# OCCUPATIONAL CHARACTERISTICS OF DISABLED WORKERS, BY DISABLING CONDITION

Disability Insurance Benefit Awards  
made in 1959-1962 to Men  
under age 65

In the past when mortality rates were higher, health problems were measured primarily through studies of deaths and causes of death. Now that death rates are stabilized at lower levels, attention has been directed to the frequency of disabling conditions. An important source of such information is data produced by the Social Security Administration on disability insurance claims and awards.

Within the technical definitions outlined below these data represent for the first time current and comprehensive information on the nature of the seriously disabling conditions experienced by U.S. males in the work force. All occupational categories and the preponderance of all disabling conditions within each occupation are depicted. In addition an Index figure has been calculated which shows the extent to which each condition may be under- or over-represented for specific occupations.

Since 1955, the Social Security Administration has preserved the insurance status for old-age and survivors insurance benefits of workers unable to work because of disability. In 1957, disabled insured workers age 50 to 65 became eligible for cash benefits under this program. In 1960, those under age 50 also became eligible for disability benefits.<sup>1</sup> Monthly disability insurance benefits are payable to insured workers up to age 65 who are unable to work because of disability. During 1959-1962, the period covered by the data presented in this publication, the Social Security Act defined disability as "inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or to be of long continued and indefinite duration."\* To be insured, a person must have worked in employment covered by social security in at least 5 of the last 10 years before he became disabled.

Data in this publication are based upon a 50 percent sample of all disability awards made to males during the years 1959 to 1962. The disabilities for which awards were made had existed

---

\*The 1965 Amendments to the Act deleted "or to be of long continued and indefinite duration" and inserted instead "or has lasted or can be expected to last for a continuous period of not less than 12 months."

for varying periods of time prior to the award, and one-third of the cases with which this publication deals had their onset before 1959, as the following table shows:

Percentage Distribution of 1959-1962 Disability Awards,  
by Year of Onset of Disability

<u>Year of Onset</u>	<u>Percent</u>
1962	5.3
1961	18.9
1960	22.7
1959	20.0
1958	16.0
1957	6.5
1956	2.7
1955	1.6
1950-1954	4.3
1949 & earlier	2.0
Total	100.0

The data are present in two tables. Table 1 shows the number of awards by age at time of filing and by the primary disease or condition which resulted in the disability. Table 2 presents the same data associated with each occupational group. Diseases were classified (except for minor adaptations by SSA) according to the International Classification of Diseases, Seventh Revision, published by the World Health Organization in 1955. The ICD codes included under each title are shown under the column "Int Code" on each table. Occupations were classified according to the Dictionary of Occupational Title, Second Edition, published by the Department of Labor in 1949. The 3-digit figures to the right of some occupational titles (for example, Accountants and Auditors, 000) correspond to equivalent Bureau of the Census codes.

Table 2 also includes a calculated index value denoted as a proportionate morbidity ratio (PMR). The PMR is the ratio of the observed number of disability awards to the expected number for an occupation-condition group. The expected value is that number of diseases which would appear in an occupational group if the given occupational group and the all occupations group had the same proportion of awards with the given condition. PMR's greater than 1 indicate an excess of that condition in that occupation. Discussion of the advantages as well as the shortcomings of the PMR are included in references 2, 3, and 4 and are therefore not repeated here.

Proportionate morbidity ratios have been calculated for all lines showing 25 or more cases, others show an asterisk. Data in the two tables permit calculations for lines of less than 25 cases or for broader categories, if desired, by taking the sums of several lines.

For example, the PMR value for accountants and auditors with pulmonary tuberculosis is given as .58. This value is obtained as follows:

1. From Table 1, obtain the number of males with pulmonary TB in age group under 35 (2,946) and the total of all males under 35 (32,316).
2. From table 2, obtain the total number of male accountants and auditors under age 35 (76).
3. Multiply the total for the diagnosis (2,946) by the total for the occupation (76) and divide by the total in the age group (32,316). The result is 6.93.
4. Repeat steps 1-3 above for two additional age groups, combining 35-44 and 45-49 into a 35-49 group and combining 50-54, 55-59 and 60-64 into a 50-64 group. The result of the computations for the second and third age groups are 34.10 and 48.21, respectively.
5. Add the results for the three age groups:  $6.93 + 34.10 + 48.21 = 89.24$ .
6. From table 2 obtain the total of all male accountants and auditors with diagnosis of pulmonary TB (52). Divide 52 by 89.24. The result is 0.58, the Proportionate Morbidity Ratio, or PMR.

