, 3746; World War and Shantung question, 3796, 3812, 3195, 1870. See also in Index Manchuria; Mongolia; Shantung; Tibet; Turkestan; and names of chief rivers and cities.
Dirigible Balloons, 313.
Electricity, 1108-22, Study Outlines, 4028-30; ammeters, 1113, 1114, 1393; carried by radium rays, 2960; conductors, 3757-8, 1110, 3242, 881; direct and alternating current, 1114, 1052, 1125, 3371; electromagnetic induction, 1050, 1121, 1224, pictures, 1051; electromagnets, 1113, 2121-3, 1121, 1224; electron theory, 1112, 256-7; electrostatic machines, 1112, 1117; Franklin theory, 1112; fuses, 1114; galvanometers, 1112, 1392; generated by cells, 1113, 1120, 1112, picture, 1109; generated by dynamos, 1050-2; history ('The Men Who Discovered Electricity's Secrets'), 1117-22; hydroelectric generation, 3694-5, 2502, 3697; induction coils and transformers, 3523-4; insulators, 1110, 816, 1554, 2219, 3071, 3758; lightning, 2006-7, 1118; long distance transmission, 3371, 1125; measurement of current, 1113, 1114, 1116; motors, 1124-5; Niagara output, 2502, picture, 3695; origin of name, 106; oscillating current, 1114; positive and negative, 1110, 1112; "static" and "current," 1110; storage batteries, 3361-2; thermocouples, 1113; transmitting properties of crystals, 935; volts and voltage, 1116, 1110; X-rays, 3824.
Electric motor, 1124-5; battleship propulsion, 2428; street railways, 3370-2.
Great Wall of China, 744-5, map, 740, picture, 741.
Motors, Electric, 1124-5; "A.C." and "D.C." types, 1125.
"Sausage," or kite balloons, 316, 320, picture, 317.
Vitamins (*vi'ta-minz*), several chemical substances needed in minute quantities in diet, 3651-2, 1010; chemical action unknown, 1320; in butterfat, 544; in milk, 2239; in rice, 3015.
Zep'elin, Ger. type of rigid dirigible balloon, 313-4, 316.

COMPTON'S PICTURED ENCYCLOPEDIA

We want the judgment of librarians. Because you know the everyday needs and wants of young people, you will judge these books as they should be judged—by new standards of usability, accuracy and interest, with the real needs of the child ever in mind.

Up-to-date

Every word written since the World War—new in text and treatment.

Headings

That catch the interest and lead into the article.

Tabloid Information

Whole subjects epitomized.

Pictures

That convey essential ideas; unnecessary parts removed. Thousands of pictures, one for every idea that needs a picture, 99% of which are in half-tone or color. Pictures incorporated with the text—right where they belong. Special caption above and legend below make each picture tell its full story.

New Maps

Every one made since the World War.

Comprehensive

All organized knowledge included.

Guide Posts

That indicate contents of every page.

Text

Composed in clear, vivid style. Interesting but not "written down" to the child.

Properly Proportioned

With the needs of the child ever in mind.

Edited

By scholars of international reputation.

Well Organized

Alphabetically arranged—pictures right with the text—no duplication.

American

Prepared in America for American children.

is AMERICA'S NEWEST ENCYCLOPEDIA!

A. L. A. READING COURSES are a new venture in A. L. A. publishing. They are more than reading lists. Each one describes briefly a comprehensive course of study and prescribes the books that one should read, and the order in which one should read them. A. L. A. Reading Courses are for ambitious people who want to increase their proficiency by systematic study or train themselves from the beginning along some new line. They have been prepared by university professors who are constantly having to give just this sort of advice to young men and women.

THE courses are thoroughly practical in character and are well suited to the needs of readers in even the smallest libraries. A supply of these leaflets will enable a busy librarian to give expert advice on the subjects covered, and will save her much time-consuming research. Advertise the fact that the library has these courses and will gladly give them to any one on request. The two courses published so far, on accounting and on journalism, are only a beginning; others on cultural as well as professional and technical lines are in view.

A. L. A. READING COURSE ON JOURNALISM, planned by the head of a well-known school of journalism in a large university, prescribes ten books in the order in which they should be studied. A 4-page leaflet, size 3- $\frac{3}{4}$ by 7- $\frac{1}{4}$. Prices: 12 copies for 25c (in stamps); 100 for \$1.00; 1,000 for \$9.00.

A. L. A. READING COURSE ON ACCOUNTING, prepared by a professor of accounting in a university, outlines the study necessary to become a public accountant and describes eight books as essential. An 8 page booklet, size 3- $\frac{3}{4}$ by 7- $\frac{1}{4}$. Prices: 8 copies for 25c (in stamps); 100 for \$1.75; 1,000 for \$16.00.

A NATURALIST IN THE GREAT LAKES REGION

By Elliot R. Downing

An interesting account by an eminent naturalist of the flora and fauna of the Great Lakes region together with descriptions of the geological and physiographic factors which have affected the distribution of plants and animals. A splendid volume for the student and lover of the out-of-doors. Pocket size, limp binding, illustrated. \$3.50, postpaid \$3.70

THROUGH THREE CENTURIES

By Jesse L. Rosenberger

A series of connected life-stories tracing through successive generations changes and developments from early Puritan days to the present time. The narrative includes many references to historical events, local customs, some phases of religious history, and educational developments. Earnest and adventurous spirits are seen taking their part in the establishment of settlements, in the founding of institutions, and in many other ways contributing to human progress and welfare. Cloth, \$2.50, postpaid \$2.65

INDUSTRIAL SOCIETY

By Leon C. Marshall

This volume first traces the evolution of industry, preparing the way for an understanding of the characteristics of modern industrial society, which is analyzed in terms of the structure and functions of each part of this intricate organization. A complete economic interpretation of modern industrial society. Cloth, \$4.50, postpaid \$4.75

THE FIRST THOROUGH STUDY IN ITS FIELD

CRIMINAL JUSTICE IN CLEVELAND

The report of the Cleveland Foundation's survey of criminal justice, directed by Roscoe Pound and Felix Frankfurter.

Conditions typical of large American cities were found by the directors and a staff of specialists of their study of methods and organization of the police department, criminal courts and correctional institutions. Many of their recommendations are of universal application to American urban life.

Sections of the report are:—

1. POLICE ADMINISTRATION. By Raymond B. Fosdick.
2. THE CRIMINAL COURTS. By Reginald Heber Smith and Herbert B. Ehrmann, both of the Boston Bar.
3. PROSECUTION. By Alfred Bettman, formerly city solicitor of Cincinnati.
4. CORRECTIONAL AND PENAL TREATMENT. By Burdette G. Lewis, state commissioner of institutions and agencies in New Jersey.
5. MEDICAL SCIENCE AND CRIMINAL JUSTICE. By Dr. Herman M. Adler, state criminologist of Illinois.
6. NEWSPAPERS AND CRIMINAL JUSTICE. By M. K. Wischart, newspaper and magazine writer.
7. LEGAL EDUCATION IN CLEVELAND. By Albert M. Kales of the Chicago Bar.
8. CRIMINAL JUSTICE IN THE AMERICAN CITY. By Roscoe Pound.

