

A

VOICE FROM THE ALIENS

About the Anti-Alien Resolution of the
Cardiff Trade Union Congress.

WE, the organised Jewish workers of England, taking into consideration the Anti-Alien Resolution, and the uncomplimentary remarks of certain delegates about the Jewish workers specially, issue this leaflet, wherewith we hope to convince our English fellow workers of the untruthfulness, unreasonableness, and want of logic contained in the cry against the foreign worker in general, and against the Jewish worker in particular.

It is, and always has been, the policy of the ruling classes to attribute the sufferings and miseries of the masses (which are natural consequences of class rule and class exploitation) to all sorts of causes except the real ones. The cry against the foreigner is not merely peculiar to England; it is international. Everywhere he is the scapegoat for other's sins. Every class finds in him an enemy. So long as the Anti-Alien sentiment in this country was confined to politicians, wire-pullers, and to individual working men, we, the organised aliens, took no heed; but when this ill-founded sentiment has been officially expressed by the organised working men of England, then we believe that it is time to lift our voices and argue the matter out.

It has been proved by great political economists that a working man in a country where machinery is greatly developed produces in a day twice as many commodities as his daily wage enables him to consume.
