# Engaging the local community in a school project on Commons

Posted by Mina Theofilatou on February 21, 2013

| **This post is available in 2 languages:** | Greek ⊞ • English ⊞ |
|---|---|

## In English

The Argostoli Evening High School in Kefalonia, Greece has been active on Wikimedia projects since 2007. It is one of the few schools in Greece to have its own article on Greek Wikipedia (after "surviving" a heated deletion debate). For the school year 2012-13, we decided to embark on two ambitious journeys: First Grade of Upper Secondary is studying the edible species of wild flora on the island, while Second Grade is investigating a local legend that says there are 365 villages on the island, one for each day of the year. What better place to publish the material we are gathering than a Wikimedia Commons gallery!

## The Wild Flora of Kefalonia: Survival and Relish

Kefalonia is an island with bountiful natural assets. The wild flora of the island is mostly typical to regions of the Mediterranean basin, however with certain species that are particular to the Kefalonian flora (e.g. the black fir *abies cephalonica*). It is only logical that the locals turned to the flora in times of difficulty for their mere sustenance: older senior citizens in their late seventies, eighties and nineties have tales to tell of their survival "off the fruit of the land" during World War II.

First Grade of Upper Secondary in the computer lab, working on the wild flora project.

But that's not all: many of the native species are gastronomic delicacies in their own right! Greek chefs can often be found rummaging through open-market stalls, on the lookout for

# UPDATE | Wikipedia Education Program

Welcome to the Wikipedia Education Update — a newsletter from the Wikimedia Foundation that is distributed the first and third Tuesday of each month. Someone from our staff has talked with you about our Wikipedia Education Program to bring Wikipedia into higher education classrooms around the world, and we wanted to keep you in the loop on all of our exciting activities. If you would prefer not to receive these messages, simply reply to the email and ask for your address to be removed. Learn more about subscribing or read the archives.

## Teachers in Namibia learn to edit Wikipedia

Peter Gallert, a faculty member at the Polytechnic of Namibia, authored a post on the Wikimedia Foundation blog highlighting the outcomes of a workshop he led for teachers at schools throughout Namibia, teaching them how to edit Wikipedia. Peter hopes that these teachers will start editing Wikipedia with their students in villages across Namibia. The workshop participants, despite hot temperatures and slow internet connections, moved the article on Witvlei from a stub to a start class article. Read more about Peter's efforts in Namibia.

Jakub Parusinski | *March 19, 2013 06:01*

# Will Wikipedia replace the academic thesis?

*From Ukraine to Egypt, universities are looking to drop traditional requirements for scholarly papers in favor of internet entries.*

Facebook 108 +1 25 Tweet 82 6 196

KYIV, Ukraine — Click on a Wikipedia topic about optometry in the Polish language or Newtonian mechanics in Ukrainian and the article that pops up may well be a college student thesis.

That's because universities in Poland and Ukraine are exploring new requirements. Instead of cribbing research from Wikipedia for papers that will probably only gather dust, advocates of the idea say students would be better off writing their own Wikipedia articles.

# Wikipedia:Training/For students

From Wikipedia, the free encyclopedia
< Wikipedia:Training

**Wikipedia Training** **For students** **Menu** Resources

**Shortcut:**
**WP:STUDENT**

This orientation for students editing Wikipedia as a class assignment consists of four main modules:

- Welcome, a short introduction;
- The Core, an overview of Wikipedia's core principles;
- Editing, a tutorial on the basic mechanics of editing pages and communicating with others; and
- Advanced, some selected advanced topics to help you get off to a good start with your first article.

In total, the four modules should take about *one hour* to complete.

Start the training.

## Welcome

- 1: Welcome to Wikipedia
- 2: About this orientation...
- 3: Navigating this orientation
- 4: Let's begin...

## The Core

- 1: Introduction to Wikipedia's Core Policies and Guidelines
- 3: Wikipedia's Five Pillars
- 9: Verifiability
- 10: Notability

# Wikipedia:Training/For students/Pillar 4

From Wikipedia, the free encyclopedia

< Wikipedia:Training | For students

## Wikipedia's Five Pillars: Number 4

**Editors should interact with each other in a respectful and civil manner.**

- Respect and be polite to your fellow Wikipedians, even when you disagree.
- Apply Wikipedia etiquette, and avoid personal attacks. Find consensus, avoid edit wars, and remember that there are about four million articles on the English Wikipedia to work on and discuss.
- Act in good faith, and never disrupt Wikipedia to illustrate a point.
- Be open and welcoming, and assume good faith on the part of others.
- When conflict arises, discuss details on the talk page, and if needed, follow the dispute resolution process.