700 pages, 60 tables, 17 diagrams; cloth.....\$3.75

Prices of separate sections, paper bound: 1, 2, 3 & 8, \$1; 4 & 5, 50 cents; 7, 25 cents

LIBRARIANS, WHEN YOU VISIT ANN ARBOR NOTE THE SNEAD STANDARD STACK AND CARRELLS INSTALLATION

A view showing an intermediate tier of SNEAD STANDARD STACKS and CARRELLS or private study spaces incorporated in the Main Stack.

The advantage of providing study spaces in the stacks is obvious. This feature of the stack construction has in late years been developed to a high degree.

The University of Michigan installation represents one of the most modern methods of providing a convenient and sufficiently private space for students.

Universities and colleges are realizing the useful and serviceable feature of this arrangement.

Long experience in equipping libraries of all sizes has given our experts a fund of valuable information on Library construction and arrangement, which is available without charge or obligation to the Library Officials and Architects.

Detailed plans and descriptions of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific library construction.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JUNE 1, 1922

The Detroit Meeting

The American Library Association Conference

By AZARIAH SMITH ROOT,

Librarian of Oberlin College and President of the A. L. A.

IN planning the program of the coming meeting of the American Library Association the Program Committee has aimed to make each of the general sessions center about some one problem which the libraries and the Association now face. Thus the first session discusses the question of the policy to be adopted by the American Library Association in issuing publications. The reorganization of a year ago placed the responsibility for publications in the hands of an Editorial Committee which, in turn, is subject to the action of the Executive Board. The new Committee has now had one year's experience and will make its first report at the coming meeting. This seems, therefore, an opportune time to discuss the whole question. The Chairman of the Editorial Committee will state the policy of the present Committee, this will be followed by an address on "Needs not yet fulfilled," and then speakers representing some of the groups making up the Association will discuss the question from the points of view of special libraries, school libraries, college libraries, reference libraries and public libraries. There will then be opportunity for general discussion so that any particular group which has not been heard will have opportunity to express itself. As a result of this discussion it is hoped that the Editorial Committee will be brought in close touch with the wishes and desires of the American Library Association, and that hereafter they will be able to secure the sort of publications that the Association feels are needed.

This is the general outline for all the other sessions. The topic of the third session is the problem of recruiting the right sort of workers. The fourth session discusses how to bring the libraries more in touch with the public so that they may be a more potent force in the life of the community. The last session discusses the responsibilities of the individual librarian to his

profession. At all these sessions it is hoped there may be much general discussion and the desire is that there shall be perfect freedom of discussion and plenty of it. Only as the result of such discussion to determine what is next can the American Library Association make very much progress.

One very great improvement over previous conventions could be made provided the co-operation of the membership of the American Library Association can be obtained. There has developed in recent conventions a tendency to begin the sessions very much later than the time which is announced. This has been so marked that this year a proposition was seriously presented to schedule certain other meetings beginning one-quarter of an hour before the time announced for the general session and ending one-half an hour after the announced time and these were strongly advocated on the ground that the general session would not begin until at least one-half an hour after it was announced. The President intends to be in the chair promptly and to begin the general sessions on time PROVIDED there are enough members present so as to make it possible to begin. Can we not all make a great gain here? The President hopes, also, that this practice may prevail in the numerous section and round-table meetings.

Much time and thought have been spent in an endeavor to solve the increasing problems presented by the large numbers of sectional groups which must meet at the same time, as a rule. At Detroit there will have to be eight of these at nearly every scheduled period. The proposal has been advanced and has been carefully canvassed to divide these periods into two periods of one hour each so that only four groups may be in session at a time. The conclusion has, however, been reached that this is not time enough for a section meeting with discussion; especially in view of the delay in be-

gining which has hitherto occurred. The attempt has been made however to arrange the sectional meetings so as to produce as few conflicts as possible; that is, not to put two or three sessions at the same time at which the same group of individuals will wish to be present. The diversities of library work are so great that

it is quite probable that there will be many such conflicts, in spite of the effort which has been made to avoid them. I hope we shall have a very large attendance, a prompt beginning of each session at the time scheduled and very full and free discussion on every problem which is before the Association.

Problems of Commission Officers and Governors

By WILLIAM R. WATSON, President, League of Library Commissions

THE special significance of the meeting on June 28 of members of state library commissions and corresponding agencies is that it brings together for the first time these public representatives of library interests. There have been meetings of library trustees in connection with both state and national conferences but there has never been a special meeting of the state officials who are members of the boards having control and supervision of the library extension work of the various states.

The promotion and welfare of library interests depend very largely upon the commission, or corresponding body, which is the official agency created and authorized by law to supervise library activities within the state, and charged with the responsibility of promoting fundamental conditions favorable to library development. No other organization so closely touches the library interests of a state, or has

so great an opportunity to help or to hamper library development.

In some instances the commission has not the requisite authority to establish and enforce standards of any kind, and usually the appropriations for the work are far too meager to permit of doing what might otherwise be done, and what ought to be done, to assist communities to improve their library conditions.

The commission ought to be the most important and influential library agency of the state, fortified with funds sufficient to permit it to attract to its staff the best talent available and to develop and carry out fully the work which naturally pertains to it. At present this is rarely the case and it is with the hope that something can be done to place commission work on a broader and better basis that this meeting of commission governors has been called.

The Idea Behind the S. L. A. Program

By DORSEY W. HYDE, JR., President

THE principal object of the program of the Thirteenth Annual Convention of the Special Libraries Association is to emphasize the importance of the librarian *per se* in special library work. Past conventions have stressed the importance of organization and the manifold aspects of library service. But, after all, library success and library failure must largely depend upon the character, training and objective of the special librarian and the way in which he applies his abilities in the conduct of his work.

The program will be divided into three main divisions, each with a general and special session. The first division will consider, in particular, the personal qualifications for success in special library endeavor. As implied by his title, the special librarian must be something of a specialist in his chosen field; he must know his sources of information; he must keep in touch with all new developments, and he

must have an intelligent appreciation of all important issues involved. Finally, he must have the crusader's spirit, to introduce new ideas and new methods and to be ready to demonstrate their value and importance to the users of library service.

The importance of adequate professional training is disputed by no one and this need is particularly acute as regards new and rapidly developing professions. Special librarians feel the need for better training, both as to facilities and methods, and they desire that their special needs be known and provided for in such future plans for library training as may be decided upon.