854	Ammunition, occupations in production of, N.E.C., unskilled	259
793-799	Apprentices, N.E.C.	231
533, 733	Asbestos and insulation workers	178
760	Attendants, auto service and parking	226
242	Attendants, hospital and other institution, N.E.C.	43
240, 243-245	Attendants, recreation and amusement, N.E.C.	41
502, 702	Automobiles, occupations in manufacture of, N.E.C., skilled, semi-skilled	147
902	Automobiles, occupations in manufacture of, N.E.C., unskilled	280
401	Bakers	64
402, 602	Bakery products, occupations in production of, N.E.C., skilled, semi-skilled	66
802	Bakery products, occupations in production of, N.E.C., unskilled	232
232	Barbers, beauticians, and manicurists	38
221	Bartenders	30
486, 686	Blacksmiths, forgemen, and hammermen	137
574, 774	Blasters and powdermen	206
223	Boarding- and lodging-house keepers	32
483, 683	Boilermakers	132
101	Bookkeepers and cashiers/except bank cashiers	20
461, 661	Boots and shoes, occupations in manufacture of, skilled, semi- skilled	109
861	Boots and shoes, occupations in manufacture of, unskilled	263
538, 738	Brakemen, railroad	182
524, 724	Brickmasons, stonemasons, and tile setters	166
905	Building of trans. equip./except autos and aircraft/, N.E.C., unskilled	283
282-295	Building service workers and porters	53
432	Cabinetmakers	89
404, 604	Canning and preserving of foods, occupations in, skilled, semi- skilled	68
804	Canning and preserving of foods, occupations in, unskilled	235
525	Carpenters	168
526, 726	Cement and concrete finishers	170
467, 667	Cement, concrete, gypsum, etc., occupation in production of, skilled, semi-skilled	113
867	Cement, concrete, gypsum, etc., occupations in production of, unskilled	266
536, 736	Chauffeurs and drivers, bus, taxi, truck, and tractor	179
453, 653	Chemical products, occupations in production of, N.E.C., skilled, semi-skilled	103

Alphabetical List of Occupations--Continued

DOT Code	Occupation	Page
853	Chemical products, occupations in production of, N.E.C., unskilled	258
466, 666	Clay products, occupations in production of, skilled, semi-skilled	112
866	Clay products, occupations in production of, unskilled	265
102-132, 134-136, 138-149	Clerical and kindred workers, N.E.C.	24
444, 644	Compositors and typesetters	96
539	Conductors, bus and street railway	183
092	Conductors, railroad	17
405, 605	Confections, occupations in production of, skilled, semi-skilled	69
805	Confections, occupations in production of, unskilled	236
523, 723	Construction machinery, operator	164
532, 732	Construction occupations, N.E.C., skilled, semi-skilled	177
932	Construction occupations, N.E.C., unskilled	290
226	Cooks, except private household	34
407, 445, 446, 447, 473, 481, 488, 508, 512, 528, 572, 607, 673, 681, 688, 708, 728, 777	Craftsmen, foremen, and kindred workers, N.E.C.	71
573, 773	Cranemen, derrickmen, hoistmen, and shovelmen	204
406, 606	Dairy products, occupations in processing of, skilled, semi-skilled	70
806	Dairy products, occupations in processing of, unskilled	237
735	Deliverymen/light/and routemen	223
518, 718	Dyers	158
497, 697	Electricians	142
499, 699	Electr. machinery and accessories, occupations in mfr., N.E.C., skilled, semi-skilled	145
899	Electr. machinery and accessories, occupations in mfr., N.E.C., unskilled	278
474, 674	Electroplating, galvanizing and related processes, occupations in, skilled, semi-skilled	119
874	Electroplating, galvanizing and related processes, occupations in, unskilled	270
014-020	Engineers	5
311-336, 339, 341-343, 345-349	Farm laborers	57
337, 344	Farm managers and foremen	59
301-310, 338	Farmers/owners and tenants	55
477, 677	Filers, grinders, and polishers, metal	124
263	Fireman	49
387-389	Fishermen and oystermen	62
591-595, 597, 599	Foremen, N.E.C.	219