# Wikipedia:Training/For students/Text editing

From Wikipedia, the free encyclopedia

< Wikipedia:Training | For students

## Text editing: '''boldness''' and [[links]]

Now it's time to get started editing! You can navigate to your own sandbox page in another browser window to try it out for yourself.

The wiki code for **bold** text is like this:

`'''bold'''` = **bold**

Creating a wikilink to another article looks like this:

`[[bold]]` = bold

That link to the article bold will redirect you to Emphasis (typography). To link to an article with a different name than the text, used a piped link, like this:

`[[boldness|bold]]` = bold (with the link to boldness)

**Trouble viewing this video?**

Watch editing basics: ''' boldness ''' and [[ links ]] on YouTube

# Wikipedia:Training/For students/Choosing articles 3

From Wikipedia, the free encyclopedia

< Wikipedia:Training | For students

**Wikipedia Training** **Advanced** Menu Resources Page 4 of 13

## Choosing articles

***Good choice***

- Choose a topic that is well established in its field, but only weakly represented on Wikipedia. The best choice is a topic for which a lot of literature is available but which isn't covered extensively on Wikipedia.
- Gravitate toward "stub" and "start" class articles. These articles often have only 1-2 paragraphs of information and are in need of expansion. Relevant WikiProject pages can provide a list of stubs that need improvement.
- Before creating a new article, do an in-depth search of related topics on Wikipedia to make sure your topic isn't already covered. Often, an article may already exist under another name, or the topic may be covered as a subsection of a broader article.

# Creating Education Program talk:University of Wikipedia/Wikipedia 101 (Testing)/Course description

## Instructions for "Course description" subpage

This should be a short blurb about the whole course (not just the Wikipedia part of it).

Replace the instructions below with your text. After you save the page, return to your main course page to continue the wizard.

This is a **talk page**. Please respect the talk page guidelines, and remember to sign your posts by typing four tildes (~~~~).

*Content that violates any copyrights will be deleted. Encyclopedic content must be verifiable. Work submitted to Wikipedia can be edited, used, and redistributed—by anyone—subject to certain terms and conditions.*

B I Advanced Special characters Help Cite

```
Replace this sentence with the description of your course, and then save the page and return to your main course page.

<!--The code below is part of the wizard. Leave it in place. It won't show up as part of your course page.-->

<noinclude><center><big>
([{{fullurl:{{#titleparts:{{SUBJECTPAGENAME}}|-1}}|action=purge}} Click to return to your main course page and continue.])
</big></center></noinclude>

This course is all about Wikipedia. We will explore Wikipedia's history, its editor culture and how that varies across languages, its reliability and how people have tried to measure it, its technology stack, and how to actually contribute to it. [edit]

As a final project, each student will write a new article about a notable Wikipedian.

**Contents** [hide]
1 Article banners

**Add Your Course Timeline**

The timeline is a list or table of the key due dates and the expected timeline for the Wikipedia-related assignment(s). This helps your students stay on track, and helps your ambassadors keep up with your class activities. Clicking the "Add Your Class Timeline" button will take you to a page with a sample timeline created by the Wikimedia Foundation. Feel free to modify this template to meet your class's needs, or completely replace it with your own.

You can find more information about the thinking and experience behind this example assignment timeline in our Example Syllabus.

Add Your Class Timeline

(Click to refresh if you've saved the timeline but this message still appears.)

# Creating Education Program talk:University of Wikipedia/Wikipedia 101 (Testing)/Timeline

## Instructions for "Timeline" course subpage

This one is the trickiest part of building your course page, but also the most important. The first priority is simply to get the information onto your course page. If you're still developing the detailed timeline for your course, try consulting the sample syllabus and other assignment design resources on the Education Portal.

The example timeline below uses basic formatting, putting each week into its own subsection; that may be a good way to start. Putting the week-by-week or meeting-by-meeting details of your course plan into table, however, is usually better for students and others browsing the timeline (See here for an example.) You can insert a blank table by clicking the "Advanced" button in the edit toolbar, then clicking the table icon on the right.

You may want to work on this bit by bit. You can add some content, save the page, and then come back and fix it up later. If you need help getting the formatting right, try adding {{helpme}} to the page, along with a description of what you're trying to do, and then save it.

This is a **talk page**. Please respect the talk page guidelines, and remember to sign your posts by typing four tildes (~~~~).

*Content that violates any copyrights will be deleted. Encyclopedic content must be verifiable. Work submitted to Wikipedia can be edited, used, and redistributed—by anyone—subject to certain terms and conditions.*