Special library service differs from other branches of professional library work in that the economic value of such activity must be more directly and more continuously demonstrated. But the special librarian does not permit this fact to dim the brilliance of his ideals

of constructive service to science or commerce or industry. Encouraged in his endeavors by far-sighted business men, engineers, scientists and officials, the special librarian is working for more efficient methods in the conduct of business and government and for better and

higher standards of commercial integrity. It is the special librarian's faith, and his belief, that the realization of these objectives will result in a more prosperous and a better community and national life for every citizen of America.

The N. E. A. Library Department's Boston Meeting

By SHERMAN WILLIAMS, President

THE program of the library department of the National Education Association should mean to its members that the library movement is a unit, it is not merely school libraries, or public libraries, or special libraries. It is not for classes, but for every one, and it should reach every one, so at the outset we are to consider the matter of securing adequate library service where it does not yet exist. There are millions of people in our country who do not have access to any free library.

Rural school libraries are to be thoroly discussed. We are to consider what our public libraries may do for our foreign born citizens, a matter that in most places has not received any serious thought. Also the old but still only partially solved problem of the question of proper co-operation between the schools and the public libraries.

The training of school librarians, a very greatly needed work, will be well discussed. Another important and but little considered matter is the work that the normal schools should do in the way of training their students and prospective teachers, not to become librarians but to know enough about the books that children should read so that they will be able to render important service to their pupils in the matter of forming right reading habits.

There is to be a paper on the stimulation of home reading, and several on allied subjects, which as yet have not generally received proper attention. One of the ablest and most successful school librarians in the country will show what the students in our schools may do to make the school library a success. There will be other valuable and popular papers.

It is believed that there is no other work that the school can do comparable in importance with that of training its pupils to acquire the habit of reading that which is worth while, and of also training them before leaving school to make use of the public library so that when they leave school their education may be continued thru the use of the public library which, properly equipped and managed, is a very important continuation school, one that can reach

more people and reach them more effectually than any other agency, the most effective continuation school that exists, or that is likely to exist.

Most children leave school so early that their education is very meager and if they are ever to acquire a worth while education it must be thru after school efforts and in this work the library is invaluable. It should be an institution for the many, not for the few.

It is believed that our program covers the general library fields so thoroly that it will hardly be possible for any one to attend the meetings without being stimulated to do more and better work, and being led as never before to appreciate the importance and wide-spread influence of properly conducted library work.

Relief for Russian Librarians

THE following contributions have been received toward the relief food parcels already transmitted thru The American Relief Administration, 42 Broadway, New York, relief order to Mme Haffkin Hamburger in Moscow, for the benefit of Russian librarians, in accordance with her letter printed in the LIBRARY JOURNAL for April 15 (p. 358): R. R. Bowker, \$20; Agnes Cowing, Brooklyn, \$10; Alice J. Haines, California State Library, \$10; Mary E. Marks, Laramie, Wyo., \$10; L. M. Shaw, Providence, R. I., \$10.

The New York Special Libraries Association has provided independently for \$50 worth of like relief.

With the co-operation of the Portland Public Library, the *Oregonian* will include bed-time stories for children as a free feature of its radio service. The stories will be told by specialists who are chosen from the juvenile department of the library. The first of the stories was sent out on May 8th.

In the April *American Magazine of Art* is an illustrated article on Gari Melchers' Mural Paintings for the Detroit Public Library, by Charles Moore.

The Polish Immigrant and the Library*

By ELEANOR E. LEDBETTER

Librarian, Broadway Branch, Cleveland Public Library.

BECAUSE the Polish immigrant is shy and timid, the easiest way to introduce him to the library is in a group of his own sort. The most ideal introduction is that of a night school class brought by an interested teacher who permits his name to be used as reference in the library registration and who assists in the first choice of books. In Cleveland this was done voluntarily for years by interested teachers who gave up a free evening for the purpose; later the Board of Education, convinced of its value, gave permission for one regular evening of each term to be so spent. The teacher's signature must be used for reference and identification only, as it is obvious that he cannot assume financial responsibility for all his pupils. The risk involved is slight, as night school classes are made up for the most part of serious

and responsible men, anxious for advancement and sensible of obligation. The library rules should be explained in Polish in order to make sure of complete understanding, red tape should be reduced to a minimum and the rules so adjusted that books may be drawn that very evening. The chances are that every member of the class will take an English book for study and a Polish book for recreational reading, and that a large proportion of the class will come regularly on the same evening of the week for months following.

*This is the fifth in a series of articles being furnished by the A. L. A. Committee on Work with the Foreign Born. It will be followed by an article on library work with immigrants of the Greek race.

Prof. Thomas Siemiradski, the well known Polish writer, says in the *Wiadomosci Codzienne* (*Polish Daily News*) Cleveland:

"In the January 15th number of the LIBRARY JOURNAL we find a very well written and sympathetic article from the pen of Mrs. E. Ledbetter under the title: The Polish Immigrant and the Library. The author begins with the statement that the Poles are the best known of the Slavic nations. She refers to various events in the annals of Poland in such a way as to interest all intelligent Americans in Poland and its people; citing various popular books about Poland in the English language.

"We are especially struck with the fact that the author knows writings as obscure as 'The Litany of the Polish Pilgrim,' by Michkiewicz. One who knows this indeed understands Poland's place in the family of nations. Mrs. Ledbetter knows also of our colonies in America, and that the Poles in America are divided into two political camps. She even knows how to call them by name. She actually knows of the existence of the Polish National Alliance and of the National Defence Committee. She speaks of them both impartially and with entire neutrality.

"The object of the article is to give advice and aid to librarians who wish to know how to treat the shy, newly arrived Polish immigrant in order to bring him into touch with the largest fountain of knowledge and culture, which exists in the public library in America. She places special importance upon the courtesy and politeness which are the expression of true kindness.

"In the difficult matter of Polish names, she gives good advice: Remember that Polish names are more easily pronounced than they appear in writing. Do not irritate a new comer with a long and difficult name by asking sharply 'How do you spell it?' since no one likes that. Better ask him pleasantly to write it on a slip of paper."

The same method of group visiting and group registration may be carried thru with sodality, lodge, or other organization; but it is essential to secure preliminary assurance of leadership from some member who has used the library and who is willing to put his personal influence and some effort into rounding up the crowd for the visit. A written invitation from the librarian, presented formally at a regular meeting of the organization and there accepted formally, is a suitable and proper preliminary, and makes a better impression upon Polish susceptibilities than an informal, "Get your society to come." The natural dignity of the Polish character demands a certain formality of approach, and deficiency in that respect is often a cause of lack of response.

A Polish man who had grown up without educational opportunity was thoroly imbued with the idea of natural inferiority. In his own words, "I always thought I was a dumbhead." Drawn as experimental material into a demonstration class in the factory, it came to him as a great revelation that he too could learn. The whole world assumed a new aspect. He became a man instead of a creature. Working twelve hours a day, feeding a furnace which was "always hungry," on night shift alternate two weeks so that no regular classes were available to him, he engaged a private teacher who met him at the library and with whom he studied with the greatest diligence. His ambition grew by leaps and bounds and soon he engaged also a Polish teacher in order that he might be able to write back to the Old Country of the wonderful development which had come to him here—which was, after all, only that he had learned that he was as good as anyone else. We are apt to think of democracy as a leveling down process. To be a good democrat means to meet as equals

persons whom we might consider as beneath us; to the average immigrant it is a leveling up process; he has to learn to regard himself as the equal of those who he naturally would have regarded as his superiors. Until this sense of democracy is established, formality has a part to play. Informality is understood only between those who recognize each other as equals. But the formal invitation must not be relied upon to do all the work. It must be preceded by personal conversations with individuals who are interested, preferably with officers of the society, who will speak favorably when it is presented. Then when the group come, let them be received hospitably and given every possible attention. A special order of the day should sweep aside as far as possible all other work and free the library assistants for full attention to the new visitors. The regular public will be interested and will waive most of their own claims for the evening.

Such a visit may be arranged by any library as an exhibition of a civic institution and for this alone it is worth while; but it will not produce an appreciable increase of library circulation unless the library contains Polish books. These are needed by the Poles for the same reason that all immigrants need books in their own languages, viz. for recreational reading and for the fuller understanding of informational reading which is possible only where one fully comprehends every shade of meaning. For the Poles an additional most potent reason lies in the seemingly irrelevant fact that Germany and Russia designed the suppression of the Polish language. In Russian Poland Russian was the medium of instruction in the schools, and fines were imposed on any person guilty of teaching reading and writing without official authority—which meant, of course, guilty of teaching Polish; while in Poznan (German Poland), Polish was forbidden not only in the schools but even as a medium of religious instruction. (See Phillips, W. A. Poland. p. 166, 167, 196, 201ff.) Because the prohibited thing becomes by the very fact of prohibition, eminently desirable, these German and Russian prohibitions increased to the point of fanaticism the devotion of the Poles to their own tongue. A textbook of English "Przewodnik polsko-angielski," by Maryanski, shows the complex which has resulted from this attempted suppression in the following sentences in the introductory lesson:

"I am a Pole and I strongly desire that my children remain the same."

"I desire that my children may learn the English, but in the first place they must learn the Polish language, the language of my fathers and forefathers."

"Poland is your mother whom you ought to honor and love with heart and soul."

"By all means do not forget that you are a Pole and be proud of being a son of a country which was the emblem of heroism and freedom."

One need not be a psychoanalyst to see that the only way to overcome this feeling is to remove all opposition; to show the Pole that we respect his language, admire his literature, and regard sympathetically his devotion to it. The material advantage of English to himself and his children is so great that one need not fear an exclusive devotion to Polish beyond the time when generous treatment has removed this old world psychosis.

Moreover, Polish literature merits a place with other cultural literatures. Sienkiewicz may be read in the original to as great advantage as Coulevain or Galdós; and in Polish as in French and Spanish there is a volume of literature of superior quality which has never been translated into English and which is lost to our culture but still available to the Pole. The "Tales from the Polish" and "More Tales from the Polish," by Elsie M. Benecke, and the Polish selections in Selver's "Anthology of Modern Slavonic Literatures" give tantalizing glimpses of the character and quality of this literary field so little known. The Polish writer is a master of the word picture and in this art he has no match in American literature. Characteristic Polish fiction is largely historical and based upon the national history. Sienkiewicz is known to us in translation; Kraszewski is also a master of historical narrative, and wrote voluminously. "Quo Vadis" which introduced Sienkiewicz to the English reading public, is by Poles much less esteemed than his national romances. Undoubtedly the first Polish books for a library are the favorite trilogy "Ogniem i mieczem" (With Fire and Sword), "Potop" (The Deluge); and "Pan Wolodyowski" (Pan Michael). "Na Polu Chwały" (On the Field of Glory), "Krzyzacy" (The Knights of the Cross), and the short stories of the master may well come next; then a selection from Kraszewski: "Infantka," "Jaszko Orfanem," "Krzyzacy," "Pogrobek" are desirable, but any of his works are acceptable. Next I would choose some romances from Rodziewiczowna and Orzeszkowa, since these appeal especially to women. "Dewajtis," generally considered the best work of the former, is one of the most popular books in the library. The heroine, having spent most of her childhood in America, returns to Poland as a young woman, and the romance links the two countries together, and presents a picture of immigrant life. Other very popular books of fiction are: "Panienska," by Dmochowska; "Pod Prawem," by Konopicka; "Pani Walewska," by Gasiorowski; "Nad Niemnem," by Orzeszkowa; "Bluszcz," by Gawalewicz; "Chamska Dusza," by Przyborowski; "Gady,"

by Glinski; "Chlopi," by Reymont; "Faraon," by Glowacki; "Tredowata," by Radomska; "Car Widmo," by Gomulicki; "Pani El," by Walewska; "W Tysiac Lat," by Gruszecki; "Papioly," by Zeromski.

Pseudonyms are greatly used; J. J. Jez is the pen-name of Zygmunt Milkowski; Boleslaw Prus of Alexander Glowacki. Confusion is avoided by cataloging uniformly under the real name.

These writers belong to the generation now passing; some of the moderns, like Przybyszewski and Zeromski, show the influence of the Russian psychological school, and are not safely purchased without critical information. "Homo Sapiens," by the former, had never been criticised by any of our volunteer censors, but was found in translation to be a sex novel quite beyond the pale of "What Makes a Novel Immoral." A saving circumstance from the library point of view is that the psychological novel in general appeals only to the *intelligentia* who may be trusted to be their own moral guides. The humble man prefers the novel of action and incident, and the Polish standard is measured by Sienkiewicz, whose popular supremacy none can dispute.

The Bible is much called for, and will find use in even a small Polish collection. Dyniewicz's "History of the United States" is the only text available. A good history of Poland is by Lewinski, another by Limanowski; and the history of Polish literature by Chmielowski is recommended. The Pole is very fond of reading books of travel, and will use all the interesting books that can be furnished along that line. Lives of the saints are always in demand and the collection by Skarga, "Zywoty Swietych" is a popular addition to the library. Formerly an excellent edition in two volumes was available; one not so satisfactory is in twelve small volumes. "Winiac Liliowy" (The Wreath of Lilies) by Podbielski is also a religious book of great appeal.

Polish literature is rich in the cultural classes—poetry, essays, the drama; and the average Pole reads these more than the average American does works of the same quality; but the average immigrant does most of his reading for recreation and relaxation, and like his American brother wishes for this purpose a large proportion of fiction and romance.

At the present time the purchase of Polish books is largely a matter of taking what one can get, rather than of choosing what one would. During the war there was great destruction both of books and of facilities for printing; and the world paper shortage is not yet a memory in the Poland of the new era. The principal publishing firm in Warsaw, Gebethner and Wolff, are

still actually limiting the number of books to be sold to an individual; books are rationed there now as sugar was here during the war. The Polish Book Importing Co., 83 Second Avenue, New York, American representatives of all the leading publishers, are able to secure for America only meagre shipments which are snatched up almost before received. American publishers like Paryski, 1140 Nebraska Avenue, Toledo, Ohio and Dyniewicz, 1145 Noble Street, Chicago, have published many excellent titles, but unfortunately have used a grade of paper and binding so poor that their publications are practically useless for library use.

Tygodnik Ilustrowany, published by Gebethner and Wolff in Warsaw, at the present price of two thousand marks (about two dollars) a year, is an excellent illustrated weekly, well worth a subscription, tho not yet equal in appearance to its before-the-war style. Another desirable periodical is, *Swiat*, published in Warsaw. Some libraries could use a Warsaw daily for the fuller news it would bring. *Kurjer Warszawski* is recommended, and can be ordered thru Paluszek Brothers, Aeolian Building, New York.

The American Newspaper Annual lists seventeen daily, forty-eight weekly, and four monthly American publications in the Polish language. Many of their editors are very generous and will donate their papers to public libraries frequented by their people; in other cases the library may well pay for subscriptions in order to provide reading matter for possible patrons who otherwise get no return for their library tax. To develop the habit of coming to the library is an object worthy in itself.

Because of the indelibility of the impression left by language oppression, because also of the identification of language, nationality and religion, the Polish child reads Polish longer than the child of any other race does the language of his immigrant parents; but, at that, the second generation reverses the relationship of the languages in his reading. The immigrant reads English for education and information, Polish for relaxation and recreation; his child, on the contrary, reads English for relaxation and recreation, and Polish for culture and for its associations. Thus the Polish books in the library help to prevent the existence of the chasm which in other races too often develops between the immigrant parents and their American children.

A second and revised edition of Philena A. Dickey's "Suggestion for the Care and Use of Pamphlets and Clippings in Libraries" has been issued by the H. W. Wilson Company.

The Technique of Library Exhibits

By EUNICE WEAD

Curator of Rare Books, University of Michigan Library.

SINCE few modern libraries lack some sort of equipment for the display of rare and otherwise interesting material, a few practical suggestions as to the technique of installing such exhibits may not come amiss to those who have not had experience in this museum phase of library work. They are all the result of actual experiment in the new library of the University of Michigan, where the cases are set in the walls on three sides of the main entrance corridor. They thus present the problem of a vertical display, which is rather more difficult to arrange than one in which the objects to be shown may be spread out horizontally.

Each case has a solid cork background of natural color, and is equipped with adjustable glass shelves. As most of the cases are little more than nine inches in depth, it is necessary to show all except the smallest books in an upright position. Experience has taught us that altogether the most satisfactory material for tying open the pages of a book at the desired place, is mercerized crochet cotton, which may be bought for five cents a ball at the five-and-ten cent stores. One thickness of the cotton for each half of the book, tied in a hard knot, slipped out of sight behind the cover, is usually strong enough to restrain any but the most unruly pages, but if the book is unusually thick or large, two or three strands may be used. If care is taken to slip the cotton close to the edge of the printed text, and parallel to it, the strand is quite unnoticeable.

Frequently a book has so much "spring" in its binding, that it is difficult to keep it open, even after tying, without breaking its back. If the obvious device fails of putting weights in front of its open halves, a loop of crochet cotton may be passed thru the cord used to tie the pages open, and secured by thumb-tacks to the cork background. Occasionally a large volume requires stronger ties, when the narrowest width of white tape is found useful, or, if the library can afford to be sumptuous, white satin ribbon adds greatly to the effect. One library uses silk binding tape, such as is sold at the notion counter of a department store. Very seldom can these more expensive materials be used a second time, however, as they easily become soiled and mussed.

Weights which are inconspicuous and at the same time heavy enough to be useful, may be made of uniform blocks of lead linotype slugs

neatly covered with paper, or of shot sewed in long bags. For use in horizontal cases, strips of clear glass with ground edges are useful to lay along the margins of an open book, thus doing away with the necessity for tying it open.

Each case in which leather bindings are placed should have one or more sponge-cups kept constantly filled with water, so that evaporation will furnish sufficient moisture to keep the leather from drying.

Maps, photographs, broadsides, etc., are of course very easily shown in vertical cases, se-

THIS IS ONE PANEL OF THE INCUNABULA EXHIBIT, SHOWING METHODS FOR HOLDING THE BOOKS OPEN

cured to the cork background by thumb-tacks at corners and edges, taking care not to let the tack actually go thru the paper. For stiff mounts, Dennison's card-holders, no. 50, will be found useful, consisting of a strong little clip furnished with a sharp hook at the top, by which to suspend it.

The question of labels is an extremely important one. It is gratifying to find how much the average observer depends upon the information given him in a label, and every word of description is sure to be read by some one. Still, the labels must not be so long that they discourage the casual reader, and the lettering should be so displayed as to attract the eye. For single objects, labels typed in capitals on white cards have been found most satisfactory, and care should be taken to have the sentences short and simple, with a double space between them. A better effect is obtained if all superfluous edges, except appropriate margins, are trimmed away, and the cards placed close to the objects described, and not tacked in irregular patches of white against the darker background of the cases.

A large sign, describing the whole exhibit, is well placed on a movable bulletin board attached to a standard, such as in use in the corridor exhibits of the Library of Congress. For this, as well as for smaller signs describing the contents of single cases, we have adopted a good quality of brown wrapping-paper, cut to appropriate size, upon which are pasted the glossy black letters furnished in two sizes by the Tablet and Ticket Company. The brown paper blends harmoniously with the cork background, and the uniform letters are much neater in appearance than any but the most expert hand lettering.

It has been said that "perfection consists in trifles, but perfection is no trifle." This maxim may be aptly applied to the work of installing an exhibit. What may seem an absurd regard for the symmetry of the position of the thumb-tacks, for placing the labels parallel to the edge of the shelf, for tying the books open neatly and inconspicuously, and for balance in arrangement of shape and color, to insure a pleasing effect when seen from a distance—all these small details make the difference between an attractive exhibit and one which, in spite of the interest and value of its material, looks unkempt and amateurish. William Morris maintained that a book to be beautiful must be "architectural." This might also be said of an exhibit, whose parts should be carefully and harmoniously put together, with a nice regard for the proportion and symmetry of the whole.

Selection of material to exhibit depends,

naturally, upon what the library owns or can borrow, and upon the character of its constituents, whose interests may not only be met, but developed in unexpected directions. Subjects are readily suggested not only by the special collections or particular treasures which the library may wish to show, but also by anniversaries of events in local history, and of the birthdays of famous authors and public characters. A search thru the files of the LIBRARY JOURNAL for the past twenty years reveals the great variety of material with which the libraries of the country have filled their exhibit cases. Public interest is best sustained if there is variation in the type of successive exhibits, replacing, for instance, a display of title-pages, with one of colored plates, or with objects, rather than printed matter. A very important guiding principle in selection should be to avoid over-crowding, for a case which shows too much is uninviting, and frequently discourages the spectator by its very fullness.

In this university community, the aim of the exhibit committee has been to keep the standard high, by showing books of value, both from the treasures of the University Library and from private sources. That the exhibits serve an academic purpose, is evident from the use made of them for theme and journalism topics, and as illustrative material in various courses in both University and public schools. The necessary publicity is achieved thru the daily paper published by the University students, and the local newspaper. Following is a list of the principal exhibits since the opening of the new library building in January, 1920:

THE WALL SHOW CASE

Rare books and mss. loaned by Regent W. L. Clements and Mr. Wilfrid Voynich; reproductions of etchings and engravings in the British Museum; material illustrating the history of the University of Michigan; Audubon's and Gould's colored plates of birds; fine bindings; book-plates; books showing development of orchestration; illustrations of Shakespearean scenes and characters; first editions of famous books in American literature; medical periodicals; autographs of noted persons; English drama thru the 18th century; modern drama and stage history; modern illustrators; Pilgrim tercentenary—Americana from the library of Regent W. L. Clements; war relics given by the French government and loaned by members of the faculty and students; books from famous presses; oriental books and mss. from the library of A. M. Todd; incunabula; facsimiles of illuminated books of the Middle Ages; Dante tercentenary; early maps of North America; selections from the archaeological collections of the University of Michigan; selections from a thousand English dramas purchased in London, November, 1921; plates of foreign costumes; early American newspapers.

Red Tape First Quality

IMPORTED publications must hereafter have country of origin indicated on cover or title page in legible English, indelible and permanent.

So runs the latest Customs rule which has just been promulgated as a Treasury Decision. Somebody has discovered that the law has been systematically violated for these thirty years. The new instructions to port officials intend to stop this "irregularity" right off.

The law provides, "That all articles of foreign manufacture, or production, which are capable of being marked, stamped, branded, or labeled, without injury, shall be marked, stamped, branded, or labeled in legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachment or arrangement, so as to indicate the country of origin. Said marking, stamping, branding, or labeling shall be as nearly indelible and permanent as the nature of the article will permit." (Statutes at Large, vol. 38, pt. 1, p. 194.)

That applies to books and, it is argued, the way to apply is to apply. Ordinary folks had been thinking the title page just such a birth certificate. Not so the new official mind. The title page does not say 'England' it says 'London.' It says 'Leipzig,' instead of 'Germany.' The honest inspector is not to be trifled with.

But what he is to do with his information, after he has it, the decree saith not. No matter where the book comes from, he must pass it free of duty if written in a foreign language, while he will presumably recognize an English book, whether or not he sees 'England' on it.

But, perchance, it is the reader whom a paternal Government would influence. To a prospective buyer of a foreign romance a word of warning shall be emblazoned—'France'! And the new tariff makers in the Senate provide an extra ten per cent duty in case of infraction.

The present Committee has made the mistake of remonstrating—and that, too, after declining to let the Copyright twins do their work. If, therefore, its members are not seen in Detroit, it may be concluded they are in jail. Maybe a few librarians with impatient pens will write something to the Division of Customs, Treasury Department, Washington, D. C. Some Divisor might see the joke.

What is Wrong with the Library

IF your public library cannot lend you the older novelists (not the great giants alone, but also lesser and attractive figures like Frank Stockton and Miss Edith Somerville); if it cannot give you something to read about a subject as profound as Oriental philosophy, or as homely as raising radishes, as esoteric as St. Catherine of Siena, or as practical as bookkeeping—if it has nothing at all for you on these topics, or others like them, then indeed there is a fault somewhere. And if you wish to find out where it lies, and are not content merely with making cutting remarks to the girl at the desk, or writing sarcastic letters to the librarian, you will probably discover that the municipal body, whatever it is, which provides the funds, has been at its favorite pastime of economizing—beginning with the public library. A small boy once told his teacher that Queen Elizabeth was a robber; that she stole food from the army. Asked for his authority, he pointed to the sentence in the history, which said that "Elizabeth pinched her soldiers' rations." This form of pinching has long been popular when practised against public libraries, and until the public begins to protest, it will probably continue.—EDMUND LESTER PEARSON in *The Independent and Weekly Review*.

The Business Librarian and the Department of Commerce

THE business librarian can aid in the work of the United States Department of Commerce by sending trade publications to the Washington office of the Department; by studying Commerce Department publications in the light of the specific needs of business firms, and by supplying the Commerce Department, upon request, with unpublished information upon business subjects. These points are brought out in a recent report on "Commercial Libraries and the Department of Commerce" compiled at the request of the Department of Commerce by a Committee of the national Special Libraries Association of which Mr. H. H. B. Meyer, Chief Bibliographer of the Library of Congress, is chairman.

In a foreword to the Committee's report, which was edited by Dorsey W. Hyde, Jr., president of the Special Libraries Association, it is stated:

The task which Secretary Hoover has set for the Department of Commerce is a difficult one. During the major part of the relatively short period of this country's economic development there was little opportunity, or inclination, for the systematic collection of facts and statistics. However, the lack of such data at the present time is proving a real handicap in the continued expansion of the nation's business. It is a certain prediction that from now on increasing use will be made of the kinds of information that the federal government is endeavoring to salvage in the highways and by-ways of the world of trade.

If the creation of business information is difficult, it is no less a task to discover the manifold applications of such data in the intricate functioning of the business mechanism. This latter task is one for which the special librarian is particularly well fitted by both training and experience, and upon the effectiveness of his efforts will in large part depend the ultimate results of all activities of this character. The report contained in this pamphlet is published by the Special Libraries Association as evidence that the members of the library profession are ready and anxious to do everything in their power to insure the success of the Commerce Department's program.

The Wanderlust Bookshelf

VOTING on the best travel books at the recent travel show held in New York shows the following ten titles, in the order given, to be the choice of those interested.

Two years before the mast. R. H. Dana.
 Travels with a donkey. R. L. Stevenson.
 Innocents abroad. Mark Twain.
 How I found Livingston. H. M. Stanley.
 The Oregon trail. Francis Parkman.
 Mirrors of the sea. Joseph Conrad.
 A Vagabond journey around the world. Harry A. Franck.
 The purple land. W. H. Hudson.
 The travels of Marco Polo the Venetian.
 South. Sir Ernest Shackleton.

Thru announcements in the press nominations were invited for a preliminary list of the best 25 titles. From 198 titles suggested a list arranged chronologically by date of publication was circulated to the voters. In addition to the ten "best" the following were included:

Hakluyt's Voyages.
 Eöthen. A. W. Kinglake.
 The Bible in Spain. George Borrow.
 A naturalist's voyage around the world. Charles Darwin.
 South Sea idylls. C. W. Stoddard.
 The cradle of the deep. Sir Frederick Treves.
 White shadows in the South Seas. Frederick O'Brien.
 Jungle peace. William Beebe.
 Japan: real and imaginary. Sydney Greenbie.
 The sea and the jungle. H. M. Tomlinson.
 Mystic isles of the South Seas. Frederick O'Brien.
 In the eyes of the East. Marjorie Barstow Greenbie.
 The sea and Sardinia. D. H. Lawrence.
 The friendly Arctic. Vilhjalmur Stefansson.
 The Pacific triangle. Sydney Greenbie.

"Real Democracy"

"Emmett haunted the Bowery, and the Cooper Union Library was his daily port of call. He read there hour after hour and the kindhearted librarians helped him find books worth while.

There is more real democracy in an American public library than in any other institution in the land. There the woman of refinement waits on the outcast. What man would dare to discount the influence these women had on such men as Henry George and Jack London! When the brilliant London tramped across the nation there was a woman in a Missouri town who talked to him in a library for three hours. When Henry George was writing his epoch-making book, with hunger and destitution gnawing at his heart, these were the women who helped him. Emmett owes them a debt that black words on white paper will never repay. Even today, perhaps, a library worker in some far corner of the land is instilling courage in a future George or London. And in ten years from now perhaps her faith will be justified."—From "*Emmett Lawler*," by Jim Tully (Harcourt, Brace and Co.), p. 201.

FREE ON REQUEST

The New York State Library has a file of the Christian Science Monitor, 1916 to April 1920, nearly complete for 1918 and 1919; which will be given free to libraries on payment of transportation.

Charles H. Compton of St. Louis has an excellent article on "Librarianship—A New Profession: What It Offers to Men" in the May number of *The Open Road*.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JUNE 1, 1922

THE A. L. A. conference at Detroit, which already overflows in advance reservations at the leading hotels, should be especially interesting because of the grouping under important topics of the program for the several general sessions. Library recruiting is a topic of timely importance, in view of the demand which libraries are making for good human material, quite in excess of present supply. The consolidation of the State and Law Libraries associations, which will be discussed by these two organizations, would be of value in lessening the perplexity of those who conscientiously desire to attend all the special sessions which have bearing on their particular problems. The hospitality proffered at Toronto, in the post-conference excursion, will give librarians from the States unusual opportunity to see the workings of Canadian libraries in the city and province which lead the Dominion in this field. Ballots for the election of A. L. A. officers are now in the hands of members and the result will be an interesting test of the new and rather complicated election-method, the difficulties of which are illustrated by the fact that declinations made it impracticable to present three names for all offices, tho for the Council there is a list of thirty from which to choose ten. It is to be added that the nomination of Mr. Kingsley as an Endowment Trustee, which we were authoritatively requested to announce, has been found impracticable on further consideration by the authorities because of the requirement that two months' notice must be given in advance of the meeting. This will cause less concern by reason of the fact that Judge Porter who is on the printed ballot was the predecessor of Mr. Sheldon, and did his duty despite his residence.

★ ★ ★ ★ ★

THE A. L. A. Committee on Bookbuying very properly makes protest against the absurd revival of a Treasury regulation which has more than once come up and been withdrawn, to the effect that the phrase "Made in England" or other country should be printed on all copies of books imported. Since the

Committee's original protest the regulation has been promulgated as a Treasury decision, but prompt action has been taken in several quarters. It should certainly be sufficient that London or Paris or Leipzig in the imprint of books should indicate to a Treasury official that the books originated from England, France or Germany, and it is the most stupid kind of red-tape that would apply a general regulation in this foolish manner to a product which tells its own story. It is to be hoped that the protest may be immediately effective, as nobody would gain by such a regulation and the precedent of its previous withdrawal should be sufficient. Regarding the tariff, there is nothing new to report, as the book schedule has not yet been reached, but it is hoped that the free list may be modified in the common-sense direction proposed, with bindings on old books and not the value of the book itself being subject to duty. The copyright bill, introduced as H. R. 11476, as formally referred to the Committee on Patents, has not been taken up by that Committee, and it is not likely that hearings will be had before the late summer, if then.

★ ★ ★ ★ ★

NO better service has been undertaken by the A. L. A. than the reading courses, of which the initial issues are now published for distribution by libraries. A useful precedent was set in the publication of vocational reading lists put at the service of our boys immediately after the war. The two courses published show how very serviceable such lists may be for a score of uses, and the slight expense to libraries will be repaid in manifold ways thru the good name they will give the library in the community, especially among those men and women who will find these lists of helpfulness to them as earners. Librarians should also stress the suggestion that these lists should be kept by local booksellers for distribution to their customers, for thus the library and the bookstore can best be kept in step in the common cause of the wider distribution of helpful reading.

LIBRARY ORGANIZATIONS

The Detroit Conference

THE conference promises to break last year's record. Early in May the registration was 1100; and there were 5693 members of the A. L. A. on May 1 this year as compared with 5093 on the same day last year.

Those who have difficulty in getting the hotel accommodations desired are requested to communicate with William Webb, of the Detroit Public Library, chairman of the Hotel Committee, who will assist in securing rooms outside the hotels and give attention to any matters pertaining to hotel rooms which may require adjustment. Announcement is made that no single room accommodations are available and that no request of that kind can be considered.

The following is the tentative schedule of meetings. Unless otherwise noted morning sessions will begin at 9:30; afternoon sessions at 2:30 and those of the evening at 8. Detroit keeps eastern standard time.

GENERAL SESSIONS

First Session—Monday, 8 p. m.

Greetings—Hon. James Couzens, mayor of Detroit; Hon. John C. Lodge, president of the Detroit Common Council.

Address—President M. L. Burton, University of Michigan.

President's Address—Azariah S. Root.

Following this session a reception will be held.

Second Session—Tuesday, 9:30 a. m.

A. L. A. Publications.

The policy of the Editorial Committee—Hiller C. Wellman, chairman, Editorial Committee.

Needs not yet fulfilled—Harry M. Lydenberg.

General discussion—Adelaide R. Hasse of Washington, D. C., representing special libraries of all kinds; Marion Horton of Los Angeles, representing school libraries and library schools; Andrew Keogh of Yale, representing college and reference libraries; and Howard L. Hughes of Trenton, representing popular libraries.

Third Session—Wednesday, 9:30 a. m.

Recruiting for library service.

Address—Judson T. Jennings of Seattle, chairman, Recruiting Committee.

Recruiting for public libraries in Canada—George H. Locke of Toronto.

College and university libraries—W. E. Henry, University of Washington.

Special libraries—Alice L. Rose of the National City Financial Library, New York.

School libraries—Martha C. Pritchard of Detroit Teachers College Library.

Children's libraries—Clara Hunt of Brooklyn. Library Schools—Alice S. Tyler of Western Reserve University Library School.

Fourth Session—Friday, 9:30 a. m.

Report of the Secretary, Treasurer, and Finance and other Committees.

10:00 a. m. A primer of copyright—M. L. Raney.

10:30 a. m. National Library Week.

The Committee's proposal—Willis H. Kerr, chairman Publicity Committee.

Indiana's experience—E. L. Craig, trustee, Evansville (Ind.) Public Library.

Missouri's Book Week—C. H. Compton of St. Louis.

How publishers and booksellers are getting good national publicity—Marion Humble, assistant secretary National Association of Book Publishers.

What a publicity week can do for a library—Herbert S. Hirshberg, Ohio State Librarian.

Fifth Session—Saturday, 9:30 a. m.

The individual's responsibility to his profession. Address—Harold H. Emmons, president of the Detroit Board of Commerce.

Talks on the librarian's duty to the profession.

—Carl B. Roden of Chicago, and Mary E. Hazeltine, University of Wisconsin Library School.

Address—Adam Strohm.

EXECUTIVE BOARD

The Board will meet on the morning of Monday, June 26, at 9:30.

COUNCIL

There will be two sessions: on Monday afternoon and Wednesday evening.

Standardization of library positions will be discussed by Josephine A. Rathbone.

The Committee on Sponsorship for Knowledge recommends "that this report be considered final and the central office of the A. L. A. take measures to officialize sponsorships to at least a hundred in number, during the year beginning July 1, 1922."

The Committee on Library Training urges discussion and, if possible, action on its recommendations:

That the regular library school offer summer school courses in special subjects, for which the same credit

be given as for equivalent courses in the regular schools;

That correspondence courses be offered in certain branches by some schools, with credit;

That the various schools adopt a uniform system of credits.

The Committee on Work with the Foreign Born has presented some "general conclusions" which might well be considered as a basis for an A. L. A. platform.

The Committee on Salaries suggests advisability of setting up an A. L. A. standard for a minimum beginning salary for trained assistants.

The Committee on Reciprocal Relations recommends (1) That the A. L. A. co-operate with the American Press Association, and with the American Farm Bureau Federation in order to further the county library movement; (2) That the A. L. A. establish close alliance with the Booksellers' Association and the National Association of Book Publishers and provide A. L. A. speakers for their programs from time to time. It also suggests that a showing at a conference of mayors would be valuable.

AGRICULTURAL LIBRARIES SECTION

Chairman, Lucy E. Fay, University of Tennessee, Knoxville, Tenn.

First Session, Tuesday Evening

Business Session, followed by an address, "The Place of the Library in a National Program of Agricultural Development," by Professor Charles A. Keffer, director of the Division of Agricultural Extension, University of Tennessee.

Second Session, Friday Afternoon

The subject for the meeting is "A Formulated Policy for Agricultural Libraries." Discussion of organization under the leadership of Mary G. Lacy, librarian, Bureau of Markets, will include (a) combined college and station library vs. separate college and station library; (b) field of research—college library and station library; (c) librarian—whether a member of the faculty and member of the committee on station, college and extension publications.

The discussion of administration will be led by Olive Jones, librarian of the Ohio State University, and will include (a) purchase of books, periodicals, etc.; (b) selection of books—whether by station staff or by department heads with approval of library committee; and (c) bulletins: federal, station, extension, foreign—methods of obtaining out of print numbers and sets, duplication of bound sets and unbound numbers for class work, and arrangement and care.

Extension service will be considered from the viewpoint of the agricultural college library, co-operation with the extension depart-

ment of the college, and state agencies for rural extension—state library, library commission, and others.

CATALOG SECTION

Chairman, Mrs. J. T. Jennings, Public library, St. Paul, Minn.

First Session—Tuesday afternoon

The catalog situation: a study of present conditions in the light of last year's discussion—F. K. Walter.

The training of catalogers: what it should be and what it lacks—J. C. M. Hanson, Chicago; Sophie K. Hiss, Cleveland; Esther Betz, Pittsburgh; Charles Martel, Library of Congress; Harriet E. Howe, Simmons College; Jennie D. Fellows, New York State Library; and others. The catalog department and its bibliographical work outside the department—Mildred M. Tucker, Harvard University Library.

Second Session—Friday afternoon

Small Libraries Division

Catalog problems in smaller libraries. Round table discussion—Ellen Hedrick, North Dakota Library Commission, presiding.

Suggestions for solution of cataloging problems in smaller libraries—Susan Grey Akers, Wisconsin Library School.

Discussion by representatives of library commissions and smaller libraries.

Large Libraries Division

Cataloging the rarities of the Henry E. Huntington Library—George Watson Cole, librarian.

Lessons in Americanism learned thru cataloging local historical material—May Wood Wiggin, Denver Public Library.

A selective catalog: Plans for making the large catalog usable.—Ruth Rosholt, Minneapolis Public Library, and H. H. B. Meyer, Library of Congress.

Music cataloging, and a proposed index to songs and music. Report on questionnaire.

Discussion: Agnes S. Hall, Denver Public Library.

Maps, their care and cataloging—Rudolph Armbruster, Grosvenor Library, Buffalo, New York; and A. G. S. Josephson, John Crerar Library, Chicago.

SCHOOL LIBRARIES SECTION

Chairman, Marion Horton, Public Library, Los Angeles, Cal.

First Session—Tuesday

Round table, May Ingles presiding. Discussion of the relation of the high school librarian to the different departments of the school.—History—Rachel Baldwin, Highland Park, Illinois. Science—Edith M. Schulze, Redondo, Cal. English—Bertha Carter, Oak Park,

Ill. Home economics—Mary J. Booth, Eastern Illinois Normal School, Charleston, Ill. Technology and manual training — Edith Cook, Cleveland. Vocational guidance — Marion Lovis, Detroit. Discussion.

Second Session—Wednesday evening

Books and the Iron Man—Arthur Pound, Flint, Mich.

Books and children in the elementary schools — Jasmine Britton, Los Angeles.

Books and high school students—Speaker to be announced.

Books and normal school students—Grace Viele, State normal school reference library, Buffalo.

Third Session—Friday afternoon

Round table of elementary, normal schools and children's librarians, Bertha Hatch presiding. Children's reading—C. C. Certain, vice-principal Northwestern High School, Detroit.

Teachers and children's reading — Margaret Wright, assistant supervisor, School Department, Cleveland Public Library.

Reading in the elementary schools—Ruth Paxson, head of the School Department, Library Association, Portland, Oregon.

Children's joy-reading — Speaker to be announced.

CHILDREN'S LIBRARIANS SECTION

Chairman, Clara W. Hunt, Brooklyn, N. Y.

First Session—Tuesday afternoon

Some recent books for the story teller—Margaret B. Carnegie, Pittsburgh.

Recent fiction for girls—Annie I. M. Jackson, Toronto, Ont.
